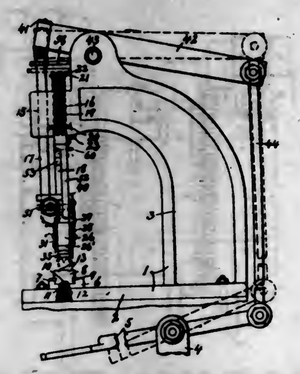
1,400,841. COMBINED FLUID-PRESSURE AND REGENERATIVE BRAKE. WALTER V. TURNER, Wilkinsburg, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Oct. 22, 1917. Serial No. 197,805. 4 Claims. (Cl. 303—3.)

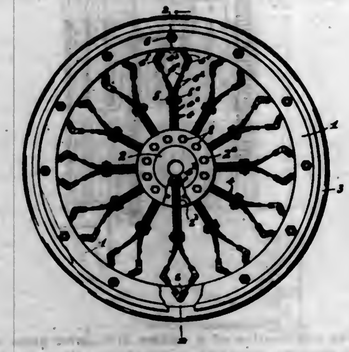
4. The combination with means for applying air brakes to a railway train unit and means for applying electric braking to the same unit, the two braking means being each normally separately operable, of means for making an emergency application of the air brakes, and means re-

sponsive to an emergency application by the train operator but unresponsive to a break in the train pipe for rendering the electric braking inoperative.



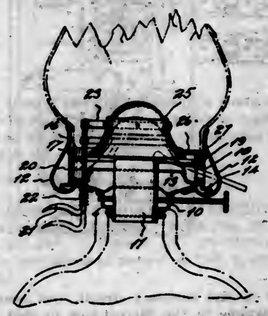
1,400,842. COMBINED TYPEWRITING AND COMPUTING MACHINE. HARRY H. VICKERS, Corona, N. Y., assignor to Underwood Computing Machine Company, New York, N. Y., a Corporation of New York. Filed Oct. 22, 1920. Serial No. 418,671. 16 Claims. (Cl. 235—60.)

2. In a combined typewriting and computing machine, in combination, a traveling carriage, carriage-actuated denomination-selecting means comprising a plurality of sets of jacks and a plurality of sets of rods operable thereby, a controlling member at the front of the machine, and means whereby movement of the controlling member to different positions will disconnect different sets of jacks and rods.



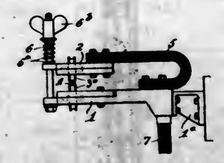
7. In a combined typewriting and computing machine, in combination, a traveling carriage, a denomination-selecting tappet thereon, a set of denominational jacks to be actuated serially by said tappet, thrust-rods to be actuated by said jacks, a frame having apertures through which the upper ends of the rods pass, means yieldably holding said frame in position to render said jacks effective on said rods, and a cam movable transversely of the machine and adapted in one position to hold the frame in position to render the jacks ineffective on the rods, or in another position to enable the frame to return to normal position.

1,400,843. STAPLING-MACHINE FOR LEATHER LOOPS. FREDERICK H. WILBUR, Binghamton, N. Y., assignor to Reynolds Manufacturing Company, West Toledo, Ohio, a Corporation of Ohio. Filed Sept. 15, 1919. Serial No. 323,992. 6 Claims. (Cl. 1—4.)



2. In a loop-forming and attaching machine, the combination of a support for the article to which the loop is to be attached, a plunger movable toward and from the support, means for operating the plunger, said plunger having a removable section slidably interlocked with the main body thereof, a form on said section for supporting a loop-blank and around which said blank is adapted to be folded, means actuated by the plunger operating means for folding the ends of the blank around said form, and means on the plunger for receiving and temporarily holding a clenching staple in position to be clenched through the ends of the folded blank and work to which the loop is to be attached as the plunger is forced toward said support.

1,400,844. RESILIENT VEHICLE-WHEEL. WILLIAM C. WRIGHT, Salem, and CHARLES M. WRIGHT, Lisbon, Ohio. Filed June 25, 1920. Serial No. 391,662. 8 Claims. (Cl. 152—28.)

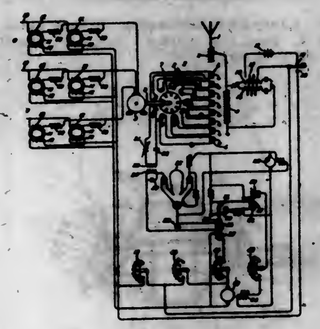


2. A resilient wheel, comprising hub and felly members, spokes connected to said hub member and terminating in diverging toggle arms, toggle links pivotally connected to the latter and said felly member, auxiliary spoke springs in said hub member having their ends extending over the base portions of said diverging toggle arms, and sleeves adjustably mounted on said auxiliary spoke springs for regulating the sensitiveness of said felly member relative to said hub.

1,400,845. LAMP-EXTINGUISHER. HENRY ZAJAC, Passaic, N. J. Filed June 1, 1921. Serial No. 474,057. 1 Claim. (Cl. 67—11.)

A lamp burner comprising a base, a wick tube extending therethrough, chimney securing prongs carried by the base, a chimney supporting ring associated with the base, said ring having an opening therein, an inwardly extending collar surrounding the opening, a burner cap associated with the base, a shutter carried by the burner cap for closing the opening in the ring, spring pressed means to normally hold the burner cap downwardly and the shutter in closed position, an extending handle for elevating the burner cap from the exterior of the lamp burner.

1,400,846. HEATING APPARATUS FOR METAL-WORKING MACHINES. CHARLES E. F. AHLM and THOMAS F. FERRY, Cleveland, Ohio. Filed May 7, 1920. Serial No. 379,489. 10 Claims. (Cl. 219—6.)

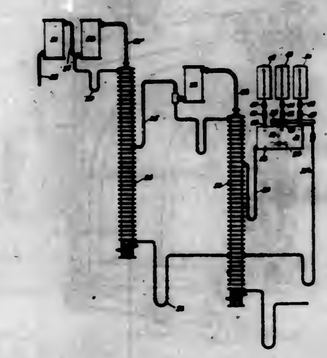


1. In an electric heating device, a plurality of superposed electrodes spaced unequal distances apart longitudinally and at opposite sides of the pathway of the material to be heated passed therebetween.

1,400,847. SYSTEM OF RADIO COMMUNICATION. ERNST F. W. ALEXANDERSON, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Dec. 31, 1918. Serial No. 269,035. 21 Claims. (Cl. 171—119.)

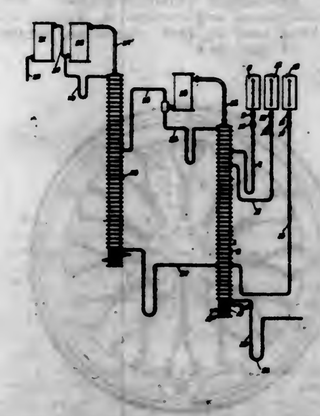
1. A system for the production of high frequency alternating current of substantially constant frequency comprising in combination a high frequency alternator, an auxiliary electric circuit electrically associated with said alternator and adapted to receive a current of the frequency generated by the alternator, a current rectifying electric circuit electrically associated with said auxiliary

electric circuit, means whereby the current-flow in said rectifying circuit has a greater rate of variation than the



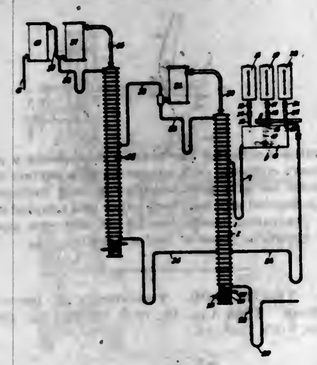
current-flow in said auxiliary circuit, and means responsive to variations in the current-flow in said rectifying circuit for varying the speed of said alternator.

1,400,848. PRESSURE-GAGE. THOMAS W. ANDERSON, Camden Point, Mo., assignor to A. Schrader's Son, Incorporated, Brooklyn, N. Y., a Corporation of New York. Filed June 14, 1915. Serial No. 33,867. 4 Claims. (Cl. 73—111.)



1. In a pressure gage, the combination of a rotary cylindrical drum-like indicating member, a longitudinally reciprocating pressure-responsive member, said indicating member having its axis of movement in the line of movement of said pressure responsive member, a connection between the two for translating the movements of the reciprocating member into rotary movements of the indicating member, and a cylindrical casing in which said parts are located in alinement one beyond another, said casing having a substantially straight bore of even diameter throughout.

1,400,849. CONTINUOUS PROCESS FOR THE MANUFACTURE OF ESTERS. ARTHUR A. BACKHAUS, Baltimore, Md., assignor to U. S. Industrial Alcohol Co., a Corporation of West Virginia. Filed Aug. 7, 1918. Serial No. 248,754. 28 Claims. (Cl. 23—24.)

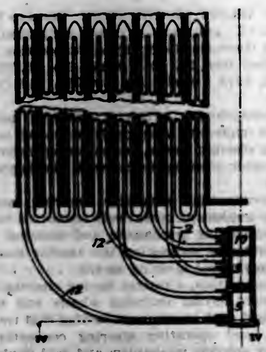


1. The process of manufacturing esters comprising passing an organic acid in countercurrent to gradually increasing concentrations of an alcohol, and in the presence of a catalytic agent while distilling off the ester formed.

1,400,850. APPARATUS FOR THE MANUFACTURE OF ESTERS. ARTHUR A. BACKHAUS, Baltimore, Md., assignor to U. S. Industrial Alcohol Co., a Corporation of West Virginia. Filed Aug. 7, 1918. Serial No. 248,755. 4 Claims. (Cl. 23—24.)

1. The combination of a column still, inlet pipes near the top thereof connected to separate containers, an inlet pipe near the bottom thereof connected to a container, an outlet near the bottom of the still, a second column still, a delivery pipe leading from the top of the first still to the second still, a return pipe leading from the bottom of the second still to a point near the bottom of the first still, and a vapor exit for the second still.

1,400,851. APPARATUS FOR THE PRODUCTION OF ESTERS. ARTHUR A. BACKHAUS, Baltimore, Md., assignor to U. S. Industrial Alcohol Co., a Corporation of West Virginia. Filed Aug. 7, 1918. Serial No. 248,756. 5 Claims. (Cl. 23—24.)



1. The combination of a column still, an inlet pipe near the top thereof, an outlet near its bottom, a second column still, a delivery pipe leading from the top of the first still to the second still, a return pipe leading from the bottom of the second still to the bottom of the first still, and a vapor exit at the top of the second still.

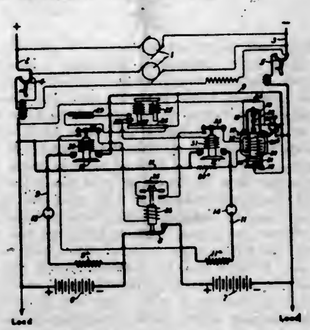
1,400,852. METHOD FOR THE PRODUCTION OF ESTERS. ARTHUR A. BACKHAUS, Baltimore, Md., assignor to U. S. Industrial Alcohol Co., a Corporation of West Virginia. Filed May 23, 1919. Serial No. 299,223. 25 Claims. (Cl. 23—24.)

1. The process of manufacturing esters comprising passing an acid fermented distillery waste in counter-current to gradually increasing concentrations of an alcohol in the presence of a catalytic agent while distilling off the esters formed.

1,400,853. SUPERHEATER. JOHN A. BARNES, West New Brighton, N. Y., assignor to The Superheater Company, New York, N. Y., a Corporation of Delaware. Filed Nov. 7, 1917. Serial No. 200,691. 6 Claims. (Cl. 122—462.)

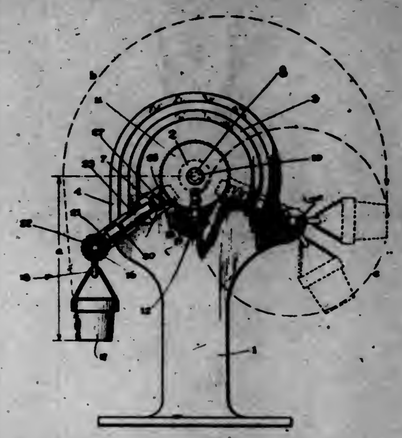
1. In a superheater of the class described, the combination of a header provided with three chambers, a set of superheater elements connecting the first and second chambers, a second set of elements connecting the first and third chambers, and a third set of elements connecting the third and second chambers.

1,400,854. DENTAL LIP AND TONGUE DEPRESSOR. ARTHUR BASS, San Rafael, Calif. Filed Mar. 14, 1921. Serial No. 452,066. 3 Claims. (Cl. 128—15.)



1. In a tongue and lip depressor, a plate of U shape adapted to be placed around a plurality of teeth, the inner leg shaped to depress the tongue, and the outer leg widened and curved to lay over the lip.

1,400,855. SIGN LUMINOUS BY REFLECTION. ERNEST BERTRON, Brussels, Belgium. Filed Feb. 25, 1920. Serial No. 361,188. 3 Claims. (Cl. 40—130.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

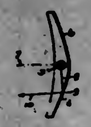


1. A luminous sign comprising a molded sign body having seatings formed thereon in the molding operation and thin, metal coated cup shaped disks cemented on said seatings and arranged to form the outlines of the characters constituting the luminous sign.

1,400,856. SYSTEM OF ELECTRICAL DISTRIBUTION. WILLIAM L. BLISS, Niagara Falls, N. Y., assignor to U. S. Light & Heat Corporation, Niagara Falls, N. Y., a Corporation of New York. Filed Apr. 3, 1916. Serial No. 88,634. 16 Claims. (Cl. 171—313.)

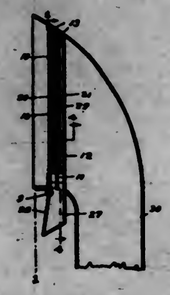
1. In combination, an electrical source of supply, means supplied thereby, a storage battery normally floating across said mains whereby to be instantly available in case of failure of said source, a switch dividing said battery into two sections, other switches for connecting each section across the mains for charging, electro-magnetic operating means for each of said switches, and means whereby the operating means of said first mentioned switch is rendered inoperative by the movement of said other switches.

1,400,857. CENTRIFUGAL CASTING-MACHINE. CHARLES FRANCIS BLOOM, Portland, Oreg. Filed Feb. 7, 1920. Serial No. 354,896. 18 Claims. (Cl. 22—65.)



1. Casting apparatus, comprising means carrying a flask with a mold in top of which metal is melted, and means on which it is operated to spirally approach a stopping position for the carrying means and spinning position for the flask.

1,400,858. NECKTIE-HOLDER. JOHN BOROS, Milwaukie, Oreg., assignor to Perfection Tie Company, Portland, Oreg. Filed Feb. 15, 1921. Serial No. 445,143. 2 Claims. (Cl. 2—83.)



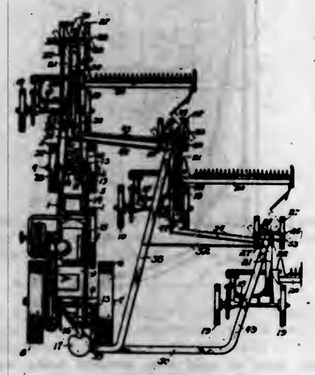
1. In a cravat support, a flexible supporting member, a supporting member including opposed legs positioned on the flexible supporting member, a spring member having loops formed at its ends and secured to the supporting member, said loops adapted to accommodate the flexible supporting member, the walls of said loops adapted to grip the flexible supporting member to restrict movement of the supporting member with respect to the flexible supporting member.

1,400,859. MULTIPLE REFLECTOR. EDMUND N. BROWN and MILTON H. SILVERMAN, San Francisco, Calif., assignors to Majestic Electric Development Company, San Francisco, Calif., a Corporation of California. Filed Nov. 4, 1920. Serial No. 421,710. 3 Claims. (Cl. 219—34.)

1. A multiple reflector for heaters comprising a plurality of concave elements each consisting of a surface of revolution about an axis perpendicular to said surface, said elements connected adjacent each other and adapted to contain heat generating means located on said axis and substantially about the focus of said concavity.

1,400,860. VENTILATOR. THEOPHILUS M. BROWN, Seattle, Wash. Filed Aug. 19, 1920. Serial No. 404,504. 8 Claims. (Cl. 183—42.)

2. A ventilator comprising three spaced parallel plates each formed with a plurality of vertical slots, the outermost plates having inwardly directed flanges at the edges of said slots, the inner plate having flanges upon both sides of the plate at the side edges of the slots therein.



1,400,861. DRAFT CONNECTION. EDWARD W. BURGESS, Chicago, Ill., assignor, by mesne assignments, to International Harvester Company, a Corporation of New Jersey. Filed Mar. 25, 1916, Serial No. 86,759. Renewed Nov. 22, 1919. Serial No. 339,965. 14 Claims. (Cl. 56—6.)

1. In combination, a tractor, steering means carried thereby, an implement operatively connected to the tractor and having steering means, and means operatively connecting the tractor steering means with the implement steering means.

3. In combination, a tractor, steering means carried thereby, an implement operatively connected to the tractor and having cutting mechanism and steering means, and means operatively connecting the tractor steering means with the implement steering means.

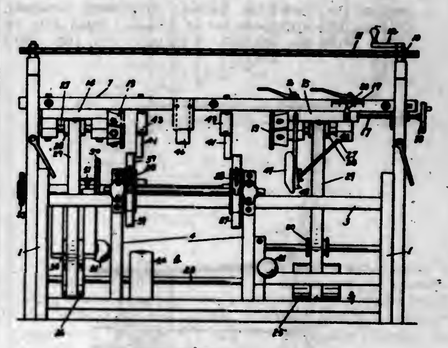
4. In combination, a tractor having steering mechanism, an implement having carrying wheels and steering elements, a rigid push member connecting said tractor to said implement, and operating steering connections between said tractor steering mechanism and said implement steering elements.

6. A mechanism of the class described including, in combination, a tractor including a truck frame and a steering mechanism, an implement including carrying wheels, a draft tongue, a tongue truck supporting said draft tongue, rigid propelling means connecting said draft tongue with the truck frame of the tractor, and rigid operative steering connections between the tractor steering mechanism and the wheels of said tongue truck.

8. A mechanism of the class described including, in combination, a tractor including a truck frame and a steering mechanism, an implement including carrying wheels, a draft tongue, a tongue truck supporting the front end of said draft tongue and including a vertically disposed stem, said stem being journaled upon the front end of said draft tongue, an arm secured to said stem, a push member having its rear end connected with the front end of the truck frame of the tractor and its front end pivotally connected with the front end of said draft tongue, and operative connections between the tractor steering mechanism and the arm secured to the stem of said tongue truck.

1,400,862. INDEX-TAB. JOHN LOUIS BURGOYNE, San Francisco, Calif. Filed May 23, 1921. Serial No. 471,893. 18 Claims. (Cl. 40—23.)

1. An index tab comprising a transparent member, a backing sheet and a strip therebetween, said strip having an upper edge forming a ledge on which an insert is adapted to slide when said insert is placed between said backing and said transparent member.

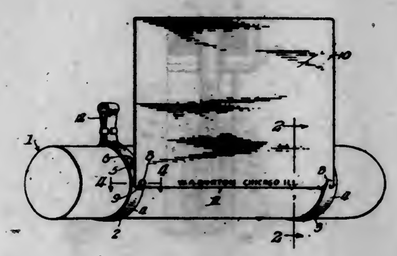


1,400,863. OIL DASH-POT. GEORGE A. BURNHAM, Saugus, Mass., assignor to Sears B. Condit, Jr., Brookline, Mass. Filed May 17, 1917. Serial No. 169,228. 2 Claims. (Cl. 188—96.)

1. A retardation device comprising a solenoid, a core operable therein, a dash pot comprising a cylinder adapted to contain oil depending from said solenoid, a piston operable therein, a piston-rod connected with said piston extended through the end of said cylinder and connected

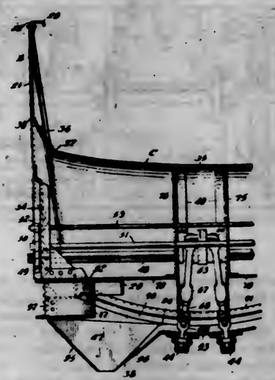
with said core, and an inclosing casing for said cylinder adapted to receive oil.

1,400,864. RELISHING-MACHINE. CHAUNCEY D. BURRITT, Cadillac, Mich. Filed Apr. 25, 1919. Serial No. 292,734. 5 Claims. (Cl. 144—203.)



1. In a structure of the class described, the combination of a frame, a vertically adjustable cutter head bar, adjusting means therefor, cutter head members mounted on said head bar, one of said head members being mounted for axial adjustment of the cutter, cutters carried by said cutter head members, a feed conveyer below said cutter head bar comprising sprocket wheels and sprocket chains, and work carriers, a pair of rearwardly inclined yielding work presser bars mounted on said cutter head bar to engage the work as it is carried rearwardly by the conveyer, a yielding work holder member mounted on said cutter head bar centrally between said work holder bars to engage the work while it is acted upon by the cutters, a yielding end thrust member at one side of the conveyer carried by the adjustable cutter head member to engage one end of the work as it is carried by the feed conveyer, and an adjustable work guide disposed at the other side of the conveyer to position the work.

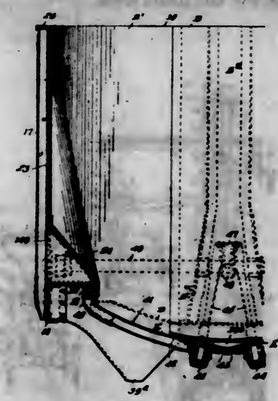
1,400,865. CARD-HOLDING CLIP FOR TYPEWRITERS. WARD A. BURTON, Pittsburgh, Pa. Filed Nov. 15, 1920. Serial No. 424,024. 7 Claims. (Cl. 197—136.)



1. The combination with a typewriter platen, of two separate annular members removably clamped about said platen in lateral spaced relation, said members having

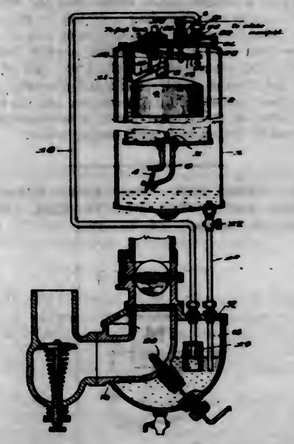
means to receive the lower corners of an index or other card for holding the lower marginal portion of the card

between the members in contact with the platen to permit typing of a name and address or other desired data along and adjacent the lower edge of the card.



1,400,866. ORE-CAR. ARGYLE CAMPBELL, Chicago, Ill., assignor to Enterprise Railway Equipment Company, Chicago, Ill., a Corporation of Illinois. Filed July 12, 1920. Serial No. 395,507. 8 Claims. (Cl. 105—250.)

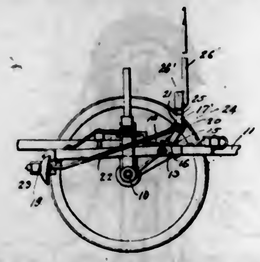
4. In a hopper car, the combination with side hopper walls; of end hopper walls, each end hopper wall sloping downwardly from the top of the car and of a section gradually changing from flat to curved and with the curvature of minimum radius at the bottom thereof, the lower edges of said side and end hopper wall defining a single, unobstructed discharge opening; means for closing said opening; and mechanism for operating said means.



1,400,867. DUMPING-CAR. ARGYLE CAMPBELL, Chicago, Ill., assignor to Enterprise Railway Equipment Company, Chicago, Ill., a Corporation of Illinois. Filed Dec. 27, 1920. Serial No. 433,214. 8 Claims. (Cl. 105—247.)

2. An inclined hopper end wall for a dumping car, said wall comprising: a main portion concave on its upper side and of the same curvature from its top to bottom edge, and two flat side portions merging with said main

portion, each of said side portions being additionally inclined with respect to said main portion.

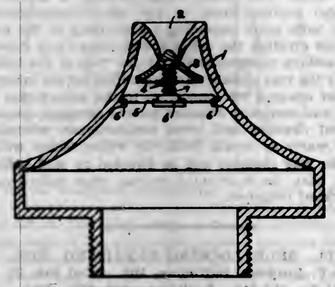


1,400,868. AUTOMATIC FUEL CONTROL. THOMAS WILLIAM CRANE, Imperial, Calif. Filed Dec. 21, 1920. Serial No. 432,351. 3 Claims. (Cl. 158—36.)

1. The combination with a fuel containing vacuum tank, of a carbureter having a fuel chamber, a fuel supply pipe extending from said tank into said fuel chamber and terminating below the level of the fuel in said chamber, an air conducting pipe extending from said tank to said chamber and terminating at approximately the level of the fuel therein, said vacuum tank and said pipes constituting the sole means for maintaining a constant fuel level in the chamber of said carbureter, and means surrounding the air inlet end of said air conducting pipe to prevent the splashing of the fuel adjacent said air inlet pipe.

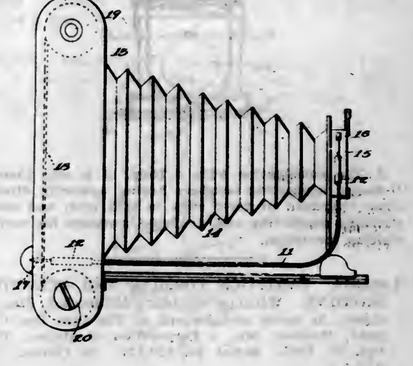
1,400,869. VEHICLE-BRAKE. CHARLES F. CRAWFORD, Liberty, N. Y. Filed Feb. 14, 1920. Serial No. 358,573. 2 Claims. (Cl. 188—12.)

1. In a vehicle brake, the combination with the front axle hounds, of bearing eyes on the forward portions of the hounds, a brake beam at the rear of the front wheels of the vehicle, forwardly extending rods connected with



the beam, a yoke having inturned ends rotatably supported in the eyes and connected with the said rods, and means for rocking the yoke.

1,400,870. AUTOMATIC CUT-OUT. LORENZO DOW CRONINGER, Dayton, Ohio. Filed June 18, 1920. Serial No. 389,841. 12 Claims. (Cl. 200—80.)



1. In a device of the character described, a rotatable body portion having an outwardly extending cavity, a conductor carried by said body portion and comprising two sections, each section having a part extending through the wall of said cavity in the outer end thereof and forming a contact, and a body of conducting material mounted in said cavity and movable by centrifugal force into engagement with said contacts.

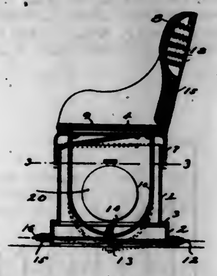
1,400,871. OIL-CAP FOR VEHICLE-WHEELS. ANDREW JOSEPH CROTTY, Knocklong, Ireland. Filed Sept. 5, 1917. Serial No. 189,865. 2 Claims. (Cl. 184—89.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

2. In an oil cap having a conical casing with an internal flange at the apex thereof and spaced internal lugs on the walls thereof, a valve comprising a conical body member having a recess in the base thereof, a cross member seated on the internal lugs of the walls of the casing, a pin secured in the cross piece, and a spring extending between the said cross piece and the said valve member, one end of the spring surrounding the said pin and the other pin entering the said recess in the base of the valve member to center the said spring and normally maintain the valve member in position against the valve seat formed at the extremity of the said internal flange at the apex of the casing.

1,400,872. DOUBLE-EXPOSURE AND BLANK-FILM PREVENTING DEVICE FOR CAMERAS. HOWARD JOHNSON FRIES, Tacoma, Wash. Filed Jan. 13, 1920. Serial No. 351,141. 3 Claims. (Cl. 95—31.)

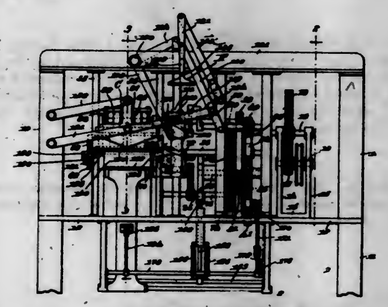
1. In a film camera adapted to use a film having a notched edge and having a shutter mechanism and an actuating means therefor, a film engaging member connected to and movable by the shutter actuating means for engagement with the edge of a film and releasable through the notches of the film edge.

1,400,873. HACKSAW. MYRON CARLOS GIBSON, Los Angeles, Calif. Filed Aug. 1, 1921. Serial No. 488,946. 5 Claims. (Cl. 145—34.)



1. A hack saw comprising a frame of substantially U form having legs provided with eyes or bearings at their lower ends, clamp bolts adjustably mounted in said eyes, said bolts also including slitted cross bolts, a saw blade the ends of which are mounted in the slits thereof, and ad-

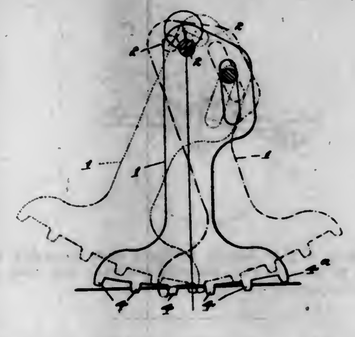
justable means mounted on the cross bolts and bearing against the opposite edges of the saw blade to hold the same in the said slits.



1,400,874. [WITHDRAWN.]

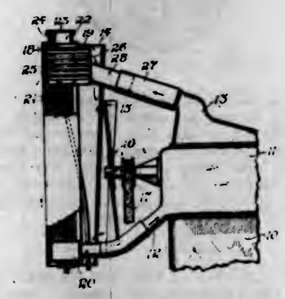
1,400,875. SEAT. DOUGLAS CAULKINS GOFF, Lynchburg, Va., assignor of one-half to William R. Anderson, Lynchburg, Va. Filed Oct. 27, 1920. Serial No. 419,878. 11 Claims. (Cl. 155—52.)

1. The combination with a body, of a seat thereon, U-shaped supporting members having upwardly directed arms connected at their ends to said seat, and means yieldably supporting said U-shaped members for vertical yielding movement.



1,400,876. PARTITION FORMING AND ATTACHING MACHINE. WILLIAM GOODELL, Millinocket, Me., assignor, by mesne assignments, to The Cone Bag Company, Madison, Me., a Corporation of Maine. Filed Oct. 28, 1920. Serial No. 420,117. 25 Claims. (Cl. 93—1.)

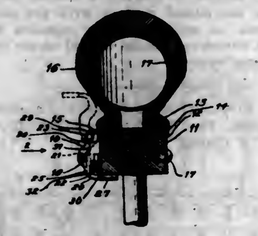
1. In a machine of the character described, in combination, means for feeding, punching and gumming a web section, means for severing said web section from the web, a plate, and means for folding said section on said plate in position to be acted upon, where gummed, by pressing means.



1,400,877. INTERMITTENT FEED MECHANISM. ALBERT GEORGE HILLMAN, London, England, assignor to Cinechrome Instruments, Limited, London, England. Filed June 26, 1920. Serial No. 392,083. 6 Claims. (Cl. 88—18.4.)

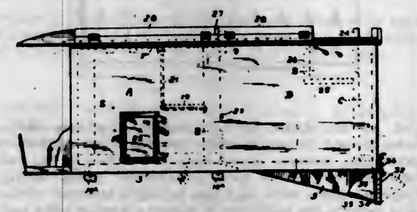
1. Intermittent feed mechanism for cinematographic apparatus comprising a feed sector, a spindle on which said feed sector is fast, a rotatable element having an eccentric bearing in which the spindle is mounted free to oscillate, means for rotating said element and means

for oscillating the feed sector to feed the film, substantially as described.



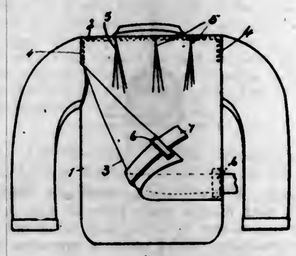
1,400,878. COOLING DEVICE. FRANK D. HOWE, Akron, Ohio, assignor, by mesne assignments, to International Harvester Company, a Corporation of New Jersey. Filed Aug. 31, 1916. Serial No. 117,887. 4 Claims. (Cl. 251—125.)

1. A cooling device for internal combustion engines having upper and lower compartments, a plurality of horizontal cooling tubes in the upper compartment, a vertical baffle plate extending transversely of the cooling tubes and dividing the upper compartment into front and rear chambers communicating at the ends of the baffle, an inlet for the rear chamber and an outlet for the lower compartment adapted for connection to the waterjacket of an engine, and vertically disposed cooling passages connecting the front chamber and lower compartment, whereby hot cooling water or steam from the water jacket will first enter the rear chamber and be directed by said baffle into contact with the horizontal cooling tubes before passing to the front chamber.



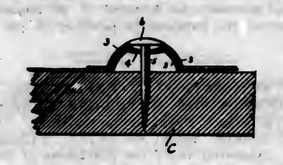
1,400,879. SELF-LOCKING RETAINING-NUT. WILLIAM F. JOHNSON, Baltimore, Md. Filed Jan. 23, 1920. Serial No. 353,440. 7 Claims. (Cl. 301—29.)

1. The combination with a felly, a rim, means on said felly for securing one side of said rim, a ring, and bolts through said felly, of nuts on said bolts, each nut comprising a body screwed on said bolt, a handle pivoted to



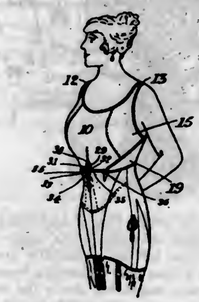
said body, and a grip on said handle contacting with said felly to lock said body.

1,400,880. REFRIGERATOR-BODY FOR VEHICLES. CHARLES O. JUNGE, Pittsburgh, Pa., assignor of one-half to Edward E. Rieck, Pittsburgh, Pa. Filed Oct. 11, 1920. Serial No. 416,067. 5 Claims. (Cl. 294—24.)



1. In a vehicle body for the transportation of frozen products, a product compartment having walls comprised of vertically disposed ice tanks, means spaced above the bottom of said tanks for the support of their solid contents, trough members in which said tanks are stepped, and drainage means for said trough members.

1,400,881. SHIRT. JOHN Y. KING, Lansdowne, Pa. Filed Mar. 19, 1919. Serial No. 283,552. 1 Claim. (Cl. 2—41.)



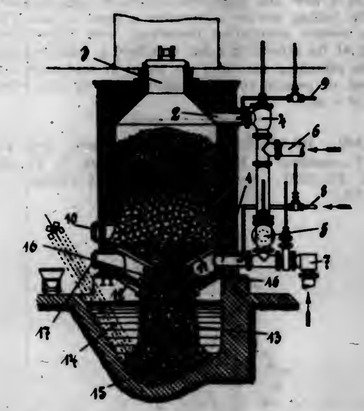
The herein described combination of a shirt including a yoke, a protecting member the upper edge of which is stitched below the shirt collar, a line of stitching upon each side edge of the protecting member securing it for a limited distance below the yoke of the shirt, plaits formed in the protecting member so as to hold it out of close contact with the back of the shirt, and loops attached along the side edges of the protecting member near the bottom edge thereof.

1,400,882. METAL CEILING. WILLIAM H. KLAUER, Dubuque, Iowa. Filed Sept. 23, 1916, Serial No. 121,805. Renewed July 11, 1921. Serial No. 483,944. 3 Claims. (Cl. 189—86.)

1. As a new and improved article of manufacture, a metallic ceiling section comprising a sheet of metal having a rosette protruding therefrom, said rosette being dished at its attaching point to afford a centering point for the attaching nail, and the metal at said point being thinned to permit the piercing thereof by the driving force of a nail.

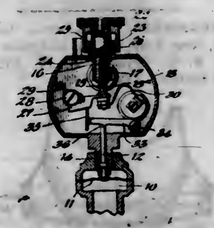
1,400,883. BRASSIÈRE. WALDEMAR KOPS, New York, N. Y., assignor to Kops Bros., New York, N. Y. Filed Feb. 17, 1921. Serial No. 445,641. 2 Claims. (Cl. 2—73.)

1. In a brassière, a front member having side extensions, a back member having side extensions, tapes connected to the extensions of the front member, tapes connected to the extensions of the back member, a ring secured in the lower front portion of the front member and adapted to receive the tapes connected to the extensions of the front member after the same have been passed around the waist of the wearer to maintain the same in position after having been tied, and eyes also secured in the lower front portion of the front member adjacent the said ring and adapted to be connected to the tapes leading from the extensions of the back member to secure these in position.



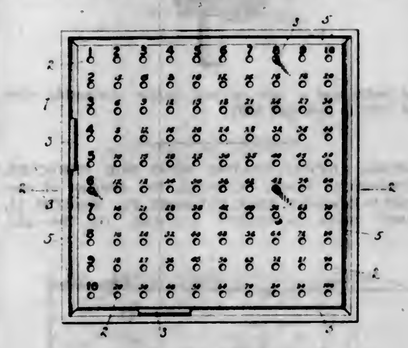
1,400,884. BRASSIÈRE. WALDEMAR KOPS and LOUIS GOLDSMITH, New York, N. Y., assignors to Kops Bros., New York, N. Y. Filed Feb. 17, 1921. Serial No. 445,643. 2 Claims. (Cl. 2—73.)

1. In a brassière, a front member, a back member, both the said members being adapted to extend over the side



portions of the body of the wearer, a loop device attached to the lower portion of the back member, and tapes attached to and extending from the extremities of the front member and threaded through the said loop device in the back member and also through the extremities of the back member and adapted to be connected together to secure the garment in position on the body of the wearer.

1,400,885. AUTOMATICALLY-UNSLAGGING SHAFT CONSTRUCTION FOR WATER-GAS GENERATORS. PHILIPP KOSTER, Frankfort-on-the-Main, Germany. Filed Oct. 2, 1915. Serial No. 53,781. 2 Claims. (Cl. 48—69.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)



1. A furnace for the production of water-gas comprising a shaft having a feed opening in its upper end and a conically-shaped bottom having a centrally disposed opening therethrough, a diving pipe depending from said opening, a basket-like grate supported above the shaft bottom and having a central opening therethrough of smaller size than the opening in said shaft bottom, and an annular grate-like connection between said shaft bottom and basket-like grate surrounding said openings and enlarging toward the opening in the shaft bottom.

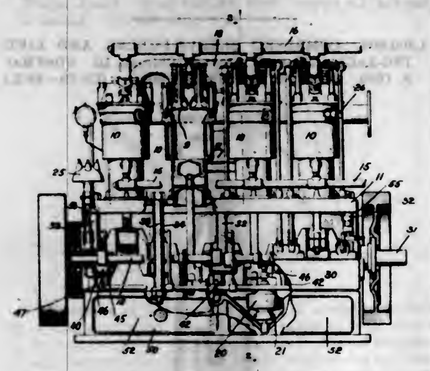
1,400,886. CIRCUIT-CONTROLLER. THEODORE G. LEWIS, Buffalo, N. Y., assignor to Buffalo Dental Manufacturing Company, Buffalo, N. Y., a Corporation of New York. Filed Dec. 10, 1919. Serial No. 343,842. 1 Claim. (Cl. 200—140.)

A circuit controller, comprising a casing provided at its bottom with a hollow attaching-nipple, binding posts extending through the back of the casing, one of said posts being provided within the casing with an internally-threaded eye, an adjusting screw engaging said eye and carrying a terminal-contact, a contact-lever arranged in the casing and carrying a terminal contact adapted to engage said adjustable contact, a flexible conductor connecting the last-named contact with the other of said binding posts, an actuating lever engaging said contact lever, and a thrust-rod guided in said nipple for operating said actuating lever.

1,400,887. EDUCATIONAL DEVICE. HARRIET LIEBMAN, Philadelphia, Pa. Filed Aug. 11, 1920. Serial No. 402,775. 2 Claims. (Cl. 35—2.)

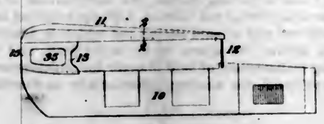
1. An educational device comprising, a base having holes formed therein, markers adapted to be retained in said holes, numbers placed upon the surface of the base adjacent to the said holes suitable for giving instructions in number work, said base having a sufficient surface area between the said holes to permit a number being associated closer to the hole it is intended to designate than to any other hole, and said numbers being positioned on the base so as to be visible when the markers are in the holes formed in said base.

1,400,888. BROOM-BRIDLE. ARTHUR O. LINDSTROM, Cleveland, Ohio, assignor of one-half to George E. Kohl, Cleveland, Ohio. Filed May 5, 1920. Serial No. 379,087. 2 Claims. (Cl. 15—23.)



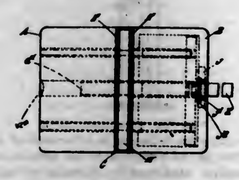
1. A device of the character described, comprising a spring clip bent from a single piece of wire into a substantially rectangular loop, the loop being then bent to form diverging jaws, one of which is approximately twice the length of the other.

1,400,889. INTERNAL-COMBUSTION ENGINE. CHARLES E. LUCKE, New York, N. Y., assignor to Worthington Pump and Machinery Corporation, New York, N. Y., a Corporation of Virginia. Filed June 9, 1917. Serial No. 173,702. Renewed Apr. 2, 1921. Serial No. 458,600. 19 Claims. (Cl. 123—195.)



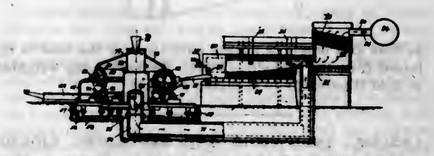
1. An internal combustion engine comprising a cylinder base, a main base separated from said cylinder base

adapted to carry the crank shaft, spacing means between said cylinder base and said main base removably inde-



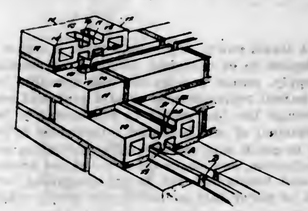
pendently thereof, removable means coöperating with said spacing means and connecting said bases, and a plurality of cylinders detachably secured to said cylinder base.

1,400,890. AUTOMOBILE-TOP. JAMES C. MCQUILKIN, Oakland, Calif. Filed May 13, 1919. Serial No. 296,801. 3 Claims. (Cl. 296—102.)



1. A top for a touring car type of body, comprising a transversely arched roof section formed of a thin impervious, semi-rigid material continuous and unjointed from front to rear and having its longitudinal sides terminating in vertical walls increasing in height from front to rear, whereby to render the same inherently rigid and self-supporting without the aid of stiffening and reinforcing frames, a back wall formed also of the same material united with the roof section and continuing around at its ends for some distance to form comparatively long side walls, and means for connecting said back wall to the body of the car, said back wall and its extended ends forming a support for the forwardly projecting and overhanging rigid roof structure.

1,400,891. LOOSE-LEAF BOOK. BERTRAND GEORGE MARTIN, London, England. Filed Apr. 30, 1921. Serial No. 465,662. 4 Claims. (Cl. 129—41.)

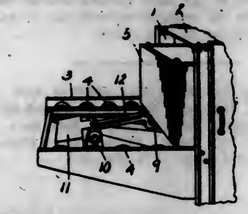


1. In a loose-leaf book, the combination of a cover, a thong attachment of stiff material, a flexible thong secured to said cover and to said thong attachment, a second cover inclosing said attachment and slidable thereon, a tab secured to said attachment and projecting beyond said cover at the edge thereof remote from said thong, and means for connecting said tab to said first-named cover when the book is closed.

1,400,892. PROCESS AND APPARATUS FOR REFINING COPPER. OLIVER C. MARTIN, Richmond Hill, N. Y., assignor to Nichols Copper Company, New York, N. Y., a Corporation of New York. Filed Apr. 5, 1918. Serial No. 226,851. 16 Claims. (Cl. 266—9.)

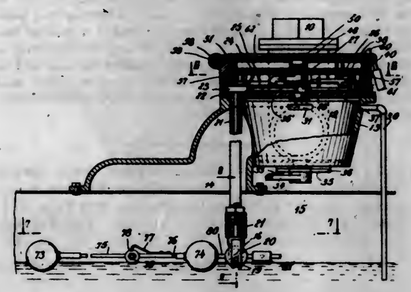
1. The process of refining copper which comprises melting the copper, transferring the molten copper directly to one of a plurality of holding furnaces, shifting the holding furnace from the melting furnace toward a casting machine and poling the molten copper during the shifting of said holding furnace, emptying said holding furnace and simultaneously filling another holding furnace, while said first named holding furnace is being emptied, substantially as and for the purpose described.

1,400,893. WALL CONSTRUCTION AND BRICK THEREFOR. ROBERT F. MARTIN, New York, N. Y., assignor to Robert F. Martin Corporation, New York, N. Y. Filed July 30, 1919, Serial No. 314,320. Renewed May 11, 1921. Serial No. 468,726. 7 Claims. (Cl. 72—41.)



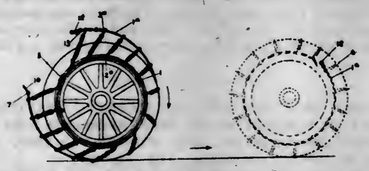
1. A brick for wall construction comprising a solid face portion, and an inner portion comprising spaced end sections constituting with the said face portion, the wall supporting portions of the brick, and an intermediate portion comprising a lateral web connecting said end sections intermediately their upper and lower surfaces, and provided intermediate its longitudinal edges and at its upper and lower sides with relatively narrow non-mortar receiving ribs.

1,400,894. BOTTLE OR CAN WASHING MACHINE. WILLIAM G. MASON, Detroit, Mich., assignor to John W. Ladd Company, Detroit, Mich. Filed May 11, 1921. Serial No. 468,512. 2 Claims. (Cl. 141—7.)



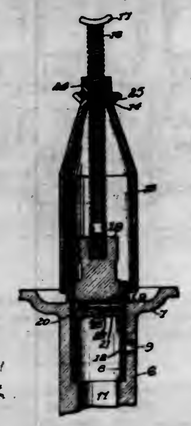
1. In a washing machine of the class described, the combination of a way and washing means associated therewith, of case-like holders traveling on said way, and means for positioning said holders in operative relation to the washing means as the holders are pushed along the way com-

prising an upwardly facing pivoted hook adapted to successively engage the rear walls of the holders and having an inclined portion projecting into the path of the holders



so that as a holder is pushed onto the way the hook is released from the preceding holder, the hook being weighted to hold it normally in engaging position.

1,400,895. INDICATING AND RECORDING LIQUID-FUEL-SUPPLY-TANK APPARATUS. EDWIN S. MATTHEWS, New York, N. Y. Filed Feb. 18, 1918. Serial No. 217,983. 31 Claims. (Cl. 234—10.)

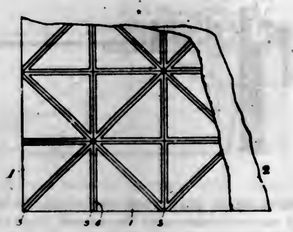


10. A liquid power fuel supply tank, a motor connected and adapted to be energised from the combustion of said fuel supply, means constructed and arranged to alternatively permit replenishment of said tank and coincidently to interrupt the fuel supply to said motor or to obstruct replenishment of said tank and coincidently to permit fuel supply to reach said motor, supply indicating and recording mechanism, and means constructed and arranged to actuate said mechanism for record producing between the periods of motor incapacitation and motor rehabilitation, independently of its operation for indication.

1,400,896. ANTISKID-CHAIN. ROBERT MESTARS, Oakland, Calif. Filed Oct. 23, 1917. Serial No. 198,059. 4 Claims. (Cl. 152—14.)

3. An anti-skid device of the character described comprising a ring, a rod bent into circular form, means for positively connecting the ends of said rod, and transverse chains connecting said rod and said ring, said rod possessing sufficient resilience to automatically expand it sufficiently to be readily disengaged from the wheel when the ends are disconnected.

1,400,897. COMBINED SLEEVE-PULLER AND LIFTING-JACK. JAMES W. MOYLES, Chicago, Ill. Filed Mar. 3, 1920. Serial No. 362,988. 4 Claims. (Cl. 29—88.2.)

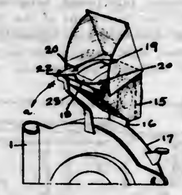


1. In a sleeve pulling device, the combination of a casing, a movable lifting rod therein, a plunger having engagement with one end of said lifting rod which is adapted for insertion within the sleeve to be withdrawn, and means extending transversely of said plunger for engagement with said sleeve inside the bearing, substantially as described.

1,400,898. HINGE-GAGE. ANDREW G. MUADOCK, Highland Park, Mich. Filed May 20, 1920. Serial No. 382,790. 4 Claims. (Cl. 33—197.)

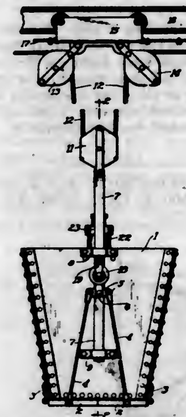
1. A hinge gage including a bar formed of a plurality of hinge connected parts adapted to be folded, one upon another, and means attached to certain of said parts for locating the position of hinge leaves upon a member to which the gage is applied, one of said parts being extensible to increase the over-all length of the bar.

1,400,899. PROCESS OF UTILIZATION OF WASTE OR SCRAPS OF LEATHER. MIZUHIKO NAKAYAMA, Toyotamagun Tokyo-Fu, and KEIJIRO ADACHI, Shitaya-Ku, Tokyo, Japan. Filed Dec. 18, 1919. Serial No. 345,859. 2 Claims. (Cl. 154—2.)



1. A process of utilization of waste or scraps of leather by cutting such waste or scraps into pieces of such shapes as can be arranged or connected together allowing no space or gap among the joints of the pieces, whereby an optional pattern being had, pasting the cut pieces on board or cloth or the like sewing the joints of the pieces together, and then coating the surfaces of the seams with thread protecting material.

1,400,900. TEMPER-SCREW FOR WELL-DRILLING TOOLS. ROBERT E. NEILSON, Tulsa, Okla., assignor, by direct and mesne assignments, to Tulsa Machine and Tool Company, Tulsa, Okla. Filed Mar. 22, 1920. Serial No. 367,811. 12 Claims. (Cl. 287—61.)

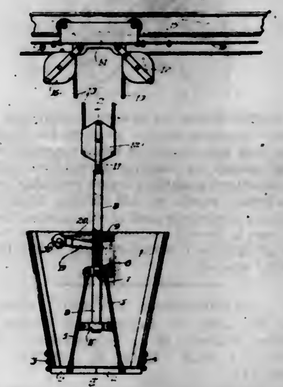


9. A temper-screw, comprising a head with opposite shouldered recesses, and extending pivot arms with cable eyelets; reins secured in the recesses, with formations on each end like those of the recesses in the head; unthreaded screw jaws, with extensions having inside recess formations to receive the lower rein ends, one having a flat-ended recess, and internal grooves; a main screw occupying half threaded bushings secured in the jaws, with ribs in the grooves, the screw having a ball-bearing swiveled cross bar at the upper end with cable connections running through the eyelets, the lower end having turning means with cable carrying means; and jaw clamping means including a yoke secured in the recess, with flat shoulders engaging the flattened ends, and a binding screw opposing expansion springs operatively situated between the screw jaws.

1,400,901. VIEW-FINDING DEVICE. FRANK F. NELSON, San Francisco, Calif. Filed Feb. 25, 1920. Serial No. 361,361. 1 Claim. (Cl. 88—1.5.)

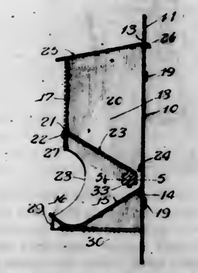
A view finding device for cameras comprising in combination a lens mounting and an image finder fixedly mounted thereon, said lens mounting being rotatable relative to the camera; means for limiting the rotative movement of said lens mounting; a matting frame revolubly mounted on said image finder; means on said matting frame for engaging a relatively stationary part of the camera whereby said matting frame is revolved synchronously with the rotative movement of said lens mounting, into either the vertical or horizontal planes.

1,400,902. SELF-OPENING BUCKET. CLYDE NOLAN, Chicago, Ill., assignor to American Steam Conveyor Corporation, Chicago, Ill., a Corporation of New York. Filed June 11, 1920. Serial No. 388,351. 6 Claims. (Cl. 294—71.)



1. A bucket of the class described provided with hinged bottom doors, a bucket carrier capable of a limited amount of vertical movement independent of the bucket, non-rigid means connecting said carrier and said doors whereby the latter are held closed when the carrier lies in the highest position to which it may be moved independent of the bucket, and automatic means interposed between the carrier and bucket arranged to permit the carrier to move comparatively freely downwardly with respect to the bucket and adapted to permit but offer substantial impedance to upward movement of the carrier independent of the bucket.

1,400,903. SELF-OPENING BUCKET. CLYDE NOLAN, Chicago, Ill., assignor to American Steam Conveyor Corporation, Chicago, Ill., a Corporation of New York. Filed June 11, 1920. Serial No. 388,352. 5 Claims. (Cl. 294—71.)



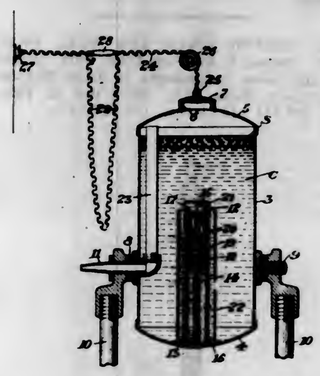
1. A bucket of the class described provided with hinged bottom doors, a bucket carrier capable of a limited amount of vertical movement independent of the bucket, non-

rigid means connecting said carrier and doors, whereby the latter are held closed when the carrier lies in the highest position to which it may be moved independent of the bucket, and means interposed between the carrier and bucket to permit free movement of the carrier relative to the bucket in one direction and impeded movement in the opposite direction, said means consisting of a pair of friction devices disposed on opposite sides of said

bucket, said devices comprising a pair of arms pivoted respectively at one end to the carrier and to the bucket, the free end of one of said arms having a frusto-conical shaped boss over which the open free end of the other of said arms is arranged to lie, a cap frictionally engaging said boss and the last mentioned arm, a ratchet on said cap, and a detent mechanism therefor carried by said last mentioned arm.

1,400,904. NOVELTY MATCH-BOX. SAM K. NOMELAND, Porter, Minn. Filed May 8, 1920. Serial No. 379,870. 2 Claims. (Cl. 206—20.)

1. A match box comprising a back plate having a tray struck from its lower end portion with resultant spaced legs, and integral sheet metal front and side portions secured to the back plate above the tray and to the legs at the sides of the tray, the sides of the box having their lower edge portions extending inwardly toward each other, the tray extending forwardly in arc shape from the back plate and resting upon the inwardly directed portions of the sides, the tray being accessible from the front of the box.

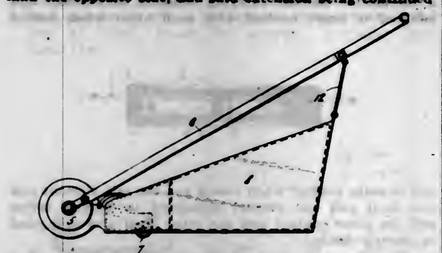


1,400,905. WRENCH. SVEN JOHAN NORDSTROM, San Francisco, Calif. Filed Nov. 10, 1920. Serial No. 422,987. 5 Claims. (Cl. 81—60.)

1. A wrench for operating a turntable member provided with a relatively movable part, comprising a handle having means for engaging the relatively movable part and a head member provided with a socket for engaging the turnable member and a socket in which the handle is

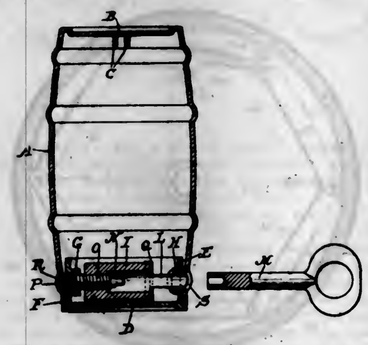
loosely mounted so that when the handle is turned the relatively movable part may be moved relatively to the turnable member.

1,400,906. FIRE-EXTINGUISHER. GEORGE T. PEARSONS, New York, N. Y. Filed Apr. 12, 1917, Serial No. 161,397. Renewed May 3, 1921. Serial No. 466,533. 3 Claims. (Cl. 169—27.)



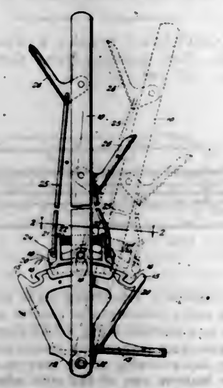
2. In a fire extinguisher, the combination of a pivotally supported reservoir; an evaporable fire extinguishing liquid in said reservoir; an outlet for the reservoir through the pivotal support of the reservoir leading from one end and the top of the extinguisher in the normal position thereof to at all times maintain the interior of the reservoir open to the atmosphere; a non-evaporable liquid of less specific gravity than the fire extinguishing liquid to float upon the surface of the fire extinguishing liquid and seal the fire extinguishing liquid from the atmosphere through the outlet in the normal upright position of the extinguisher; fusible means to retain the extinguisher in upright position and the fusing of said means permitting the extinguisher to assume an inverted position; and a gas generator in the reservoir to generate gas and place the fire extinguishing liquid under compression when the extinguisher is inverted for the purpose specified.

1,400,907. GRASS-CATCHER FOR LAWN-MOWERS. THOMAS A. POWELL, Nauvoo, Ill. Filed May 12, 1920. Serial No. 380,847. 1 Claim. (Cl. 56—190.)



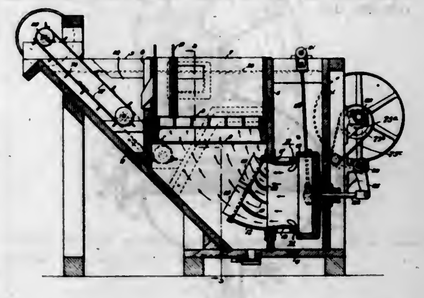
A grass catcher for lawn mowers comprising a basket-like receptacle having an extension on one side to project

laterally with respect to the mower for a greater distance than the opposite side, and said extension being continued



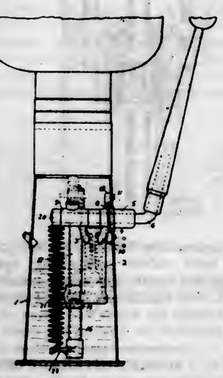
forwardly to terminate in advance of the main portion of the receptacle and alongside one end of the cutting reel.

1,400,908. LOCK. ARTHUR C. PRINCE, Chicago, Ill. Filed Feb. 21, 1921. Serial No. 446,689. 23 Claims. (Cl. 70—14.)



2. Closing means for an aperture, comprising a closure, a plurality of locking members mounted thereon, one member adapted to penetrate and be inclosed by the other, and means for increasing the total length of said members, to lock the closure against opposed sides of the aperture.

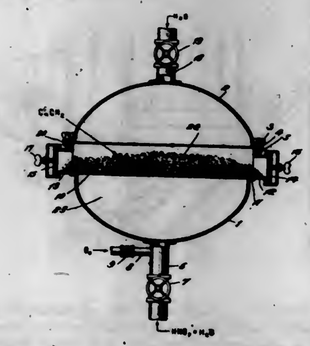
1,400,909. SAFETY-LOCK FOR LEVERS. CHARLES A. A. RAND, Chicago, Ill., assignor to International Harvester Company, a Corporation of New Jersey. Filed Mar. 28, 1919. Serial No. 285,722. 13 Claims. (Cl. 74—89.)



4. In combination, a sector, a pivoted lever adapted to move along the sector, and independently operated controlling means carried by the lever and cooperating with the sector to control the movement of the lever over different parts of the sector.

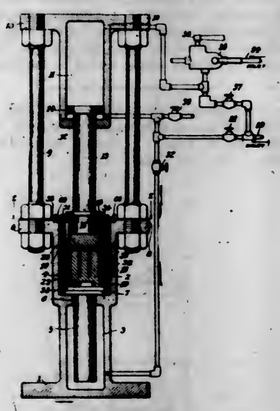
1,400,910. HYDRAULIC JIG-SEPARATOR. RASTUS S. RANSOM, Jr., Newark, N. J. Filed Apr. 2, 1920. Serial No. 370,671. 15 Claims. (Cl. 83—79.)

1. In a hydraulic jig-separator, the combination of a tank, an upright separating-compartment located therein, and having a stationary horizontal perforated bed-plate such as a screen to support a mass of the mixture to be separated, and having also two discharge-chutes located at different levels above said screen, a gate controlling the lower of said chutes, a vertically-positioned and vertically-adjustable shield located above said screen and between the upper and lower chutes aforesaid, a horizontally-disposed and upwardly-directing pump-tunnel having suitable inlet-valves and affording communication from said tank into the portion of said compartment below said screen, outlet-valves for said tunnel adapted to occupy vertical planes when opened, a vertically-disposed water-impelling member suspended pendulum-wise in front of the entrance to said tunnel to be reciprocable in substantially-horizontal direction, and means for reciprocating said impeller in strokes whose length is variable at will.



1,400,911. PUMPING ARRANGEMENT FOR TURBINE-DRIVEN SEPARATORS. LUDVIK RASCH, Christiania, Norway. Filed June 17, 1920. Serial No. 389,732. 2 Claims. (Cl. 103—65.)

1. In pumping apparatus for turbine driven separators, a frame having an opening in its wall, a bearing extending through said opening and having a flange secured to



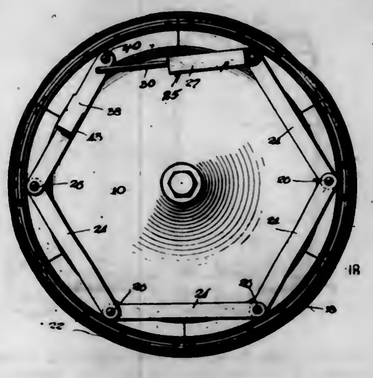
said wall, a driving shaft in said bearing, and a pump cylinder having ribs secured to said bearing and also having an ear secured to said frame.

1,400,912. PROCESS OF MAKING NITRIC ACID. JAMES HENRY REID, Pittsburgh, Pa., assignor to International Nitrogen Company, a Corporation of Delaware. Filed Sept. 10, 1917. Serial No. 190,483. 2 Claims. (Cl. 23—1.)

1. The process of making nitric acid which comprises subjecting nascent ammonia to the action of ozone.

1,400,913. MANUFACTURE OF HARD-RUBBER BATTERY-JARS AND SIMILAR ARTICLES. HERMAN SCHELHAMMER, Whitestone Landing, N. Y., assignor to American Hard Rubber Co., New York, N. Y., a Corporation of New York. Filed Sept. 20, 1921. Serial No. 502,040. 7 Claims. (Cl. 18—19.)

1. A mechanism for forming battery jars and similar articles of hard rubber comprising independent mold side members, the outer, upper and lower edges of which are cut away, and continuous detachable encircling bands arranged to engage the upper and lower cut away portions of said side members for holding the same together.

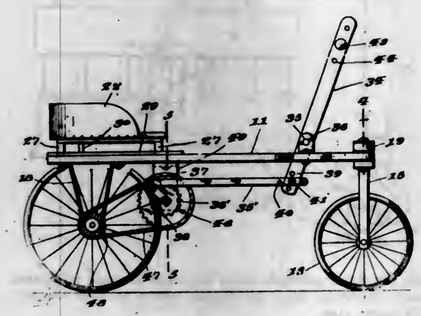


1,400,914. SOCKET-INTERRUPTER. MILTON H. SHOENBERG, San Francisco, Calif. Filed May 13, 1920. Serial No. 381,148. 3 Claims. (Cl. 200—122.)

1. A circuit interrupting device comprising an upper and a lower shell adapted to telescopically engage at their peripheries, insulating material between the shells, a thermostatic element carrying contacts constructed and adapted to break contact with each other when heated

and to make contact when cooled and the said element and one shell and one contact connected in electric series and the other contact and the other shell also connected in electric series.

1,400,915. EMERGENCY-TIRE FOR AUTOMOBILES. JULIUS HUGO SKOGMAN, Joplin, Mo. Filed Oct. 27, 1920. Serial No. 419,852. 7 Claims. (Cl. 152—23.)



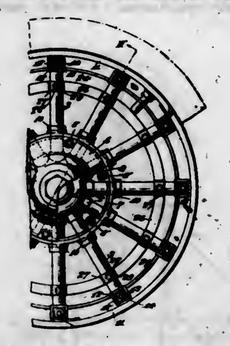
7. An emergency tire for vehicles comprising sections, links arranged on opposite sides of said sections and adapted for securing the sections in position, pivot elements extending through said sections and connected to said links, spring actuated plungers connected to one of said pivot elements, locking arms pivotally carried by said plungers and having sockets adapted for the reception of the adjacent links, and a tread element for the tire.

1,400,916. AIRPLANE. NORMAN R. SMITH, San Francisco, Calif. Filed June 30, 1920. Serial No. 392,919. 15 Claims. (Cl. 244—29.)

1. In an airplane a supporting plane parallel with the line of flight and consisting of a central member bounded on each side by a movable wing, a load suspended from the central member and connections from each wing to said load whereby the swinging of the load upon the tilting of the machine distorts one of the side wings to right the machine.

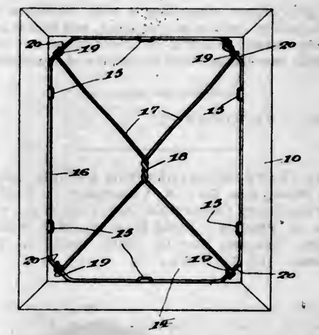
1,400,917. TOY VEHICLE. THOMAS W. SPAULDING, Baltimore, Md., assignor to Spaulding Ski-Kar Company, Inc., Baltimore, Md., a Corporation of Maryland. Filed Feb. 21, 1921. Serial No. 446,653. 1 Claim. (Cl. 208—113.)

A toy vehicle having a base or platform provided with front and rear supports, of which the former includes a steering fork, means for actuating the steering fork control the direction of progress of the vehicle, a seat supported by the base or platform near its rear end, propelling mechanism located beneath the base or platform, and actuating devices for the propelling means including a hand lever mounted upon the base or platform for oscillatory movement in a longitudinal vertical plane and a pitman extending from the lower end of said lever beneath the plane of the base or platform to the propelling mechanism, said seat being provided with depending chairs, the base or platform having parallel longitudinal guide bars for sliding engagement of said chairs, and a bolt carried by the seat for selective engagement with a series of openings in the base or platform.



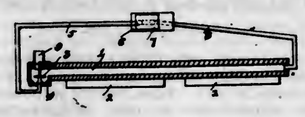
1,400,918. BOTTLE-CAP. ROBERT STOCK, Sandusky, Ohio. Filed Feb. 3, 1920. Serial No. 355,966. 2 Claims. (Cl. 215—45.)

1. A bottle cap having depending fingers, a resilient ring carried by said fingers developed into arms extending laterally therefrom and parallel to each other, and a disk rotatably fixed on one arm and having a slot for the reception of the other arm, said slot being arranged eccentrically with respect to the pivot, whereby the rotation of said disk will move the arms toward and away from each other and contract and expand the ring and fingers.



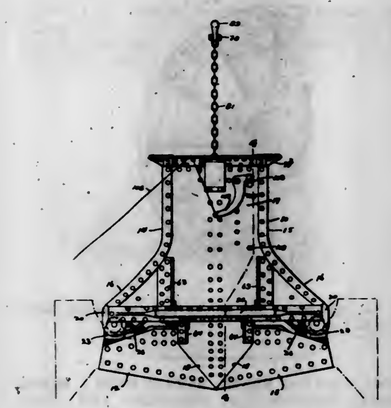
1,400,919. VEHICLE-WHEEL. ROBERT STOCK, Sandusky, Ohio. Filed Feb. 12, 1920. Serial No. 358,220. 6 Claims. (Cl. 301—8.)

1. The combination with a vehicle wheel having a hub, spokes therefor, and a tire rim, of a band, interposed between said hub and rim and located edgewise with



respect to the spokes for supporting the spokes intermediate the hub and rim.

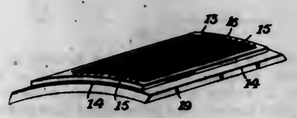
1,400,920. PICTURE-FRAME ATTACHMENT. MYRTLE V. STROUD, Pink Hill, N. C. Filed May 7, 1921. Serial No. 467,749. 1 Claim. (Cl. 40—156.)



A device for preventing the card backing of a picture frame from warping, comprising a stiff wire frame arranged to fit within a puncture frame beneath the card holding nails thereof, and crossed and intermediately connected wires having their ends secured to the wire frame at the corners thereof and being longitudinally bowed for pressure against the center of the card backing.

1,400,921. MECHANICAL MUSICAL INSTRUMENT. HERSCHEL E. TOWER, Cincinnati, Ohio, assignor to The Baldwin Company, Cincinnati, Ohio. Filed May 8, 1920. Serial No. 379,956. 3 Claims. (Cl. 84—60.)

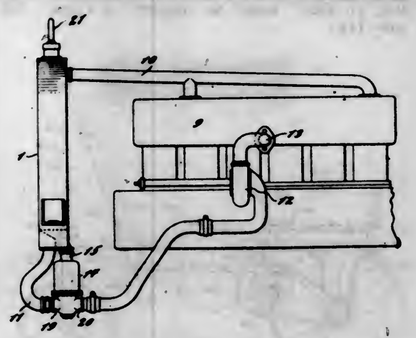
1. In a mechanical musical instrument; a pouch actuated valve; a socket under said pouch; a suction chamber; air connections from said socket to said suction chamber, and mechanical means for connecting said socket to the atmosphere and disconnecting said socket from said suction chamber.



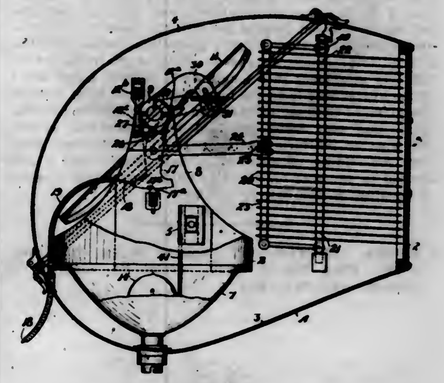
1,400,922. CRANE-HOOK GRAB-BUCKET. FRANK H. WILLIAMS, Buffalo, N. Y. Filed Dec. 8, 1919. Serial No. 343,305. 23 Claims. (Cl. 37—30.)

1. A grab bucket comprising a body, bucket segments, tracks carried by each bucket segment, and bucket segment supporting means carried by the lower corners of the body for slidable engagement with the tracks of the segments.

1,400,923. [WITHDRAWN.]



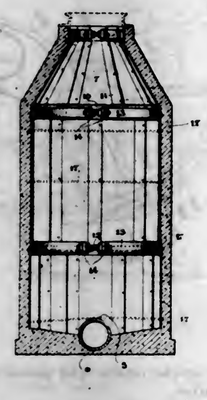
1,400,924. LATE-NEWS-PRINTING DEVICE. HENRY A. WISE WOOD, New York, N. Y., assignor to Wood Newspaper Machinery Corporation, New York, N. Y., a Corporation of Virginia. Filed May 10, 1917, Serial No. 167,628. Renewed May 16, 1921. Serial No. 470,200. 2 Claims. (Cl. 101—374.)



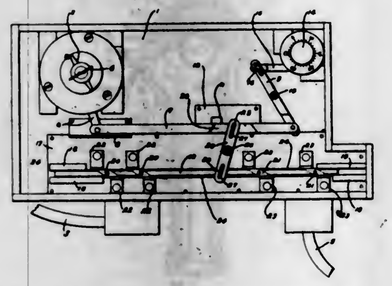
1. In a late news printing device, the combination of a chase adapted to be applied to a printing plate, said chase having a space for linotype slugs or the like and spaced notches in its end walls, a series of plates extending into and held by said notches for dividing the chase into sections for the reception of said linotype slugs, and rods supported by said chase and adapted to pass through the plates and linotype slugs to hold them in position.

1,400,925. COOLING AND INDICATING SYSTEM FOR INTERNAL-COMBUSTION ENGINES. AUSTIN M. WOLF, Plainfield, N. J. Filed Jan. 22, 1919, Serial No. 272,428. Renewed Mar. 18, 1921. Serial No. 453,481. 6 Claims. (Cl. 123—178.)

1. In a cooling system for internal combustion engines, the combination with the engine water jacket, of a radiator comprising an upper and a lower tank connected by a radiating core, water passages comprising a normal circuit including said core and the engine jacket and a by-passage to eliminate the core, and a thermostat to control the course of water flow in accordance with the temperature, the water passages being arranged to cause all heated water returning from the engine jacket to pass through said upper tank.



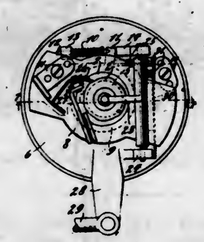
1,400,926. HEADLIGHT. WILLIAM G. WOOD, San Francisco, Calif., assignor to Berkeley Light Corporation, San Francisco, Calif., a Corporation of Nevada. Filed Aug. 5, 1918, Serial No. 248,802. Renewed Mar. 3, 1920. Serial No. 363,084. 16 Claims. (Cl. 240—41.)



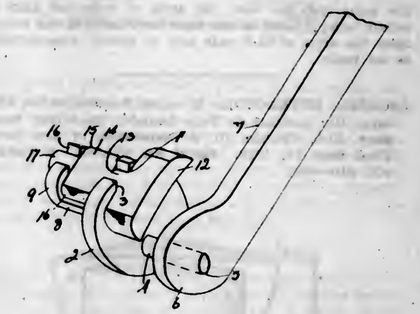
1. A headlight comprising a casing, a source of light in said casing, means coöperating therewith adapted to project a beam of substantially parallel rays, a concentrating reflector adapted to receive said rays and project the same through a transparent aperture in the casing, said reflector having means which will project a beam of light having a vertical focal or crossing line for the projected rays.

1,400,927. MANHOLE-FORM. FRANK L. YOUNG, San Antonio, Tex. Filed Nov. 6, 1920. Serial No. 422,214. 9 Claims. (Cl. 25—124.)

1. A form for hollow structures of plastic material with restricted outlets, comprising courses of units, the units of each series being so shaped that when their side edges are lapped they will conform to the cross sectional shape of the structure, and the units of one series being shaped to correspond with the cross sectional shape of the outlet, expansion rings within the units of the series for holding them from collapsing, the units of each series fitting at their lower ends within the upper ends of the units of the next lower series, and flexible bands encircling the units of the series to hold them against the rings, the units of each series having interlocking mechanism at their side edges for limiting the movement of the units on each other, said mechanism being omitted from one of the units for the purpose specified.



1,400,928. AUTO-LOCKING DEVICE. GEORGE ZINZEL, Bath, N. Y., assignor of one-half to Charles H. Moore, Bath, N. Y. Filed Sept. 28, 1920. Serial No. 413,436. 5 Claims. (Cl. 200—45.)

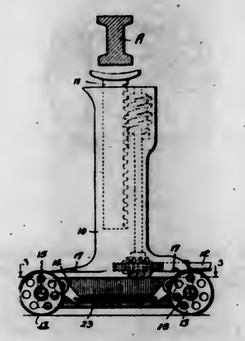


1. In a device of the class described, a pair of movable members; means for connecting said members operatively; permutation mechanism controlling the movement of one of said members; a circuit; means carried by the other of said members for opening and closing the circuit; and means for operating the first specified one of said members, said means including a switch interposed in the circuit.

1,400,929. CIRCUIT BREAKER AND CONTROLLER. JAMES C. ANDERSON, Rutherford, N. J., assignor to Varley Duplex Magnet Company, a Corporation of New Jersey. Filed Aug. 22, 1919. Serial No. 319,092. 12 Claims. (Cl. 200—19.)

1. For the ignition circuit of an internal combustion engine, a rotative shaft connected to be driven by the engine, a breaker cam carried by the shaft, a bearing sleeve for the shaft having a concentric external bearing surface, a bearing member adjustably bearing about the sleeve and having an eccentric external bearing surface, a breaker system including a cam follower controlled by the cam, and an angularly adjustable support for the breaker system bearing about the external surface of the bearing member.

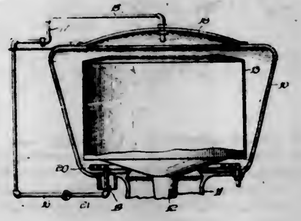
1,400,930. PIPE-WRENCH. JAMES F. ASTLEY, Camden, N. J. Filed Jan. 5, 1921. Serial No. 435,114. 7 Claims. (Cl. 81—71.)



2. A wrench consisting of a supporting member, a bracket carried thereby, a gripping member journaled in the supporting member and bracket, an operating lever and means for detachably connecting said lever with the supporting member, said lever coacting with the gripping member to actuate the same.

1,400,931. ROLLER-BASE LIFTING-JACK. SYDNEY P. BARKER, New York, N. Y., assignor, by mesne assignments, to Arrow Grip Manufacturing Co., Inc., Glens Falls, N. Y., a Corporation of New York. Filed June 20, 1918, Serial No. 240,976. Renewed Jan. 28, 1919. Serial No. 273,690. 7 Claims. (Cl. 254—1.)

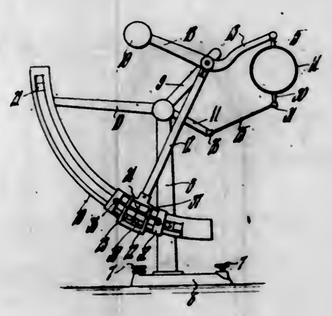
3. In a lifting jack, the combination of a rectangular base having holes formed therethrough parallel to the ends of the base, a pair of pivot members extending through said holes, an end pair of bell cranks mounted upon each pivot connection and adapted to oscillate in vertical planes adjacent to the corners of the base, an anti-friction roller carried by one arm of each bell crank, and coil springs connected to the arms of the bell cranks remote from the ends supporting the rollers and tending to project the rollers downward below the bottom of the base but yielding under the weight of the load brought to bear upon the jack to allow the base to bear directly and frictionally upon the ground.



4. The herein described base for a lifting jack comprising a strong rigid load supporting member adapted to en-

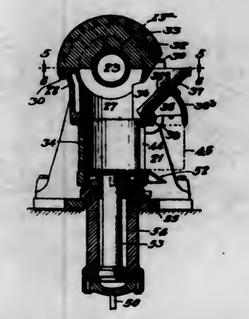
gage directly and frictionally with the ground when loaded, a series of anti-friction rollers for the base, said rollers being disposed as side and end pairs, movable arms on which the rollers are journaled, pivot connections between

the arms and the base, the arms of each end pair of rollers being pivoted on the same axis, and a spring acting upon the arms of each side pair of rollers, substantially as set forth.



1,400,932. EXTRACTOR. WILLIAM BARTHOLOMEW, Chicago, Ill., assignor to Troy Laundry Machinery Company, Ltd., Chicago, Ill., a Corporation of New York. Filed Sept. 18, 1918. Serial No. 254,546. 2 Claims. (Cl. 210—66.)

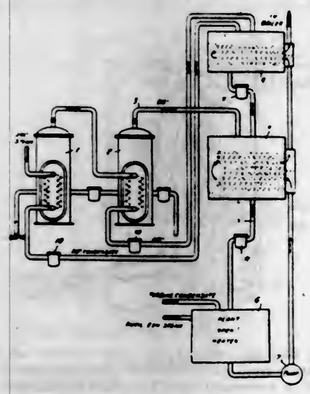
1. In a centrifugal extractor, the combination of a revolubly mounted perforated container for the reception of cloths from which oils, fats or greases are to be extracted, a casing surrounding said container and having an opening for the discharge of oils, fats and greases extracted from said cloths, means for supplying steam from outside the casing to said container for cleaning the cloths, and a horizontally arranged steam coil located in said casing directly under the container for heating purposes and having a connection extending through said casing opening to keep the extracted material in a fluid state to facilitate its discharge through said opening.



1,400,933. WEIGHING-SCALE. HENRY B. BARTLETT, Holyoke, Mass., assignor to B. F. Perkins & Son, Inc., Holyoke, Mass., a Corporation of Massachusetts. Filed Oct. 3, 1919. Serial No. 328,246. 7 Claims. (Cl. 265—61.)

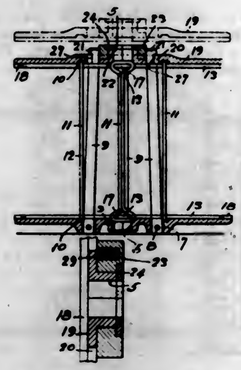
1. In combination, a scale, a pointer mounted to swing along and adjacent said scale, and a rider frictionally held to and manually movable along the latter, said rider provided with longitudinally spaced projections extending

into the path of the pointer and arranged one on each side of the latter.



1,400,934. MACHINE FOR TREATING RUBBER AND SIMILAR MATERIAL. DAVID R. BOWEN and CARL F. SCHNUCK, Ansonia, Conn., assignors to Farrel Foundry and Machine Company, Ansonia, Conn., a Corporation of Connecticut. Filed Sept. 18, 1917. Serial No. 192,030. 51 Claims. (Cl. 18—2.)

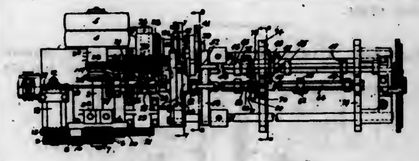
13. In a rubber working machine, a combined pressure piston and discharge door.



1,400,935. HIGH-HEAT-LEVEL EVAPORATOR SYSTEM. STANLEY BROWN, Garden City, N. Y., assignor to The Griscom Russell Company, New York, N. Y., a Corporation of Delaware. Filed Jan. 26, 1920. Serial No. 353,999. 10 Claims. (Cl. 257—30.)

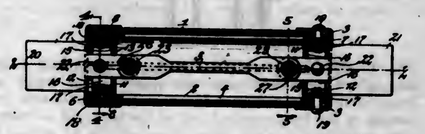
1. In a boiler feed system, the combination of a feed water heater, an evaporator plant, connections from the vapor line of the evaporator plant to the feed water heater whereby the heater serves as a condenser for the vapor, and a second feed water heater arranged to further heat the feed water, and connections from the heating chamber of the evaporator to said second heater whereby the drains

from the evaporator heating space serve as the heating medium for the second heater.



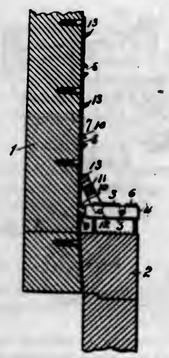
1,400,936. REEL-HOLDER. GEORGE E. BULL, Monessen, Pa., assignor to Pittsburgh Steel Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed July 10, 1920. Serial No. 395,243. 4 Claims. (Cl. 242—72.)

2. A wire-reel holder comprising oppositely arranged end-members, rods pivotally connected to only one of said end-members, elongated openings formed in the other end-member through which said rods pass, and a rotary cam-member on said last-named end-member adapted to engage the free ends of said rods and lock same in said elongated openings.



1,400,937. BALE-TIE MACHINE. GEORGE E. BULL, Monessen, Pa., assignor to Pittsburgh Steel Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed July 17, 1920. Serial No. 396,970. 9 Claims. (Cl. 140—73.)

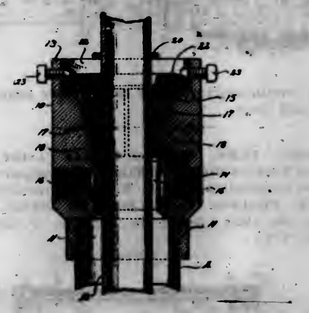
1. In a bale-tie machine, the combination of feeding mechanism, cutting mechanism, bending and twisting mechanism, clamping mechanism comprising pivotally mounted clamping members, toggle-links connecting said members, a guide, a block in said guide, said toggle-links being connected to said block, a lever engaging said block,



and a continuously rotating cam-member adapted to engage said lever.

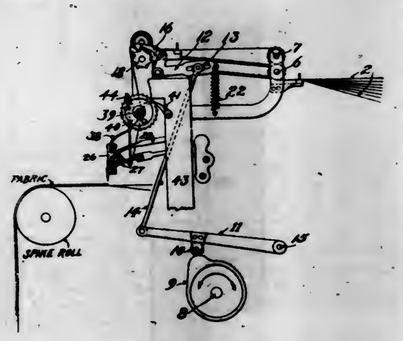
1,400,938. FUSE. BERTRAM COLMAN CANDEE and WILLIAM NICKLIS PIERCE, Buffalo, N. Y., assignors to Pierce Fuse Corporation, Buffalo, N. Y., a Corporation of New York. Filed Oct. 16, 1917. Serial No. 196,941. Renewed May 20, 1920. Serial No. 382,928. 6 Claims. (Cl. 200—131.)

6. A fuse comprising inner and outer tubular casing sections of insulating material which are slidable lengthwise on each other and the inner section being provided with an opening for the introduction of a fuse into the casing and a longitudinal stop and guide slot, a stop and guide projection arranged on the outer casing section and projecting into said slot, and terminals mounted on opposite ends of said inner casing section and adapted to be connected within the casing by a fuse link.



1,400,930. SASH-FASTENER. SYLVESTER LEE CARTY, Tuscumbia, Mo., assignor of one-half to Charles Roscoe Carty, Walnut Ridge, Ark. Filed Feb. 9, 1920. Serial No. 357,181. 4 Claims. (Cl. 292—57.)

1. In a sash fastener, the combination with two sash members, of a housing attached to one of said members, a bolt rotatably and slidably mounted in the housing, a locking member pivoted to the housing, and means attached to the other sash member for engaging the bolt

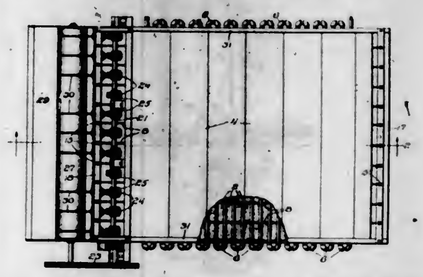


so as to hold the sash members from movement away from each other and for engaging said locking member to hold the sash members from vertical movement with respect to each other.

1,400,940. CASING-HEAD. CLEM S. CLARKE, Shreveport, La. Filed Aug. 28, 1920. Serial No. 406,554. 2 Claims. (Cl. 285—22.)

1. A well casing head comprising a cylindrical body having a longitudinal bore, the upper end of which is frusto-conical, co-acting tapered gripping elements arranged in the frusto-conical end of the bore and provided with serrations on their inner faces adapted to engage a well tube passing longitudinally through the casing head, an upstanding flange on the upper end of the casing head, a ring engaging the ends of the clamping elements and having its upper face beveled, and set screws carried by the flange and having their inner ends beveled and adapted to engage the beveled surface of the ring whereby to force the ring downwardly against the clamping elements to force the latter downwardly into positive engagement with the well tubing.

1,400,941. LOOM FOR WEAVING AXMINSTER CARPETS AND RUGS. CHARLES H. COLLINS, West Albany, N. Y., assignor to S. Sanford & Sons, Inc., Amsterdam, N. Y. Filed Feb. 15, 1921. Serial No. 445,060. 10 Claims. (Cl. 139—66.)

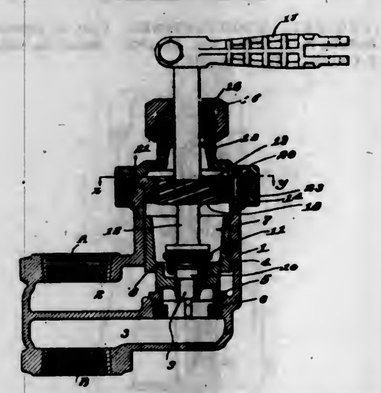


1. In a loom for weaving Axminster carpets and rugs, the combination with the usual weaving mechanism, of a positive tuft yarn feeding device driven therefrom and adapted to feed a fixed predetermined amount of tuft yarn during each cycle of the weaving mechanism, said device comprising two pairs of coacting rolls joined by an operative connection; and reeds, one mounted in the rear of each of said pairs.

1,400,942. TOY. WILLIAM L. DE HAVEN, Wichita, Kans., assignor to John W. Moyle, Augusta, Kans. Filed Feb. 7, 1921. Serial No. 443,287. 2 Claims. (Cl. 46—40.)

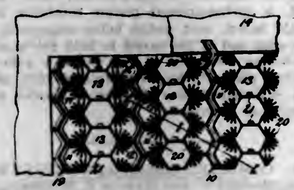
1. In a toy, the combination of an upright box having a transparent front and an upright partition spaced behind said front; a horizontal shaft journaled in the walls of the lower part of the box, an exterior hand-crank for rotating said shaft, a pulley on said shaft within the box, a rotary shaft journaled in the walls of the upper portion of the box and extending at right angles to the aforesaid shaft, a drive-belt passing around the upper shaft and said pulley, a crank on the upper shaft between said partition and the transparent front, and an articulated puppet comprising a head, trunk and limbs, the head being freely suspended from the crank on said upper shaft.

1,400,943. GLUING-MACHINE. ARMIN ELMENDORF, Madison, Wis., assignor to Haskelite Manufacturing Corporation, a Corporation of New York. Filed July 19, 1920. Serial No. 397,350. 8 Claims. (Cl. 144—279.)



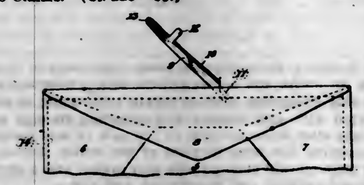
1. A machine of the character described comprising two work-engaging members arranged one above the other and having a width as great as the length of strips to be glued edge to edge, and feed rolls arranged at one end of said members to feed strips between the latter, said rolls each containing a plurality of sections yieldingly held to permit independent relative angular movements about the axis of the roll and at the same time be prevented from moving bodily transverse to said axis.

1,400,944. FLUID-CONTROLLING VALVE. HARRISON E. EVANS, Somerville, Mass., assignor to Manning, Maxwell & Moore, Inc., New York, N. Y., a Corporation of New Jersey. Filed July 24, 1920. Serial No. 398,634. 5 Claims. (Cl. 251—49.)



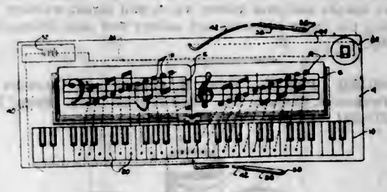
5. A valve device of the type described, having in combination an open ended casing, a valve stem extending axi-

ally of the open end of said casing and provided with a screw-threaded portion, a nut engaging said screw-threaded portion, a radial flange on said nut having a series of spaced openings therein, a fixed pin outstanding from the



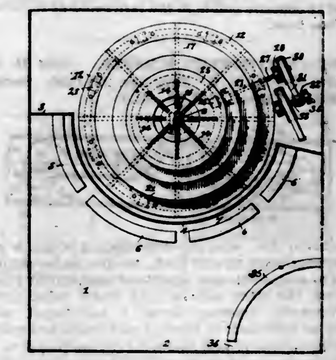
end of said casing and positioned for engagement with a selected one of said openings, and a cap having a bearing for said valve stem, said cap being constructed and arranged for threaded engagement with the upper end of said casing and to clampingly engage said flange.

1,400,945. RADIATOR UNIT. JOHN M. FEDDERS, Buffalo, N. Y., assignor to Fedders Manufacturing Company, Inc., Buffalo, N. Y., a Corporation of New York. Filed Mar. 3, 1920. Serial No. 363,010. 4 Claims. (Cl. 257—128.)



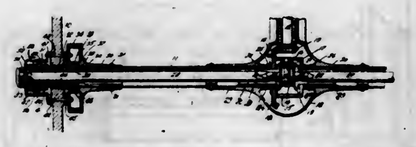
1. A radiator unit comprising a plurality of parallel tubes which are constructed from a single strip of metal and have their adjacent sides connected with each other, and which are provided with radiating fins struck integrally out of said metal strip.

1,400,946. ENVELOP-OPENER. BASIL FEDORKO, Ansonia, Conn. Filed Feb. 24, 1921. Serial No. 447,477. 6 Claims. (Cl. 229—86.)



1. An envelop opener comprising a metal blade having a stirrup at one end for engagement with the upper edge of a letter so as to support the blade adjacent the fold line of an envelop closure flap, the blade having its other end formed to be projected through the fold line at one side of the envelop, whereby said end may be engaged for upwardly tilting and sliding the blade for severing the envelop along the fold line of said closure flap.

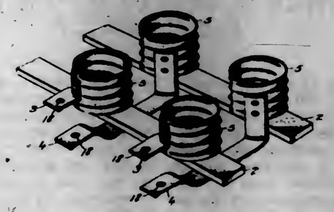
1,400,947. INDICATOR FOR MUSICAL INSTRUCTION. ELEANOR FENNELL, New York, N. Y. Filed June 23, 1920. Serial No. 391,014. 6 Claims. (Cl. 84—478.)



1. In apparatus for use in musical instruction, a chart having thereon a musical staff with notes on said staff, means representing the keyboard of a musical instrument with respect to which instruction is to be given, a signal, signal operating means comprising means connecting the notes on said staff with the keys on said keyboard, and independent means for connecting each with the signaling means and requiring independent selection of a note corresponding to the selected key, or vice versa, to produce a signal.

1,400,948. STORE. FRANK J. FLORENCE, Pensacola, Fla. Filed Aug. 27, 1921. Serial No. 496,871. 4 Claims. (Cl. 186—1.)

1. In a store of the class described, a rotary displaying mechanism, a partition arranged transversely of the store and provided with a curved portion arranged concentrically with the rotary displaying mechanism and encircling a portion thereof.



1,400,949. DRIVING-AXLE CONSTRUCTION. WILLIAM P. FREY, Buffalo, N. Y. Filed Nov. 22, 1920. Serial No. 425,611. 5 Claims. (Cl. 74—99.)

5. In a driving axle construction for motor vehicles, the combination of a differential gear drum, means for driving said differential drum, a housing for said differential gear drum and having inwardly extending collars at opposite sides within said housing and oppositely extending sleeves,

a pair of hollow axle shafts secured in said sleeves, a pair of differential gears in said gear drum, said gears having shanks projecting outwardly from said drum into said hollow axles in said sleeves, bushings interposed between said gear shanks and said hollow axles, and thrust washers between the inner edges of said collars and said differential drum.

1,400,950. PANEL. GUSS H. GNEISS and CHARLES J. PETERSON, Chicago, Ill. Filed Feb. 27, 1919. Serial No. 279,571. 1 Claim. (Cl. 175—298.)

A panel board for electric distribution including bus bars, sockets associated with said bus bars, and distributing terminals leading from the sockets, said sockets being arranged in tandem crosswise of the board and the terminals being arranged in pairs lengthwise on a given side of the board within a space defined by planes tangential to a socket at opposite points in the latter and at right angles to the bus bars.

1,400,951. BOILER-FLUE SCRAPER. JOHN H. GOODFELLOW, Buffalo, N. Y. Filed Nov. 22, 1920. Serial No. 425,926. 9 Claims. (Cl. 83—64.)

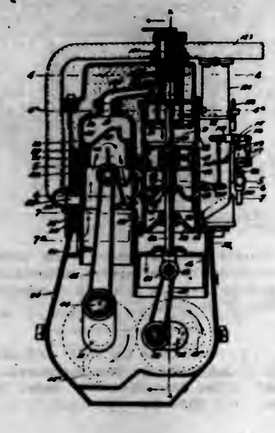
1. A boiler flue scraper, comprising a shaft, a saddle slidable lengthwise on said shaft, scraper blades pivoted at one end to said saddle and capable of independent yieldable movement, the other ends of said blades being provided with forwardly tapering horns, a bell-shaped member mounted on said shaft in front of said saddle and cooperating with the horns of said blades for contracting them upon the movement of said saddle toward said bell-shaped member, and means for permitting expansion of said blades when said saddle is moved in the opposite direction.

1,400,952. BED. IDALS L. HADLEY, Hartford, Conn. Filed Sept. 22, 1921. Serial No. 502,467. 9 Claims. (Cl. 5—18.)

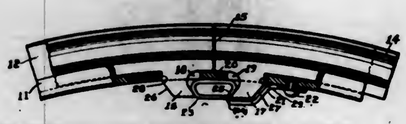
1. The combination of a bedstead to be used in connection with a receptacle having a door swinging on a vertical pivot, for closing or opening the receptacle, the bedstead being mounted in the receptacle and removable therefrom when the door is opened, and an article of furniture so mounted on said bedstead as to be inclosed in the receptacle when the door is shut.

1,400,953. HOOD-FASTENER. CARL R. HENNICKE, Buffalo, N. Y. Filed Nov. 10, 1920. Serial No. 423,065. 3 Claims. (Cl. 292—247.)

1. A fastener of the character described, comprising a barrel having a lower open end provided with oppositely disposed downwardly projecting lugs, a fastening plate adapted to coöperate with said lugs to form a pivotal mounting for said barrel and partially close said lower open end, a spring-pressed piston rotatably supported within said barrel, said piston being engageable through the lower open end of the barrel to hold the same against rotation during assembly of the parts, a yoke on said piston, a cam pivotally supported in said yoke, and a post having a cam-shaped face adapted to receive said cam, substantially as described.



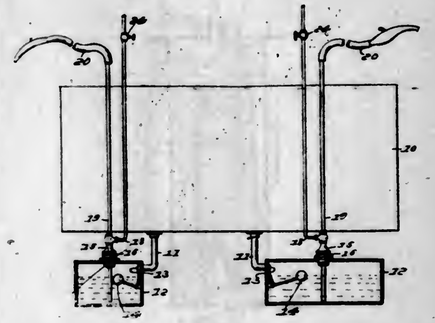
1,400,954. COMBINED BRUSH AND SUPPLY-HOLDER. JOHN E. HOLLOWAY and HAROLD E. BURWELL, Milford, Conn. Filed Mar. 23, 1921. Serial No. 454,716. 20 Claims. (Cl. 132—84.)



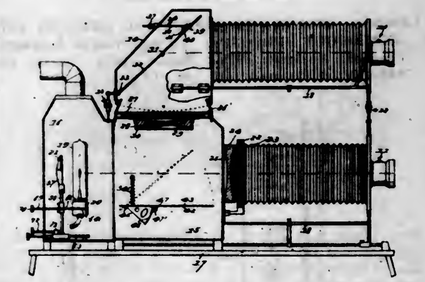
20. A holder for collapsible tubes comprising a casing having an outlet and a longitudinal slot, a substantially ovoid tube collapsing member within said casing, a stem connected with said member and extending through said slot, said stem being inclined to the axis of said member and engaging the same forward of the center thereof, a finger piece on said stem outside said casing, and a spring interposed between said finger piece and casing.

1,400,955. INTERNAL-COMBUSTION ENGINE. JAMES JESSEN, Minneapolis, Minn. Filed Aug. 16, 1919. Serial No. 318,005. 28 Claims. (Cl. 123—119.)

1. A gas converter and inductor for internal combustion engines, comprising two compression chambers and a piston working in said chambers, means for supplying air and fuel to said chambers, a connecting conduit between said chambers, a valve automatically controlling the pressure in said chambers and conduit, a passageway in said piston, periodically connecting said conduit to the combustion cylinder of the engine, and a port to said passageway controlled by said piston.



1,400,956. RIM. OTTO H. JOSSKI, Cleveland, Ohio, assignor to The Standard Parts Company, Cleveland, Ohio, a Corporation of Ohio. Filed July 14, 1919. Serial No. 310,793. 3 Claims. (Cl. 152—21.)

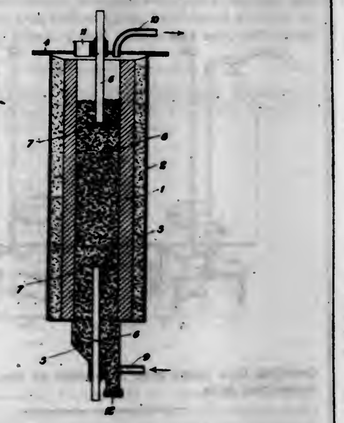


1. The combination of a tire-carrying rim having a pair of radial apertures separated by a web; a transversely split side ring detachably fitted to said rim and provided with lugs adjacent its ends adapted to project through said apertures, and having recesses in their adjacent faces; and a latch of uniform width throughout pivoted to said rim and having a head at one end adapted to be swung between said lugs to engage said web and said lugs to lock said ring in seated position.

1,400,957. LIQUID-EXTRACTOR. ORION W. JUDD, Paducah, Ky. Filed Oct. 7, 1920. Serial No. 415,313. 2 Claims. (Cl. 221—74.)

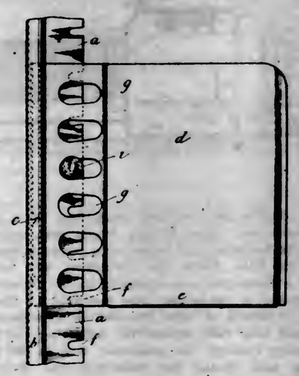
1. A liquid fuel supply apparatus for vehicles having a storage tank, a measuring tank of a definite capacity connected with the storage tank by a supply pipe, a float controlled valve for the supply pipe opening inwardly with reference to the measuring tank, a coupling having a bore in communication with the measuring tank at its top and provided with a lateral airline connection, and a delivery tube extending axially through the bore of the coupling to a point near the plane of the bottom of the measuring tank.

1,400,958. STEREOPTICON. WILLIAM H. KELLY, San Francisco, Calif. Filed Sept. 25, 1919. Serial No. 326,145. 7 Claims. (Cl. 88—26.)



1. A duplex stereopticon consisting of a duality of superposed lens tubes having lenses and provided with means for focusing said lenses on a common remote point, a housing with which the lowermost lens tube is connected, a condenser lens mounted in the forward wall of the housing, a condenser lens monuted in the top wall thereof, a source of light disposed in alinement with the lowermost lens tube, means for deflecting the light from said source through the condenser lens in the top of the housing, and means for reflecting the deflected rays through the upper lens tube.

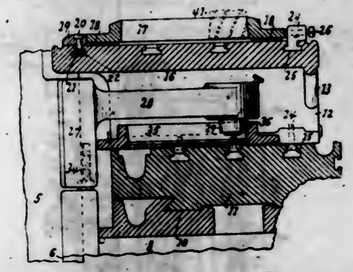
1,400,959. PROCESS AND APPARATUS FOR CARRYING OUT CHEMICAL REACTIONS BY CATALYSIS. JOSEPH KOETSCHET, Lyon, France, assignor to Societe Chimique des Usines du Rhone, Anciennement Gilliard, P. Monnet et Cartier, Paris, France. Filed Apr. 26, 1919. Serial No. 292,947. 2 Claims. (Cl. 204—31.)



1. The process of producing gaseous chemical reactions by catalysis, which consists in passing the reacting gases through a uniformly heated zone formed solely by a thoroughly mixed mass of divided substances, said mass being formed of material adapted to promote chemical reactions by catalysis and to be heated solely by the passage of an electric current through said mass

to a uniform temperature suited for the catalytic reaction without any other auxiliary source of heat except that

furnished by the reacting gases themselves, the said divided mass thus performing the combined functions of a heating resistance and a catalyst.



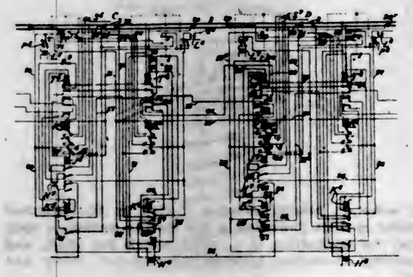
1,400,960. **MEANS FOR SUPPORTING SHELVES AND ANALOGOUS PURPOSES.** ARTHUR WRENN LAMBERT, Croydon, England. Filed Feb. 8, 1921. Serial No. 443,353. 6 Claims. (Cl. 248—19.)

1. Means of the kind described comprising a support having a guideway, and a series of openings spaced apart with a given pitch, a member adapted to slide along such support under the control of the guideway and having a series of openings spaced apart with a different pitch, and a member adapted to enter any pair of companion openings brought into register, substantially as described.

1,400,961. **PROFILING ATTACHMENT FOR MILLING-MACHINES.** CHARLES W. LANG, Brooklyn, N. Y. Filed Jan. 16, 1920. Serial No. 351,871. 6 Claims. (Cl. 90—13.)

1. In a profiling attachment for milling machines the combination with a movable table having a work support mounted thereon, and a cutter arranged above the table for shaping the work, of a master form carried by the table, a support for the table, and means including an adjustable bracket with a master form guide mounted thereon connected to the support cooperating with the form for guiding the work in a path corresponding to the configuration of the form.

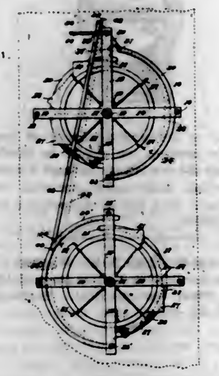
1,400,962. **PROCESS OF AND APPARATUS FOR DRILLING OIL-WELLS.** ROY E. LEONARD, Los Angeles, Calif. Filed Mar. 9, 1920. Serial No. 364,748. 5 Claims. (Cl. 255—1.)



1. A process of drilling oil wells which comprises continuously maintaining a pressure in excess of the hydrostatic pressure produced by a body of fluid filling the well without circulation on the well and reciprocating a cutting bit in the well.

1,400,963. **OPERATION OF BLAST-FURNACES.** VASILI LIZOUNOFF, Pittsburgh, Pa., assignor to Martin A. Rossnoff, Pittsburgh, Pa. Filed Apr. 27, 1920. Serial No. 377,105. 5 Claims. (Cl. 75—45.)

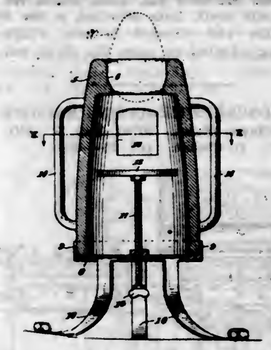
1. The method herein described of producing ferro-silicon in a blast furnace which consists in conducting the blast-furnace operation upon a furnace charge composed of blast-furnace slag, coke, and heating-furnace cinder.



1,400,964. **RAILWAY-TRAFFIC-CONTROLLING APPARATUS.** RONALD A. MCCANN, Swissvale, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Apr. 28, 1919. Serial No. 292,136. 20 Claims. (Cl. 246—33.)

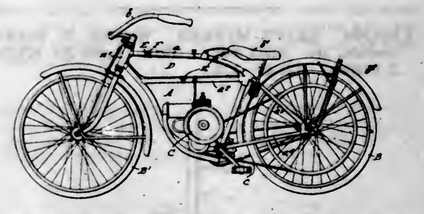
12. In combination, a section of railway track, two sources of alternating current located adjacent the ends of said section, and means controlled by a train entering the section from either end for causing current to flow in

the same direction along the two track rails of the section from the source at the opposite end.



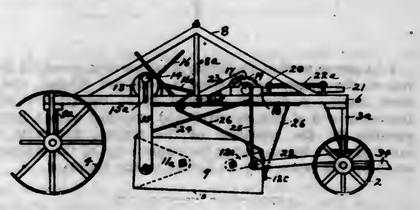
1,400,965. **CURRENT-MOTOR.** WILLIAM J. MCGAVOCK, Memphis, Tenn. Filed Dec. 16, 1919. Serial No. 345,282. 4 Claims. (Cl. 170—122.)

1. A power plant comprising adjacently positioned current wheels adapted for revolution in opposite directions, feathering means for the blades thereof, positioning guides lying in the same plane with the upper end of the feathering means adapted for receiving the blades from said feathering means, whereby the plant is rendered inoperative and simultaneous actuating means for said guides.



1,400,966. **EGG-TESTER.** JANN K. MARTINKA and ELIZI K. MARTINKA, New York, N. Y., assignors of one-third to Martin Tomecek, New York, N. Y. Filed Dec. 6, 1920. Serial No. 428,542. 1 Claim. (Cl. 99—6.)

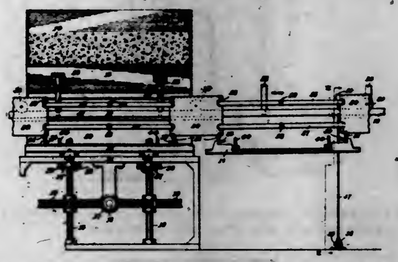
An egg tester including an upright receptacle having a tubular body portion provided with an open upper end formed interiorly to conform to a portion of an egg for providing a supporting seat therefor and provided with a sight opening in the side thereof immediately below the open upper end, a detachable bottom plate, carrying supporting legs, for the said tubular body, a removable reflector within the body portion and vertically adjustable therein, and a single supporting bar centrally attached



to said reflector and screw-threadedly mounted within the central portion of the removable body plate.

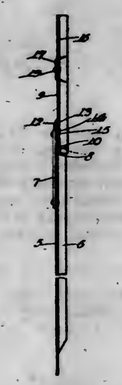
1,400,967. **MEANS FOR SECURING ARTICLES TO MOTORCYCLES AND THE LIKE.** JOSEPH F. MERKEL, Rochester, N. Y., assignor to Cyclemotor Corporation, Rochester, N. Y. Filed Nov. 22, 1920. Serial No. 425,677. 7 Claims. (Cl. 206—45.)

1. The combination with the frame of a motor cycle and a fuel tank, of a fastening device for securing said tank to said frame, including a member secured to said tank and having a part extending into contact with said frame, said member having a slot adjacent to said frame, and a strap extending through said slot and around a frame member and around said part and securing said part to said frame.



1,400,968. **LEVELER AND DIRT-SCRAPER.** LOUIS JAMES MITCHELL, Dinuba, Calif. Filed June 29, 1920. Serial No. 392,869. 5 Claims. (Cl. 214—68.)

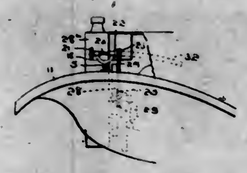
1. In a leveler of the character described, the combination of a rectangular frame supported on wheels, a windlass operated by a ratchet journaled transversely across said frame, and a shaft having enlarged ends with eccentric pins therein journaled to said frame parallel



with said windlass, a scraper, hangers pivoted at one end to the rear of said scraper and at the other end pivoted to said eccentric pin, hand means for moving and locking said shaft, lines attached to the front end of said scraper and attached to said windlass, said windlass being adapted to raise the front end of said scraper.

1,400,969. CONCRETE-TIE-MAKING MACHINE. JOHN NELSON, Ottawa, Kans. Filed May 7, 1921. Serial No. 467,727. 10 Claims. (Cl. 25—45.)

1. A tie making machine comprising cement feeding means, movable mold jaws adapted to receive the cement from the feeding means, automatic operating means for the jaws adapted for engaging the cement during operation, and means adapted for positioning a reinforcing member between the jaws for embedding in the finished tie.

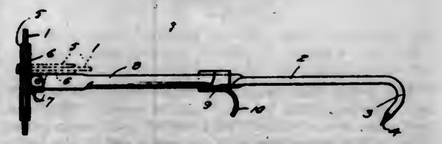


1,400,970. GRAVE-MARKER. WILLIAM F. NORMAN, Nevada, Mo. Filed Sept. 4, 1919. Serial No. 321,518. 3 Claims. (Cl. 40—125.)

1. A grave marker including a supporting standard having at the upper end thereof a bendable tongue, and a cross having a portion adapted to fit coextensive with the upper end of the standard and provided with a linked opening for the reception of the tongue, and with an integral cleat for engaging the upper edge of the standard whereby the cross may be locked to the standard.

1,400,971. MOTOR-VEHICLE ATTACHMENT. FRANK H. NYE, Warsaw, Ind. Filed Nov. 18, 1919. Serial No. 338,957. 6 Claims. (Cl. 180—53.)

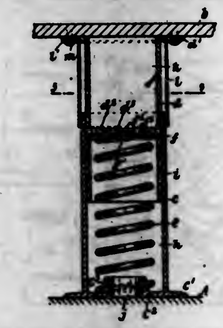
6. In a motor vehicle attachment, a pair of companion vehicle fender engaging bracket members, a fender engaging hook carried by the terminal of one of the members, socket members carried by the bracket members, a spherical member adjustably mounted in the socket, means for securing the spherical member in adjusted position in



the socket, a bearing member carried by the spherical member, a shaft journaled in the bearing member, a split pulley for application to a motor vehicle fan shaft, and a driving connection between the two-part pulley and shaft.

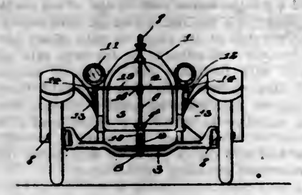
1,400,972. METHOD OF AND APPARATUS FOR FEEDING FLUIDS. CHRISTOPHER OFFENHAUSER, Philadelphia, Pa. Filed Aug. 10, 1920. Serial No. 402,585. 16 Claims. (Cl. 23—1.)

1. The method of forming a charge of condensed gas, which consists in passing the gas to be condensed into a container, passing the container through a cooling medium, and lastly injecting fluid under pressure into the container to commingle with the condensed gas and discharge it from the container.



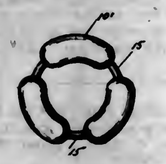
1,400,973. CREAM-SEPARATOR. WARREN N. OPT, Tiffin, Ohio, assignor to Charles I. Strauss and Charles Bond, Tiffin, Ohio. Filed Apr. 1, 1921. Serial No. 457,600. 1 Claim. (Cl. 31—85.)

A cream separator comprising a flexible disk, complemental bars having the disk secured therebetween, a stem having pivotal connection with one of said bars and having its outer end of hook formation and terminating in a point and having the intermediate portion made rounding, and a handle adjustable longitudinally and angularly upon the rounded portion of the stem.



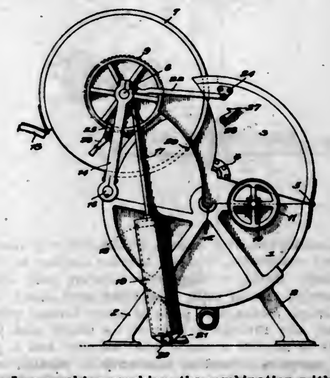
1,400,974. SEATING APPLIANCE. FRED G. PARKER, Paterson, N. J. Filed Apr. 21, 1921. Serial No. 463,233. 3 Claims. (Cl. 155—52.)

1. The combination, in a seating appliance, of upper and lower members telescoped one into the other and together forming entirely below the upper member a pneumatic-cushion space having restricted means to allow efflux therefrom and influx thereto of atmospheric air, and a



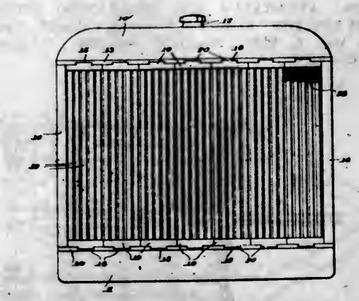
spring for normally holding the upper member elevated, one member inclosing an air-retreat space having restricted communication with the first-named space.

1,400,975. DIRIGIBLE HEADLIGHT FOR MOTOR-VEHICLES. HENRY BENJIMAN PAGE, Greenville, Miss. Filed Oct. 11, 1920. Serial No. 415,990. 1 Claim. (Cl. 240—62.)



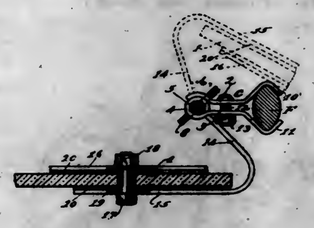
The combination with a signaling device for an automobile, the signaling device including a vertical rod journaled in advance of the radiator and provided at its lower end with a vertical slot, a signal member on the upper end of said rod, and a forwardly extending operating arm clamped upon the steering arm connecting rod; a dirigible head lamp construction including a pair of head lamps rotatably mounted in brackets secured upon the automobile frame, the standards of the lamps being provided with forwardly extending arms connected by a rod, and a forwardly extending arm secured upon said vertical rod and pivotally connected with said last named connecting rod whereby the operation of the signal member and the turning of the head lamps will be simultaneous.

1,400,976. LIFE-SAVING DEVICE. WILLIAM G. PARMELE, Seattle, Wash. Filed Jan. 11, 1921. Serial No. 436,519. 1 Claim. (Cl. 9—17.)



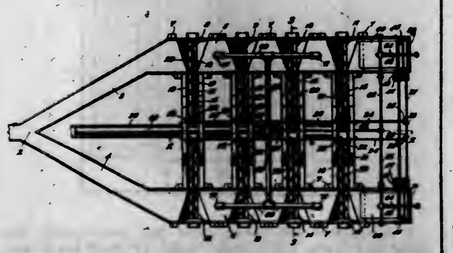
A life saving apparatus consisting of a continuous buoyant body passable over the head of the wearer and contractile about the neck to assume a position intermediate the head and shoulders, and said body having a reduced elastic portion to facilitate contraction and expansion.

1,400,977. WASHING-MACHINE. EMANUEL J. PERRY, New Bedford, Mass. Filed Sept. 9, 1920. Serial No. 409,148. 12 Claims. (Cl. 68—18.)



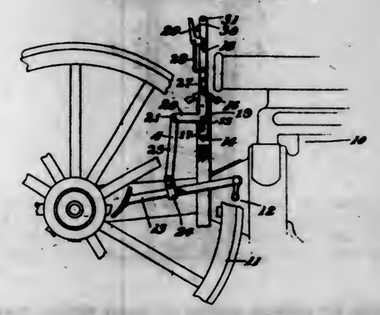
6. In a washing machine, the combination with a casing, of a cylinder therein, means for supporting said cylinder in the casing for a rotary movement, means for pivotally connecting the cylinder to the casing to permit the same to be swung from the casing, and power means for moving said cylinder from said casing, said power means comprising a fluid motor.

1,400,978. RADIATOR. MORRIS POLNOROFF, Philadelphia, Pa., assignor of one-half to Morris Abel, Philadelphia, Pa. Filed Feb. 14, 1921. Serial No. 444,787. 3 Claims. (Cl. 257—129.)



1. A radiator comprising upper and lower tanks, the upper and lower tanks being closed at their lower and upper surfaces respectively by means of plates formed with hollow extensions communicating with the tanks, said plates being formed in their confronting faces with grooves, a series of vertically disposed tubes disposed between said tanks, pan-like heads carried by and communicating with the upper and lower ends of said tubes and formed with extensions fitting within said grooves, extensions formed on said plates and provided with openings communicating with the respective tanks, said last named extensions being provided in registration with said grooves with openings and tubes carried by said pan-like heads passing through said openings and carrying retaining caps.

1,400,979. AUXILIARY WINDSHIELD FOR VEHICLES. THOMAS B. POWELL and CHARLES S. MCLEAN, Long Beach, Calif., assignors, by mesne assignments, to Thomas O. Osborn, Los Angeles, Calif. Filed Aug. 27, 1919. Serial No. 321,961. 3 Claims. (Cl. 296—84.)



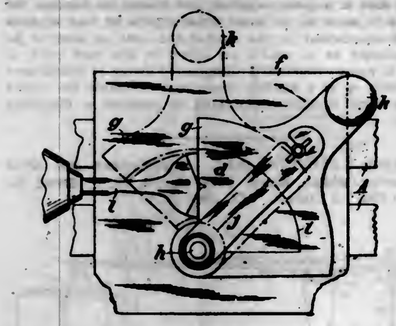
1. In combination with a main windshield of a vehicle, an auxiliary windshield, a shield holding member fixed to said auxiliary shield, a clamp for securing said shield holding member to said main windshield, said clamp comprising a single rectangular piece of metal formed with a longitudinal slot through a part of its length and bent upon itself to provide a single solid member and a pair of spaced mmebers extending substantially parallel with said solid member, said piece of metal bent to encompass a bolt at its bent end, all of said members formed with bent outer ends adapted to be drawn together to engage the frame of the main windshield, screws adapted to draw said spaced members toward said solid member, a bolt passing between said spaced members and said single member; said shield holding member looped around said bolt intermediate of said spaced members; and a nut on said bolt adapted on being advanced on said bolt to press said spaced members together to lock said shield holding member against turning.

1,400,980. APPARATUS FOR SEPARATING SOLIDS FROM LIQUIDS. SAMUEL R. PURYEAR, Columbia, Tenn. Filed Mar. 5, 1921. Serial No. 449,868. 6 Claims. (Cl. 83—81.)

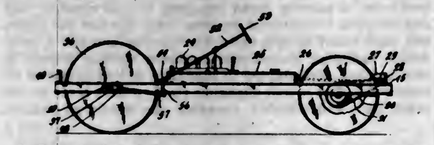
1. In an apparatus of the class described the combination of a liquid passage provided with a plurality of depressions adapted to facilitate the settling of solids suspended in said liquid; means adapted to supply an additional quantity of liquid to said passage; automatic means actuated by the flow of liquid through said passage for controlling said supply means; means comprising inclined screw conveyers adapted to remove the solids from said depressions and to raise them above the normal liquid level in said passage; and means adapted to receive said solids from said conveyers, substantially as described.

1,400,981. CLUTCH-PEDAL ATTACHMENT FOR TRACTORS. ERIC R. PUSANO, Boone, Nebr. Filed Nov. 11, 1919. Serial No. 337,354. 2 Claims. (Cl. 74—39.)

1. The combination with a power driven tractor having a rewardly extending depressible clutch pedal normally urged upwardly to close the clutch, a strap bracket adapted to be secured in substantially vertical position on the tractor above the clutch pedal, a notched sector secured across the outer face of the strap bracket, said bracket being offset outwardly below said sector and concentrically thereto and with the outer face of the offset portion substantially flush with the outer face of said sector, a bell crank lever pivoted at its angle to said offset portion of the strap bracket and adapted to traverse said sector at one end and with its other end extending substantially horizontally in a rearward direction from said clutch pedal, a locking dog on said lever adapted to engage the sector for locking the lever in adjusted position, and a link pivotally connected between said horizontally extending end of the lever and said clutch pedal for depressing the latter upon the rearward swinging of the lever.



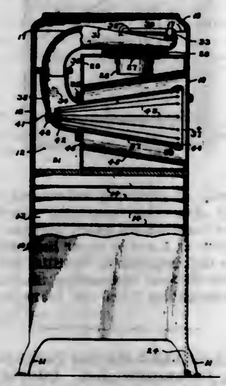
1,400,982. COTTON-SCRAPER. JAMES D. RAMSEY, Tishomingo, Miss. Filed Aug. 13, 1920. Serial No. 403,246. 2 Claims. (Cl. 97—9.)



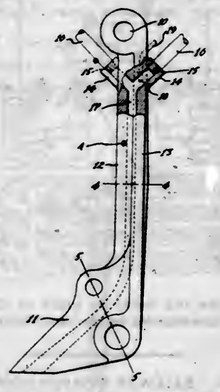
2. A scraper attachment for agricultural implements consisting of an open blade substantially V-shaped at its forward edge and disposed with its opening facing the implement, the blade having a substantially tapered lowered portion widest at the front, attaching means extending from the upper portion of the blade and the upper portion extending rearwardly and inwardly beyond the lower portion.

1,400,983. TONE-ARM FOR SOUND-REPRODUCING MACHINES. ARTHUR ROBERT RANDALL, Ealing, England. Filed Feb. 6, 1920. Serial No. 356,591. 1 Claim. (Cl. 144—309.)

A method of making a plurality of hollow wooden tone arm elbows, which consists in forming each of a plurality of blocks in the shape of a fraction of an annulus, boring a curved passage through each of said blocks having the same diameter throughout, securing the blocks together to form an annulus, and shaping the exterior of said annulus.



1,400,984. MOTOR-VEHICLE FOR TRAVERSING MARSH-LANDS. MALCOM RAY, Orange, Tex. Filed Oct. 13, 1920. Serial No. 416,600. 4 Claims. (Cl. 180—20.)



1. In a device of the class described, a main frame, an engine mounted therein, a plurality of water-tight rotatable drums, means for driving the drums from the engine, an additional drum mounted to rotate normally on an axis extending perpendicularly of the longitudinal axis of the frame, and means for varying the angular position of the additional drum and comprising a steering shaft, a shaft actuated thereby, oppositely turned crank elements carried by the shaft last named, mounting means for the additional drum, and elements connecting the mounting means with the crank elements.

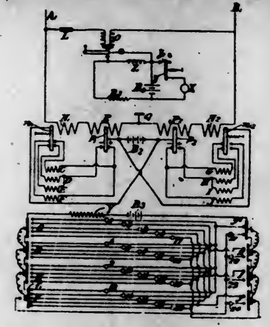
1,400,985. PHONOGRAPH-AMPLIFIER. JOSEPH A. RAYDER, Philadelphia, Pa. Filed Jan. 17, 1921. Serial No. 437,854. 2 Claims. (Cl. 181—27.)

1. In a phonograph, an amplifier, strings disposed about its inner surface and means for adjusting said strings simultaneously.

1,400,986. BRAKE-HANGER. JESSE F. RILEY and BLAIR S. FOCKLER, Hagerstown, Md. Filed Dec. 6, 1920. Serial No. 428,719. 5 Claims. (Cl. 188—205.)

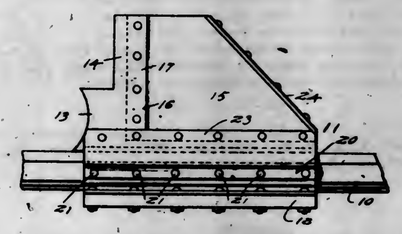
1. A hanger of the character described having a longitudinally disposed bore opening at the lower end of the hanger, and adapted to convey sand through the hanger, said bore opening at one side of the hanger adjacent its upper end, and means for securing a sand supply pipe to the hanger at the inlet opening of the bore.

1,400,987. DISPLAY-STAND. NICHOLAS RIPPENBEIN, New York, N. Y. Filed Jan. 15, 1921. Serial No. 437,462. 7 Claims. (Cl. 211—24.)



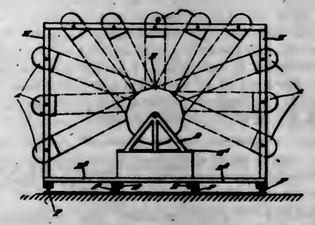
1. A folding display stand, comprising a single strip of material bent along suitable lines to present a base, an inclined back having its lower end supported on the base, a platform sloping downwardly from its forward to its rear end and forming a continuation of the back, and a brace connected to the base and supporting the forward end of the platform at an elevation above the base, means integral with the back and engageable with the base for supporting the back in inclined position.

1,400,988. PRINTING-TELEGRAPH. FOSTER RITCHIE, Ealing, England. Filed Aug. 6, 1918. Serial No. 248,617. 6 Claims. (Cl. 178—33.)



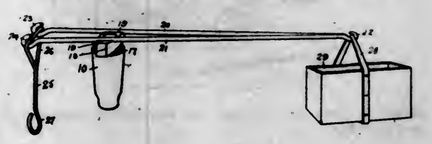
1. A printing telegraph in which the impression of a character may be effected by the actuation of a single key at the transmitting station and in which direct currents of different polarity and strength are transmitted and received independently and simultaneously

over the leads of a two wire line, a polarized and a neutral relay inserted in each of the said leads at the



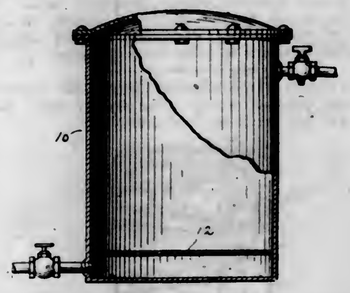
receiving station and means by which an alternating current may be superimposed on the direct current traversing each lead.

1,400,989. RAILWAY BUMPER-BLOCK. CHARLES ROBERTS, Portsmouth, Ohio. Filed Apr. 12, 1921. Serial No. 460,765. 1 Claim. (Cl. 104—254.)



A railway track bumper having rail engaging chairs, a side block arranged in the vertical planes of the rails, marginal metallic frames embracing the side block and having connection with the rail chairs, and a draw head bumper member transversely disposed between the planes of the said marginal frames and attached to said marginal frames, the latter being extended longitudinally of the rails beyond the plane of the draw head bumper member to provide terminal wheel stops.

1,400,990. PROJECTION OR DISTRIBUTION OF LIGHT. JOSEPH THEODORE ROBIN, Streatham, London, England. Filed Sept. 14, 1918. Serial No. 254,113. 12 Claims. (Cl. 240—3.)

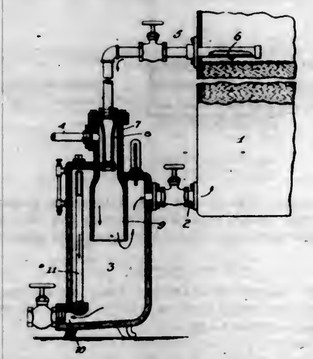


1. Apparatus for producing an illuminating area or zone for the location of aircraft comprising several powerful light projectors such as searchlights for producing a number of pencils or beams of light of high intensity, means whereby the beams are directed upwardly in the same zone or angular position, and means for causing the beams to move in the same definite path or zone at such speed in relation to the size of the area or zone to be illuminated as to enable an object in the said path or zone to appear constantly illuminated owing to persistence of vision or at a slightly less speed to enable the object to be very rapidly illuminated to produce a flickering effect.

1,400,991. STUFFING-BOX. ROY ROGERS and MILE GROVES, Midian, Kans. Filed Nov. 4, 1920. Serial No. 421,794. 2 Claims. (Cl. 286—32.)

1. A device of the class described associated with a well tube and its polish rod and discharge branch and comprising a tubular body adapted to be attached to the well tube, a packing gland engaging in said tubular body and adapted to compress packing rings against the polish rod, said gland having upwardly opening notches, a lever device including spaced side members bearing loosely in said notches, and adapted to support a weight device at its longer end, and a link engaging the two part lever at the other end, and slidably engaging the discharge branch.

1,400,992. PROCESS OF TREATING COFFEE-BEANS AND OTHER SUBSTANCES AND PRODUCT RESULTING THEREFROM. NATHAN ROSENWATER, Cleveland, Ohio. Filed Aug. 2, 1920. Serial No. 400,821. 3 Claims. (Cl. 99—11.)

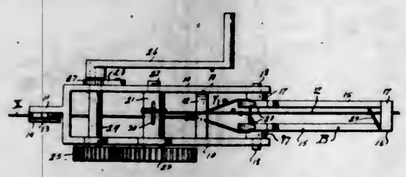


1. The process of purifying substances composed of natural cellular structures containing volatilizable alkaloidal and other constituents which consists in subjecting them to the action of a gas or vapor heated to a temperature as great as that required to volatilise the volatilizable alkaloids therein without carbonising the cellulose structure, and in segregating from the beans the volatilized alkaloids.

1,400,993. BOILER FEED-WATER PURIFIER. CHARLES E. SARGENT, Indianapolis, Ind. Filed Aug. 9, 1919. Serial No. 316,290. 5 Claims. (Cl. 122—398.)

1. A feed water heater and purifier for boilers comprising a hollow body having at its lower end a blow-off

opening, means for connection with the lower part of a boiler, a downwardly opening vertical nozzle and means for connecting same with the upper part of a boiler, an annular feed water heating chamber surrounding the nozzle and means to supply feed water thereto above the

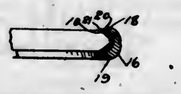


discharge end of the nozzle, and around the body thereof and an enlarged relatively short bell in the body in which the feed water and water from the nozzle mix and through which they move at low velocity, whereby to reduce the disturbance caused by the entering of such body of water to that within the purifier to the minimum.

1,400,994. BABBITTING DEVICE. EARL B. SCARSDALE, Dayton, Ohio. Filed May 31, 1921. Serial No. 473,597. 4 Claims. (Cl. 22—123.)

1. In a device of the character described, supporting rails, bars mounted on said rails and adjustable longitudinally thereof, frames, means for supporting said frames and for adjusting the same toward and away from the bars, and means carried by the frames and adapted to be positioned within a cross-head shoe so as to form with the walls thereof spaces for reception of Babbitt-metal.

1,400,995. WIRE TIGHTENER AND SPLICER. HENRY H. SCHAEFER, Weldona, Colo. Filed Feb. 19, 1921. Serial No. 446,374. 7 Claims. (Cl. 140—123.5.)

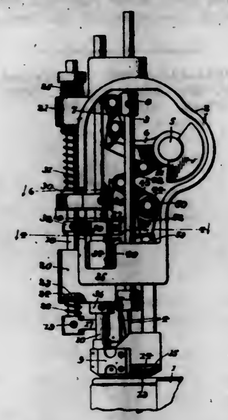


1. A wire tightener and splicer comprising two sections, one of said sections having thereon a pair of laterally spaced, loop engaging hooks, the other section having a wire tightening device, the loop engaging hooks having their bills normally extending from the tensioning device, the last named section being pivoted to the first named section on an axis radially distant from the bight of the hooks and disposed normally a greater distance from the tensioning device than the bight of said hooks whereby to cause the loop to be pulled from said hooks when the wire on the second named section has been bent around said loop.

1,400,996. WELL-CLEANER. ALEXANDER SCHEURER, Kansas City, Mo. Filed June 1, 1920. Serial No. 385,401. 1 Claim. (Cl. 166—20.)

In a well cleaning device, an interior casing member having its lower end portion open and adapted to fit snugly within the wall of the well and the remainder of said interior casing tapering gradually in the direction of the upper end of said well, and a conduit member for conducting a flow of liquid under pressure to the vicinity of the lower end of said well casing, said conduit member extending from the upper end of the well and through the wall of said casing member to the interior thereof and below the lower end of said casing member.

1,400,997. OPHTHALMIC MOUNTING. HOWARD H. SCHOTT, Providence, R. I., assignor to Universal Optical Corporation, Providence, R. I., a Corporation of Rhode Island. Filed June 23, 1919. Serial No. 306,142. 3 Claims. (Cl. 88—47.)



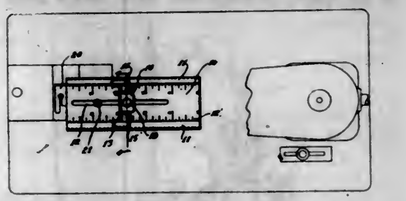
1. In an ophthalmic lens frame, an inner rim having a lens-receiving groove, a non-metallic outer rim for said inner rim formed of a continuous annular band internally grooved to receive said inner rim, said groove being offset laterally from a medial line through said outer rim and its rear side wall being thinner than that at the front of said outer rim and said outer rim being shaped to extend around a laterally-extending member on said inner rim.

1,400,998. TRIMMING MECHANISM FOR SEWING-MACHINES. DUDLEY S. SEYMOUR, Oak Park, Ill., assignor to Union Special Machine Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 10, 1916. Serial No. 83,299. 8 Claims. (Cl. 112—122.)

4. A trimming mechanism for sewing machines including in combination a work support, a presser foot, a presser bar supporting said foot, a stationary trimming blade carried by said presser foot, a vertical shaft in rear of the presser bar, the movable trimming blade carried by

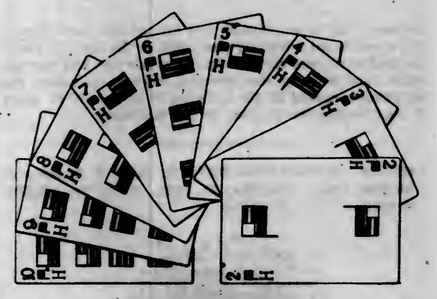
said shaft and coöperating with said stationary blade, a sleeve surrounding said presser bar, means for supporting said sleeve whereby the same may oscillate but is held from endwise movement relative to the presser bar, means

for oscillating the sleeve, an eccentric carried by said sleeve, an eccentric strap coöperating therewith, an arm carried by said vertical shaft to which said eccentric strap is connected and means for oscillating said sleeve.



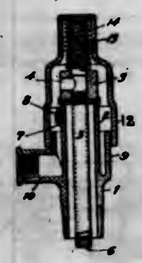
1,400,999. AUTOMOBILE-SIGNAL. WILLIAM F. SHONK, Detroit, Mich. Filed Jan. 15, 1921. Serial No. 437,460. 1 Claim. (Cl. 116—52.)

A signaling mechanism having a casing provided with a slot through one of its walls, a signaling member pivoted within the casing for projection through said slot, said member having a substantially straight signal head, a depressible lever on the exterior of the casing, a flexible element connected to said member and to said lever passing over said head and through a wall of the casing, and a return spring for the signaling member connected to the casing and to said member, and said flexible element being disposed for operation intermediate said spring and the adjacent wall of the casing to prevent detachment of the flexible element from the head.



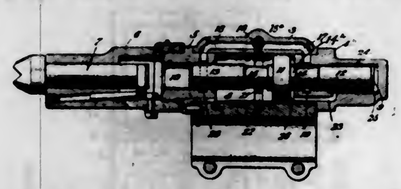
1,401,000. GAGE. CONSTANCE M. SKOLFIELD, New Orleans, La. Filed Nov. 8, 1920. Serial No. 422,576. 1 Claim. (Cl. 112—158.)

A sewing machine attachment comprising an elongated member removably secured to the machine, provided with a centrally disposed longitudinal slot, bearing suitable indicia upon opposite sides of said slot and having the opposed longitudinal edges of said member folded inwardly to provide channels, a vertical gage disposed above the elongated member and provided with horizontal L-shaped feet engaging said channels, a horizontal flange projecting



from the upper edge of said gage, a threaded element carried by said flange extending through the slot in said elongated member and adapted to engage the plate of said machine.

1,401,001. GAME OF CARDS. JOHN W. SMILEY, Winchester, Ky. Filed Nov. 24, 1919. Serial No. 340,336. 5 Claims. (Cl. 46—25.)

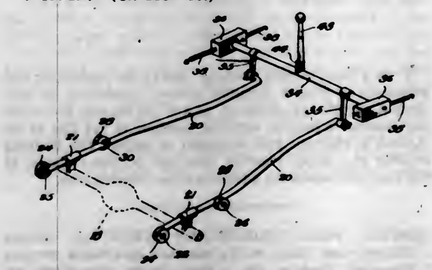


1. A card game, comprising a red suit and a blue suit, each suit comprising two series of fourteen cards each bearing emblematic representations, all of said suit cards having three separate indicia in the peeps thereof, and a best bower independent of either of the suits for use in connection therewith, substantially as described.

1,401,002. SAFETY RELIEF-VALVE FOR HOT-WATER SYSTEMS. CHARLES H. SMITH, Boston, Mass. Filed Apr. 13, 1921. Serial No. 461,010. 8 Claims. (Cl. 137—92.)

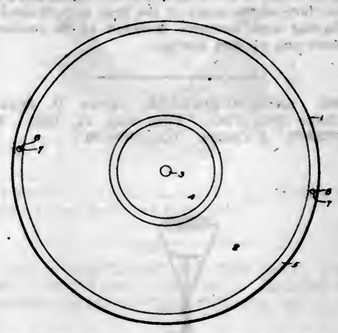
2. A device of the class described comprising a tube in communication with water in a tank, a pressure valve controlling the outlet from one end of said tube, and a fusible plug closing an opening through the side of said tube.

1,401,003. MOTOR. WILLIAM A. SMITH, Phillipsburg, N. J., assignor to The Denver Rock Drill Manufacturing Company, Denver, Colo., a Corporation of Delaware. Filed Oct. 16, 1916, Serial No. 125,945. Renewed May 9, 1921. Serial No. 468,170. 6 Claims. (Cl. 121—17.)



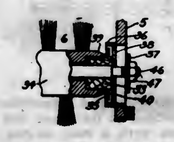
1. In a motor of the character set forth, the combination with a cylinder member having a head chamber and opposite neck chambers extending therefrom, said cylinder member having supply ports opening into the neck chambers, of a piston operating in the cylinder member and comprising a head in the head chamber and necks respectively operating in the neck chambers, said necks having reduced portions of less cross sectional area than the neck chambers to alternately and intermittently afford communication between the ports and the head chamber on opposite sides of the head, and bosses at the juncture of the head and necks that substantially close the inner ends of the neck chambers whenever the piston makes a stroke of extreme length, thereby forming cushions of trapped motive fluid.

1,401,004. ELECTRICAL FUSE. HASCAL SNODGRASS, Bisbee, Aris. Filed Mar. 12, 1921. Serial No. 451,907. 4 Claims. (Cl. 200—131.)



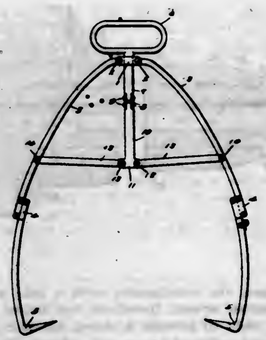
1. A fuse comprising a hollow cylindrical body portion of insulating material, a conducting cap on each end of said body portion, said caps and said body portion being split longitudinally to form two separable members, a fusible element adapted to be disposed within the hollow portion and to be gripped at its ends between the separable members, and a collar adapted to be applied to the caps when the separable members are placed together to hold them together.

1,401,005. VEHICLE-BRAKE. FRANK B. SNYDER, Altoona, Pa. Filed Apr. 22, 1920. Serial No. 375,814. 7 Claims. (Cl. 188—80.)



1. The combination with a brake drum having a laterally projecting annular flange, of an operating rod extending along one side of said drum, shoes rotatably carried by said operating rod and adapted for engaging said annular flange, and an operating device for said rod.

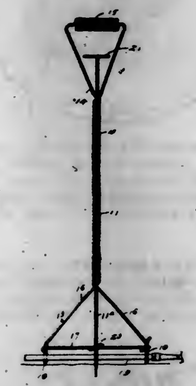
1,401,006. INDICATOR. HENRY A. SOMMERS, Jersey City, N. J. Filed Mar. 16, 1921. Serial No. 453,288. 4 Claims. (Cl. 240—1.)



1. As a new article of manufacture, a phonograph record including a grooved playing surface, a plurality of pockets arranged around the outer edge of the playing surface, and luminous material in the pockets facilitating the application of a needle to the record when said record is rotated.

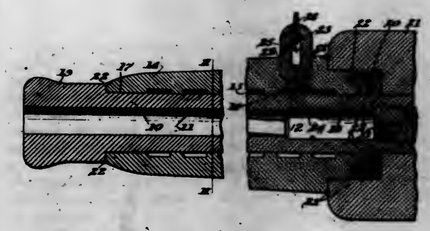
1,401,007. SUCTION-SWEEPER. ALBERT F. STAPLES, Boston, Mass., assignor to The Hoover Suction Sweeper Company, North Canton, Ohio, a Corporation of Ohio. Filed Apr. 22, 1918. Serial No. 230,055. 2 Claims. (Cl. 15—60.)

1. A brush, for a suction-sweeper, comprising an elongated body provided with bristles and with an annular flange at the end; the body, adjacent the flange, tapering to the inner surface thereof and forming an acute angle therewith, and the flange being perforated, near its base, to provide air-passages discharging over the tapered surface.



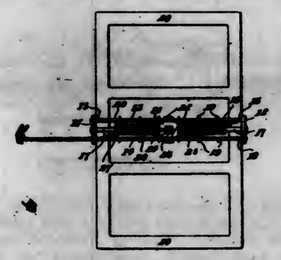
1,401,008. ICE-HOOK. JOHN ROY STOGNER, Lancaster, S. C. Filed Oct. 8, 1920. Serial No. 415,681. 3 Claims. (Cl. 294—115.)

1. In an ice tongs, a handle having a shank constructed of sections which are hingedly connected, plates disposed



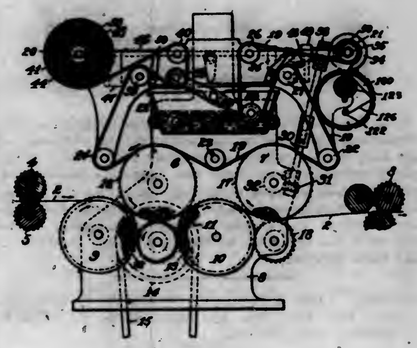
over the opposite faces of the shank, arms pivoted between the plates adjacent to the edges of the shank, pivoted links between the end of the shank and the arms, pockets on the inner face of the arms at the free ends thereof, and hooks having arm members designed to be received in the pockets and pivoted therein.

1,401,009. LAWN-SPRINKLER. JOHN D. SULLIVAN, Salt Lake City, Utah. Filed Aug. 17, 1921. Serial No. 492,979. 6 Claims. (Cl. 248—29.)



1. A hose nozzle carrying and supporting device having a tubular shank provided at its upper end with a handle and at its lower end with a foot having hose receiving seats, and an anchoring stem slidingly fitting said shank, operatively accessible at its upper end from the handle and adapted to be depressed to penetrate the ground at its lower end.

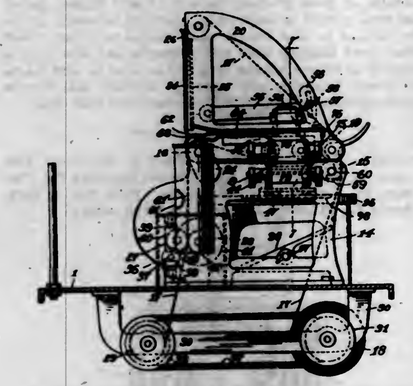
1,401,010. GUN. LELAND L. SUMMERS, Washington, D. C. Filed May 24, 1918. Serial No. 236,356. 5 Claims. (Cl. 89—16.)



1. In a gun, the combination with a tube and an enveloping member spaced therefrom but united therewith at opposite ends to provide a closed annular interspace, said interspace enlarged at one end, whereby the gun-tube may be maintained under longitudinal tension by hydrostatic pressure within the interspace.

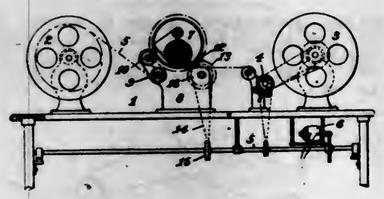
1,401,011. ANIMAL-TRAP. WALTER A. THLGA, Albion, N. Y. Filed Aug. 31, 1921. Serial No. 497,093. 5 Claims. (Cl. 43—81.)

1. An animal trap comprising a base and integral resilient jaws oppositely pivoted transversely thereof and a helical spring integral with the opposite ends of said jaws positioned therebetween and adapted for operating the jaws when the trap is set.



1,401,012. FILM-CLEANER. ALBERT TEITEL, New York, N. Y., assignor to Cinema Patents Company, Chicago, Ill., a Partnership. Filed Jan. 16, 1920. Serial No. 351,867. 9 Claims. (Cl. 15—8.)

1. In a film cleaning machine, means for supporting and advancing a film, a cleaning member supported to bear against the film as advanced, means for moving the cleaning member to present different portions to the film as advanced, a cleaning web arranged to engage the cleaning member at a point removed from the portion engaged by the film, and means for advancing the cleaning web.



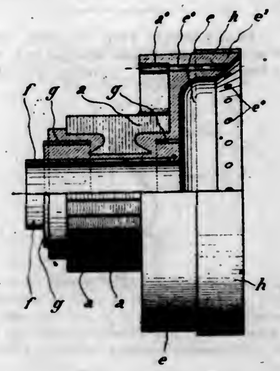
1,401,013. FILM CLEANER AND REWINDER. ALBERT TEITEL, New York, N. Y., assignor to Cinema Patents Company, Chicago, Ill., a Partnership. Filed Feb. 27, 1920. Serial No. 361,771. 10 Claims. (Cl. 15—8.)

1. In a film cleaning machine, means for advancing the film in a certain path, a cleaning web, means for moving the web in engagement with one face of the moving film and in a path transverse to the said film path of movement at the place of engagement, and means for guiding the same web to return and move in the reverse direction

against the opposite face of the film at said place of engagement.

1,401,014. FILM-CLEANING APPARATUS. ALBERT TEITEL, New York, N. Y., assignor to Cinema Patents Company, Chicago, Ill., a Partnership. Filed Apr. 6, 1920. Serial No. 371,603. 6 Claims. (Cl. 15—8.)

1. In a film cleaning machine, a rotatable drum having a slot in its periphery, a pair of rolls carried by the drum arranged to have a cleaning web wound from one roll to the other and which web can pass out through said slot and around the periphery of the drum and back through the slot to the other roll, means for rotating one of said rolls from the rotation of the drum, comprising a fixed worm concentric with the drum, a worm wheel carried by the drum and engaging said worm whereby the worm wheel is turned by the worm on rotation of the drum, and means connecting the worm wheel with one of said rolls to rotate the roll.



1,401,015. VEHICLE-WHEEL RIM. JOSEPH C. THERRATH, Cleveland, Ohio, assignor to The Standard Parts Company, Cleveland, Ohio, a Corporation of Ohio. Filed Dec. 3, 1917. Serial No. 205,026. 5 Claims. (Cl. 152—21.)

1. The combination with a wheel rim; of a split side-flange removably mounted on said rim, one end of said flange being adapted to radially interlock with said rim and having an angular recess in its transverse face; and a member movably attached to the other flange-end adapted

in one position to engage such recess and thereby radially lock such second flange-end to the first.

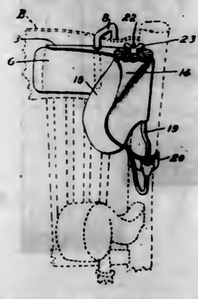
1,401,016. COMMUTATOR AND THE LIKE. RENÉ ALFRED LAURENT VOLET, Paris, France. Filed Oct. 6, 1920. Serial No. 414,985. 7 Claims. (Cl. 171—321.)

1. In a commutator or like device, a ring of wedge shaped elements, each of such elements having formed integral therewith an eye for the reception of the wires to be connected thereto, insulating material between the said elements, an inclosing casing of insulating material in which the said elements are embedded, the said casing being provided with holes leading to the said eyes for the passage of the wires, substantially as described.

1,401,017. BEATER FOR GRINDERS. JEROME WARD, Waukegan, Ill., assignor to Blatchford Calf Meal Co., Waukegan, Ill. Filed Aug. 2, 1920. Serial No. 400,689. 4 Claims. (Cl. 83—11.)

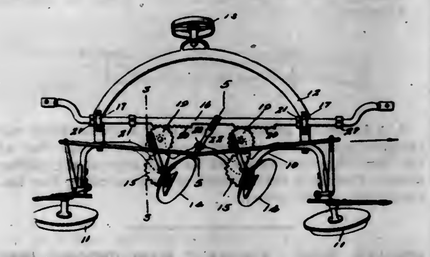
1. A beater for grinders, comprising a substantially rectangular plate which is thicker on the outer edge than at the inner edge and thicker at the ends than at the middle, thereby forming a substantially concave grinding face longitudinally of the beater.

1,401,018. LOCK. THOMAS F. WARD, Cleveland, Ohio. Filed May 27, 1921. Serial No. 472,960. 5 Claims. (Cl. 70—5.)



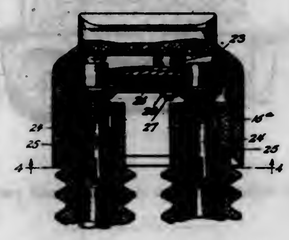
4. A lock of the class described in combination with a keeper, comprising a casing, curved locking levers pivotally

secured to the inner wall of the casing, each of said levers having its curved end adapted for locking engagement with the said keeper, coiled springs secured to each of said levers and to the casing for maintaining said curved ends in locking engagement, a horisontal, reciprocating rack bar co-



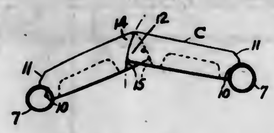
operating with the opposite ends of the levers, a coiled spring secured to one end of the rack bar and to the casing whereby the said bar is held out of engagement with the levers, guides for said bar, and key operated means for urging the opposite end of said bar into engagement with the levers to unlock the same from the keeper.

1,401,019. ATTACHMENT FOR CHAIRS AND THE LIKE. WILLIAM HENRY WEBER, Kokomo, Ind. Filed Apr. 23, 1921. Serial No. 463,786. 3 Claims. (Cl. 155—174.)



1. An attachment of the class described including a plate having a top wing, a disk carried by said wing, clamping means extending back of the plate and connected thereto, a second plate having a top wing, a disk carried by said wing and lapping and adjustable angularly relative to the other disk, cushions upon the respective plates and movable therewith relative to each other.

1,401,020. PLOW. LUTHER J. WESTBROOK, Flowery Branch, Ga. Filed July 23, 1920. Serial No. 398,371. 1 Claim. (Cl. 97—40.)

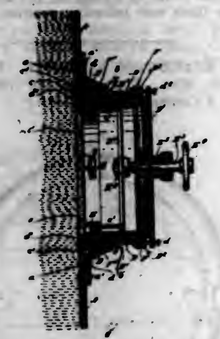


In a reversible disk plow, a frame, a pair of brackets secured to said frame adjacent to the opposite ends thereof, spaced rollers rotatably mounted in said brackets, a draft tongue extending through said brackets and engaging said rollers, a plurality of spaced collars secured to said tongue and adapted to engage said frame, a lever pivotally secured to said frame and provided with an elongated slot, a pin projecting from said tongue and engaging said slot, a plurality of disks pivotally secured to said frame, spaced rack bars carried by said tongue, toothed segments pivotally secured to said frame, and adapted to actuate said disks, gears meshing with said segments and said bars, a plurality of furrow wheels pivotally secured to said frame and means engaging said lever for shifting said furrow wheels simultaneously with the actuation of said disks.

1,401,021. SWITCHING-BOX. PAUL F. WILLIAMS, Chicago, Ill., assignor to G & W Electric Specialty Co., Chicago, Ill., a Corporation of Illinois. Filed Feb. 1, 1918. Serial No. 214,860. 4 Claims. (Cl. 173—338.)

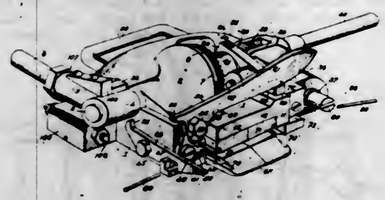
1. A switching box provided with upstanding outlets and caps for connecting said outlets, said outlets and caps being provided with loose coöperating contacts by which adjustment may be made when a cap is fitted to a pair of outlets.

1,401,022. ARCH-BRICK. ALFRED H. WILLETT, West New York, N. J., assignor to American Arch Company, New York, N. Y., a Corporation of Delaware. Filed Mar. 4, 1919. Serial No. 280,535. 8 Claims. (Cl. 110—37.)



7. A pair of brick members each having support engaging and brick engaging portions at opposite ends, said brick engaging portions being substantially counterpart and substantially complementary and arranged with respect to each other and the support engaging portions to make the brick members variable as to effective length to fit different spacings of supports, said brick engaging portions coöperating to provide reciprocal support for the adjacent ends of the members throughout the range of adjustment.

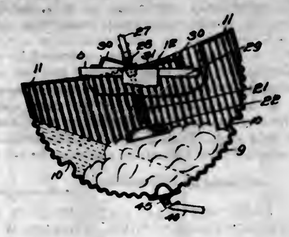
1,401,023. COMPOSITION FOR CLEANING AND COATING. JOHN MACNAULL WILSON, Montclair, N. J.; Cora Ellsworth Wilson executrix of said John MacNaull Wilson, deceased. Original application filed Mar. 7, 1919, Serial No. 281,304. Divided and this application filed Jan. 26, 1921. Serial No. 440,176. 9 Claims. (Cl. 134—24.)



8. A cleaning emulsion including pine oil, a mineral oil, lime soap, a drying agent and water.

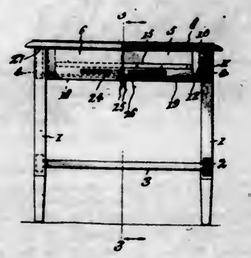
1,401,024. DIAPHRAGM-MOUNTING. EDWARD C. WOOD, Somerville, and HAROLD J. W. FAY, Westboro, Mass., assignors to Submarine Signal Company, Portland, Me., a Corporation of Maine. Filed Nov. 12, 1917. Serial No. 201,483. 1 Claim. (Cl. 181—5.)

A floating body having an opening in the skin thereof, a diaphragm, a casing having a flange, and means adapted to clamp said diaphragm to said flange to close one end of said casing, said diaphragm and said diaphragm-clamping means being of less diameter than said opening, and means for supporting said diaphragm and said casing in said opening comprising a surrounding member attached to said floating body and shaped to overhang the flange of said casing and carrying a shoulder, a resilient packing located between said overhang and said flange, a second resilient packing located on said shoulder, and means engaging said second packing for adjustably clamping said casing to said surrounding member.



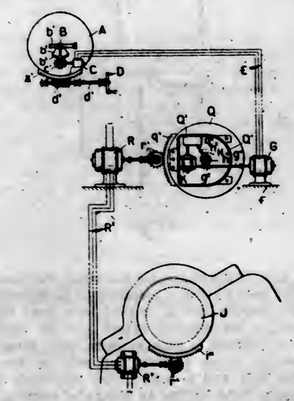
1,401,025. HAND-OPERATED WIRE-TYING MACHINE. PARVIN WRIGHT, Chicago, Ill., assignor to Alec J. Gerrard, Chicago, Ill. Filed Dec. 1, 1919. Serial No. 341,605. 21 Claims. (Cl. 140—93.)

1. In a wire tying machine the combination of a frame capable of crawling over the package during the tying operation; means comprising a movable latch member for holding the wire in a predetermined position in said frame; means comprising a pinion having a slot for twisting the wire between its ends while so held; and means for cutting the held wire at the end of the twisting operation, substantially as described.



1,401,026. WASHING-MACHINE. EMANUEL B. ADLER and JEROME ADLER, Pittsburgh, Pa. Filed July 28, 1920. Serial No. 399,509. 11 Claims. (Cl. 68—21.)

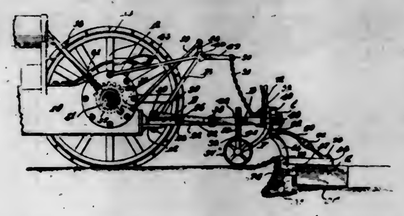
3. A washing machine comprising a supporting frame, a tub in said frame capable of being oscillated, means for oscillating the tub, a reciprocable washing means within the tub, a rock arm on the tub for moving said reciprocable



washing means, and means on the fraime for operating said rock arm upon oscillation of the tub.

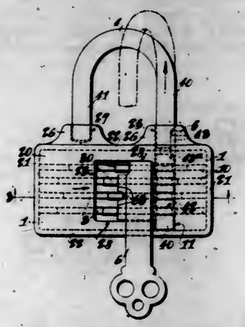
1,401,027. PIANO-BENCH. LOUIS M. ADLER, New Orleans, La. Filed July 11, 1921. Serial No. 483,839. 4 Claims. (Cl. 155—90.)

2. A piano bench comprising a supporting structure, a seat pivoted thereon at its forward edge, supporting feet at the rear portion of the seat, and reciprocating bolts adapted to engage beneath the feet to hold the seat in a forwardly inclined position, substantially as described.



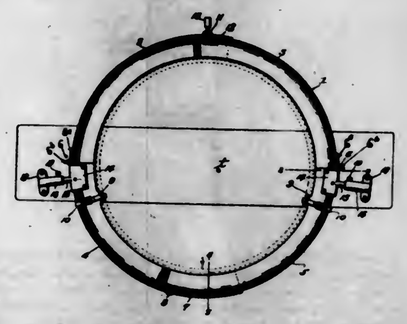
1,401,028. FIRE-CONTROL APPARATUS PARTICULARLY INTENDED FOR NAVAL GUNS. WALTHER AKEMANN, Essen, Germany, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Filed Sept. 17, 1920. Serial No. 411,021. 3 Claims. (Cl. 89—41.)

1. An apparatus of the class described comprising a sighting device, means for stabilizing said sighting de-



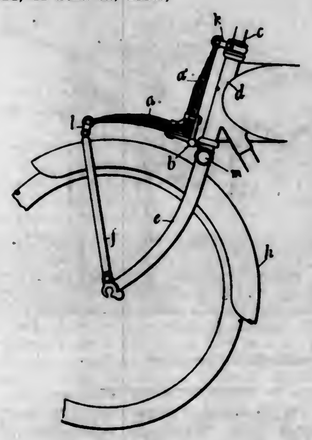
vice, a carrier for said stabilizing apparatus, means for adjusting said carrier to correspond to the range, a transmitter operatively connected to said sighting telescope, a receiver, means operatively connecting said transmitter to said receiver, an arm operatively connected to said receiver, a second transmitter connected to and operated by the trunnion of a gun, a second receiver connected to said second transmitter for synchronous operation therewith, a disk-shaped member, an arm coöperating with said first mentioned arm carried by said disk, means connecting said disk to said second receiver for rotating the same, substantially as and for the purpose set forth.

1,401,029. AGRICULTURAL MACHINE FOR DIRECT ATTACHMENT TO TRACTORS. CHARLES W. ARMANTROUT, Grandview, Wash. Filed Mar. 7, 1921. Serial No. 450,422. 11 Claims. (Cl. 97—30.)



1. The combination with a tractor and an agricultural implement, of means pivotally connecting the implement directly to the tractor, a transversely extending bar carried by the tractor, arms pivotally mounted upon the bar and slidably engaging the implement to prevent relative lateral movement thereof in relation to the tractor, and means for operatively connecting the tractor and implement together, for permitting swinging movement of the implement in relation to the tractor.

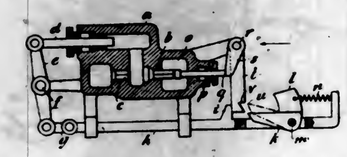
1,401,030. LOCK. ANTONIO ASHKAR, Brooklyn, N. Y. Filed Mar. 2, 1921. Serial No. 449,041. 3 Claims. (Cl. 70—19.)



1. In a lock of the character described, the combination with a solid body having a plurality of horisontal grooves in one face thereof and a vertical bore that bisects the said grooves, a permutation detent, one for each groove, and endwise slidable in such grooves, each detent having a semi-circular recess at that end next to the vertical bore of the body and a casing that surrounds the body and engages a front having an elongated opening through which the horisontal grooves and the permutation detents are exposed, each of the said detents including a lug that projects through the casing opening; of a locking bolt longitudinally movable in the bore of the body, the said bolt having a series of annularly disposed grooves that aline the grooves in the body, and a key having a head shaped to seat in one end of the casing opening and provided with a bearing edge having differentially arranged abutments that constitute stops for the detents when moving them to their bolt releasing position.

1,401,031. SPARE-TIRE CARRIER. FRANK AUMANN, Manitowoc, Wis. Filed Dec. 20, 1920. Serial No. 431,939. 4 Claims. (Cl. 224—29.)

1. A spare tire carrier comprising a casing composed of a plurality of hollow segments substantially semi-circular in cross section, some of said segments being slidably and inseparably connected with each other and hingedly connected with others, means for detachably connecting the free ends of the hinged sections, and means for mounting the carrier on a support.

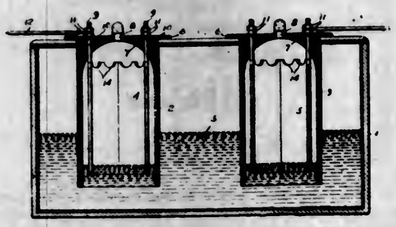


1,401,032. SPRING-MOUNTING FOR MOTORCYCLE FRONT WHEELS. FRANK EDWARD BAKER and THEODORE JAMES BIGGS, Birmingham, England. Filed Feb. 10, 1920. Serial No. 357,611. 2 Claims. (208—97.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

1. In a spring mounting for the front wheel of a motor cycle the combination comprising a laminated spring ar-

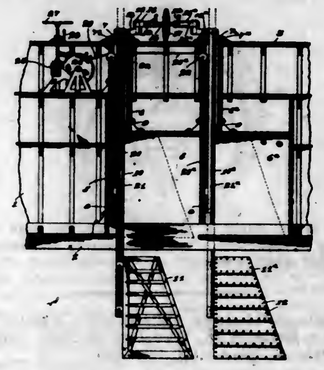
ranged over and above the rim of the wheel and hinged to the lower end of the fork stem, a strut connecting the outer end of the spring to the lower end of the fork, and a right angle laminated extension of the spring connected to the upper end of the fork stem, substantially as described.

1,401,033. REGULATING DEVICE FOR FUEL-OIL PUMPS. HANS HENRIK BLACHE, near Copenhagen, Denmark. Filed Sept. 18, 1919. Serial No. 324,681. 13 Claims. (Cl. 123—140.)



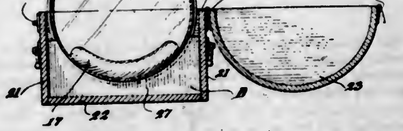
1. Regulating mechanism for fuel-oil pumps, comprising in combination a member for unseating the suction valve of the pump, a lever system for operating said unseating member, a weight-actuated element movable back and forth and normally free of engagement with the lever system during its movements, but engageable under predetermined conditions with said lever system to operate the same, and a tappet movable back and forth with said weight-actuated element to return the lever system to its initial position.

1,401,034. METHOD OF MAKING PAINT. TALMADGE BLASS, Lackawanna, N. Y., assignor of one-half to William H. Abbott, Hamburg, N. Y. Filed Feb. 9, 1920. Serial No. 357,341. 7 Claims. (Cl. 134—39.)



1. The method of making a waterproof paint comprising the treatment of a crude, solvent naphtha with a sufficient quantity of sulfuric acid to make it of the desired viscosity to spread properly when applied with a brush.

1,401,035. GAS-GENERATOR. MARTIN BOISEN, Sandusky, Ohio. Filed Mar. 19, 1921. Serial No. 453,643. 5 Claims. (Cl. 204—58.)



1. A gas generator, comprising a tank adapted to contain water, tubular cells of insulating material suspended in the tank and having their lower ends submerged in the water of the tank and having outlets in their upper ends, and hollow electrodes supported in the cells, spaced from the walls of the cells and from the upper ends of the cells.

1,401,036. MARINE PROPULSION. JESSE MCPHAIL BOWLES, Atlanta, Ga., assignor of one-third to George Moses Baruday, Washington, D. C. Filed July 22, 1921. Serial No. 486,764. 17 Claims. (Cl. 115—4.)

1. In marine propulsion mechanism, a hull, a propeller vane directly pivoted in an upright position to bearings fixed to said hull, said vane being disposed directly below the bottom of said hull and means for limiting the oscillation of said propeller vane.

1,401,037. BURIAL-CASE. THOMAS BRADLEY, Trinidad, Colo., assignor of one-half to William Childs, Starkville, Colo. Filed Nov. 22, 1919. Serial No. 339,847. 3 Claims. (Cl. 27—2.)

1. A burial case for permitting the viewing of the corpse and for protecting the corpse comprising an outer ornamental protecting casing, transversely extending supporting cleats arranged in the casing, an inner transparent corpse receiving case arranged in the protecting case and disposed upon said cleats, movable end caps for the inner transparent corpse receiving case, the outer protecting case including a removable cover for exposing to view the inner transparent corpse receiving case, and hinged end walls for the outer protecting case arranged in direct alinement with the removable end caps of the inner transparent corpse receiving case, as and for the purpose specified.

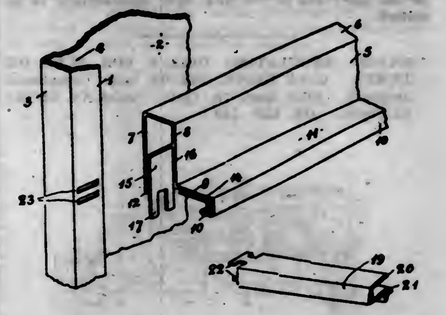
1,401,038. PHYSICAL DEVELOPER ADAPTED FOR ROWING EXERCISE. THOMAS BRITT, Langley Mill, England. Filed Mar. 5, 1920. Serial No. 363,523. 3 Claims. (Cl. 46—69.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

1. In a physical developer, the combination, with a supporting axle, of a stationary clutch member arranged on the said axle, a middle and double clutch member journaled above the stationary clutch member, an upper clutch member journaled above the middle clutch member, all

the clutch members having ratchet shaped teeth on their opposed faces and the teeth of the upper clutch being arranged in the opposite direction from the teeth

of the lower clutch, a spring holding the teeth of the clutches in engagement, and an operating arm secured to the upper clutch member.

1,401,039. WILD-OATS SEPARATOR. FERDINAND W. BUSCH, Berlin, N. D. Filed June 23, 1920. Serial No. 391,044. 4 Claims. (Cl. 130—18.)

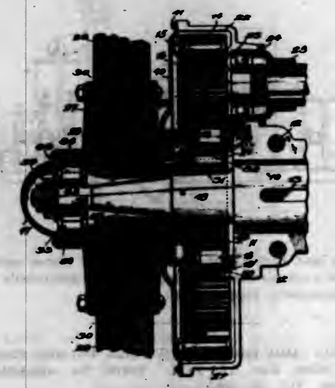


2. A separator having an endless flexible belt to engage material to be separated, means to drive the belt, and movable means associated with the belt for projection to dispose portions of a run of the belt at an angle to each other.

1,401,040. SAFETY SPRING-SLING PARTICULARLY ADAPTED FOR USE WITH PARACHUTES, EVERARD RICHARD CALTHROP, London, England, assignor to E. R. Calthrop's Aerial Patents Limited, London, England. Filed July 31, 1918. Serial No. 247,508. 6 Claims. (Cl. 244—21.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

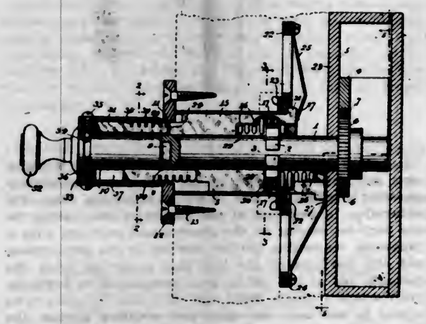
1. The combination, with a parachute, of a safety spring sling or suspension device comprising an inextensible, flexible element extending in a single unitary piece from the parachute to the passenger's harness, a plurality of springs normally of less length than said inextensible element, said springs being so constructed as to prevent spinning and twisting when weight is applied, attaching means on the inextensible element to which the opposite ends of the springs are connected, and means directly engaged with said attaching means to prevent displacement thereof.

1,401,041. CONSTRUCTION OF METAL CASES FOR CONTAINING DRAWERS, SHELVES, OR THE LIKE. WALTER CHIPPERFIELD, Romford, England. Filed Feb. 10, 1920. Serial No. 357,657. 3 Claims. (Cl. 45—2.)



1. In a metal case construction, a flanged support having parallel, spaced slots in a flange thereof, a channeled member, tongues on said member and enlarged heads on said tongues, said tongues and heads being adapted to be disposed through the slots in said support flange and extended thereabeyond, a supplemental support, a forked tongue carried thereby and adapted to straddle the tongues of said channeled member between said flange and the heads of the tongues, and a bolt slidably carried by said supplemental support adapted to engage said channeled member for locking said parts in connected relation.

1,401,042. ELECTRIC DRIVING PUMP-JACK. CLAUS P. CHRISTENSEN, Petaluma, Calif., assignor of one-half to H. P. Vogensen, Petaluma, Calif. Filed Sept. 8, 1920. Serial No. 408,907. 6 Claims. (Cl. 74—14.)

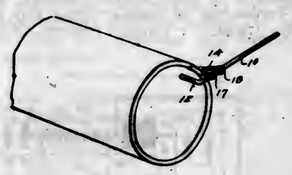


1. In a pump jack, a base having a guide for the pump rod, a driving motor mounted on the base, a power transmitting and translating mechanism mounted on the base and coupled to said motor and having provision for coupling to the pump rod, said transmitting and translating mechanism comprising a housing having a cover, a driving worm journaled in bearings in said housing and coupled with said motor, a master worm gear mounted in said housing and meshing with said worm, a crank member carried by said master worm gear, a connecting rod mounted in said cover and means for translating the rotary motion of said crank member into reciprocating motion in said connecting rod.

1,401,043. MOTOR-VEHICLE. HAROLD D. CHURCH, Detroit, Mich., assignor to Packard Motor Car Company, Detroit, Mich., a Corporation of Michigan. Filed Jan. 24, 1919. Serial No. 272,885. 14 Claims. (Cl. 180—73.)

1. A motor vehicle axle construction including in combination, an axle, a casing secured to the axle, a gear within the casing having a hub formed with a bore, a bearing between the gear and casing rotatably supporting the gear, a driving pinion associated with said gear, and a ground wheel having a hub projecting at one side thereof, said wheel hub being of smaller diameter than said bearing, said wheel hub being disposed within the bore of the gear hub for rotation with the latter.

1,401,044. COMBINATION-LOCK. FRANCISCO CLARK, Durango City, Mexico. Filed Oct. 15, 1919. Serial No. 330,840. 11 Claims. (Cl. 70—46.)



2. A combination lock comprising a bolt or latch, another independent member connected therewith for controlling the movement of said bolt, a plurality of tumbler members arranged about the outside of said control member and normally restraining movement of said bolt control member, means arranged to permit relative longitudinal movement of the tumblers and said control member, and means adjustable on said tumblers for determining the movement required of the tumblers in order to permit relative rotary movement between tumblers and said control member.

1,401,045. TIRE. WILLIAM L. CLENDENNING, Philadelphia, Pa., assignor of one-half to Rosena Kelly-Walker, Wildwood, N. J. Filed Oct. 1, 1921. Serial No. 504,578. 6 Claims. (Cl. 152—8.)

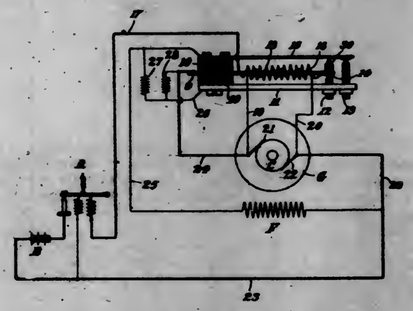
3. The combination with a tire including an outer cover and an inflatable inner tube of an annular non-puncturable shell of crescent-shaped cross section, said shell consisting of inner and outer segmental cross section annuli, the outer annulus having its peripheral edges inwardly turned to constitute seats into which the inner annulus is adapted to be sprung for interengaging connection, and yielding means interposed between said inner and outer annuli whereby they are retained in coöperative engagement.

1,401,046. TOOL FOR HANDLING TILES. ALBERT A. CLYMER, Gowrie, Iowa. Filed Mar. 23, 1920. Serial No. 368,174. 1 Claim. (Cl. 294—15.)

A tile rolling tool having a handle and separated substantially parallel elongated substantially straight arms extending laterally therefrom to receive the tile between them, said arms having bearing surfaces to permit the tile to roll while engaged by the tool, one of said arms being adjustable relatively to the other arm for the purpose specified, the handle being bent intermediate its end to provide the first arm, the adjustable arm having a socket, a brace extending from the adjustable arm also having a socket, said sockets being slidably engaged with the handle, and individual means to secure the sockets to the handle.

1,401,047. [WITHDRAWN.]

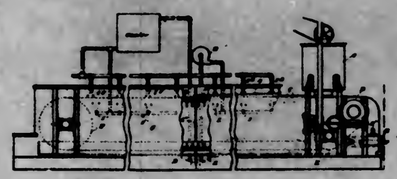
1,401,048. STEAM-ESCAPE VALVE FOR RANGE-BOILERS, &c. WILLIAM A. COLLVER, Marshfield, Oreg. Filed Feb. 8, 1918. Serial No. 216,054. 1 Claim. (Cl. 137—53.)



In combination with a boiler, a valve, a chamber therefor, a conduit for steam leading from a point adjacent to the top of the boiler to said chamber, a steam escape means leading from the chamber, a cylinder below said chamber into which water from the chamber drains in communication with the boiler, said valve normally closing the steam escape pipe, said valve having a float in the said cylinder, said chamber and cylinder being in communicating relation substantially unobstructed to effective expansion of steam therein, said construction permitting

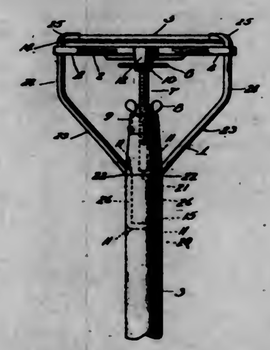
the accumulation of steam in the chamber to displace water in the cylinder so that the valve will thus automatically recede to permit escape of excess steam through

the escape pipe and subsequently move against its seat through rising of the water level in the boiler and cylinder.



1,401,049. REGULATING DEVICE FOR DYNAMO-ELECTRIC MACHINES. OLIVER F. CONKLIN, Detroit, Mich., assignor to Remy Electric Company, Anderson, Ind., a Corporation of Indiana. Filed July 10, 1917. Serial No. 179,642. 7 Claims. (Cl. 171—229.)

1. A thermostatic regulating device including a plurality of resistances adapted to be cut into or to be short-circuited from a circuit to be controlled, a plurality of blades for normally short-circuiting said resistances, one of said blades being a bimetallic thermostatic element, and means for heating the thermostat element to bend the same to open a short-circuit, another blade being positively actuated by said thermostatic blade to open another short circuit.

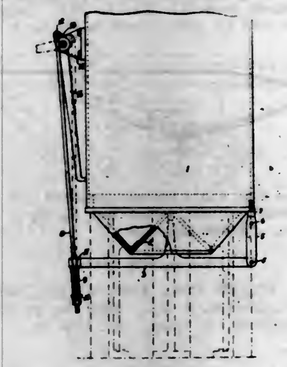


1,401,050. PROCESS OF FORMING CAKES OF SOAP. MARION L. CROUCH, Milwaukee, Wis., assignor to The Procter & Gamble Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Jan. 20, 1921. Serial No. 438,677. 13 Claims. (Cl. 18—58.)

1. The process of forming ultimate cakes of soap from a hot semi-liquid batch, which consists in subdividing the same into cake size portions, then quickly congealing or freezing the exterior layer of each portion or cake on all sides, then removing the same from the freezing conditions before the semi-liquid interior has congealed or frozen, whereby the abstraction or distribution of the

internal heat throughout the congealed or frozen exterior produces a completely congealed cake at substantially normal atmospheric temperature.

1,401,051. MOP-HOLDER. THOMAS DALTON, Chicago, Ill. Filed Mar. 17, 1921. Serial No. 453,124. 5 Claims. (Cl. 15—56.)

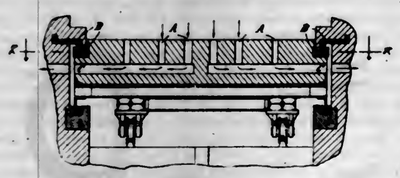


1. A mop holder comprising a handle having a transverse perforation adjacent to one end, and diametrically opposite longitudinal side grooves extending from the perforation to said end of the handle, a bail having its side portions seating in the grooves and provided with a transverse connecting portion seating in the perforation, said side portions of the bail also projecting from the aforesaid end of the handle and terminating in inwardly directed lateral bends, inner and outer mop-clamping jaws carried by the bail, the outer jaw abutting against the aforesaid lateral bends of the bail end, and means for adjusting the inner jaw.

1,401,052. DUST-CATCHER VALVE AND VALVE-OPERATING MECHANISM. ALFRED C. DANKS, Pittsburgh, Pa. Filed Feb. 7, 1920. Serial No. 356,813. 7 Claims. (Cl. 137—139.)

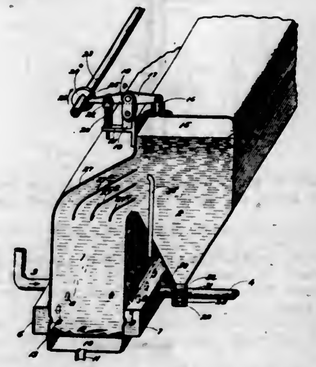
1. In a dust catcher, the combination with a dust collecting chamber, said chamber having a discharge outlet, of a valve for closing said discharge outlet, a pivoted lever on said valve, a valve controlling rod, spring means

on said controlling rod arranged to bear against said pivoted lever for maintaining said valve in closed position,



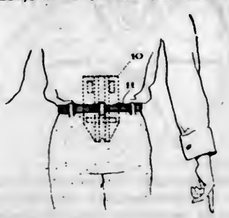
and means for varying the position of said controlling rod to relieve the tension of said spring means in opening said valve.

1,401,053. TATTING-SHUTTLE. MARION ELIZABETH DEAN, Taunton, Mass. Filed Mar. 10, 1920. Serial No. 364,724. 1 Claim. (Cl. 66—10.)



A tatting shuttle including two members secured together with inwardly extending spring ends, three of which are tapering and one rounded and shorter than the adjacent end, said projecting adjacent end having a transverse groove thereacross sunk in the body of the metal close to but removed from the end thereof, the metal of said end being of substantially the same thickness on both sides of said groove, thus maintaining a plain surface and the external surfaces of both members being smooth and free from obstructions, the whole so arranged that either end of said shuttle may be used for tatting without fear of catching the thread at undesirable times and yet so that when desired the thread may be stayed by said groove.

1,401,054. HEATING-FURNACE WITH REMOVABLE HEARTH. ALBERTO FRANCESCO DELACOURT, Genoa, Italy, assignor to Società Anonima Italiana Gio. Ansaldo & C., Genoa, Italy. Filed Apr. 23, 1918. Serial No. 230,226. 2 Claims. (Cl. 263—28.)

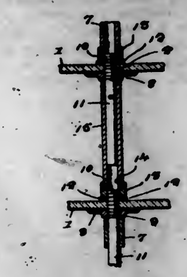


1. A furnace comprising a hearth for supporting the objects to be heated, said hearth being provided at various places of its area, with down-draft exit ports, whereby the hot gases can find exit from the furnace simultaneously at a large number of places, the sides of the hearth being luted to prevent gas exit around the hearth.

1,401,055. PROCESS OF CONCENTRATING ORE. BENJAMIN H. DOSENBACH, Butte, Mont., and WALTER A. SCOTT, Chicago, Ill.; said Scott assignor to Minerals Separation North American Corporation, a Corporation of Maryland; Edna M. Dosenbach, distributee by order of court in the estate of said Benjamin H. Dosenbach, deceased. Filed July 19, 1917, Serial No. 181,539. Renewed May 6, 1921. Serial No. 467,319. 21 Claims. (Cl. 83—85.)

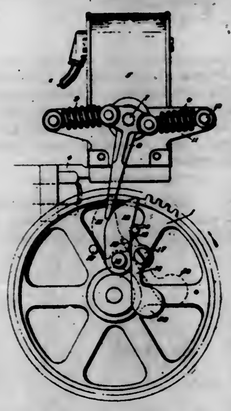
1. An ore concentrating process comprising the operations of introducing gaseous bubbles into a freely flowing pulp, conducting said bubbles while submerged to a breaking-down region, applying fluctuating gas pressure to said bubbles to break them and release the mineral adhering to them, and collecting said mineral in said breaking-down region.

1,401,056. ORTHOPEDIC APPLIANCE. LOUIS STEPHEN DOYLE, Austin, Tex. Filed Feb. 9, 1921. Serial No. 443,615. 1 Claim. (Cl. 128—78.)



In an orthopedic appliance of the character described, a plate having an extension, the extension having its sides tapered so as to be reduced, a pair of pressure ribs extending longitudinally of the plate and the extension and secured thereto, said pressure ribs being symmetrically disposed with respect to the longitudinal axis of the plate and extension and adapted to exert pressure upon the spinal column to restore it to normal position and condition, and means for securing the appliance in position comprising a pair of resilient hooks and a centrally disposed resilient hook coöperable with the belt, and a transverse bar adapted to be arranged below the belt of the wearer to prevent the appliance from moving upwardly.

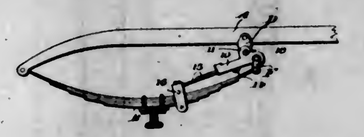
1,401,057. DISPLAY-RACK. HORACE W. ELLIOTT, Greenfield, Ohio, assignor of one-half to Walter A. Gray, Greenfield, Ohio. Filed Apr. 2, 1921. Serial No. 458,139. 2 Claims. (Cl. 211—24.)



1. A display rack comprising an apertured shelf, outer tubular sections above and below the shelf, a plate below

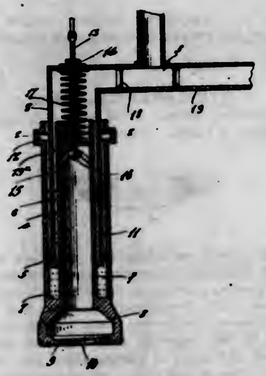
the shelf, and an inclosed rod section extending through the apertured shelf and threaded into the said plate, in

combination with a member threaded on the inclosed rod section above the shelf to clamp the shelf against the plate.



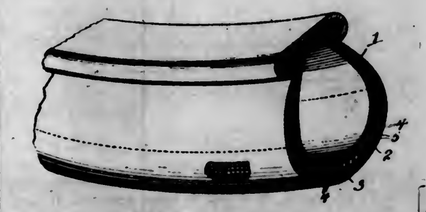
1,401,058. IGNITION APPARATUS. ALBERT ERICKSON, Chicago, Ill., assignor to Splitdorf Electrical Company, Newark, N. J. Filed Nov. 19, 1919. Serial No. 339,081. 7 Claims. (Cl. 123—149.)

1. An ignition generator for internal combustion engines, having a rotatable member for the generation of electric current, an oscillatory member secured thereto, rotary non-oscillatory means on the engine for intermittently engaging and moving said oscillatory member through a portion of a revolution and then releasing it, means for returning the oscillatory member to normal position after said release occurs, and means including a weighted pawl on said engine for automatically advancing said engine coöperating means for the purpose described.



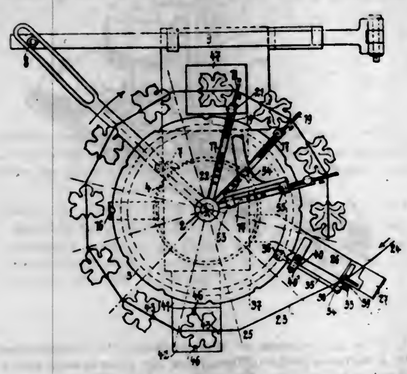
1,401,059. SHOCK-ABSORBER. HENRY FAUDREE and HARRY E. COOPER, Columbus, Ind. Filed Mar. 15, 1921. Serial No. 452,461. 1 Claim. (Cl. 267—17.)

In combination with the semi-elliptic spring of an automobile, one end of the spring being connected with the frame bar, a shock absorber comprising a body channel shaped in cross section provided intermediate its ends with spaced ears pivotally engaged upon opposite sides of a frame bar, tensioning leaf springs secured to one end portion of said body within the channel thereof, an inverted U-shaped yoke secured to the free end of the longer of the tensioning leaf springs, spaced rollers journaled within said yoke and engaging against the top and bottom of the elliptic spring, the other end of the body being slightly offset whereby to be in non-alinement with said leaf springs, said offset end being formed with



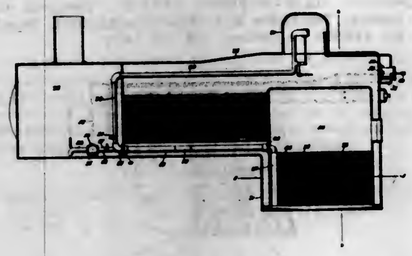
a transverse hole, and a shackle connected with the free end of the semi-elliptic spring and having a securing bolt engaging through said hole.

1,401,060. LIQUID SEAL FOR PUMPS. REUBEN L. FERGUSON, Hondale, N. Mex. Filed Oct. 13, 1916. Serial No. 125,395. 3 Claims. (Cl. 103—80.)



3. A pump including an upper stationary cylinder, a lower working cylinder, an intake valve in the lower end of said working cylinder, a mercury chamber concentric with and surrounding said working cylinder and receiving the lower end of the upper stationary cylinder, and actuating means for said working cylinder.

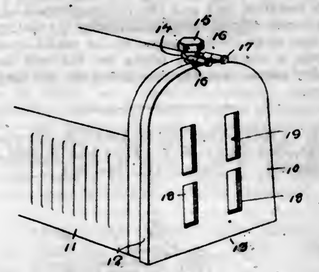
1,401,061. ARMORED TIRE. SAMUEL J. FLYNN, Portsmouth, Va. Filed Feb. 12, 1920. Serial No. 358,252. 4 Claims. (Cl. 152—18.)



1. The combination with a pneumatic tire, of a layer of relatively free ball-bodies arranged as a protective medium for the tread portion of such tire.

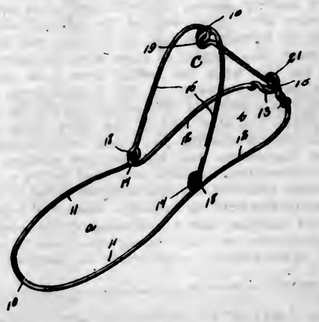
1,401,062. MACHINE FOR MAKING ARTIFICIAL LEAVES. GEORG GUSTAV FOCKE, Dresden-Blasewitz, Germany. Filed May 8, 1913. Serial No. 766,802. 10 Claims. (Cl. 41—3.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

1. In a machine for making artificial leaves, a revolving feeder having a periphery of non-uniform curvature for feeding wire through said machine, and means for maintaining the said wire upon the periphery of said feeder during the revolution thereof.



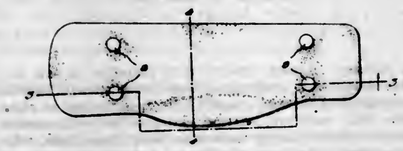
1,401,063. SUPERHEATER. FRANK W. FOFFORT, Lawa, Calif. Filed Oct. 29, 1918. Serial No. 260,124. 2 Claims. (Cl. 122—481.)

1. In combination with a locomotive engine boiler, a super-heating apparatus comprising receiving and discharging manifolds and connecting elements, or units, located within the fire-box or combustion chamber, saturated and super-heated steam conductors in communication respectively with said manifold and also in communication respectively with the steam dome of the boiler and the steam supply pipe, and extending longitudinally of and through the boiler, incasing tubes surrounding the portions of said conductors within the boiler and terminally attached to and supported by the forward and rear flue sheets, said tubes being terminally threaded exteriorly, and tubular interior sockets attached respectively to said forward and rear flue sheets and having their flanges secured respectively to the inner and outer surfaces of said sheets.



1,401,064. RADIATOR-COVER. BENJAMIN FORTHMAN, Maplewood, Mo. Filed May 10, 1920. Serial No. 380,379. 2 Claims. (Cl. 257—132.)

1. A cover or protector for the radiator of an automobile, consisting of a flanged plate for fitting over said radiator and provided with a ventilating register and a securing means for said cover or protector consisting of a loop extending rearwardly from the upper flange of the plate for engagement with the filling cup or nozzle of



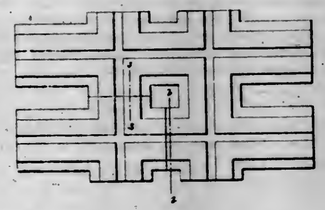
the radiator, the arms of said loop being removably extended through guides, and adjusting nuts engaging the arms for tightening the loop to normally lock said protector to the radiator.

1,401,065. STOCKING-STRETCHER. CHARLES FOWLER, Boston, Mass. Filed June 22, 1920. Serial No. 390,912. 5 Claims. (Cl. 223—19.)

1. A device of the character described comprising an open frame having substantially the shape of the human foot and embodying a toe portion and a heel portion, a ball-shaped member having its arms connected to the sides of said frame at or about the points of intersection of said toe and heel portions, and a brace member for connecting the bight portion of said ball-shaped member with the bight of the heel portion of the frame.

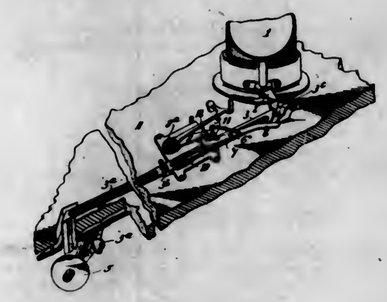
1,401,066. ARCH-SUPPORT. GEORGE GALLOWAY, Cleveland, Ohio. Filed May 24, 1921. Serial No. 472,227. 1 Claim. (Cl. 36—71.)

An arch support for shoes comprising a body member constitutig two plates which are designed to be arranged



in a shoe, said plates having their confronting ends spaced and being rounded downwardly from their said inner to their outer ends, and their outer ends provided with straight extensions, said members being rounded transversely for the major portions of their lengths from one to their opposite edge and the last mentioned edge being further rounded in an upward direction, flat springs on the under face of the body secured to the plates constituting said body, a compressible facing for the said body, and removable means securing the facing on the body.

1,401,067. CHAIN-FASTENING DEVICE. CHARLES JOHN GARVEY, Port Henry, N. Y. Filed Mar. 3, 1921. Serial No. 449,344. 1 Claim. (Cl. 24—68.)



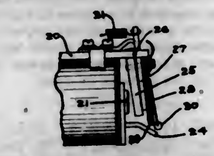
A connecting device for chains comprising a U-shaped yoke member having an integral connecting piece at one of its ends and the other ends thereof being left free and formed into integral lugs having curved inner and outer surfaces, said yoke member also provided with perforated ears extending in spaced relation to the connecting piece, and a locking lever of an elongated construction which is slightly shorter than the yoke piece having an enlargement offset from one end thereof and adapted to rotatably fit between the lugs of the yoke and having a curved inner face adapted to agree with the curved inner face of the lugs when the locking lever is in the closed position, said enlargement of the locking lever forming with the lugs a laterally continuous support for one end of the chain, the other end of the chain being engaged with the yoke connecting piece, said lever having along its inner longitudinal face high and low surfaces with a cam wall connecting the same, said lever having a perforation therein near its free end adapted to lie in registry with the perforations in said ears when the lever is in the closed position, and a removable device adapted to pass through the ears and through the lever to hold the same in locked position, substantially as described.

1,401,068. RAILROAD CONSTRUCTION. JOHN GAZO, Detroit, Mich. Filed Aug. 16, 1920. Serial No. 403,635. 1 Claim. (Cl. 246—454.)

A railway crossing comprising a plurality of rail sections having their confronting ends provided with spaced relatively long sockets, grooved flanges extending at right angles from said rail sections and provided with spaced relatively short alining sockets in their inner ends, relatively short pins engaging the sockets in the grooved flanges, and relatively long spring influenced pins engaging the sockets in said rail sections.

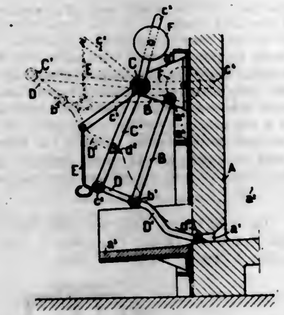
1,401,069. GRAMOPHONE AND LIKE MACHINE. EDWARD ALFRED GRAHAM, Brockley, London, England. Filed Mar. 22, 1921. Serial No. 454,420. 8 Claims. (Cl. 192—116.)

1. In a gramophone or like machine, the combination with a movable device driven from the gramophone motor and an angularly movable tone arm, of a trip device carried by said tone arm, a spring controlled brake lever adapted, when released, to arrest said movable device and motor, a latch member adapted when in its operative position to hold said lever in its inoperative position, and two latch operating members arranged to be actuated by the trip device when moved into its limiting angular positions with the tone-arm, each latch operating member when so operated, acting to cause the latch member to release the said lever.



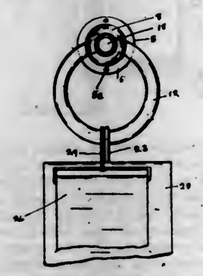
1,401,070. HAIR-BOBBING DEVICE. THEODORE G. GREGORY, Providence, R. I. Filed June 11, 1921. Serial No. 476,880. 4 Claims. (Cl. 132—45.)

4. A device of the class described, comprising longitudinally curved clamping bars adapted to fit one within the other and to hold the hair to be bobbed between them, one of said members being provided on its upper edge with a plurality of up-standing hair engaging fingers having down turned hooks at their free ends to hold the device in adjusted position relative to the hair to be cut and the other member having down turned prongs on its upper edge to engage the first mentioned member to hold the device in operative position.



1,401,071. CIRCUIT-CONTROLLER. NELSON R. HAAS, Dayton, Ohio, assignor to The Dayton Engineering Laboratories Company, a Corporation of Ohio. Filed Sept. 6, 1916. Serial No. 118,690. 5 Claims. (Cl. 200—87.)

2. In a circuit controller, the combination with a magnet including a core and windings; of a stationary contact; a pivot pin and support therefor; an armature; a movable contact; and a common means to secure the

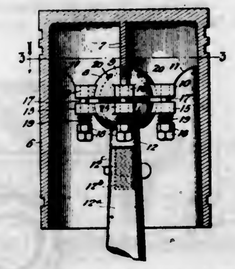


movable contact upon the armature and in proper relation to the stationary contact, and also to clamp the armature upon the pivot pin in proper relation to the magnet core.

1,401,072. DEVICE FOR CLOSING THE TAP-HOLES IN SMELTING-FURNACES. FRIEDRICH HAARMANN, Essen, Germany, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Filed Sept. 4, 1920. Serial No. 408,390. 5 Claims. (Cl. 266—42.)

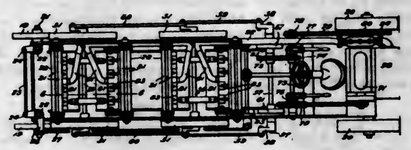
1. A device for closing the tap hole of smelting furnaces comprising a frame, a crank arm mounted thereon, a rod pivotally connected to said crank arm at a point lying between the ends of the rod, a plug for closing said tap hole secured on the one end of said rod, and means movably connecting the other end of the rod to said frame.

1,401,073. SWIVEL CONNECTION. BENJAMIN W. HALL, Manchester, N. H. Filed Sept. 18, 1919. Serial No. 324,729. 2 Claims. (Cl. 248—30.)



1. A swivel connection consisting of a split ring, a member inclosing the ends of said split ring and adapted to permit of a free swinging motion of the ring on said member, and a split pin extending into said member between the ends of said split rings and provided with a recess adapted to have a snap fit with said member to hold said pin in locked position.

1,401,074. HORSESHOE. BRYANT HARRIS and WILLIS VAN BUREN, Helena, Ark. Filed July 6, 1920. Serial No. 394,392. 2 Claims. (Cl. 168—19.)

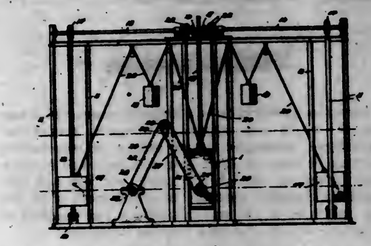


1. A horseshoe comprising two hingedly connected major members in which are oppositely-threaded transverse-alined apertures, telescoped tubular casing sections carried by and arranged between the major members, and a transverse bolt extending through said casing sections and having oppositely-threaded portions in engagement with the threaded apertures of the major members and adapted at one end for the application of a turning implement.

1,401,075. PISTON-ROD CONNECTION. GEORGE HARTWIG, St. Louis, Mo. Filed Mar. 7, 1921. Serial No. 450,254. 5 Claims. (Cl. 74—108.)

1. An engine piston provided with a socket member, a pitman having a ball that fits in the socket member, and a yielding retaining device for holding the ball in the socket member.

1,401,076. COTTON-PICKING MACHINE. EDGAR P. HAYES, Dillon, S. C. Filed May 10, 1920. Serial No. 380,406. 14 Claims. (Cl. 56—41.)

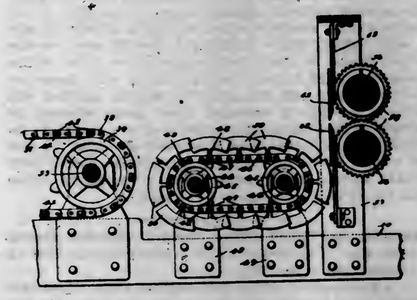


14. A cotton picking machine embodying a pair of pivotally mounted vertically disposed frames, a plurality of vertically movable rotatably mounted picking spindles in each of said frames, means including a driving gear common to both frames, whereby the spindles of one frame will be moved downward while the spindles of the other frame are moving upward and the upwardly moving spindles will travel at a relatively increased speed, means whereby the spindles of each frame will be disposed in a forwardly inclined position during their downward movement to pick the cotton, means for stripping the spindles during their upward movement and means for transferring the cotton from the stripped spindles to a receptacle.

1,401,077. WATER-WHEEL. JOHN J. HENDLEY, Brunswick, Ga. Filed Jan. 8, 1921. Serial No. 435,850. 2 Claims. (Cl. 170—107.)

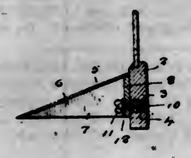
1. A fluid current motor comprising a water wheel unit adapted to be reciprocated with the rise and fall of the water current, a float in proximity to the water wheel and adapted to rise and fall with changes in the water level, a

screw carried by the water wheel unit, a rotary shaft in engagement with the screw, and means interposed be-



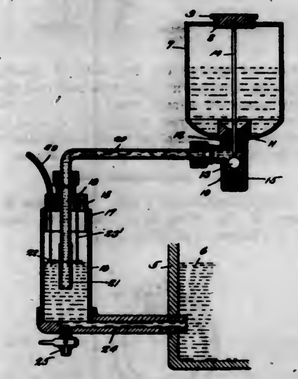
tween the shaft and float for rotating the shaft to reciprocate the screw and the water wheel unit.

1,401,078. SAND-DISPENSING DEVICE FOR MOTOR-VEHICLES. HERMAN J. HINS, San Francisco, Calif. Filed Nov. 30, 1920. Serial No. 427,417. 3 Claims. (Cl. 291—15.)



1. The combination with a motor vehicle and the rear mud guards and service brakes thereof, of a sand receptacle within said guards arranged to dispense sand directly in front of the rear wheels of said vehicle; a shutter arranged to permit the passage of sand from said receptacle; means for normally closing said shutter to prevent such passage; and means operatively connected to the shutter and arranged to be connected and disconnected from the service brakes and to open the shutter a degree in proportion to the amount of pressure applied to the service brake when said means are connected thereto, whereby an amount of sand proportionate to the degree of pressure applied to said brakes may be dispensed when said brakes are applied.

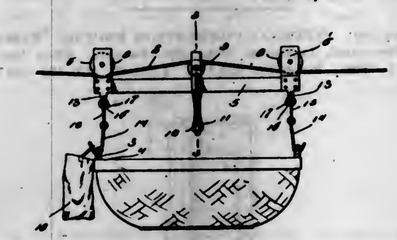
1,401,079. BEET-TOPPER. WALTER HOAGG, Detroit, Mich. Filed Dec. 15, 1919. Serial No. 344,868. 3 Claims. (Cl. 146—7.)



1. In a beet topping machine, topping mechanism comprising spaced upper and lower cutting blades, having their cutting edges arranged to provide a flared entrance for the beet tops, means for conveying the beets toward the blades and moving the beet tops between the cutting edges thereof, said means being disposed in advance of the blades, and a pair of spiral shafts arranged at the opposite sides of the blades, said shafts being slightly spaced and arranged to engage the tops and screw the latter against the cutting edges of the blades for the purpose specified.

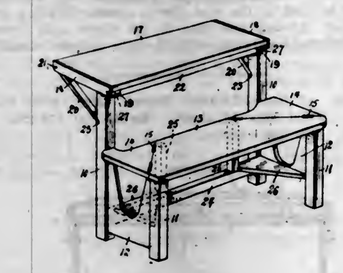
1,401,080. WINDOW ATTACHMENT. HERMAN A. HOBELMANN, Baltimore, Md. Filed Oct. 28, 1919. Serial No. 334,016. 1 Claim. (Cl. 20—40.)

In combination with the lower sash of a window having non-headed threaded socket let in the lower rail thereof, a water shed for the sash comprising a metallic body and a straight back portion provided with apertures which are designed to aline with the sockets in the rail of the sash, said metallic body consisting of sides having their upper edges inclined downwardly and forwardly from said back portion and a top disposed on the upper edges of the sides and back, winged bolts passing through the apertures in said back and engaging the threaded sockets, and wear plates between the heads of the winged nuts and said back.



1,401,081. OIL CONTROL AND OIL-FEEDER. SIDNEY C. HOWARD, Columbus, Ohio. Filed Nov. 6, 1920. Serial No. 422,283. 3 Claims. (Cl. 184—103.)

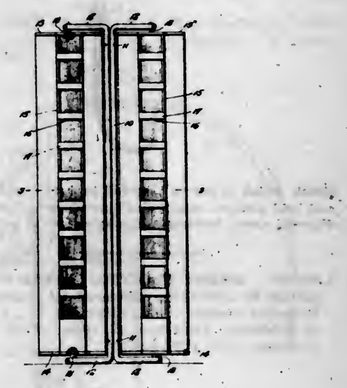
2. In an internal combustion engine having a throttle rod controlling the passage of gas thereto, the combination of a supply tank, a feed tank in communication with the supply tank and having an adjustable head, a pipe disposed within the feed tank and carried by the adjustable head, said pipe having one end disposed within the supply tank, and means on one end of the pipe for controlling the level of oil within the feed tank, said means being automatically controlled by the operation of the throttle rod.



1,401,082. TROLLEY APPARATUS. FRANCIS MARION JOHNSTON, Hoffman, Okla. Filed June 6, 1921. Serial No. 475,406. 1 Claim. (Cl. 105—150.)

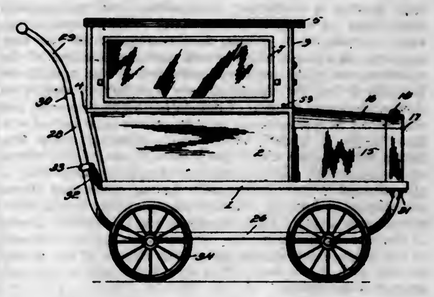
A trolley apparatus for carrying a clothes basket, comprising parallel and spaced longitudinal body bars, pendant eyes at the ends of said body bars, means connecting said bars together, bails connected to the said eyes, each

of said bails being detachably connected at one end, and pendent hooks flexibly connected to the bails and adapted to be engaged with the handles of a clothes basket.



1,401,083. CONVERTIBLE BENCH. CONRAD JURKOVICH, Joliet, Ill., assignor of forty per cent. to Phillip Hibler, Joliet, Ill. Filed Jan. 9, 1920. Serial No. 350,265. 3 Claims. (Cl. 1[illegible])

1. A device of the class described, comprising a supporting frame, a seat supported at one edge from said frame, end supports at the terminals of said seat and attached to the frame, a combined back and table top swinging from said frame, cleats in spaced relation attached to the table top, and braces swinging at one end between the cleats and concealed thereby when withdrawn and adapted to engage at their free ends against the frame when projected and maintaining said table top in horizontal position.

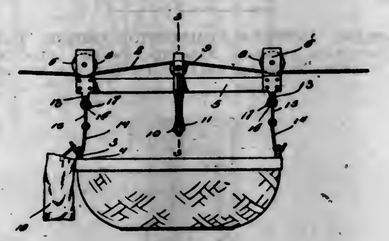


1,401,084. DISPLAY-STAND. CHARLES EDWARD KAYLOR, Lequire, Okla. Filed Mar. 14, 1921. Serial No. 452,360. 1 Claim. (Cl. 211—20.)

In a device of the class described, a non rotatable standard formed of a plurality of rods in parallel relation and fastened together and each having lateral extensions

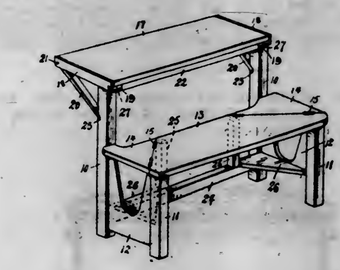
at the ends, and goods holding casings mounted to rotate respectively between said extensions.

1,401,085. BABY-CARRIAGE. OPAL E. KILMER, Valparaiso, Ind. Filed Feb. 28, 1921. Serial No. 448,428. 5 Claims. (Cl. 280—30.)



1. In a perambulator, a body, runners attached thereto, and a wheeled chassis having axles extending transversely under said runners in contact therewith, hangers detachably connecting said axles and runners, each of said hangers having hook-like laterally spaced members to fit over one of the runners with a cross bar connecting them to form a seat between it and the runner for the axle, and a set screw operating through said cross bar and engaging said axle to clampingly connect it with the runner.

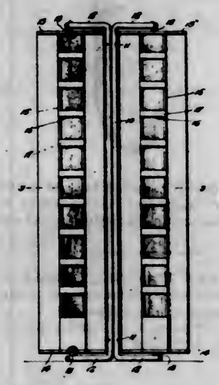
1,401,086. FISHHOOK. JAMES MANNING KING, Livingston, Tex. Filed July 2, 1921. Serial No. 482,102. 1 Claim. (Cl. 43—28.)



A fish hook connector for fishing tackle composed of a single piece of wire coiled and bent to form two sleeve-like members arranged one across the end of the other and united, the crosswise disposed sleeve being spaced from

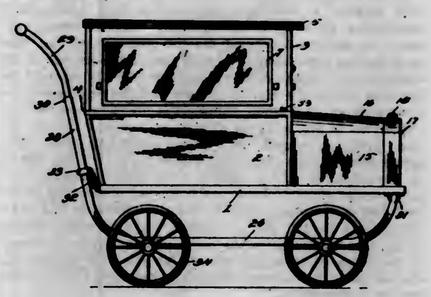
ant eyes at the ends of said body bars, means connecting said bars together, bails connected to the said eyes, each

of said bails being detachably connected at one end, and pendent hooks flexibly connected to the bails and adapted to be engaged with the handles of a clothes basket.



1,401,083. CONVERTIBLE BENCH. CONRAD JURKOVICH, Joliet, Ill., assignor of forty per cent. to Phillip Hibler, Joliet, Ill. Filed Jan. 9, 1920. Serial No. 350,265. 3 Claims. (Cl. 1[illegible])

1. A device of the class described, comprising a supporting frame, a seat supported at one edge from said frame, end supports at the terminals of said seat and attached to the frame, a combined back and table top swinging from said frame, cleats in spaced relation attached to the table top, and braces swinging at one end between the cleats and concealed thereby when withdrawn and adapted to engage at their free ends against the frame when projected and maintaining said table top in horizontal position.

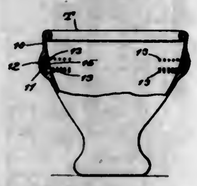


1,401,084. DISPLAY-STAND. CHARLES EDWARD KAYLOR, Lequire, Okla. Filed Mar. 14, 1921. Serial No. 452,360. 1 Claim. (Cl. 211—20.)

In a device of the class described, a non rotatable standard formed of a plurality of rods in parallel relation and fastened together and each having lateral extensions

at the ends, and goods holding casings mounted to rotate respectively between said extensions.

1,401,085. BABY-CARRIAGE. OPAL E. KILMER, Valparaiso, Ind. Filed Feb. 28, 1921. Serial No. 448,428. 5 Claims. (Cl. 280—30.)



1. In a perambulator, a body, runners attached thereto, and a wheeled chassis having axles extending transversely under said runners in contact therewith, hangers detachably connecting said axles and runners, each of said hangers having hook-like laterally spaced members to fit over one of the runners with a cross bar connecting them to form a seat between it and the runner for the axle, and a set screw operating through said cross bar and engaging said axle to clampingly connect it with the runner.

1,401,086. FISHHOOK. JAMES MANNING KING, Livingston, Tex. Filed July 2, 1921. Serial No. 482,102. 1 Claim. (Cl. 43—28.)

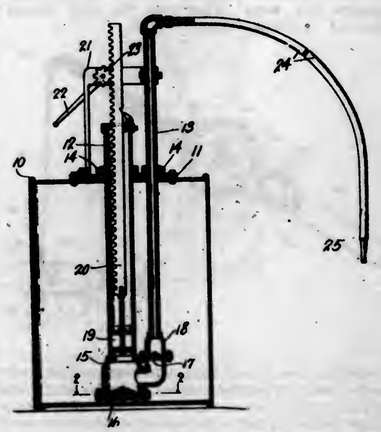
A fish hook connector for fishing tackle composed of a single piece of wire coiled and bent to form two sleeve-like members arranged one across the end of the other and united, the crosswise disposed sleeve being spaced from

mentioned receptacle, and a handle formed intermediate the ends of said bail, said handle projecting inwardly of the inner receptacle and providing means for operating the bail to disengage it from the annular groove to permit of removal of the inner receptacle.

1,401,091. VENTILATING APPARATUS FOR CLOSET-BOWLS. ARTHUR W. LUCAS, Fremont, Nebr. Filed Jan. 29, 1921. Serial No. 441,010. 2 Claims. (Cl. 4—21.)

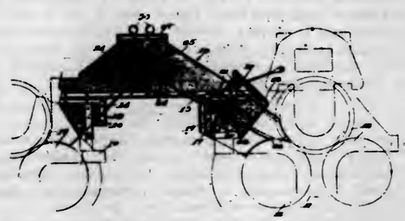
1. In a ventilating apparatus for closet bowls, a bowl having the intermediate portion of its wall above the water level, formed with an outwardly extending hollow thickened portion, the bowl being formed at its inner periphery with two series of holes leading into the upper and lower portions of the hollow within the thickened portion of the bowl, a pipe permanently located within the hollow thickened portion and provided at its nuppermost and lowermost points with series of perforations, and means for creating suction through said pipe.

1,401,092. EXTRICATING DEVICE. JOHN MCCUTCHEON, Peabody, Kans. Filed Aug. 2, 1921. Serial No. 489,244. 4 Claims. (Cl. 238—14.)



1. An automobile extricating device comprising an elongated shoe curved transversely, a chain wrapped around the shoe, and a cable having one end secured to one end of the shoe for the purpose specified.

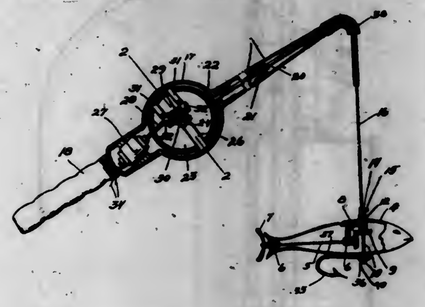
1,401,093. CONTROLLING DEVICE. FRANK ALBA MCDANIELS, Portland, Oreg. Filed July 13, 1920. Serial No. 395,985. 9 Claims. (Cl. 74—39.)



1. The combination with a pair of pivoted levers, of independent means for retaining the same against movement, independent means for releasing the same, and means for simultaneously releasing the same, said latter means also serving to couple the levers for simultaneous movement.

1,401,094. PUMP. LAWRENCE E. MAY, Nashville, Tenn. Filed Feb. 14, 1921. Serial No. 445,037. 1 Claim. (Cl. 221—80.)

In combination, a tank having an opening in the top thereof, a plate closing the opening and having spaced bores, a cylinder passed through one of the bores and arranged within the tank, a vertical offset portion formed on the lower end of the cylinder, an outlet pipe rising from the offset portion and passing through the other bore of said plate, a valve in the lower end of the cylinder, a second valve in said offset portions, a piston arranged to reciprocate within the cylinder, a rack bar associated with the piston and projecting through the upper end of the cylinder, a bracket arranged exteriorly of the tank and supported by said plate, said bracket being associated with said outlet pipe, a crank handle journaled on said bracket, a gear associated with said crank and meshing with the rack bar to reciprocate the piston, means for limiting the movement of the rack bar in one direction, and a flexible tube coupled with one end of the outlet pipe.



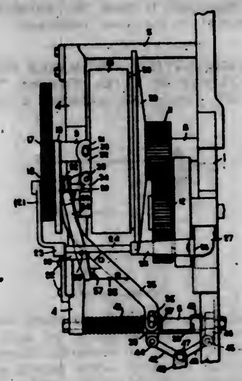
1,401,095. CANE-SUGAR MILL. JOSEPH MEINECKE, Paia Maui, Hawaii. Filed July 7, 1920. Serial No. 394,456. 7 Claims. (Cl. 100—47.)

2. A chute of the character described for disposition between spaced mills of a cane sugar mill or the like, comprising oppositely sloping bottom portions, side por-

tions therefor adapted to conform to the rollers of the mill, the bottom portion at the receiving side being provided with a removable cover and the bottom portion at the discharge side of the chute being uncovered, and means for supplying macerating fluid at the apex portion of the chute whereby the bagasse may expand unrestrained by the cover.

1,401,096. DECOY-MINNOW. WESELY R. NEUBECK, Kansas City, Kans. Filed June 12, 1920. Serial No. 388,602. 1 Claim. (Cl. 43—43.)

A fishing tackle comprising a rod, an artificial minnow provided with a propeller member, a flexible shaft forming the tackle line between said rod and minnow and rotatably connected with the latter, a fish hook provided with a swivel connection with the free end of said shaft, said connection permitting rotary movement of said shaft, the intermediate shank portion of said hook having a detachable connection with the minnow, and means operable through said shaft for actuating said propeller member.



1,401,097. IRRIGATING-VALVE. JOHN A. NICKOLAUS, Richland, Wash. Filed Feb. 6, 1920. Serial No. 356,720. 1 Claim. (Cl. 251—95.)

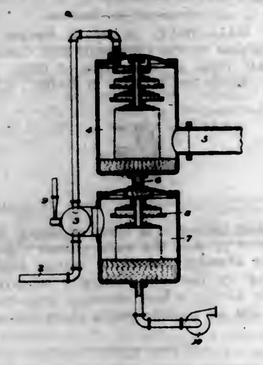
An irrigating valve comprising a sheet metal pipe having a port formed therein, a tubular sheet metal sleeve rotatably fitted within the pipe and having a port adapted to register with the port in said pipe, a pin carried by said sleeve, said pipe being formed with a slot to receive said pin and to thereby restrict the rotational movement of the sleeve, a plug tightly fitted within one end of the sleeve for rotation therewith, and a handle formed on the plug for actuating the sleeve.

1,401,098. HAND-WHEEL MECHANISM FOR LOOMS AND OTHER MACHINES. ALONZO E. RHOADES, Hopedale, Mass., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed Oct. 15, 1920. Serial No. 417,188. 5 Claims. (Cl. 74—7.)

1. In a machine having a driving shaft, power supplying means, a clutch for transmitting power therefrom to said driving shaft having means normally tending to disengage said clutch and means for shifting said clutch into operative position, a hand wheel, means operable by said hand wheel for rotating said driving shaft and means operable by the shifting of said clutch to operative po-

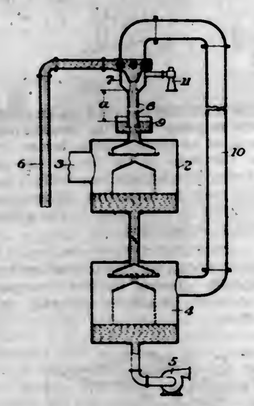
sition to render and maintain said hand wheel inoperative during the actuation of the driving shaft by the power-supplying means.

1,401,099. BUNCH-HOLDING DEVICE FOR HOSE-SUPPORTERS. ANDREAS G. ANDERSON, Stoneham, Mass. Filed Sept. 9, 1921. Serial No. 499,414. 4 Claims. (Cl. 24—73.)



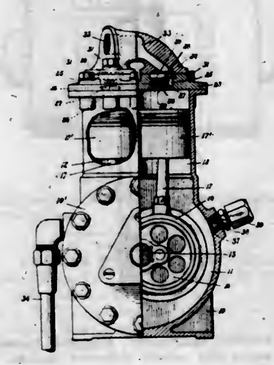
1. A bunch-holding device for hose supporters made from a single length of wire, comprising at one end of said wire a lower bunch-holding member having a free spring arm, a hooked upper supporting member at the other end of said wire, and a loop in said wire intermediate its ends.

1,401,100. SYSTEM FOR REMOVING AIR AND GASES FROM WATER. RAYMOND N. EHRHART, Pittsburgh, Pa., assignor to Elliott Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed June 5, 1920. Serial No. 386,833. 7 Claims. (Cl. 183—3.)



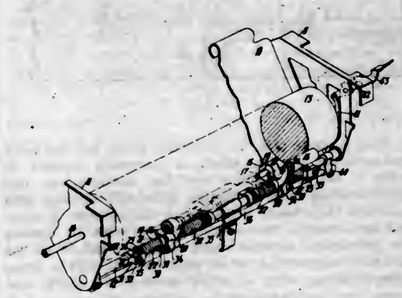
1. In a system for removing air and other dissolved gases from liquids in which the liquid is introduced into an evaporator having a pressure which is definitely lower than the pressure corresponding to the temperature of the liquid immediately prior to its introduction into the evaporator and is thereby caused to evaporate under the action of its contained heat, the method which consists

in passing the vapor and gases from the evaporating chamber through a condenser and continuously regulating the rate of condensation in the condenser to thereby con-



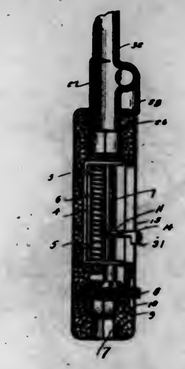
trol within predetermined limits the amount of heat given up by the liquid in the evaporator, substantially as described.

1,401,101. SYSTEM FOR REMOVING AIR AND GASES FROM WATER. RAYMOND N. EHRHART, Pittsburgh, Pa., assignor to Elliott Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed June 5, 1920. Serial No. 386,835. 3 Claims. (Cl. 183—3.)



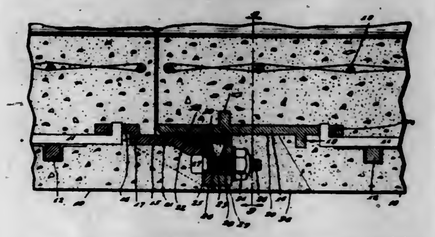
1. In the treatment of liquids for heating the same and for the removal of air and gases therefrom, the method which consists in introducing the liquid to be treated into an evaporator in which a pressure is maintained lower than the pressure corresponding to the temperature of the liquid before it enters the evaporator, passing the vapors from the evaporator through a condenser, and simultaneously withdrawing air from the liquid entering the condenser and passing therethrough to a heater, and from the steam coming from the evaporator and heating the liquid in said heater, substantially as described.

1,401,102. COMPRESSOR. FREDRICK J. HEIDEMAN, Detroit, Mich., assignor, by mesne assignments to The Isko Company, Chicago, Ill., a Corporation of Delaware. Filed Jan. 19, 1917. Serial No. 143,311. 5 Claims. (Cl. 230—27.)



1. In a compressor, the combination of a crank case and cylinders, a crank shaft in the crank case, pistons and connecting rods, a conduit leading to the crank case, a conduit between the cylinders leading from the crank case to a port in each of the cylinders, and an outlet conduit.

1,401,103. TYPEWRITING-MACHINE. WILLIAM F. HELMOND, Hartford, Conn., assignor to Underwood Typewriter Company, New York, N. Y., a Corporation of New York. Filed May 14, 1919. Serial No. 297,097. 3 Claims. (Cl. 197—138.)



1. The combination, with the letter-spacing carriage of a typewriter, having a platen and a platen-frame mounted therein, of a feed-roll-supporting bar mounted in said frame, forwardly and rearwardly-projecting feed-roll-supporting arms spaced along and journaled on said bar, front and rear feed-rolls supported by said arms, springs coiled about said bar, one for each arm, worm-wheels journaled on said bar, one for each spring, each spring being connected at one end to an arm and at its other end to a worm-wheel, a spring-adjusting screw in mesh with each worm-wheel, and a mount for each screw, said mounts being fixed to said bar, and said screws being journaled in said mounts, with their heads disposed downwardly, so as to be accessible from below on movement of said carriage to one end or the other of its range of travel.

1,401,104. SURGICAL INSTRUMENT. HENRY KRUESHELD and ALLEN J. WALTER, Mansfield, Ohio. Filed Mar. 15, 1920. Serial No. 366,011. 5 Claims. (Cl. 219—31.)

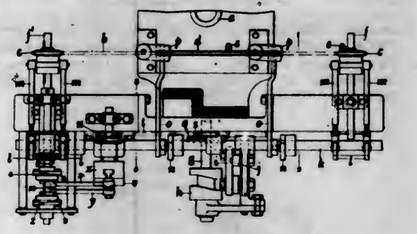
1. In a surgical instrument, electrical resistance, and means to selectively secure different sounds over said resistance whereby a single resistance is common to all of the sounds.

1,401,105. METALED-END CONCRETE PIPE. COLEMAN MERIWETHER, Louisville, Ky., assignor to Peter C. Reilly, Indianapolis, Ind. Filed Mar. 28, 1921. Serial No. 456,297. 5 Claims. (Cl. 72—53.)

1. In a concrete pipe, an embedded metal bell having a spigot-receiving portion which is internally tapered to provide a tapered packing-receiving shoulder, an end flange, clamping bolts projecting outwardly through said flange with their heads embedded in the concrete, a metal spigot embedded in the concrete formed with an exposed outer cylindrical surface which may be received in the spigot-receiving portion of an adjacent bell, and a metal packing-engaging ring arranged around the spigot and adjacent the packing-receiving surface and arranged to be clamped against the packing by said bolts to force the packing into the tapered opening between the outer surfaces of the spigot and the tapered inner surface of the bell.

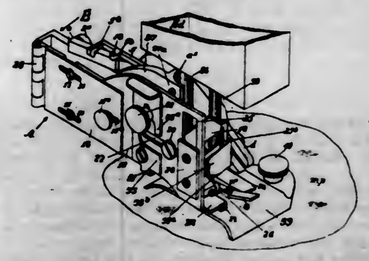
1,401,106. PROCESS OF TREATING TOBACCO-LEAF. JOSÉ SANTIAGO VILLACORTA, San Ildefonso, Bulacan, Philippine Islands. Filed Aug. 9, 1921. Serial No. 490,975. 5 Claims. (Cl. 131—55.)

1. A process for the treatment of tobacco which comprises (a) bruising or destroying the continuity of the leaf surface, (b) washing to remove the nicotin and soluble substances, (c) treating with an oxidising compound, and (d) washing to remove any excess of chemicals.



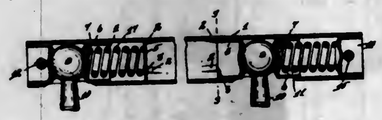
3. A process for the treatment of tobacco which comprises (a) bruising or destroying the continuity of the leaf surface, (b) washing to remove the nicotin and soluble substances, (c) treating with a solution of potassium permanganate and sodium chlorid, (d) neutralising with a solution of oxalic and citric acids, and (e) washing to remove any excess of chemicals.

1,401,107. BALL-SEAT. ALFRED B. BREEZE, Cincinnati, Ohio, assignor to The Cincinnati Ball Crank Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Sept. 5, 1919. Serial No. 321,945. 1 Claim. (Cl. 287—90.)



A ball seat formed of a sheet of metal, comprising a double walled portion, the walls pressed together, and a rim portion annularly integrally uniting said walls, one wall having its face side centrally concaved and the second wall having a boss centrally projecting from its face side, and an annular recess about the base of said boss.

1,401,108. POWER-PRESS FOR OPERATING ON METAL SHEETS OR STRIPS. HARRY ALBERT GRIFFITHS, Birmingham, and RICHARD HANSON GRIFFITHS, Sutton Coldfield, England. Filed Feb. 18, 1921. Serial No. 446,116. 6 Claims. (Cl. 164—20.)

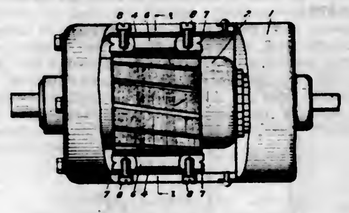


1. In mechanisms for automatically feeding metal sheets or the like between press tools, the combination with a plurality of tools, of an endless chain, means for detachably connecting the sheet or the like to the chain, and means for imparting intermittent longitudinal and lateral movements to the chain for subjecting different portions of the sheet or the like in succession to the action of the tools, substantially as described.

1,401,109. HEMSTITCHING ATTACHMENT FOR SEWING-MACHINES. JAMES HICKEY, Portland, Oreg. Filed Nov. 13, 1917. Serial No. 205,464. 20 Claims. (Cl. 112—160.)

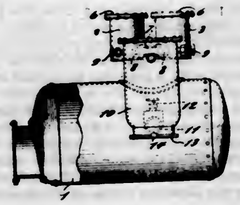
1. An attachment of the character described adapted for being fastened to the presser-bar of a sewing machine and comprising means, including a piercer, for making a hole in the goods in which to receive the needle of the sewing machine, means for feeding the goods sidewise and forward from the needle of the sewing machine, and such means adapted to be operatively connected with and operated through the medium of the needle bar of the sewing machine.

1,401,110. STEERING REACH-ROD. RICHARD A. KAPS, Cincinnati, Ohio, assignor to The Cincinnati Ball Crank Company, Cincinnati, Ohio, a Corporation of Ohio. Filed July 5, 1919. Serial No. 308,847. 2 Claims. (Cl. 287—90.)



1. The combination with a tubular member having an opening in one side for the reception of a ball end member, socket pieces engaged within said tubular member providing opposing seats for the ball end member, each socket piece comprising a sheet metal stamping of cup formation consisting of a cylindrical body portion, and a concavo-convex head closing one end of said body portion, the structure providing from one end side a spring receiving pocket with an annularly recessed base, and from the opposite side a concave ball seat centrally with an annular conical rim.

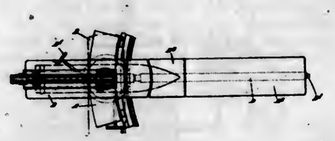
1,401,111. FLUID CHECK FOR LIFTING-TRUCKS. WILLIAM B. STOEL, Amelia, Ohio, assignor, by mesne assignments, to The Stuebing Truck Co., Cincinnati, Ohio, a Corporation of Ohio. Filed Oct. 4, 1917. Serial No. 194,808. 3 Claims. (Cl. 188—96.)



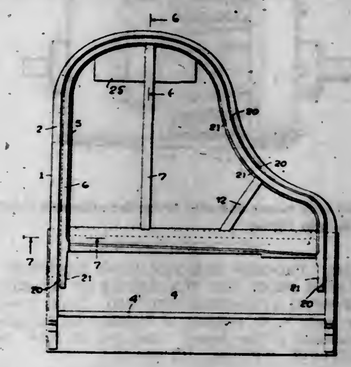
1. A fluid check device for lifting trucks comprising a cylinder adapted to be connected at one end to a fixed part of a truck, a piston in said cylinder, a rod carried by said piston and extending through the other end of the cylinder for connection with a movable part of the truck, said piston having longitudinal openings therein, a tensioned valve on said rod arranged adjacent the piston openings, one of said openings being enlarged adjacent the inner end of the piston, a pin within the smaller bore of the last named opening and carrying a head extending into the large end of the opening, a coil spring within the large end of the opening and normally engaging the head of the pin to project the pin from the forward end of the piston for engagement with the tensioned valve to space the valve from the piston openings, and a closure plug for the inner end of the enlarged opening engaged by one end of said spring, the tensioned valve being operable under pressure to permit movement thereof to close the piston openings.

1,401,112. DYNAMO-ELECTRIC MACHINE. ALVIN E. BUCHENBRAG, Toledo, Ohio, assignor to Electric Auto-Lite Corporation, Toledo, Ohio, a Corporation of Delaware. Filed June 25, 1917. Serial No. 176,810. 11 Claims. (Cl. 171—252.)

1. In a dynamo electric machine, the combination of a frame, a pole piece, means extending through said pole piece for reducing flux distortion therein and means engaging said first means and said frame for clamping said pole piece to said frame.



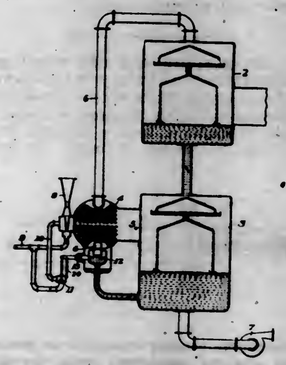
1,401,113. PROCESS FOR TREATING RESIDUES RESULTING FROM THE TREATMENT OF HYDROCARBON WITH ALUMINUM CHLORID. LOUIS BURGESS, New York, N. Y., assignor to Standard Oil Company, a Corporation of New Jersey. Filed Jan. 15, 1918. Serial No. 211,912. 9 Claims. (Cl. 23—13.)



9. The process of treating residue resulting from heat treatment of hydrocarbon oil in the presence of anhydrous aluminum chlorid, which consists in heating said residue to a temperature sufficient to cause decomposition of the residue into volatilised products, including gaseous hydrochloric acid, at a temperature sufficient to initiate exothermic reaction when contacted with aluminum carbid, and passing said volatilised products while at such temperature in contact with aluminum carbid.

1,401,114. SHELL-BOGIE FOR USE WITH AMMUNITION-HOISTING APPARATUS FOR ORDNANCE. ARTHUR TREVOR DAWSON, Westminster, London, and JAMES HORNE, Barrow-in-Furness, England, assignors to Vickers Limited, Westminster, London, England. Filed Sept. 4, 1920. Serial No. 408,324. 6 Claims. (Cl. 89—46.)

1. In ammunition hoisting apparatus for ordnance, the combination with the ammunition trunk, the shell bogie on said trunk and the shell receptacle of the lifting cage in said trunk, of a shell receptacle on said bogie and means for pivoting the last-mentioned receptacle for swinging about a vertical axis to bring it into line with the first-mentioned receptacle.



1,401,115. GRAND-PIANO CONSTRUCTION. BRADFORD C. EDMANDS, Newton, Mass., assignor to American Piano Company, New York, N. Y., a Corporation of New Jersey. Filed Oct. 21, 1920. Serial No. 418,530. 14 Claims. (Cl. 84—176.)

1. A grand piano comprising a case rim having an inwardly projecting reinforcing rib, a skeleton frame secured to and supported by said rib, and securing means connecting said skeleton frame and rim to hold the same in fixed relation together with a sounding board and an iron frame.

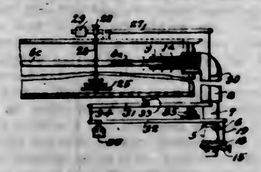
10. The improvement in the art of constructing grand pianos which comprises constructing and assembling the skeleton frame, sounding-board and musical instrumentalities, constructing and finishing separately the case-rim having a reinforcing rib which affords support for the skeleton frame, assembling the skeleton frame and rim, and securing the skeleton frame to the reinforcing rib.

1,401,116. SYSTEM FOR REMOVING AIR AND GASES FROM WATER. RAYMOND N. EHRHART, Pittsburgh, Pa., assignor to Elliott Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Original application filed June 5, 1920, Serial No. 386,834. Divided and this application filed Apr. 1, 1921. Serial No. 457,596. 6 Claims. (Cl. 183.3.)

1. In apparatus of the character described, the combination of an evaporator, a condenser connected to the evaporator, an exhaust pump for drawing the vapors and gases from the evaporator through the condenser, and means controlled by the rate of condensation in the condenser for varying the capacity of said pump, substantially as described.

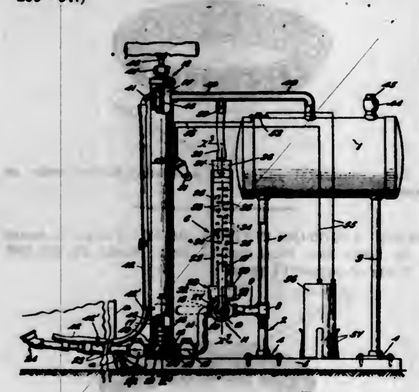
1,401,117. COPPER CATALYST. DAVID ALLISTON LEGG, London, England, assignor to Matthew Atkinson Adam, London, England. Filed Oct. 24, 1921. Serial No. 510,097. 4 Claims. (Cl. 23—28.)

3. The use of cupric oxid fused into a spongy mass as a catalyst.



1,401,118. EYE-SHADE. WALTER K. MILNE, Brooklyn, N. Y. Filed June 3, 1921. Serial No. 474,680. 3 Claims. (Cl. 2—149.)

1. As an article of manufacture, an eye shade comprising two shade members each of which extends over the eye to a point adjacent the outer corner of the same, and a bridge piece having a resilient connection with the shade members, whereby the whole is rendered self-adjusting and the shade members held in juxtaposition to eye brows of the wearer throughout their entire length.

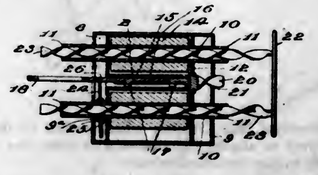


REISSUES.

15,247. INCUBATOR. ERNEST D. CHARTERS, Santa Cruz, Calif., assignor to Charters Manufacturing Co., Santa Cruz, Calif., a Corporation of California. Filed June 19, 1920. Serial No. 390,266. Original No. 1,271,606, dated, July 9, 1918, Serial No. 116,755, filed Aug. 24, 1916. 9 Claims. (Cl. 236—4.)

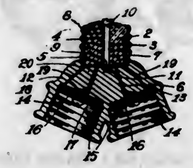
6. In an incubator, a burner, a pair of oscillatory shutters arranged on opposite sides of the burner and movable simultaneously toward and away from the burner for regulating the flame thereof, the distal edges of the shutters being adapted to meet over the burner when moved to shutting position, whereby the flame may be extinguished, said shutters having a cut-away portion at corresponding corners of said distal edge portions thereof to provide a comparatively small pilot flame at one side edge of the burner.

15,248. FUMIGATING AND SPRAYING APPARATUS. WILLIAM G. DINGLE, Los Angeles, Calif., assignor to Owl Fumigating Corporation, New York, N. Y., a Corporation of Delaware. Filed July 2, 1920. Serial No. 398,725. Original No. 1,304,746, dated May 27, 1919, Serial No. 167,119, filed May 5, 1917. 10 Claims. (Cl. 299—97.)



1. In a hydrocyanic acid fumigating apparatus the combination of a supply tank; a measuring means; connections between said tank and said measuring means; a delivering means; connections between said measuring means and said delivering means; vent connection leading from said tank and discharging adjacent said delivery means; and means adapted to force the measured hydrocyanic acid through said delivery means, substantially as described.

15,249. PORTABLE ELECTRIC LIGHT. JOHN T. DRUFVA, Longmeadow, Mass., assignor to Henry Hyman & Co., Inc., New York, N. Y., a Corporation of New York. Filed Nov. 8, 1920. Serial No. 422,738. Original No. 1,287,262, dated Dec. 10, 1918, Serial No. 226,583, filed Apr. 4, 1918. 17 Claims. (Cl. 200—60.)

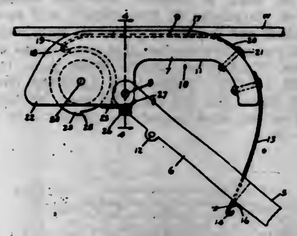


17. A circuit switch mechanism for a portable electric lamp, comprising, an escutcheon mounted on the lamp, a flexible contact member slidably mounted in said escutcheon, a thumb piece connected to said member and adapted to slide the same to contacting position, and a push-button adapted to flex said member to contacting position.

15,250. BLADE-SHARPENING DEVICE. GEORGE D. GALLAGHER, New Haven, Conn., assignor, by direct and mesne assignments, of twenty-five one hundred and fourths to Nannie T. Hoos, twenty-five one hundred and fourths to Ruth B. Walten, four one hundred and fourths to Marguerite G. Schanberger, and twenty-five one hundred and fourths to Mabel E. Mohr, Baltimore, Md., and twenty-five one hundred and fourths to Callie F. Moore, Washington, D. C. Filed Jan. 11, 1921. Serial No. 436,572. Original No. 1,319,149, dated Oct. 21, 1919, Serial No. 132,425, filed Nov. 20, 1916. Renewed Dec. 30, 1918, Serial No. 268,877. 29 Claims. (Cl. 51—86.)

2. A device of the class described comprising a supporting casing, a stropping roll and a blade holder mounted thereon, a hand operated driver reciprocable relatively to said support in a plane parallel with the axis of said stropping roll, and devices actuated by the reciprocation of said driver and connected to said stropping roll and blade holder for actuating said roll and for automatically positioning the blade relatively thereto.

15,251. ELECTRIC PLUG-RECEPTACLE. WILLIAM ILE, Lynbrook, N. Y., assignor to Hennes Electric Manufacturing Company Inc., New York, N. Y., a Corporation of New York. Filed Mar. 9, 1920. Serial No. 364,518. Original No. 1,300,270, dated Apr. 15, 1919, Serial No. 149,458, filed Feb. 19, 1917. 7 Claims. (Cl. 173—335.)



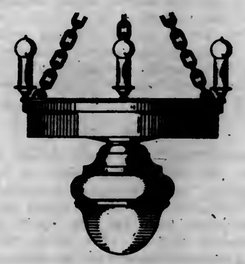
1. A plug receptacle, comprising a plug of insulating material having a single hole extending therethrough from end to end, a threaded metal casing encircling a portion of said plug, a bolt extending through the hole in said plug, a metal member secured to said bolt and carrying branch electrical contacts, socket shells connected with and insulated from, said central metal member, flexible electrical connections secured to the exterior of said socket shells and to the inward end of the plug casing, and a unitary mass of insulating material surrounding said socket shells and the inward end of the plug casing and completely embedding the electrical connections between the plug and the sockets.

15,252. SLIDING TROLLEY. OTTO MOORE, Frankfort, Ind., assignor, by mesne assignments, of one-half to Automatic Sliding Trolley Company, Frankfort, Ind., a Corporation. Filed Oct. 1, 1921. Serial No. 504,806. Original application filed Apr. 26, 1920, Serial No. 376,765. Renewed July 11, 1921. Serial No. 483,951. Original No. 1,387,897, dated Aug. 16, 1921. 8 Claims. (Cl. 191—59.1.)

1. A device of the class described including a trolley harp for making electrical contact with a trolley wire, a

shoe pivotally secured to said harp and adapted to slidably engage the trolley wire when the trolley is moving

in one direction, and a trolley wheel carried by the shoe and adapted to engage the trolley wire when the trolley is moving in the opposite direction.



DESIGNS.

60,000. LIGHTING-FIXTURE. HARRY C. ADAM, St. Louis, Mo. Filed Apr. 15, 1921. Serial No. 461,685. Term of patent 14 years.

The ornamental design for a lighting fixture, as shown.

60,001. LIGHTING-FIXTURE. HARRY C. ADAM, St. Louis, Mo. Filed Apr. 15, 1921. Serial No. 461,686. Term of patent 14 years.

The ornamental design for a lighting fixture, as shown.

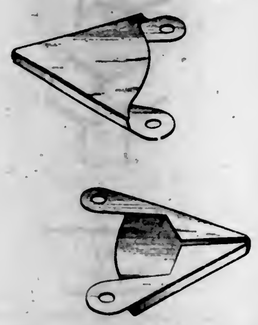
60,002. LIGHTING-FIXTURE BODY. HARRY C. ADAM, St. Louis, Mo. Filed Apr. 15, 1921. Serial No. 461,687. Term of patent 14 years.

The ornamental design for a lighting-fixture body, as shown.

60,003. LIGHTING-FIXTURE BODY. HARRY C. ADAM, St. Louis, Mo. Filed Apr. 15, 1921. Serial No. 461,688. Term of patent 14 years.

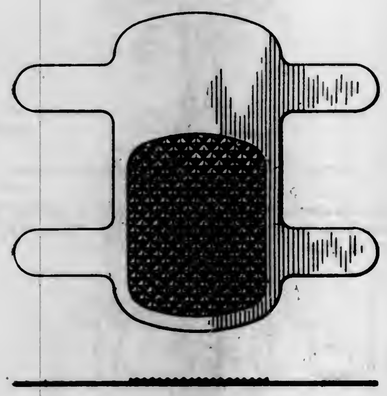
The ornamental design for a lighting-fixture body, as shown.

60,004. SEMI-INDIRECT LIGHTING-FIXTURE REFLECTOR. HARRY C. ADAM, St. Louis, Mo. Filed Apr. 15, 1921. Serial No. 461,689. Term of patent 14 years.



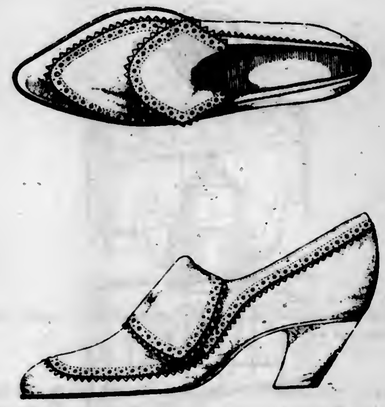
The ornamental design for a semi-indirect lighting-fixture reflector, as shown.

60,005. COMBINED WALL-BRACKET AND LAMP. HARRY C. ADAM, St. Louis, Mo. Filed Apr. 15, 1921. Serial No. 461,690. Term of patent 14 years.



The ornamental design for a combined wall bracket and lamp, as shown.

60,006. DESK-PAD CORNER-CLIP. HENRY T. ADAMS, Chicago, Ill., assignor to Henry T. Adams Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed July 11, 1921. Serial No. 483,983. Term of patent 14 years.

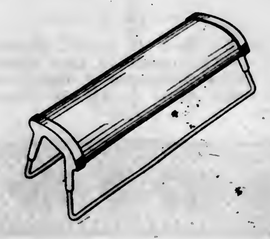


The ornamental design for a desk-pad corner-clip, as shown.

60,007. MATCH-SCRATCHER. BERNARD BALDWIN, Los Angeles, Calif. Filed June 21, 1921. Serial No. 479,386. Term of patent 7 years.

The ornamental design for a match scratcher, substantially as shown.

60,008. SHOE. VINCENZO BENEDETTI, Palisade, N. J. Filed Sept. 28, 1921. Serial No. 508,985. Term of patent 3½ years.

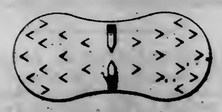


The ornamental design for a shoe, as shown.

60,009. MILK-BOTTLE OPENER. BERNARD BIEHL, Sr., Newark, N. J., assignor to J. L. Sommer Manufacturing Co., a Corporation of New Jersey. Filed July 23, 1921. Serial No. 487,198. Term of patent 14 years.

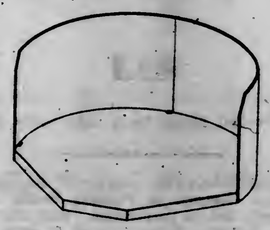
The ornamental design for a milk bottle opener, as shown.

60,010. READING-GLASS. LUCIAN W. BUGBEE, Indianapolis, Ind., assignor to Franklin Optical Company, Indianapolis, Ind., a Corporation. Filed Feb. 5, 1921. Serial No. 442,841. Term of patent 14 years.



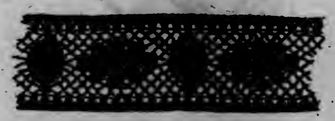
The ornamental design for a reading glass, as shown.

60,011. ALUMINUM COFFEE-PERCOLATOR. HOWARD A. CHURCH, Elkhart, Ind. Filed June 22, 1921. Serial No. 479,671. Term of patent 7 years.



The ornamental design for an aluminum coffee percolator, as shown.

60,012. SOCK-RETAINER FOR BOOTS AND SHOES. JAMES THOMAS COOPER, London, England. Filed Aug. 11, 1921. Serial No. 491,589. Term of patent 14 years.

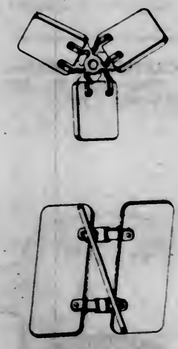


The ornamental design for a sock retainer for boots and shoes, as shown.

60,013. GAME-BOARD. RICHARD HENRY COTTER, Brooklyn, N. Y. Filed July 21, 1921. Serial No. 486,612. Term of patent 3½ years.

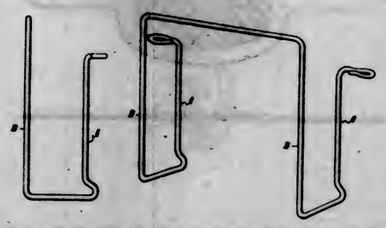
The ornamental design for a gameboard, as shown.

60,014. LACE. MARC H. DAUDY, Philadelphia, Pa., assignor to North American Lace Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Aug. 24, 1921. Serial No. 495,104. Term of patent 3½ years.



The ornamental design for lace, substantially as shown.

60,015. CHURN-DASHER. NATHAN P. DAZEY, St. Louis, Mo. Filed Feb. 2, 1921. Serial No. 441,906. Term of patent 14 years.



The ornamental design for a churn dasher, as shown.

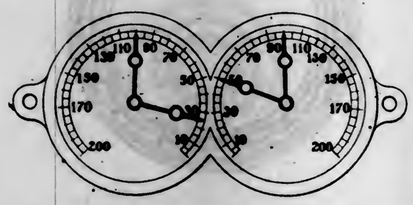
60,016. CHURN-DASHER. NATHAN P. DAZEY, St. Louis, Mo. Filed Feb. 3, 1921. Serial No. 442,304. Term of patent 14 years.

The ornamental design for a churn dasher, as shown.

60,017. BOOKRACK. HAROLD H. FERREY, Newark, N. J. Filed Sept. 14, 1920. Serial No. 410,349. Term of patent 3½ years.

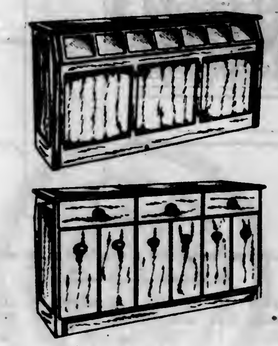
The ornamental design for a bookrack, as shown.

60,018. COIN OR TOKEN. STEWART P. FOLTZ, New Castle, Pa., assignor to Harry H. Weinberger, New York, N. Y. Filed Aug. 31, 1921. Serial No. 497,387. Term of patent 14 years.



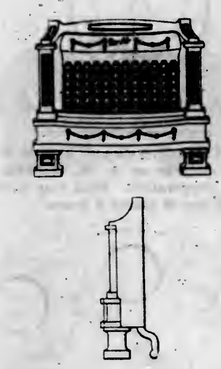
The ornamental design for a coin or token, as shown.

60,019. ADVERTISING NOVELTY. CHARLES H. FORBELL, Douglas Manor, N. Y., assignor to William E. Dodd, New York, N. Y. Filed Nov. 15, 1920. Serial No. 424,302. Term of patent 3½ years.



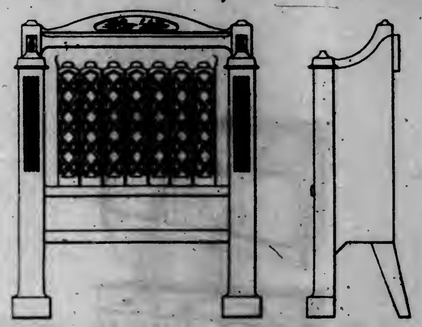
The ornamental design for an advertising novelty as shown.

60,020. PRESSURE-INDICATING GAGE. CHARLIE GARTON, Long Run, Ky., assignor to The Ashton Valve Company, Boston, Mass., a Corporation of Massachusetts. Filed July 2, 1921. Serial No. 482,225. Term of patent 14 years.



The ornamental design for a pressure-indicating gage, as shown.

60,021. DISPLAY-COUNTER. GEORGE W. GRAY, Seattle, Wash. Filed Mar. 22, 1921. Serial No. 454,492. Term of patent 3½ years.

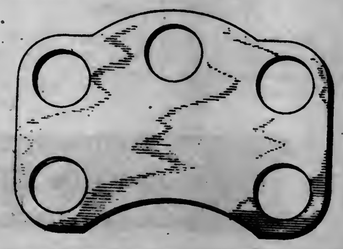


The ornamental design for a display counter, as shown.

60,022. GAS-HEATER. JOHN H. GRAYSON, Athens, Ohio. Filed Mar. 25, 1921. Serial No. 455,647. Term of patent 14 years.

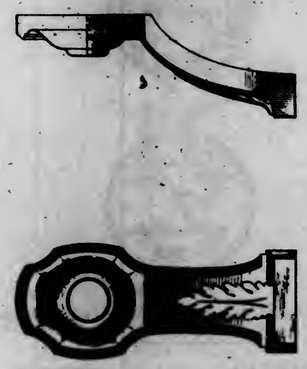
The ornamental design for a gas heater, as shown.

60,023. GAS-HEATER. JOHN H. GRATSON, Athens, Ohio. Filed Mar. 25, 1921. Serial No. 455,648. Term of patent 14 years.



The ornamental design for a gas heater, as shown.

60,024. COIN OR TOKEN. DIMOCK W. HOLLISTER, Philadelphia, Pa., assignor to Harry H. Weinberger, New York, N. Y. Filed Aug. 31, 1921. Serial No. 497,397. Term of patent 14 years.

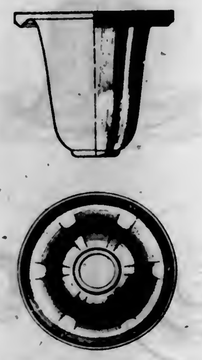


The ornamental design for a coin or token, as shown.

60,025. ICE-CREAM-CONE TRAY. JOSEPH W. HOODWIN, Chicago, Ill., assignor to J. W. Hoodwin Company, Chicago, Ill., a Corporation. Filed July 9, 1921. Serial No. 483,575. Term of patent 7 years.

The ornamental design for an ice cream cone tray as shown.

60,026. ARM FOR LIGHTING-FIXTURES. HAMILTON T. HOWELL, New York, N. Y., assignor to Alfred Vester Sons, Inc., Providence, R. I., a Corporation of Rhode Island. Filed Mar. 30, 1921. Serial No. 457,070. Term of patent 14 years.



The ornamental design for an arm for lighting fixtures, as shown.

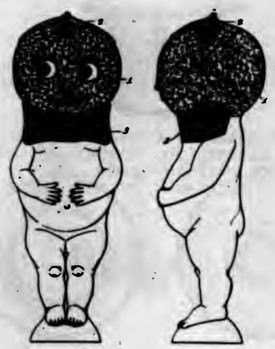
60,027. CUT-OUT RING. HAMILTON T. HOWELL, New York, N. Y., assignor to Alfred Vester Sons, Inc., Providence, R. I., a Corporation of Rhode Island. Filed Mar. 30, 1921. Serial No. 457,071. Term of patent 14 years.

The ornamental design for a cut out ring, as shown.

60,028. CANDLE-CUP. HAMILTON T. HOWELL, New York, N. Y., assignor to Alfred Vester Sons, Inc., Providence, R. I., a Corporation of Rhode Island. Filed Mar. 30, 1921. Serial No. 457,072. Term of patent 14 years.

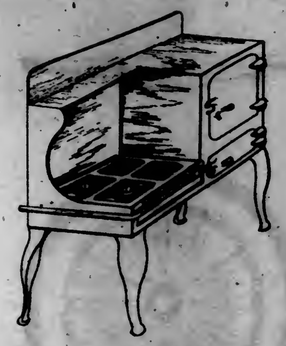
The ornamental design for a candle cup, as shown.

60,029. DEEP-BODY SHELL. HAMILTON T. HOWELL, New York, N. Y., assignor to Alfred Vester Sons, Inc., Providence, R. I., a Corporation of Rhode Island. Filed Mar. 30, 1921. Serial No. 457,074. Term of patent 14 years.



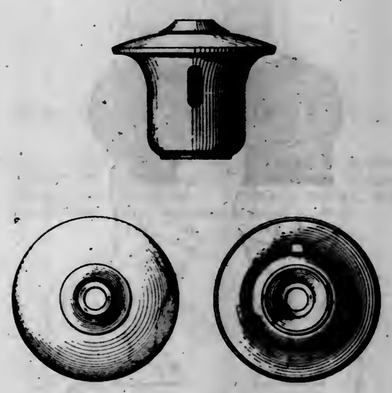
The ornamental design for a deep body shell, as shown.

60,030. PLATE FOR LIGHTING-FIXTURES. HAMILTON T. HOWELL, New York, N. Y., assignor to Alfred Vester Sons, Inc., Providence, R. I., a Corporation of Rhode Island. Filed Mar. 30, 1921. Serial No. 457,077. Term of patent 14 years.



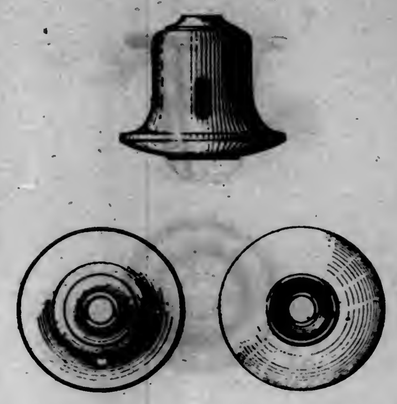
The ornamental design for a plate for lighting fixtures, as shown.

60,031. DOLL. CLAUDE JOHNSTONE, St. Louis, Mo. Filed Aug. 8, 1921. Serial No. 490,801. Term of patent 14 years.



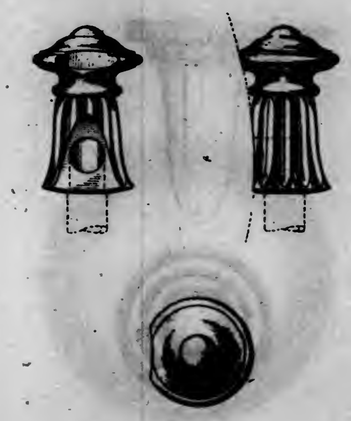
The ornamental design for a doll as shown and described.

60,032. TOY GAS-STOVE. LEARNEE C. JOHNS, Battle Creek, Mich. Filed June 9, 1920. Serial No. 387,754. Term of patent 3½ years.



The ornamental design for a toy gas stove, as shown.

60,033. SOCKET-COVER. WALTER R. KAHNS, Brooklyn, N. Y., assignor to J. H. White Manufacturing Company, Brooklyn, N. Y., a Corporation of New York. Filed Feb. 17, 1921. Serial No. 445,892. Term of patent 3½ years.

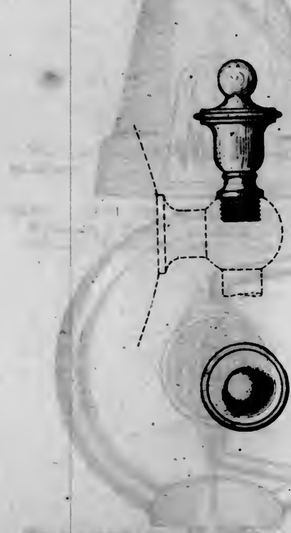


The ornamental design for a socket cover, as shown.

60,034. SOCKET-COVER. WALTER R. KAHNS, Brooklyn, N. Y., assignor to J. H. White Manufacturing Company, Brooklyn, N. Y., a Corporation of New York. Filed Feb. 17, 1921. Serial No. 445,893. Term of patent 3½ years.

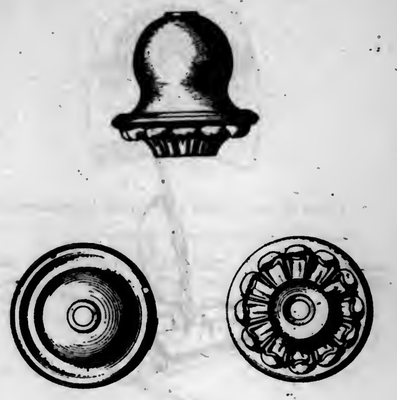
The ornamental design for a socket cover, as shown.

60,035. ARM-HUSK FOR LIGHTING-FIXTURES. WALTER R. KAHNS, Brooklyn, N. Y., assignor to J. H. White Manufacturing Company, Brooklyn, N. Y., a Corporation of New York. Filed Feb. 17, 1921. Serial No. 445,894. Term of patent 3½ years.



The ornamental design for an arm husk for lighting fixtures, as shown.

60,036. ARM-HUSK FOR LIGHTING-FIXTURES. WALTER R. KAHNS, Brooklyn, N. Y., assignor to J. H. White Manufacturing Company, Brooklyn, N. Y., a Corporation of New York. Filed Feb. 17, 1921. Serial No. 445,895. Term of patent 3½ years.



The ornamental design for an arm husk for lighting fixtures, as shown.

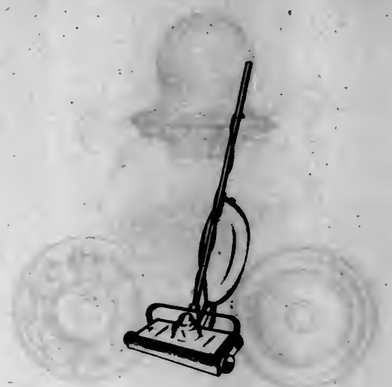
60,037. KNOB FOR AN ARM-HUSK FOR LIGHTING FIXTURES. WALTER R. KAHNS, Brooklyn, N. Y., assignor to J. H. White Manufacturing Company, Brooklyn, N. Y., a Corporation of New York. Filed Feb. 17, 1921. Serial No. 445,896. Term of patent 3½ years.

The ornamental design for a knob for an arm husk for lighting fixtures, as shown.

60,038. SOCKET-COVER. WALTER R. KAHNS, Brooklyn, N. Y., assignor to J. H. White Manufacturing Company, Brooklyn, N. Y., a Corporation of New York. Filed Feb. 17, 1921. Serial No. 445,897. Term of patent 3½ years.

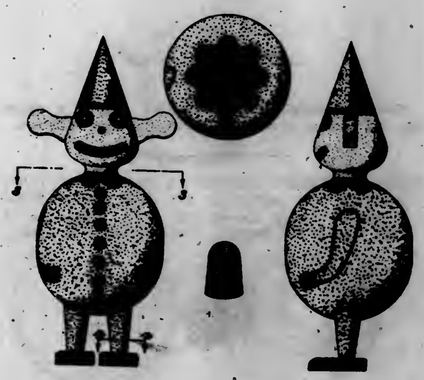
The ornamental design for a socket cover, as shown.

60,039. JEWELRY—NAMELY, A CHARM, PIN, CUFF-BUTTON, OR ARTICLE OF SIMILAR NATURE. FRANK T. KASSEL, Kansas City, Kans. Filed Apr. 11, 1921. Serial No. 460,497. Term of patent 3½ years.



The ornamental design for jewelry, namely, a charm, pin, cuff button, or article of similar nature, as shown.

60,040. JEWELRY—NAMELY, A CHARM, PIN, CUFF-BUTTON, OR ARTICLE OF SIMILAR NATURE. FRANK T. KASSEL, Kansas City, Kans. Filed Apr. 11, 1921. Serial No. 460,498. Term of patent 3½ years.

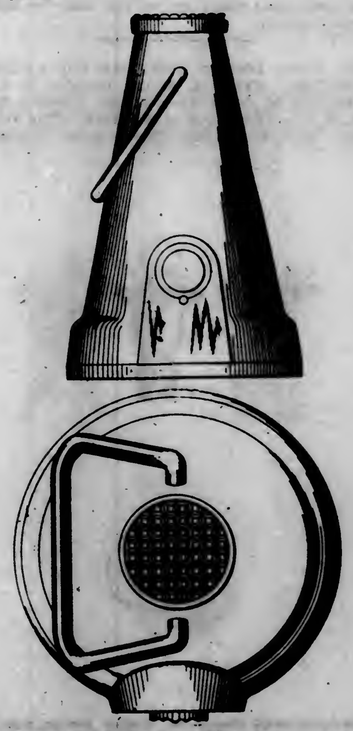


The ornamental design for jewelry, namely, a charm, pin, cuff button, or article of similar nature, as shown.

60,041. TOY VACUUM DEVICE. GEORGE J. KATZ, Detroit, Mich. Filed Jan. 3, 1921. Serial No. 434,813. Term of patent 3½ years.

The ornamental design for a toy vacuum device, as shown.

60,042. NOVELTY FIGURE. HARRY H. KEPLEY, Philadelphia, Pa. Filed Sept. 20, 1921. Serial No. 502,082. Term of patent 7 years.

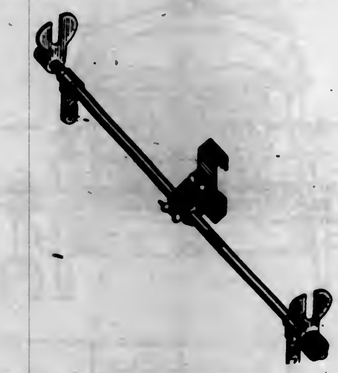


The ornamental design for a novelty figure as shown.

60,043. ARM FOR A LIGHTING-FIXTURE. RUDOLPH KLEINMAN, New York, N. Y., assignor to Bemart Lighting Co., New York, N. Y. Filed Apr. 19, 1921. Serial No. 462,710. Term of patent 3½ years.

The ornamental design for an arm for a lighting fixture as shown.

60,044. LIFTING-JACK. JOHN C. KOTZ, Bellevue borough, Pa., assignor to The Duff Manufacturing Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Mar. 1, 1921. Serial No. 448,851. Term of patent 14 years.



The ornamental design for a lifting jack, as shown.

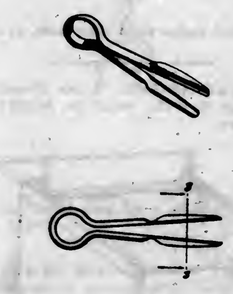
60,045. PICTURE-FRAME. JOSEF KUBR, Franklin, Pa. Filed June 30, 1921. Serial No. 481,658. Term of patent 3½ years.

The ornamental design for a picture frame, substantially as shown.

60,046. CURTAIN AND SHADE HANGER. SATURNIN LOJEWSKI, Schenectady, N. Y. Filed Feb. 21, 1921. Serial No. 446,959. Term of patent 7 years.

The ornamental design for a curtain and shade hanger as shown.

60,047. RING OR SIMILAR ARTICLE. JOSHUA W. MAYER, New York, N. Y. Filed Aug. 6, 1921. Serial No. 490,418. Term of patent 7 years.



The ornamental design for a ring or similar article, as shown.

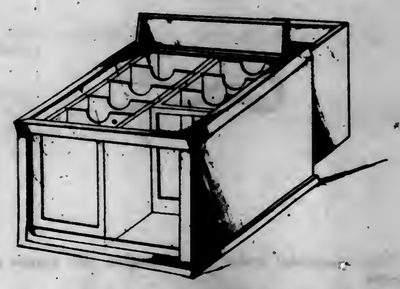
60,048. RUBBER HEEL. SAMUEL MESSINA, Jamestown, N. Y. Filed Mar. 31, 1921. Serial No. 457,532. Term of patent 7 years.

The ornamental design for a rubber heel, as shown.

60,049. TOBACCO-PIPE REAMER. GEORGE J. MEYERS, Council Bluffs, Iowa. Filed Feb. 28, 1921. Serial No. 448,613. Term of patent 14 years.

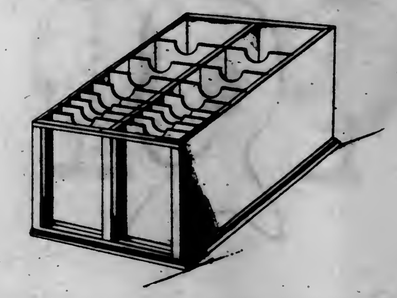
The ornamental design for a smoking pipe reamer as shown.

60,050. DOLL'S HEAD. VERNIE H. MOHLER, Indianapolis, Ind. Filed Sept. 26, 1921. Serial No. 503,400. Term of patent 7 years.



The ornamental design for a doll's head, as shown.

60,051. CHAIR-DESK. Jesse C. Moore, Indianapolis, Ind., assignor to Columbia School Supply Company, Indianapolis, Ind. Filed Apr. 16, 1921. Serial No. 462,039. Term of patent 14 years.



The ornamental design for a chair desk, as shown.

60,052. DISPLAY-CABINET. Harry Morris, Chicago, Ill. Filed Apr. 9, 1921. Serial No. 460,081. Term of patent 7 years.

The ornamental design for a display cabinet, as shown.

60,053. DISPLAY-CABINET. Harry Morris, Chicago, Ill. Filed Apr. 9, 1921. Serial No. 460,082. Term of patent 7 years.

The ornamental design for a display cabinet, as shown.

60,054. ADVERTISING DEVICE. Harry Morris, Chicago, Ill. Filed Apr. 22, 1921. Serial No. 462,637. Term of patent 7 years.

The ornamental design for an advertising device as shown.

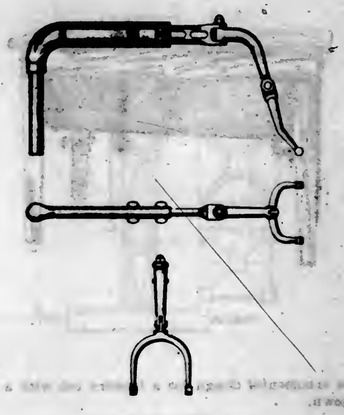
60,055. METER-BOX. Thomas E. Murray, Jr., Brooklyn, N. Y. Filed July 17, 1920. Serial No. 397,125. Term of patent 7 years.

The ornamental design for a meter box, as shown.

60,056. DOLL. Herman O. Oesten, Portland, Oreg. Filed Nov. 3, 1920. Serial No. 422,980. Term of patent 3½ years.

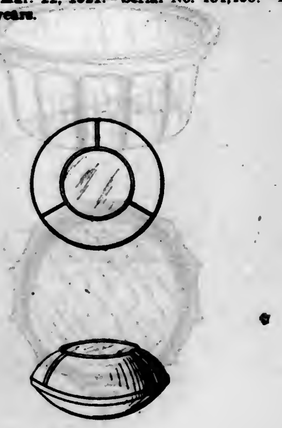
The ornamental design for a doll as shown.

60,057. GAS-HEATER. Mortimer L. Packer, Columbus, Ohio. Filed Feb. 7, 1921. Serial No. 443,280. Term of patent 7 years.



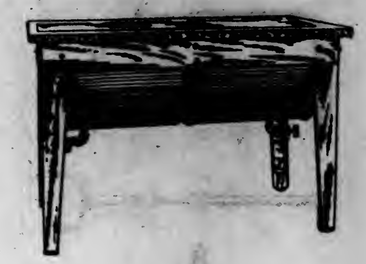
The ornamental design for a gas heater, as shown.

60,058. COIN-PURSE. Frederik Petersen, New York, N. Y. Filed Feb. 26, 1921. Serial No. 448,244. Term of patent 3½ years.



The ornamental design for a coin purse as shown and described.

60,059. STANDARD FOR X-RAY APPARATUS. Oscar H. Pierce and Alexander F. Pierce, Rochester, N. Y. Filed Nov. 18, 1920. Serial No. 426,004. Term of patent 14 years.



The ornamental design for a standard for X-ray apparatus, as shown.

60,060. CAKE OF SOAP. Stanley Resor, New York, N. Y., assignor, by mesne assignments, to The Andrew Jergens Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Mar. 22, 1921. Serial No. 454,495. Term of patent 7 years.

The ornamental design for a cake of soap, as shown.

60,061. LAUNDRY-TUB WITH A COVER. GEORGE F. RENNOR, Mercer, Pa. Filed May 21, 1921. Serial No. 471,506. Term of patent 14 years.

The ornamental design for a laundry tub with a cover, as shown.

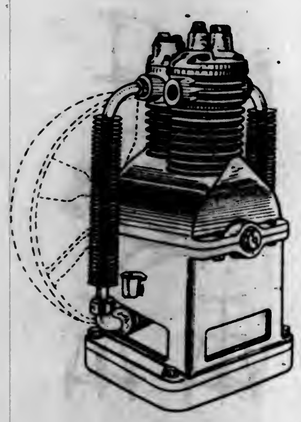
60,062. TRANSPARENT GLASS DISH. GEORGE D. SAILER, Jeannette, Pa., assignor to McKee Glass Company, Jeannette, Pa., a Corporation of Pennsylvania. Filed July 8, 1921. Serial No. 483,365. Term of patent 14 years.

The ornamental design for a transparent glass dish as shown and described.

60,063. HEAT-TUBE FOR FIREPLACE-HEATERS. GEORGE B. SEARLS, Steubenville, Ohio. Filed June 4, 1921. Serial No. 475,114. Term of patent 14 years.

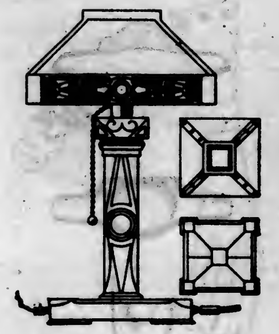
The ornamental design for a heat tube for fireplace heaters, as shown.

60,064. ANVIL. JOHAN SHERVER, Mineville, N. Y. Filed Feb. 28, 1921. Serial No. 448,610. Term of patent 14 years.



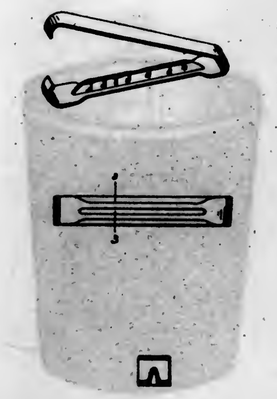
The ornamental design for an anvil, as shown.

60,065. CHILD'S OUTER GARMENT. JACOB SOLOMON, New York, N. Y., assignor to Kiddie Garment Co. Inc., New York, N. Y., a Corporation of New York. Filed Jan. 29, 1921. Serial No. 441,058. Term of patent 3½ years.



The ornamental design for a child's outer garment, as shown.

60,066. AIR-COMPRESSOR CASING. EDWIN H. STREDMAN, St. Louis, Mo., assignor to Curtis & Co. Mfg. Co., Wellston, Mo., a Corporation of Missouri. Filed Dec. 27, 1920. Serial No. 433,511. Term of patent 14 years.



The ornamental design for an air compressor casing, as shown.

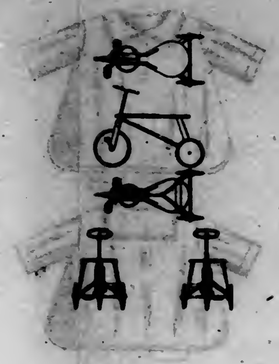
60,067. LAMP. WILLIAM L. STEWART, Worcester, Mass. Filed Feb. 28, 1921. Serial No. 448,619. Term of patent 3½ years.

The ornamental design for a lamp, as shown.

60,068. CLASP. JOHN H. STONE, Cranston, R. I. Filed May 7, 1919. Serial No. 295,501. Term of patent 14 years.

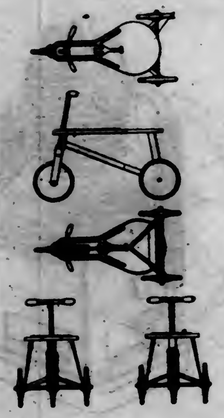
The ornamental design for a clasp, as shown.

60,069. HOLDER FOR SMOKING-PIPES. EDWARD P. STONE, Cleveland, Ohio. Filed Jan. 31, 1921. Serial No. 441,436. Term of patent 14 years.



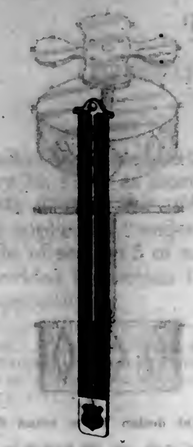
The ornamental design for a holder for smoking pipes, as shown.

60,070. WASTE-BASKET OR SIMILAR ARTICLE. CLAUDE W. SUTTON, Wilmington, Del., assignor to American Vulcanized Fibre Company, Wilmington, Del., a Corporation of Delaware. Filed Feb. 24, 1921. Serial No. 447,621. Term of patent 14 years.



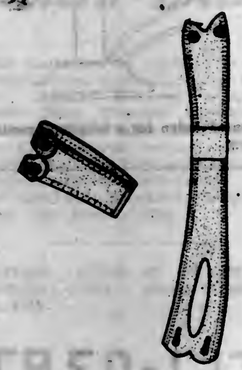
The ornamental design for a waste basket or similar article as shown.

60,071. CHILD'S VELOCIPEDE. JAMES K. TULLY, St. Louis, Mo., assignor to Metallic Industries Inc., St. Louis, Mo., a Corporation of Delaware. Filed Feb. 2, 1921. Serial No. 442,891. Term of patent 14 years.



The ornamental design for a child's velocipede as shown.

60,072. PLAY-CAR. JAMES K. TULLY, St. Louis, Mo., assignor to Metallic Industries Inc., St. Louis, Mo., a Corporation of Delaware. Filed Feb. 16, 1921. Serial No. 446,182. Term of patent 14 years.



The ornamental design for a play car as shown.

60,073. PRINTER'S GAGE. DAVID TURNER, New York, N. Y. Filed Sept. 10, 1920. Serial No. 410,766. Term of patent 14 years.

The ornamental design for a printer's gage as shown.

Claims use since September, 1890.

Ser. No. 153,748. (CLASS 7. CORDAGE.) WHITLOCK CORDAGE CO., New York, N. Y. Filed Oct. 4, 1921.

No claim being made to the exclusive use of the words "The Utmost in Rope Value Manila" apart from the mark shown in the drawing.

Particular description of goods.—Manila Rope.

Claims use since Aug. 1, 1921.

Ser. No. 153,749. (CLASS 7. CORDAGE.) WHITLOCK CORDAGE CO., New York, N. Y. Filed Oct. 4, 1921.

No claim being made to the exclusive use of the words "Superior Sisal" apart from the mark shown in the drawing.

Particular description of goods.—Sisal Rope.

Claims use since Aug. 1, 1921.

Ser. No. 153,817. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) LARSOUTH-OLSON CO., New York, N. Y. Filed Oct. 6, 1921.

Particular description of goods.—Dry Batteries.

Claims use since Sept. 29, 1921.

Ser. No. 153,833. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) M. J. WOHL & CO. INC., New York and Long Island City, N. Y. Filed Oct. 6, 1921.

Consists of the combined word "Hi-Speed."

Particular description of goods.—Electric-Arc Lamps.

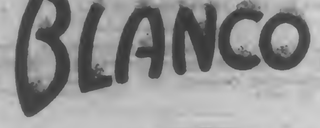
Claims use since July 1, 1921.

Ser. No. 153,890. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) MUTE-A-PHONE CORPORATION, New York, N. Y. Filed Oct. 8, 1921.

Particular description of goods.—Telephone-Mufflers.

Claims use since Sept. 17, 1921.

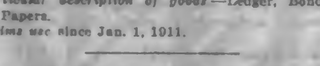
Ser. No. 154,084. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) L. B. HAIR TONIC CO., Minneapolis, Minn. Filed Oct. 14, 1921.



The picture comprising the mark is that of Lena Olson. The words "Trade Mark" are disclaimed.

Particular description of goods.—Hair-Tonic.

Claims use since Jan. 25, 1921.



Ser. No. 154,236. (CLASS 4. ABRASIVE, DETERGENT, AND POLISHING MATERIALS.) PACIFIC CHEMICAL COMPANY, Los Angeles, Calif. Filed Oct. 17, 1921.

Particular description of goods.—An Ammonia Washing Compound.

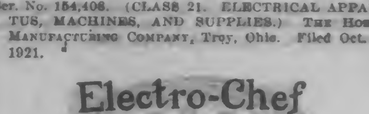
Claims use since June 17, 1921.

Ser. No. 154,328. (CLASS 37. PAPER AND STATIONERY.) STONE & ANDREW INC., Boston, Mass. Filed Oct. 10, 1921.

The word "Andstone."

Particular description of goods.—Ledger, Bond, and Book Papers.

Claims use since Jan. 1, 1911.



Ser. No. 154,349. (CLASS 4. ABRASIVE, DETERGENT, AND POLISHING MATERIALS.) THE COCO SOAP COMPANY, Denver, Colo. Filed Oct. 20, 1921.

Particular description of goods.—Soap.

Claims use since Aug. 26, 1921.

Ser. No. 154,406. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) THE HOBART MANUFACTURING COMPANY, Troy, Ohio. Filed Oct. 21, 1921.

Particular description of goods.—Electrically-Driven Beating and Mixing Machines.

Claims use since Oct. 4, 1921.

Ser. No. 154,444. (CLASS 22. GAMES, TOYS, AND SPORTING GOODS.) B. F. GLADDING & CO. INC., South Otselic, N. Y. Filed Oct. 22, 1921.

No claim being made to the exclusive use of the words or numerals "Extra Quality Braided Line, 50 Ft., No. 5" apart from the mark as shown on the drawing.

Particular description of goods.—Braided Fish-Lines.

Claims use since Aug. 22, 1912.

Ser. No. 154,447. (CLASS 22. GAMES, TOYS, AND SPORTING GOODS.) B. F. GLADDING & CO. INC., South Otselic, N. Y. Filed Oct. 22, 1921.

No claim being made to the exclusive use of the words "Best Quality Braided, Waterproof Finish, 25 Yds., Oil Silk, Brand, No. 4" apart from the mark as shown on the drawing.

Particular description of goods.—Waterproof Braided Fishing-Lines.

Claims use since Aug. 22, 1912.

Ser. No. 154,552. (CLASS 22. GAMES, TOYS, AND SPORTING GOODS.) B. F. GLADDING & CO. INC., South Otselic, N. Y. Filed Oct. 25, 1921.

No claim being made to the exclusive use of the words "Special Braided Trout Line, No. 100, 25 Yds., Waterproof, Contains 48 Distinct Threads," apart from the mark as shown on the drawing.

Ser. No. 154,556. (CLASS 22. GAMES, TOYS, AND SPORTING GOODS.) B. F. GLADDING & CO. INC., South Otselic, N. Y. Filed Oct. 25, 1921.

No claim being made to the exclusive use of the words and numerals "Finest Japanese Silk, Saline Process, Enameled Silk, Test 14 Lbs., No. H., 25 Yds." apart from the mark as shown on the drawing.

Particular description of goods.—Silk Fishing-Lines.

Claims use since Aug. 22, 1912.

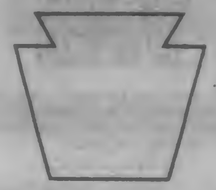
Ser. No. 154,564. (CLASS 37. PAPER AND STATIONERY.) THE KELLOGG & BULKELEY COMPANY, Hartford, Conn. Filed Oct. 25, 1921.

NUTMEG

Particular description of goods.—Flat Papers, Writing, Bond, and Ledger.

Claims use since Feb. 23, 1917.

Ser. No. 154,625. (CLASS 37. PAPER AND STATIONERY.) BLAISDELL PENCIL COMPANY, Philadelphia, Pa. Filed Oct. 27, 1921.



KEYSTONE

Consists of the word "Keystone."

Particular description of goods.—Lead-Pencils, Mechanical Pencils, Penholders, Rubber Erasers, and Soap Erasers.

Claims use since about Jan. 1, 1911.

Ser. No. 154,636. (CLASS 37. PAPER AND STATIONERY.) BLAISDELL PENCIL COMPANY, Philadelphia, Pa. Filed Oct. 27, 1921.

Consists of the representation of a keystone.

Particular description of goods.—Lead-Pencils, Mechanical Pencils, Penholders, Rubber Erasers, and Soap Erasers.

Claims use since about Jan. 1, 1911.

Ser. No. 154,707. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) SCHEELINE Manufacturing Company, San Francisco, Calif. Filed Oct. 28, 1921.

Comfort by wire.

Consisting of the words "Comfort by Wire."

Particular description of goods.—Electric Steam-Radiators.

Claims use since July 1, 1921.

Ser. No. 154,709. (CLASS 37. PAPER AND STATIONERY.) STONE & ANDREW, INC., Boston, Mass. Filed Oct. 28, 1921.

BULKWELL

Particular description of goods.—Book-Papers.

Claims use since Jan. 1, 1917.

Ser. No. 154,731. (CLASS 37. PAPER AND STATIONERY.) THE LAURENCE ENVELOPE COMPANY, Springfield, Mass. Filed Oct. 29, 1921.

DIRECTMAIL

Particular description of goods.—Paper Such as is Ordinarily Used for Writing and Printing, Commercial Stationery, Sheets of Paper and Cards Known Commercially as "Announcements," and Envelops to Fit the Same.

Claims use since Aug. 1, 1921.

Ser. No. 154,767. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) RADIO CORPORATION OF AMERICA, New York, N. Y. Filed Oct. 29, 1921.

RADIOLA

Particular description of goods.—Radio Receiving Apparatus.

Claims use since about Sept. 27, 1921.

Ser. No. 154,779. (CLASS 37. PAPER AND STATIONERY.) WILLIAM G. WILLMAN PAPER CO., INC., New York, N. Y. Filed Oct. 29, 1921. Under ten-year proviso.

Hawthorne

Particular description of goods.—Writing and Printing Paper.

Claims use since 1891.

Ser. No. 154,842. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) NORTH EAST ELECTRIC COMPANY, Rochester, N. Y. Filed Oct. 31, 1921.

Particular description of goods.—Electric Signal-Horns for Motor-Vehicles.

Claims use since June 21, 1919.

Ser. No. 154,892. (CLASS 42, KNITTED, NETTED, AND TEXTILE FABRICS.) TEXAS COTTON MILL CO., McKinney, Tex. Filed Nov. 1, 1921.

Particular description of goods.—Cotton Piece Goods.

Claims use since Oct. 25, 1917.

Ser. No. 155,008. (CLASS 37. PAPER AND STATIONERY.) BROWN & BIGELOW, St. Paul, Minn. Filed Nov. 4, 1921.

Redipoint

Particular description of goods.—Pencils, Leads, and Erasers.

Claims use since on or about Nov. 1, 1917.

Ser. No. 155,017. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) JOSEPH FLEISCHER, New York, N. Y. Filed Nov. 4, 1921.

Uweara

Particular description of goods.—Hair-Nets.

Claims use since Oct. 21, 1921.

Ser. No. 155,026. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) H. R. MALLINSON & CO. INC., New York, N. Y. Filed Nov. 4, 1921.

Eponette

Particular description of goods.—Silk Piece Goods.

Claims use since April, 1921.

Ser. No. 155,063. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) FORSTMANN & HUFFMANN COMPANY, Passaic, N. J. Filed Nov. 5, 1921.

Jewella

Particular description of goods.—Woolen Piece Goods.
Claims use since Oct. 18, 1921.

Ser. No. 155,054. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) FORSTMANN & HUFFMANN COMPANY, Passaic, N. J. Filed Nov. 5, 1921.

Melrosa

Particular description of goods.—Woolen Piece Goods.
Claims use since July 25, 1921.

Ser. No. 155,060. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) JANSEN & PERTZFELD, INC., New York, N. Y. Filed Nov. 5, 1921.

VISIONETTE

Particular description of goods.—Silks in the Piece.
Claims use since Oct. 1, 1921.

Ser. No. 155,141. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) C. BAHNSEN & CO., INC., New York, N. Y. Filed Nov. 8, 1921.

Alonzo

Particular description of goods.—Wool-Velour Coating Piece Goods.
Claims use since Jan. 2, 1921.

Ser. No. 155,142. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) C. BAHNSEN & CO., INC., New York, N. Y. Filed Nov. 8, 1921.

Arabella

Particular description of goods.—Wool-Velour Coating Piece Goods.
Claims use since Jan. 2, 1921.

Ser. No. 155,145. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) C. BAHNSEN & CO., INC., New York, N. Y. Filed Nov. 8, 1921.

Cordelia

Particular description of goods.—Wool-Velour Coating Piece Goods.
Claims use since Jan. 2, 1921.

Ser. No. 155,146. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) C. BAHNSEN & CO., INC., New York, N. Y. Filed Nov. 8, 1921.

Equestra

Particular description of goods.—Wool-Corduroy Piece Goods.
Claims use since Jan. 2, 1921.

Ser. No. 155,148. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) C. BAHNSEN & CO., INC., New York, N. Y. Filed Nov. 8, 1921.

Jessica

Particular description of goods.—Wool-Velour Coating Piece Goods.
Claims use since Jan. 2, 1921.

Ser. No. 155,150. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) C. BAHNSEN & CO., INC., New York, N. Y. Filed Nov. 8, 1921.

Manon

Particular description of goods.—Wool-Velour Coating Piece Goods.
Claims use since Jan. 2, 1921.

Ser. No. 155,151. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) C. BAHNSEN & CO., INC., New York, N. Y. Filed Nov. 8, 1921.

Nerissa

Particular description of goods.—Wool-Velour Coating Piece Goods.
Claims use since Jan. 2, 1921.

Ser. No. 155,152. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) C. BAHNSEN & CO., INC., New York, N. Y. Filed Nov. 8, 1921.

Orsino

Particular description of goods.—Wool-Velour Coating Piece Goods.
Claims use since Jan. 2, 1921.

Ser. No. 155,154. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) C. BAHNSEN & CO., INC., New York, N. Y. Filed Nov. 8, 1921.

Tosca

Particular description of goods.—Wool-Velour Coating Piece Goods.
Claims use since Jan. 2, 1921.

Ser. No. 155,178. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) B. LICHTIG & SON, INC., Oakland, Calif. Filed Nov. 8, 1921.

Jenny Lind

Particular description of goods.—Hair-Nets.
Claims use since June 18, 1921.

DECISIONS

OF THE

COMMISSIONER OF PATENTS

AND OF

UNITED STATES COURTS IN PATENT CASES.

DECISIONS OF THE U. S. COURTS.

U. S. Circuit Court of Appeals—Second Circuit.

BEATTIE MFG. CO. *v.* SMITH *et al.*

Decided June 23, 1921.

[275 Fed. Rep., 164.]

1. PATENTS—No. 713,230, FOR INTURNING EDGES OF COLLAR-BLANKS, HELD VALID AND INFRINGED.

Maitland and Beattie patent, No. 713,230, for an improved machine for inturning the edges of fabric blanks in the manufacture of collars and cuffs, *Held* valid and infringed, it being a decided improvement in the art, not anticipated by anything in the prior art.

2. SAME—No. 972,272, FOR SEPARATE HEATING OF BED-PLATE INFOLDERS IN COLLAR-FOLDING MACHINES, HELD INFRINGED.

Smith patent, No. 972,272, for the separate heating of the bed-plate infolders in machines for folding collar and cuff blanks, *Held* infringed, and the evidence insufficient to show that the infringer's predecessor in business employed similar heating units in such folders prior to the application for such patent.

3. SAME—No. 972,320, FOR EXPANDING AND CONTRACTING DIES IN COLLAR-FOLDING MACHINES, HELD VALID.

Beattie patent, No. 972,320, for automatically expanding and contracting the die in collar-folding machines, *Held* valid, as indicating invention.

4. SAME—No. 972,495, FOR INCORPORATING HEATING RESISTANCE-COILS IN FOLDERS OF COLLAR-FOLDING MACHINES, HELD VALID.

Beattie patent, No. 972,495, for incorporating heating resistance-coils in the folders of collar-folding machines, *Held* valid, there being nothing anticipatory in the prior art.

5. SAME—No. 1,071,677, FOR PRODUCING CIRCULAR MOVEMENT OF INFOLDERS IN COLLAR-FOLDING MACHINES, HELD VALID.

Maitland and Beattie patent, No. 1,071,677, for moving the infolders of collar-folding machines in a circular path, *Held* valid and infringed.

6. SAME—MERE LACHES WILL NOT BAR RELIEF ON FINAL HEARING IN INFRINGEMENT SUIT.

Though knowledge of the infringement of a patent and long-continued acquiescence therein may be fatal on a motion for a preliminary injunction, it will not prevent the court from granting such relief as may be just and equitable on final hearing; mere laches, unaccompanied by circumstances amounting to an equitable estoppel, not shutting out a party from all relief in a court of equity.

APPEAL from the District Court of the United States for the Northern District of New York.

Suit by the Beattie Manufacturing Company against Margaret H. Smith, trading and doing business under the name and style of the E. H. Brown Manufacturing Company, and another, for infringement of patents. Decree for complainant (266 Fed., 701) and defendants appeal. Affirmed.

Mr. Harry Hayward Allen (*Mr. Samuel S. Watson* of counsel) for Margaret Heald Smith.

Mr. Frank C. Curtis for appellee.

Before WARD, HOUGH, and MANTON, Circuit Judges.

MANTON, *Cir. J.*:

This suit is for infringement of patents Nos. 713,230, 972,272, 972,320, 972,495, and 1,071,677. They all relate to folding-machines. Each patent was sustained, and the appellants were held to infringe, in the court below. We shall treat each patent separately and in the order as above.

[1] Patent No. 713,230 was issued on November 11, 1902, to John Maitland and William J. Beattie, the appellee's assignors, and is for a machine for folding collar-blanks. The invention relates to improvements in the machine for inturning the edges of fabric blanks in the manufacture of collars and cuffs, and particularly the style of machine used for folding collars. The object of the invention is to simplify the construction of such a machine and to facilitate the adoption of the same to different sizes and styles of blank. Claim 3 only is in issue. It provides as follows:

(3) In a folding machine, former mechanism comprising in part a former-plate and a former-block split part way of its length, one member thereof being bent to conform to the edge of said former-plate and secured thereto, and the other member being provided with means for securing the same to a supporting member of said former mechanism, substantially as described.

This feature of the machine is for the supporting of the thin sheet-metal die-plate or former-plate which determines the shape of the folder-blank, and over the edge of which the edge of the blank is inturned by the folders. The former-plate is a very thin sheet metal, and requires an immediate support to which it is attached. It is constructed so that the support can be readily mounted upon the die-head or former-head of the machine. The die-head is provided with a slide-way or seat, which is adapted to interchangeably receive and support the former-blocks for all forms of former-plate. The former-plates must differ in outline according to the blank to be folded. The former-block which is attached to the die-head must always be the same in order to be interchangeable with the other former-blocks, and the portion of the former-block to which

the thin former-plate is directly attached must conform generally to the form of the edge of the particular thin former-plate. The former-plates thus adapted for folding the bands of collars are narrow and very irregular in outline, and the task was to machine a solid piece of metal onto a former-block of such necessary complex shape that one portion of it would be of standard form interchangeable with other former-blocks in attachment to the die-head. The portion to which the irregular former-plate is directly attached must conform to the shape of the thin former-plate. This was a difficult and expensive task, but the inventor accomplished this by splitting the former-block partway of its length, having one of the members thus formed left in its original straight form, while the other member was made so as to readily bend to conform to the shape of the former-plate which is to be attached to it. This was done by bending this member of the split former-block without machine work upon it. The result is that all the former-blocks have the members whereby they are attached to the die-head of the same shape and dimensions, while the other members to which the thin former-plates are attached can be made of different forms, in each case corresponding to the shape of the former-plate to be attached thereto. The art shows that for many years the makers of folding-machines had felt obliged to separately fashion the whole folder-block for each particular form of folder-plate. This consumed time and required labor and expense. The inventor has overcome this, thus eliminating a great deal of loss of time and labor. These machines are equipped from time to time with differently shaped templets corresponding to the shapes of the respective blanks to be folded in making different styles of collars. The thin sheet-metal templet-plates riveted to the heavy metal blocks, which blocks in turn are removably mounted upon the die head, which swings outward and from the bed of the machine, make possible the interchangeability of templets varying greatly in shape. If a solid block be employed to conform to the shape of and support each of these different irregular forms of templets, these different supporting blocks would have to be attached to different parts of the die-head. By employing a split former-block, the inventor was able to accomplish what had been previously considered impossible. He did this by attaching the different folder-blocks interchangeably always to the same points of the die-head, while also having the folder-block conform in each case to the particular form of the templet plate employed, no matter how irregular its shape.

There is infringement in the manufacture and use of appellants' machine. This is beyond question. What was accomplished was a decided improvement in the art. Nothing in the prior art anticipated it.

We think this patent is valid and infringed.

[2] Patent No. 972,272 is dated October 11, 1910. The application was filed February 14, 1908. The inventor is George W. Smith, appellee's assignor. It is for a folding-machine. It relates to machines for folding collar and cuff blanks. The object of the invention was to construct a folding-machine in which the bed-plate infolders will be heated by electricity, and that one operation of the foot-pedal will cause the head of the machine carrying the die to press down upon the goods, and cause the infolders to fold the edges of the goods over the die, and also press the bed of the machine forward against the infolders, thus pressing the fold smoothly and uniformly over the edges of the die while the die remains within the fold. By removing the pressure from the foot pedal, the infolder is moved backward from over the die, and the head of the press carrying the die will move upward from the bed of the press, leaving the operator the free use of both hands for handling the goods. The prior art shows no disclosure of separate means for heating the bed and for heating the infolders. Claims 1, 2, and 7 are involved, and reads as follows:

(1) In a folding machine, a rigid frame, a bed-plate movable within the frame, means within the bed-plate for heating the same, a die-plate adapted to coöperate with the bed-plate for clamping between them a blank to be folded, slidable infolders for folding the edges of a blank over the die-plate, each folder being provided with means for the insertion of heating means, means for simultaneously operating the infolders, and means for pressing the bed-plate and die-plate into coöperative relation, turning the edges of the blank over said die, and forcing said bed and die against the infolders to press the turned edges of the blank.

(2) In a folding machine, a rigid frame, a bed-plate movable within said frame, means for operating the bed-plate, means within the bed-plate for heating the same, a die-plate adapted to coöperate with the bed-plate for holding a blank on the bed-plate, infolders for turning the edges of the blank over the die-plate, each infolder being provided with means for the insertion of heating means independent of the bed-plate heating means.

(7) In a folding machine, a rigid frame provided with a bed-plate adapted to be heated, a movable die arranged to clamp blanks to be folded on the upper surface of said bed-plate, infolders adapted to turn the edges of said blank over the edge of said die, and means for producing pressure between the bed-plate and the die and infolders, each of said infolders being provided with means for the insertion of heating means separate of the bed-plate heating means.

The invention permits the infolders to be more highly heated than the bed. This is desirable. Having the infolding elements heated to the highest temperature which can be employed without scorching the goods is very desirable. In the folding operation the blank is in contact with the bed for a longer period than it is with the infolders, because the blank must be laid upon the bed before the infolders move in over the edges of the blank, and cannot be removed from the bed until after the infolders have been fully withdrawn. It would therefore be safe to have the infolders more highly heated than the bed, because they are in contact with the blank for less time than the blank is in contact with the bed. The claims are not limited to any particular form of heating mechanism, electric or otherwise. The testimony shows that, prior to the date of the application of this patent, Simplex heating units had been commonly known, and could be obtained from the Simplex Heating Company of various sizes, as might be desired. They comprised each a casting hollowed out to receive the electric resistance-coils embedded in a bed of insulating material, and these units could be mounted by means of bolts upon a desired part of the

machine. The patent provides in its specifications that the underside of the infolders have hollow spaces adapted to receive suitable heating means. A box is provided attached to the underside of the bed-plate, in which are placed suitable resistance-coils for generating heat by electricity. And it is immaterial whether the box is of hollow casting of an electric heating unit such as the Simplex heating unit, or whether it is a box forming a chamber into which a complete electric heating unit is installed. The electric heating mechanism in the bed of the appellant's top machine comprises an electric resistance-coil placed in a recess formed in the underside of the bed-plate and closed by a bottom plate which is clamped to the bed-plate. The ends of the coil project down through the bottom plate, where they are connected with the circuit wires. Thus the bed forms the box or head-plate for the coil instead of having the coil embedded in a separate and complete heating unit. This falls within the claims which provide "means within the bed-plate for heating the same."

We think the appellant's structure falls within the description of each of the claims and infringes the same.

We agree with the court below that the effort to show that one Brown, the predecessor in the business of the appellant, Margaret Heald, did in 1902 or 1903 employ Simplex or similar heating units in the folders of a folding machine, is not satisfactory to establish that fact. The correspondence indicates that it was not until 1908 that Brown learned how to make such a heating unit satisfactorily.

[3] Patent No. 972,820 is dated October 11, 1910, and was issued on the application filed on May 21, 1908. The inventor is William J. Beattie, the assignor of the appellee. This invention relates to two machines of the same type, for folding collar and cuff blanks. The object of the invention, as given by the patentee, is to construct a machine the folder-plates of which will be heated, and the folding and pressing of the goods will be over the edge of the die, while the die is upon the blank on the bed-plate of the machine. Claims 6 and 8 are involved, and are as follows:

(6) In a machine for folding collar and cuff blanks, a vertically movable bed-plate, a die of thin sheet material comprising a fixed section and a slidable section, said die adapted to clamp blanks upon the bed-plate, slidable folder plates adapted to fold the edges of said blanks over the edges of said die, means for raising the bed-plate to press the folded blanks against the folder plates, means for supporting and lowering said die, and connections operated by said means for moving the slidable die section endwise to lengthen the die as said die is lowered.

(8) In a machine for folding collar and cuff blanks, a die therefor of thin sheet material formed of a plurality of sections, one of which is slidable longitudinally of the die, a swinging die-head supporting said die, means engaging said slidable die section to move the same, and a connection attached to said moving means and hinged to a fixed part of the machine eccentric to the axis of oscillation of the die-head.

The construction here is for automatically expanding and contracting a partly-collapsible die. The new improvement in the art accomplishes a very material saving of time in the folding operation. By automatically expanding the die to full dimensions by the downward movement of the die into engagement with the blank on the bed, thus permitting the die to remain expanded throughout for the folding and pressing operations, and automatically contracting one end of the die by the upward movement of the die as it rises from the bed with the folded and pressed blank retained upon the die-plates, the inventor accomplishes the improvement.

The movement of the movable member of the templet is accomplished in one direction by a swing and in the opposite direction whereby the templet is expanded to maximum dimensions by means of a cam actuated by a link or rod pivoted upon the frame of the machine eccentrically to the axis of oscillation of the die-head. The appellant infringes this invention, but it is sought to escape infringement by reference to the prior-art patents, in which eccentric mechanism has been employed to expand or contract a collapsible die or templet for the purpose of withdrawing the templet from the folded edges of the blank before they are pressed. The prior art does not suggest expanding the die as it is lowered upon the bed, keeping it expanded not only during the pressing operation as well, but using it as a means for lifting the blank from the bed, and then contracting the die to permit a removal therefrom of the folded and pressed blank. This is accomplished by the present patent. The best reference referred to is Fenwick's patent, No. 688,460. The vital difference is that in the prior-art patents the die contracting and expanding mechanism was so constructed as to contract the movable templet plate or plates out from the infolding edges of the blank before those infolding edges were pressed, and in none of these do they show a construction employing a movable templet-plate which remains within the folded edge of the blank during the pressing operation, and then serves to raise the folded and pressed blank from the bed, and therefore is automatically withdrawn from the infolded edge of the blank to release the blank. In this respect, the improvement is new. The fact that these advantages seem to be much appreciated by the trade, and that this new method of folding has rendered obselete the prior method of collapsing the die before the folding operation, is strong evidence of an advance in the art, and we think indicates invention.

[4] Patent No. 972,495 is dated October 11, 1912, and was issued and granted to W. J. Beattie, the assignor of the appellee, on an application filed August 15, 1908. It relates to machines for folding collar and cuff blanks. The object of the invention was to construct a folding-machine, the infolders of which will be heated, and the folding and pressing of the goods will be over the edges of the die while the die is upon the blank on the bed of the machine. This patent relates to the Smith patent, No. 972,272, because it has to do with the most practical means for incorporating the heating resistance-coils in the folder. It was found that the Simplex heating units had to be made with thick castings, and that they were slow in conducting the heat to thin sheet-metal plates mounted on the infolder-blocks. The problem was to make the folder itself the housing for the resistance-coils instead of incorporating the coils in a separate complete unit to be attached to the folder-block. By dividing the folder-block into two parts, separately screwed or bolted together, one or both of the members thus formed was hollowed out forming, between the members, a chamber. The coil was mounted within this and projected out from beneath the two block members. Thus the inventor accomplished this problem. Claim 1 is involved, and reads as follows:

(1) In a machine for folding collar and cuff blanks, a heated bed-plate, a die adapted to press blanks upon said bed-plate, infolders adapted to move inwardly and fold the edges of the blanks over said die, each of said infolders being chambered and formed in two parts separably connected together, and an infolder plate attached to one of said parts, electric heating means within said chambers adapted to be supplied with current by electric wires from without, whereby the infolder plate of each infolder may be independently heated, means for moving said infolders to fold blanks over the die, and means for pressing the said blanks between the heated bed-plate and the folder-plates.

In appellant's machine we find each infolder-blank comprising a casting hollowed out on its underside, the thin bottom plates to complete the closing of the chamber for the heating-coil. The bottom member of the folder-block is thinner than the bot-

tom member of the folder-block shown in this patent, but it has in the appellee's device the appellant's two members complete—the chamber which receives the heating-coils in substantially the same manner called for by the claim. There is a difference in the form of the two members of the folder-block by the fact that the terminals of the coils are led out from between the block members at the end instead of at the side of the folder-block. But this does not avoid the claim of the patent in suit. We find nothing in the prior art which anticipated what was here accomplished.

[5] Patent No. 1,071,677 was dated August 26, 1913. It is on an application filed by Maitland and Beattie, appellee's assignors, on August 18, 1905. It relates to an improvement in a machine for folding collar-blanks, and consists of a novel construction and combination of parts. The invention relates to automatic and power machines as distinguished from hand-machines. It includes a bed and means for folding certain sides of a collar or cuff blank on one of the plain surfaces of the bed and the other parts on the under surface of the bed, whereby a much narrower blank, such as is used for the blanks of some collars, can be folded than is possible with a folding-machine which folds all sides of a blank simultaneously. The edges of the fabric blanks are inturned or folded over the former-plates by means of folder-plates movable to and fro on the surface of the bed, after which the former-plates movable to and fro on the head, commonly called folder-heads, withdraw from the folders, and the folders press between the folder-plates and the body to fold and press the edges of the blanks; the operation of the former or folder plates being the same as that of hand-machines formerly used. Claims 8 and 9 are involved, and are as follows:

(8) In a folding machine, the combination with two folder-plate sections, on one side of the machine, provided with a slide connection extending lengthwise of the plate sections, of a single actuating crank connected by a close-fitting connection with each section, whereby a circular motion is imparted to the plate sections, and means for operating the cranks, substantially as described.

(9) In a folding machine, the combination with two folder-plates adapted to fold one side of a blank and portions of two other and oppositely disposed sides, of a slide-connection between the plates extending lengthwise of their neighboring parts and transversely of the other parts which are adapted to fold portions of the opposite sides of the blank, a plate-actuating crank connected by a close-fitting connection with each of such folder-plates, whereby a circular motion is imparted to the plate sections, and means for operating the cranks, substantially as described.

By moving the infolder in a circular or arcuate path, the infolders at a corner of the collar can be overlapped in any desired direction and at any desired angle of one side edge of the blank with respect to the inbearing end edge of the blank. With the circular movement of the inventor's infolder, the infolder can be moved through an arc of ninety degrees, and, in case of an acute angle corner in a blank, the throw of the eccentric can be eliminated so that the last folded edge on the side or end of the blank, as it may be, is not thrown out beyond the outer edge of the blank. This shows novel construction that is made within the claims. The crank for each folder exercises, through the sliding connection, a controlling and guiding effect upon the other folder in accomplishing the circular movement. There is nothing in the prior art which shows such a relationship or result, nor is such a result accomplished. The principal prior patent relied upon is Fenwick's, No. 688,462. But Fenwick provides for a movement in two straight lines, one at right angles to the other, while the very essence of the construction set forth in the patentee's claim here is the production of a circular movement. The claims make this statement. There are no equivalents between the two mechanical devices provided for in this patent and in Fenwick's. They do not accomplish the same result, because the machine of the patent in suit produces a circular movement of the infolders, while the essential movement of the Fenwick patent is two straight-line movements at right angles to the other, or an L-shaped movement. Nor do they operate in the same manner. In producing the curved movement of the machine in the patent in suit, the eccentric guides the infolders along the curved path, while in the Fenwick machine the cranks have no guiding function with respect to the infolder, but merely push them inwardly and outwardly.

We think as to each of the patents in suit the appellee is the sole owner thereof, and that the appellant infringes the claims of each of the patents sued on.

[6] A defense of laches is interposed. Mere laches, unaccompanied by circumstances which amount to an equitable estoppel, will not shut out a party from all relief in a court of equity. On an application for a preliminary injunction, knowledge of the infringement and long-continued acquiescence therein may be fatal on a motion for such an injunction. However, on final hearing, it will not prevent the court from granting such relief as may be just and equitable. (*Taylor et al. v. Sawyer Spindle Co.*, 75 Fed., 801; 22 C. C. A., 208.) There is no testimony in this record which justifies the claim that the appellee is guilty of any laches which would justify a court of equity refusing to grant the relief prayed for in this bill of complaint.

We think these various patents have done much to advance the art, and the claims which we have found are infringed should be accorded the full rights of monopoly which were granted by the issuance of the patent in each instance.

Decree affirmed.

Interference Notices.

DEPARTMENT OF THE INTERIOR,
UNITED STATES PATENT OFFICE,
Washington, D. C., December 7, 1921.

Perfection Mfg. Co., its assigns or legal representatives, take notice:

An interference having been declared by this Office between the application of Haskins Bros. & Company, corner of Prospect and Grand streets, Sioux City, Iowa, for registration of a trade-mark and trade-mark registered August 22, 1916, No. 112,216, to Perfection Mfg. Co., 434 Land Title Building, Philadelphia, Pa., and a notice of such declaration sent by registered mail to Perfection Mfg. Co. at the said address having been returned by the post-office undeliverable, notice is hereby given that unless said Perfection Mfg. Co., its assigns or legal representatives, shall enter an appearance therein within thirty days from the first publication of this order the interference will be proceeded with as in case of default.

This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

WM. A. KINNAN,
First Assistant Commissioner.

DEPARTMENT OF THE INTERIOR,
UNITED STATES PATENT OFFICE,
Washington, D. C., December 10, 1921.

The Parker Supply Co., its assigns or legal representatives, take notice:

An interference having been declared by this Office between the application of the Massasoit Manufacturing Company, 156 Pocasset Street, Fall River, Mass., for registration of a trade-mark and trade-mark registered August 8, 1911, No. 83,004, to the Parker Supply Co., 250 Devonshire Street, Boston, Mass., and because of prima facie evidence in the record to the effect that the Parker Supply Co. is no longer in existence notice is hereby given that unless said the Parker Supply Co., its assigns or legal representatives, shall enter an appearance therein within thirty days from the first publication of this order the interference will be proceeded with as in case of default.

This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

WM. A. KINNAN,
First Assistant Commissioner.

Important Information.

In ordering manuscript copies much time will be saved if the order states specifically what is desired, viz:

Application as originally filed. (Petition, specification, oath, and drawings as received.) Application as amended. (Petition, specification, oath, and drawings with amendments entered.)

Application as allowed. (Petition, specification, oath, and drawings as passed by the Examiner for issue.)

Original application. (Facsimile petition, specification, oath, and drawings at present time.)

Specification as originally filed. (As received in Office.)

Specification as amended. (With amendments entered.)

Specification as allowed. (As passed by the Examiner for issue.)

Original specification. (Facsimile at present time.)

File-wrapper. (File-wrapper only.)

File-wrapper and contents. (File-wrapper, contents of record, including photoprints of any tracings or of prints within file-wrapper. In patented cases, printed copy of the specification and drawings of the patent is furnished.)

File-wrapper, contents, and drawings. (File-wrapper and all of the contents of record, including photoprints of any tracings, exhibits, or prints within the file-wrapper. In pending cases, photoprints of the pending drawings only, omitting any canceled. If patented, copy of the specification and drawings of the patent being furnished, photoprints are not made of the original drawings unless specially ordered. If canceled drawings are wanted, they must also be specially ordered.)

Assignment. (Give the liber and page of the record as well as the name of the inventor.)

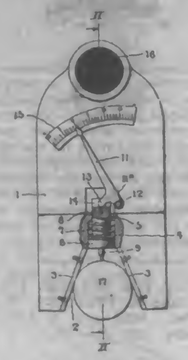
Printed publications in possession of the Office. (Give title and date of publication, also page and exact portion to be copied.)

Orders for copies of any other records not mentioned above must state specifically the exact paper to be copied.

NOTICE—DESIGN PATENTS.

When an application for a design patent is found allowable, the patent will be granted for the term asked in the application papers unless specific request has been made for notice prior to allowance so that the term may be extended. Hereafter the Office will delay allowance and notify the applicant ONLY in cases where a specific request is filed.

Condition of Applications Under Examination at Close of Business, December 17, 1921.



Room No.	Divisions, Examiners, and subjects of inventions. (Oldest new case, Dec. 6. oldest amended, Apr. 1.)	Oldest new application and oldest action by applicant awaiting office action. New.	Amended.	No. of applications awaiting action.

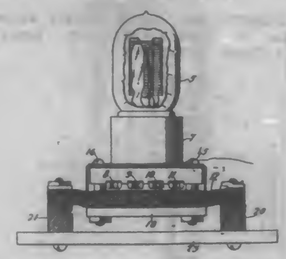
Total number of applications awaiting action, excluding Trade-Mark division, 59,393; Trade-Mark division, 6,907.

PATENTS

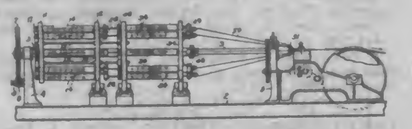
GRANTED DECEMBER 27, 1921.

1,401,119. DIAMETER-GAGE. ERIK H. ALDERSON, New York, N. Y., assignor to Carl E. Johansson, Eskilstuna, Sweden. Filed June 13, 1919. Serial No. 303,905. 2 Claims. (Cl. 33—178.)



1. A device of the character described comprising, a body portion having an inwardly converging straight sided recess therein, a plunger mounted in the body at the inner end of the recess and normally urged outwardly, a pin carried by the plunger at its outer end and projecting into the recess, a hand pivoted in the body and having an arm engaging the plunger, and a scale adjacent the free end of the hand, whereby the insertion of an article into contact with the sides of the recess will cause it to contact with the pin and thereby move the plunger to actuate the hand for indicating the size of the article.

1,401,120. TICKET-HOLDER. PIERRE ALLARD, Maisonneuve, Quebec, Canada. Filed Sept. 10, 1920. Serial No. 409,326. 2 Claims. (Cl. 206—40.)

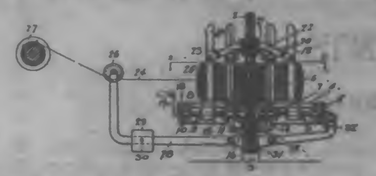


1. In a ticket holder of the character described in combination with the casing and cover; a ticket supporting plate; resilient means supporting said plate, said means consisting in a plurality of obliquely projecting flat springs, one of said springs being soldered to one end of said plate; and means integral with said resilient means adapted to engage said ticket supporting plate whereby the upward movement of said ticket supporting plate will be limited.

1,401,121. MOUNTING FOR VACUUM-TUBES. ROY M. ALLEN, East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed May 24, 1918. Serial No. 236,398. 3 Claims. (Cl. 250—27.)

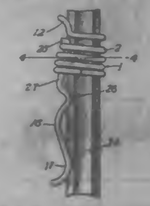
1. A repeater of electric currents having input and output terminals, and electrodes which maintain a relatively fixed space relation during the repeater operation and means for preventing external vibrations from appreciably changing the space relation of said electrodes.

1,401,122. WIRE-ROPE MACHINE. ALBIN E. ANDERSON, Oakmont, Pa., assignor of two-thirds to Eyvind M. Verner and James W. Macfarlane, Pittsburgh, Pa. Filed Apr. 17, 1920. Serial No. 374,597. 2 Claims. (Cl. 28—21.)



1. In a machine for making wire cable, the combination of a plurality of axially alined flier frames connected to rotate together, a plurality of bobbin frames journaled in each of said flier frames, the corresponding bobbin frames carried by the said flier frames being in alipement with each other, means associated with the journals of the bobbin frames carried by the first flier frame for twisting the individual wires into cable strands, means for conducting the said strands through the journals of the next succeeding bobbin frames and for twisting the wires from the bobbins of the second flier frame upon the said strands, and means for thereafter twisting the said strands into a complete cable.

1,401,123. ADJUSTABLE SWIFT. ALBIN E. ANDERSON, Oakmont, Pa. Filed Dec. 27, 1920. Serial No. 433,278. 5 Claims. (Cl. 242—84.)

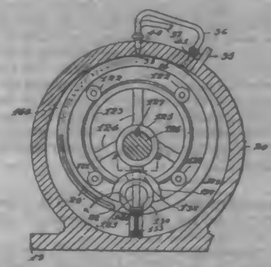


3. A swift comprising a rotatable support, screw shafts arranged radially on the said support and permanently geared to rotate together, and coil-supporting arms associated with the said screw shafts and adapted to be moved thereby, at least one of the said screw shafts having its

outer end formed for engagement with a wrench, whereby all of the said coil-supporting arms may be simultaneously

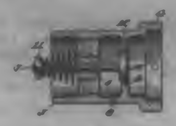
adjusted by applying a wrench to the end of one of the said screw shafts.

1,401,124. PENCIL-CLIP. GEORGE SEVERIN ADOLFSON, Philadelphia, Pa. Filed Apr. 11, 1921. Serial No. 463,475. 3 Claims. (Cl. 24—11.)



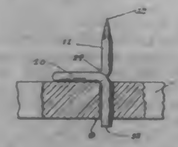
1. An article clip embodying a tongue and a coil surrounding a portion of the tongue, the tongue being provided intermediate its ends with an article-engaging shoulder forming an incline in that portion of the tongue which extends within the coil, the coil being expansible to ride along the incline, thereby to tighten the coil about an article, the shoulder rendering the free end of the tongue adjustable with respect to an article, independently of that portion of the tongue which forms the incline.

1,401,125. HALOGENATION OF ANTHRAQUINONE DERIVATIVES. FREDERICK WILLIAM ATACK, Manchester, England, and GEORGE ROBERTSON, Couper Angus, Scotland. Filed June 3, 1921. Serial No. 474,756. 14 Claims. (Cl. 23—24.)



1. The process of halogenating anthraquinone derivatives in a hot aromatic liquid in presence of a neutralising agent.

1,401,126. COMBUSTION-ENGINE. ARTHUR A. AUST, Bedford, Ohio. Filed Mar. 1, 1917, Serial No. 151,661. Renewed Apr. 6, 1921. Serial No. 459,083. 23 Claims. (Cl. 123—16.)



1. In a combustion engine, the combination of a single compression chamber provided with a rotatable ring, a plurality of combustion chambers, means controlled by said ring for regulating the supply of fuel from the compression chamber to said combustion chambers at stated intervals.

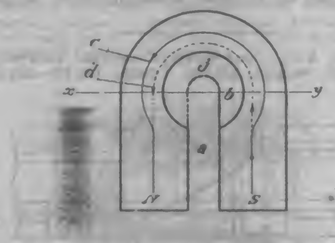
1,401,127. CARBURETER ATTACHMENT. JACOB S. BAER, North Venice, and MICHAEL E. LOGUE, East St. Louis, Ill. Filed Sept. 6, 1921. Serial No. 496,633. 1 Claim. (Cl. 261—145.)

An air valve attachment for carbureters including a substantially cylindrical member, a partition extending across the interior of said cylindrical member and spaced from the ends thereof, a web also extending across the interior of the cylindrical member and spaced from the ends thereof, a valve rod having its bearing in said web, a valve on one end of said rod, said partition being formed with a valve seat and an aperture adjacent thereto, an annular offset portion on one end of the cylindrical member providing a shoulder for engagement with a portion of the carbureter and means connected therewith for attachment to a carbureter.

1,401,128. DEVICE FOR HOLDING ICE UPON THE RUNNING-BOARDS OF VEHICLES. WARREN D. BARTON, Waco, Tex. Filed Jan. 3, 1921. Serial No. 434,778. 1 Claim. (Cl. 224—29.)

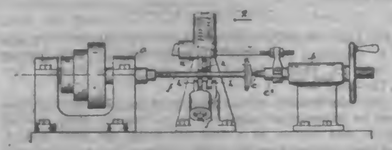
In a device for securing cakes of ice upon the running board of a vehicle, the combination with a running board provided with a substantially vertical opening of a member provided with a downwardly extending portion adapted to engage in said opening, said member flatly engaging the upper surface of the running board, and a prong extending upwardly from and secured to said member.

1,401,129. MINER'S CARBID-LAMP. IVIN I. BILLINGS, Marial, Oreg. Filed Aug. 7, 1917. Serial No. 184,895. Renewed May 5, 1921. Serial No. 467,126. 1 Claim. (Cl. 48—4.)



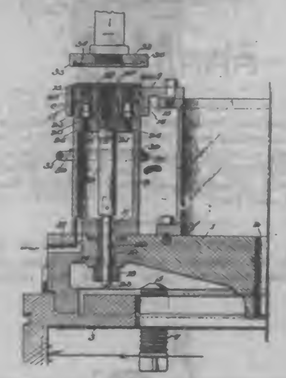
In a carbid lamp for miners, a carbid receptacle having a tubular casing rising upwardly therefrom and being detachably connected thereto so as to allow ready access to the carbid receptacle, said tubular casing having a water chamber therein provided with an opening of communication with said receptacle, an auxiliary casing centrally disposed in the tubular casing, the auxiliary casing forming a collection chamber, the lower end of said auxiliary chamber being restricted, the upper end of the auxiliary chamber being restricted and terminating in a burner, a cap for the upper end of the tubular casing carried by said restricted burner portion, a needle valve disposed in the water chamber between the auxiliary casing and the wall of the tubular casing, the restricted ends of the auxiliary casing being detachably carried by the auxiliary casing, a flanged bushing screwed into the lower end of the tubular casing and forming a closure

for the water chamber, said detachable connections of the restricted ends of the auxiliary casing, the lower



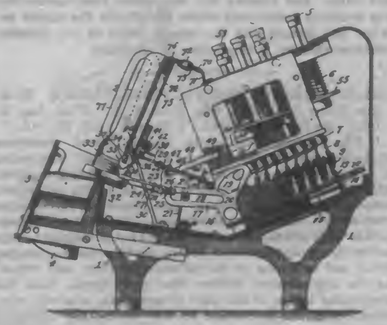
end of the tubular casing and the flanged bushing allowing the various parts to be easily and quickly assembled or dismassembled for cleaning purposes.

1,401,130. HORSESHOE-MAGNET. FREDERIC BILLON and JACQUES BOHLI, Solothurn, Switzerland, assignors to Firm "Scintilla," Solothurn, Switzerland. Filed Aug. 22, 1919. Serial No. 319,147. 1 Claim. (Cl. 175—21.)



A horse-shoe magnet constructed of a cylindrical steel bar bent to form a U-shaped cylindrical body, a parallel-sided slot symmetrically bifurcating said body from one end and terminating in a hole in the yoke of said body parallel to said slot and perpendicular to said axis, said hole being of greater width than said slot in a direction perpendicular both to said axis and said slot sides.

1,401,131. WORK-REST. WILLIAM A. BLACKBURN, Detroit, Mich. Filed May 24, 1920. Serial No. 383,773. 8 Claims. (Cl. 82—39.)



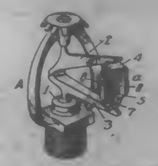
1. In a work rest, in combination with the tail piece of a lathe, an adjustable support for a piece of work, a gripping member adapted to hold the work against said support, means carried by said tail piece adapted to cooperate with said gripping member so as to elevate the same from the work coincident with the withdrawal of the tail piece.

1,401,132. PAPER-CONTAINER MACHINERY. JOSEPH T. BOND, Fulton, N. Y., assignor to Sealright Co., Inc., Fulton, N. Y., a Corporation of New York. Filed July 17, 1918. Serial No. 245,350. 33 Claims. (Cl. 93—55.)

1. In paper container machinery, a mandrel having an expansible normally contracted head, in combination with a relatively-stationary tube-guiding and abutment-wall surrounding said head, and means for operating on a tube end projecting from the mandrel and wall, said mandrel and wall arranged for the longitudinal application and removal of paper tubes on the mandrel and through the wall.

1,401,133. COIN-DELIVERY APPARATUS. EDWARD J. BRANDT, Watertown, Wis. Filed Jan. 25, 1918. Serial No. 213,729. 20 Claims. (Cl. 133—4.)

1. In a machine of the character described, the combination of a coin receptacle, a longitudinally movable coin pusher mechanism, operatively associated therewith to eject a coin, said mechanism having a fixed upward extension, vertically movable, key actuating means for the coin pusher, a vertically movable rocker arm to be engaged by the coin pusher mechanism, an anti friction roller carried by the rocker arm for direct engagement



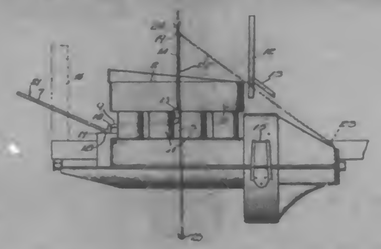
with the upward extension of the coin pusher mechanism, and locking means operatively associated with the coin pusher mechanism adapted to be controlled by the number of coins in the receptacle.

1,401,134. COMBINED CURRYCOMB AND BRUSH. JUSTUS BUTTERFIELD, Warren, Ind. Filed July 19, 1921. Serial No. 485,469. 4 Claims. Cl. 119—85.)

1. A grooming device for animals comprising a longitudinally extending head, brush tufts carried by one face of the head, a laterally extending resilient plate carried by one longitudinal edge of the head, a plurality of longitudinally extending comb bars carried by the lower surface of said plate.

1,401,135. FIRE-EXTINGUISHER. BYRON B. CARTER, Hinsdale, Ill., assignor to Charles D. Allan, Chicago, Ill. Filed June 29, 1916. Serial No. 106,606. 7 Claims. (Cl. 169—39.)

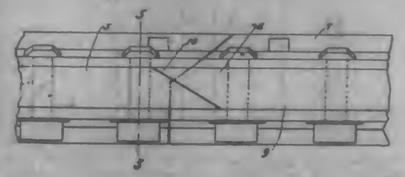
1. A fusible element comprising overlapping members soldered together, a shoulder formed on one of said members against which the overlapping end of the other member bears, flanges on one of said members which embrace the lateral edges of the other member constructed and arranged to support said members in alinement with each other, and loading for the solder joint connecting said members comprising solder which fills the spaces between said flanges and the lateral edges of the member embraced thereby, substantially as described.



1,401,136. METHOD OF CALCINING ALUNITE. HOWARD FIELD CHAPPELL, New York, N. Y. Filed Aug. 2, 1920. Serial No. 400,640. 3 Claims. (Cl. 23—13.)

1. The process of calcining alunite, which comprises subjecting the alunite during the process of calcination to a temperature in excess of that at which potassium sulfate volatilizes until substantially all of the potassium compounds contained therein are converted into potassium sulfate, and substantially all of the aluminum compounds into aluminum oxid, the mass undergoing calcination being agglutinated at its surface by the partial fusion and softening of the potassium sulfate, and removing the agglutinated surface film, as it forms, from the volatilizing action of the high temperature, whereby volatilization of the potassium sulfate during the calcining operation is substantially avoided; substantially as described.

1,401,137. METHOD OF CALCINING ALUNITE. HOWARD FIELD CHAPPELL, New York, N. Y. Filed May 28, 1918. Serial No. 236,981. Renewed Oct. 29, 1921. Serial No. 511,447. 11 Claims. (Cl. 23—13.)



4. The method of calcining alunite and the like, which comprises heating the alunite, after the greater portion of the fumes of oxids of sulfur have been emitted therefrom, by effecting combustion of a suitable fuel in the presence thereof.

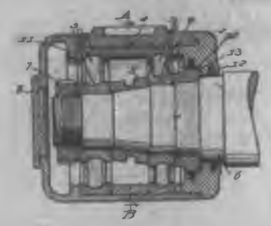
1,401,138. ENGINE-LIFTER. CLARENCE C. CHASE, Buda, Ill. Filed May 26, 1919. Serial No. 299,758. 6 Claims. (Cl. 294—82.)

1. The herein described lifting tool comprising a lever having an end bent off substantially at right angles to the body of the lever and adapted to be projected through an automobile engine between the cylinders thereof, the lever formed with a downwardly curved heel adapted, in use to bear upon the forward end of the engine, said bent off end adapted to receive the lower ends of chains adapted to rise to the hook of a suitable hoist, the free end of the lever when in use projecting forward from the front end of the engine a suitable distance, so that the rear end of the engine beyond the point between the cylinders can be readily counterbalanced by an operator.

1,401,139. RAIL. JOHN CLANCY, Kenner, La. Filed Oct. 15, 1920. Serial No. 417,221. 1 Claim. (Cl. 238—231.)

In a scarf joint, rail sections, each of said rail sections having its base portion cut at an oblique angle, the cut portion extending from one edge of the base of the rail and terminating at a point adjacent to the web thereof, said angular cut merging into a relatively straight cut, extending from the web to the opposite edge of the rail, the tread of the rail section having a diagonal cut in a direction opposite to the oblique cut in the base, the surfaces formed by the latter diagonal cuts coöperating to prevent lateral movement of one section with respect to the adjacent section.

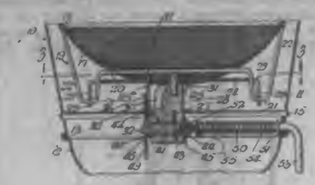
1,401,140. FLOAT-CONTROLLED OIL-GAGE. VINSON S. CULWELL and OTTO A. BIER, Warrior, Ala. Filed Dec. 21, 1920. Serial No. 432,215. 1 Claim. (Cl. 73—82.)



The combination with a casing of an automobile engine and an instrument board of an automobile body located above said engine, of a float controlled oil level indicating gage carried by said engine casing, said gage comprising a tubular casing having its upper end disposed in a recess of the instrument board and its lower end in communication with the interior of the engine casing, the lower portion of the tubular member being enlarged there-

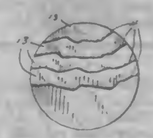
by forming an oil chamber, a float disposed within said oil chamber, a rod carried by said float and extending upwardly through the tubular member and outwardly through a slot at its upper end, a cap for closing the upper end of the tubular member, a scale plate secured to the instrument board and provided with a slot registering substantially with the slot in the upper end of the

tubular member, the upper end of said float carried rod being bent and extending through the slot in the scale plate at substantially a right angle and terminating in a pointer for coöperating with the scale on said scale plate, said pointer being formed integral with the rod and disposed at a right angle to and in the same plane as the portion of the rod extending through the slot in the plate.



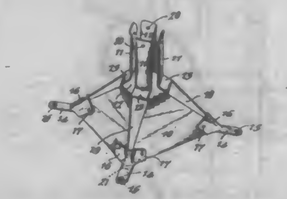
1,401,141. JOURNAL-BOX FOR RAILWAY-CARS AND SIMILAR VEHICLES. AXEL DANIELSSON, Stockholm, Sweden, assignor to Nordiska Kullager Aktiebolaget, Gottenborg, Sweden. Filed Sept. 11, 1920. Serial No. 409,696. 6 Claims. (Cl. 64—30.)

1. In a journal box for railway cars and similar vehicles, a casing having an inner chamber mainly of cylindrical form, a cover for the casing, inner and outer antifriction bearings mounted in the chamber, means separating said bearings, a shoulder arranged in the casing against which the outer race ring of the outer bearing rests, a removable ring arranged between the outer race ring of the inner bearing and said cover, a journal extending into the casing, a member mounted on the journal and bearing against the inner race ring of the outer bearing, and a sleeve mounted upon the journal and bearing against the inner race ring of the inner bearing.



1,401,142. FLOUR-SIFTER. JAMES H. DEAN, Chicago, Ill. Filed Sept. 10, 1921. Serial No. 499,791. 18 Claims. (Cl. 83—60.)

1. A flour sifter comprising a sifter casing, a sieve basket removable from said casing, a diametric member fixed at its ends to the top of the basket and having an intermediate part and end loops depending below said intermediate part, a bar mounted in the casing and capable of oscillation in a horizontal plane about a point mid-

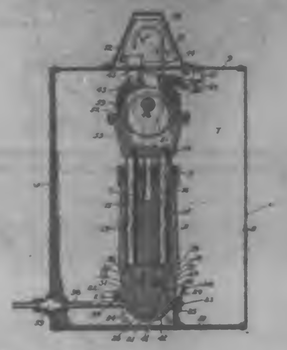


way of its length, said bar having stirrups adapted to be engaged by said depending loop, and means for oscillating said bar.

1,401,143. SOUND-BOX DIAPHRAGM. PATRICK B. DELANY, South Orange, N. J. Filed Oct. 20, 1919. Serial No. 331,974. 6 Claims. (Cl. 181—32.)

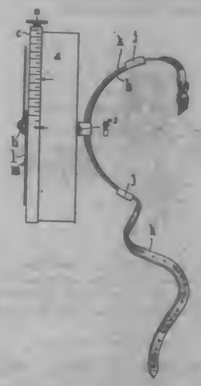
6. A diaphragm for sound boxes comprising sheets of fibrous material joined together by a plastic compound containing a suitable vegetable gum which becomes adhesive under the action of heat and is normally flexible.

1,401,144. HOLDER FOR CHRISTMAS TREES AND THE LIKE. WILLIAM DICKS, Buffalo, N. Y., assignor to Dicks Stamping Co., Inc., Buffalo, N. Y., a Corporation of New York. Filed Sept. 24, 1920. Serial No. 412,432. 3 Claims. (Cl. 248—38.)



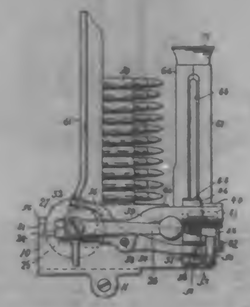
1. A holder of the character described, comprising a pyramidal base having its sides separated by apertures arranged in line with its corners, and upright holding jaws rising from the base and arranged in line with said apertures.

1,401,145. SIGHT-FEED OIL-PUMP. OSCAR EVERSON, Hibbing, Minn. Filed July 26, 1920. Serial No. 399,015. 6 Claims. (Cl. 184—35.)



6. In a lubricator, a reservoir, a valve block carried by and arranged in the reservoir, a cylinder block including a pair of cylinders rotatably mounted on said block, a port formed in the lower end of each cylinder, inlet and outlet ports formed in said valve block, the inlet port communicating with said reservoir, an outlet pipe communicating with the outlet port, a sight feed device includ-

ing a pair of pipes, ports formed in said valve block communicating with said pipes and arranged to aline with the ports in said cylinder block, a pair of sliding plungers arranged in said cylinders, one of said cylinders and one of said plungers forming a means for forcing the lubricating oil to the sight feed device, and one of the plungers and cylinders forming the means for receiving the oil



from the sight feed device and for forcing oil to the bearing to be lubricated, a pair of shafts arranged in axial alinement, a cam formed on one of the shafts, a cam strap carried by the plungers and receiving said cam, manual means for operating one of said shafts, mechanical means for operating the other shaft, a ratchet wheel secured to one of the shafts, and a dog mechanism carried by the other shaft.

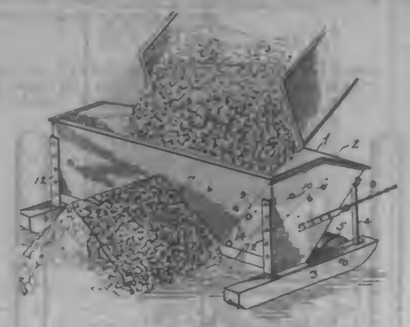
1,401,146. DEVICE FOR MEASURING THE RANGE OF MOVEMENT OF HUMAN JOINTS. WILLIAM WILLIAM PHILLIPS FALCONER, London, England. Filed Mar. 26, 1919. Serial No. 285,204. 6 Claims. (Cl. 33—207.)

1. A device for indicating the range of angle of movement of human joints and adapted to be attached to a human limb in such a manner as not to cause injury thereto comprising in combination an indicator graduated so as to indicate the degrees of an arc or circle such indicator being flanged to fit upon a casing in the center of which an arbor is supported, a weighted arm suspended in the casing from the said arbor, and a pointer adapted to register with the graduations of the indicator and keyed to a portion of the arbor which projects beyond the face of the casing.

1,401,147. LOADING FEED-BELTS FOR MACHINE-GUNS. HERBERT H. FARR, U. S. Army. Filed Dec. 30, 1918. Serial No. 268,980. 12 Claims. (Cl. 86—48.) (Filed under the act of Mar. 3, 1883, 22 Stat. L., 625.)

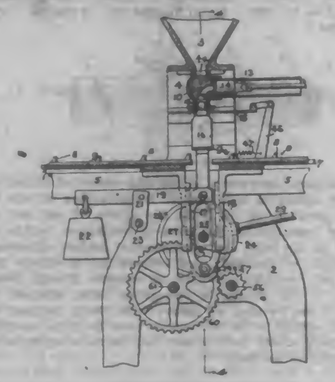
1. In a device of the class described, a receptacle for shell supporting links comprising a tubular member having a flaring intake, and a stop within the intake to control the entrance of the links into the receptacle.

1,401,148. TIRE. WILLIAM G. FORDING, Cleveland, Ohio. Filed June 19, 1916. Serial No. 104,390. 7 Claims. (Cl. 152—13.)



1. An open tire or tire shoe having a fabric portion composed of tire-forming material extending in unbroken succession back and forth from the rim portion on one side to the rim portion on the other side so as to form a plurality of layers, said material being in the form of a sheath extending circumferentially entirely around the tire and having its inner and outer ends terminating in the inner and outer layers and separated by at least one complete layer.

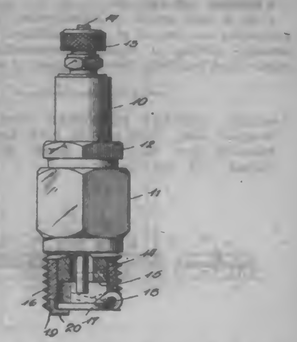
1,401,149. COMBINED SPREADER AND ROLLER. HARRY C. FOSTER, Dayton, Ohio, assignor to The Burch Plow Works Company, Crestline, Ohio, a Corporation of Ohio. Filed Jan. 27, 1920. Serial No. 354,409. 9 Claims. (Cl. 94—44.)



1. An apparatus for temporarily depositing material in a measured mass to be subsequently recollected, comprising a traveling hopper to receive the material to be deposited, means for regulating the contour and proportions of the deposited mass, whereby the material is

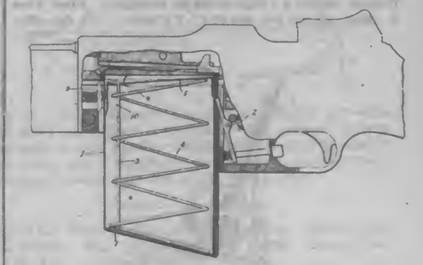
deposited in measured quantity and surfacing means moving in unison with the hopper to prepare the surface

operated over to receive the deposit whereby the subsequent recollection of the deposited material will be facilitated.



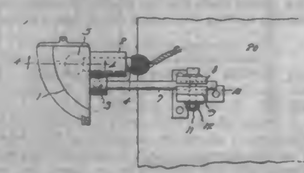
1,401,150. MACHINE FOR FILLING BOTTLES, &c. JOHN F. GEYER, Philadelphia, Pa. Filed Sept. 1, 1917. Serial No. 189,304. 10 Claims. (Cl. 226—95.)

1. In a machine of the character stated, the combination of a hopper, a nozzle below the hopper, gravity actuated means to raise a receiving vessel into adjustment and close relation with the nozzle, a cylinder, a valve device between the hopper and the nozzle for shutting off the direct communication between said parts but providing communication alternately from said parts to the cylinder, a plunger in the cylinder for withdrawing the material through the valve into the cylinder and discharging the material from the cylinder through the nozzle, and power devices for controllably lowering the gravity actuated means and receiving vessel away from the nozzle.



1,401,151. SPARK-PLUG. MICHAEL J. DI GIACOMA, Wilmington, Del. Filed Apr. 22, 1921. Serial No. 463,594. 2 Claims. (Cl. 123—169.)

1. A spark plug comprising a shell, a chamber in the lower end thereof, a central electrode projecting into said chamber, a disk hinged to the wall of said chamber forming a loose fit therewith, a stop member secured to

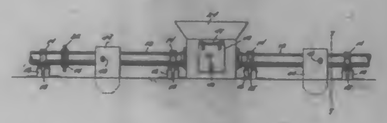


the end of said shell and projecting below said disk to prevent the same from swinging outwardly beyond said shell.

1,401,152. CARTRIDGE-HOLDER. SAMUEL G. GREEN, U. S. Army. Filed July 2, 1919. Serial No. 308,301. 6 Claims. (Cl. 42—50.) (Filed under the act of Mar. 3, 1883, 22 Stat. L., 625.)

1. In a cartridge magazine having a follower and a follower spring therein, a spacing means for shortening the length of such magazine, such means extending the depth of the magazine and engaging within all the forward loops of the follower spring and passing through the follower.

1,401,153. ADJUSTABLE AUTO-LAMP. ARTHUR HALLIWELL, Cleveland, Ohio. Filed May 14, 1921. Serial No. 469,415. 1 Claim. (Cl. 240—7.)



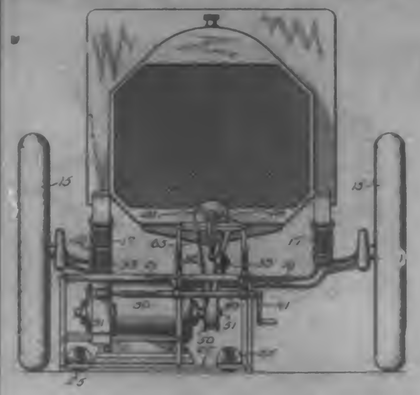
A lamp comprising a triangular casing having closed top and sides and a glass bottom, one side wall of the casing having a tubular boss forming a socket, a lamp in said socket, a rod secured to the said wall beside said socket, and a clamp in which the rod is held.

1,401,154. SOLDERING-FLUX. HENRY HESS, Philadelphia, Pa. Filed Jan. 11, 1919. Serial No. 270,618. 6 Claims. (Cl. 148—25.)

1. As a new article of manufacture, a soldering flux containing an amount of metal sufficient only to form a metallic coating of nearly immeasurable thickness to receive and facilitate the application of solder.

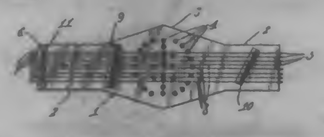
1,401,155. ROTARY CONVEYER. FRANK C. JACOBY, Newport, Ark. Filed Jan. 29, 1919. Serial No. 273,869. Renewed Aug. 22, 1921. Serial No. 494,373. 14 Claims. (Cl. 198—213.)

1. In a device of the class described, a revoluble casing, means for feeding material to the interior of the casing, spiral conveyers in said casing disposed in opposite directions therein from said feeding means, and discharge means in said casing remote from said feeding means.



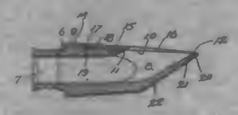
1,401,156. LAWN-MOWER. CHARLES FRANCIS JENKINS, Washington, D. C., assignor to Moto-Mower Company, Detroit, Mich., a Corporation of Michigan. Filed June 5, 1920. Serial No. 386,718. 3 Claims. (Cl. 56—20.)

1. The combination with a lawn mower frame having a guiding handle, an internally geared ground wheel, and a motor mounted on the frame of a rotary cutter shaft provided with a loose pinion meshing with the ground wheel, means operable from the guiding handle for compelling the cutter shaft and its pinion to rotate together, and means for driving the cutter shaft from the motor.



1,401,157. POWER TAKE-OFF MECHANISM. VANE B. KORNER, La Grange, Ill. Filed Sept. 7, 1920. Serial No. 408,592. 8 Claims. (Cl. 180—53.)

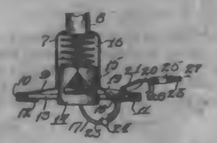
1. In a device of the kind described, the combination of a framework, a generator mounted on the framework, a pulley on the generator shaft, a second frame mounted on the framework and adapted to be raised and lowered relative thereto, a shaft journaled in said movable frame and having means for connecting with the engine shaft of a power driven vehicle, a pulley on the last named shaft, a belt connection between the two pulleys whereby power is transmitted from the shaft connected with the engine to the generator shaft and means permitting the shaft journaled in the movable frame to swing about a



vertical axis without affecting the driving connection between the two pulleys, substantially as described.

1,401,158. HARP. FRANKLIN P. KENT, Lyons, Kans. Filed July 15, 1920. Serial No. 396,365. 2 Claims. (Cl. 84—284.)

1. A musical instrument of the class described including a hollow elongated body, means for attaching strings to the end portions of the body, the means at one end of the body constituting the keys, a transverse bridge at one end of the body, and supplemental bridges extending transversely of the body and coöperating to divide the strings into portions arranged in separate groups, those portions of the strings in one group being adapted to produce tones varying an octave from those portions of the same strings in the next group, there being an opening in the body under each group and communicating with the interior of the body.



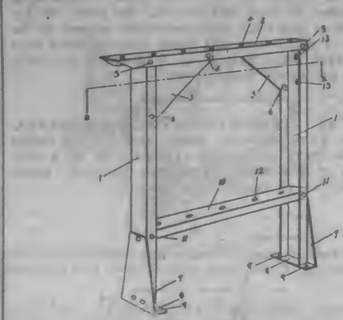
1,401,159. MOUTHPIECE FOR REED INSTRUMENTS. WILLIAM LEWERENZ, St. Louis, Mo. Filed May 31, 1921. Serial No. 473,819. 3 Claims. (Cl. 84—383.)

3. A mouth piece for reed instruments comprising a body portion formed of hard rubber, said body portion having a tapered dove tailed groove formed in its upper face, a bore formed in said mouth piece, a chamber formed in said mouth piece and communicating with said bore, an opening formed in said mouth piece and communicating with said chamber, a metallic facing

adapted to be inserted in said dove tailed groove, an opening formed in said facing and adapted to register with said chamber, and a downwardly projecting lip formed integral with said facing.

1,401,160. LUBRICATING-CAN. GUSTAVE LIDSKEN, Chicago, Ill. Filed Mar. 9, 1918. Serial No. 221,421. 7 Claims. (Cl. 221—47.)

1. An oil can comprising an oil container, a removable spout cap lockingly engaged thereon, ejecting means therein, a fulcrumed lever on said cap for actuating said ejecting means for forcing oil from the oil can, and means on said lever for engaging the spout cap for locking the ejecting means when the oil can is not in use.

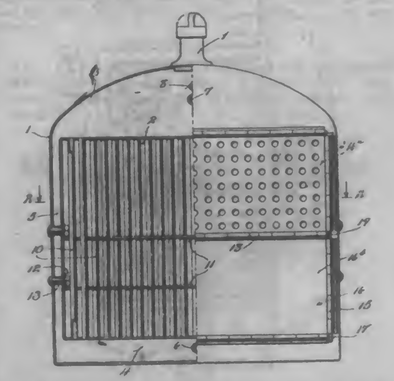


1,401,161. OIL-CAN-SPOUT CLOSER. GUSTAVE LIDSKEN, Chicago, Ill. Filed Apr. 29, 1920. Serial No. 377,442. 1 Claim. (Cl. 221—68.)

The combination with an oil can spout, of a member engaged thereon, means for clamping said member in place on said spout, arms integrally formed on said member, a pin supported by said arms, a lever pivotally engaged on said pin, a flange integrally formed at an angle on the end of said lever, a cap formed thereon, a closure pad seated in said cap, means struck from said flange to hold said closure pad in place, and a spring coiled around said pin and engaging said spout and lever to normally hold said lever in a position wherein said closure pad is adapted to seat over the end of said spout to close the same.

1,401,162. BENCH-PEDESTAL. JOHN H. LINDSEY, Sr., Otsego, Mich., assignor to Hughes Steel Equipment Co., Allegan, Mich. Filed Mar. 8, 1921. Serial No. 450,664. 4 Claims. (Cl. 144—286.)

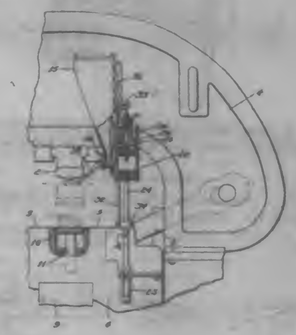
1. In a bench pedestal, the combination of a pair of uprights of channel cross section disposed inwardly, a top piece of channel cross section disposed facing inwardly and with its flanges embracing the upper ends of said uprights and secured to the flanges thereof, a cross member of channel cross section disposed facing downwardly with its ends abutting the uprights between the flanges thereof and with its flanges secured to the flanges of the uprights, triangular braces disposed in the angles of said uprights and top cross piece with their edges abutting the same and secured to the adjacent flanges thereof, said braces being disposed in a diagonally opposed relation, and foot pieces secured on the outer sides of said uprights and having horizontally disposed



flanges at their lower ends extending below said uprights and providing means for attaching the pedestal to the floor.

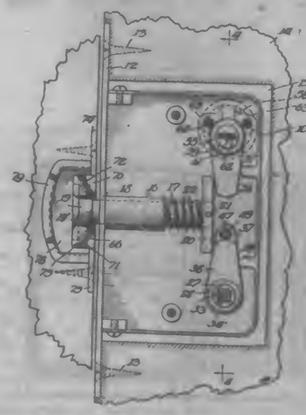
1,401,163. COMBINED BED-SPRING FRAME AND BEDSTEAD. HARRY LITVAK, New York, N. Y. Filed July 16, 1920. Serial No. 396,686. 5 Claims. (Cl. 5—65.)

1. In a collapsible bed spring frame, hinged end rails and sides comprising a projecting arm secured to said end rails, a side member adjustably connected to one of said arms, and a detachable section arranged to connect said side member with the other of said arms.



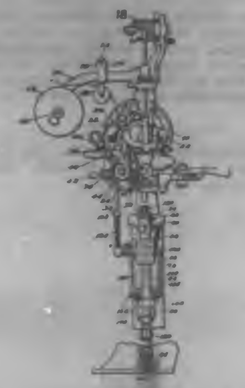
1,401,164. WATER-COOLING RADIATOR. JACOB LOHN, Appleton, Wis. Filed Aug. 18, 1919. Serial No. 318,132. 3 Claims. (Cl. 257—129.)

1. In a radiator, a frame, the upper and lower portions of the same forming upper and lower water chambers respectively, a plurality of vertical tubes in the



frame and connecting the water chambers to circulate water therethrough, and a substantially horizontal spacing plate disposed between the water chambers, said plate having a plurality of spaced holes corresponding to the number of tubes and receiving the same, the opposite ends of said plate being detachably secured to the side walls of said frame, said plates when detached from the side walls being movable up or down on the tubes to permit free access to the tubes.

1,401,165. PREPARATION OF HEEL-BLANKS. THOMAS LUND, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Feb. 12, 1919. Serial No. 276,572. 19 Claims. (Cl. 12—48.)

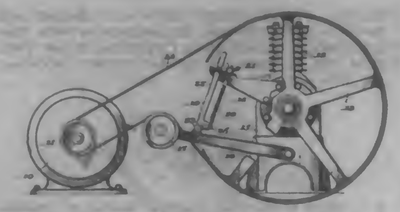


6. The combination with means for applying dry adhesive to a face of a substantially dry heel blank, of means for engaging the said face and pressing the adhesive upon it with sufficient pressure to cause the adhesive to adhere to the blank.

1,401,166. DOOR-LOCK. WILLIAM A. LUBIN, New Orleans, La. Filed Apr. 26, 1921. Serial No. 464,546. 9 Claims. (Cl. 70—29.)

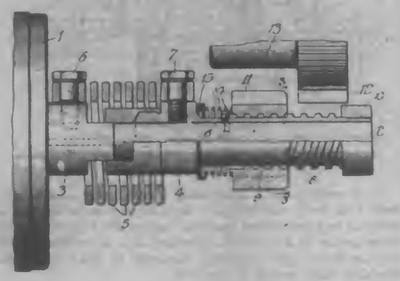
2. In locking mechanism of the class described, the combination of a lock frame, a locking bolt extending into said frame from the exterior thereof, a sleeve forming part of the lock frame for receiving and guiding said bolt, an abutment at the inner end of said bolt, a spring between said abutment and the inner end of said sleeve tending to hold said bolt outwardly, a stem extending into said lock frame, an arm extending from said stem behind said bolt abutment, turning of said stem causing swing of said arm against said abutment and outward shift of said bolt against the force of said spring, and a pin adapted to be shifted into the path of said arm for preventing rotation thereof.

1,401,167. LASTING-MACHINE. ALBERT A. MACLEOD, Swampscott, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Apr. 7, 1917. Serial No. 160,655. 78 Claims. (Cl. 12—2.)



1. In a machine for lasting shoes which have an outwardly extending upper margin and a sole margin projecting beyond the bottom of the last, the combination of means supporting the bottom of the sole, means against which the shoe may be pressed to hold the projecting margin of upper against the edge face of the sole, and means, operative while the upper is so held, for wiping the upper down the side of the last toward the sole and against the top face of the projecting margin of the sole to tension the upper.

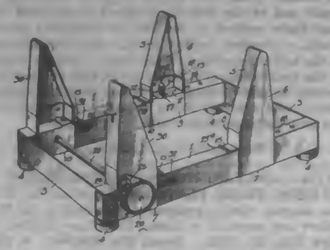
1,401,168. CHECK-PROTECTOR. FRANK R. MCALLISTER, Minneapolis, Minn. Filed May 25, 1921. Serial No. 472,357. 4 Claims. (Cl. 101—24.)



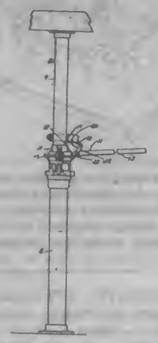
1. A mutilating instrument comprising a member having slightly diverging arms connected at one of their ends and adapted to move toward and from each other, and a mutilating roller mounted upon each of said arms and disposed between the same with its axis extending longitudinally of said arms, one of said rollers being longitudinally movable with respect to the other.

1,401,169. BELT-TIGHTENING MECHANISM. CHARLES L. MCCORN, Detroit, Mich., assignor, by mesne assignments, to The Isko Company, Chicago, Ill., a Corporation of Delaware. Filed Jan. 21, 1918. Serial No. 213,014. 11 Claims. (Cl. 64—5.)

1. The combination with a driving belt, of a tightening pulley bearing thereon, a stationary bracket, and means connecting said pulley with the bracket to automatically tighten the belt and retain the pulley in tightening position.



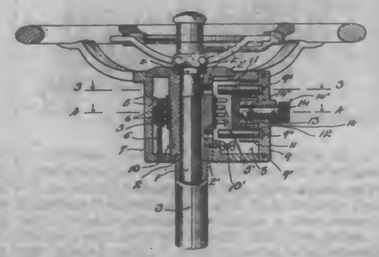
1,401,170. ENGINE-STARTER. WILLIAM L. MCGRATH, Elmira, N. Y., assignor to Eclipse Machine Company, Elmira, N. Y., a Corporation of New York. Filed Oct. 20, 1920. Serial No. 418,265. 6 Claims. (Cl. 74—7.)



1. An engine starter drive including a rotatable shaft having a screw-threaded portion and a plain portion, and a driving member having a bore with a screw thread, such member being normally positioned on the plain portion of the shaft with its screw threads adjacent the screw-threaded portion but out of register therewith and adapted to engage threads when the shaft is rotated.

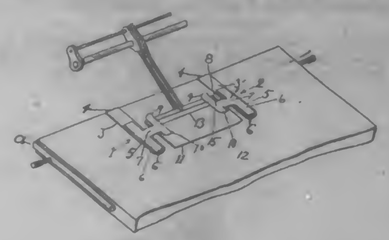
1,401,171. BINDER-RACK. FRED L. MANNY, Benton Harbor, Mich., assignor to Baker-Vawter Company, Benton Harbor, Mich., a Corporation of Michigan. Filed Aug. 5, 1918. Serial No. 248,298. 8 Claims. (Cl. 45—57.)

2. In a binder rack, a rectangular frame, a pair of front posts slidingly mounted on the side members of said frame, means for securing said posts to said side members, a pair of rear posts also slidingly mounted on the side members of said frame, a pair of racks fixed respectively to the said side members and a manually operable train of gearing mounted upon said rear posts and arranged to coöperate with said racks to shift such posts in unison.



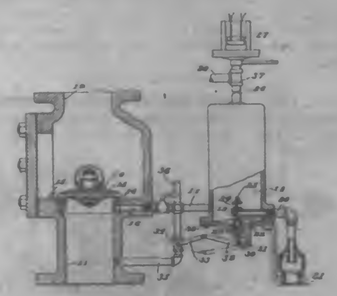
1,401,172. JACK-ACTUATING LEVER. CHARLES M. MARKHAM, Milwaukee, Wis. Filed Nov. 15, 1919. Serial No. 338,408. 7 Claims. (Cl. 254—106.)

1. A jack actuating lever, comprising a collar adapted to be temporarily associated with the member to be lifted, a clamping jaw carried thereby, a lever, and a linked connection between the lever and the collar for moving the jaw and the collar into effective lifting engagement with said member.



1,401,173. LOCK FOR AUTOMOBILE STEERING MECHANISM. JOSEPH MARBEL, Milwaukee, Wis. Filed June 2, 1921. Serial No. 474,331. 2 Claims. (Cl. 70—129.)

1. A steering gear lock comprising an actuating shaft, a head secured thereto having a locking aperture therein,

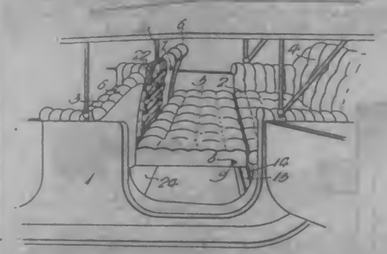


a dial flange extending from its upper end, notched tumbler disks rotatably mounted upon the head, an open ended hollow wheel hub loosely mounted upon the head, the open end of the hub being closed by the dial disk, a pick-up finger carried by the hub for actuating the series of disks, a plunger carried by the hub for engagement with the locking aperture of the head, a tongue extending from the plunger adapted to enter the disk notches, a plate extending rearwardly from the tongue having a lateral pin extension, and a rotary sleeve mounted in the hub having a cam slot for engagement with the plate pin.

1,401,174. ENVELOP-HOLDING ATTACHMENT FOR PRINTING-PRESS PLATENS. CHARLES H. MARTIN, Los Angeles, Calif., assignor of one-half to A. K. Dellarowe and one-half to Emma Hull, Los Angeles, Calif. Filed Jan. 10, 1921. Serial No. 436,095. 9 Claims. (Cl. 101—415.)

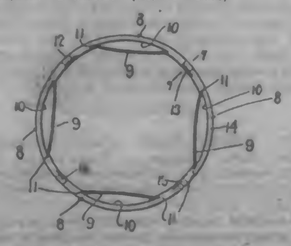
1. A pair of clips for a printing press platen adapted to be fastened to the platen and provided with resiliently mounted lateral extensions extending toward each other and adapted to engage and hold an envelop against the platen substantially as and for the purpose set forth.

1,401,175. AUTOMATIC ATTACHMENT FOR FIRE-EXTINGUISHER SYSTEMS. JONATHAN C. MELOON, Providence, R. I. Filed Sept. 15, 1920. Serial No. 410,405. 7 Claims. (Cl. 169—23.)



1. An attachment for an automatic sprinkler system, comprising the combination, with a valve arranged in the water supply part of the system and having an intermediate chamber in its seat, a drip passage therefrom, a drip chamber with a restricted discharge at a low level, and a spring supported movable bottom and discharge lid whereby water accumulates in the drip chamber, when the drip exceeds the capacity of the restricted discharge, and the accumulation depresses the chamber bottom of a lever connected with the chamber bottom outside of the chamber; a water passage leading from the system on the supply side of the said valve to the top of the chamber bottom and leading to apparatus that is to be operated, a valve in the last mentioned passage, and means whereby said lever opens said valve last mentioned when moved by said chamber bottom.

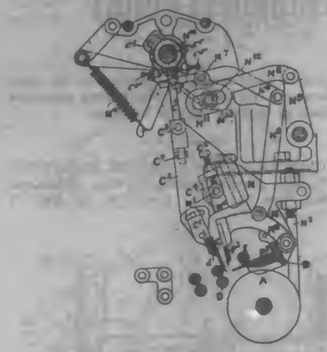
1,401,176. SPRAY-HEAD. ARTHUR C. MILLER and EDWIN H. PIERCE, Chicago, Ill., assignors to Sears, Roebuck and Co., Chicago, Ill., a Corporation of New York. Filed Dec. 20, 1920. Serial No. 433,990. 5 Claims. (Cl. 299—121.)



1. A device of the class described having, in combination, a nozzle having a discharge orifice, a support fixed to the nozzle and having a tongue positioned before said nozzle, the portion of said tongue adjacent said nozzle being offset from axial alignment with the orifice, and a spray plate detachably supported on said tongue and arranged in spaced transverse relation to said orifice.

1,401,177. CONVERTIBLE AUTOMOBILE-BODY. FRANK MITCHELL, Houston, Tex. Filed Feb. 28, 1921. Serial No. 448,573. 2 Claims. (Cl. 155—7.)

1. A vehicle body comprising a front seat and a rear seat, said front seat having a back section movable from a vertical to a horizontal position, means for supporting the back section in a horizontal position, and an auxiliary back for the front seat removably mounted in place when the movable back section is lowered.

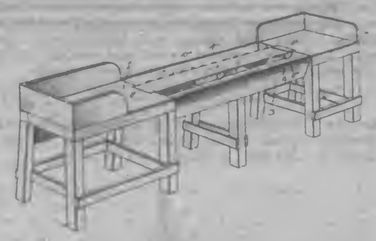


1,401,178. PISTON-RING. THOMAS MOHN and ALBERT MOHN, Red Wing, Minn. Filed May 28, 1919. Serial No. 299,249. 1 Claim. (Cl. 74—100.)

A piston ring comprising a plurality of ring sections, the adjacent sections having overlapping end portions, each

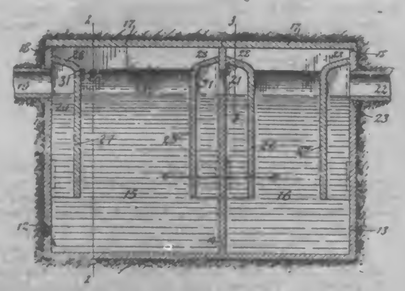
section being provided at its inner side with a recess having undercut end walls, the said walls converging toward each other toward the center of the ring and a flat spring bridging the recess and bearing at its ends against the undercut converging end walls of the recess.

1,401,179. COMBING-MACHINE. JOHN WILLIAM NAISMITH, Stockport, England. Filed May 17, 1916. Serial No. 98,207. 12 Claims. (Cl. 19—6.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)



1. In a combing machine the combination of a combing cylinder, a detaching roller, a nipper pivoted above the cylinder in such a position that its point moves on an arc that lies closely adjacent to the peripheries of the cylinder and of the detaching roller, and a top comb pivoted approximately on the same center as the nipper.

1,401,180. OIL-CAN. ALBERT R. NELSON, Sheridan, Wyo. Filed May 3, 1920. Serial No. 378,670. Renewed Aug. 11, 1921. Serial No. 491,559. 2 Claims. (Cl. 221—48.)



1. A device of the class described comprising a container having a resilient bottom, a spout for said container provided with a valve seat in its discharge end and having its other end extending into the exterior of said container, the portion of said spout disposed inside said container having openings in its opposite sides, a lever extending transversely through said spout with its ends projecting through said openings, a stem extending longitudinally through said spout, one end of said stem being connected to one end of said lever, the other end of said stem being seated upon said valve seat, a rod extending longitudinally through the portion of said spout which is disposed inside said container and having one end connected to the other end of said lever, the other end of said rod bearing against the bottom of said container, and resilient means in conjunction with said rod and said spout for normally holding the last mentioned end of said rod in contact with the bottom of said container.

1,401,181. TABLE FOR PASTING STORAGE-BATTERY PLATES. WILLIAM H. NORDHAUS, Chicago, Ill., assignor to K. W. Battery Company, Chicago, Ill., a Corporation of Illinois. Filed May 21, 1920. Serial No. 383,273. 8 Claims. (Cl. 18—1.)

1. In a pasting table, a rotatably mounted removable support for the plates having semicircular end pivot members, and a similar removable support arranged to be placed face to face upon said first mentioned support and to be rotated into the position first occupied by said first mentioned support, said pivot members of the supports being arranged to seat in semicircular bearings in the frame of the table.

1,401,182. APPARATUS FOR TREATING SEWAGE. EDWARD F. OYBSTON, Buffalo, N. Y. Filed July 28, 1920. Serial No. 399,498. 2 Claims. (Cl. 210—6.)

1. A sewage treating apparatus comprising a hollow body having a transverse wall provided with an opening in its upper part and seats which are undercut and converge downwardly on opposite sides of said opening, and an upright conduit which is of trough-shaped form in cross section and has its upright edges constructed of downwardly converging and dove tail form and engaging with said seats.

1,401,165. AUTOMOBILE TRUNK. JAMES J. EMMETT, Chicago, Ill., assignor to Marshall Field & Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 10, 1918. Serial No. 227,649. 2 Claims. (Cl. 224—29.)

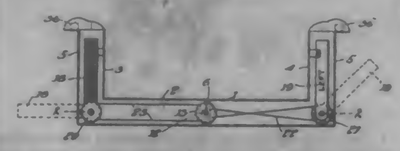
2. In combination, a running board of an automobile, a luggage carrier mounted thereon, said luggage carrier comprising a hinged casing, attachments on opposite sides of said casing, vertical rods coöperating with said attachments and extending through said running board for releasably holding said casing, said vertical rods being readily removable, whereby, when said luggage carrier is not being used, no obtrusive attachments appear.

1,401,184. COMBINED KEY-RING AND HOLDER. STEPHEN PETER, Omaha, Nebr. Filed June 30, 1921. Serial No. 481,692. 4 Claims. (Cl. 24—3.)

1. A combined key ring and holder of the specified class, comprising a key ring having an open entrance between the ends of the ring, a loop spring slidable on the ring, a slide encircling the spring and having a tongue adapted to engage the ring, a self-closing hook adapted to engage the loop spring, and means for attaching the hook to an article of wearing apparel.

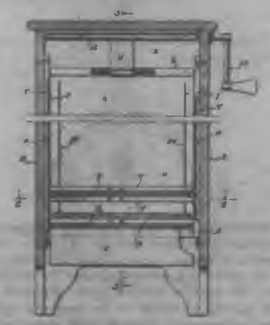
1,401,185. CHEMICAL APPLIANCE. JOHN JERMAIN PORTER, Hagerstown, Md. Filed Dec. 3, 1919. Serial No. 342,140. 16 Claims. (Cl. 23—3.)

2. An appliance for inducing chemical and physical reactions comprising a rod-like member provided near each end with means adapted to hold a solid reagent while exposing the same to liquid into which said member may be dipped.



1,401,186. ELECTRIC RESISTANCE UNIT. HERMAN F. PRENZLOW, Johnson Creek, Wis. Filed Apr. 12, 1920. Serial No. 373,087. 2 Claims. (Cl. 219—63.)

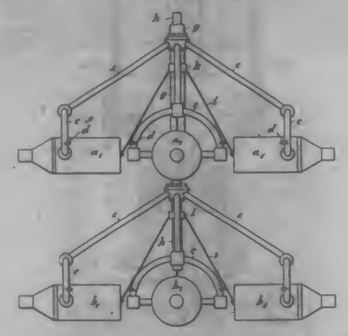
1. An electrical unit comprising a rectangular form of insulating material having its opposite edges provided with a series of spaced notches, each end having a single notch, a pair of terminals on the form near the center thereof, and a resistance wire having one end connected with one terminal and extending therefrom in spires through alternate notches to one end notch, continuing in spires midway between the first mentioned spires and continuing to the other end notch and thence back to the other terminal, said spires from one terminal to the other circumscribing the form continuously in the same general



direction and at no point crossing each other on the same side of the form, the two ends of the wire being connected to the terminals at opposite sides of the form.

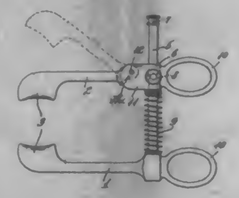
1,401,187. DIRECTION-INDICATOR FOR AUTO-VEHICLES. FRANCIS HENRY RADELEFF, West Alhambra, Calif. Filed June 26, 1920. Serial No. 391,589. 2 Claims. (Cl. 116—58.)

1. In a direction indicator for auto vehicles, three pairs of signaling arms marked respectively "Left," "Right," and "Stop," the arms of each pair being arranged respectively at the sides of the vehicle, means for swinging the "Left" arm at the left side of the vehicle horizontally and simultaneously swinging the "Left" arm at the right side of the vehicle at an angle, means for swinging the "Right" arm at the right side of the vehicle horizontally and simultaneously swinging the "Right" arm at the left side of the vehicle at an angle, and means for swinging both "Stop" arms downwardly at an angle.



1,401,188. FLEXIBLE FILING-CABINET. CARL G. RAY, Racine, Wis. Filed Apr. 26, 1921. Serial No. 464,662. 3 Claims. (Cl. 45—2.)

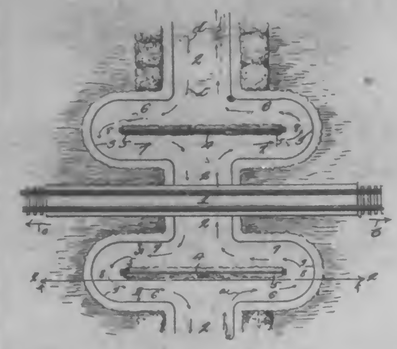
2. A flexible filing device comprising a cabinet, racks carried thereby, a vertically movable tray mounted in



the cabinet, a series of right partitions normally supported by the tray and adapted to form pockets of varying sizes for articles inserted therebetween, the proportions of the pockets being controlled by gravity, means for lifting the tray, and manually controlled clutch means carried by each tray for locking the same after it has been lifted, whereby a clearance space is formed between the locked tray and its associated pocket for access to articles contained therein.

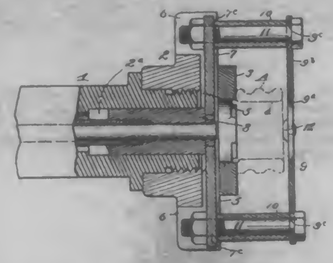
1,401,189. PROJECTING APPARATUS. ARTHUR RUHLIG, Berlin, Germany, assignor to Aktiebolaget Ars, Stockholm, Sweden, a Corporation. Filed May 26, 1921. Serial No. 472,805. 5 Claims. (Cl. 88—24.)

1. A projecting apparatus for exhibiting imitation clouds movable in various directions comprising a rotatable member, a series of projecting devices radially arranged around the axis of the rotatable member and movable around said axis, and means for moving said devices about horizontal axes.



1,401,190. MOUTH-PROP. SHERIDAN RISLEY, Cleveland, Ohio, assignor to The Cleveland Dental Manufacturing Company, Cleveland, Ohio, a Corporation of Ohio. Filed Feb. 20, 1920. Serial No. 360,036. 6 Claims. (Cl. 128—17.)

1. A mouth prop or gag, comprising a pair of coöperating jaw receiving members, and relatively adjustable slidably connected base members supporting the same, one of said jaw receiving members being pivotally connected to its base member.

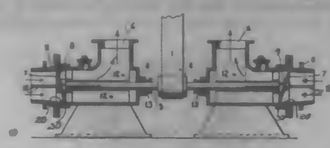


1,401,191. RAILROAD-CROSSING. ANDREW M. RITCHEY, San Antonio, Tex. Filed Jan. 20, 1920. Serial No. 352,706. 1 Claim. (Cl. 238—3.)

A railroad crossing comprising a road crossing a railroad at an angle, said road being provided with a circuitous passage having a plurality of sections in parallel relation to the railroad track, the parallel section adjacent the railroad track being spaced from the track, said parallel sections of the road compelling the approaching vehicle to assume positions in its course to the railroad track so that the operator will have a clear view up and down the track, the parallel section adjacent

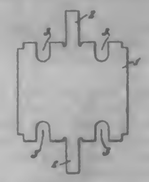
the track being spaced from the track allowing the operator to stop the vehicle if a train is approaching at a point spaced from the track, said parallel sections of the road being separated from each other by a relatively narrow barrier thereby causing vehicles to quickly assume positions in the parallel sections.

1,401,192. CHUCK. ROBERT F. RUNGE, Philadelphia, Pa., assignor to The Hess-Bright Manufacturing Company, a Corporation of Delaware. Filed Apr. 25, 1919. Serial No. 292,630. 8 Claims. (Cl. 274—8.)



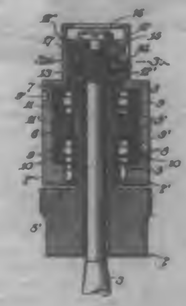
1. In a chuck, the combination of a chuck body provided with a work seat, a work clamping plate extending across the work seat in front of the same, an actuating plate for the clamping plate fixedly connected thereto at opposite sides and movable freely relatively to the chuck body to and fro axially of the chuck in a rectilinear path, and means sustained by and movable relatively to the chuck body and connected with the actuating plate for moving the same to and fro.

1,401,193. PROPELLER-PUMP. MARX PETER SCHETZEL, Oakland, Calif. Filed Sept. 18, 1917. Serial No. 191,935. 1 Claim. (Cl. 253—179.)



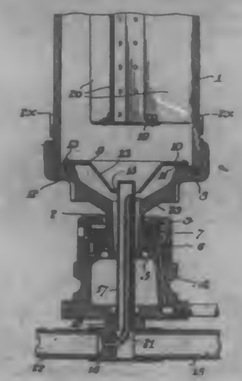
A propeller pump including a housing having an inlet and an outlet, the inlet end of said housing being en-

largest and forming a socket bearing, a shaft journaled in said housing, a propeller on said shaft, said propeller including a ring at the outer edge of its blades which



ring is journaled in said socket bearing and a nipple secured to the inlet end of said housing with its inner end adjacent the outer edge of said propeller ring to hold the propeller in said socket bearing.

1,401,194. COUPLING-CHAIN. EDOUARD SEIGNOL, Neuilly-sur-Seine, France. Filed Jan. 23, 1920. Serial No. 353,643. 2 Claims. (Cl. 64—30.)



2. In a flexible shaft of the kind consisting of alternate wire hook members and cylindrical links, a link comprising a hollow cylindrical body formed by rolling a sheet metal blank having at each end a pair of notches adapted to engage and transmit rotation to a wire hook, and a transverse member at each end of said body and integral therewith, said members being formed by bending projections integral with said blank at right angles to the cylindrical wall of said body and into the plane of the edge of the blank.

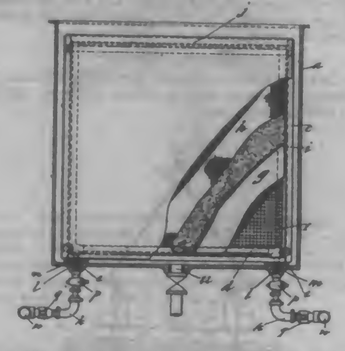
1,401,195. BEARING. DAVID T. SHARPLES and GERALD D. GROSNER, West Chester, Pa., assignors to The Sharples Specialty Company, West Chester, Pa., a Corporation of Delaware. Filed Apr. 25, 1919. Serial No. 292,559. 4 Claims. (Cl. 64—48.)

4. The combination of a frame, a sleeve detachably connected with said frame, a plurality of rings having external races fixed to said sleeve, a plurality of rings having internal races surrounding respective rings aforesaid, anti-friction devices engaged in complementary races aforesaid, driving means fixed to said second named rings, a spindle extending through said sleeve and elastic means connecting said driving means with said spindle whereby irregular movements of said spindle are absorbed.

1,401,196. CENTRIFUGAL MACHINE. PHILIP T. SHARPLES, St. Davids, Pa. Filed July 14, 1919. Serial No. 310,661. 4 Claims. (Cl. 233—21.)

1. In a centrifugal machine, the combination of a revoluble bowl, a diaphragm in the bottom of said bowl and means for delivering different substances through the bottom of said bowl on opposite sides of said diaphragm.

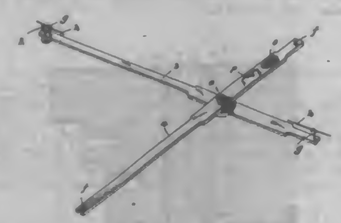
1,401,197. SPINDLE FOR CENTRIFUGAL MACHINES. PHILIP T. SHARPLES, St. Davids, Pa. Filed Aug. 6, 1919. Serial No. 315,682. 4 Claims. (Cl. 64—48.)



4. The combination with a suspended spindle provided with a bearing member having a curved surface and a bowl having a stub-spindle, of a coupling member having a universally movable engagement with said curved surface and a detachable engagement with said stub-spindle, and means comprising a device connecting said members whereby said spindle is adapted to revolve said bowl positively and a spring adapted to act in opposite directions on said bearing member and stub-spindle to restrain said universal movement.

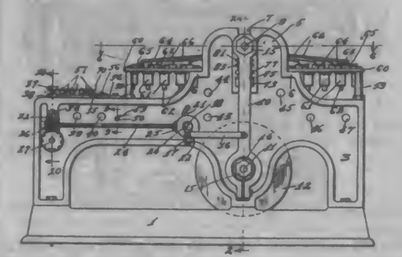
1,401,198. PACKING MATERIAL. JAMES H. SHAW, Oakley, Calif. Filed May 15, 1920. Serial No. 381,668. 1 Claim. (Cl. 106—8.)

As a new article of manufacture, a packing material consisting of unpressed wood paper pulp formed into various shapes and sizes and thoroughly dried.



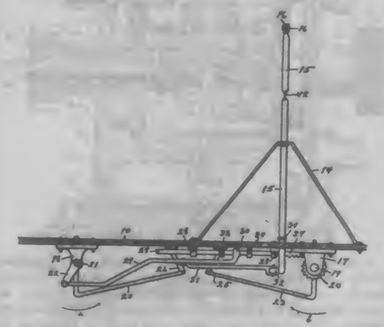
1,401,199. FILTRATION OF SUGAR LIQUORS. GEORGE WILLIAM SYDNEY SIMPSON, London, England, and ROBERT F. LYLE, Greenock, Scotland. Filed June 24, 1918. Serial No. 241,587. 9 Claims. (Cl. 210—203.)

1. A process of filtering sugar liquor which consists in passing the liquor through a layer of one or both of the mosses known as sphagnum and leucobryum.



7. A filter for sugar liquors comprising in combination a container having porous walls including a cloth of a texture adapted to retain coarse and slimy impurities while passing finer substances and a filling of sphagnum or leucobryum.

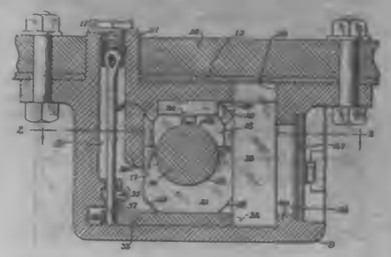
1,401,200. PROTRACTOR FOR LAYING OFF LINES, ANGLES, AND ELEVATIONS IN BUILDING AND SIMILAR WORK. ARTHUR R. SMITH, New Albany, Ind. Filed Jan. 20, 1921. Serial No. 438,768. 11 Claims. (Cl. 33—46.)



1. In a device of the class described the combination with an elongated member, of means thereon for supporting it from and below a stretched wire or cord in a definite fixed position on a vertical plane therewith, a transverse member pivoted to said elongated member to turn horizontally thereon the portions extending on opposite sides being such as to balance each other, and circularly arranged scales carried by said members and concentric with the first point to indicate the angular relations of the members.

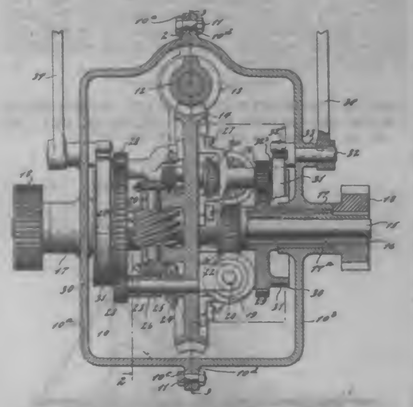
1,401,201. MUSIC-ROLL-PERFORATING MACHINE. HAROLD J. SMITH, Chicago, Ill., assignor of one-half to Henry F. Baker, Chicago, Ill. Filed Feb. 19, 1920. Serial No. 360,020. 6 Claims. (Cl. 164—115.)

1. In a perforating machine the combination with a die mechanism, of a punch mechanism adjustably mounted to co-act therewith, said punch mechanism having vertical and horizontal openings therein, each of said horizontal openings meeting and extending beyond one of said vertical openings and each of said vertical openings meeting and extending beyond one of said horizontal openings, whereby said openings are in pairs and the openings of each pair cross each other, cutter knives adjustably carried by said punch mechanism and slidable in said vertical openings, a plurality of pins, mechanisms connected with said pins for actuating the same, and means controlling the operation of said mechanisms to cause said pins to slide into said horizontal openings to co-act with said cutter knives to cause the same to cut.



1,401,202. DOOR-OPERATING MEANS. JOSEPH DEVLIN SMITH, Marshalltown, Iowa. Filed Mar. 21, 1921. Serial No. 454,154. 8 Claims. (Cl. 268—9.)

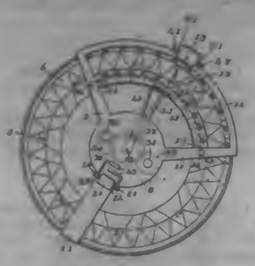
1. Door operating means, comprising a rock shaft, shafts arranged in vertical position adjacent hinged margins of the doors, bent levers fixed to said shafts, pivotal connections between said levers and the free marginal portions of the doors, a pinion on one of said shafts, a crank arm on the other of said shafts, a rack bar slidably mounted and having a toothed portion in mesh with said pinion, a pitman pivoted at one end to said crank arm and operatively connected at its opposite end to said rack



bar, said rock shaft being formed with a crank arm pivotally connected to and adapted to reciprocate said pitman.

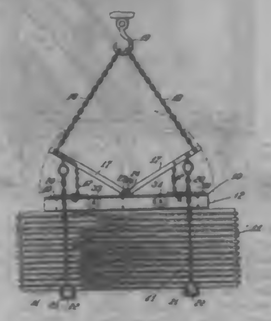
1,401,203. CAR AXLE BEARING. JOHN R. STEPHENS, St. Louis, Mo. Filed Sept. 2, 1920. Serial No. 407,652. 9 Claims. (Cl. 64—10.)

1. In combination with a car axle box, an upper bearing block for the axle extending longitudinally thereof and adapted to bear upon the upper inner surface of the box, a lower relatively narrow support for the axle formed as a unitary part of said bearing block, and means for securing said combined bearing block and support in a relatively fixed position within the box.



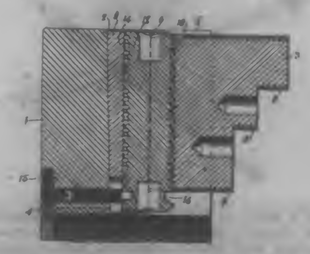
1,401,204. POWER-TRANSMITTING MECHANISM. NORMAN C. STOREY, Aguirre, Porto Rico, West Indies. Filed Sept. 27, 1918. Serial No. 255,895. 10 Claims. (Cl. 180—17.)

1. In combination, a driving member, two members driven independently by said driving member through positive connections comprising self-locking worms and gears, and means for positively rotating either worm and thereby the cooperating gear, and thereby changing the speed ratio between said driving member and the given driven member.



1,401,205. AZIMUTH FITTING FOR MARINERS' COMPASSES. ERNEST ALFRED SUTER, Ancoats, Manchester, England. Filed Aug. 9, 1919. Serial No. 316,463. 2 Claims. (Cl. 33—224.)

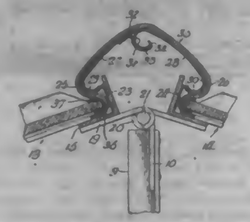
1. A compass corrector comprising a frame, a graduated arc carried by said frame, means to mount said frame on a compass bowl so that said arc and compass card will be concentric, a pair of needle pointers pivoted to the



frame and cooperating with said arc and with the compass card, one to indicate the true bearing and the other to indicate the compass error as a direct reading.

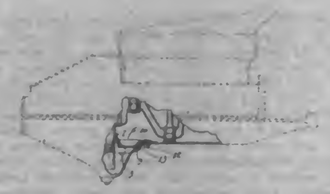
1,401,206. LUMBER-CRADLE. EDWARD G. SWARTZ, New Orleans, La. Filed May 18, 1920. Serial No. 382,428. 12 Claims. (Cl. 294—74.)

1. A lumber cradle comprising, in combination, a frame adapted to rest upon the top of the load, an arm hingedly connected to the frame, a suspension device and lifting means both connected to the free end of the arm.



1,401,207. CHUCK. CHARLES F. SWISSHABEL, Dayton, Ohio. Filed Feb. 18, 1920. Serial No. 359,738. 11 Claims. (Cl. 279—112.)

1. The combination with a chuck body, of a groove in said body having upwardly and inwardly inclined walls and

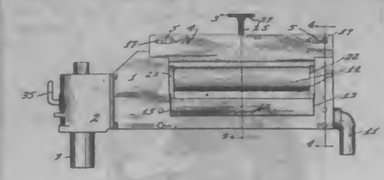


the bottom thereof inclining inwardly toward the center of the chuck, a jaw operable in said groove and having opposite inclined surfaces cooperating with the inclined surfaces of the groove, and an adjusting member interposed between the bottom of the groove and said jaw and tapered to conform with the inclination of the bottom of the groove, and means to adjust said member longitudinally to raise or lower the jaw relative to the bottom of the groove.

1,401,208. RIDGE CONSTRUCTION FOR SKYLIGHTS AND THE LIKE. JOSEPH SILVAN, Chicago, Ill. Filed Dec. 8, 1920. Serial No. 429,076. 5 Claims. (Cl. 108—16.)

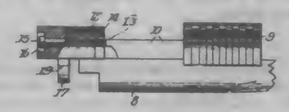
1. A ridge construction of the kind described, comprising in combination with a swinging section, a second section, a flexible ridge strip connected at its margins to the margins of said sections, and means carried by said sections for supporting said ridge strip from beneath in all positions of said swinging section.

1,401,209. TRAY. JAMES ARTHUR THOMPSON, Rushville, Ill. Filed Sept. 26, 1921. Serial No. 503,232. 4 Claims. (Cl. 129—108.)



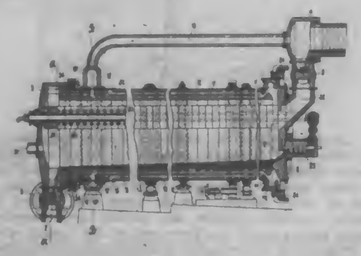
1. A tray comprising bottom, side and end walls, the side and forward end walls being shaped to conform with the inner surface of the crank case of the motor of a Ford automobile when the tray is disposed horizontally therein beneath the No. 4 or rearmost cylinder, the forward end wall being extended and terminated in a depending lip whereby the tray may be swung upwardly and forwardly to permit of its removal from the crank-case.

1,401,210. CLOTHES-WRINGER. GEORGE R. TOWNSEND, Winchester, Mass., assignor, by mesne assignments, to Gilbert & Eden Corporation, a Corporation of Delaware. Filed May 7, 1920. Serial No. 379,511. 2 Claims. (Cl. 68—32.)



1. The combination with a clothes wringer, of blocks therein, one of said blocks having a drain passage there-

through, a drain trough in said wringer between said blocks, tie bolts connecting said blocks for holding said



drain trough clamped in position, and a drain spout secured on said passaged block to permit the escape of a liquid from said trough.

1,401,211. CHAIN GRATE. VINCENT V. VEENSCHOTEN, Erie, Pa., assignor to Northern Equipment Company, Erie, Pa. Filed Sept. 20, 1919. Serial No. 325,189. 1 Claim. (Cl. 110—40.)

A grate bar comprising a body portion, a head mounted on one end of said body portion, and longitudinal securing ribs mounted on said body portion, in combination with a plurality of fuel supporting keys slidably secured on said ribs, a filler member mounted between said head and the adjacent ends of said ribs, and a bolt passing through said head and screwed into said member, the space between the said head and the ends of said ribs being greater than the width of each of said keys.

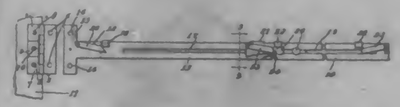
1,401,212. ROTARY KILN. STEFANUS JOHANNES VERMARS, Delft, Netherlands, assignor to Syndicaat Electro-Staal, The Hague, Netherlands. Filed Apr. 26, 1920. Serial No. 376,759. 17 Claims. (Cl. 263—34.)

1. A rotary kiln comprising a gas-tight barrel, means for rotating said barrel, combustion channels in the wall of said barrel, and means for supplying gas and air for combustion in said channels for heating the kiln without said combustion gases entering the interior thereof.

1,401,213. PHONOGRAPH-NEEDLE SHARPENER. AXEL W. WAHLIN, Chicago, Ill., assignor to Gustave Lidseen, Chicago, Ill. Filed Apr. 30, 1920. Serial No. 377,784. 6 Claims. (Cl. 144—146.)

1. The combination with a phonograph, of a needle sharpener adapted to be adjustably engaged with the phonograph turntable shaft to permit sharpening of the playing end of a needle held in position by the phonograph needle holder.

1,401,214. PINCH BAR. ARTHUR E. WATSON, Cheboygan, Mich. Filed Nov. 8, 1920. Serial No. 422,597. 2 Claims. (Cl. 254—36.)



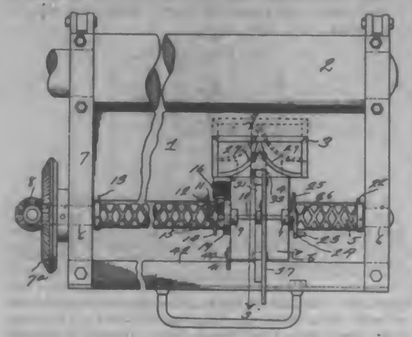
1. An appliance of the character stated, comprising a bar composed of telescopic sections, the upper or tubular member having an integral hand hold at the upper end, the other member having its lower end formed into a pinch or lever portion and its upper end shaped for slidably receiving thereon the tubular lever members against pulling apart, the lower end of the tubular member terminating in externally threaded flexible extensions, the corresponding upper end of the other member having oppositely flattened portions whereby to form shoulders, and an internally threaded coupling cap that slidably engages the shouldered end members and the threaded flexible extensions whereby to crowd the said extension against the opposite flattened faces of the opposing solid member when the coupling cap is screwed home.

1,401,215. MOLD FOR METAL-FOUNDERS' USE AND COMPOSITION OF MATTER FOR MAKING SAME. HAROLD G. WEIDENTHAL, Cleveland, Ohio; Louise S. Weidenthal executrix of said Harold G. Weidenthal, deceased. Filed July 29, 1920. Serial No. 399,705. 7 Claims. (Cl. 25—158.)

1. A composition of matter for the manufacture of permanent molds for metal founders' use consisting essentially of calcined bauxite crushed to graded sizes mixed with graphite and a suitable binder.

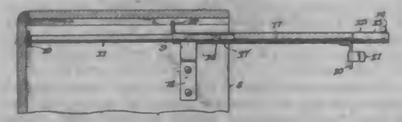
1,401,216. COMMERCIAL CARD AND POSTER HOLDER. CHARLES WEIDNER, Frankfort, Ind. Filed Sept. 2, 1921. Serial No. 497,962. 1 Claim. (Cl. 40—125.)

A hanger including a bracket member having hinged sections, one of said sections having openings, the opposite section having pins, a hanger arm comprising adjustable sections, one of said hanger arm sections having a T head provided with openings, said openings adapted to accommodate the pins to secure the hanger arm to the bracket, and spring arms carried by the adjustable sections for securing articles to the adjustable sections.



1,401,217. SWITCHBOARD-PLUG. ALFRED H. WEISS, Wilmette, Ill., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill., a Corporation of Illinois. Filed May 17, 1918. Serial No. 235,057. 6 Claims. (Cl. 173—361.)

6. A switchboard plug of the character described including an elongated metallic member provided with an enlarged end portion, a sleeve adapted to fit onto said metallic member and to abut against said enlarged end portion, said metallic member being provided with an annular groove and a pair of orifices extending below the inner circumferential diameter of said groove, a spring ring adapted to fit into said groove to prevent displacement of said sleeve, and integrally formed portions for said spring ring adapted to fit into said orifices of said metallic member to secure said ring in position against displacement of the pressure of said sleeve and also to prevent the rotation of said ring in said groove.

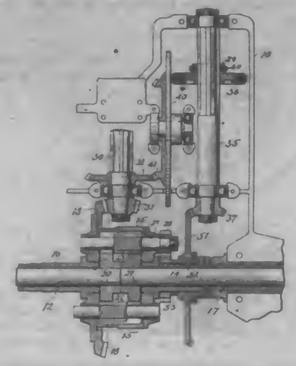


1,401,218. MECHANICAL INKING APPARATUS. CHARLES F. WELDON, Delavan, Wis. Filed May 26, 1921. Serial No. 472,661. 2 Claims. (Cl. 101—364.)

1. The combination with an ink fountain of a printing press having a fountain roller rotatably mounted therein, of an ink agitator disposed in said fountain, said agitator comprising a carriage, said carriage being longitudinally movable in both directions on an oppositely spiral grooved feed shaft, means carried by the carriage for coöperating with the opposite grooves for moving the carriage during the rotation of the feed screw, tripping fingers carried by the ends of the feed shaft and coöperating with mechanism carried by the carriage for reversing the direction of the movement of the carriage adjacent the ends of the feed screw, an agitating element carried by the carriage and slidably mounted thereon at right angles to the fountain roller, means carried by the carriage and actuated by the reversing mechanism for moving the agitating element to-

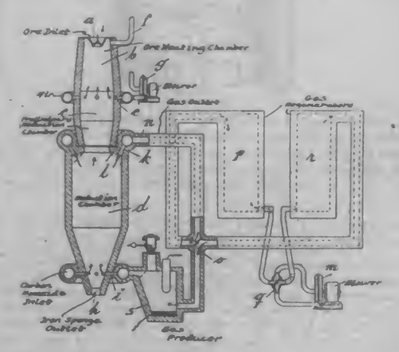
ward or away from the fountain roller when it reaches the end of the feed screw and means for rotating said feed screw.

1,401,219. TRUNK-FIXTURE. GEORGE HENRY WHEARY, Racine, Wis. Filed Nov. 5, 1917. Serial No. 200,292. 2 Claims. (Cl. 211—16.)



2. A trunk fixture, comprising a fixed horizontal track member, an extensible track member hinged to the outer end thereof and movable to a position in alinement therewith, and a tubular member slidably mounted on the fixed track member and movable outwardly therefrom to maintain the extensible track in extended alined position, said tubular member having a rear end outwardly projecting portion for causing garment hangers mounted thereon to move therewith and also having at its forward end a downwardly extending handle finger provided with yielding means for holding the extensible track in angular position.

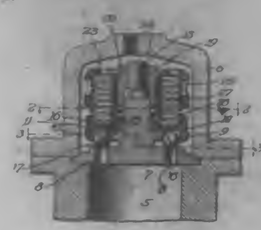
1,401,220. GARMENT LEG-SUPPORTER. HELEN K. WHITE, Alameda, Calif. Filed Jan. 17, 1921. Serial No. 437,676. 4 Claims. (Cl. 2—144.)



1. The combination with a trousers leg and a separate garter, of a band comprising a loop arranged on the leg and in which said garter may be engaged.

1,401,221. DRIVING AND STEERING MECHANISM FOR MOTOR-VEHICLES. ROLLIN H. WHITE, Cleveland Heights, Ohio, assignor to The Cleveland Tractor Company, Euclid, Ohio, a Corporation of Ohio. Filed Jan. 22, 1919. Serial No. 272,414. 9 Claims. (Cl. 180—17.)

1. In power transmitting mechanism for track laying tractors and other forms of motor vehicles, the combination of two alined driven shafts, differential gearing therebetween, which differential gearing includes compensating pinions, means to rotate the differential gearing, and independent means to rotate a compensating pinion in either direction about its own axis and to thereby cause either of said driven shafts to rotate faster than the other.



1,401,222. METHOD OF AND FURNACE FOR REDUCING ORES AND OXYGEN COMPOUNDS UTILIZED AS ORES. FRANS MARTIN WIBERG, Falun, Sweden. Filed June 24, 1919. Serial No. 306,367. 5 Claims. (Cl. 75—14.)

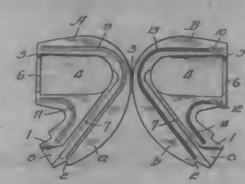
1. A method for reducing ores or oxygen compounds utilized as ores consisting in passing the ore through a chamber, moving a carbon monoxid gas through the chamber in a direction opposite to that of the direction of travel of the ore, causing the gas current, before it has passed through the whole ore mass and before its reducing capacity is wholly utilized, to be divided in such manner that part thereof is removed from the chamber, regenerating the carbon monoxid in the removed portion of the gas and

again introducing the same into the container for use as a reducing gas, allowing the remaining part of the gas to continue through the ore mass and to exert a further reducing action on the said mass at a temperature suitable for the reduction, and in heating the ore to said temperature by introducing a material to the combustible constituents remaining in the latter part of the gas to cause combustion.

1,401,223. MULTIPLE-BALL VALVE. FRED WITTENMEIER, Chicago, Ill. Filed Mar. 31, 1919. Serial No. 286,291. 4 Claims. (Cl. 251—144.)

1. In a valve of the class described, the combination of a seat member having a plurality of valve openings therein, a plurality of balls for closing said openings, and means for rotating said balls as the same are moved from closing to open position.

1,401,224. BREEZE-ARRESTER AND THE LIKE. ERNEST C. WOODIN, Chicago, Ill. Filed Sept. 27, 1920. Serial No. 413,251. 2 Claims. (Cl. 183—93.)

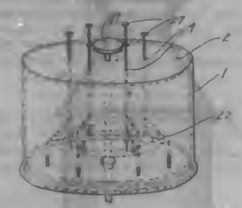


1. The combination with a circular stack, of a breeze arrester comprising a continuous conical hood having the angle of its walls at least 30° from the horizontal and unperforated, the base of the hood being at least as great in diameter as the diameter of the stack, means for supporting the hood above the stack and in alinement therewith and with its lower edge spaced above the upper edge of the stack to provide a clear opening for the discharge of gas from the stack into the atmosphere without reversal of direction, a discharge pipe connected to the upper end of the hood centrally thereof, said discharge pipe having a diameter adjacent to the hood at least one-fifth the diameter of the stack, there being no shoulder facing against the upward flow of material at the point of connection of the discharge pipe with the hood, and there being no direct connection from the stack to the discharge connection, substantially as and for the purpose set forth.

1,401,225. COOLING-MACHINE. OSCAR WOODRUFF, Babylon, N. Y., assignor to Remington Accounting Machine Corporation, New York, N. Y., a Corporation of New York. Filed Dec. 19, 1920. Serial No. 431,131. 5 Claims. (Cl. 295—56.)

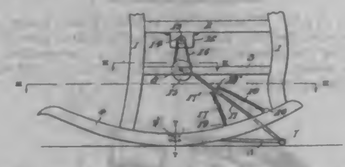
5. The combination with stationary framework, of a truck having a frameway at a carrier pivoted between its ends in said framework, two rolls, one at each end of said carrier, and studs fixed in said carrier and on which said rolls are journaled.

1,401,226. TOBACCO-PIPE. ROLAND T. WRIGHT, St. Louis, Mo., assignor of one-half to John H. Buechler, St. Louis, Mo. Filed Mar. 8, 1920. Serial No. 364,920. 1 Claim. (Cl. 131—12.)



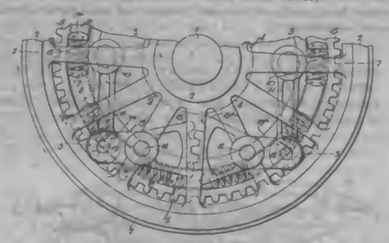
In combination with a removable pipe stem having a smoke passage and a socket formed at one end thereof, a pipe bowl comprising halves provided with cavities hinged) united at their base, a bowl stem section having a smoke passage communicating at one end with the bowl cavity, a reduced bowl stem section receivable in the socket of the removable pipe stem, a removable tobacco bowl receivable in the pipe bowl cavities, a shoulder formed at the upper end of the bowl halves to retain the removable tobacco bowl in position when the bowl halves are in their closed position, yieldable packing strips interposed between the pipe bowl halves and integral stem sections thereof, and a retaining ring removably mounted upon the upper end of the pipe bowl halves to assist the socket end of the pipe stem to retain the pipe bowl halves in their closed position.

1,401,227. LINGERIE-STRAP RETAINER. HENRIETTA M. WYETH, South Hanson, Mass. Filed Oct. 21, 1920. Serial No. 418,412. 2 Claims. (Cl. 241—12.)



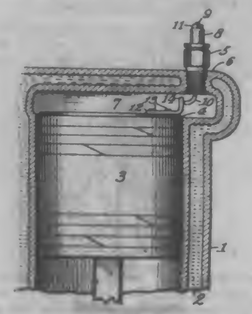
1. A detachable retainer adapted to be applied to shoulder straps of lingerie to hold them in position, said retainer consisting of an elastic body portion extending from one strap to the other, and non-metallic fastening devices attached to the elastic body portion, said devices being arranged to encircle the shoulder straps.

1,401,228. COMBINATION ROTARY LOCK. VINCENT M. YOUNG, Mason, Iowa. Filed July 30, 1920. Serial No. 399,878. 1 Claim. (Cl. 70—64.)



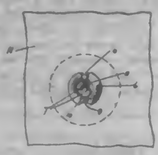
A combination rotary lock of the character described, comprising a hollow, cylindrical case, closed at the top end and having a recessed, annular seat formed around the open end of the case; a key plate rigidly mounted within the case adjacent the open, bottom end and parallel to the top; a lever ring rigidly mounted in the case immediately above the key plate; a circular lock plate adapted to seat in the recessed open end of the case; central and vertically alined lock stem holes in the top and key plates; a lock stem permanently attached to the center of the lock plate and extended up through said lock stem holes in the key and top plates; an inwardly disposed circle of holes in the top plate; an inner circle of alined key holes in the key plate; an inner circle of alined sockets in the lock plate; an outer circle of key holes in the key plate; an outer circle of alined sockets in the lock plate; push rods slidingly extended down through the top holes, and having threaded sockets in their lower ends; threaded keys adapted to screw into said sockets and to pass through the holes in the key plate and down into the inner circle of sockets in the lock plate; rocking levers pivotally mounted on the lever ring, and their inner ends pivotally engaging the lower ends of the push rods, and having threaded sockets in their outer ends; threaded keys adapted to engage said sockets and to pass through the holes in the key plate and down into the inner circle of sockets in the lock plate; and springs to normally hold the push levers in their uppermost position.

1,401,229. ROCKING-CHAIR ATTACHMENT. ANTON ZENARD, Jersey City, N. J. Original application filed Mar. 9, 1921, Serial No. 451,001. Divided and this application filed Aug. 16, 1921. Serial No. 492,882. 1 Claim. (Cl. 155—188.)



In a rocking chair of the type described, a music box carried by the underneath portion of the chair seat, a shaft projecting outwardly of the music box and transversely of the chair body, a pulley upon the end of the shaft, a floor engaging lever pivoted to an inwardly projecting pin upon one of the chair rockers, a crank shaft journaled transversely of the chair, a pitman rod extending between the free end of the floor engaging lever and the crank portion of the shaft, a pulley wheel upon the crank shaft and immediately below the pulley wheel of the music box shaft, driving means between the two pulleys, and springs connected to the pitman rod and chair rocker at opposite sides of the pitman rod for maintaining engagement between the lever and the floor.

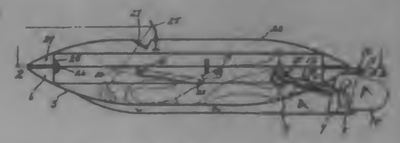
1,401,230. QUILL-DRIVE FOR ELECTRIC LOCOMOTIVES. GEORGE C. ANDT, Lansdowne, Pa., assignor to The Baldwin Locomotive Works, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Nov. 4, 1921. Serial No. 512,832. 2 Claims. (Cl. 105—131.)



2. The combination of an axle; a quill surrounding the axle; a hub mounted on the quill; a gear ring carried by the hub; springs located between the gear ring and the hub; pins on the hub; a driving wheel; pins thereon; levers pivotally mounted on each pin of the driving wheel; and links connecting the levers with the pins on the hub, the two levers intermeshing so that motion imparted to one lever will be imparted to the other.

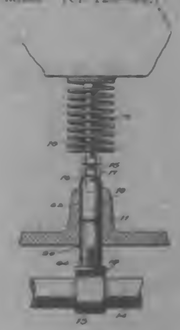
1,401,231. CONTACT FOR SPARK-GAPS. AUGUST EUGENE ANDERSON, Montclair, N. J. Filed July 9, 1921. Serial No. 483,510. 5 Claims. (Cl. 123—143.)

1. In an explosion engine, a stationary electrode and a traveling electrode adapted to move into sparing relation with said stationary electrode, and means adapted automatically to wipe said traveling electrode when out of sparking-relation to said stationary electrode.



1,401,232. BUTTON-FASTENER. GEORGE F. ARMSTRONG, Sioux City, Iowa. Filed July 19, 1920. Serial No. 397,248. 1 Claim. (Cl. 24—90.)

A fastener for securing buttons to goods, consisting of a concavo-convex disk adapted to be placed with its concave side against the goods opposite the button, and having a central depressed portion in the convex side, provided with



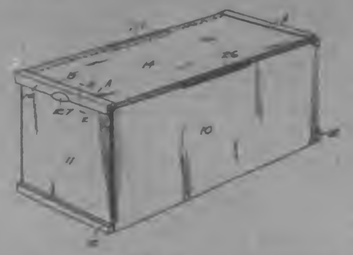
two openings and a U-shaped wire adapted to be inserted through the bottom, goods and said openings, the disk being notched peripherally, whereby the end portions of the wire may be twisted together within the recess, then bent laterally into the notched periphery, and then wound in opposite directions around the wire between the goods and disk.

1,401,233. MANUALLY-PROPELLED LIFE-SAVING DEVICE AND ATTACHMENT FOR BOATS. EPHRAIM BELLMAN, Evansville, Wis. Filed Apr. 28, 1921. Serial No. 464,574. 2 Claims. (Cl. 9—18.)

1. A boat of a size and shape to conveniently accommodate a man lying prone therein, a revolvable propeller mounted therein, pedals operatively connected to said propeller to revolve the same, and means for adjusting the propeller and pedals longitudinally to accommodate persons of different height.

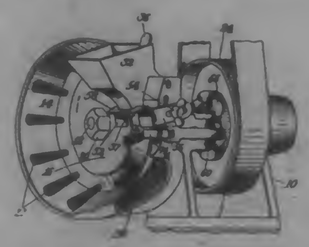
1,401,234. VALVE-TAPPET. FREDERICK H. RICHARDS, New Bedford, Mass. Filed Jan. 12, 1921. Serial No. 436,848. 2 Claims. (Cl. 123—90.)

1. A valve tappet having a body presenting a smooth external surface of one diameter throughout, formed in two parts, the lower part of which is cylindrical and has a lower closed and flanged cam engaging end and the upper part of which has an upper adjusting screw and a reduced depending extension which slidably interfits the hollow lower part and forms a shoulder opposing the upper end of the lower part, and a spring carried between the lower end of said extension and the closed base of the hollow part whereby to place the parts under compression in use, said lower hollow part having an oil intake opening laterally through its wall immediately above its flanged lower end to freely receive oil below the lower end of the extension of the upper part.



1,401,235. TAG-LOCKING DEVICE. ASTON HOBIN, Chesterton, Ind. Filed Apr. 14, 1919. Serial No. 289,836. 2 Claims. (Cl. 40—20.)

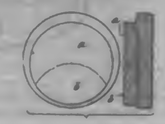
1. In a tag securing attachment comprising a support adapted to be secured to an article; a shoulder at one end of said support; brackets on the outer face of said shoulder; a hook on said support; a resilient member having its one end bent at an angle and engaging said brackets and the other end thereof crossing said hook; a



unit to said resilient member intermediate its ends; and means for securing said support to an article, substantially as described.

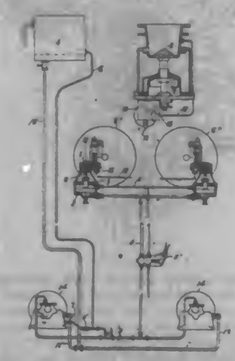
1,401,236. CLOSURE DEVICE FOR SHIPPING-CRATES AND THE LIKE. WILLARD H. DALZELL, Hubbard, Iowa. Filed Apr. 2, 1921. Serial No. 458,816. 2 Claims. (Cl. 217—60.)

1. In a device of the class described in combination with a crate and a lid therefor, a pair of socket members, each comprising a top wall, a bottom wall, a side wall and end walls, the end walls of each socket being yieldingly connected together so that the sockets may be placed on a crate and over the ends of the lid for holding the lid in position on the crate.



1,401,237. CEMENTING APPARATUS. LOUIS A. CASSERAIN, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed July 28, 1918. Serial No. 245,847. 36 Claims. (Cl. 91—39.)

3. In a shoe cementing apparatus, a bottom rest, and a flexible, revolvable applying member extending from one side of the bottom rest to the other and movable in its revolution past said bottom rest, said movement being in a direction at an angle to the extension of the applying member by the bottom rest.

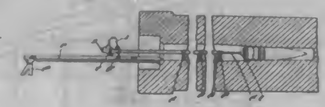


29. In a cementing apparatus, a shaft, a brush mounted thereon, a member for rotating the shaft, said member being provided with a cam surface, and a feeding lever for coöperation with the brush and actuated by the cam surface.

1,401,238. MULTIFOCAL LENS. GEORGE A. CLEMENT, Mount Vernon, N. Y., assignor to General Optical Company, a Corporation of New York. Filed Mar. 31, 1921. Serial No. 457,239. 4 Claims. (Cl. 88—54.)

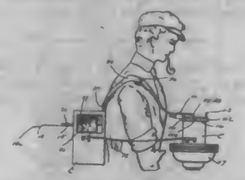
1. The method of making a multifocal lens which consists in placing together edge to edge a plurality of plates of glass of different indices of refraction, then superposing said plates face to face upon another plate of glass having an index of refraction the same as that of one of the first mentioned plates and shaping the lens to include a portion of all of the plates.

1,401,239. ENGINE STOP-GEAR. DAVID COCKBURN and DONALD MACNICOLL, Cardonald, near Glasgow, Scotland. Filed Dec. 9, 1919. Serial No. 343,615. 4 Claims. (Cl. 137—139.)



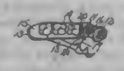
1. In an engine stop gear, the combination with an emergency valve operable by fluid pressure, a relay valve serving to control the escape of fluid pressure medium to effect operation of said emergency valve, a liquid conduit system, a cylinder connected to said system, a storage tank at a higher level than said cylinder, said tank having an overflow discharging into said system, and a piston movable in said cylinder, said piston connected to said relay valve, one side of said piston exposed to the pressure due to the head of liquid between the point of overflow from said tank and said cylinder, said piston maintaining said relay valve closed during the continuance of the overflow but permitting said relay valve to open on cessation of the overflow.

1,401,240. FIRE-EXTINGUISHING LIQUID. BENJAMIN I. COMSON, Minneapolis, Minn. Filed Jan. 31, 1920. Serial No. 355,356. 3 Claims. (Cl. 23—5.)



1. A component for a foam producing fire extinguishing charge, consisting of the product produced in the tannin process of tanning known as phlobaphenes combined with a gas producing chemical substance, said combination when associated with a complemental composition to produce fumes non-supporting to combustion and foam.

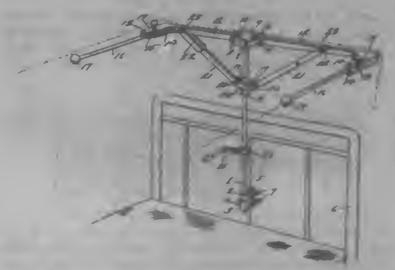
1,401,241. ORDNANCE. ARTHUR TREVOR DAWSON, Westminster, London, and JAMES HORNE, Barrow-in-Furness, England, assignors to Vickers Limited, Westminster, London, England. Filed Sept. 4, 1920. Serial No. 408,320. 3 Claims. (Cl. 89—1.)



1. For use with ordnance, a device for spraying a substance into the bore of the gun, this device comprising in combination a container for said substance and a nozzle operating on the injector principle by means of fluid under pressure, a valve for controlling the supply of pressure fluid to said nozzle, and means for simultaneously moving said nozzle to its operative position and said valve to its position to admit pressure fluid to said nozzle.

1,401,242. TOPOGRAPHICAL RECORDER. DIMITRI SENSAUD DE LAVAUD, New York, N. Y. Filed Jan. 3, 1919. Serial No. 269,513. 15 Claims. (Cl. 234—8.)

1. In a surveying instrument, the combination comprising means for measuring distance traversed, means for measuring the azimuth, means for measuring the vertical angle, means for automatically making a simultaneous record of said measurements at given points of a course, and operating means for the recording means including a reel, a cable wound on the reel and adapted to have its free end attached to an object fixed in the field to be surveyed, and operative connections between the reel and the recording means; said azimuth measuring means including a compass card, and there being provided a manually rotatable card marked similarly to the compass card, with said rotatable card mounted above and for concentric rotation with the compass card, and an operative connection between said rotatable card and the recording means.



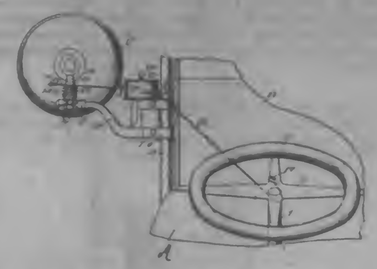
1,401,243. ARTIFICIAL DENTURE. FRANK L. EAGER, Waterbury, Conn. Filed Jan. 12, 1920. Serial No. 350,837. 3 Claims. (Cl. 32—12.)

1. A denture including a saddle having its undersurface smooth and unbroken and shaped to fit and rest upon a

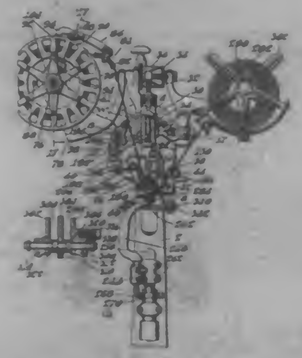
gum, rigid, unbending, relatively movable members shaped to fit a tooth, an artificial tooth secured to said saddle, and means for clamping said members in close contact with a tooth to retain said saddle in place.

1,401,244. BEDCLOTHES SUPPORT. FRANK EASTLUND, Omaha, Nebr. Filed Apr. 7, 1921. Serial No. 459,265. 2 Claims. (Cl. 5—41.)

1. The combination with a bed, of a bed clothing support therefor, said support comprising a vertically disposed rod, clamping means for clamping the lower end of said rod to the bed, outwardly extending arms having their inner ends pivotally connected to the upper end of said rod, arms pivotally connected to the outer ends of the pivoted arms and adapted to move in a horizontal plane, a vertically adjustable sleeve carried by the rod, upwardly and outwardly extending braces pivoted to the vertically adjustable sleeve, the upper ends of said braces being pivotally connected to the outwardly extending arms carried by the upper end of the rod.



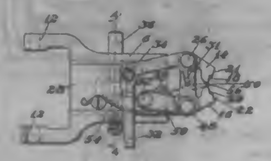
1,401,245. NON-SKID DEVICE FOR AUTOMOBILES. ADOLPH ERAT, Easthampton, Mass. Filed Feb. 11, 1920. Serial No. 357,895. 1 Claim. (Cl. 291—28.)



A non-skid device for automobiles consisting of a sand receptacle having a single outlet and diverging distributing pipes connected thereto for distributing sand in advance of the wheels of the automobile, a valve disk located in the outlet for opening and closing the same, a lever connected with said valve disk, a shaft adapted to be mounted on the dash board of the automobile, a crank arm connected with said shaft, a flexible connection between the crank arm and the lever and a dial for indicating on the dash board the position of the valve disk relative to the outlet.

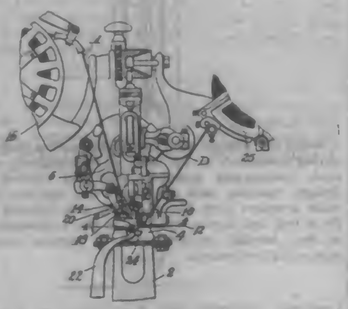
1,401,246. DIRIGIBLE SPOTLIGHT. WILLIS SMITH FARNSWORTH and EARL HINMAN FARNSWORTH, San Francisco, Calif. Filed Nov. 8, 1920. Serial No. 422,481. 2 Claims. (Cl. 240—62.)

1. In combination with a steering wheel, a spot light, control means adapted to be detachably connected at one end to the spider of said wheel for moving said spot light in response to the movement of said steering wheel, and motion-reducing means whereby the distance moved through by said control means at its spot light actuating end is less than the distance through which it moves at its steering-wheel actuated end, said motion-reducing means comprising a pair of reels, one of said reels having a diameter smaller than the other, one end of said control means being connected to one of said reels and the other end of said control means being connected to the other of said reels.



1,401,247. MACHINE FOR INSERTING FASTENINGS. GEORGE GOUDIE, Winchester, and FRED L. MACKENZIE, Beverly, Mass., assignors, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Dec. 18, 1916. Serial No. 137,571. 21 Claims. (Cl. 1—28.)

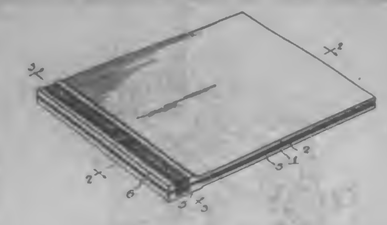
1. In a string nailing machine, the combination with a fastening receiving device, of means for feeding into said device the end portion of a nail string in which the heads of the nails project from one side of the string, and a part cooperating with said device to sever the endmost nail from the string through a relative movement of said part and device acting to move the point of the second nail in the string toward the projecting portion of the head of the first nail in the string.



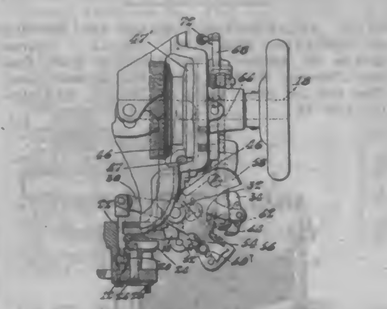
2. A string nail inserting machine having, in combination, nail inserting means, a reel upon which a coil of nail string may be carried, feeding mechanism arranged to engage the heads of the nails of the string to feed the nails of the string successively to nail inserting position, a brake operative to engage the reel to restrain movement thereof, and an elongated tubular member flared at its ends to facilitate the passage of the heads of the nails of the string therethrough and operatively connected to the brake to move the brake away from the reel under the influence of tension applied to the nail string by the feeding mechanism.

1,401,248. WORK-POSITIONING MECHANISM. GEORGE GOUDIE, Winchester, and FRED L. MACKENZIE, Beverly, Mass., assignors to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed June 15, 1918. Serial No. 240,200. 21 Claims. (Cl. 1—32.)

1. In a machine of the class described, means for operating on a heel and normally stationary means adjustable to accommodate heels of different sizes for positioning the breast corners of the heel in different operative positions of the heel at substantially equal distances from the point of operation of the operating means on the heel.



1,401,249. MACHINE FOR INSERTING FASTENINGS. GEORGE GOUDIE, Winchester, and FRED L. MACKENZIE, Beverly, Mass., assignors to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Feb. 3, 1919. Serial No. 274,655. 20 Claims. (Cl. 1—28.)

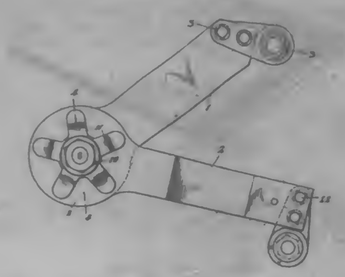


6. In a machine of the class described, means for guiding a shoe during the insertion of a row of nails in the shoe and means for inserting string nails into the shoe with the heads of the nails disposed transversely of the edge of the shoe, said inserting means comprising a throat, means for feeding a shoe past the throat, a nail string guide movable relatively to the throat and operable to conduct the endmost nail of a nail string into the throat, and a driver for forcing the nails into the shoe.

1,401,250. LOOSE LEAF BINDER. CHARLES GOLDSTEIN, Chicago, Ill., assignor to Philip V. Spinner. Filed Oct. 29, 1920. Serial No. 420,343. 3 Claims. (Cl. 129—36.)

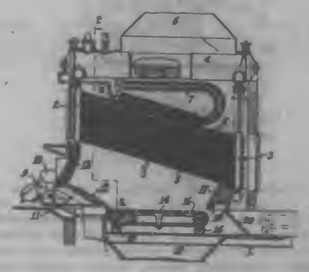
1. A loose leaf binder comprising a binding strap, and cover members adapted to retain loose sheets therebetween, one of said cover members having a channel-like groove extending adjacent one edge thereof and adapted to receive the strap, and the other cover member being provided, adjacent one edge thereof, with a passage adapted to confine the strap.

1,401,251. FASTENER-SETTING MACHINE. JOSEPH GOULDBOURN, Leicester, England, assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Aug. 5, 1918. Serial No. 248,344. 13 Claims. (Cl. 218—15.)



4. In a fastener setting machine, setting means comprising a frictionally positioned spindle adapted to be projected from and retracted within said setting means, means for controlling the projection of said spindle including a pivotally mounted member, means for locking said spindle controlling means in one position, work feeding means comprising a pair of pivotally connected links, means for controlling the path of movement of the point of connection of said links comprising a pivoted member, means for locking said pivoted member in a predetermined position, means for connecting said pivoted members, and manually operated means for moving said connecting means so as to move one or both of said controlling members according as one or both of them are free to move.

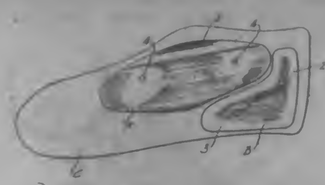
1,401,252. SPRING RETARDING DEVICE. EDWARD VASSALLO HARTFORD, Deal, N. J., assignor to Edward V. Hartford, Inc., New York, N. Y., a Corporation of New York. Continuation of application Serial No. 263,307, filed June 1, 1905. This application filed May 2, 1913, Serial No. 765,071. Renewed Sept. 22, 1919. Serial No. 325,529. 10 Claims. (Cl. 188—130.)



1. A shock absorber for vehicles having spring supporting means; the same comprising a device, the parts

of which move with a resistance or drag and means for attaching said device to relatively independently movable parts of a vehicle to modify the action of the spring supporting means, and means for adjusting or varying

the degree of reluctance or drag in the movement of the parts, said means comprising a spider-shaped spring associated with said parts to apply pressure at a plurality of equidistant points thereagainst.

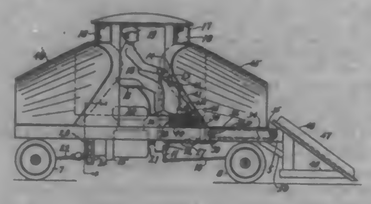


1,401,253. STEAM-BOILER FURNACE AND METHOD OF OPERATING THE SAME. HERMAN C. HEATON, Berwyn, Ill., assignor to The Babcock & Wilcox Company, Bayonne, N. J., a Corporation of New Jersey. Filed May 24, 1917. Serial No. 170,611. 10 Claims. (Cl. 110—44.)

1. A fuel burning method comprising forcibly underfeeding fuel into the front portion of bed of burning fuel and therebeyond bodily carrying along the fuel bed rearward with substantially horizontal travel toward the discharge.

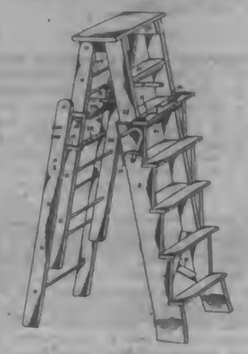
1,401,254. TWO-PIECE ARCH-SUPPORT FOR CORRECTING METATARSAL FOOT TROUBLES. EDMUND HEINTZE, St. Louis, Mo., assignor to Scholl Mfg. Co., Chicago, Ill., a Corporation of New York. Filed Nov. 4, 1920. Serial No. 421,679. 1 Claim. (Cl. 36—71.)

A device for the purpose described, consisting of a rigid longitudinal arch support, a separate and distinct rigid metatarsal arch support having a transversely-disposed portion arranged in advance of said longitudinal arch support, and a portion arranged at one side of said longitudinal arch support, and a piece of leather or other suitable material that carries said arch supports and



prevents them from coming in direct contact with the wearer's foot.

1,401,255. MOLD FOR MAKING FAN-BELTS. CASWELL D. HIMES, Fort Worth, Tex. Filed June 2, 1919. Serial No. 301,150. Renewed May 28, 1921. Serial No. 473,321. 1 Claim. (Cl. 18—42.)



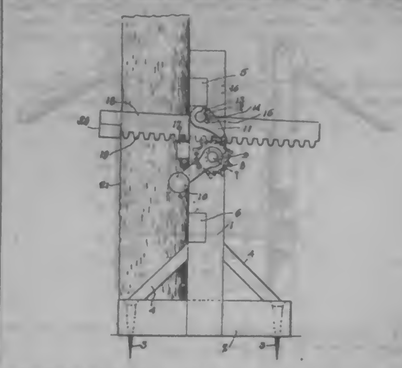
Molds for making belts comprising a ring body member having abutments in the sides of its periphery and separable coöperating members supported thereon having flanges engaging said abutments and spacing the separable members from the said body and forming a cavity for a belt and having cut-outs in the peripheries thereof in their meeting faces to form an annular recess for a separating instrument.

1,401,256. SNOWPLOW. NELS HILL, St. Paul, Minn. Filed Jan. 27, 1921. Serial No. 440,281. 7 Claims. (Cl. 37—57.)

1. A snow plow comprising a flat main frame with a flat snow scoop at its front end, a body mounted upon the main frame to rotate in a horizontal plane and having two reversely arranged, grooved snow deflecting boards one at each end of it, and means for turning and means for holding said body with either deflector in a forward direction so as to deflect laterally the snow taken up by the scoop, and means for supporting and for propelling forward the said main frame.

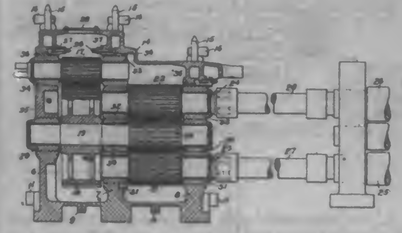
1,401,257. EXTENSION AND COMBINATION STEP-LADDER. WILLIAM HOCHSTALING, Chappaqua, N. Y. Filed Mar. 22, 1919. Serial No. 284,368. 2 Claims. (Cl. 228—21.)

1. A step-ladder comprising a step portion and a prop portion and means for securing the same together, consisting of hooks on one portion and eyes on the other and also a ladder stop on each portion, said stops being admitted to be locked together.



1,401,258. METHOD OF MAKING SHOES. WILLIAM HUBBARD, Rochester, N. Y., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Jan. 28, 1920. Serial No. 354,716. 10 Claims. (Cl. 12—147.)

1. That improvement in methods of making shoes which consists in attaching an untrimmed heel having a toplift of approximately final shape, trimming the heel so as to make the first lift of the heel-body smaller than the toplift, detaching the toplift, applying a cover to the heel, and reattaching the original toplift in registration with its original position on the heel-body.



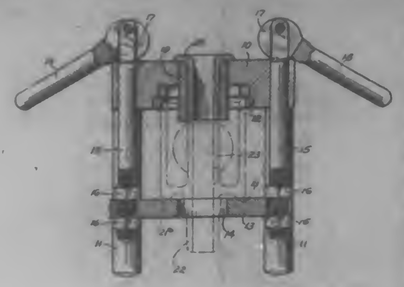
1,401,259. PORTABLE TREE-HOLDER. PETER J. IHRIG, Springfield, Ohio, assignor of one-half to Justus K. Ihrig, Springfield, Ohio. Filed May 16, 1921. Serial No. 470,151. 4 Claims. (Cl. 248—38.)

1. In a tree holder, the combination with a frame comprising a base, perpendicular uprights extending therefrom, a shaft longitudinally mounted in the uprights, and pinions near each end of the shaft, of a clamp having side bars mounted to slide in the uprights, racks on the side

bars adapted to engage the pinions on the shaft, and means to secure the clamp in adjusted positions to maintain its grip upon a tree.

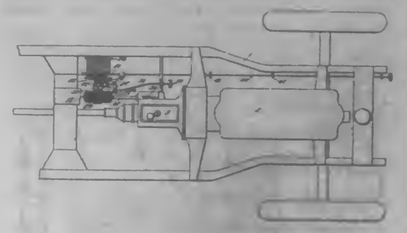
1,401,260. GEAR-DRIVE FOR ROLLING-MILLS. LORENZ IVERSEN, Pittsburgh, Pa. Filed Aug. 15, 1917. Serial No. 186,272. 3 Claims. (Cl. 74—7.)

1. A gear train for a rolling mill comprising in combination vertically spaced roll driving gears, a shaft, a driving pinion mounted thereon and meshing with said gears, and alined therewith, a reduction gear mounted on said shaft, a driving pinion meshing with said reduction gear, bearings at each side of each of said gears and pinions, the bearings of vertically alined gears and pinions being superimposed, and a single retaining element for said superimposed bearings.



1,401,261. MOISTUREPROOF PAINT COMPOSITION. DON ANGELO JEROME, Florence, Italy. Filed June 4, 1920. Serial No. 386,531. 2 Claims. (Cl. 134—53.)

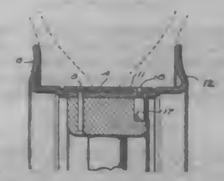
2. A moisture-proof paint composition, comprising a mixture of bees wax, turpentine, propolis, and a raw pigment.



1,401,262. JIG FOR DRILLING VALVE-CAGES. MAX E. KRANZ, Bridgeport, Conn. Filed Jan. 14, 1920. Serial No. 351,507. 3 Claims. (Cl. 77—62.)

1. A jig for holding valve cages, comprising a top plate provided with a recess in its lower surface and an opening through its center concentrically arranged with respect to said recess, said recess being provided with means to adapt it to different sizes of valve cages and said opening being provided with a bushing, a yoke having a cut away

portions, and draw rods attached to said yoke and extending through said plate and provided with means for clamping a valve cage between the wall of said recess and the upper surface of said yoke.



1,401,263. PULLING ATTACHMENT FOR MOTOR VEHICLES. EDWARD LUDESCHER, Cleveland, Ohio. Filed Mar. 1, 1920. Serial No. 362,289. 3 Claims. (Cl. 254—166.)

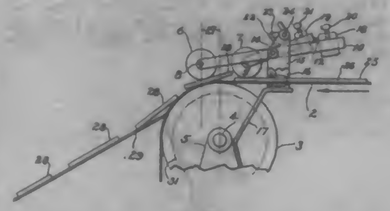
1. The combination with a motor vehicle transmission, of a winding drum and its shaft, a way shaft carried by the transmission case and have a gear meshing with one of the transmission gears, and another shaft geared to the drum shaft and provided with a shifting gear thereon engageable with the gear on the way shaft.

1,401,264. RIM. LAWRENCE LYNCH, Los Angeles, Calif. Filed Dec. 28, 1920. Serial No. 433,580. 1 Claim. (Cl. 152—21.)

A separable rim comprising a rim section secured to the felly of a wheel, said section being provided with bayonet slots on its inner edge, the portion of the rim between the slots and the inner edge being raised above the surface of the body portion, a removable section having a plurality of lugs arranged on its inner edge and adapted to enter said slots, said lugs being of greater thickness than the thickness of the rim and extending above the surface of the rim substantially flush with said raised portion, and means for locking said removable section to prevent relative movement with respect to the fixed section.

1,401,265. METHOD OR PROCESS FOR MAKING FERROZIRCONIUM. RALPH H. MCKEE, New York, N. Y. Filed Jan. 17, 1919. Serial No. 271,737. Renewed Mar. 28, 1921. Serial No. 456,691. 6 Claims. (Cl. 75—1.)

1. The novel process for producing ferro-zirconium, consisting in fusing a zirconium ore with iron and a flux without other reducing agent.

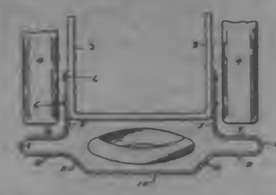


1,401,266. PROCESS FOR ALLOYING ZIRCONIUM AND IRON. RALPH H. MCKEE, New York, N. Y. Filed Feb. 28, 1919. Serial No. 279,051. Renewed Mar. 29, 1921. Serial No. 456,692. 4 Claims. (Cl. 75—1.)

The process of alloying zirconium with iron, which consists in mixing zirconium oxid, free from flux or other reagent, directly with the iron at a temperature above the melting point thereof and in the presence of a sufficient excess of iron to separate the oxygen from the zirconium oxid.

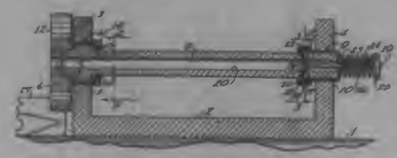
1,401,267. PROCESS OF ALLOYING ZIRCONIUM AND IRON. RALPH H. MCKEE, New York, N. Y. Filed Mar. 29, 1921. Serial No. 456,748. 1 Claim. (Cl. 75—1.)

The process of alloying zirconium with iron, which consists in mixing zirconium silicate, free from flux or other reagent, directly with the iron at a temperature above the melting point thereof and in the presence of a sufficient excess of iron to separate the silica and oxygen from the zirconium silicate.



1,401,268. MATZO BREAKER. JACOB U. MANISCHEWITZ, Cincinnati, Ohio, assignor to The B. Manischewitz Company, a Corporation of Ohio. Filed Sept. 10, 1920. Serial No. 409,459. 6 Claims. (Cl. 146—12.)

6. A roller, a plurality of gravity operated breaker rollers over said roller and adjustable weights having connection with said breaker rollers, as and for the purpose set forth.

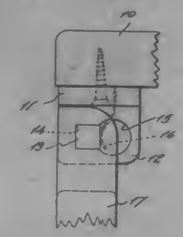


1,401,269. VEHICLE-BUFFER. WILLIAM H. MANNING, Sioux Valley township, Union county, Iowa. Filed Apr. 13, 1920. Serial No. 373,649. 1 Claim. (Cl. 293—55.)

A rear fender for a vehicle including its main frame and wheel-fenders at the sides thereof, consisting of a bar of spring material formed with its end portions extended forwardly and adapted to be secured to the sides of the frame, the portions of the bar adjacent the said end portions being formed with laterally-extending U-shaped loops having parallel arms, and extended in the rear of and to the line of the outer wheel fender edges, and the portions of the bar adjacent the said loops being bent rearwardly coincident with the plane of the forwardly-

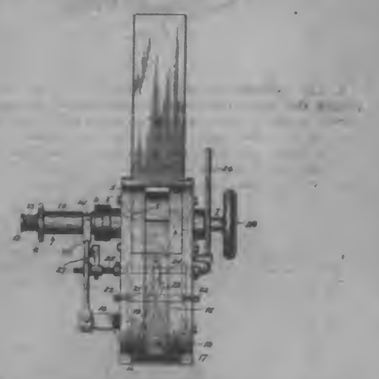
extended end portions, to space the intermediate portion of the bar a distance in the rear of the plane of the rear arms of the loops.

1,401,270. SPINDLE-TIGHTENER. JULIUS MATTSON, Chicago, Ill. Filed Mar. 16, 1921. Serial No. 452,726. 3 Claims. (Cl. 64—55.)



1. The combination with a hollow driven spindle supported for rotation in separated bearings of a collar rigidly mounted on the spindle adjacent to one of said bearings and having its peripheral wall threaded, a slidable collar disposed on the spindle adjacent to the other bearing of the spindle, diametrically opposed guide pins having their outer ends fast in the inner wall of the slidable collar and having their inner ends projecting through guide slots through the walls of the spindle adjacent to its second named bearing, a collar rigidly mounted on the spindle at a determined distance from the second named bearing to limit the movement of the slidable collar in the direction of the first named bearing, an adjusting collar screwing on the first named collar and operable to contact with the first named bearing to occasion a movement of the spindle in the direction of the second named bearing, whereby the slidable collar will be held against the second named bearing and said spindle will be held against longitudinal movement relative to its bearings, and means connecting with the guide pins and exerting a thrust against the end of the spindle adjacent to the second named bearing for preventing play between said adjusting collar and the first named bearing and between said slidable collar and the second named bearing on account of wear on the parts.

1,401,271. CABLEWAY. THOMAS SPENCER MILLER, South Orange, N. J. Filed Feb. 9, 1917. Serial No. 147,539. 38 Claims. (Cl. 37—19.)

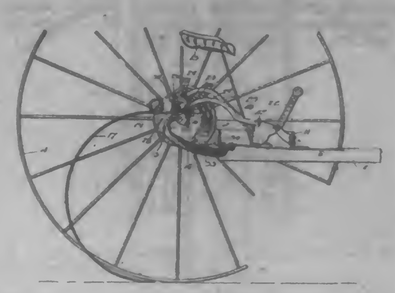


1. In a cable way, the combination of spaced elevated supports, a main trackway extending between and supported by said supports, a carriage on said trackway, a traversing line for the carriage, means for raising and lowering the trackway and carriage, and means between the supports and independent of the carriage and trackway for supporting the traversing line and permitting vertical movement of the carriage without varying the position of the larger portion of the traversing line.

1,401,272. COLLAPSIBLE CHAIR. ANDRZEJ MOCHA, East Douglas, Mass. Filed June 10, 1921. Serial No. 476,875. 1 Claim. (Cl. 155—148.)

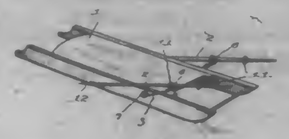
Folding furniture comprising a body element, brackets secured to the lower surface of said body at the corners thereof, lugs depending from said brackets, said lugs having a square opening communicating with a circular opening, the center of the opening being arranged in a plane parallel to said body, legs forked at their upper ends to receive said lugs, square pins fixed to extend through the forks, said pins being normally received in the square openings of the lugs and suited to turn in the adjacent circular opening, and a bent flat spring fixed in said bracket adapted to urge said square pin into the mentioned square opening in said lug.

1,401,273. PACKAGING-MACHINE. WILLIAM A. MOONEY, Richmond, Va., assignor of one-third to William P. Mayo, Richmond, Va. Filed Oct. 20, 1920. Serial No. 418,262. 5 Claims. (Cl. 192—116.)



1. In a packaging machine, the combination with a feed belt and a chute, of a stop-device coöperable with the chute, clutch devices for the feed belt, and manually operable means coöperable with said stop device and said clutch devices for operating both simultaneously.

1,401,274. HAY-RAKE. WALTER F. MOTTIER, El Campo, Tex. Filed June 26, 1919. Serial No. 306,942. 28 Claims. (Cl. 56—392.)

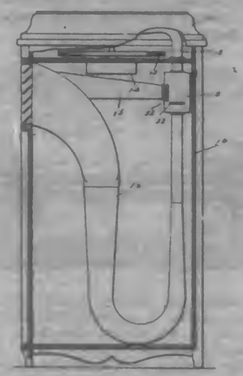


1. The combination with a self dump hay rake having a frame, ground wheels, a rake head, and a clutch between

the rake head and the wheels, of a clutch controlling means movably mounted upon the rake head, means for actuating the clutch controlling means to thereby clutch the rake head to the wheels, means carried by the frame acting positively upon the clutch controlling means to pre-

vent unclutching of the rake head from the wheels through a predetermined cycle of movement, and means for unclutching the rake head from the wheels at the completion of a predetermined cycle of movement, substantially as described.

1,401,275. SLED-PROPELLER. WILLIAM REDFORD MULOCK, Winnipeg, Manitoba, Canada. Filed Mar. 26, 1921. Serial No. 455,913. 5 Claims. (Cl. 208—157.)

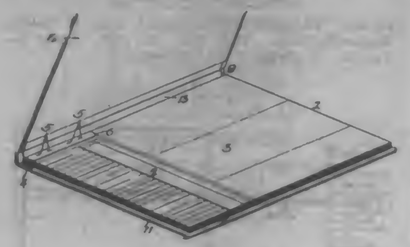


1. The combination with a vehicle, of poles for propelling the same, and linear connections of flexible non-elastic material, each secured at one end to the vehicle and at the other end to an intermediate point on one of the poles whereby said poles have free longitudinal and rotary movement with respect to the points of attachment of the linear connections to the vehicle.

1,401,276. FULL-SWITCH. ARVID H. NERO, New Britain, Conn., assignor to The Arrow Electric Company, Hartford, Conn., a Corporation of Connecticut. Filed Feb. 12, 1919. Serial No. 276,467. 8 Claims. (Cl. 173—354.)

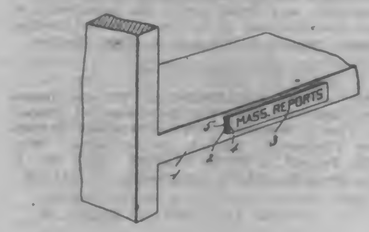
1. An electric switch of the hill and valley type, comprising a rotary switch bar following the hill and valley course, a switch spindle on which said bar freely rotates, an actuating rotor on the spindle, said rotor having inclined arms spaced from the spindle and engaging said switch bar and up which the latter rides during the rise of said bar over the hills of its course, and spring means interposed between said rotor and switch bar to force the bar down said inclines with a positive forward throw in the direction of its rotation after passing the crest of a hill in its course.

1,401,277. TALKING-MACHINE. ROY T. NEWLAND and MELVEL MERRIAM, Butte, Mont., assignors of one-half to Adolph Pincus and William Meyer, Butte, Mont. Filed Aug. 3, 1920. Serial No. 401,072. 2 Claims. (Cl. 181—27.)



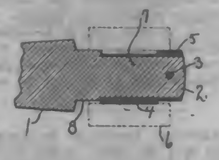
1. In a talking machine, the combination of a tone arm, a trap communicating with one end of the tone arm, a horn projecting from the front wall of said trap and communicating therewith, a second horn depending from the bottom of the trap and communicating therewith, said second horn being curved upwardly and connected with the first mentioned horn, whereby said horns have a single outlet, and means operating within the said trap for establishing communication between the latter, for either or both of said horns.

1,401,278. PROCESS FOR PRODUCING LACTIC FERMENT CULTURE FOR MILK. PETER PETERSEN, Indianapolis, Ind., assignor of one-half to Thomas J. Coster, Chicago, Ill. Filed Dec. 8, 1920. Serial No. 429,055. 1 Claim. (Cl. 99—11.)



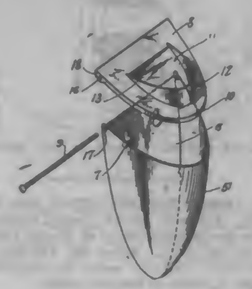
The method of producing milk ferment culture which consists in placing a suitable quantity of milk of selected quality in a closed container; submerging the container in a heated fluid to raise the temperature of the milk to 190 degrees Fahrenheit; maintaining this temperature for one hour to one hour and one-half; agitating the contents of the receptacles while being heated; quickly reducing the temperature to ordinary room temperature approximately 70 degrees Fahrenheit, agitating the contents of the receptacles while being cooled; maintaining said contents at the reduced temperature for ten to twelve hours, repeating the procedure as above outlined for three successive operations, then quickly reducing the temperature of the product to 68 to 70 degrees Fahrenheit, adding the ferment, maintaining this temperature for ten to twelve hours, and then preserving the product at a temperature of 40 to 50 degrees Fahrenheit as a culture for untreated milk.

1,401,279. CHECK-BOOK. HARRY A. PRIEBE, Philadelphia, Pa., assignor to William Mann Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed July 29, 1921. Serial No. 488,425. 5 Claims. (Cl. 281—31.)



1. The combination of a pad of checks and stubs; a tongue secured at the back of the pad and to the stubs, said tongue having a supplemental tongue; and a binder having a pocket therein to receive the tongue, the supplemental tongue extending out of the pocket and forming a means for holding the pad firmly in the binder.

1,401,280. LABELING DEVICE. JAMES H. RAND, North Tonawanda, N. Y. Filed June 10, 1920. Serial No. 387,830. 4 Claims. (Cl. 40—10.)



1. A labeling device comprising a cleat having a salient part in the region of the middle of its back and adapted to be secured to a base at said salient part with its opposite edges free and upstanding from the base, and a removable sheath having rearwardly and inwardly bent lips on its opposite edges engaging the free edges of the cleat.

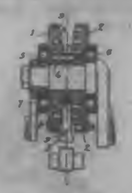
1,401,281. ARBOR. EMIL L. ROHE, La Salle, Ill. Filed July 6, 1920. Serial No. 394,261. 4 Claims. (Cl. 82—44.)

1. In an automatic arbor, a holding part, a larger cylindrical part, integral with said holding part, a smaller auxiliary cylindrical part integral with and eccentric with said larger cylindrical part and an eccentric collar rotatably mounted on said smaller cylindrical part.

1,401,282. ASH-RECEIVER. EDMUND SCHROEDER, Brooklyn, N. Y., assignor to the O. Maurer Company, Incorporated, Brooklyn, N. Y., a Corporation of New York. Filed June 29, 1920. Serial No. 392,628. 3 Claims. (Cl. 131—51.)

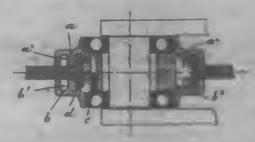
3. An ash receptacle having an ash passage and a downwardly inclined closure therefor pivotally supported at its upper end and lightly balanced to normally stand closed but sensitive to open upon contact of the ash end of a cigar or cigarette therewith.

1,401,283. OPHTHALMIC MOUNTING AND METHOD OF MAKING SAME. ELMER L. SCHUMACHER, Southbridge, Mass., assignor to American Optical Company, Southbridge, Mass., a Voluntary Association of Massachusetts. Filed Dec. 4, 1919. Serial No. 342,440. 8 Claims. (Cl. 18—59.)



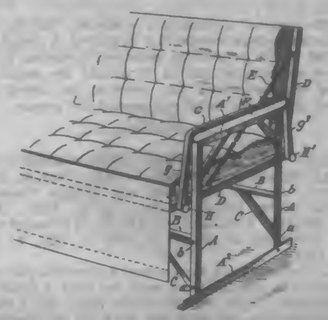
1. The process of making a composite rim for ophthalmic mountings comprising preparing a metal rim with cut prongs pressed up therefrom, preparing a composition non-metallic rim to fit around the metal one, heating the composition rim, pressing the heated composition rim on the metal rim around the prongs.

1,401,284. CONNECTING-ROD ARRANGEMENT FOR STAR-SHAPED MOTORS. LAURENT SEGUIN, Paris, France, assignor to Societe des Moteurs Gnome et Rhone, Paris, France. Filed Aug. 25, 1921. Serial No. 495,300. 5 Claims. (Cl. 74—17.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)



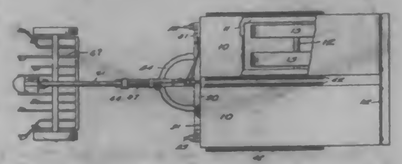
1. A connecting rod arrangement for star-shaped motor comprising in combination a main rod head, a crank pin, two separate flanges secured to said crank pin, a central bore provided in said main rod head for the passage of the crank pin, two cheeks surrounding the main rod head, means for securing said cheeks on the main rod

head, concentric grooves provided in the inner faces of said cheeks and secondary rods provided on their ends



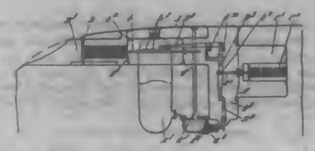
with arcuated portions slidable in two grooves facing each other.

1,401,285. CONNECTING-ROD HEAD FOR ROTATIVE MOTORS. LAURENT SEGUIN, Paris, France, assignor to Societe des Meteurs Gnome et Rhone, Paris, France. Filed Aug. 25, 1921. Serial No. 495,301. 1 Claim. (Cl. 74—17.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)



A connecting rod head for star shaped motor with rotary cylinders comprising in combination two half shells mounted loose on the crank pin, means for securing said shells to each other, grooves formed on the inner side of each shell, the grooves of one shell facing the grooves of the other shell, two groups of connecting rods, the inner end whereof is provided with arcuated portions sliding inside said grooves of the shells, the arcuated portions of one group sliding inside the inner grooves, and the arcuated portions of half the rods of the other group being provided with an enlarged portion sliding inside the outer grooves of one shell, the arcuated portions of the other half being provided with an enlarged portion sliding inside the outer grooves of the other shell.

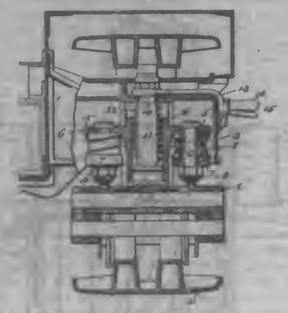
1,401,286. COUCH-HAMMOCK. GEORGE F. SIBBOWER, Flushing, and LOUIS E. PITTONI, New York, N. Y., assignors to Manhattan-Rome Company, Branch of Rome Metallic Bedstead Co., Long Island City, N. Y., a Corporation of New York. Filed Mar. 11, 1921. Serial No. 451,511. 5 Claims. (Cl. 5—61.)



2. A couch-hammock comprising in combination a hammock-seat, an underlying support having a longitudinal member under the seat with uprights embracing the ends of the seat and links in the plane of said uprights depending from the front and back thereof to projections from the respective corners of the seat extending into said plane.

1,401,287. TRACTOR STRUCTURE. JOHN H. SIEBEL, Masonville, Iowa. Filed Nov. 26, 1920. Serial No. 426,530. 2 Claims. (Cl. 180—80.)

1. In a device of the class described a pair of tractors placed side by side, a steering attachment for steering said pair of tractors said steering attachment comprising a curved rack bar fixed to the rear end of the frames of the pair of tractors a gear in mesh with said rack bar, means for imparting rotation to said gear from the engine of one of said tractors, said means including a clutch device having a pair of co-acting clutch members, a lever for controlling said clutch device, the parts being so arranged that movement of the lever in either direction will impart rotation to said gear in either direction.

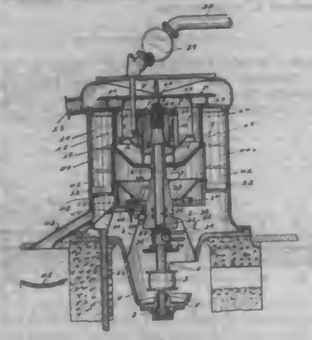


1,401,288. AUTOMOBILE TORPEDO. WILLIAM HORACE SODEAU and VICTORY PERDY FRANCOMBE, St. Tropez, Var, France, assignors to The Whitehead Torpedo Works (Weymouth) Limited, (In liquidation,) Weymouth, England, a British Company. Filed Oct. 5, 1921. Serial No. 505,671. 12 Claims. (Cl. 114—20.)

1. In an automobile torpedo, the combination with means for changing from normal negative buoyancy to positive buoyancy at the end of a practice run, of means whereby said change is permitted to occur only when two distinct conditions based upon the speed and depth of the torpedo exist at one and the same time.

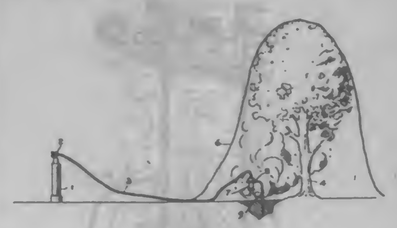
1,401,289. TRACTOR. EDWARD K. STANDISH, Stoughton, Mass. Filed May 22, 1920. Serial No. 383,586. 3 Claims. (Cl. 280—80.) (Filed under the act of Mar. 3, 1883, 22 Stat L., 625.)

1. A land vehicle comprising a body, a truck, cushioning elements between said body and truck, and means for preventing relative movement of said body and truck on said cushioning elements, comprising telescoping members interposed between and carried, respectively, by said truck and body, one of said members being provided



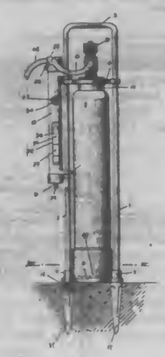
with grooves and the other with pins engageable with said grooves.

1,401,290. RUDDER-BRAKE. CHARLES WILLIAM ALEXANDER TAYLOR, Dunston-on-Tyne, England. Filed Feb. 18, 1920. Serial No. 359,632. 8 Claims. (Cl. 114—170.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)



1. The combination with a rudder quadrant of a drum rotatably mounted thereon and bodily movable therewith, a thwartship rope-way wrapping, and adapted to be traversed by said drum, and braking means for resisting the rotary movements of said drum and thereby damping the movements of said rudder quadrant.

1,401,291. CENTRIFUGAL MACHINE. ENRIQUE A. TOUCEDA, Albany, N. Y. Filed Nov. 24, 1920. Serial No. 426,501. 7 Claims. (Cl. 233—27.)

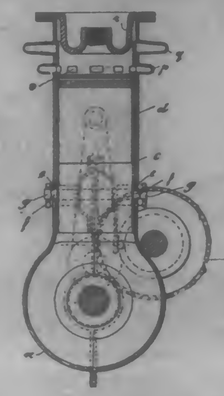


1. A centrifugal machine having a rotary container with two circumferential walls, one perforate and the other imperforate, and means for moving the imperforate wall out of the plane of rotation of the chamber of the container.

1,401,292. METHOD OF DIFFUSING AND DISSEMINATING POISONOUS GASES. JAMES W. VAN METER, San Francisco, Calif. Filed Apr. 11, 1921. Serial No. 460,521. 5 Claims. (Cl. 167—6.)

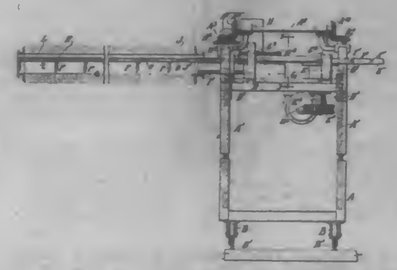
1. The method of disseminating poisonous gases which consists in generating said gases by the reaction of chlorin or metallic elements, in the presence of combustible material adapted to create an envelop of smoke.

1,401,293. PORTABLE CHLORIN-DISPENSER. JAMES VAN METER, San Francisco, Calif. Filed Apr. 11, 1921. Serial No. 460,523. 3 Claims. (Cl. 43—125.)



1. A portable chlorin dispensing apparatus comprising a U-shaped rod, yokes slidable on said rod and adapted to engage a chlorin cylinder at either end, ground engaging prongs secured to the ends of said rod, and a gage carried on said rod operatively connected with said cylinder whereby the discharge of chlorin from said cylinder is visible.

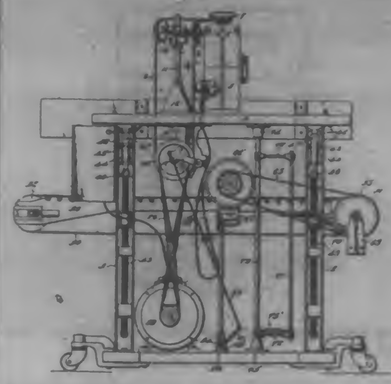
1,401,294. VALVE MECHANISM OF INTERNAL-COMBUSTION ENGINES. ARTHUR WILLIAM WALL, Sheldon, near Birmingham, England, assignor of three-fourths to John White, Jr., Boulton Road, Birmingham, England. Filed Aug. 8, 1919. Serial No. 316,195. 1 Claim. (Cl. 123—75.)



In an internal combustion engine, a casing comprising portions stamped from an integral piece for accurately locating the cylinder and the crank shaft at right angles to each other, a sleeve slidable in said cylinder-locating

portion and maintained in precise relation to the crank shaft, said sleeve being adapted to control ports appur-

taining to the explosion chamber, and means extraneous of said casing and actuated by the crank shaft for reciprocating said sleeve.

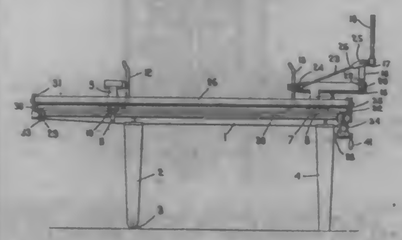


1,401,295. RETORT-STOKING APPARATUS. ARTHUR W. WARNER, Media, Pa., assignor to The American Gas Company of New Jersey, Camden, N. J., a Corporation of New Jersey. Filed Apr. 24, 1920. Serial No. 376,245. 6 Claims. (Cl. 214—34.)

1. In an apparatus of the class described a horizontal sprocket wheel in combination with a push bar made up of links connected by vertical pivots and adapted to wind on the sprocket wheel.

1,401,296. FILLED-SACK-SEWING MACHINE. IRVING F. WEAN, Elizabeth, N. J., assignor to The Singer Manufacturing Company, a Corporation of New Jersey. Filed Jan. 24, 1918. Serial No. 213,509. 10 Claims. (Cl. 112—11.)

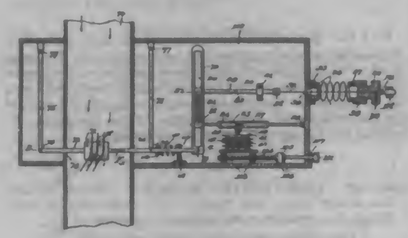
1. In a filled-sack sewing apparatus, the combination with a supporting frame-work, sewing mechanism supported by said frame-work, a motor carried by the latter and a treadle for controlling power transmission between said sewing mechanism and motor, of a sack conveyer frame, means permitting vertical adjustments of said sack conveying frame, sack-conveying



means supported by said frame, and means for actuating said sack-conveyer means including a motor and a power transmitting clutch carried by said frame.

1,401,297. CULTIVATOR. HENRY C. WILLIAMS, Ravine, Miss. Filed Feb. 26, 1918. Serial No. 219,240. 1 Claim. (Cl. 97—45.)

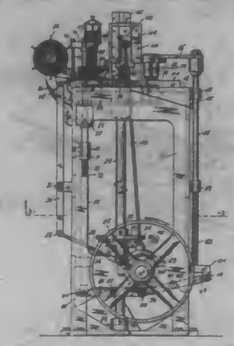
In a cultivator, a hoe having a rod, means to pivot the rod, means engageable with said rod to oscillate the hoe, a frame, a bearing in which said rod slides, means pivoting the bearing to the frame, and means operable to slide the frame to bring said means and the bearing into contact to raise the hoe.



1,401,298. BUNDLING-MACHINE. BERT R. WILLIAMSON, Fairfield, Me., assignor to Keyes Fibre Company, Waterville, Me., a Corporation of Maine. Filed Oct. 9, 1919. Serial No. 329,572. 7 Claims. (Cl. 100—57.)

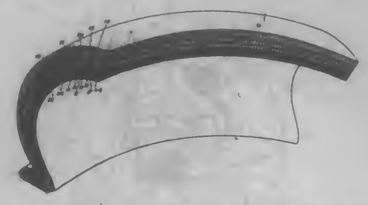
1. A bundling machine comprising a standard, a pair of oppositely disposed heads mounted thereon, means for supporting a stack of articles to be bundled between said heads, a head support on said standard, one of said heads mounted for longitudinal movement in the head support, a lever fulcrumed upon and transversely of the head support, a link pivoted to the longitudinally movable head and to the lever whereby the head will be projected longitudinally on the head support when the lever is swung about its fulcrum, and means for locking the head in its projected position.

2. A bundling machine comprising a standard, a pair of oppositely disposed heads mounted thereon, means for supporting a stack of articles to be bundled between said heads, a head support on said standard, one of said heads mounted for longitudinal movement in the head support, a lever fulcrumed upon and transversely of the head support, a link pivoted to the longitudinally movable head and to the lever whereby the head will be projected longitudinally on the head support when the lever is swung about its fulcrum, a portion of the lever and link engaging with a fixed portion of the machine when the lever is swung sufficiently to bring the pivot connecting the lever and link past the line running through the lever fulcrum and through the pivot connecting the link and head whereby the head is locked in projected position.



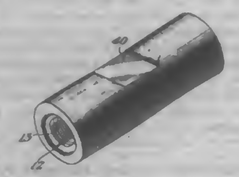
1,401,299. METER. WALTER JACOB WOHLENBERG, New Haven, Conn. Filed Nov. 10, 1917. Serial No. 201,412. Renewed Nov. 17, 1921. Serial No. 515,971. 15 Claims. (Cl. 73—167.)

1. In fluid flow meters, the combination, with an element responsive to the flow impulse of the fluid, of an element proportionally responsive to variations of the fluid's density and a lever composed of two members movable lengthwise relatively to each other, said lever being provided with a fulcrum, a resisting connection and a power connection, one of said members, called the link, being provided with the fulcrum and one of said connections, the other member, called the guide, being provided with the other of said connections, said link having its position relatively to said guide mechanically controlled by the element responsive to variations of the fluid's density, said lever having one end mechanically connected with the element responsive to the fluid flow impulse, as and for the purpose set forth.



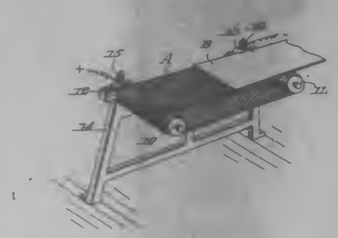
1,401,300. MACHINE FOR MANUFACTURING CLOSURES FOR BOTTLES AND OTHER RECEPTACLES. EMILIO ALBERTI and JOHN ALBERTI, New York, N. Y., assignors to International Cork Company, Brooklyn, N. Y., a Corporation of New York. Filed June 19, 1916. Serial No. 104,550. 14 Claims. (Cl. 113—80.)

1. In a machine for applying protecting disks to closures of the cap variety, the combination with means for applying a cementing material to the exposed face of the sealing disk of the complete closure, means for placing a protecting disk on top of and in contact with the cement-



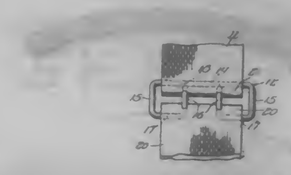
ing material, and means for applying pressure to the closure for maintaining sa... contact.

1,401,301. TIRE-ARMOR. W HERBERT ALDRIDGE, Portland, Oreg. Filed Oct. 25, 1920. Serial No. 419,212. 2 Claims. (Cl. 152—18.)



1. In a tire, superposed rubber layers having a canvas layer arranged therebetween, an armor embedded in one of the rubber layers, and staples engaged through the canvas layer from the inner side thereof and through the armor connecting the armor to the canvas layer, the free end portions of the staples being embedded in the first rubber layer and the backs of the staples being embedded in another rubber layer.

1,401,302. SUCKER-ROD COUPLING. JULE C. AXELSON, Alhambra, Calif., assignor to Axelson Machine Company, a Corporation of California. Filed Apr. 11, 1921. Serial No. 460,203. 5 Claims. (Cl. 287—117.)



sucker rod coupling comprising: a hollow cylinder interiorly threaded at each end; and a flattened central portion, the central portion being substantially as thick as the ends.

1,401,303. ELECTRICAL DRIER FOR PAPER AND THE LIKE. WILLIAM CHARLES BALDWIN, Ottawa, Ontario, Canada. Filed Jan. 20, 1919. Serial No. 272,150. 1 Claim. (Cl. 34—12.)

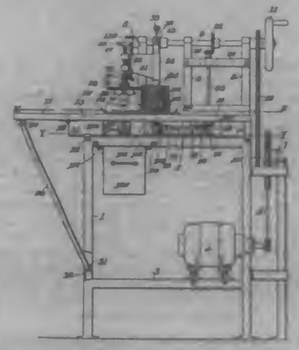
In a drier, an endless belt formed of electric conductive material, means for passing an electric current through the belt to heat the same.

1,401,304. PACKAGING DEVICE. MATHIAS B. BECKER, Chicago, Ill. Filed Apr. 20, 1921. Serial No. 462,885. 1 Claim. (Cl. 24—186.)

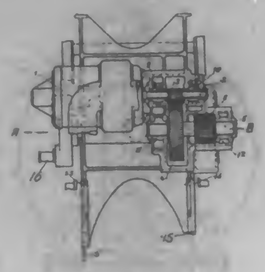
A device of the class described comprising a belt, a single piece of wire pointed at both of its ends and bent to provide a cross bar (14), a pair of side bars (15—15) which are parallel to each other and disposed at right angles to the aforesaid cross bar (14), a pair of shorter cross bars (17—17) which are disposed in the same plane with said side bars (15—15) and said first mentioned cross bar (14) and in a straight line at right angles to said side bars (15—15), the extremities of said wire being turned away from said shorter cross bars (17—17) to provide straight pointed tangs (16—16) which are disposed in a plane oblique to the plane which includes the first mentioned cross bar (14), the side bars (15—15) and the shorter cross bar (17—17), the points of said tangs (16—16) lying to one side of, but closely adjacent to, said first mentioned cross bar (14), one end of said belt being impaled upon said tangs and lying against the aforesaid shorter cross bars (17—17), the other end of the belt extending under said first mentioned cross bar (14) from the side thereof opposite said tangs and being also impaled upon said tangs.

1,401,305. CRUTCH. EDGAR C. BRECROFT, Pelham Manor, N. Y. Filed Mar. 10, 1919. Serial No. 281,690. 4 Claims. (Cl. 135—52.)

4. The combination with a cushion having flaps adapted to engage opposite sides of the crutch, of means coacting with said flaps to fasten the cushion to the upper end of the crutch, said flaps carrying stiffening plates to prevent the cushion from longitudinal buckling and from being displaced on the crutch transversely to the length of the cushion.



1,401,306. TIRE-FLAP. GEORGE R. BIRD, Rockford, Ill. Filed Mar. 14, 1921. Serial No. 452,193. 6 Claims. (Cl. 152—20.)



2. A tire flap comprising a rubber base strip and a fabric backing united and being of such width and thickness as to cover and conform to the inner wall of a tire casing at the rim opening, and a relatively narrow fabric rib along the center of the backing adapted to be positioned against the rim between the separated edges of the tire casing for holding the flap against lateral displacement.

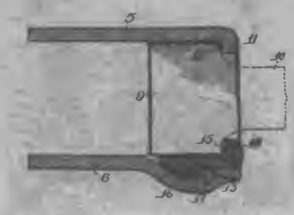
1,401,307. DISK-CUTTING MACHINE. FRANK BLANDO and SANTE DUCA, New York, N. Y. Filed Aug. 6, 1921. Serial No. 490,288. 44 Claims. (Cl. 146—11.)

24. The combination with a cylindrical cutter, of means to reciprocate the same, means for rotating said cutter, a work-supporting table having an opening arranged below the cutter, a trap-door to fit said opening, means for supporting said trap-door in the opening during each cutting operation, and means for dropping the trap-door below the table after each cutting operation.

1,401,308. STEAM-TURBINE-DRIVEN LOCOMOTIVE. HEINRICH BOLTHAUSER, Zurich, Switzerland. Filed Nov. 6, 1920. Serial No. 422,247. 4 Claims. (Cl. 105—38.)

4. An exchangeable driving unit for turbine driven locomotives, comprising a frame, arranged to be secured in the locomotive frame, a turbine, reduction gearing and lay shaft and cranks pertaining thereto mounted in said frame and removable therewith.

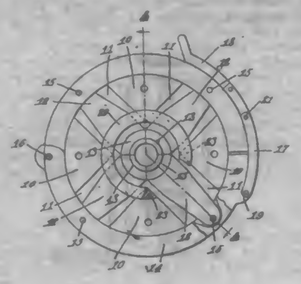
1,401,309. [WITHDRAWN.]



1,401,310. APPARATUS FOR REMOVING COKE FROM STILLS. CHARLES B. BURNETT, Philadelphia, Pa., assignor to The Atlantic Refining Company, Philadelphia, Pa., a Corporation of Pennsylvania. Original application filed Feb. 7, 1918, Serial No. 215,764. Divided and this application filed Mar. 11, 1919. Serial No. 281,914. 20 Claims. (Cl. 196—4.)

1. The combination with a horizontal cylindrical oil still having an opening in one end thereof, the lower boundary of said opening being arcuate and coinciding with the arcuate bottom of said still, of manhole structure having an arcuate portion surrounding the lower boundary of said opening, the inner arcuate wall of said manhole structure lying below the inner surface of the arcuate bottom of said still.

6. Apparatus for removing deposit from an oil still comprising a plurality of rectangular rigid frames, and flexible connections at corners of said frames connecting them in chain.

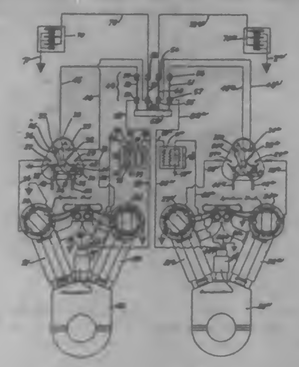


1,401,311. YOKE FOR DRAFT-GEARS. CHARLES A. CARSCADEN, Chicago, Ill., assignor to American Steel Foundries, Chicago, Ill., a Corporation of New Jersey. Filed Sept. 13, 1917. Serial No. 191,271. 3 Claims. (Cl. 213—42.)

1. A yoke for draft gears having an integral hooded forward end, an integral lug on the upper member and an integral shoulder on the bottom member of the hood, and a one-piece locking member insertible bodily through the front of the yoke and having a lug on its under side

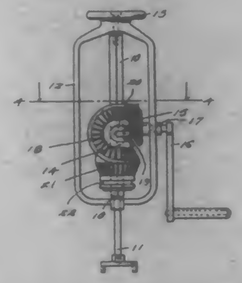
to engage the shoulder on the bottom member and a lug on its upper side to coöperate with the lug on the upper member, to retain a coupler butt in the yoke.

1,401,312. CHUCK. WILLIAM CASTANIE, Port Arthur, Tex. Filed Dec. 27, 1920. Serial No. 433,866. 3 Claims. (Cl. 279—33.)



1. In a pipe clamping device, a head, said head being cut away to provide clearances, a clamp arm supporting ring secured to the head, clamp arms carried by the ring and having jaws formed at the free ends thereof, said ring being formed of opposed sections, means for connecting the sections to permit the sections to be moved with respect to each other, and said sections adapted to move the clamp arms and jaws toward and away from each other.

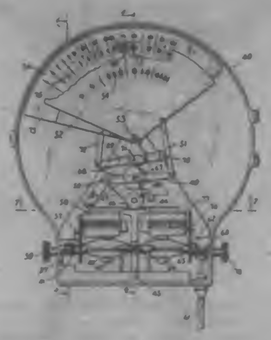
1,401,313. IGNITION SYSTEM. WILLIAM A. CHRYST, Dayton, Ohio, assignor to The Dayton Engineering Laboratories Company, a Corporation of Ohio. Filed Oct. 23, 1918. Serial No. 259,379. 5 Claims. (Cl. 290—4.)



1. In an ignition system for self-propelled vehicles, the combination with a plurality of propulsion units, each of which includes an internal combustion engine; of a plurality of ignition units operably associated with each engine; sources of current for the ignition units of each engine including a storage battery and a generator either of which supply ignition, and said generator adapted to charge said battery; manual means for controlling the current supply to certain ignition units from the

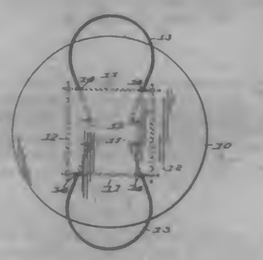
battery or generator; and an emergency switch adapted to cut off the battery or generator sources of current

from the ignition units of all the engines and at the same time to cut off the batteries from the generators.



1,401,314. OPERATING DEVICE FOR VALVE-GRINDERS. ROY E. CLARK, Earlham, Iowa. Filed Nov. 26, 1920. Serial No. 426,442. 4 Claims. (Cl. 74—60.)

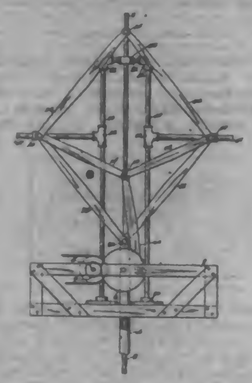
1 A valve grinding tool having a frame, a chuck spindle revolubly mounted in the frame, a head keyed to the spindle and provided with a plurality of gear members, a driving pinion mounted upon the frame for selective engagement with said gear members, and complemental interlocking guiding means carried by the drive pinion and the head respectively adjacent to the gear members of the latter.



1,401,315. METER. WILLIAM T. CLARK, Philadelphia, Pa., assignor of one-half to E. W. Marshall, Yonkers, N. Y. Filed June 11, 1913. Serial No. 772,949. 25 Claims. (Cl. 235—1.)

19. A combustion engine fuel meter, an actuating mechanism therefor comprising an engine driven member, a meter driven member and a friction clutch forming a slip connection between said members; said clutch having a spring and an adjusting device therefor by which the amount of slip of said connection may be changed, a fuel pump connected with the meter driving member, and a valve in the fuel pipe arranged to automatically limit the rate of movement of the pump and the meter driving member, a centrifugal governor connected with the meter driving member, an indicating dial connected with said governor and a register connected with the meter driving member; combined with engine driven mechanism, a speed indicator for indicating the speed of said mech-

anism having a dial arranged with said indicating dial to jointly give an indication, and a register connected with the speed indicator adapted to register the indications of said dials.

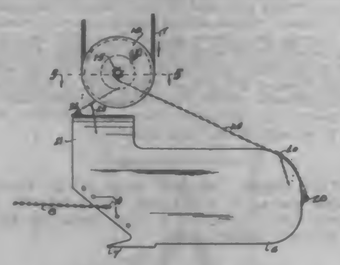


1,401,316. FLUE-STOP. JAMES E. CLOUD and HIRAM F. STALTER, Harpster, Ohio. Filed May 21, 1919. Serial No. 298,672. 3 Claims. (Cl. 126—319.)

2. A flue stop having a molded plastic body portion and an embedded reinforcement consisting of intersecting anchoring and connecting elements of which the former are provided with eyes extending substantially to the inner surface of the body portion, and looped clamping members having their side arms engaged respectively with said eyes and having their extremities embedded in the body portion and provided with terminal lateral studs.

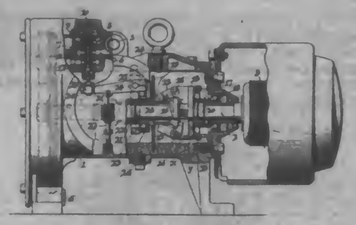
1,401,317. PUMP-JACK. HARRY COMSTOCK, Sunland, Calif. Filed July 22, 1920. Serial No. 398,239. 2 Claims. (Cl. 103—82.)

1. A pump jack comprising a pair of telescopic suction rods, a guide frame extending laterally in opposite directions with relation to said rods, runners on said lateral extensions, toggle links connecting said runners, a crank arm for actuating said toggle links in opposite directions, and toggle links connecting the respective runners to the



respective suction rods and extending laterally in opposite directions from said runners.

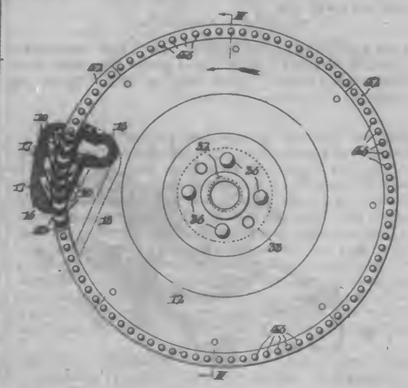
1,401,318. FILM-CEMENT HOLDER AND SPREADER. HENRI COUILLARD, Los Angeles, Calif. Filed Oct. 28, 1920. Serial No. 420,315. 7 Claims. (Cl. 91—67.4.)



1. A dispensing can having a nozzle, a rod projecting beyond the same to form a spreader, and the inner end of said rod being reversely bent to form a counterbalancing weight and a stop to limit the lengthwise movement of the rod outwardly through the nozzle of the can.

1,401,319. BOOM-DRAG-LINE EXCAVATOR. WILLIAM H. CRAWFORD, Los Angeles, Calif., assignor to Charlotte E. Crawford, Los Angeles, Calif. Filed Mar. 22, 1920. Serial No. 367,818. 9 Claims. (Cl. 37—54.)

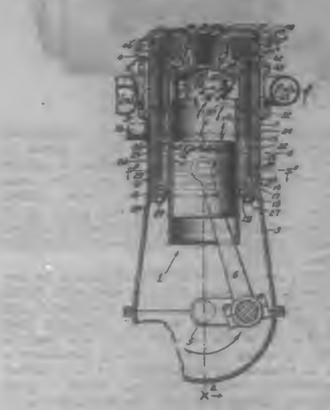
1. In a drag line excavator, an excavating bucket, and a supporting pulley for said bucket having a hoisting cable connected thereto, and arranged so that throughout the rotation of said pulley, as the bucket is raised, said pulley will continually shift relative to said bucket to one side of the center of gravity thereof to cause the bucket to tilt and dump when hoisted.



1,401,320. SPEED-GOVERNOR FOR ENGINES OR MOTOR DEVICES. LEWIS A. DARLING, Philadelphia, Pa., assignor to Electric Service Supplies Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Mar. 27, 1918. Serial No. 225,016. 13 Claims. (Cl. 264—3.)

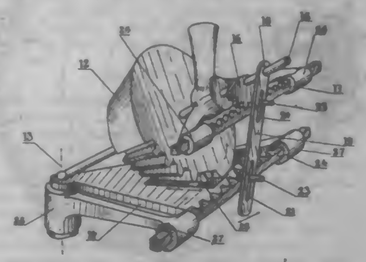
1. A governor mechanism comprising, in combination, an automatic rotary speed-responsive device driven by the motor to be governed; means including a member actuated directly by said rotary speed-responsive device for normally controlling the supply of motive medium to said motor; and means actuated by said rotary speed-responsive device independently of the means afore-mentioned to apply a friction brake load to said motor under predetermined conditions.

13. A turbine governor mechanism comprising, in combination, a shaft; a governor device on said shaft including governor weights, a yoke pivotally connected to and supporting said weights and movable along said shaft by them, and a sleeve also movable along said shaft by said weights; a spring normally opposing movement of said sleeve as aforesaid by said weights; a valve-controlling arm operatively connected with said sleeve; a speed-regulating spring acting upon said arm and sleeve in opposition to the influence of said weights as aforesaid; means for adjusting the tension of said regulating spring; and a friction member in the path of movement of said yoke coöperating therewith to apply a friction brake load to the turbine in the absence of effective control by said valve.



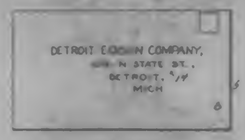
1,401,321. TURBINE AND TURBINE-WHEEL. LEWIS A. DARLING, Philadelphia, Pa., assignor to Electric Service Supplies Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Mar. 4, 1919. Serial No. 280,562. 10 Claims. (Cl. 253—93.)

1. In a turbine, the combination of a wheel with a plurality of peripheral rows of radial-flow buckets, means



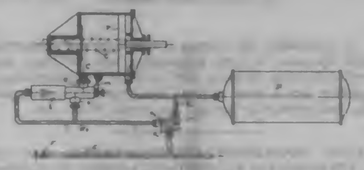
for directing motive fluid against the buckets of one of said rows from one side thereof, means for redirecting the fluid leaving from said buckets to strike the buckets of the other row, and means for again redirecting the fluid back through the buckets of the second row.

1,401,322. COMPOSITE-CYLINDER AND ROTARY-SLEEVE-VALVE MOTOR. IRA M. DAVIDSON, Santa Paula, Calif., assignor of one-third to Raymond I. Moses, Los Angeles, Calif. Filed Oct. 11, 1915, Serial No. 55,344. Renewed Apr. 8, 1919. Serial No. 288,599. 5 Claims. (Cl. 123—59.)



1. The combination with a motor crank-case of a plurality of individual cylinders each having an intake and an exhaust port, rotary valve sleeves surrounding the respective cylinders and adapted to appropriately open and close the respective intake and exhaust ports, said cylinders being provided with base flanges adapted to seat upon the crank case, an outer casing inclosing the cylinders and their sleeves and seating upon said flanges, studs depending from said outer casing and extending down through the flanges, said studs being secured to the crank-case to thereby mount the casing in place over the cylinders and maintain the same in true alinement over the crank case.

1,401,323. APPARATUS FOR CUTTING TOOTHED GEAR-WHEELS. RENÉ LOUIS JULES DELAMARE, Bois-Colombes, France. Filed July 8, 1920. Serial No. 394,811. 1 Claim. (Cl. 90—9.)



In a gear cutting machine in which the gear to be cut is attacked by a tool having a rolling movement with respect thereto, a control device for this rolling movement comprising a gear guide fixed to the wheel to be cut, a guide rack meshing with said gear guide, and a mechanical connection between said guide rack and the tool support.

1,401,324. COMBINED STATEMENT AND RETURN ENVELOP. RALPH DORITY, Washington, D. C., and HAROLD W. BERNSTEIN, Brooklyn, N. Y., assignors of one-third to George Edwin Ijams. Filed Mar. 1, 1921. Serial No. 448,025. 8 Claims. (Cl. 282—25.)

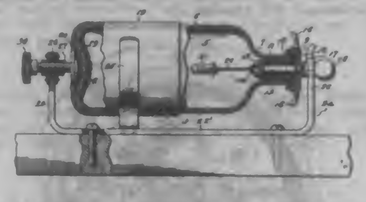
1. A mailable statement and return envelop comprising a body portion and a sealing flap and bearing duplicate statement forms, one of which is detachable and the other of which is upon an integral part of the envelop, the detachable statement form being so related to the body of the envelop as to leave the latter unimpaired for mailing after the detachable form has been detached.

1,401,325. ADJUSTABLE BRAKE ARRANGEMENT OPERATED BY COMPRESSED FLUID, ADAPTED TO BE USED IN RAILWAY-TRAINS OR THE LIKE. GUSTAV DROLSHAMMER, Hamar, Norway, assignor of one-half to Ivar Drolshammer, Drammen, Norway. Filed July 23, 1920. Serial No. 398,566. 10 Claims. (Cl. 303—32.)

1. In an air brake, the combination comprising a brake cylinder, a main air line, a pressure regulator casing having connections with said cylinder and air line, a piston valve slidable within said casing to control communication between the cylinder and air line acted upon by the pressure within the brake cylinder, a regulator piston in said casing acted upon by line pressure on one side, a spring arranged to act upon said piston in opposition to air line pressure, and a spring disposed between said valve and piston and adapted to close said valve after reduction of pressure in the brake cylinder.

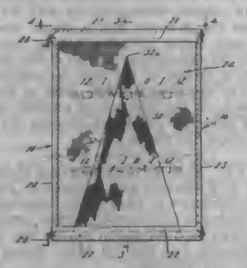
1,401,326. SEAL. WILLIAM KERR EDGAR, Lawrence, Kans., assignor to Edgar Steel Seal & Mfg. Co., Lawrence, Kans. Filed Nov. 2, 1920. Serial No. 421,298. 4 Claims. (Cl. 292—307.)

1. A seal including a strip having a longitudinally slotted removable end portion, said slot being of a length greater than the width of the seal and of a width greater



than twice the thickness of the seal, said seal, when separated from the end portion, being insertible at its ends through the slot, there being weakened portions in the seal, the end portions of the seal being bendable backwardly at the weakened portions to prevent displacement of the slotted portion from the seal.

1,401,327. EYEGLASSES OR SPECTACLES. ROBERT P. EARHART, Juniata, Pa. Filed Oct. 5, 1920. Serial No. 414,724. 2 Claims. (Cl. 88—41.)

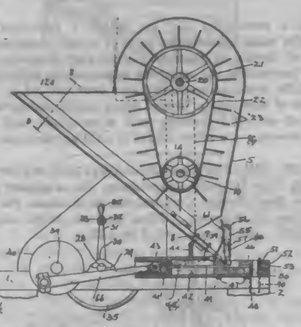


1. A pair of glasses, comprising a frame, and a multifocal lens mounted for rotation in said frame, a portion of the frame being set inwardly to define a pair of shoulders and to expose a portion of the periphery of the lens thereby to facilitate the rotation of the lens, said lens carrying a projection adapted to limit the rotation of the lens and cooperating with said shoulders to dispose certain parts of the lens to the field of vision.

1,401,328. FIRE-EXTINGUISHING DEVICE. ORLANDO B. EDWIN, New York, N. Y., and HAROLD V. GILOS, Chicago, Ill., assignors to Foamite Firefoam Company, New York, N. Y., a Corporation of Delaware. Filed Dec. 10, 1920. Serial No. 429,639. 5 Claims. (Cl. 169—36.)

1. In a fire extinguishing device, a container having an opening at one end, said container holding a fire extinguishing charge, a closure for said opening, illuminating means mounted in said container and connected to said closure and a dispensing cup mounted on the other end of the container.

1,401,329. LIGHT-DISSOLVER. HOWARD M. EWING, Los Angeles, Calif., assignor to Famous Players-Lasky Corporation, a Corporation of New York. Filed June 17, 1918. Serial No. 240,386. 9 Claims. (Cl. 240—45.4.)

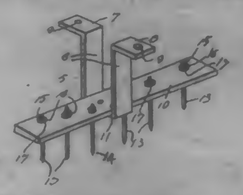


1. A light dissolve screen comprising a continuous curtain embodying a fabric one end part of which is transluscent and light dispersive and the other end part of which is relatively opaque, the two parts joining each other on a V-shaped line.

1,401,330. INTERLOCKING CHAIR-BASE. THOMAS WITHERBEE FOOTE, Cleveland, Ohio, assignor to The Marble & Shattuck Chair Company, Bratenahl, Ohio, a Corporation of Ohio. Filed June 20, 1918. Serial No. 240,918. 2 Claims. (Cl. 155—138.)

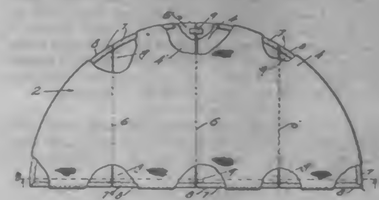
1. In a chair base the combination of legs having their inner ends abutting to form a central portion, having an aperture therethrough, said legs having grooves in their sides adjacent such central portion, locking blocks having complementary formed tongues adapted to fit in such grooves in said legs, a sleeve mounted in such aperture, a top plate fastened to such central portion and adapted to cover said blocks and being apertured to receive said sleeve, and being provided with an annular recess about such aperture, a bottom plate fastened to such central portion to cover said blocks and being apertured to receive said sleeve, said sleeve being peened over within such recess to present a flush upper surface with said top plate and over such lower plate to lock said legs and blocks in position.

1,401,331. MACHINE FOR SIZING DOWEL-PINS AND THE LIKE. THOMAS W. FOOTE, East Cleveland, Ohio. Filed May 2, 1919. Serial No. 294,219. 2 Claims. (Cl. 144—197.)



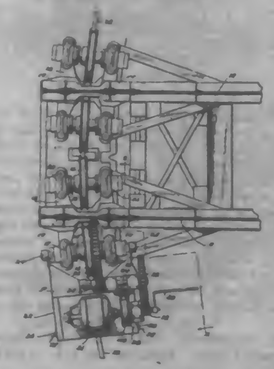
1. In mechanism of the character described, the combination of a base provided with alined slots and apertures, a plunger and push rod mounted in one of such slots, a die mounted in another of such slots, a recessed receiving block mounted between said plunger and die and adapted to receive single dowel pins in alinement with said plunger and die, means for feeding single dowel pins into such recess, said means comprising a hopper for the pins having a delivery spout adjacent such recess, a swinging arm mounted on said base over such recess and extending into the same and means for reciprocating said plunger to force a pin through said die and for swinging said arm to allow single pins to drop into such recess ahead of said push rod.

1,401,332. HARROW. PLEAS W. GREEN, Egypt, Miss. Filed Jan. 14, 1920. Serial No. 351,418. 2 Claims. (Cl. 55—19.)



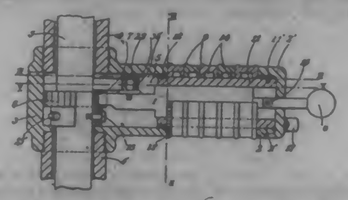
1. In a harrow structure, a substantially U-shaped attaching bar member having horizontal attaching flanges formed upon the upper ends of its legs, a horizontal bar at-

tached to the bight portion of said U-shaped attaching member, said bar provided with a plurality of openings, harrowing teeth extending through said openings, and



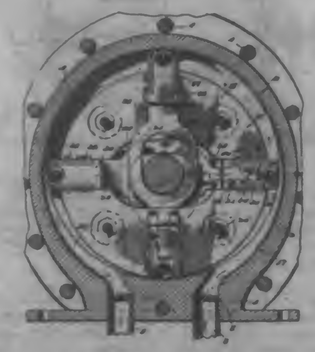
means for adjustably connecting said harrowing teeth to said bar to regulate the length of projection of the teeth beneath the bar.

1,401,333. ASBESTOS TABLE-MAT. GEORGE R. HEALEY, Los Angeles, Calif. Filed Feb. 25, 1920. Serial No. 361,345. 2 Claims. (Cl. 65—45.)



1. In a protecting mat for tables, a unit having substantially rigid subsections, each of which comprises a plurality of layers of relatively thin stiff material, elastic hinges connecting the adjacent edges of the subsections to permit the same to be folded, one over the other, the end portions of said elastic hinges being positioned between the sheets of material forming said subsections, and binding strips covering the outer edges of said subsections.

1,401,334. TRANSFER-TABLE-DRIVING MECHANISM. MEINE GEO. HILPERT, Harrisburg, Pa., assignor to Bethlehem Steel Bridge Corporation, Bethlehem, Pa., a Corporation of Delaware. Filed May 21, 1920. Serial No. 383,056. 18 Claims. (Cl. 104—43.)

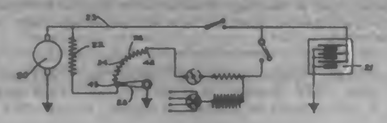


1. In a transfer table having girders and trucks supporting the same adapted for pivotal movement relative to the girders due to unevenness in the track, a frame, means supporting said frame on the table including a pivotal connection to an axle of one of said trucks, and a motor on the frame connected to drive said axle and thereby the table.

1,401,335. ANTITHEFT-LOCK FOR AUTOMOBILES. THOMAS WILLIAM IRVINE, Aspatria, England. Filed Mar. 30, 1920. Serial No. 369,935. 5 Claims. (Cl. 70—126.)

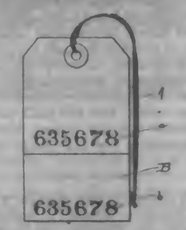
1. A locking device of the class described including in combination with the steering column casing having the steering rod and spark and gas rods therein, of means carried by the casing and including a main locking bolt shiftable radially with reference to the steering rod for engaging and disengaging the same to prevent relative rotation thereof, and separate locking elements carried by the locking bolt for engaging with the said spark and gas rods.

1,401,336. ROTARY ENGINE. LOUIS V. JOHNSON, Fort Worth, Tex. Filed July 6, 1920. Serial No. 394,216. 3 Claims. (Cl. 121—84.)



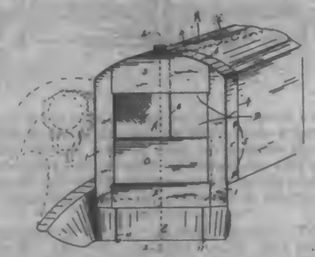
1. In a rotary, fluid pressure engine, a casing having an inlet and an exhaust communicating with its chamber, a rotor within the chamber, and a piston carried by the rotor, the said piston including a head having an end presented to the circumferential wall of the chamber, antifriction means carried by the head for coaction with the said wall, and means at opposite sides of the said antifriction means, in the direction of rotation of the rotor, establishing fluid-tight connection between the piston head and the walls of the casing.

1,401,337. ELECTRICAL SYSTEM FOR ENGINES. CHARLES F. KETTERING and WILLIAM A. CHRYST, Dayton, Ohio, assignors to The Dayton Engineering Laboratories Company, a Corporation of Ohio. Original application filed July 16, 1914. Serial No. 851,535. Divided and this application filed Feb. 17, 1916. Serial No. 78,894. 6 Claims. (Cl. 219—55.)



1. In a rheostat, the combination with a movable support carrying resistance material; of a movable contact

member; and means actuated by the movement of the contact member for moving the support whereby to present

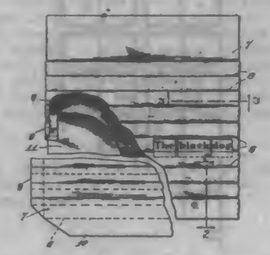


different portions of the resistance material to the action of the contact member.

1,401,338. BAGGAGE-CHECK. JOHN R. LARACY, Dorchester, Mass. Filed Dec. 16, 1918. Serial No. 267,083. 5 Claims. (Cl. 283—20.)

1. An identification check having two separable parts marked with identical check numbers; one of said parts being marked also with a test number; said test number being such that when added to the check number it makes a predetermined test total.

1,401,339. RADIATOR-COVER. OLE ALONZO LARSON and CHARLES J. LALLISS, Salt Lake City, Utah. Filed Dec. 15, 1920. Serial No. 430,954. 2 Claims. (Cl. 257—132.)



1. In an automobile radiator cover the combination of strips of flexible waterproof fabric sewed together to form a frame-like shield having a rectangular sight opening; a lining therefor having similar form; a base block fastened between the lower end portions of said shield fabric and lining fabric and having a recess cut out of its front edge; a spring roller mounted on said base block; a flexible shutter adapted to be wound on said roller and to be unwound from said roller and cover more or less of the sight opening in said fabrics; a tube of easily bent material fastened between said fabrics and adjacent the filler pipe of the radiator; a cord having one end fastened to said shutter and passed through said tube toward the rear and under the hood of the automobile; and means to fasten the fabric shield to the radiator and mud guard of the automobile.

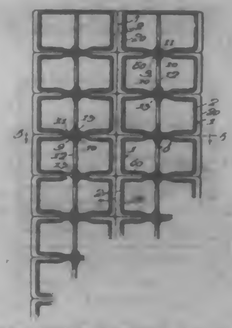
1,401,340. BEDCLOTHES-HOLDER. ROBERT J. LINDSAY, Philadelphia, Pa. Filed Jan. 19, 1921. Serial No. 438,321. Renewed Oct. 18, 1921. Serial No. 508,610. 3 Claims. (Cl. 24—245.)

1. A bed clothes holder comprising a pinch clip, an attachment cord doubled to form a loop whereby it may be secured to the pinch clip at its looped portion with its free ends forming tie strings, another cord having one end secured in relation to the pinch clip and with a ball appended to its other end, which ball is capable of passing only through the larger part of the pinch clip.

1,401,341. CHART. JAMES E. MCDADE, Chicago, Ill. Filed Nov. 15, 1920. Serial No. 424,201. 4 Claims. (Cl. 35—9.)

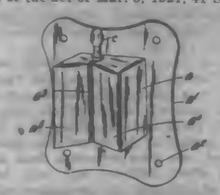
2. A chart of the class described, for holding a plurality of display cards, comprising a foundation member, a sheet of material folded so as to provide a plurality of plaits extending across the same, said sheet being greater in length in the direction of the plaits than said member and placed on said member so that a portion at both ends thereof, with respect to that direction, projects beyond said member, the projecting portions of said sheet being folded around the corresponding edges of said member against the back thereof, and means to secure the main portion and the projecting folded portions of said sheet, respectively, to the front and back of said member, whereby the display cards when placed singly back of said respective plaits are firmly held upright against the chart and in alinement with each other.

1,401,342. BROOM-BRIDLE. GEORGE A. MCGARR, Philadelphia, Pa. Filed June 6, 1919. Serial No. 302,174. 1 Claim. (Cl. 15—23.)



In a device of the character described, two attaching members each having a slot therein and carrying means for securement to a broom body, one of said members being located on each side of the broom body, two bridle sections spaced apart each consisting of a loop adapted to surround a portion of the broom body, and to straddle one edge thereof, two arms projecting from said loop and provided with offsets adjacent said loop, hooks formed from the ends of said arms for engagement with the slots in the attaching members whereby the bridle sections are pivoted to said attaching members, and springs attached

to the offset portion of the bridle sections and lying within the spaces between said bridle sections, one on each

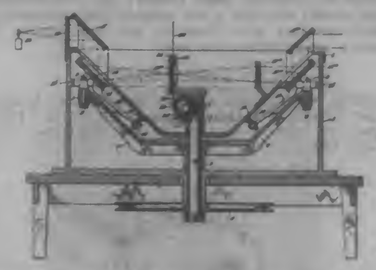


side of the broom body, for drawing the looped portions of said bridle sections toward each other.

1,401,343. RADIATOR. UMBERTO MAGNI, Los Angeles, Calif. Filed Nov. 2, 1920. Serial No. 421,302. 1 Claim. (Cl. 257—130.)

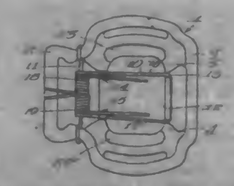
In a radiator having water-tube units provided with lateral projecting portions; a partition plate having transverse grooves to receive alternate ones of said projections of a unit on one side of the plate and having transverse grooves to receive other alternate ones of said projections of a unit on the other side of the plate, and means securing the plate to the respective units, said last named means comprising soldering grooves in the partition plate at and on the opposite side of the plate to the grooves which receive the lateral projections of the water-tube units, and solder in said soldering grooves.

1,401,344. PETROL OR SPIRIT LIGHTER FOR CIGARS AND OTHER OBJECTS. JAKOB MANZ, London, England, assignor of one-half to William Ernest Deveson, London, England. Filed Aug. 20, 1919. Serial No. 318,703. 1 Claim. (Cl. 67—4.1.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)



In an igniting instrument of the kind described, a fuel reservoir adapted to be mounted on a stationary base and having a face composed of a right and a left half converging symmetrically toward the center line and having in the apex of the angle thus formed a strip of frictional igniting material fixed in the said face, substantially as described.

1,401,345. MOTION-PICTURE-PROJECTION APPARATUS. EMIL MECHAU, Wetzlar, Germany. Filed Sept. 2, 1921. Serial No. 498,008. 3 Claims. (Cl. 88—16.8.)

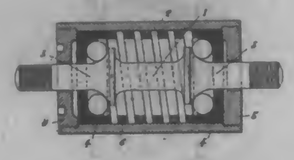


1. In a motion picture projection apparatus of the class wherein the picture film is continuously moved and a compensating optical device is employed whereby a picture is maintained on the screen, a single fixed condensing lens system which is adapted to produce a stationary real image of the picture to be projected upon the screen and is located both in the light path between the picture and the compensating device, and the light path between the compensating device and the screen means coöperating therewith for projecting the real image so formed upon the screen.

1,401,346. MOTION-PICTURE-PROJECTION APPARATUS. EMIL MECHAU, Wetzlar, Germany. Filed Sept. 2, 1921. Serial No. 498,009. 10 Claims. (Cl. 88—16.8.)

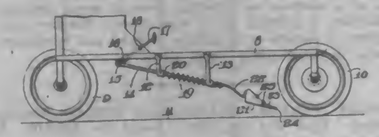
2. In a motion picture projection apparatus of the class employing a continuously moving film, catoptric elements, means for rotating the same to cause them to intersect the ray path alternately in front of and behind the film and means for simultaneously oscillating each element in two directions in addition to its rotary movement.

1,401,347. TRACE-CARRIER. ALBERT E. MENDENHALL, Garden City, Kans. Filed Feb. 26, 1921. Serial No. 448,220. 1 Claim. (Cl. 54—56.)



A trace carrier comprising a base, a bridge in said base having depending lugs, a bar on said base, a loop pivoted on said bar, a plate carried by said loop and resilient means for holding said plate in engagement with said depending lugs.

1,401,348. METHOD OF MODIFYING RESIN AND THE PRODUCT THEREOF. GEORGE W. MILNE, Sandwich, Mass. Original application filed Jan. 10, 1919, Serial No. 270,005. Divided and this application filed Jan. 7, 1920. Serial No. 349,997. 4 Claims. (Cl. 134—26.)

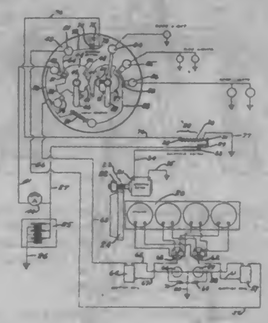


1. The method of modifying resin, which consists in distributing through it a substance provocative of oxidation, thereafter oxidizing the resin until capable of forming an ammoniate indefinitely extensible in water.

1,401,349. ADJUSTABLE BALL-BEARING. LOUIS MIQUET, Neuilly-sur-Seine, France. Filed Nov. 13, 1919. Serial No. 337,698. 3 Claims. (Cl. 64—36.)

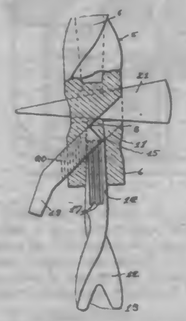
1. In a ball bearing, the combination of a cone member and a cup member associated therewith to form an annular ball race, bearing balls between said member, a cylindrical bearing for one of said members allowing axial sliding movement of said member, an elastic member engaging said sliding member on one side to thrust it away from its associated member, and an adjustable abutment engaging the other side of said sliding member.

1,401,350. WHEEL-CHOCK DEVICE. JOHN C. MONAHAN, Philadelphia, Pa. Filed Oct. 18, 1919. Serial No. 331,536. 2 Claims. (Cl. 188—4.)



1. The combination with a vehicle of a rod slidably mounted thereon; a chock shoe; and a resilient flexible connection between said chock shoe and the slidable rod, said flexible connection being of sufficient rigidity to hold the chock shoe in a position so that when the rod is slid the chock shoe will initially engage between a wheel of the vehicle and the roadway after which said flexible connection will permit the shoe to be forced downwardly in engagement with the roadway and the wheel to ride upon, it; substantially as described.

1,401,351. PROCESS FOR THE MANUFACTURE OF GRAPE EXTRACT. EUDO MONTI, Turin, Italy. Filed Nov. 19, 1919. Serial No. 339,206. 5 Claims. (Cl. 99—5.)



4. The process of preparing a beverage from grape pomace which consists in systematically exhausting the pomace with lake warm water at a temperature from 35 to 50° C. and containing about one part of free SO_2 in one thousand parts of water, clarifying the extract thus obtained and removing the free SO_2, concentrating the extract in vacuum and mixing a relatively small quantity of the extract with a larger quantity of concentrated grape juice.

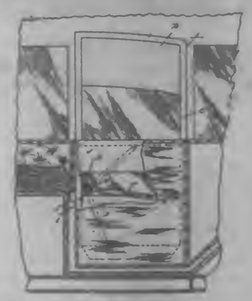
1,401,352. CONTROLLING DEVICE FOR ELECTRICAL SYSTEMS. WILLIAM H. MOONEY, Dayton, Ohio, assignor to The Dayton Engineering Laboratories Company, a Corporation of Ohio. Filed Feb. 21, 1919. Serial No. 278,391. 2 Claims. (Cl. 200—38.)

1. In a controlling device for electrical ignition and starting systems, the combination with a contact connected with a current source; of a second contact connected with an ignition system; a starting motor switch connected with said second contact; a third contact connected with another ignition system; and a movable switch member having spaced wide and narrow contact segments whereby in the off position of said movable member none of the contacts will be connected whereby in one on position of said member all three of said contacts will be connected, and whereby in another on position of said member only the first two contacts will be connected.

1,401,353. DRILL. JOSEPH F. MURRAY, Herrin, Ill. Filed Nov. 22, 1920. Serial No. 425,859. 5 Claims. (Cl. 255—61.)

1. A device of the character described comprising a body member having a bore in one end thereof, and slots extending laterally of the body member, said slots intersecting each other and the bore, a reaming bit disposed in one of said slots, and a pilot bit disposed in said bore and frictionally engaging the reaming bit.

1,401,354. LADDER. ELLSWORTH NICCUM, Kent, Wash. Filed Mar. 15, 1920. Serial No. 366,002. 3 Claims. (Cl. 228—21.)



1. In an extension ladder, the combination of upper and lower ladder sections, props pivotally connected to

said sections respectively and having slidable connection with each other, and means for securing the prop of the

upper section against sliding movement downwardly with respect to the prop of the lower section.

1,401,355. COUNTERBALANCE-ARM AND SPRING. STANLEY W. NICHOLSON, Toledo, Ohio, assignor to Dura Mechanical Hardware Company, Toledo, Ohio, a Corporation of Delaware. Filed July 9, 1921. Serial No. 483,642. 6 Claims. (Cl. 16—200.)

2. In a device of the character described, the combination with a counterbalance arm, of a coiled spring, an anchorage member for the inner end of said spring floating centrally of the latter, and means rigidly securing said anchorage member to one end of said arm, the outer end of said spring forming a mounting for the same.

1,401,356. SHOE-RACK. FREDERICK L. PARCHERT, Brookline, Mass., assignor to Apsley Rubber Company, Hudson, Mass., a Corporation of Massachusetts. Filed Jan. 12, 1920. Serial No. 350,844. 1 Claim. (Cl. 211—14.)

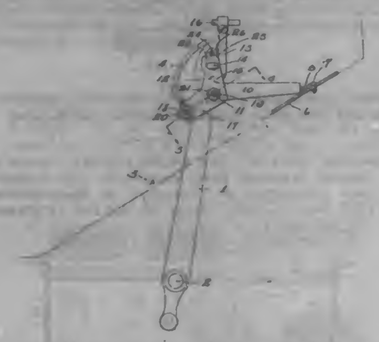
An improved shoe rack comprising a skeleton frame having two vertical posts at each end of the rack, a plurality of horisontal stripe connecting the two front vertical posts, a plurality of horisontal stripe connecting the two rear vertical posts, the stripe which connect the front posts being arranged parallel with and in staggered relation to the stripe which connect the rear posts, a plurality of transverse end strips which connect each pair of vertical posts, each set of end strips being arranged in continuous zig-zag formation from the bottom to the top of the rack, the strips at one end being respectively parallel with those at the other end, and a plurality of rods par-

allel with each other connecting each pair of opposite end strips, thereby forming a plurality of shelves each inclined from front to rear, and directly above another, from the bottom to the top of the rack, the entrance to said shelves being alternately on the front and rear sides.

1,401,357. INVISIBLE WATERPROOF PRINTING FLUID. HERBERT P. PEARSON, New York, N. Y., assignor to Kendall Products Corporation, New York, N. Y., a Corporation of Delaware. Filed Sept. 12, 1921. Serial No. 500,154. 5 Claims. (Cl. 134—15.)

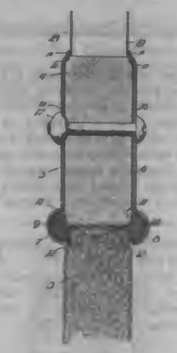
4. As a medium for printing invisible water-repellent characters, a mixture of a substantially five-per cent. solution of paraffin in a mixture of xylol and tetrachlorethane in substantially equal parts.

1,401,358. TAMPON. GUY SHERMAN PETTEKIN, Seattle, Wash. Filed Dec. 30, 1918. Serial No. 268,810. 2 Claims. (Cl. 128—270.)



1. In a tampon, a body comprising a layer of non-absorbent material having its edges folded upon itself to provide a central recess, and a layer of absorbent material of approximately the diameter of said recess attached to the upper side of the first-named layer.

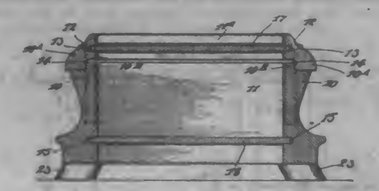
1,401,359. SAFETY NEUTRAL STOP FOR FORD CLUTCH-PEDALS. GEORGE G. PORTER, Syracuse, N. Y. Filed Oct. 7, 1919. Serial No. 328,984. 3 Claims. (Cl. 74—81.)



1. In a motor vehicle, the combination of a clutch and change speed pedal movable upwardly and rearwardly from neutral position into different operative positions, and means for normally locking the pedal from movement

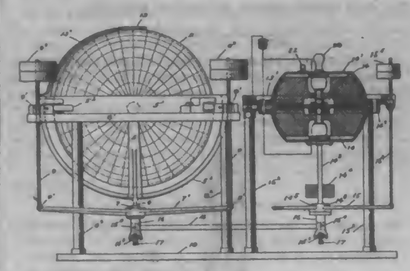
forwardly from neutral position comprising a support carried by the pedal, a stop arm pivoted to the support, an upwardly extending lever pivoted to the support and arranged near the footpiece of the pedal and coacting

with said arm to trip the same, and a fixed stop normally in the path of the stop arm, the stop arm being movable by the movement of such lever out of the path of the stop, substantially as and for the purpose described.



1,401,360. CURTAIN-WINDOW. CHARLES F. PRESTON, Chicago, Ill., assignor to Ernest J. Magerstadt, Chicago, Ill. Filed Dec. 11, 1917. Serial No. 206,628. 5 Claims. (Cl. 296—145.)

1. In a device of the class described, a glass, an intermediate frame surrounding the glass, a pair of clamping frames on opposite sides of said intermediate frame and overlapping the edge of the glass and the edge of the intermediate frame, annular recesses in the overlapping edges of said frames, and gaskets in said recesses.

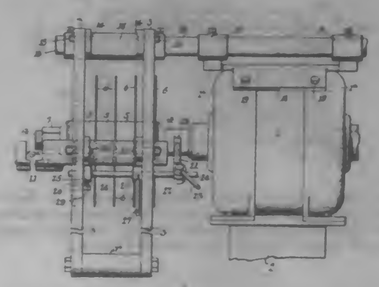


1,401,361. PROCESS FOR MAKING CONTAINERS. CHARLES F. PRESTON, Mamaroneck, N. Y., assignor to Jacques Bendien, New York, N. Y. Filed Apr. 5, 1921. Serial No. 458,761. 3 Claims. (144—309.)

1. A process for producing a container having a neck for retaining the cover from horizontal movement which comprises assembling three sides of the container, each side having two upper grooves and a lower groove within its inwardly exposed face and an upper groove within its outwardly exposed face below the lower upper inward groove, inserting a top member within the uppermost upper inward groove, inserting a bottom member within

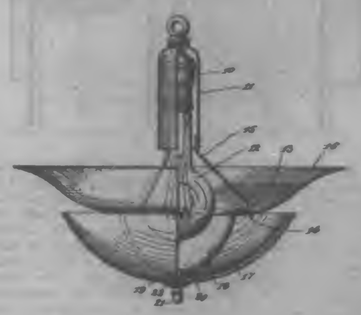
the lower inward groove, fixedly attaching a fourth similarly formed side to produce a container and dividing the container into two parts between the lower upper inward groove and the upper outward groove.

1,401,362. NAVIGATIONAL INSTRUMENT. JOSEPH T. RENYNS, Brooklyn, N. Y., assignor of twenty-five one-hundredths to Robert M. Hayes, Brooklyn, N. Y. Filed Sept. 12, 1919. Serial No. 323,417. 10 Claims. (Cl. 33—204.)



1. In an instrument designed for use in the art of navigation, a chart, the surface of which is that of a sphere and is inscribed with meridians and parallels; a spherical carrier for the chart; controllable means for rotating the chart about one of the axes of the carrier at a predetermined speed per revolution; means for supporting the carrier in stable equilibrium in a manner that will give it freedom for rotation about any of its axes; gyroscopic means for controlling that rotation; means for pivoting the support of the carrier in a manner that will render the combined weight of the support and supported mass non-pendulous and at the same time free to rotate on its vertical axis; means for preventing any lateral movement of the support and supported mass; means for stabilizing the vertical center line through the chart and spherical carrier; means for identifying on the chart the point where the vertical center line passes; and means for tracing on the chart a line that will correctly represent the successive changes of position of said point; substantially as described.

1,401,363. GANG-SAW MULTIPLE ROD-CUTTING MACHINE. STEPHEN RICHARD, Jr., Worcester, Mass. Filed Aug. 26, 1920. Serial No. 406,259. 2 Claims. (Cl. 143—46.)



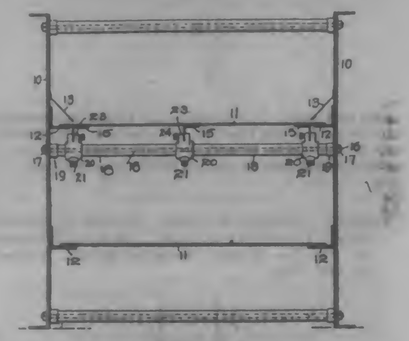
1. In a machine of the type described, including a work-holder having predetermined spaced apart slots, means for suspending said work-holder in operative position, rotary toothed cutting means adapted to be re-

ceived by said slots, a pair of substantially actuated swinging levers arranged with respect to said rotary cutting means, means effecting connection between said swinging levers and said work-holder, means for actuating said rotary cutting means, means for controlling said work-

holder from said levers, said swinging levers being provided with a gage cooperative with said work-holder, and means for controlling the positioning of said gage with respect to said work-holder and to form an abutment for the work therein during the sawing operation.

1,401,364. LIGHTING-FIXTURE. GROSVENOR P. ROBINSON, Summit, N. J. Filed Jan. 6, 1921. Serial No. 435,811. 3 Claims. (Cl. 240—92.)

1. In a lighting fixture, the combination of a lamp and socket therefor, a socket cover, a ring provided with an annular flange, a plurality of arms secured at their upper ends to the socket cover and at their lower ends to said ring whereby said ring is supported with the plane of its flange bisecting the axis of the lamp filament, an upwardly flaring reflector having an opening in its bottom surrounding said ring and seated upon its flange, a bowl, and means for detachably suspending the same from said ring.



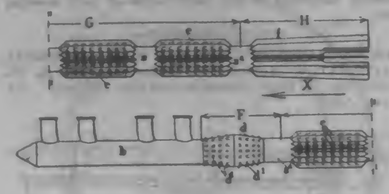
1,401,365. BOX-TOE FORM. ALBERT J. RYAN, Cincinnati, Ohio. Original application filed Mar. 24, 1919, Serial No. 284,701. Divided and this application filed Jan. 9, 1920. Serial No. 350,365. 5 Claims. (Cl. 12—64.)

1. A toe last for molding box toes, comprising a wooden form cut with a toe, whose surface corresponds to the toe of the shoe last in connection with which the molded box toe is to be employed, said toe of the toe last having

a body portion with a channel therein directly underlying the said corresponding surface for the purpose described.

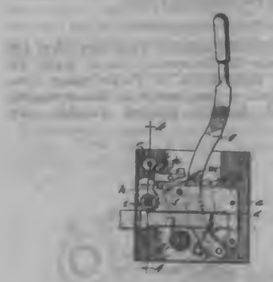
1,401,366. SUPPORT FOR DRIER-APRONS. ALLAN C. SARGENT, Westford, Mass., assignor to C. G. Sargent's Sons Corporation, a Corporation of Massachusetts. Filed Dec. 13, 1920. Serial No. 430,116. 3 Claims. (Cl. 198—204.)

1. In a drier, the combination with a traveling apron, of a rod extending through the drier under the apron, a pipe on the rod extending across the drier from one side to the other in one piece, a plurality of supports each having a passage therethrough fitting and fixed to the pipe and provided with a projection slit transversely, and angle plates each having a flange clamped in one of said slits and a top flange located horizontally in position to receive the bottom of said conveyer thereon and support it.



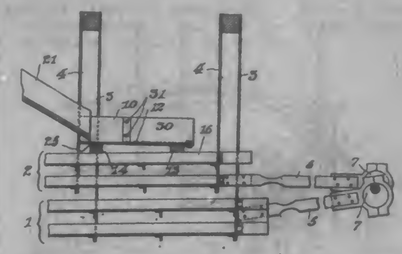
1,401,367. SHORT-CIRCUITING DEVICE FOR ELECTRICAL IGNITION APPARATUS. MAX SCHÄFER, Stuttgart, and ADOLF KRAUS, Cannstatt, Germany, assignors to Firm of Robert Bosch Aktiengesellschaft, Stuttgart, Germany. Filed Aug. 26, 1919. Serial No. 320,060. 5 Claims. (Cl. 173—355.)

1. A short-circuiting device for electrical ignition apparatus comprising, a casing, a rotary interrupter disk



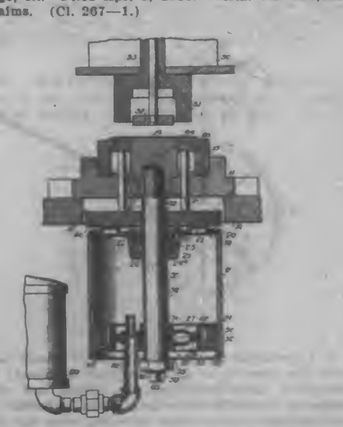
adapted to be screwed to the said casing, a fly-weight, a mechanical spring connection between the fly-weight and the casing, a contact carried by the said fly-weight, a second contact opposite to the said fly-weight contact, a support fixed to the casing and supporting the second contact, a thimble mounted on the interrupter disk, and a current-conducting pin attached to the said support and inserted in the said thimble.

1,401,368. EXHAUST-BOX. HUGO SCHNEEBELI, Courbevoie, France. Filed Nov. 29, 1919. Serial No. 341,514. 3 Claims. (Cl. 137—160.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)



3. In an exhaust box for the engines of vehicles and the like, diffusion chambers comprising two truncated conical casings joined at their large bases and surrounding a central pipe of the exhaust box, said casings communicating directly with the central pipe, and having in their walls openings so arranged that the motion of the vehicle will cause the external air to advance the exhaust gases through the central pipe toward the discharge end thereof.

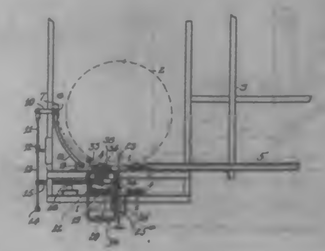
1,401,369. DOOR-LOCK. EMORY GLENN SIMPSON, Detroit, Mich., assignor to Fisher Body Corporation, Detroit, Mich., a Corporation of New York. Filed Jan. 22, 1920. Serial No. 353,218. 2 Claims. (Cl. 70—29.)



1. In a lock, the combination of a housing having parallel front and rear plates, a bolt slidable in said housing, an inside lever for independently retracting said bolt, an outside spindle provided with a retractor for retracting the bolt independently of the inside lever, a dog pivoted to the inside of one of the above mentioned housing plates, the said dog having a portion swinging in the same plane as the outside spindle retractor and having the swinging arcs of the dog and retractor intercepting, the dog capable of being set to prevent operation of the retractor, but permitting the retraction of the bolt by the inside lever and also by the shutting of the door, a disk pivoted to the plate carrying the dog, a cylinder lock for insertion in the outside of the door, a connecting spindle from the lock cylinder having a detachable but rotatable connection with the said disk, and a connection between the disk and dog involving lost motion to permit the extraction of the key from the lock but serving to actuate the dog to turn it from position of interference with the retractor to position of clearance or vice versa.

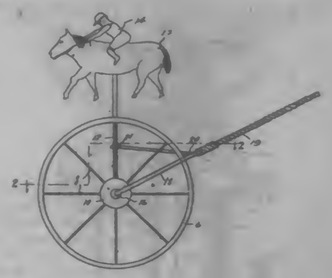
1,401,370. AUTOMATIC FEEDING MEANS FOR SHAKERS. PAUL STERLING, Wilkes-Barre, Pa. Filed July 5, 1919. Serial No. 308,792. 1 Claim. (Cl. 83—56.)

In an apparatus for separating or sizing coal and other like material, the combination of a reciprocating shaker structure, a trough-like feeding device secured thereto and reciprocating therewith, means for varying the position of said feeding device with respect to a horizontal plane, adjustable side plates at the delivery end of said device, means for adjusting said plates inwardly and outwardly, a chute for delivering material to said feeding device, the lower end of said chute extending between the sides of the said trough-like feeding device and terminating in proximity to the bottom thereof, substantially as described.



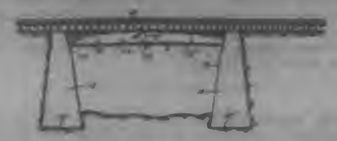
1,401,371. DIE-CUSHION. DAVID STRAND, Chicago, Ill., assignor, by mesne assignments, to Rudolph W. Glasner, Chicago, Ill. Filed Apr. 9, 1918. Serial No. 227,608. 13 Claims. (Cl. 267—1.)

2. A freely attachable and detachable fluid pressure die cushion embodying a cylinder and piston movable relatively one with relation to the other, and means for anchoring one of the parts against movement, the said means embodying a tubular element connected with one



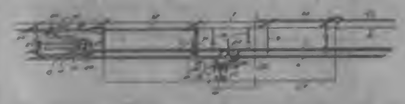
of the parts and a fastening bolt separate from the cushion and passing through the said element, and means on the bolt cooperating with one end of said element for supporting the cushion, the other end of the bolt detachably engaging a fixed support.

1,401,372. KICK-OFF MECHANISM FOR CONVEYERS. ROBERT F. SUTHERLAND, Rochester, N. Y., assignor to Vacuum Oil Company, New York, N. Y., a Corporation of New York. Filed Apr. 17, 1920. Serial No. 374,617. 11 Claims. (Cl. 198—20.)



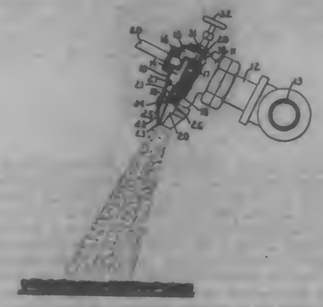
1. The combination with a movable conveyer, and a kick off device for moving articles from the conveyer, of a stop arranged in the path of articles on the conveyer, and mechanism controlled by the stop for connecting the conveyer with the kick off device to effect the movement of the latter through the movement of the conveyer when an article engages the stop.

1,401,373. WHEELED TOY. FERDINAND SVOBODA, Chicago, Ill. Filed May 6, 1920. Serial No. 379,341. 2 Claims. (Cl. 46—45.)



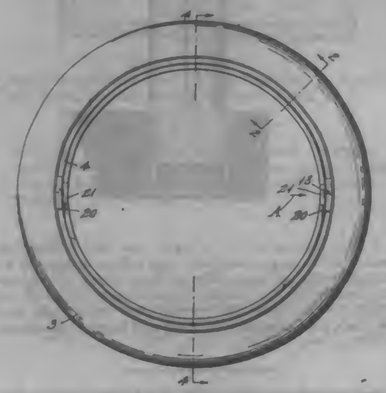
1. A trundling toy comprising spaced wheels having a wrist pin eccentric to and connecting the wheels, a yoke comprising arms embracing the wheels and pivotally connected therewith centrally of them, a handle extending from the yoke, a guide extending from the yoke between the wheels and a figure carrying rod pivotally connected with the wrist pin and slidably and rockably engaged with the guide, and having a figure mounted thereon at the opposite side of the guide from the wrist pin for corresponding movement with it.

1,401,374. BRIDGE. JAMES M. SHEPPARD, Mansfield, Ohio. Filed June 8, 1920. Serial No. 387,859. 2 Claims. (Cl. 14—17.)



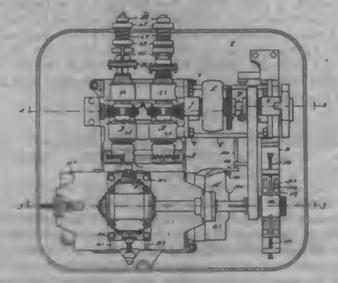
2. In a bridge, a pair of abutments and a beam engaged therebetween and comprising a plurality of sections hingedly connected at the lower edges of their meeting ends.

1,401,375. AUTOMATIC RAILWAY GATE AND SIGNAL APPARATUS. NICHOLAS P. THEOFILIS, Chicago, Ill. Filed Dec. 24, 1919. Serial No. 347,126. 1 Claim. (Cl. 246—125.)



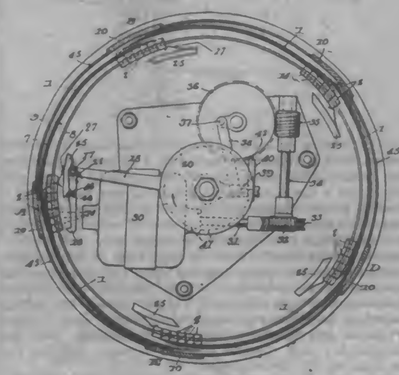
In an apparatus of the type described, the combination with an electric trolley system including a control circuit carried by the cars thereof, of motor operated gates arranged at highways crossing the tracks of said system, conductors arranged in sections parallel to the trolley wires of the system and extending for a distance on either side of the highway crossings, said conductors leading to and connecting the operating motor for said gates, an alarm circuit arranged adjacent to said gates and connecting said conductors for simultaneously operating with said gates, means carried by the cars of the system for closing the circuit between said conductors and the control circuit carried thereon, and manually actuated switch carried by each car of the system for operating the control circuits substantially and for the purpose set forth.

1,401,376. FIBER-CONDITIONING PROCESS AND APPARATUS. ALBERT W. THOMPSON, Lowell, Mass., assignor, by mesne assignments, to Parks-Cramer Company, Boston, Mass., a Corporation of Massachusetts. Filed Nov. 14, 1917. Serial No. 202,090. 8 Claims. (Cl. 19—11.)



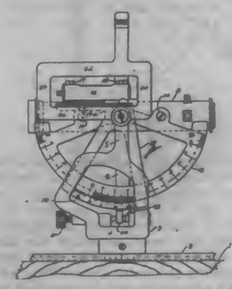
4. The process of moistening textile fibers which consists in forcibly projecting globules of a moistening liquid into a moving mass of textile fibers by means of a whirling jet of gaseous fluid, said jet being surrounded by an envelop of gaseous fluid also projected under pressure whereby the envelop of gaseous fluid will agitate said fibers and will concentrate the fluid carrying jet and cause the same to penetrate deeply into the mass, the quantity of fluid and the quality of globules being correlated to the character of the material treated.

1,401,377. RIM FOR VEHICLE-WHEELS. WEBSTER F. TRAVIS, Cleveland, Ohio. Filed Nov. 16, 1917. Serial No. 202,323. 17 Claims. (Cl. 301—32.)



1. A rim for straight side or stiff bead tires, comprising cooperating members each having a tire seat and a tire retaining flange provided with a straight surface extending radially outwardly and engaging the side surface of the tire bead, and connecting means constructed and arranged to permit relative lateral movement between said members, said lateral movement reducing the effective girth of the tire seat and also causing movement of the tire bead relative to said flange surface to thereby loosen the tire from the rim.

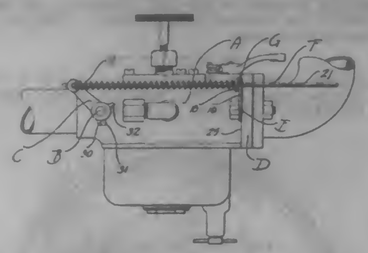
1,401,378. MILLING-MACHINE. GEORGE T. TRUNDLE, Jr., Cleveland Heights, Ohio, assignor to The American Multigraph Company, Cleveland, Ohio, a Corporation of Ohio. Filed Sept. 2, 1919. Serial No. 321,076. 48 Claims. (Cl. 10—154.)



48. In a thread milling machine, the combination of a plurality of rotatable chucks having parallel axes, a slide transversely movable and a slide longitudinally movable relative to the axes of said chucks, a cutter housing carrying rotatable cutting means mounted on one of said slides, means for adjusting said housing along said slide, and means including cams for moving each of said slides to bring the stock in said chucks intermittently into operative relation with cutter means on said frame, to move said cutter means longitudinally of the chuck to provide a thread on the stock held therein, means for producing longitudinal movement of the slide, including a cam shaft having a cam removably mounted thereon outside of the frame of the machine.

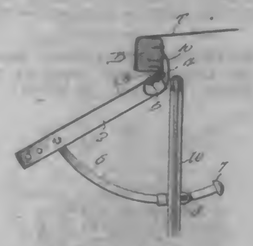
1,401,379. DISPLAY MECHANISM. EDWIN F. VAN VECHTEN, Milwaukee, Wis. Filed Jan. 10, 1920. Serial No. 350,537. 16 Claims. (Cl. 40—78.)

1. Display mechanism including a drum provided with a plurality of display openings, a group of carriers associated with each opening, display cards having their forward ends secured to the carriers, means for guiding said carriers circuitously about the drum, and means moving from group to group for selectively actuating certain carriers, said cards being guided by overlapping carriers.



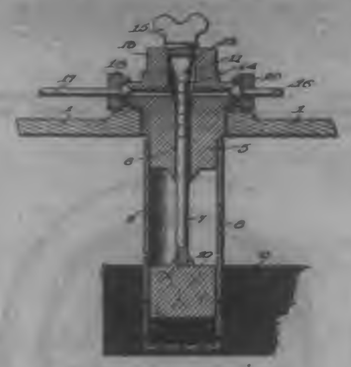
1,401,380. SURVEYING INSTRUMENT. FRANCIS E. VAUGHAN, Salt Lake City, Utah. Filed Jan. 11, 1921. Serial No. 436,563. 10 Claims. (Cl. 33—70.)

2. In an instrument for measuring vertical angles, the combination of a frame, a bubble tube adjustably supported relative to the frame, a sighting device provided with a pair of sights and pivotally mounted on the frame to swing in an upright plane independently of the bubble tube, a



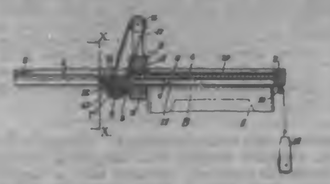
graduated arc and a subjecting index, the one being mounted to swing with the sighting device and the other being rigidly connected to and movable with the bubble tube.

1,401,381. CARBURETER ACCESSORY. CLYDE WEST, Fall River, Kans. Filed Jan. 4, 1921. Serial No. 434,944. 6 Claims. (Cl. 123—98.)



4. In a throttle attachment for carbureters, the combination with a carburetor including a lever for operating the choke throttle valve thereof, an operating rod for said lever, and a flange having an attaching bolt therein, of a bracket for detachably mounting upon said flange by said attaching bolt, said bracket having an aperture therein for operatively receiving said operating wire, and depending arms lying parallel with the main body of said bracket, and an expansion spring disposed about said operating rod and having a convolution thereof inserted intermediate said arms and main body portion of the bracket, said spring normally held under pressure intermediate said bracket structure and an end of said valve operating lever for maintaining said throttle lever in forward position for maintaining the throttle open.

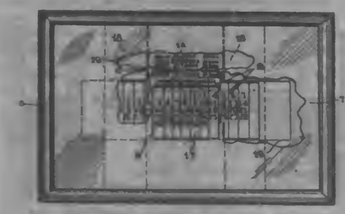
1,401,382. STORM AND SUN GUARD FOR AUTOMOBILES. JOSEPH H. WHITISH, Fennimore, Wis. Filed Nov. 29, 1920. Serial No. 427,042. 4 Claims. (Cl. 296—97.)



2. A vehicle windshield attachment comprising a guard adapted to be mounted in front of a windshield, hinges carried by the upper portion of the guard for connection to the front bow of a vehicle top above the windshield, and a trough of flexible material having one side portion connected with the upper portion of the guard, the free side portion of the flexible material being adapted to pass upwardly between the outer face of the windshield and front bow of a vehicle top and be connected with the front bow to provide a trough between the wind-shield and hinged end of the guard whereby water may be caught and prevented from entering the interior of an automobile between the space between the upper edge of the windshield and said bow.

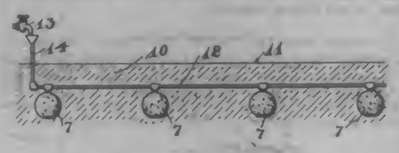
1,401,383. FLOAT-CONTROLLED ENGINE SHUT-OFF. BENJAMIN S. WILLIAMS, Nashville, Tenn. Filed June 19, 1920. Serial No. 389,279. 18 Claims. (Cl. 123—198.)

1. The combination of a crank case and vacuum line leading to the intake manifold of an engine, and means associated with the crank case, through which the vacuum line has continuity, controlled by the level of oil in the crank case to close the vacuum line when said level reaches a predetermined low point and prevent destruction of the vacuum therein.



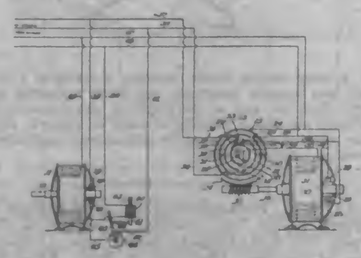
1,401,384. APPARATUS FOR USE IN MAKING FACED CONCRETE BUILDING-BLOCKS. WALTER WILSON, Dunfermline, Scotland. Filed July 17, 1920. Serial No. 397,086. 3 Claims. (Cl. 18—60.)

1. A machine for use in depositing stone chips or pebbles on to molded concrete blocks and the like, comprising a framework, a slide within the framework, a roller carried by the framework, flexible material secured at its one end and passed around the slide on to the roller, and means whereby as the flexible material is wound on and off the roller the slide is simultaneously traversed within the framework while acting to maintain the flexible material tightly stretched.



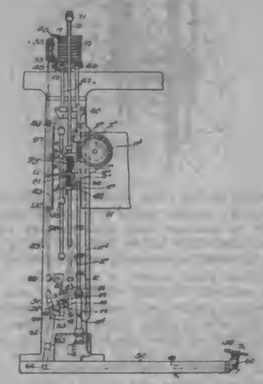
1,401,385. PERPETUAL CALENDAR. HAROLD O. WINDAHL, Chicago, Ill. Filed Nov. 24, 1920. Serial No. 426,288. 2 Claims. (Cl. 40—109.)

1. A calendar for disclosing any month comprising a holder provided with two rectangular openings in the face thereof, a strip on the face of said holder bearing the days of the week thereon, a sheet vertically slidable in said holder containing and disclosing a month with the respective number of days in said month and the number of said month in the year through the upper one of said openings, a sheet laterally slidable in the front of said vertically slidable sheet in said holder disclosing the days of the month through the lower one of said openings, and means extending from the backs of said



sheets through the back of said calendar for arranging said sheets to disclose any calendar month.

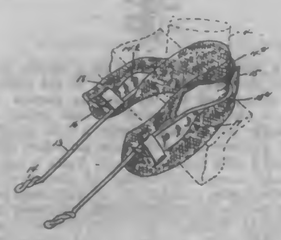
1,401,386. IRRIGATING SYSTEM AND METHOD OF APPLYING SAME. GEORGE B. WOODBERRY, Glendale, Calif. Filed Feb. 21, 1921. Serial No. 446,590. 4 Claims. (Cl. 61—18.)



1. In an irrigating system, a hollow globular member made of porous concrete having an aperture in the top to allow an insertion and securing of a supply pipe so that water may be forced into the porous body to percolate into the surrounding soil so as not to be retained in the body after the supply pipe is shut off.

1,401,387. SYSTEM OF MOTOR CONTROL. CHARLES H. ALLEN, Chicago, Ill., assignor to Troy Laundry Machinery Company, Ltd., Chicago, Ill., a Corporation of New York. Filed Apr. 1, 1918. Serial No. 225,877. 4 Claims. (Cl. 172—239.)

1. In a system of motor control, a motor having an armature winding, a generator for supplying current to said motor, said generator having a field winding, and a controller for reversing the current supplied to the motor armature winding, the controller being further adapted to momentarily reduce the excitation of the generator, said reduction of excitation covering the period of the reversal of the motor armature current.



1,401,388. MULTIPLE-DRILL-PRESS-CONTROLLING MEANS. MARTIN BALCKER, Chicago, Ill., assignor to Marquette Tool & Mfg. Co., a Corporation of Illinois. Filed Dec. 18, 1919. Serial No. 345,823. 14 Claims. (Cl. 77—33.)

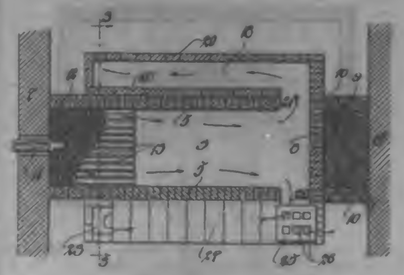
1. In combination with a drill press embodying a traveling drill head, mechanical means for operating the same and means for controlling the said operating means of fluid actuated means for shifting the said head independently of the first said means, means for controlling the operation of the fluid actuated means, and means operating automatically at two different predetermined points in the same direction of travel of the said head under the influence of the said fluid actuated means for controlling the latter.

8. Mechanism for controlling a drill press head embodying fluid actuated means for moving the head, means for rendering the fluid actuated means active to advance the head to the work, a controlling element separate from the fluid actuated means, means whereby the said fluid actuated means will operate independently of the said head to shift the said controlling element when the movement of the head under the influence of the fluid actuated means is arrested by the work to be operated upon by the drills, and means whereby the said mechanism will again be set in motion until the completion of the drilling operation.

1,401,389. ANCHORING DEVICE FOR WHEELED VEHICLES. WILLIAM W. BLAKELY, Detroit, Mich. Filed Jan. 25, 1919. Serial No. 273,157. 18 Claims. (Cl. 188—32.)

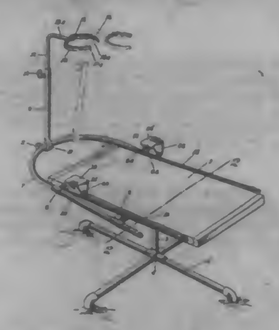
15. A wheel anchoring device comprising a wheel engaging member and a tie member loosely carrying the wheel engaging member at one end and provided with securing means at its other.

1,401,390. GEOGRAPHICAL CLOCK. AUGUST CARLIN, Seattle, Wash. Filed Dec. 16, 1920. Serial No. 431,007. 2 Claims. (Cl. 58—43.)



1. In a clock having clock hands and a non-rotary dial provided with an annular series of numbers ranging from "1" to "12" to indicate local time through the instrumentality of said clock hands, said dial being also provided with a circle surrounding said numbers and containing selected place names, a rotary dial formed of transparent material through which all of said numbers are coincidently visible, said rotary dial having at its periphery two sets of time indicating numbers ranging from "1" to "12," an arbor for rotating said rotary dial once each twenty-four hours for indicating by the numbers thereon concurrent time with respect to the places designated by said names and spring actuated means for yieldingly engaging said rotary dial to the arbor therefor.

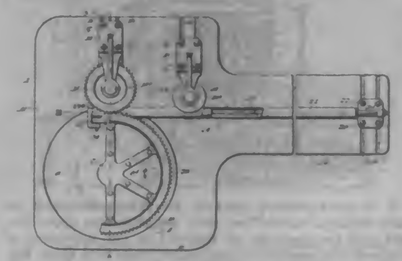
1,401,391. VALVE-GRINDER. ANTON E. CARLSON, Merchantville, N. J. Filed Nov. 29, 1920. Serial No. 427,173. 2 Claims. (Cl. 51—29.)



2. In a valve grinder, a casing, a spindle having its upper end provided with a bearing in the upper portion of said casing and its intermediate portion rotatably mounted in the lower portion of said casing, a pinion on the upper end of said spindle, a yoke pivotally supported at its lower end in the lower portion of said casing, and provided with internal parallel walls, a cam member within said casing and having its periphery engaging said parallel walls, a rotary pin on which said cam member is eccentrically mounted, said pin being journaled in said casing, a rack on the upper portion of said yoke engaging said pinion, a collar on said spindle adapted to engage the lower portion of said casing, and thereby to retain said pinion in mesh with said rack, and a handle connected to said pin for continuously rotating the latter and said cam member, thereby imparting oscillatory motion to said spindle.

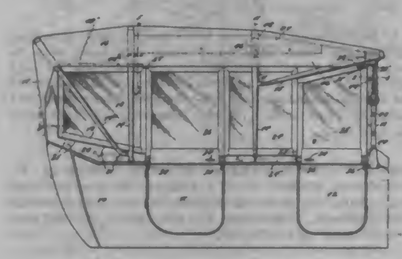
1,401,392. BAKER'S OVEN. SAMUEL E. COOK, Spokane, Wash. Filed July 17, 1920. Serial No. 397,015. 3 Claims. (Cl. 107—55.)

1. The combination in a baker's oven, of a central combustion chamber, and a separate return flue structure at each side of the combustion chamber having front openings into the baking chamber above the combustion chamber, and a perforated cap block above a rear opening in the ceiling of each flue to provide for equal distribution of heat to the baking chamber.



1,401,393. SHEEP-HOLDING DEVICE. SILAS H. CROSS, Sacramento, Calif. Filed Jan. 22, 1921. Serial No. 439,125. 4 Claims. (Cl. 119—103.)

1. A sheep holding device including a platform, a vertically and laterally adjustable neck clamp projecting upwardly from one end of the platform, and horizontally positioned leg clamps swivelly mounted on opposite sides of the platform and arranged for independent longitudinal movement relative thereto.



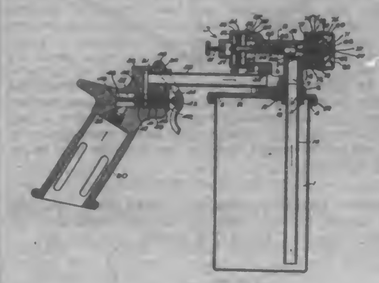
1,401,394. PIPE-BENDING MACHINE. HOMER P. CURTIS, Denver, Colo., assignor of one-half to The Plains Iron Works Company, Denver, Colo., a Corporation of Colorado. Filed Aug. 17, 1920. Serial No. 404,152. 6 Claims. (Cl. 153—40.)

1. The combination with a pipe bending machine, of the bed plate and its shaft bearings, the vertical shaft journaled therein and extending above said bed plate; with a circular table mounted on and secured to said vertical shaft, means including gearing and a multiple speed pulley for rotating said table, and with the pipe curving former removably secured to the top of said table, said former comprising a casting having a hub member removably mounted on and secured to the said vertical shaft, and a peripheral portion, the face of which contains a stepped shoulder at its bottom edge, a semi-circular groove in its central portion adapted to fit around a pipe, and a gear-toothed portion at its upper edge portion, and with the driven roller adjustably mounted in pipe engaging relation to the peripheral por-

tion of said former, and having gear teeth around its upper edge meshing with the gear teeth of said former, and provided with a semi-circular pipe fitting groove positioned opposite to the pipe receiving groove in said former, and having a stepped bottom edge portion fitting into the stepped portion in the bottom edge of said former.

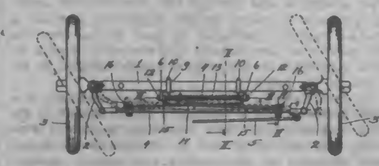
1,401,395. AUTOMOBILE-TOP CLOSURE. JOHN A. DAAB, New York, N. Y. Filed Dec. 10, 1919. Serial No. 343,846. 7 Claims. (Cl. 296—45.)

1. The combination with a vehicle body having a top which is open at the sides, of a plurality of transparent panels between the top and body, a fixed strip secured to some of the transparent panels, and an extension member adapted to be set in different positions with respect to the strip to close the space between the top and fixed strip.



1,401,396. SPEEDOMETER. BETHUEL M. DAVIS, Chicago, Ill. Filed Dec. 1, 1919. Serial No. 341,716. 6 Claims. (Cl. 175—355.)

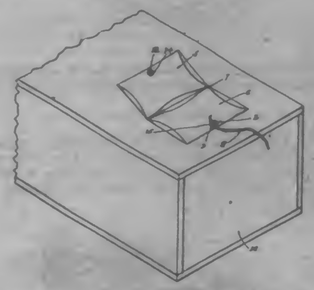
3. In a speedometer for use in connection with motor vehicles, means for indicating the speed of the vehicle, a normally open electric circuit, a locking device controlled by a pair of keys, either of said keys being adapted to operate said locking device to close said circuit, means for opening said circuit at a predetermined speed of said



vehicle, and means controlled by but one of said keys for determining the speed at which said circuit will be opened.

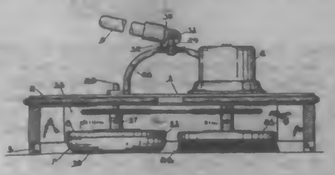
1,401,397. TOOL FOR APPLYING COATING. HERBERT W. DAY, Wollaston, Mass., assignor to Spray Engineering Company, Boston, Mass., a Corporation of Massachusetts. Filed Oct. 5, 1920. Serial No. 414,002. 17 Claims. (Cl. 91—45.)

1. Means for applying coating comprising in combination, a container for the coating material, a cover therefor, a coating gun or tool proper having passages for coating material, and a motive agent under pressure, a coating pipe secured to the coating gun or tool proper, said coating pipe extending through the cover and secured thereto, thereby securing the coating gun or tool proper to the cover, and means carried wholly by the cover for detachably connecting said cover to the container.



1,401,398. STEERING DEVICE FOR AUTOMOBILES. JOSEPH T. DUNCAN, Long Beach, Calif. Filed Aug. 16, 1920. Serial No. 403,764. 3 Claims. (Cl. 28—94.)

1. The combination with a front axle and knuckle-connecting rod of an automobile, of a pair of arms rigid

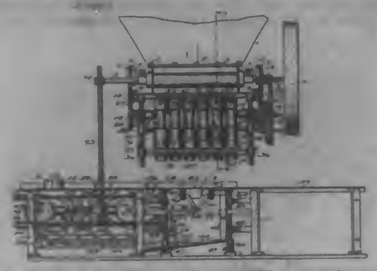


with and projecting from the axle toward said rod, a rod carried by said arms in parallel relation to the axle, a pair of clips clamped on the said knuckle-connecting rod, a pair of rods respectively slidingly engaged with said clips and slidingly connected to the rod carried by said arms and provided at their outer ends with hooks incapable of passing through the respective clips, and a tensioned coil spring mounted upon the rod and exerting pressure at its outer ends against said pair of rods and tending to clamp the same yieldingly against the adjacent arms projecting from the axle.

1,401,399. ENVELOP SHIPPING-LABEL. ARTHUR D. GASPAR, Waukesha, Wis. Filed Jan. 21, 1921. Serial No. 438,866. 2 Claims. (Cl. 229—74.)

1. An integral pair of envelops adapted to be folded together to close both, means for reinforcing one envelop at one point, said means being adapted to receive a nail to be driven into the shipment and means associated with said reinforcing means whereby the envelops may be secured together.

1,401,400. FLOOR-FINISHING APPARATUS. ANDREW W. GREEN, Toronto, Ontario, Canada. Filed Dec. 15, 1920. Serial No. 431,019. 6 Claims. (Cl. 91—37.)

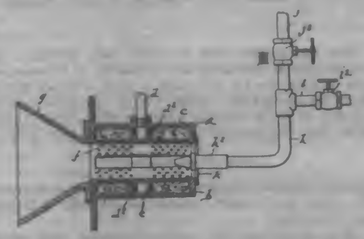


1. A rotatable floor finishing tool comprising a frame; a resilient cushion adjacent the lower side of said frame; a perforate wax carrying pad secured below the cushion; a porous member secured under the carrying pad and adapted to spread the wax.

3. In floor finishing apparatus, the combination of a carriage provided with floor finishing means; a supporting member secured to said carriage and provided with holes; a pin vertically journaled in said supporting member; a handle horizontally journaled on said pin so that the handle may swing horizontally and vertically; and a depending projection carried on the handle adapted to engage one of the holes.

5. In floor finishing apparatus, the combination of a carriage provided with a bearing; a motor secured to the carriage and provided with a depending spindle; a floor finishing tool carried directly on the spindle; a second spindle journaled in the bearing and axially movable therein and adapted to be rotated by the motor; and a frame secured to the last mentioned spindle and adapted to carry a floor finishing tool.

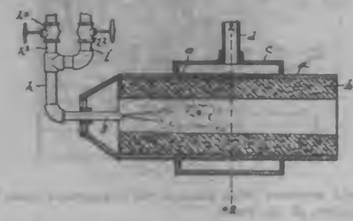
1,401,401. AUTOMATIC RECEPTACLE-FILLING MACHINE. LOUIS H. HARTMAN, Toledo, Ohio, assignor to The Valve Bag Company, Toledo, Ohio, a Corporation of Ohio. Filed Oct. 16, 1919. Serial No. 331,070. 5 Claims. (Cl. 226—72.)



3. In an automatic machine for filling containers, a table having a movable top part, means located above the said part for directing the material to the containers, a reciprocatory member for moving the containers along the table, means for operating the reciprocatory member and raising the table top part to raise the containers to the said means for directing the material to the containers, a tapper for striking the under side of the said part for shaking the material down in the containers, means for operating the said tapper.

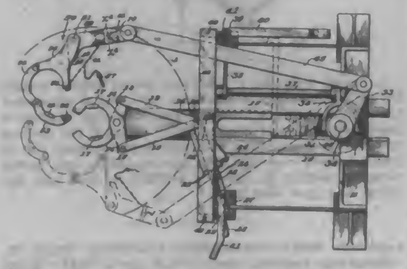
1,401,402. BRACKET. ELLSWORTH A. HAWTHORNE, Bridgeport, Conn. Filed Feb. 28, 1917. Serial No. 151,482. 2 Claims. (Cl. 240—7.)

1. In combination with a lamp body, a bolt extending through the lamp shell upon which the lamp may be turned, an internal clamping element adjustable on said bolt, and a member adjustable on the bolt externally of the lamp body and adapted to be clamped thereagainst and having a continuously recessed rim adapted to fit over the bolt head.



1,401,403. HYDROCARBON-BURNER. WILLIAM M. HOFFMAN, Buffalo, N. Y., assignor to General Fuel Apparatus Corporation, Buffalo, N. Y., a Corporation of Delaware. Filed June 7, 1920. Serial No. 387,002. 11 Claims. (Cl. 158—28.)

1. In a hydrocarbon burner, an upper and lower plate, such plates spaced from each other and so formed as to provide a combustion chamber therebetween of

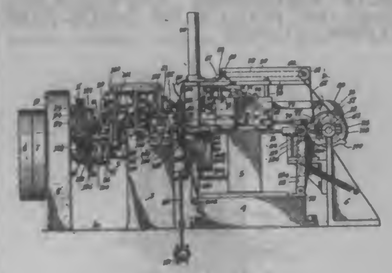


enlarged extent intermediate its ends, said burner plates formed of a refractory porous material through which fuel oil is adapted to percolate to the interior of the burner.

1,401,404. HYDROCARBON-BURNER. WILLIAM M. HOFFMAN, Buffalo, N. Y., assignor to General Fuel Apparatus Corporation, Buffalo, N. Y., a Corporation of Delaware. Filed June 7, 1920. Serial No. 387,003. 15 Claims. (Cl. 158—28.)

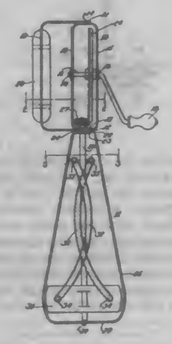
1. In a hydrocarbon burner, a combustion chamber in the form of a hollow refractory, porous core, a vapor jet producing means positioned at one end thereof adapted to project a jet of vapor therein, an encircling casing for such core provided with a jacketed portion, the inner wall of such jacket perforated to permit the passage of fuel therethrough to the core, means for supplying fuel to said jacketed casing.

1,401,405. PIPE-SCREWING MACHINE. MORRIS C. HOLM, Pasadena, Calif. Filed May 23, 1921. Serial No. 471,939. 12 Claims. (Cl. 255—35.)



1. In a device of the nature disclosed the combination including a frame, a rotary drive element, means for holding a pipe section against rotation, an oscillatory pipe tong adapted to engage and operable to intermittently turn the adjacent pipe section, and motion transmitting mechanism intermediate the drive element and the tong.

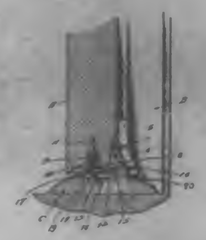
1,401,406. CUSHION FOR HEADRESTS. REY HOLLIS, Santa Barbara, Calif. Filed Feb. 14, 1921. Serial No. 444,633. 5 Claims. (Cl. 155—173.)



1. In a cushion for head rest, a pad, and attaching members fastened to the under surface of the pad and provided with means to contract them.

1,401,407. BOX-MAKING MACHINE. JAMES W. HUGHES, Haddon Heights, N. J., assignor to Samuel Nelson and Isaac Avart, Philadelphia, Pa. Filed Dec. 4, 1915. Serial No. 64,978. 17 Claims. (Cl. 93—55.)

1. In a machine of the character stated, the combination of a revolving turret carrying a plurality of chucks, feeding devices for supplying circular box bodies to the chucks in succession, means for operating the chucks to automatically grasp the box bodies when in position to receive said box bodies from the feeding devices, means for feeding box backs to the chucks of the turret in succession, clamping devices for clamping the box backs upon the box bodies, means for intermittently rotating the turret to successively bring the chucks into position to coöperate with the feeding devices for the box bodies and feeding devices for the backs in succession, means to rotate the chucks when brought into position to coöperate with the clamping devices, and a rotating wheel and intermittently acting means for imparting a partial rotation to the wheel to feed glued binding strips upon the respective box bodies and freely rotatable to apply the glued papers about the bodies and perimeters of the backs during the rotation of the chucks.



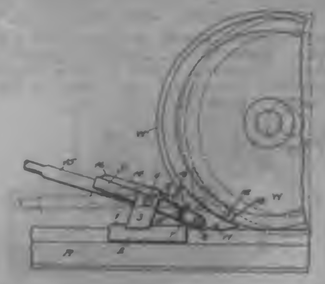
1,401,408. BEATER. HENRY M. HULL, Fairfield, Conn. Filed Feb. 18, 1921. Serial No. 446,065. 4 Claims. (Cl. 259—135.)

1. A device of the character described, comprising an upper and a lower frame, said upper frame consisting of a single strip of metal bent to provide three support members, a support handle upon one of said support members, a crank shaft with operating handle mounted in two of said support members, a gear fixed upon said crank shaft, a spindle mounted in said frames, a beater

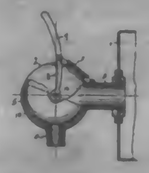
element fixed upon said spindle, and a pinion upon said spindle and arranged to mesh with said gear, said support handle being parallel with said two support members.

1,401,409. WEATHER-STRIP. CLYDE M. JONES, Sacramento, Calif. Filed Jan. 23, 1918. Serial No. 213,846. 2 Claims. (Cl. 20—67.)

1. A weather strip comprising a hinged plate supported for swinging movement, means to hold said plate outwardly in an inclined position, a lever loosely connected to the plate and having a longitudinal slot therein, a pin movably supporting said lever and extending through said slot, a spring surrounding said pin normally holding said lever downwardly disposed, said lever having an engaging end designed to abut a shoulder whereby to cause said plate to be drawn to a vertical position upon the closing of a door to which said plate is connected, opposite movement of the door permitting the plate to return to an outward position.



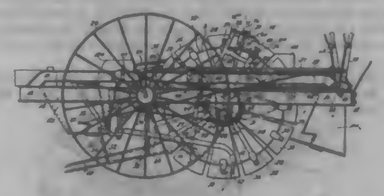
1,401,410. AUTO SAFETY-BUMPER. LOUIS O. KALMAN and ABRAHAM S. SHAPIRO, Montreal, Quebec, Canada. Filed Sept. 3, 1921. Serial No. 498,208. 3 Claims. (Cl. 293—41.)



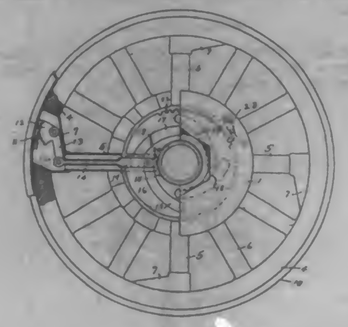
1. The combination in a machine of the character described, of a rotatable bar, a frame supported by said bar, springs engaging the bar for raising the frame upon release of the latter, a hollow tubular bar, a roller therein, a net wound upon the roller and secured to the frame, a latch member for engaging the frame and holding the same in lowermost position, an operative communication between the latch member and the bumper for releasing the same upon movement of the bumper, substantially as and for the purposes set forth.

1,401,411. CAR-MOVER. FRANK A. KELL, St. Louis, Mo., assignor of one-fourth to W. C. Davison, St. Louis, Mo. Filed Sept. 29, 1920. Serial No. 413,561. 12 Claims. (Cl. 254—88.)

1. A car-mover including, in combination, a base adapted to seat upon a rail, an operating lever mounted for swinging movement upon and relatively to the base, and a plurality of tumblers pivotally carried by the lever for engagement with the car-wheel and its flange, one of said members being adapted for engagement upon the tread-face of the wheel.

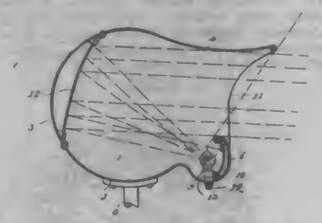


1,401,412. FAUCET. GEORGE C. KLEIN, Houston, Tex. Filed June 29, 1920. Serial No. 392,647. 1 Claim. (Cl. 221—98.)



A faucet including a spherical shaped hollow casing, having an inlet and a discharge opening, a cup-shaped valve fitted within said casing and having an opening, a handle for manipulating the valve to carry the opening thereof into registration with said outlet opening and to simultaneously close the inlet opening, and a pull spring normally holding the valve in position to close said discharge and open said inlet.

1,401,413. BEET-HARVESTING MACHINE. FRANK W. KNOWLES, Portland, Oreg. Filed Apr. 3, 1917. Serial No. 159,464. 3 Claims. (Cl. 55—108.)

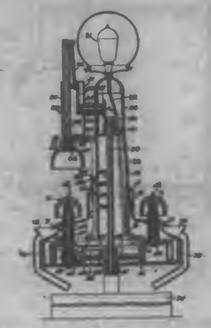


1. In a beet harvesting machine, a revolving gripping device for grasping the tops of beet plants and withdrawing said plants from the ground, cutting means for severing the beets from their tops and delivering the beets to a receptacle, and vibratory means for reciprocating said cutting means operated by the rotation of the gripping device.

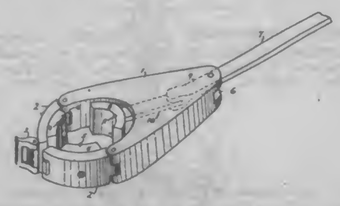
1,401,414. VEHICLE-WHEEL. CHRISTIAN H. LARSON, Guffey, Tex. Filed May 7, 1921. Serial No. 467,645. 3 Claims. (Cl. 301—17.)

1. A wheel having a felly formed with seats, a rim mounted on the felly and formed with projections which normally rest in said seats, an actuating device formed in the wheel hub, and operative connections between said device and the rim, whereby rotation of the former is imparted to the latter.

1,401,415. LAMP. HOWARD W. LESTER, Hartford, Conn. Filed Jan. 20, 1920. Serial No. 352,647. 1 Claim. (Cl. 240—41.)



A lamp comprising a casing having a light opening, a reflector in the back of the casing, to project rays through said light opening, a reflector in the casing to receive rays from a lamp and which are projected thereby onto the other reflector, a hollow bar for conductors mounted below the casing, lamp sockets in the casing at the base of and back of the second reflector, the sockets being adapted to receive the said conductors for connection with the lamp, the forward lower side of the casing being curled upwardly and rearwardly to cover the lamp from the front of the casing, the latter being curled upwardly and forwardly beyond the lower portion thereof.

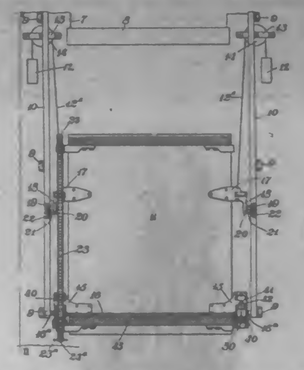


1,401,416. MACHINE FOR EXTRACTING JUICE FROM FRUIT. JOHN C. LIGGETT, Brookline, Mass., assignor to James L. Demoville, Boston, Mass. Filed May 8, 1916. Serial No. 96,041. 13 Claims. (Cl. 100—50.)

7. In a machine for extracting juices from citrus fruit and the like, the combination of a base, a turret rotatably mounted thereon, a hollow column extending from said base upward through said turret and provided with a guideway, a plurality of fruit carriers of generally hemispherical shape and having shafts whose axes are generally parallel with the axis of said turret, a cup-like member to coöperate with each of said carriers to squeeze the fruit thereon, a slide mounted for reciprocation in said guideway and serving as a support for said cup-like member, a shaft within said column, mechanism driven by said shaft for reciprocating said slide, mechanism operated by said slide for imparting to said turret a step-by-step rotation to bring said carriers one by one into position preparatory for coöperation with said cup-like member, mechanism connected with said shaft for rotating each carrier when so positioned, means for receiving the juices squeezed from said fruit, and means for discharging a stream of said juices onto said carriers between their periods of coöperation with said member.

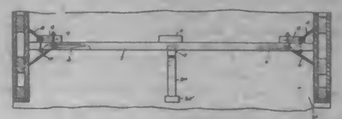
9. In a machine of the class described, a traveling carrier, a plurality of convex members thereon, impaling points on said members, a corresponding concave member adjacent the path of the carrier and means to press the same against successive convex members as they are presented adjacent thereto.

1,401,417. PIPE-TONGS. GEORGE A. LOWERY, Goose Creek, Tex. Filed Feb. 7, 1921. Serial No. 443,034. 3 Claims. (Cl. 81—01.)



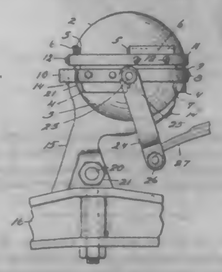
1. A tong, including a head, clamps carried thereby and adapted to be engaged around the object to be turned, a jaw, working independent of the clamps, a handle pivoted to the head and toggle levers connecting said handle with said jaw.

1,401,418. ELEVATOR-DOOR. EDWARD H. MCCLOUD, Columbus, Ohio, assignor to The Kinnear Manufacturing Company, Columbus, Ohio, a Corporation of Ohio. Filed Oct. 21, 1919. Serial No. 332,262. 5 Claims. (Cl. 187—60.)



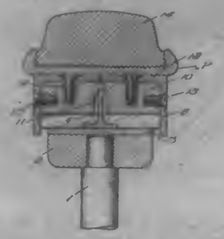
1. The combination with a building having an elevator shaft, a doorway leading from a floor of the building to said shaft, a car to move in said shaft, an upwardly

sliding door for said doorway, an inclined guide for the door secured to the wall of the shaft and means in con-



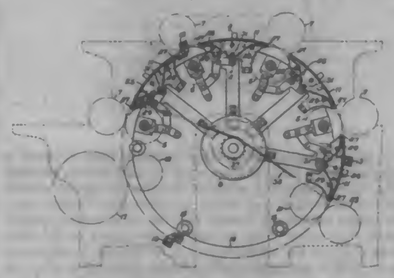
nection with the door and guide to move the door facewise relatively to the guide toward the doorway.

1,401,419. REMOVABLE BULKHEAD. JAMES T. MCNALLY, Chicago, Ill. Filed Mar. 28, 1921. Serial No. 456,118. 7 Claims. (Cl. 105—369.)



1. A bulkhead comprising wooden members rigidly fixed together; a spring actuated member swingingly mounted on said bulkhead adapted to engage the side wall of a freight car retaining said bulkhead in operative position, substantially as described.

1,401,420. SUSPENSION AIR-CUSHION. GEORGE S. MATTHEWS, Kansas City, Mo., assignor of one-half to Augustine Doehler, Kansas City, Mo. Filed Sept. 20, 1920. Serial No. 411,570. 2 Claims. (Cl. 267—32.)

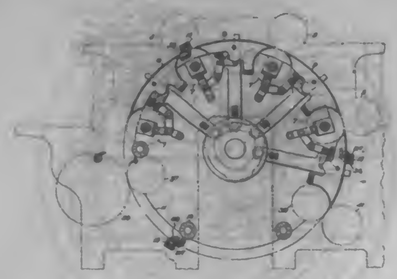


1. A shock absorbing suspension device, comprising a resilient sphere, hemi-spherical housing members inclosing the upper and lower parts of the sphere, and provided with marginal tongues and recesses, the tongues of one member extending into the recesses of the other member, external stops secured to the margins of the upper member, external stops secured to the margins of the lower member in a plane slightly above the stops of the upper member, and relatively movable supports for said members.

1,401,421. INNER-CUSHIONED WHEEL. FRANCIS MEAD, Chicago, Ill. Filed Oct. 10, 1918. Serial No. 257,672. 8 Claims. (Cl. 152—36.)

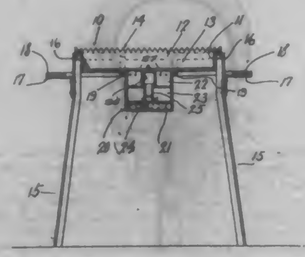
8. In an inner cushioned wheel of the class described, an inner rim member, a T-band disposed thereon, and driving dogs secured to the inner rim member and overhanging base portions of the T-band to clamp the latter to the said rim member.

1,401,422. PRINTING-PRESS. CHARLES A. MEISEL, Dorchester, Mass., assignor to Meisel Press Manufacturing Company, Dorchester, Mass., a Corporation of Massachusetts. Filed Mar. 29, 1920. Serial No. 369,597. 10 Claims. (Cl. 101—184.)



1. A press comprising a plurality of printing couples the contact lines of which correspond to elements of a cylinder, means to carry a sheet around the cylinder, means for supporting the sheet as it passes to the couples comprising belts having runs lying in the cylindrical surface and means for moving said runs in the opposite direction to the travel of the sheet.

1,401,423. PRINTING-PRESS. CHARLES A. MEISEL, Dorchester, Mass., assignor to Meisel Press Manufacturing Company, Boston, Mass., a Corporation of Massachusetts. Filed Mar. 29, 1920. Serial No. 369,599. 4 Claims. (Cl. 101—184.)



1. A printing press comprising in combination one or more printing couples, a sheet supporting surface over

which the sheet is advanced in the printing operation, a carrier for the sheet comprising a bar overlying said

surface and having a portion substantially contacting therewith and means for holding the end of a sheet bent over said contacting portion of the bar.

1,401,424. POULTRY-WATERER. EDWIN C. MELLICK, Formoso, Kans. Filed June 22, 1920. Serial No. 390,894. 2 Claims. (Cl. 126—358.)

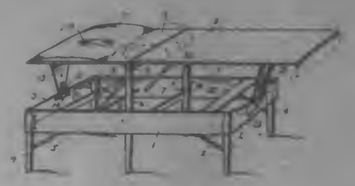
1. A device of the class described comprising a trough, a pair of metallic strips secured upon opposite sides of said trough and extending beneath the same, a metallic casing carried by said strips and having a plurality of openings therein adjacent the upper edges thereof, a fuel chamber disposed in said casing, a lamp extending from said fuel chamber, a heat chamber disposed in said casing above said fuel chamber, a chimney surrounding the upper end of said lamp and extending into said heat chamber, and a cylinder surrounding the upper end of said chimney and terminating short of the bottom of said trough.

1,401,425. HOSE-NOZZLE. HARRY E. MENO, Oak Park, Ill., assignor to W. D. Allen Manufacturing Company, Chicago, Ill., a Corporation. Filed Apr. 5, 1920. Serial No. 371,204. 7 Claims. (Cl. 299—117.)

1. A hose nozzle comprising a hollow body provided with a discharge orifice at one end and having its interior so channeled as to cause the water directed therethrough to pass from said orifice either as a straight stream or as a spray and having a valve seat, and a chambered inner member or spindle provided with a valve and arranged revolubly and axially movable within said body and adapt-

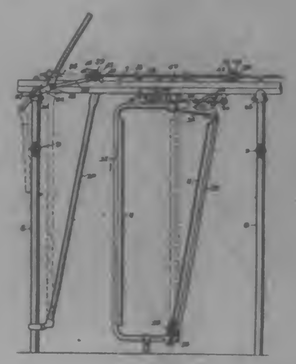
ed to direct the water to different parts of said channeled body and to shut off the flow of water through said body.

1,401,426. HANDBAG. GEORGE H. METTERNICH, Chicago, Ill. Filed Aug. 30, 1920. Serial No. 406,971. 5 Claims. (Cl. 150—46.)



2. An article of the class described, comprising a hand bag having an opening on one side adjacent the top; a closure member hingedly mounted to the top side of said opening; a purse hingedly mounted on the exterior side adjacent the lower edge of said closure member; and means for locking said hand bag and said purse, substantially as described.

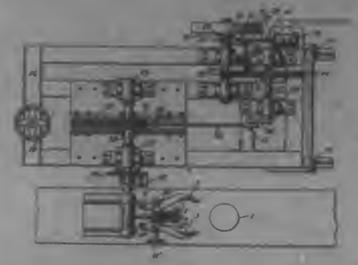
1,401,427. ADJUSTING-TABLE. JESSE G. MILLER, Superior, Wis. Filed Oct. 29, 1920. Serial No. 420,429. 2 Claims. (Cl. 128—74.)



1. A table of the character described comprising a rectangularly shaped main body supporting portion of fabricated structure, supporting legs hingedly attached within the corners thereof, a foldable patient-supporting section pivotally mounted within the body portion and adjustable to a position above same, a portion of said

foldable section forming a cooperative part of the easy portion when the former is in its folded position and a

single removable section forming a similarly cooperative portion with the body when assembled.



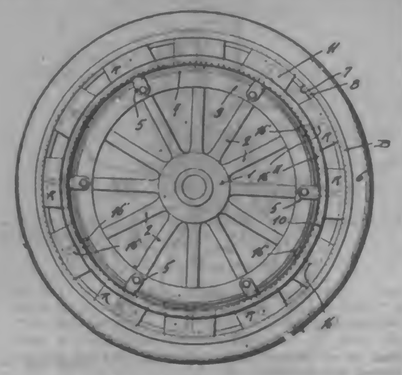
1,401,428. STANCHION-CONTROL MECHANISM. WILLIAM MITCHELL, Milwaukee, Wis. Filed June 18, 1919. Serial No. 304,060. 3 Claims. (Cl. 119—148.)

1. The combination with a stall provided with a longitudinally channeled top frame member, of a stanchion mounted in said stall and provided with a movable slide bar, a side block mounted within the top frame member, a link operatively connecting said slide block to said side bar, means producing lateral movement of said slide block to open or close the stanchion, and a latch concealed in the channel of the top frame for engaging said block to keep the stanchion closed when desired.

1,401,429. APPARATUS FOR HANDLING ROLLS OF ROOFING, BARRELS, BOXES, AND SIMILAR ARTICLES. ALBERT E. F. MOORE, Cincinnati, Ohio, assignor to The Philip Carey Manufacturing Company, a Corporation of Ohio. Filed May 24, 1919. Serial No. 299,497. 35 Claims. (Cl. 214—1.)

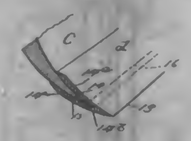
1. In an apparatus for moving rolls, boxes, barrels, and packages, means adapted to carry the article to be moved, comprising a pair of gripping arms pivotally mounted on a supporting frame, a magnet for operating said arms, means connecting the movable member of said magnet with the arms whereby the free end of said arms may be moved toward and away from each other depending upon the direction of the movement of the movable

member of said magnet, and a switch adapted to be operated by the article to be handled so as to make circuit through the magnet to operate the gripping arms.



1,401,480. DEMOUNTABLE RIM. FREDERICK H. MEYER, Johnstown, Pa. Filed Jan. 10, 1918. Serial No. 71,160. Renewed Apr. 29, 1921. Serial No. 465,801. 6 Claims. (Cl. 152—21.)

1. A device of the character described, comprising, an integral rim or tire base, split transversely at a single point and at an angle to the radius of the wheel, a tongue projecting circumferentially from one extremity, the opposed extremity provided with a corresponding recess, and a separate locking device inserted in the circumferential edges of said tongue and recess, and means in said device preventing radial separation of the said rim extremities.

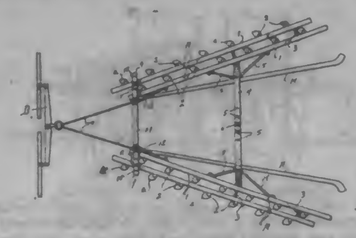


1,401,481. RESILIENT WHEEL. CHARLES NEIMEYER, Little Rock, Ark., assignor to Demountable Spring Tire Company, St. Louis, Mo., a Corporation of Missouri. Filed Aug. 16, 1920. Serial No. 404,002. 4 Claims. (Cl. 152—26.)

1. A wheel having an inner rim, an outer rim surrounding said inner rim, one of said rims being provided with an annular track facing the other rim, and an annular row of resilient expanding rubber members arranged circumferentially of said annular track and interposed between said rims to form a yielding frictional connection between said rims, each of said resilient rubber members comprising relatively hard rubber ribs separated from each other and frictionally engaging said annular track and a yielding rubber element yieldingly connecting

said separated hard rubber ribs and cooperating therewith to force the ribs onto said annular track.

1,401,432. DETACHABLE PLOWSHARE EDGE. PETER A. NORDQUIST, Ogden, Utah, assignor to Detachable Plow Share Edge Manufacturing Company, Ogden, Utah. Filed Apr. 29, 1920. Serial No. 377,556. 1 Claim. (Cl. 97—18.)

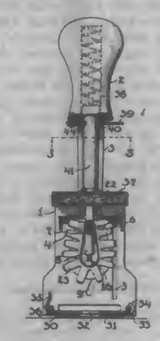


The combination with a plow share edge having a substantially straight portion and an outwardly and forwardly curved portion at its forward end, of a detachable plow edge therefor, said detachable edge comprising a substantially V-shaped bar having a longitudinally disposed V-shaped channel extending throughout the entire length of the detachable edge, the flanges of said detachable edge being so spaced that when the plow edge is forced into the V-shaped channel, said flanges will frictionally engage the upper and lower faces of the plow share so as to hold the detachable edge thereon, the forward end of the detachable edge conforming to the outwardly and forwardly curved portions of the share edge.

1,401,433. PROCESS FOR RECOVERING MATERIALS FROM MOLASSES. HOLGER DE FINE OLIVARIUS, San Francisco, Calif. Filed Jan. 14, 1919. Serial No. 271,104. 1 Claim. (Cl. 127—15.)

The process of recovering sucrose from molasses which includes mixing the molasses with alcohol, adding an amount of lime to the solution to precipitate organic and coloring matter without precipitating the sucrose, separating the precipitate from the solution and agitating the alcoholic solution in the presence of a further amount of lime whereby substantially all of the sucrose is precipitated as calcium saccharate.

1,401,434. FARM IMPLEMENT. PHINIAS A. ORMAN, Vincennes, Ind. Filed Mar. 22, 1920. Serial No. 367,805. 1 Claim. (Cl. 55—125.)

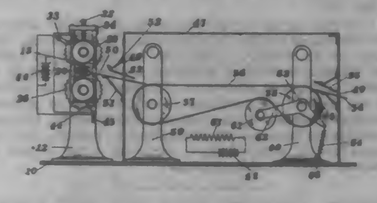


An agricultural implement comprising two sections, each of said sections including an inner and outer elongated member connected to each other in spaced parallel relation, a rigid connecting member pivoted at its ends to one of the corresponding ends of said outer elongated members, and an adjustable connecting member permanently secured at its outer ends to the inner elongated members of said sections remote from the rigid connecting member, whereby said sections may be moved in convergent and divergent relation.

1,401,435. FLOTATION SEPARATION OF MINERAL SUBSTANCES. THOMAS HENRY PALMER, Melbourne, Victoria, and HARRY VERNON SEALE and RALPH DOWLING NEWETT, Broken Hill, New South Wales, Australia. Filed Sept. 2, 1919. Serial No. 321,139. 7 Claims. (Cl. 83—85.)

1. A process for the differential or preferential separation of mixed sulfids, in which the ores containing the same are subjected to a flotation treatment in an aqueous medium containing elemental sulfur dissolved in a solvent and added thereto in a proportion not in excess of one half of 1% of sulfur to ore, thereby to procure separation of one of such sulfids; and in which the ore remainder is subsequently resubmitted to flotation for the separation of another sulfid therefrom after adding a frothing agent to said medium.

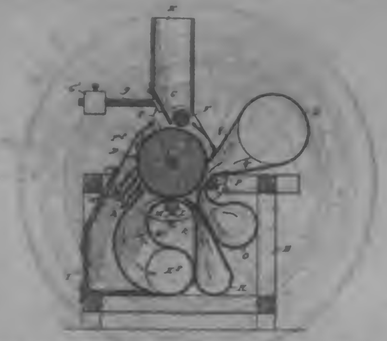
1,401,436. COMBINED HAND AND SELF-INKING STAMP. ARTHUR ALBERT PANNIER, Salt Lake City, Utah. Filed July 12, 1921. Serial No. 484,023. 19 Claims. (Cl. 101—334.)



1. In a hand stamp, the combination of a main frame, a plunger slidably mounted relative thereto, a reversible die rotatably mounted on the plunger, and means for supporting a die in advance of the reversible die, said means providing for a substantially simultaneous impression of both dies with one impression surrounding the other.

1,401,437. DIPPING APPARATUS. John W. Palmer, San Francisco, Calif. Filed Dec. 9, 1919. Serial No. 343,480. 21 Claims. (Cl. 146—14.)

2. A continuously operating, automatic fruit dipping apparatus comprising a tank, a tray platform operatively mounted and arranged above said tank, means for moving the tray onto the platform and means for releasing said platform for downward movement.



1,401,438. TOBACCO-LEAF CRUSHER. Samuel Pells, Omaha, Nebr., assignor of one-half to J. L. Galbreath, Superior, Nebr. Filed Aug. 2, 1920. Serial No. 400,654. 2 Claims. (Cl. 131—58.)

2. A device of the character described comprising leaf crushing means, a housing mounted adjacent said leaf crushing means, beating means in the housing, a conveyer also entirely within the housing, said housing having openings in its front and rear walls, the opening in the front wall being at a higher elevation and being disposed above the receiving end of the conveyer, the other opening being disposed below the delivery end of said conveyer, an inclined apron extending through the front opening in the housing having its higher end disposed to receive leaves from said crushing means and with its lower inner end arranged near the receiving end of the conveyer, an inclined lip above said apron having a greater inclination than the apron and extending through the front opening in the housing, a rear apron extending on an inclination through the lower portion of the rear opening in the housing and having its higher inner end disposed close to the delivery end of the conveyer, and a second lip supported within the housing and at a greater inclination than said last mentioned apron and having its higher inner end disposed above the inner end of said apron.

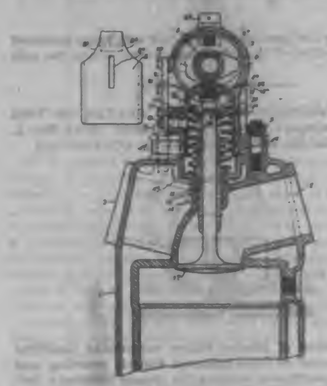
1,401,439. LINT-COTTON-TREATING MACHINE. Hugh Pettit, Memphis, Tenn. Filed Sept. 8, 1920. Serial No. 408,834. 5 Claims. (Cl. 13—9.)

1. In a cotton treating machine, the combination of a saw cylinder having the spaces filled to substantially the base of the teeth, means for feeding cotton to said cylinder, an air blast nozzle directed against said cylinder in a direction opposite the direction of rotation of the teeth for holding the cotton on the teeth and freeing it from dirt, etc., a second air blast nozzle directed against said cylinder in the direction of rotation of the teeth and at a higher velocity than that of the teeth for disengaging the cotton therefrom, and means for creating a

blast of air through said nozzles and for regulating its volume and intensity.

1,401,440. PUMPING MECHANISM FOR OIL-WELLS. Oscar M. Protosse and Russell C. Sutherland, Wynona, Okla. Filed May 7, 1921. Serial No. 467,750. 5 Claims. (Cl. 103—80.)

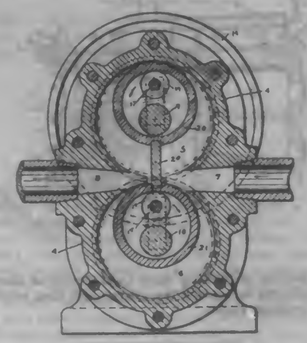
1. In an oil well, a working barrel having a standing valve in its length and perforated above the standing valve, a barrel exterior to the working barrel and spaced therefrom, the space between the working barrel and the exterior barrel being closed at its lower end, a head closing this space at the upper end and having ducts opening into the upper end of the working barrel, a sucker rod, a traveling valve mounted on the lower end of the sucker rod, and a blind valve mounted upon the sucker rod above the standing valve, the blind valve and traveling valve being located normally below and above the perforations respectively.



1,401,441. SASH WEIGHT. George H. Quaid, Los Angeles, Calif. Filed Feb. 4, 1920. Serial No. 356,284. 1 Claim. (Cl. 16—219.)

A sash weight comprising a body of concretitious material, a rod extending vertically through said body having a threaded lower end, attaching means secured to the upper end of said rod, said body having grooves in its lower face, a block on said rod below the body having ribs thereon corresponding to the grooves in said body, a nut on

said rod below said block, and a bolt receiving member on one side of said body.

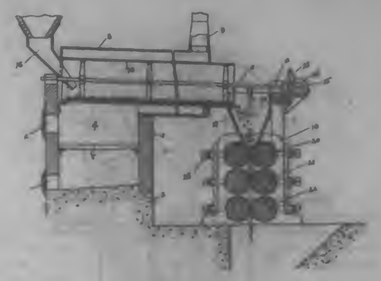


1,401,442. INTERNAL-COMBUSTION ENGINE. Lawrence E. Rausenberger, Springfield, Ohio, assignor to The Steel Products Engineering Company, Springfield, Ohio, a Corporation of Ohio. Filed Dec. 12, 1919. Serial No. 344,430. 2 Claims. (Cl. 123—90.)

1. In a valve mechanism the combination with a housing comprising a cylinder, an inverted U-shaped plunger operable therein, a hollow cam shaft mounted in said housing having a cam in direct operative relation with said plunger and an oil aperture in said shaft whereby oil delivered therethrough will be discharged upon the plunger, of means within the plunger comprising an adjusting screw and a plurality of shims coöperating therewith whereby the space between the plunger and the cam may be adjusted to a predetermined position.

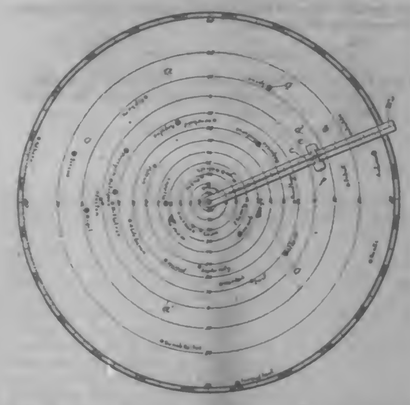
1,401,443. PUMP. Joseph R. Richer and John O. Hesselden, Chicago, Ill., assignors to Star Tool and Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Jan. 5, 1920. Serial No. 349,370. 5 Claims. (Cl. 103—44.)

1. A pump comprising a casing provided with two adjoining chambers communicating with each other at their adjoining sides; crank shafts operating in said chambers, said crank shafts provided with loosely engageable radially yieldable cranks; tubular contact members having bores large enough to loosely embrace said cranks and shafts and being independently maintained in continuous contact with the peripheries of said chambers by said cranks; a movable blade connecting said contact members and passing through the communication between said chambers; and inlet and outlet means communicating with said chambers



on opposite sides of their communication with each other, substantially as described.

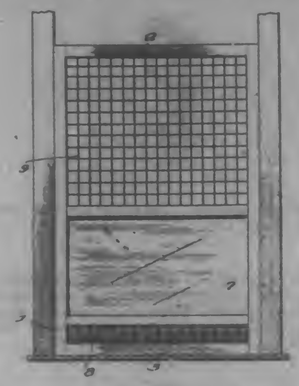
1,401,444. EXTENSION-BOLT. Charles C. Roberts, Springdale, Conn. Filed Nov. 5, 1920. Serial No. 421,074. 3 Claims. (Cl. 90—59.)



1. A bolt comprising a pair of sections, one of the sections including a shank and a head, the other section including a hollow cylindrical body, and a shank provided with standard threads of substantially the same diameter as the shank of the first section, the shank of the first section and the hollow body being provided respectively, with double male and female threads, and a nut carried by the threaded shank of the second mentioned section.

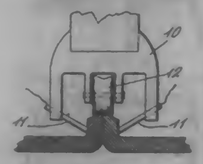
1,401,445. METHOD OF FORMING SAND FROM GRAVEL. JOSEPH H. ROBERTS, Pittsburgh, Pa. Filed July 21, 1921. Serial No. 486,477. 3 Claims. (Cl. 83—12.)

1. A method of forming sand from gravel as above defined consisting in heating the gravel, and then subjecting it to a crushing action.



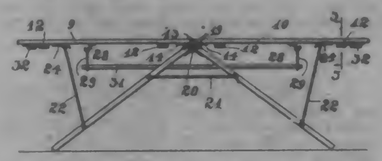
1,401,446. STAR FINDER AND IDENTIFIER. GILBERT T. RUDE, Washington, D. C. Filed Dec. 30, 1920. Serial No. 434,140. 3 Claims. (Cl. 35—3.)

2. A star finder and identifier comprising a diagram having located thereon the celestial navigation bodies in their true correlative positions and a coöperative templet plotted in conformity with a definite degree of latitude and having dimensions to include the navigation celestial bodies visible at any one moment at that latitude, the templet being scaled to graphically show the altitudes and azimuths of the celestial bodies encompassed by it when correlated to the diagram.



1,401,447. ELECTRIC SIDE-WALL HEATER. OLIVER P. SCOTT, Tacoma, Wash. Filed May 5, 1921. Serial No. 467,052. 4 Claims. (Cl. 219—34.)

1. A side wall heater of the class described including a frame comprising sides and connecting top and bottom portions, a lower solid panel connecting the lower portions of the sides and spaced from the bottom portion to provide an inlet and terminating short of the top of the frame to leave an outlet for the discharge of heated air, a heating element supported between the sides of the frame in rear of the solid panel in position to permit the air to contact

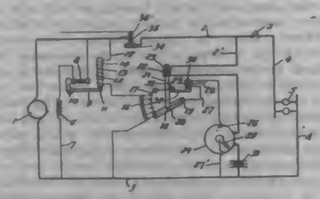


directly with the heating element, and a deflector mounted between the sides of the frame and located above the said panel.

1,401,448. METHOD OF JOINING PLATES OR THE LIKE. THOMAS J. SIERA, Portland, Oreg. Filed Feb. 5, 1921. Serial No. 442,751. 7 Claims. (Cl. 219—10.)

1. The method of joining plates, comprising upsetting the edges thereof to form marginal flanges, abutting said flanges, and electrically welding the flanges between a pair of electrodes, both of which are applied to the flanges on the same side of the plates.

1,401,449. OUTING-TABLE. WILLIAM A. SNYDER, Los Angeles, Calif. Filed May 3, 1921. Serial No. 466,508. 1 Claim. (Cl. 45—116.)



In a table of the class described, a top consisting of halves to abut endwise and each half having means to fold lengthwise, a trestle consisting of two main members having hinge connections near the upper ends to come under the joined middle of the top so that the lower ends of the members spread out downwardly toward the ends of the table, a rod on each of the upper hingedly connected ends of the two members of the trestle, hooks on the underside of the top near the abutting ends of the halves for removably engaging each top-half to a trestle-member, braces of different length on each end of the table pivotally connected to the lower ends of the trestle and projecting upwardly toward the top, for adjustably supporting the top ends, clamping members on the underside of the top to engage with upper ends of the braces, and connecting means between the oppositely spreading trestle-members for holding the trestle engaged in a firm form to support the top.

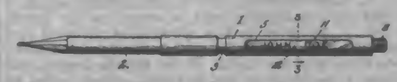
1,401,450. VEHICLE WHEEL AND TIRE. DAVID B. SPENCER and COBBY W. SPENCER, Danville, Ill. Filed Apr. 10, 1920. Serial No. 372,887. 3 Claims. (Cl. 152—9.)

2. In a wheel the combination with an annular rim body having a plurality of outwardly extending lugs formed thereon, rings secured to the opposite faces of the body and extending beyond the periphery thereof defining a channel therebetween, the lugs being arranged in the channel, of a tire including independent sections each having an arcuate cushion member and an arcuate retaining flange, the retaining flange being adapted to fit in said channel between a pair of said lugs, retaining elements extending through said rings and retaining flanges, and clamping rings carried by the first mentioned rings and arranged to engage the cushion members of the tire.

1,401,451. CAR-LIGHTING SYSTEM. LEONARD A. WATSON, Sound Beach, Conn., assignor to The Safety Car Heating and Lighting Company, New York, N. Y., a Corporation of New Jersey. Filed Nov. 27, 1920. Serial No. 426,693. 11 Claims. (Cl. 171—313.)

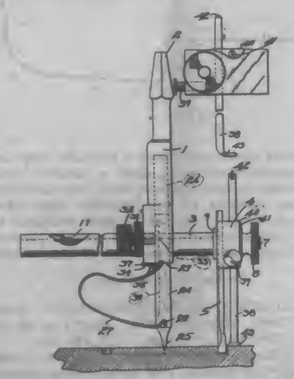
1. In a car lighting system, in combination, an axle driven generator, a storage battery adapted to be charged thereby, regulating means for the generator including a voltage coil, and means operated only when and while the battery is fully charged to set said voltage coil to maintain a succeeding lower level of impressed voltage dependent on the battery condition under the preceding impressed voltage.

1,401,452. CHEWING-GUM AND PROCESS OF MAKING SAME. HARRY M. WEBER, Bloomfield, N. J., assignor to Ellis-Foster Company, a Corporation of New Jersey. Filed June 4, 1919. Serial No. 301,788. 7 Claims. (Cl. 99—11.)



1. A chewing gum composition containing a rosin ester.

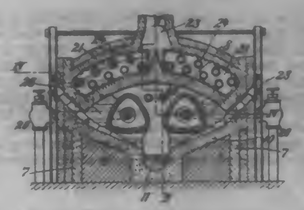
1,401,453. SKIRT-CLASP. ARTHUR WILKE, Brooklyn, N. Y. Filed June 30, 1921. Serial No. 481,453. 1 Claim. (Cl. 24—206.)



A device of the class described comprising a pair of members adapted to be locked together, one of said members consisting of a back portion having a tongue extending from the upper end thereof and lying substantially parallel to said back portion, a relatively oblong-shaped boss on the inner side of said tongue, the other of said members consisting of a plate having a series of inclined, mutually parallel, substantially oblong-shaped bosses thereon, said first-named boss being adapted to engage said plate between a pair of said second-named bosses.

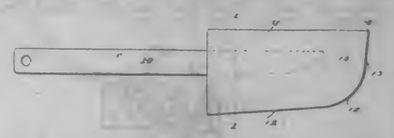
1,401,454. PENCIL OR PEN ATTACHMENT. ALEXANDER E. ANDERSEN, Bristol, Va. Filed Apr. 19, 1921. Serial No. 462,501. 10 Claims. (Cl. 120—84.)

2. The herein-described device comprising a tubular casing having a sight opening, an inner sleeve arranged within the casing, a name card or slip secured to the outside of the sleeve and having the name thereon exposed at said opening, and transparent means for covering the name card or slip to protect the same where exposed at said opening.



1,401,455. EXTENSION-BIT. PIERRE BARMAISON, San Francisco, Calif. Filed Nov. 9, 1920. Serial No. 422,852. 3 Claims. (Cl. 145—178.)

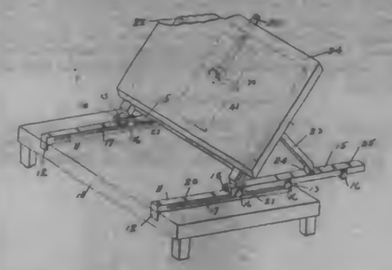
3. An extension bit, comprising a rotatable post, an adjustable transverse rod in said post, a tool holder on



said rod, an extension to said post, an auxiliary shank, a connecting link, one end of which is pivoted on said shank and the other end pivoted on said extension, a side bar pivoted on said link, one end of said bar being slotted and connected to said shank by means of a screw through said slot, the other end being slotted and connected to said extension by means of a screw through said slot, the said screws being adapted to clamp said side bar firmly to said shank and said extension and thereby holding said link at any adjusted angle.

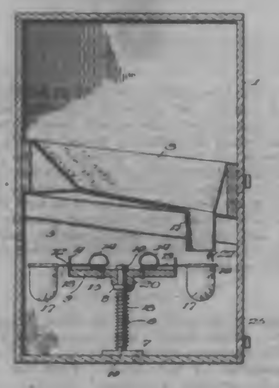
1,401,456. MELTING-FURNACE. GEORGE HILLARD BENJAMIN, New York, N. Y. Filed Apr. 9, 1920. Serial No. 372,633. 12 Claims. (Cl. 266—33.)

1. In a metallurgical furnace, the combination of a melting portion provided with a trough in the hearth thereof, a gathering portion situated in front of the melting portion and provided with a trough thereof, communicating with the trough of the melting portion, the bottom of the trough of the gathering portion located in the same horizontal plane occupied by the forward end of the trough of the melting portion.



1,401,457. DISH-SCRAPER. FRANK BRUCKMANN, East St. Louis, Ill. Filed Jan. 22, 1921. Serial No. 439,162. 2 Claims. (Cl. 65—12.)

2. A cleaning device comprising a yieldable body having oppositely arranged scraping edges, a handle having a shank embedded in said yieldable body and having openings receiving portions of said yieldable body whereby the handle is firmly connected to said yieldable body, said handle being provided with a pair of oppositely arranged shoulders engaging the rear end of said body.



1,401,458. ADJUSTABLE DRAWING-BOARD. WILFRED L. BOON, North Attleboro, Mass. Filed July 26, 1920. Serial No. 398,919. 10 Claims. (Cl. 45—1d1.)

1. In an adjustable drawing board, a frame including a board supporting member, said member being adjustable to an inclined position on the frame, a board pivotally supported on said member to be rotated in the plane of its working surface in all positions of said member and also being shiftable on said frame, a means rendered

effective and ineffective for locking the board in any position to said member when said board is shifted.

1,401,459. HEN'S NEST. ENOCH S. BROWN, Warba, Minn., assignor of one-half to Paul Scharlau, Warba, Minn. Filed May 27, 1921. Serial No. 472,955. 3 Claims. (Cl. 119—48.)

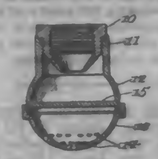
1. A hen's nest comprising a housing divided into upper and lower compartments, a nest proper in said upper compartment having an egg discharge chute communicating with its bottom, a horizontal rotatable frame mounted in the lowest compartment, a plurality of spring arms secured in radial fashion to said frame and having portions thereof extended beyond the same, egg receiving and retaining pockets carried on said free end of the spring arms adapted to be successively alined with the discharge chute, and latch means engageable with said egg retaining pockets as the same are brought into successive alinement with the discharge chute for retaining the former in alinement with the latter, but automatically disengaging said pocket upon the deposit of an egg therein.

1,401,460. ELECTRIC FIXTURE. FRANK LOWELL BUTLER, Chicago, Ill. Filed Oct. 2, 1920. Serial No. 414,211. 5 Claims. (Cl. 240—85.)

1. In an electric fixture, an insulated stem consisting of a tubular insulating member threaded exteriorly at

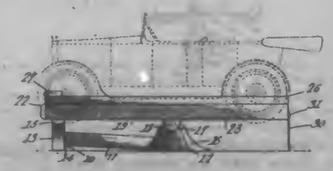
each end and formed with an obliquely directed lateral opening through its wall at a predetermined distance from the upper end thereof, a coupling screwing on the upper end of said insulating member and adapted for connection with a fixed support, a casing arranged to cover the lower portion of said insulating member to a point adjacent the lateral opening, a nut screwing on the lower end of said tubular insulating member and formed to provide a seat for said casing, said nut being formed with a depending extension having a central bore,

said depending extension having a portion formed into a link adapted to support a lighting fixture element, electrical conducting wires arranged to enter the bore of the tubular insulating member through the central bore in the depending extension to said nut and to pass therefrom through the obliquely directed lateral opening, and means disposed in the bore of the insulating member above the obliquely directed opening for diverting the electrical conducting wires through said opening.



1,401,461. WEIGHT-CONTROLLED AIRSHIP. GEORGE ALBERT CHADDOCK, Liverpool, England. Filed July 21, 1920. Serial No. 397,912. 8 Claims. (Cl. 244—7.)

1. A weight controlled air ship comprising a main hull fitted with exterior protected air wells on each side open to the air above and below between end planes and outrigger plane spaces in which propellers operate, said wells being formed by projecting planes fitted at the bow and stern on each side and extending outward from the hull far enough to shield the propellers from passing air, outrigger planes being interposed between the propellers on each side, side screens attached to outer ends of bow and stern planes, a series of propellers operated one behind the other in the shielded controlled air spaces provided to improve the lift drive thrust of propellers when in horizontal flight.



1,401,462. SHOWER-BATH NOZZLE. EVERETT CIRCLE, Coalton, Okla. Filed Feb. 25, 1921. Serial No. 447,768. 2 Claims. (Cl. 299—141.)

1. A spray device including a nozzle, a casing detachable connected with and inclosing the nozzle, said casing having spray perforations in line with the discharge end of the nozzle, and a transverse bar of a width equal to the width of the discharge end of the nozzle disposed in the casing intermediate the nozzle and the spray per-

forations to prevent discharge of the water directly from the nozzle to the perforations.

1,401,463. AUTO-LIFT. TOBIAS J. CORDES, San Francisco, Calif. Filed Apr. 7, 1920. Serial No. 372,017. 1 Claim. (Cl. 254—88.)

In an automobile jack, a base section, a longitudinal central section extending from the base section, a forward cross member having connection with the longitudinal member, a pivoted frame carrying a pivot member mounted in the base, said pivoted frame having track sections, an upper slidable section carrying rollers movable in the track sections, the upper movable section being of a length equal to the length of the pivoted frame, one end of the upper movable section adapted to normally engage the ground surface on which the device is supported to restrict movement of the frame, and rollers carried by the pivoted frame and adapted to contact with the upper movable section.

1,401,464. WELL-WASHING DEVICE. FRANK E. CAOTTO, Dallas, Tex., assignor to Reclamation Oil Producing Association. Filed Jan. 31, 1921. Serial No. 441,257. 6 Claims. (Cl. 166—20.)

1. In a well cleaning device, a housing having an opening, a nozzle within the housing arranged to swing

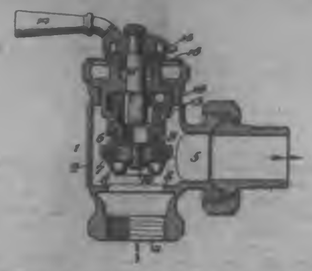
outwardly through the opening thereof, tubular connections for supplying fluid to the nozzle, a valve in one of the connections controlling the supply of fluid, and means actuated by the pressure of the fluid for causing the nozzle to be swung outward prior to the operation of the valve to supply fluid to the said nozzle.

1,401,465. THREAD-SEVERING MECHANISM FOR SEWING-MACHINES. ALBERT H. DE VOE, Westfield, N. J., assignor to The Singer Manufacturing Company, a Corporation of New Jersey. Filed Nov. 27, 1917. Serial No. 204,143. 28 Claims. (Cl. 112—252.)

1. In a sewing-machine, in combination, a reciprocating needle, a looper, means for imparting advancing and retracting loop-seizing and shedding movements to said looper in the formation of enchained thread loops, a normally ineffective thread-severing implement mounted to partake of the advancing and retracting movements of the looper, and means for rendering said implement effective to sever the needle-thread.

1,401,466. NEEDLE-CLAMP. ALBERT H. DE VOE, Westfield, N. J., assignor to The Singer Manufacturing Company, a Corporation of New Jersey. Filed May 11, 1918. Serial No. 234,007. 7 Claims. (Cl. 112—226.)

1. A needle-clamp comprising a block provided with an open ended channel adapted to receive the shank of a needle, removable wall-members at the opposite ends of the channel, a thrust-member for clamping the needle-shank therein and coacting means on the block and wall-members for holding them against displacement relative to the block by the action of the thrust-member.



1,401,467. JAR-CLOSURE. WILLIAM W. DODGE, Washington, D. C. Filed Feb. 17, 1919. Serial No. 277,465. 4 Claims. (Cl. 215—51.)

1. A stopper or closure for bottles and like containers, comprising a disk compressed to form a seat or depression in its face and a lifter sealed to said depression wholly within the thickness of the material of the disk,

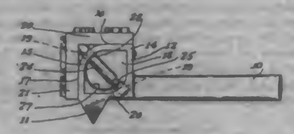
and made fast to the disk at a point between the extremities of the lifter.

1,401,468. VOLUME-REGULATING VALVE. JAMES LOGAN FITTS, Merchantville, N. J., assignor to Warren Webster & Company, Camden, N. J., a Corporation of New Jersey. Filed Sept. 10, 1917. Serial No. 100,425. 9 Claims. (Cl. 251—34.)

1. The herein described method of controlling the flow of a fluid, which comprises the proportioning of a valve plug with respect to the port area of the seat controlled thereby as herein described so as to obtain a minimum initial flow with maximum valve movement in the early stages of movement and a greater proportionate increase of volume of flow as the maximum opening of the valve is approached.

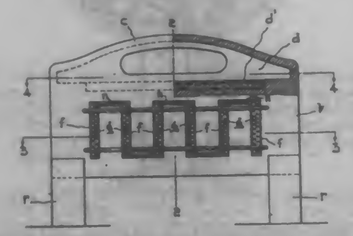
1,401,469. MORTISING-TOOL. ADOLPH H. HAWKINSON, Rockford, Ill., assignor to Greenlee Bros. & Co., Rockford, Ill., a Corporation of Illinois. Filed Sept. 10, 1921. Serial No. 499,629. 9 Claims. (Cl. 145—122.)

6. In a mortising tool, a double-spur bit the spiral body of which terminates in cutting edges reaching from an inner point substantially to the outer side and having a spur at the outer end of each cutting edge, each spur having a cutting face coincident with the adjoining cutting edges and defined at its inner and outer sides by cutting edges.



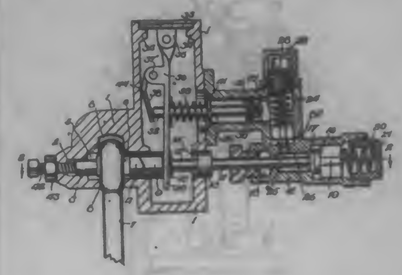
7. A mortising tool comprising in combination a hollow square cutting chisel and a boring bit, the blade of the chisel having cutting bevels at one end and having an elongated opening intersecting one of its side walls and bore adjacent to said cutting bevels, a second elongated opening through the diametrically opposite wall and located between the first mentioned opening and the shank end of the chisel, and the bit having opposite spurs, each shaped to provide a face defined by cutting edges for cutting out an annular body, the outer diameter of which is substantially coincident with the width of the blade.

1,401,470. STEPLADDER. HENRY J. HEIDER, Carroll, Iowa. Filed June 30, 1921. Serial No. 481,714. 1 Claim. (Cl. 228—58.)



A bracket for supporting the step of a step ladder comprising an elongated base plate having upper and lower, inwardly directed horizontal flanges arranged along the upper and lower edges thereof and adapted to receive the adjacent end of the step, the lower flange comprising two spaced sections, said base having a lower opening located between the said sections and a pair of spaced openings located between the upper and lower flanges, and outwardly directed inclined flanges located at the front and rear edges of the base plate and adapted to receive the inner face of the inclined leg of the ladder between the same and to bear against the inclined front and rear edges thereof, nails traversing the leg of the ladder and the spaced openings intermediate the inner flanges and entering the end of the step, and a truss rod reaching from end to end of the step below said step and traversing the lower opening in the base plate between the spaced sections of the lower flange and the leg of the ladder, and means for tightening the truss rod.

1,401,471. REVERSIBLE TYPEWRITER-TYPE. ALFONSO HERING, Brooklyn, N. Y. Filed Mar. 3, 1921. Serial No. 449,318. 5 Claims. (Cl. 197—37.)



5. A type block formed of two sections disposed at right angles, each section carrying one or more type characters, a stem extending from the junction of said sections, a type-bar head on which said sections are revolubly mounted, and means in said head for resiliently retaining said stem therewithin.

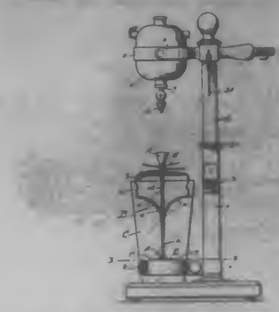
1,401,472. ELECTRIC HEATER. JOHN EYRE C. HOLMES, Ottawa, Ontario, Canada. Filed Sept. 22, 1920. Serial No. 411,892. 11 Claims. (Cl. 219—10.)

1. An electric heater consisting of a heat radiating clay body having electric heating coils.

1,401,473. PNEUMATIC CONTROL FOR LUBRICATORS. CHARLES F. HOOPER, Chicago, Ill. Filed Jan. 2, 1920. Serial No. 348,848. 11 Claims. (Cl. 184—3.)

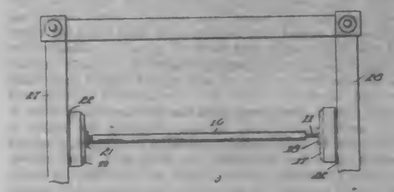
11. In a pneumatic control for lubricators, a valve casing having an inlet and an outlet, a valve disposed between said inlet and said outlet, a lever having a cam member fixed thereto, said cam member being mounted for rotation, a second cam member in engagement with said first named cam member and being provided with a non-circular shoulder integral therewith, said second named cam member being slidable and rotatable with respect to said first named cam member, means connecting said second named cam member with said valve for opening the latter when said lever is moved, a second lever having a non-circular opening adapted to normally receive the non-circular portion of said second named cam member, and pneumatic means for automatically moving said second named lever away from the non-circular portion of said second named cam member, whereby the latter is free to rotate, said means comprising a cylinder, a spring pressed valve for admitting air from said valve casing into said cylinder, a piston within said auxiliary cylinder, and means engaged by the piston for moving said second named lever.

1,401,474. HOLDER. INGWALD J. JACKSON, Duluth, Minn. Filed Apr. 16, 1921. Serial No. 461,858. 1 Claim. (Cl. 242—141.)



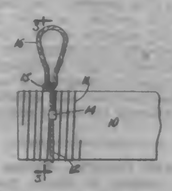
A holder of the class described comprising a base having an elevated central portion, an axial hole within said base, a spool or ball engaging member comprising two opposed resilient inwardly arched upwardly projecting members having a common integral horizontally disposed base portion and a spindle rigidly fixed centrally to said last mentioned base portions, said spindle being rotatably mounted within the first mentioned base portion.

1,401,475. MIXING DEVICE. WALTER E. JENSEN, San Diego, Calif., assignor to Jensen Manufacturing Co., Los Angeles, Calif., a Corporation of California. Filed Mar. 30, 1921. Serial No. 457,001. 7 Claims. (Cl. 259—134.)



1. A mixing device adapted to be arranged in a container and comprising a series of radially disposed baffles

in relatively fixed rotation, said baffles being disposed in different inclined planes to divide the material being

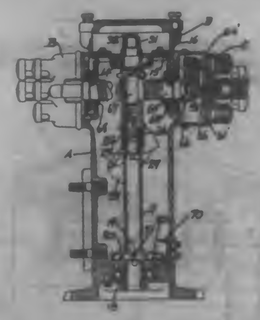


mixed into separated spiral currents, said device including the baffles being removable as a unit from the container.

1,401,476. GYMNASTIC APPARATUS. VIRGIL JORDAN and JOHN TODD HOLMES, Louisville, Ky. Filed Mar. 2, 1921. Serial No. 449,046. 3 Claims. (Cl. 46—69.)

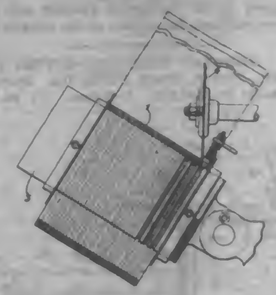
1. In a gymnastic apparatus, a horizontal bar, one end of which terminates in a screw thread and the other in a substantially spherical head, an element readily removable from one end of the bar and having a threaded perforation for the reception of said screw thread, and another element readily removable from the other end of the bar and having a substantially spherical socket for the reception of said head, the assemblage of said bar and said elements being adapted to be frictionally and detachably secured between the walls of a substantially permanent structure.

1,401,477. RESISTANCE UNIT. LEONARD KEBLER, Bronxville, N. Y., assignor to Ward Leonard Electric Company, a Corporation of New York. Filed Feb. 15, 1919. Serial No. 277,123. 11 Claims. (Cl. 219—64.)



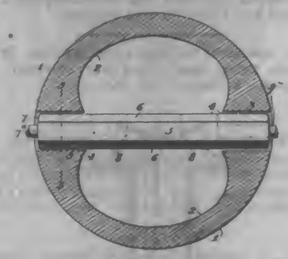
1. In combination, a cylindrical base of insulating material, a resistance conductor wrapped thereon, a stranded tap conductor around the said base connected with said resistance conductor and having a branch loop extended therefrom, means to fasten the parts of said tap conductor securely together at the point from which they extend each way around the base at the root of said branch, an eyelet fastened in the extremity of said loop, and a coat of enamel on the base covering said conductors but leaving said branch part extending therethrough.

1,401,478. ROTARY INTERNAL-COMBUSTION ENGINE. FRED KELLER, Jr., Pittsburgh, Pa. Filed Sept. 8, 1920. Serial No. 409,030. 6 Claims. (Cl. 123—11.)



1. In a rotary explosive engine the combination of a shaft, a cylindrical body axially borne upon and integral with said shaft and having formed within itself a cylinder whose axis extends in a curve centering in the axis of shaft rotation, the weight of said cylindrical body being symmetrically disposed relatively to that shaft axis, a piston reciprocable in said cylinder, means interposed between piston and shaft whereby as the shaft turns the piston reciprocates and whereby driving stress upon the piston within the cylinder exerts a rotary strain upon the shaft, means for periodically and successively in the course of rotation introducing into said cylinder an explosive substance and for igniting such explosive substance when so introduced, substantially as described.

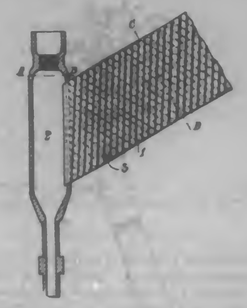
1,401,479. IGNITION SYSTEM. CHARLES F. KETTERING, Dayton, Ohio, assignor to The Dayton Engineering Laboratories Company, A Corporation of Ohio. Filed Dec. 15, 1917. Serial No. 207,220. 17 Claims. (Cl. 123—117.)



1. In an ignition system for internal-combustion engines, the combination with a timing device and an engine driven member for operating the same; of a distributing device including a movable element; a shaft carrying the movable element; gearing between the engine driven member and the shaft; and manually operable means and automatic means each for simultaneously adjusting the operation of the timing and distributing devices with respect to the engine, and each of the said means being capable of making adjustments independently of the other, but effecting a joint control of the timing and distributing devices.

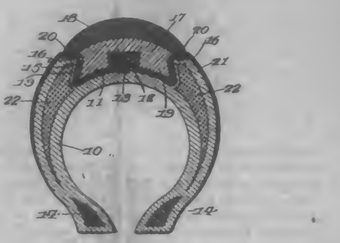
1,401,480. METHOD OF MANUFACTURING ENDLESS V-SHAPED OR ANGULAR BELTS. CHARLES E. KING, St. Louis, Mo., assignor to Capen Belting and Rubber Company, St. Louis, Mo., a Corporation of Missouri. Filed Mar. 10, 1920. Serial No. 364,767. 5 Claims. (Cl. 154—17.)

4. The method of manufacturing endless belts which consists in forming a cylindrical blank of sufficient dimensions to provide a plurality of belts, forming grooves along each line of severance, and cutting the blank along said grooves from the inner and outer surfaces of the blank.



1,401,481. KILN. JAMES HARRY LEMMON, Milltown, Ind., assignor to Louisville Cement Company, Louisville, Ky., a Corporation of Kentucky. Filed Mar. 13, 1919. Serial No. 282,503. 7 Claims. (Cl. 222—3.)

5. In a kiln, the combination of an outer wall, a suitably supported interior bridge wall, said bridge wall extending substantially from side to side of the outer wall, but spaced therefrom to allow for expansion and gas supply flues communicating with the kiln chambers through said bridge wall.



1,401,482. COOLING ELEMENT. FREDRIK LJUNGSTRÖM, Brevik, Lidingön, Sweden, assignor to Aktiebolaget Ljungströms Angturbin, Stockholm, Sweden, a Corporation. Filed Jan. 28, 1920. Serial No. 354,759. 2 Claims. (Cl. 257—262.)

1. A plurality of cooling elements arranged side by side and each consisting of a flattened pipe, and flat laterally projecting solid ribs provided on the outside of the pipe, extending obliquely from one edge to the

other edge of the pipe and the ribs of the opposite walls of two adjacent cooling elements being arranged so that they cross each other.

1,401,483. PNEUMATIC TIRE. GEORGE MICHAELSEN and JULIUS J. ROTH, Sr., New York, N. Y. Filed May 17, 1921. Serial No. 470,296. 1 Claim. (Cl. 156—16.)

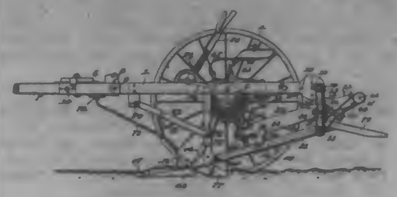
A pneumatic tire comprising a shoe having a circumferentially extending central channel in the periphery thereof with the side walls undercut to form inwardly directed oblique marginal ribs, the end faces of the ribs being longitudinally grooved, a central circumferentially extending dove-tail rib formed on the center of the bottom wall of the said channel and having a reinforcing ring embedded therein, the side portions of the shoe having reinforcing rings which extend into the first-named ribs, and a removable tread member having a portion thereof fitting into the said channel with circumferential side ribs seating within the undercut sides of the channel and in the grooves of the first ribs, respectively, said tread member having a central longitudinal dove-tail groove receiving the central rib of the channel, and friction coverings on the contacting parts of the shoe and tread member.

1,401,484. WRENCH. JOHN R. MITCHELL, Hilltop, W. Va., assignor of one-half to Wiley B. Johnson, Clsmont, Va. Filed Feb. 2, 1921. Serial No. 441,889. 2 Claims. (Cl. 81—98.)

1. A wrench comprising a shank having arms provided with seats; a fixed jaw located between the arms; means for holding the fixed jaw releasably between the arms;

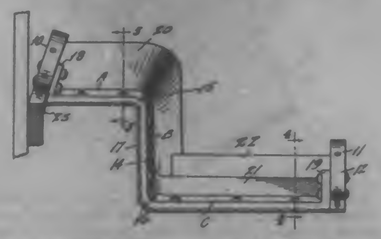
a movable jaw located between the arms and cooperating with the fixed jaw, the movable jaw having a plurality

of openings; and a pivot element shiftable from opening to opening and from seat to seat.



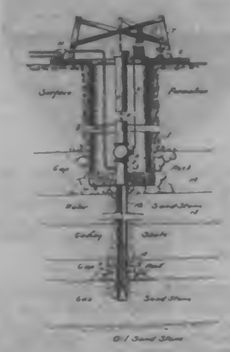
1,401,485. SPINDLE. JOHN B. NAINTRAU, North Smithfield, R. I. Filed Jan. 17, 1920. Serial No. 352,134. 3 Claims. (Cl. 118—66.)

1. The combination with a spindle blade, of a bolster receiving the spindle blade and in which the spindle blade is longitudinally and rotatably movable, a sleeve receiving the bolster and a cap for the lower end of the sleeve adjustably connected therewith and having a bearing for the lower end of the spindle blade, the cap being adjustable with respect to the sleeve longitudinally of it and the spindle blade being adjustable with the cap.



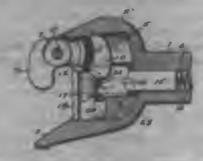
1,401,486. MACHINE FOR DIGGING PEANUTS OUT OF THE GROUND. MORDECAI M. NIXON, Edenton, N. C. Filed June 24, 1920. Serial No. 391,325. 5 Claims. (Cl. 130—32.)

1. In a machine of the character described, a conveyer having an endless belt carrying projections, a series of bars forming a riddle, the riddle being secured to the conveyer and so spaced therefrom that the projections pass close to the adjacent surfaces of the series of bars, means for vibrating the combined conveyer and riddle, and means for operating the conveyer, whereby the ma-



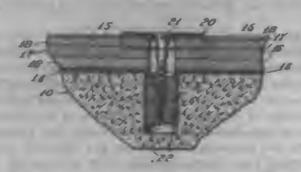
terial supplied to the machine is vibrated and simultaneously conveyed along the surface of the vibrating riddle.

1,401,487. COMBINED CURB AND GUTTER FINISHING TOOL. GUY E. NOBLE, Dallas, Tex. Filed July 1, 1920. Serial No. 393,300. 3 Claims. (Cl. 94—44.)



1. In a combined curb and gutter finishing tool, an inner member inclined outwardly from the curb and having a hand hole near its top, said inclination providing a suitable space for the hand in said hand-hole, said member extending longitudinally of the direction of movement of said tool, an outer member having a hand hole near its top, said outer member extending longitudinally of the direction of travel of said tool, and a transverse sheet connecting the inner and outer members and embodying curb and gutter forming portions.

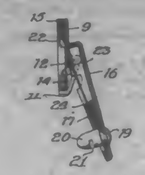
1,401,488. METHOD OF DRILLING WELLS. WILLIAM E. NOLAN, Tulsa, Okla. Filed Mar. 31, 1920. Serial No. 370,226. 4 Claims. (Cl. 255—1.)



1. The method of drilling deep oil wells, which consists in producing with a drilling tool, a bore in most part of substantially constant diameter down to the formation in which oil is sought, and at the same time producing air pressure in the bore as the sole means for holding back the collapsible walls of the bore where such occur until the drilling of the collapsible portions is completed, and then lining the bore with pressure-resistant material.

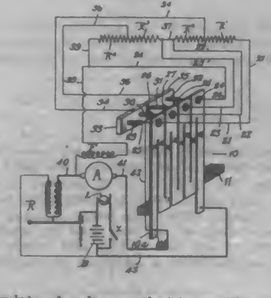
1,401,489. AUTOMATIC COUPLING. WILLIAM W. PHILLIPS, Richmond, Va. Filed Mar. 8, 1921. Serial No. 449,408. 2 Claims. (Cl. 213—65.)

1. A coupling member comprising a draw bar having a head formed thereon, said draw bar and said head being provided with a longitudinal bore, said head being provided with recesses arranged on each side of said bore, a knuckle pivotally mounted in one of said recesses, an actuating member comprising a body portion arranged in said bore, a plate formed on the forward end of said body portion, said knuckle being connected to said plate, a locking member mounted in said head and adapted to engage the side of said knuckle when in closed position, said locking member being normally actuated by gravity, an offset portion formed on one side of said locking member, and a gravity operated latch to maintain said locking member in raised position, said offset portion serving as a guide for said latch to maintain it in position to engage said locking member when the locking member is raised.



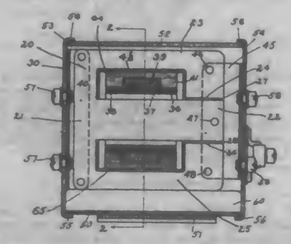
1,401,490. CARPET-FASTENING DEVICE. GEORGE W. RATHJENS, Norfolk, Nebr. Filed Feb. 11, 1921. Serial No. 444,218. 9 Claims. (Cl. 16—70.)

6. A device of the class described comprising a metallic channel member, a nailing strip secured in said channel member, a flanged cap fitted on the outer faces of the sides of said channel member, and means for securing said cap to a floor for holding the channel member in position.



1,401,491. HASP. CHARLES D. RENYE, Grand Rapids, Mich., assignor to Wilcox Pressed Steel Company, Chicago, Ill., a Corporation of Illinois. Filed Dec. 20, 1920. Serial No. 431,976. 8 Claims. (Cl. 70—115.)

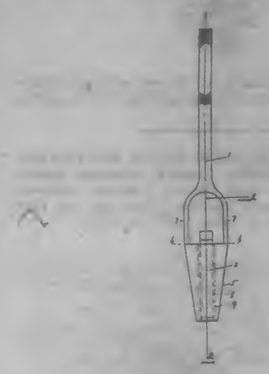
3. A hasp formed of a plate portion and a tongue portion, said plate portion being formed of a single piece of metal containing a recess in an edge thereof, with the side walls of the recess deflected forwardly, with a lug extending outwardly into said recess, said plate having a slotted portion beyond said lug, said tongue having a lug-equipped portion at which it extends through said slotted portion, the portions of the walls of said slotted portion which extend crosswise of the length of the tongue opposing opposite surfaces of said lug-equipped portion and forming an interlock between said tongue and plate adapting said tongue to be swung on said plate, said tongue having laterally-extending projections which extend into overlapping relation with said plate at the rear side thereof, and a



spring operatively engaging at one end with said tongue and at its opposite end engaging said lug for the purpose set forth.

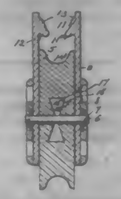
1,401,492. REGULATING DEVICE FOR DYNAMO-ELECTRIC MACHINES. JAMES B. REPLOGLE, Detroit, Mich., assignor to Remy Electric Company, Anderson, Ind., a Corporation of Indiana. Filed Aug. 18, 1917. Serial No. 186,858. 8 Claims. (Cl. 171—229.)

1. A regulator for dynamo-electric machines including a plurality of regulating circuits adapted to be placed in regulating relation to the machine, a plurality of independently operable switches for rendering said circuits respectively operative and thermostatic means responsive to the output of the machine and including a series of integrally connected U-shaped thermostat blades for independently actuating said devices.



1,401,493. INDUCTION-COIL. JAMES B. REPLOGLE, Detroit, Mich., assignor to The Remy Electric Company, a Corporation of Indiana. Filed June 13, 1919. Serial No. 303,829. 6 Claims. (Cl. 175—360.)

1. In an induction coil, the combination with primary and secondary windings; of a core including a base por-



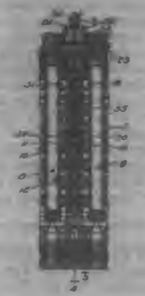
tion and integral branch portions providing two magnetic circuits threading said windings and each magnetic circuit being provided with an air gap having a substantially greater area than the sectional area of the base portion.

1,401,494. CABLE-SHACKLE. HOMER M. RHOADS and JOHN T. DAVIS, Tulsa, Okla. Filed Sept. 3, 1920. Serial No. 408,060. 1 Claim. (Cl. 24—136.)

The combination of a socket member formed with a stem and a hole having tapered opposite sides, and a split wedge comprising two members having parallel opposite cable-gripping faces and outside tapered sides and fitting in said hole, the tapered sides of the wedge engaging the tapered sides, respectively of said hole; and the intermediate opposite sides of said hole between said tapered sides being recessed longitudinally of said cable-gripping faces.

1,401,495. TROLLEY-WHEEL. SAMUEL S. RIGBY, New Castle, Pa. Filed Oct. 24, 1921. Serial No. 509,960. 4 Claims. (Cl. 191—74.)

1. A device of the character described comprising a trolley wheel and harp, the sides of the harp being extended above the trolley wheel and being provided upon their inner faces with integral downwardly and inwardly directed hook-like portions having undercut concave lower sides which lie wholly above the trolley wheel.



1,401,496. GANG-PLOW. EDWARD J. RIMPLE and JOHN W. MORGAN, San Jose, Calif. Filed July 28, 1920. Serial No. 399,530. 16 Claims. (Cl. 97—40.)

1. An agricultural implement comprising a frame, wheels supporting the frame, a plurality of ground working implement members mounted for longitudinal adjustment forwardly and rearwardly upon said frame, stems on said implements, means for rotatably securing said stems

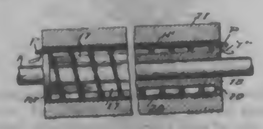
to said members and means for inclining said members relative to the frame whereby inclination of the implements may be varied.

1,401,497. ART OF HEATING WALLS. ARTHUR ROBERTS, Evanston, Ill., assignor to American Coke & Chemical Company, Chicago, Ill., a Corporation of Maine. Filed Nov. 9, 1917, Serial No. 201,112. Renewed July 28, 1920. Serial No. 400,626. 12 Claims. (Cl. 158—1.)

1. A heating wall having on its interior a meshwork of interconnected passages extending in zigzag fashion from its upper to its lower portion, whereby gases traveling downwardly therethrough may freely equalize within the wall, a series of burners for directing fuel gas into the upper portions of said passages, a series of air connections for delivering a full quantity of air into said passages adjacent to the burners, there being gas passages extending downwardly and communicating with orifices for the delivery of additional quantities of gas to the interior of the wall during the travel of the heating mixture therethrough to thereby reinforce the combustion by the consumption of the additional fuel gas in the presence of the excess of air traveling through the wall, the heating mixture being free to equalize position on the interior of the wall and thereby insure intimate mixture of gas so introduced with such excess of air, substantially as described.

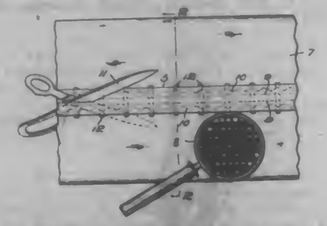
1,401,498. FOOD COMPOUND AND PROCESS OF MAKING THE SAME. JOHN H. SASSEEN, Houston, Tex., assignor to United Food Products Company, Houston, Tex., an Association. Filed Sept. 28, 1920. Serial No. 413,358. Renewed Nov. 18, 1921. Serial No. 516,247. 6 Claims. (Cl. 99—11.)

5. A food ingredient consisting of an emulsion of cooked rice, water, skimmed milk and fat in which rice is present in approximately the proportion of 12%.



6. The process of making a food compound, consisting of thoroughly cooking a quantity of rice in water, then adding milk and a small quantity of fat and beating and emulsifying the resulting mixture.

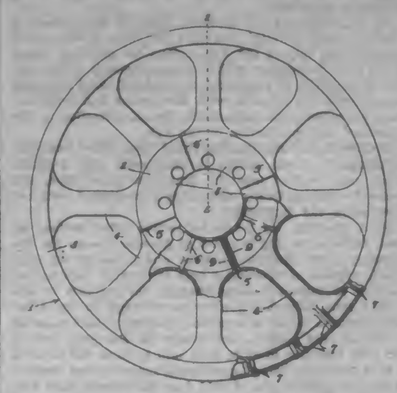
1,401,499. CARBON-REMOVING DEVICE. PETER H. RATHEN, Tacoma, Wash. Filed Nov. 29, 1920. Serial No. 426,896. 4 Claims. (Cl. 83—64.)



1. A device of the character described comprising a body block having means thereon for connection with an actuating tool, a plurality of blades slidably mounted in the block and having scraping surfaces at their outside and lower edges which are adapted, when the device is in use, to respectively scrape the inside wall and base of a cylinder, said blades being mounted within the block in such manner that pressure against the block which would tend to force it toward the base of the cylinder, will effect radially expanding pressure against the blades.

1,401,500. ELECTRIC HEATER. OLIVER PERRY SCOTT, Tacoma, Wash. Filed Oct. 17, 1919, Serial No. 331,336. Renewed Aug. 4, 1921. Serial No. 489,901. 1 Claim. (Cl. 219—63.)

An electric heater comprising a tube formed of insulating material, longitudinally extending ribs formed exteriorly of said tube, circular heads formed on the opposite ends of said tube and having perforations formed therein, a heating unit arranged about said tube and engaging said ribs, a metallic casing surrounding said tube and supported upon said heads in a manner to dispose a major portion of the casing in spaced relation to the tube, and heat insulating material surrounding said casing.

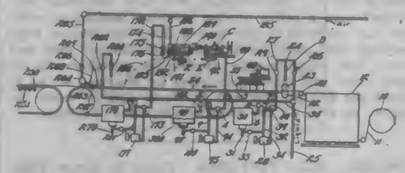


1,401,501. PREPARATION OF KNITTED FABRICS FOR USE. CHARLES E. SHAW, East Weymouth, Mass. Filed May 3, 1919. Serial No. 294,471. 9 Claims. (Cl. 2—187.)

4. A method of preparing tubular knitted fabrics for handling comprising reinforcing a longitudinal zone thereof by means positioning the threads in the zone against relative movement and longitudinally slitting the fabric along said zone.

1,401,502. ONE-PIECE CAST-METAL WHEEL AND METHOD OF MAKING THE SAME. BURNS LYMAN SMITH, Syracuse, N. Y. Filed June 8, 1917. Serial No. 173,538. 9 Claims. (Cl. 301—65.)

1. A wheel having spokes and rim and hub portions rigid with the spokes, one of said portions being cast in one piece and the other divided at intervals along lines extending toward its center, the lines of division extending entirely through said portion whereby said portion is divided into sections separated at all points from each other, substantially as and for the purpose specified.



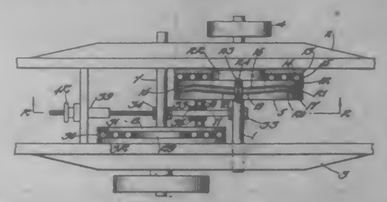
1,401,503. UNIT NON-SKID DEVICE. WILLIAM B. SMITH, Niagara Falls, Ontario, Canada, assignor to American Chain Company, Inc., Bridgeport, Conn., a Corporation of New York. Filed July 22, 1918. Serial No. 246,200. 2 Claims. (Cl. 24—116.)

1. A fastening device for anti-skid devices comprising a bar adapted to be pivotally connected at a point intermediate the ends thereof to a chain and the ends of said bar being recurved and the side faces thereof being grooved to receive the side strands of a connected link.

1,401,504. COLORING-MACHINE. RUDOLF SYKORA, Boston, Mass. Filed Feb. 11, 1920. Serial No. 357,778. 44 Claims. (Cl. 91—9.)

1. An apparatus for applying liquid coloring matter to a web of sheet material, having means for applying liquid to the surface of the web, and having a series of brushes which move in sequence transversely over the surface of the web from one side of the web to the other and back,

and means for moving each brush in such manner that it moves entirely off the web at each side before it begins its return movement.

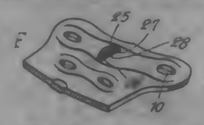


14. An apparatus for applying liquid to the surface of a web of sheet material, having a traveling carrier which supports and carries the web, means for applying liquid to the web, mechanism which clamps the web to the carrier on which it is supported and carried, said clamping mechanism being movable with the carrier and being laterally extensible, the extensibility being controlled by the expansion and contraction of the web.

25. Means for distributing liquid upon sheet material comprising a drum having a diaphragm top, a liquid supply pipe leading into the drum, an outlet pipe, and means for automatically delivering a continued series of blows upon the diaphragm.

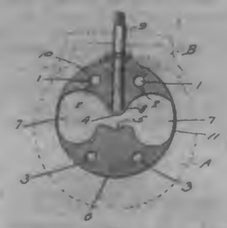
34. A machine for producing water color surface on sheet material having a series of funnels, means for discharging liquid into the funnels, and a mount for each of said funnels comprising a pair of parallel rods having a series of curved recesses therein, the recesses in one of said rods coöperating with the recesses in the other rod to form a series of spherical pockets, a ball mounted in each of said pockets, and means for clamping each of said rods together so as to hold said balls in the pockets, each of said balls being formed with a perforation through which the stem of one of said funnels extends, said funnels being adjustable to varying angles by loosening the bolts, turning the balls and again setting up the bolts.

44. A machine for producing water color surface on sheet material, having means for depositing liquid upon the surface of the sheet, an air blast, and a deflector by which the air blast is deflected to spread the depositing liquid on the sheet.



1,401,505. FRICTION DRIVE MECHANISM. RUDOLF SYKORA, Boston, Mass. Filed Aug. 12, 1920. Serial No. 403,045. 20 Claims. (Cl. 74—26.)

1. A variable driving mechanism consisting of a driving shaft having a friction disk mounted thereon, a driven member having a friction disk adjacent said first friction disk, a friction pulley which is adapted to engage with both of said friction disks, a disk loose on said driving shaft on the opposite side of said driving disk from said driven disk, said driving disk being formed with a series of cam surfaces, said loose disk being also formed with a series of cam surfaces coöperating with the cam surfaces on the driving disk, anti-friction balls between said cam faced disks, said driving disk and loose disk being capable of rotation independently of each other and means controlled by the load so as to cause the driving disk and the loose disk to rotate together as soon as the pressure surpasses the load.



1,401,506. BELT-FASTENER. CLARA S. EATON VOSS, New York, N. Y., assignor to Crescent Belt Fastener Company, New York, N. Y., a Corporation of New Jersey. Filed July 2, 1919. Serial No. 308,097. 5 Claims. (Cl. 24—31.)

1. As an article of manufacture, a metallic belt fastener, a guide ing integral therewith extending along a medial line thereof between points within the contour of said fastener, said lug having its ends formed integral

with said fastener, and its intermediate portion separate therefrom.

1,401,507. NON-PUNCTURABLE AND NON-COLLAPSIBLE PNEUMATIC INSIDE TIRE. ODAVILLE YATES, Portland, Oreg. Filed Mar. 11, 1921. Serial No. 451,522. 3 Claims. (Cl. 152—5.)

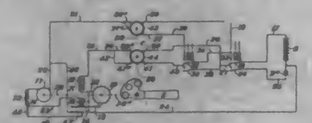
2. In a tire of the class described, the combination of an inside tire having oppositely positioned heavy reinforcements, one of said reinforcements being disposed adjacent the tread portion of the inside tire, the tire having a substantially S-shaped air space intervening between said reinforcements, the median longitudinal portions of said reinfrocements being normally spaced only a short distance apart and shaped to seat one on the other, the reinforcement on the inner side of the tire having annular passages encircling the reinfrocement, said passages being in communication at spaced intervals with the central main air spaces, whereby said inner air passages are inflated with the inflation of the main air space.

1,401,508. POWDER-DISTRIBUTING BRUSH. PIETRO D'ALESSANDRO, Syracuse, N. Y., assignor, by direct and mesne assignments, to Pietro D'Alessandro, trustee. Filed July 23, 1920. Serial No. 398,509. 5 Claims. (Cl. 15—138.)

1. A powder brush comprising a hollow body, and a brush proper having a head at one end of the hollow body, the head and body having relative turning movement, a delivery device arranged in the hollow body above the

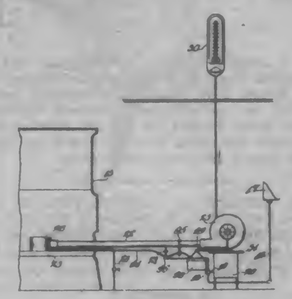
head and including a partition having perforations and cut off members movable on the upper and lower surfaces of the partition and arranged at an angle to each other whereby the lower cut-off member covers the lower end of one perforation when the upper member is out of alinement with said perforation, and covers the upper end of another perforation, means connecting the cut-off members whereby the motion of one is transmitted to the other, and connections between the head and the lower member whereby the cut-off members are operated during relative turning movement of the head and the body, substantially as and for the purpose described.

1,401,509. FENCEPOST ATTACHMENT. PERCY TRIPP BAILEY, Middletown, R. I. Filed Oct. 8, 1919. Serial No. 329,316. 4 Claims. (Cl. 256—11.)



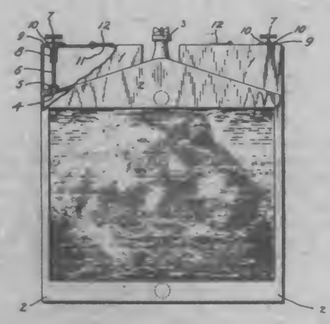
1. A fence post attachment comprising a pair of arms, one arm being longer than the other, said arms having interlocking portions and curved sections, said curved sections being adapted to fit against a fence post, a bolt adapted to extend through said curved section and said fence post for clamping said arms to said post, said arms having bent portions for clamping a bar horizontally positioned on said post and holding the same in position and means arranged on the longer of said arms for receiving fencing material.

1,401,510. ELECTRIC GLOW-LAMP. HEINRICH BAUMBACH, Charlottenburg, near Berlin, Germany, assignor, by mesne assignments, to Patent-Treuhand-Gesellschaft fuer Electrische Gluhlampen, M. B. H., Berlin, Germany, a Corporation of Germany. Filed Nov. 13, 1917. Serial No. 201,880. 4 Claims. (Cl. 176—16.)



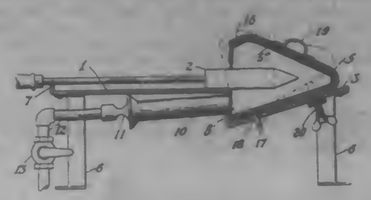
1. An electric carbon filament glow lamp having its filament surrounded by a rare gas substantially free of nitrogen.

1,401,511. RAILWAY SIGNALING MECHANISM. CHARLES R. BEALL, Swissvale, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Sept. 2, 1921. Serial No. 497,827. 7 Claims. (Cl. 246—223.)



1. Railway signaling mechanism comprising a semaphore, a motor for operating said semaphore, a holding magnet having a motor coil and a main coil, two sources of current of different voltages, and means including circuit controllers operated in accordance with the movements of said semaphore for simultaneously establishing a circuit including the high-voltage source and said motor and said motor coil, and a circuit including the low-voltage source and said main holding coil, and for subsequently interrupting the first of said circuits.

1,401,512. HEATING SYSTEM. HARRY H. HERRYMANN, Cicero, Ill. Filed Jan. 14, 1921. Serial No. 437,284. 4 Claims. (Cl. 158—36.)

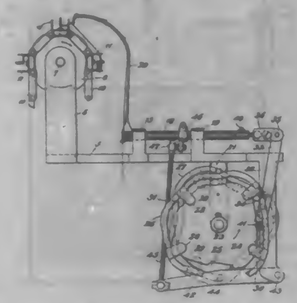


1. The combination with a liquid-fuel burner and a fuel-control valve; of a thermostat, motive means for the valve actuated by the contact action in the thermostat, a fuel drain for the burner for discharge of fuel upon failure of ignition, a receptacle into which the drain discharges, and means actuated by the weighting of the receptacle to put said motive means into operation independently of contact action of the theromstat.

1,401,513. WATER-RESERVOIR FOR AUTOMOBILE-RADIATORS. FRANK BILLINGTON, Portland, Oreg. Filed Jan. 5, 1920. Serial No. 349,663. 3 Claims. (Cl. 257—125.)

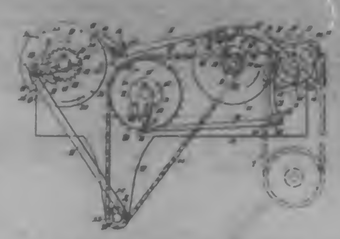
1. In a water reservoir for automobile radiators, the combination of a receptacle attached to the top of a radiator and having an opening leading from the receptacle to the radiator with a valve for closing said opening, said valve being accessible from the outside of the receptacle, substantially as described.

1,401,514. SOLDERING-FURNACE. JAMES BLACK, Buffalo, N. Y. Filed Mar. 12, 1919. Serial No. 282,244. 5 Claims. (Cl. 126—247.)



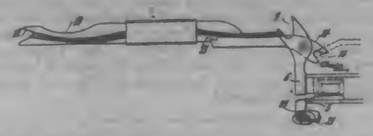
1. In a soldering furnace, a flame-hood open at its front end and closed at its rear end and having inclined top and bottom walls converging rearwardly, and front portion of its top wall being inclined forwardly to deflect the flame downwardly and the front portions of its side walls converging toward its open end to direct the flame toward the center of the hood.

1,401,515. METHOD OF WINDING SKEINS. MAX O. CLAUSS, New York, N. Y., assignor to The Clark Thread Company, Newark, N. J., a Corporation of New Jersey. Filed Aug. 1, 1919. Serial No. 314,647. 11 Claims. (Cl. 242—53.)



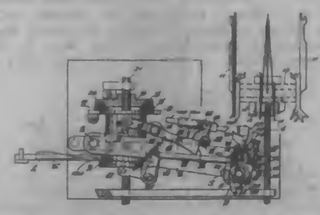
1. A method of winding skeins which consists in winding a thread about a plurality of supports to form a main or primary loop about all the supports and a plurality of intermediate or subsidiary loops about some of the supports.

1,401,516. SKEIN-WINDING MECHANISM. MAX OTTO CLAUSS, New York, N. Y., assignor to The Clark Thread Company, Newark, N. J., a Corporation of New Jersey. Filed Sept. 18, 1919. Serial No. 324,530. 13 Claims. (Cl. 242—53.)



3. In a skein winding mechanism, a thread holder having a plurality of thread supports, a thread carrier, means for supporting the thread carrier, means for imparting movement to the carrier to cause it to wind a series of primary loops about all the thread supports and a plurality of series of subsidiary loops about some of the thread supports.

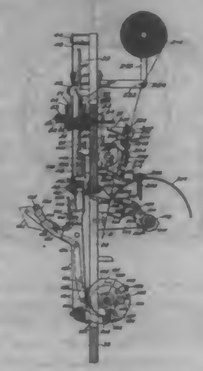
1,401,517. SKEINING-MACHINE. MAX OTTO CLAUSS, New York, N. Y., assignor to The Clark Thread Company, Newark, N. J., a Corporation of New Jersey. Filed Dec. 23, 1919. Serial No. 346,836. 20 Claims. (Cl. 198—123.)



1. In a skeining machine, in combination with the operating shaft for the skein winding mechanism, an endless carrier, a plurality of spaced skein holders mounted on said carrier, a shaft for the carrier, a gear element fixed on said carrier shaft, a revoluble actuating member for said gear element normally disposed out of engagement with said gear element, means for driving said actuating member from the operating shaft, and means for automatically moving said member in each revolution thereof to cause the same to coact with the gear element and thereby impart a step by step movement to the carrier to successively position the holders to receive the thread winding.

1,401,518. SKEIN-HOLDER. MAX OTTO CLAUSS, New York, N. Y., assignor to The Clark Thread Company, Newark, N. J., a Corporation of New Jersey. Original application filed Aug. 1, 1919, Serial No. 314,647. Divided and this application filed Dec. 23, 1919. Serial No. 346,837. 14 Claims. (Cl. 242—127.)

1. A thread skein holder comprising a plurality of spaced thread engaging parts and a loop supporting part pivotally connected with the thread engaging parts.



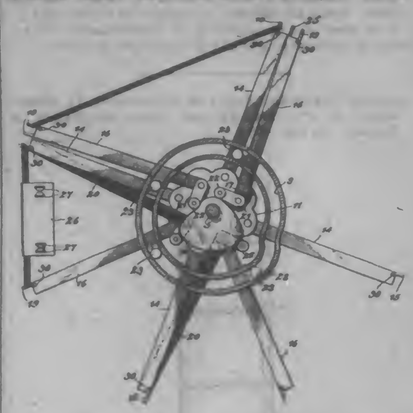
1,401,519. SKEIN-BINDING MECHANISM. MAX OTTO CLAUSS, New York, N. Y., assignor to The Clark Thread Company, Newark, N. J., a Corporation of New Jersey. Filed May 14, 1920. Serial No. 381,283. 23 Claims. (Cl. 28—9.)

1. In combination with means for successively forming a series of skeins from a continuous thread, mechanism

for applying a binder to the skein, means for effecting a relative bodily movement between the skein and binding mechanism, means for actuating the binding mechanism at the end of such relative movement in one direction to secure the binder to the skein, and means automatically operable upon such relative movement in the opposite direction to sever the thread strand extending between the adjacent skeins.

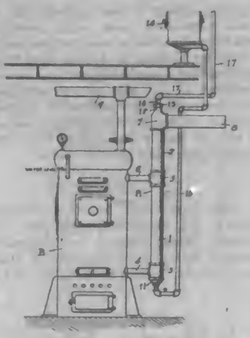
1,401,520. ARTICLE COLLECTING AND BUNDLING MECHANISM. MAX OTTO CLAUSS, New York, N. Y., assignor to The Clark Thread Company, Newark, N. J., a Corporation of New Jersey. Filed June 10, 1920. Serial No. 387,068. 35 Claims. (Cl. 28—9.)

1. A skein bundling mechanism having in combination, means for feeding the skeins one at a time to the bundling mechanism, a pair of gripping jaws adapted to grip one end of a skein, means for actuating the jaws to place the skeins in position to be arranged in a bundle, means for holding the skeins, means for superposing the skeins one upon the other in a bundle, and means for applying a binder to the bundle of skeins.



1,401,521. SKEIN. MAX OTTO CLAUSS, New York, N. Y., assignor to The Clark Thread Company, Newark, N. J., a Corporation of New Jersey. Filed July 10, 1920. Serial No. 395,309. 6 Claims. (Cl. 28—9.)

1. A skein composed of a continuous length of thread formed into a series of main or primary loops and a plurality of series of intermediate or subsidiary loops of substantially the same length as the main or primary loops formed within the circuit of the main or primary loops.



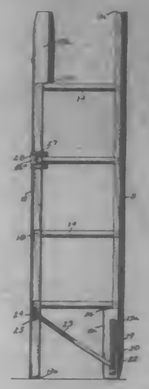
1,401,522. SKEIN SUPPORTING AND FOLDING MEANS. MAX OTTO CLAUSS, New York, N. Y., assignor to The Clark Thread Company, Newark, N. J., a Corporation of New Jersey. Filed July 29, 1920. Serial No. 399,853. 12 Claims. (Cl. 28—9.)

1. Skein supporting and folding means comprising a frame to receive the skein windings consisting of relatively movable elements, means for moving one element toward the other element and means actuated as the first element is moved toward the second element to engage the end

of the skein supported upon the first element and carry it toward the second element to thereby form a plurality of convolutions in the skein.

1,401,523. HEAT-EXCHANGE SYSTEM. WILLIAM COATES, Newark, N. J. Filed Apr. 29, 1921. Serial No. 465,388. 4 Claims. (Cl. 237—19.)

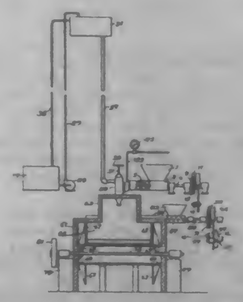
1. The combination with a water tank and a steam heating system including a boiler and a stem pipe, of a stand-pipe arranged exteriorly of said boiler and connected to the water chamber of said boiler at points adjacent the bottom thereof and immediately below the water level therein, said stand-pipe being also connected to said steam pipe above the said water level, and a conduit connected to said water tank and having a portion thereof passing through said stand-pipe.



1,401,524. COMPOSITION OF MATTER FOR IMPREGNATING ARTICLES MADE OF PAPER, PASTEBOARD, PULP, AND SIMILAR MATERIAL. JOAQUIN CRESPO, Mexico, Mexico. Filed June 29, 1921. Serial No. 481,370. 1 Claim. (Cl. 134—15.)

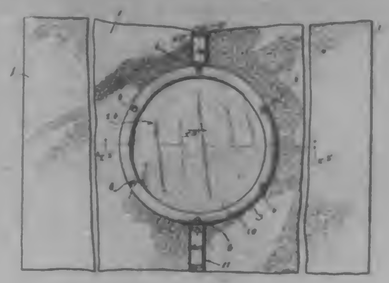
An impregnating composition for paper and the like, consisting of rosin 15000 parts, stearin 1500 parts, paraffin 1500 parts, and sulfur 100 parts, substantially as specified.

1,401,525. ENGINE-SIZING FOR PAPER. JOSEPH A. DE CEW, Mount Vernon, N. Y., assignor to Process Engineers Incorporated, New York, N. Y. Filed Aug. 14, 1921. Serial No. 495,097. 6 Claims. (Cl. 134—21.)



2. A paper size consisting of an approximately 1% solution of rosin soap, glue and formaldehyde in water.

1,401,526. LADDER. FRANK M. DE SAPERSTEIN, JR., Greenville, S. C. Filed Mar. 21, 1919. Serial No. 284,049. 4 Claims. (Cl. 228—36.)



1. In a folding ladder in combination, side rails having channeled inner opposing faces, rungs pivotally mounted at their ends in said channels, and locking means attached to the side rails for holding the ladder rigid in open, closed or every intermediate position, said means comprising a slideway mounted on one side rail, an obliquely disposed bar pivotally connected at one end to the opposite side rail, a clamp member carried at the opposite end of said bar, whereby it may be rigidly clamped to the slideway at its extreme limits or every intermediate point.

1,401,527. PROCESS FOR MANUFACTURING ACID PHOSPHATE OR SUPERPHOSPHATE. WILLIAM T. DOYLE, Boston, Mass., assignor to Sturtevant Mill Company, Boston, Mass., a Corporation of Massachusetts. Filed Mar. 29, 1921. Serial No. 456,713. 9 Claims. (Cl. 71—7.)

1. A process for manufacturing acid phosphate, characterized by continuously mixing ground phosphate rock and acid, allowing a chemical reaction to take place to convert the insoluble phosphoric acid while conveying the mixture away from the mixer into soluble phosphoric acid, and disintegrating the mixture to liberate vapor therefrom.

1,401,528. WINDOW FOR FABRIC WALLS. JOSEPH H. FLETCHER, Los Angeles, Calif., assignor to Perfection Auto Window Company, Los Angeles, Calif., a Corporation of Arizona. Filed Jan. 4, 1919. Serial No. 270,272. 6 Claims. (Cl. 296—14.)

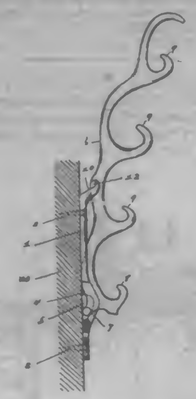
4. In a vehicle top, the combination with flexible cover means therefor having an opening therein, of a glass in said opening, and means to support the glass independently of the flexible cover means.

1,401,529. SAW. GUSTAV FOOHS, Hoquiam, Wash. Filed Jan. 2, 1920. Serial No. 348,084. 1 Claim. (Cl. 143—68.)

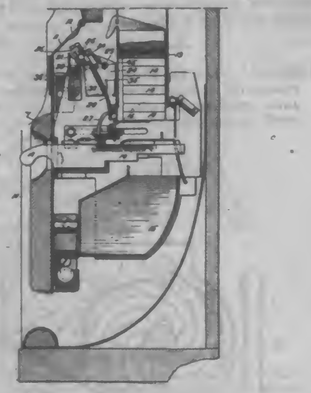
A sawing tool comprising a cylindrical casing having a central partition therein to provide chambers at each side thereof, a rotor in one of said chambers, a disk in the other of said chambers and carried by said rotor, a saw guide on said casing, a saw slidable in said guide, crank and pitman connection between said jaw and disk, an air inlet stem on said casing, an exhaust port in said casing, said stem and port communicating with the rotor chamber, a valve in said inlet stem, a handle on said stem, and valve operating means carried by said handle.

1,401,530. WHEEL OF MOTOR-TRACTORS. HENRY GARNER and JAMES PARKES GARNER, Birmingham, England. Filed Aug. 13, 1919. Serial No. 317,267. 6 Claims. (Cl. 301—40.)

1. In a wheel, the combination of a main rim, a supplementary rim in sectional lengths adapted to fit around said main rim, hook shaped clamps on one edge of one of said rims and adapted to embrace the edge of the other rim, brackets on one of said rims and having abutments, screws on said brackets, and clamps carried by said screws, having inclined parts and coacting with said bracket abutments in such manner as to wedge between the edge of one of said rims and said bracket abutments, for the purpose specified.



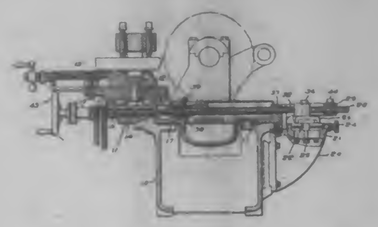
1,401,531. CABLE AND TELEPHONE-WIRE CONTAINING RAIL. FRANK GASPAR, Cupar, Saskatchewan, Canada. Filed Sept. 1, 1921. Serial No. 497,547. 4 Claims. (Cl. 191—29.)



4. A track rail having a thickened web formed with a longitudinal recess, a supplementary web element covering said recess, a sectional contact rail supported adjacent to and insulated from the track rail, wires in said recess, blocks to which said wires are connected at one end, studs adapted to bear upwardly against said blocks and rail sections, cupped enlargements on the lower ends of said studs, springs bearing upwardly in said cupped enlargements, and electrical connection devices between the respective cupped enlargements, said devices comprising bars having semicircular ends fitting against the said cupped enlargements.

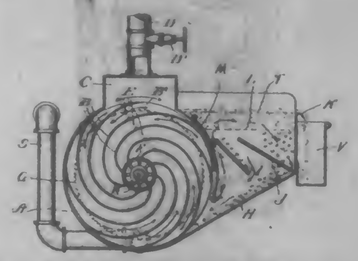
1,401,532. FOLDING CLOTHES-RACK. HARRIS S. GEER, Troy, N. Y., assignor of one-half to Frederick M. Geer, Troy, N. Y. Filed Apr. 26, 1921. Serial No. 464,619. 4 Claims. (Cl. 45—13.)

1. In a device of the class described and in combination, a bracket having an upwardly open seat and means of attachment to a wall; and a hook-bar having a vertically movable horizontal pivotal connection with said bracket, a stop engageable with the bracket to support the bar in horizontal position, and a bar-supporting member insertible in said seat when the bar is swung upward to approximately vertical position and its pivotal connection is raised.



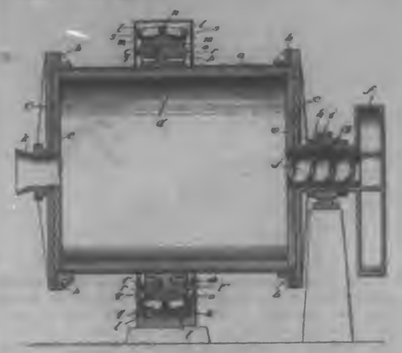
1,401,533. COIN-CONTROLLED VENDING-MACHINE. HARVEY GILES, Brooklyn, N. Y., assignor to Artemas Ward, New York, N. Y. Filed Sept. 18, 1920. Serial No. 411,234. 8 Claims. (Cl. 194—97.)

1. In a coin-controlled vending-machine having an entrance slot for coins, mechanism operable in connection with an introduced coin for discharging a piece of merchandise, an operating handle, a hinged inclined coin-plate for directing a coin entered through said slot to operative position in said mechanism, means for normally holding said plate in operative position and permitting said plate to swing into substantially vertical position on the operation of the machine, said plate having near its upper edge magnets and weight testers at the path of the introduced coins, said weight testers each comprising a pivoted plate



weighted at one end and having an arm extending into the path of the coins and toward a magnet and adapted to co-operation with the magnet to arrest a light weight coin, said tester being yieldable under the weight of a proper coin to permit the same to descend into the operative mechanism of the machine.

1,401,534. TAPER ATTACHMENT FOR LATHES. WILLIAM F. GROENE, Cincinnati, Ohio, assignor to The R. K. Le Blond Machine Tool Company, Cincinnati, Ohio, a Corporation of Ohio. Filed July 6, 1920. Serial No. 394,089. 8 Claims. (Cl. 82—17.)

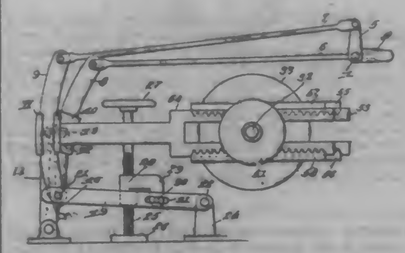


1. In a taper attachment for lathes, the combination of a lathe carriage having a cross slide mounted thereupon, a feed screw operatively secured to the cross slide, a draw bar mounted adjacent the feed screw and slidably supported by the carriage, a bearing block carried by and rigidly secured to the draw bar, said block having the feed screw rotatably mounted therein, the feed screw being held against movement bodily relative to the block, a taper guide bar provided with a sliding shoe, and means for securing said block to said shoe.

1,401,535. FLOTATION APPARATUS AND PROCESS. FREDERICK DANIEL GROSS, RANDALL PORTER AKINS, and JOHN WILLIAM BUCHER, Denver, Colo. Filed Nov. 5, 1919. Serial No. 335,951. 7 Claims. (Cl. 83—85.)

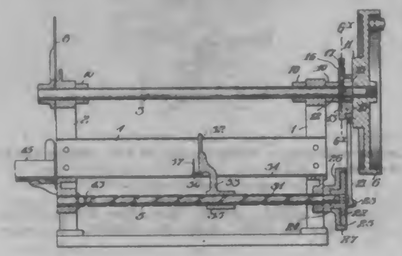
1. The herein described method of separating minerals by the flotation process which consists in successively isolating and commingling definite quantities of a froth producing mineral containing liquid and air to thoroughly commingle and aerate the same, and thereafter directly releasing said definite quantities of aerating liquid below the surface of a body of similar liquid to effect frothing thereof.

1,401,536. ROLLER-BEARING FOR TIRE AND TRUNNION TYPE MILLS. FREDERICK DANIEL GROSS, RANDALL PORTER AKINS, and JOHN WILLIAM BUCHER, Denver, Colo. Filed Nov. 5, 1919. Serial No. 335,952. 5 Claims. (Cl. 83—9.)



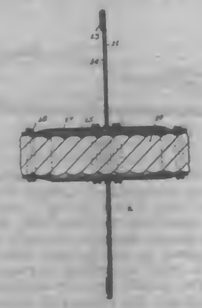
1. In a cylindrical mill, a cylindrical mill shell having an annular tire, an annular series of traveling rollers encircling said tire with means for holding them in spaced relation, and an arc-shaped support beneath said tire upon which the lowermost rollers of the series travel.

1,401,537. AIRCRAFT-PROPELLER. JAMES DE WITT HILL, Scottdale, Pa. Filed May 27, 1919. Serial No. 300,094. 12 Claims. (Cl. 170—162.)



1. A propeller blade having a reverse camber and a negative angle of incidence at its inner end.

1,401,538. CHANGE-SPEED MECHANISM. WILLIAM KESSLER, Sprague, Wash. Filed Nov. 8, 1919. Serial No. 336,738. 5 Claims. (Cl. 74—54.)

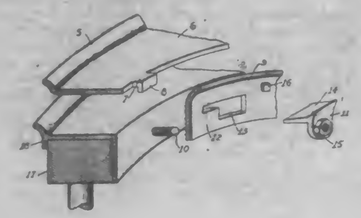


1. In a change speed transmission mechanism, a main constant speed driving shaft, a second or driven shaft, ratchet mechanism for said second shaft, a reciprocating rack bar for operating said mechanism to rotate said second shaft and being partly supported by said mechanism, a pivoted upright, a rack bar pivot connecting said bar with said upright, an arcuate link guide loosely mounted on said rack bar pivot, an arcuate link longitudinally slidable in said guide and having one end in driven connection with said driving shaft, and adjustable means pivoted to the other end of said link for adjusting the latter in said guide to vary the reciprocating stroke of said rack bar.

1,401,539. SLICING-MACHINE. WALTER CHANDLER KNAPP and HERBERT T. LOCKMAN, Rochester, N. Y., assignors to Liberty Bread Slicer, Inc., Brighton Sta., Rochester, N. Y., a Corporation of New York. Filed May 20, 1918. Serial No. 235,534. 2 Claims. (Cl. 17—24.)

1. A slicing machine comprising a frame provided with a chute for the material to be sliced having a longitudinally extending slot in its bottom, standards on the frame extending above the chute at opposite ends thereof, a main shaft rotatably carried at its opposite ends by said standards above said chute, driving means on one end of said shaft, a rotary slicing blade on the other end of said shaft coöperating with the end of said chute to slice the material, a worm shaft rotatably carried by said frame underneath said chute, a nut on said worm shaft, a pusher for the material slidable longitudinally in said chute and connected with said nut through said chute slot, and a driving connection between said main and worm shafts at the end of the machine opposite said slicing blade for imparting step by step rotation to said worm shaft intermediate slicing operations of theb lade.

1,401,540. RAT-GUARD. WILLIAM F. KONIG, San Francisco, Calif., assignor of one-half to John C. McCann, San Francisco, Calif. Filed Dec. 15, 1920. Serial No. 430,847. 3 Claims. (Cl. 114—221.)

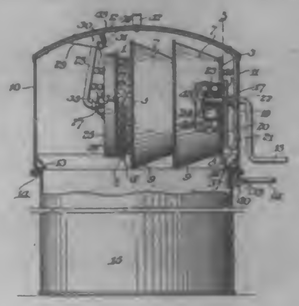


1. A rat guard, including a pair of units, one of said units presenting grooves adapted to receive certain parts of the side edges of the second of the same, each of said units being formed with a recessed portion, these recessed portions being adapted to aline with each other to provide a common opening through both of the units, and clamping strips secured to one of the faces of each of said units, and strips of material, having one of their ends interposed between said clamping strips and face of said units.

1,401,541. DUST-CAP FOR TIRE-VALVES AND THE LIKE. HENRY PHILLIP KRAFT, Ridgewood, N. J. Filed Dec. 17, 1914. Serial No. 877,789. 21 Claims. (Cl. 152—12.)

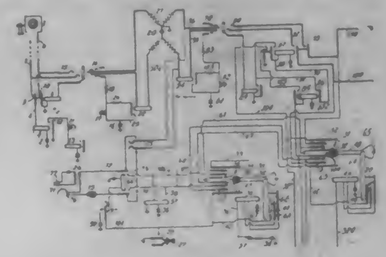
1. The combination of a valve casing having a nipple and a dust cap adapted to pass freely over said nipple, said dust cap and valve casing having an engaging means for holding the cap in place on the valve casing, said dust cap and valve casing having abutting means at the inlet end of the casing for preventing the onward movement of the cap beyond a fixed point prior to the cap reaching the limit of movement otherwise permitted by the engaging means, the engaging means on the casing otherwise permitting further movement of the cap.

1,401,542. SECTIONAL DEMOUNTABLE RIM. JOSEPH G. KUENZINGER, Chicago, Ill. Filed Dec. 26, 1919. Serial No. 347,333. 3 Claims. (Cl. 301—11.)



2. In combination a wheel, a demountable rim thereon, the said rim formed of two circumferentially extending parts provided with lug and slot connections that are engaged by relative circumferential movement of the rim members, and means entering thes lots whereby the rim members are locked against reverse circumferential movement and the rim is secured to the wheel.

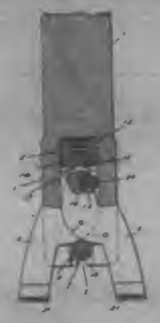
1,401,543. ASH-SIFTING DEVICE. FRANK H. LEHMAN, Lebanon, Pa. Filed Apr. 6, 1920. Serial No. 371,696. 19 Claims. (Cl. 83—60.)



1. An ash sieving device including a portable ash container in the form of a bucket having foraminous side

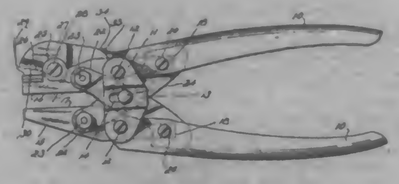
walls, and outwardly and upwardly diverging protective means outwardly surrounding the side walls to prevent ashes which sift through the side walls from dropping from the container when the latter is in substantially ver-

tical upright position, but adapted to permit such siftings to drop freely from the container arranged to eject the same therefrom when the container is disposed and rotated on a substantially horizontal axis.



1,401,544. TELEPHONE-EXCHANGE SYSTEM. GEORGE ALBEN E. LUNDELL, Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Nov. 1, 1919. Serial No. 335,131. 11 Claims. (Cl. 179—50.)

3. In a telephone exchange system an answering operator's board, a trunk operator's board, trunk lines extending from one board to the other, automatic selecting means for seizing an idle trunk, a telephone set for each group of trunks, means individual to each trunk for operatively connecting a trunk to a telephone set, and means responsive to the initiation of a call on one trunk for rendering inoperative the conecting means of the group.

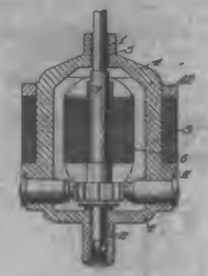


1,401,545. OIL-WELL UNDERREAMER. THOMAS J. MCCORMICK, Elko, Nev. Filed July 9, 1920. Serial No. 395,046. 11 Claims. (Cl. 255—78.)

1. An underreamer comprising a body, jaws carried thereby and yielding means to cushion and expand the jaws whereby an elastic quality is imparted to the under reamer, in combination with yielding means arranged to act against the jaws counter to the first-named yielding

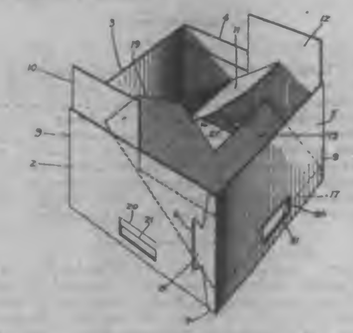
means whereby the elastic quality of the underreamer is increased.

1,401,546. PLIERS. ANTON MAR, New Haven, Conn. Filed May 20, 1920. Serial No. 382,857. 6 Claims. (Cl. 7—3.)



3. In pliers, the combination with a pair of handles, of fulcrum plates connected therewith, jaws, means for operating said jaws from said handles, a supplemental jaw connected with one of said jaws and operated in one direction by the other of said jaws, and means independent of said jaws for actuating said supplemental jaw in one direction.

1,401,547. BEDPAN. BESSIE MOSELEY, Sumter, S. C. Filed Nov. 7, 1919. Serial No. 336,297. 1 Claim. (Cl. 4—19.)



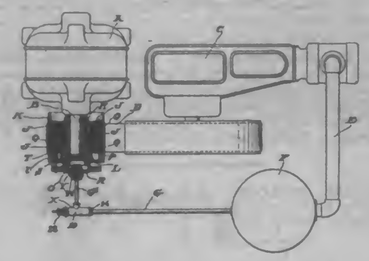
In combination with a bed pan, a cushion for the thin end thereof and consisting of a pocket flaring and opening rearwardly, said pocket having a single lower wall and a double upper and front end wall, the double walls defining a continuous inflatable chamber, and means for holding said pocket on the bed pan, said holding means consisting of a strap secured at one end to the lower wall pocket at its median line and carrying a flexible cap at its other end, said cap adapted to fit the nipple at the rear of the bed pan and an annular clasp carried by said strap adjacent the aforesaid cap and adapted to embrace the nipple and hold the strap thereto.

1,401,548. ELECTRIC MOTOR. THOMAS J. MURPHY, Rochester, N. Y., assignor of one-half to James P. B. Duffy, Rochester, N. Y. Filed Sept. 17, 1917. Serial No. 191,736. 6 Claims. (Cl. 172—36.)

4. In an alternating current motor the combination with a rotor, of a stator comprising oppositely disposed bearings therein for the rotor, longitudinal portions integral with and connecting said bearings, laminations supported by said longitudinal portions and surrounding the same, windings on said laminations arranged to have said longitudinal portions in inductive relation to the stator field.

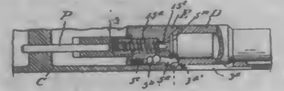
1,401,549. BERRY-BOX. EDWARD O. NORDSTROM, Minneapolis, Minn. Filed Dec. 23, 1920. Serial No. 432,773. 7 Claims. (Cl. 229—16.)

1. A folding box comprising a blank of flexible material having parallel transverse score lines thereon at intervals to form a series of panels constituting the side walls of the box, each panel having a corner cut away to form lateral extensions on one side and scored transversely with respect to the score lines of the panels and arranged to fold in pairs, one pair upon the other, and each flap of a pair interlocking and lapping over the other flap of the same pair.



1,401,550. METHOD OF FORMING GEAR-TEETH. CHARLES ALGERNON PARSONS, Newcastle-upon-Tyne, and STANLEY SMITH COOK, Wallsend, England; said Cook assignor to said Parsons. Original application filed May 15, 1918, Serial No. 234,857. Divided and this application filed Mar. 30, 1920. Serial No. 369,967. 3 Claims. (Cl. 90—1.)

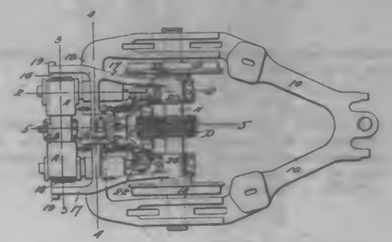
1. The method of forming gear teeth which consists in machining the teeth to a form which gives more uniform distribution of force across the face of the gear for given power conditions, by causing the generating hob



uniformly to approach or recede from the axis of the work as it is fed across the work, as set forth.

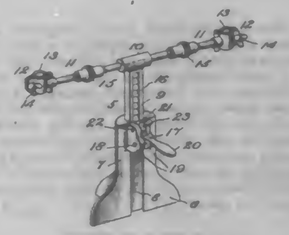
1,401,551. FLUID-ACTUATED CLUTCH-PULLEY. FREDERICK W. PARSONS, Elmira, N. Y., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed Nov. 9, 1920. Serial No. 422,976. 3 Claims. (Cl. 192—01.)

1. A fluid actuated clutch pulley, comprising an inner disk driver adapted to be connected to a shaft, a series of inner disks slidable upon but rotatable with the said driver, a pulley casing having an end plate, clutch tie rods connecting said casing and end plate, a series of outer disks loosely carried by said tie rods and arranged alternately with the inner disks, a piston rotatable with the casing, the said piston and end plate having relative longitudinal movement, springs inside the casing for normally pressing the disks together, and means for relieving the spring pressure on the disks when fluid pressure is supplied to the piston.



1,401,552. FIREARM. JOHN D. PEDERSEN, Jackson, Wyo. Filed Apr. 7, 1920. Serial No. 371,861. 32 Claims. (Cl. 42—3.)

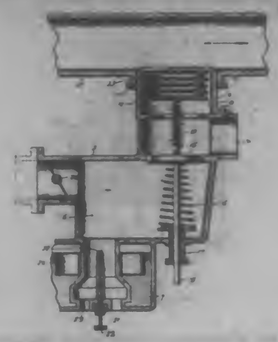
1. In an auto-loading firearm, the combination of a frame, a barrel, a breech-block reciprocatably-supported on the frame and having a block-face for supporting a cartridge in firing position in the barrel, a block-operating member reciprocatable longitudinally of the frame, and having a guide-way within which the breech-block is arranged for longitudinal reciprocative movements, a firing-pin carried by the block-operating member, a lockable extractor carried by the breech-block, and two faces in positions and arranged on the block-operating member, one



for changing the firing-pin position relatively to the block-face, and the other being an extractor-locking face in position for coacting with the lockable extractor, each during a reciprocative movement of the breech-block within said guide-way.

1,401,553. BOOSTER-MOTOR SUPPORT. HARRY M. PFLAGER, St. Louis, Mo. Filed Sept. 10, 1919. Serial No. 322,862. 8 Claims. (Cl. 105—115.)

1. The combination with a radially movable trailer truck frame and its axle, of a booster motor bed plate formed in a single piece and provided adjacent to its forward ends with bearings adapted to receive the trailer truck axle and the rear portion of said bed plate having bearing on said trailer truck frame.

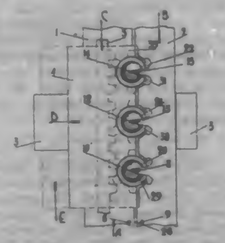


1,401,554. BED-JACK. JOSEPHINE M. PHILLIPS, Elizabeth, N. J. Filed Jan. 7, 1921. Serial No. 435,586. 1 Claim. (Cl. 5—41.)

A bed jack comprising a supporting base, an extension leg slidably mounted in said base, adjustable arms mounted on the upper ends of said leg, means mounted on the base and engaging said extension leg and adapted to be manually actuated for extending the legs, means coacting with said extension leg and base for holding the leg in lifted position, and clamps rotatably mounted on the outer ends of said arms and arranged for engaging the legs of the bed at one end thereof, for the purpose specified.

1,401,555. CARBURETER. CHARLES L. RAYFIELD, Chicago, Ill. Filed June 21, 1917. Serial No. 176,187. 1 Claim. (Cl. 123—124.)

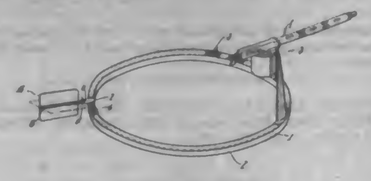
A carbureter having an air admitting valve, in combination with a heat-responsive device, normally resisting the opening of said valve, subject to be heated by the hot exhaust gases of an engine to reduce said resistance; a casing, exteriorly threaded and surrounding said responsive device for insertion, to a greater or less extent, within a threaded aperture in a conduit carrying the hot



gases exhaust from said engine, and a nut surrounding said casing for securing it in adjusted position.

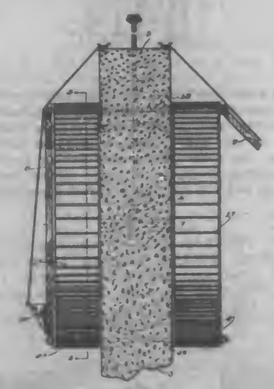
1,401,556. CLASPING DEVICE FOR ARTICLES OF APPAREL. GUSTAVE ANTOINE RENAULT, Paris, France. Filed May 27, 1919. Serial No. 300,203. 1 Claim. (Cl. 24—221.)

In a fastening for the general purposes described, a female member having a non-circular opening, and a male member comprising a guard-plate, a button adapted to pass through said opening in one angular position but not in another, said button being revolubly mounted on said guard-plate, and means tending to prevent the accidental turning of said button on said guard-plate, the button on the male member having a pivot pin furnished with a ratchet pinion, and resilient pawls carried by the guard-plate and bearing against said pinion.



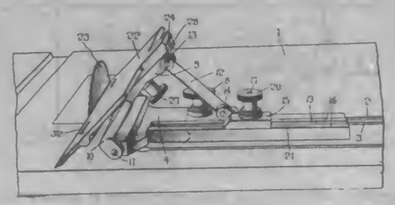
1,401,557. APPARATUS FOR THE MANUFACTURE OF WIRE NETTING. FRANCISCO RIVIERE and FERNANDO RIVIERE, Barcelona, Spain. Filed July 17, 1918. Serial No. 245,337. 4 Claims. (Cl. 140—6.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

1. In a wire net machine two parallel wire guides, each arranged to guide a row of spaced apart mesh forming



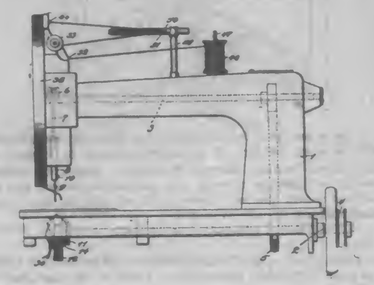
wires, means for guiding through the machine a series of reinforcing wires parallel with the mesh forming wires prior to the formation of the mesh, a plurality of twisting wheels having axial bores and slots giving lateral access to said bores, for engaging the wires, a carrier for said wheels, reciprocable into and from coöperative position with said mesh forming wires and said reinforcing wires, and also reciprocable laterally of said rows of wires, and means for rotating said wheels in both the positions to which they are movable by the lateral reciprocation of said carrier.

1,401,558. EQUALIZER. HUGH M. ROCKWELL, New Haven, Conn., assignor, by mesne assignments, to The Marlin Firearms Corporation, New Haven, Conn., a Corporation of Delaware. Filed Dec. 16, 1918. Serial No. 266,896. 5 Claims. (Cl. 89—40.)



1. A gun mount for airplanes comprising a rotatable member, a gun support on said member, and a vane carried by said member, said vane having a surface area sufficient to equalize the effect of the wind pressure against the gun support and gun carried thereby when the airplane is in flight.

1,401,559. TIDE-POWER MOTOR. PATRICK J. ROONEY, New Rochelle, N. Y. Filed Nov. 1, 1919. Serial No. 334,917. 3 Claims. (Cl. 61—20.)

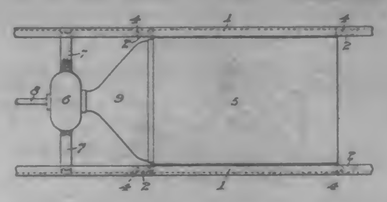


3. In a tide water motor system the combination of two horizontal-opposed-inward-flow-radial turbines arranged in water tight connection over the ends of a conduit through a dam separating two bodies of tide water, outwardly opening valves supported over passageways for discharge water in each turbine case, a dam separating two bodies of tide water, a conduit through the said dam below low water level and power transmitting means for the said turbines, substantially as described.

1,401,560. SAW-GAGE. VERNON ROYLE, Paterson, N. J. Filed Jan. 4, 1917. Serial No. 140,590. 1 Claim. (Cl. 143—168.)

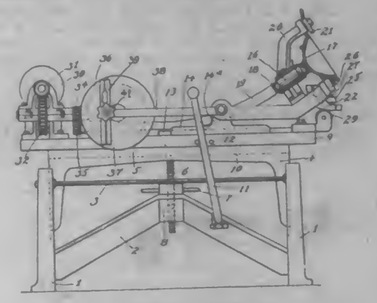
A saw gage comprising, a support pivoted to swing into different angular positions with respect to the work table and a guide plate fitted to slide toward and away from the table on said support and having a dovetailed tongue and groove engagement with the support, and means for clamping the tongue frictionally in the groove, said means operating to draw the plate toward the support and temporarily lock it in various adjustments.

1,401,561. SEWING-MACHINE. MORRIS SCHILLER, St. Louis, Mo. Filed June 9, 1919. Serial No. 302,899. 9 Claims. (Cl. 112—248.)



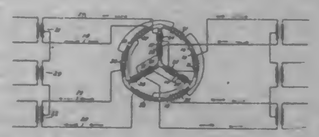
1. A sewing machine of the type described comprising, in combination, a needle, means for pulling-off and taking-up the needle-thread, said means including a rotary member, a member carried by the rotary member for pulling the thread to the needle, and a second member also carried by the rotary member and spaced circumferentially on the rotary member from the first member adapted to grasp and take up the thread from the needle and then release the thread, mechanism for reciprocating the needle and actuating the rotary member, and yielding means for taking up slack in the thread on its release by said second member.

1,401,562. COOLING RADIATORS. HERBERT N. SEARLES, Oyster Bay, N. Y. Filed May 12, 1920. Serial No. 380,781. 3 Claims. (Cl. 257—126.)



1. In a cooling apparatus of the class stated the combination of a tubular radiator entirely open at both top and bottom, a chamber having air-tight top, sides and ends, but an entirely open bottom superposed upon one of the open sides of the radiator, a blower outside

of the radiator constructed and arranged to discharge into an air trunk connecting the blower with an air-



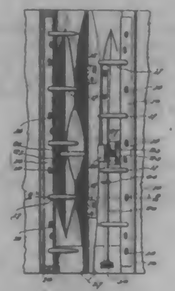
chamber, said air trunk itself, and means to operate the blower.

1,401,563. METAL-BURNISHING MACHINE. WILLIAM B. SMITH, Norwood, Ohio. Filed June 19, 1919. Serial No. 305,271. 12 Claims. (Cl. 51—230.)

1. In a machine for buffing or the like, the combination with a work holder, of automatic means to impart reciprocatory motion thereto, automatic means to enforce curvilinear motion thereto and automatic means for imparting rotary motion thereto, all of said motions being simultaneous.

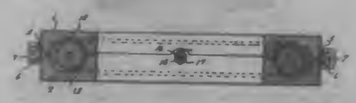
1,401,564. TETRAHEDRONAL MAGNETIC UNIT. JAMES BUCKNER SPEED, New York, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Sept. 3, 1918. Serial No. 252,381. 16 Claims. (Cl. 178—46.)

1. A magnet core comprising six limbs outlining a tetrahedron.



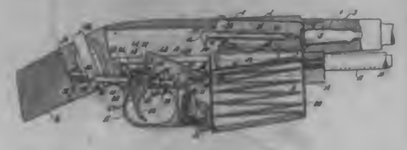
1,401,565. AUTOMOBILE-RADIATOR. CHARLES F. SPERY, Chicago, Ill. Filed June 25, 1920. Serial No. 391,587. 3 Claims. (Cl. 257—130.)

1. In a radiator, the combination with the upper and lower radiator tanks, of a plurality of flattened tubes interconnecting the said tanks, a pair of corrugated fins attached to each tube, said fins having flat bases encompassing the tube, shaped with horizontally disposed V's extending from the said bases and having a plurality



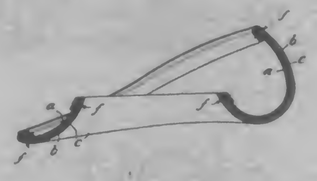
of indentations in the apex of each V for the purpose of directing the air passing through the said fins toward the tubes.

1,401,566. LOOSE-LEAF BINDER. LEON B. STODDARD, Baker, Oreg. Filed Aug. 12, 1919. Serial No. 317,086. 8 Claims. (Cl. 129—17.)



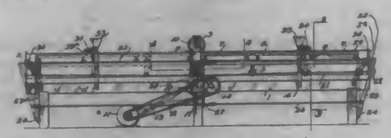
1. In a loose leaf binder, the combination of a pair of hingedly connected sections, an arcuate segment carried by one section and provided with ratchet teeth on its concaved surface, and a pivotably mounted locking block carried by the other section and having ratchet teeth thereon adapted to engage with the ratchet teeth of the segments to lock the sections in adjusted positions.

1,401,567. PROCESS AND APPARATUS FOR MANUFACTURING HOLLOW RUBBER ARTICLES. HEZEKIAH R. STRATFORD and ELMER SCHEUER, Cleveland, Ohio. Filed Sept. 10, 1919. Serial No. 324,796. 17 Claims. (Cl. 18—45.)



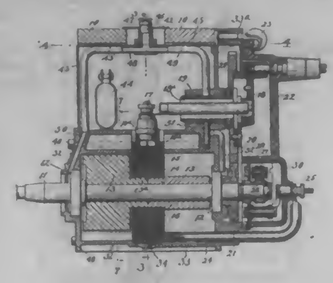
1. A core for use in the manufacture of hollow rubber articles consisting of metal cast to a form to fit the interior of the article and arranged in sections separated by sheets of fabric, the core being adapted to melt when vulcanizing temperature is applied to the article.

1,401,568. REPEATING FIREARM. CARL GUSTAF SWEBILIUS, New Haven, Conn., assignor, by mesne assignments, to The Marlin Firearms Corporation, New Haven, Conn., a Corporation of Delaware. Filed Feb. 19, 1919. Serial No. 277,974. 27 Claims. (Cl. 42—22.)



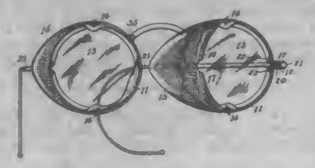
1. In a repeating firearm, a receiver, a breech mechanism operatively mounted therein, means to operate said breech mechanism, a hammer, a trigger, means to retain said operating means in one position until after the hammer has reached the forward limit of its travel, and means to lock said hammer in cocked position, said hammer-locking means being independent of but releasable by said retaining means.

1,401,569. METHOD OF REPRODUCING HATS. TOSKA SEMMIG, nee TEICH, Dresden, Germany. Filed Jan. 2, 1914, Serial No. 810,080. Renewed Jan. 6, 1917. Serial No. 140,920½. 1 Claim. (Cl. 2—108.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)



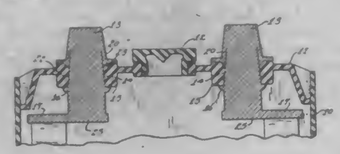
A method of reproducting hat shapes, consisting in applying to the hat to be reproduced a loose layer of waterproof material such as guttapercha paper, applying to this layer another, plastic layer of moist material such as stiff muslin, and drying the latter layer rapidly over a flame while applied to the hat, substantially as set forth.

1,401,570. TWO-WAY SIGN-PRINTING PRESS. CHARLES W. TURNER, Massillon, Ohio, assignor to Massillon-Cleveland-Akron Sign Company, Massillon, Ohio, a Corporation. Filed Apr. 26, 1921. Serial No. 464,576. 11 Claims. (Cl. 101—212.)



1. A printing machine of the character described, including a printing cylinder, a reciprocating impression table movable back and forth under the printing cylinder, and means connected to and movable with the table for inking the cylinder after the impression table has passed under the same in either direction, whereby a complete printing impression may be made upon the movement of the table in either direction.

1,401,571. MAGNETO. JOSEPH A. WILLIAMS, Cleveland, Ohio. Filed Feb. 2, 1920. Serial No. 355,588. 10 Claims. (Cl. 123—149.)

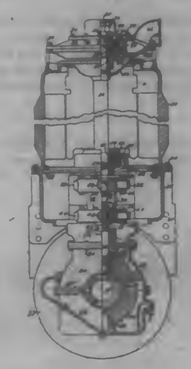


1. In a magneto, a housing adapted to support a rotor shaft composed of two members adapted to be fitted end to end with their meeting faces arranged transversely of the rotor axis, a pair of pole pieces carried by each housing member, and magnets engaging said pole pieces.

1,401,572. GOGGLES. FREDERICK WILLSON and HARRY F. SHINDEL, Reading, Pa., assignors to T. A. Willson & Co., Inc., Reading, Pa., a Corporation of Pennsylvania. Filed Aug. 23, 1919. Serial No. 319,307. 7 Claims. (Cl. 2—149.)

1. In an eye protector, a lens-clamping framing having opposed end-piece members and an eye-cup extension, a detachably engaged spring-clip band for the abutted members, and a pivoted eye shield adapted to hold said members together without interfering with the operation of said band.

1,401,573. BATTERY-POST AND METHOD OF MAKING A SEAL. HARRY L. WOOD, Lakewood, Ohio. Filed Mar. 21, 1921. Serial No. 453,027. 7 Claims. (Cl. 204—52.)

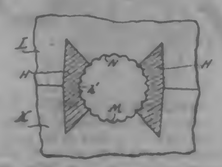


1. The process of sealing a battery post consisting of taking a cell cover, extending a partially formed post through the cover and from the bottom thereof, placing a ring over the post and on top of the plate, fusing the post with the ring and then adding material to build up the post.

1,401,374. GAGE-TUBE PROTECTOR AND ILLUMINATOR. ASHLEY L. WRIGHT, Newton, Mass. Filed Oct. 28, 1920. Serial No. 420,253. 2 Claims. (Cl. 73—64.)

1. A gage tube protector and illuminator comprising a cage formed to surround the indicating portion of a vertical gage tube, and provided at one side with a light-conducting opening having vertical guides at its opposite edges, and with a stop at the lower end of said opening; and a lamp casing having a hollow light-conducting neck provided with a light-transmitting protective filler, which includes a glass prism, and angular flanges at opposite sides of said neck, embracing edge portions of the prism, said filler being engaged with said guides, and adapted to abut against said stop to support the lamp casing in its operative position, the filler constituting also a slidable runner which permits the application and removal of the lamp casing, other sides of the cage being provided with sight openings and with protective prisms therefor.

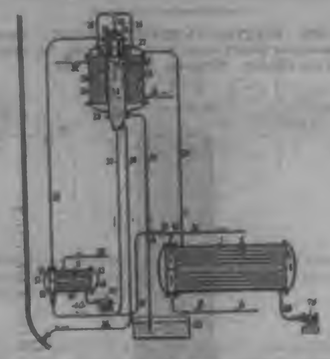
1,401,575. ELECTRIC LOCOMOTIVE. THORSTEN ZWEIGBERGK, London, England. Filed Mar. 16, 1920. Serial No. 366,388. 10 Claims. (Cl. 105—49.)



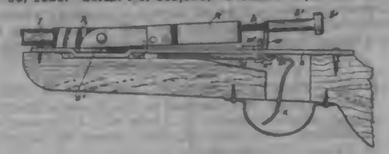
3. In an electric locomotive, a driving axle, a motor casing, a vertical rotor, bearings for said rotor supported by said casing, gearing between said rotor and said axle, and a dish-shaped member surrounding said rotor below the bearings at one end thereof, whereby oil or grease from said bearings is prevented from entering the motor.

1,401,576. COMBINATION COMB AND BRUSH. NORA CAGE BERMAN, Chatham, Va., assignor of one-fifth to Beatrice Rice, Cobleskill, Pa. Filed Dec. 10, 1920. Serial No. 429,849. 2 Claims. (Cl. 132—86.)

1. A device of the class described comprising a laterally slotted frame, a slotted handle integral therewith, a comb pivotally mounted in the slot of said handle, resilient means for retaining said comb within the slot, a pair of combs having longitudinal slots disposed in the slots of said frame, pins fixed in said frame passing through the slots of said combs permitting said combs to be retracted and reversed, and resilient means fixed in said frame engaging recesses in the last named combs.



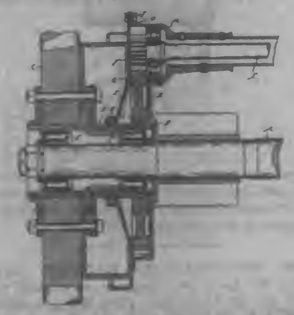
1,401,577. ART OF MOLDING. SYLVESTER BECKER, Rutherford, N. J., assignor to Sterling Bronze Company, New York, N. Y., a Corporation of New York. Filed July 29, 1921. Serial No. 488,284. 7 Claims. (Cl. 22—193.)



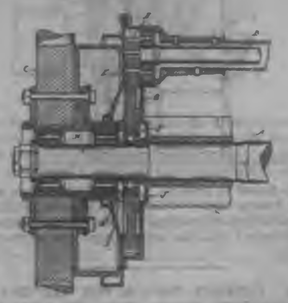
6. In the art of molding, the process which consists in obtaining a cast in plastic material from a definite selected area of a pattern, producing a core box with a matrix conforming to the contour of the selected area of the pattern, making a core print from said core box, molding in sand from the pattern a matrix, and assembling the core print into register with said matrix.

1,401,578. APPARATUS FOR PRODUCING DISTILLED WATER. BRUNO H. BERGIUS, Gross-Borstel, near Hamburg, Germany. Filed Mar. 5, 1914. Serial No. 822,665. 3 Claims. (Cl. 203—5.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

1. In an apparatus for distilling sea-water of the character described, the combination of a main condenser and a preheater with an evaporator operating under a partial vacuum, a valve controlled pipe connecting said main condenser and said preheater, a pipe connecting said preheater with the upper part of said evaporator, a steam chamber in said evaporator, a pipe connecting said chamber with the pipe connection between main condenser and preheater for recommingling the excess of water from said evaporator with the water supply from said main condenser, a tank, and a pipe connecting the evaporator with said tank for conducting the distilled water into said tank, and a pipe connection between said evaporator and said main condenser, substantially as described and for the purpose set forth.

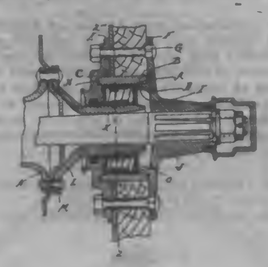


1,401,579. FIREARM. WILHELM BRÄUNING, Berlin, Germany, assignor to Deutsche Werke Aktiengesellschaft, Berlin, Germany, a Corporation of Germany. Filed Apr. 30, 1921. Serial No. 465,020. 3 Claims. (Cl. 42—36.)



1. Breech-mechanism for fire-arms which consists in a barrel with a connected square-shaped breech-piece, an upwardly swinging breech-locking device, a striker mounted endwise in said device and projecting rearwardly therefrom, a breech supporting bar, an offset in said bar, an angle-piece fast on same and extending to the rear of said locking device, said angle-piece having an aperture for guiding said striker.

1,401,580. VEHICLE DRIVE-AXLE. ALANSON P. BRUSH, Detroit, Mich. Filed Mar. 8, 1917. Serial No. 153,519. 4 Claims. (Cl. 74—7.)



1. The combination with an axle, of a jack-shaft arranged parallel thereto, a vehicle wheel mounted on said axle, a pinion on said jack-shaft, a spur-gear in mesh with said pinion and arranged concentric to said axle, having a driving engagement with said vehicle wheel, a housing on said axle inclosing said gear-wheel, and a housing for said pinion forming a mounting for said jack-shaft, detachably secured to said housing for the gear-wheel.

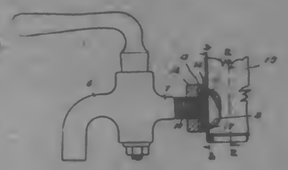
1,401,581. VEHICLE DRIVE-AXLE. ALANSON P. BRUSH, Detroit, Mich. Filed Mar. 8, 1917. Serial No. 153,520. 1 Claim. (Cl. 74—7.)

The combination with an axle, of a jack-shaft arranged parallel thereto, a pinion on said jack-shaft, a spur gear wheel in mesh with said pinion and arranged concentric to said axle, a journal bearing for said spur-gear wheel upon said axle, a vehicle wheel detachably mounted upon said axle and having a detachable driving engagement with said spur-gear wheel, and anti-friction means upon said axle for supporting said vehicle wheel independently of said journal bearing.

1,401,582. VEHICLE-WHEEL. ALANSON P. BRUSH and OWEN M. NACKER, Detroit, Mich. Filed Mar. 8, 1919. Serial No. 281,516. 4 Claims. (Cl. 301—64.)

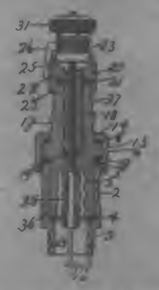
1. In a vehicle wheel, the combination with the spoked section, of a hub formed of outer and inner members on opposite sides of said spoked section, an annular member constituting the outer race member for a roller bearing fitting the bore of said spoked section and engaging annular bearings in said outer and inner hub sections, said annular member constituting a pilot and spacer between said hub sections, and bolts for clamping said hub sections to the spoked sections.

1,401,583. EXHAUSTER. GEORGE W. CHRISTOPH, Warehousepoint, Conn. Filed July 9, 1918. Serial No. 244,021. 10 Claims. (Cl. 302—37.)



1. An exhauster, comprising, a casing provided with a rotor compartment, a rotor so located therein as to leave an arcuate passage between the rotor and the peripheral wall of said compartment, an outlet provided in the casing for said passage, said casing being provided with

an inlet duct partially encircling the axis of the rotor in concentrical relation therewith and communicating at one end with the roller compartment at points both into and out of the path of the rotor, the other end of said duct adapted to receive grain laden with middle air of



which are forced in transverse a curved path before entering the rotor compartment, whereby the heavier particles may be separated from the lighter by centrifugal force and the former delivered into the compartment out of the path of the rotor.

1,401,584. CONDUIT DEVICE FOR TAPPING CANS. ALBERT F. CIBEK, Seattle, Wash. Filed May 4, 1920. Serial No. 378,885. 2 Claims. (Cl. 221—23.)

1. The combination with a plate of flexible material having a circular hole therein and provided with a slot that intersects said hole, of a cylindrical shank adapted to be inserted in said hole, and a head on said shank, said head being of larger diameter than said hole and having a groove extending optically from the outer to the inner surface thereof and arranged to permit the passage of the material around the circumference of said hole whereby said head may be passed through said hole.

1,401,585. SPARK-PLUG. ARCHIE FREDERICK COLLINS and VIRGIL DEWEY COLLINS, Congers, N. Y. Filed June 17, 1919. Serial No. 304,340. 19 Claims. (Cl. 123—169.)

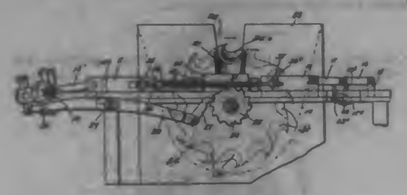
1. A spark plug having a pair of electrodes, one adjustable relatively to the other thereby to vary the spark gap,

and ring assembying means for adjusting said electrode, means for accurately measuring the spark gap, and means for preventing the setting of such measuring means.

1,401,586. ELECTRICAL SEARCHING-COIL. ARCHIE S. CHADWICK, Mount Kisco, N. Y. Filed Jan. 24, 1920. Serial No. 353,872. 8 Claims. (Cl. 175—294.)

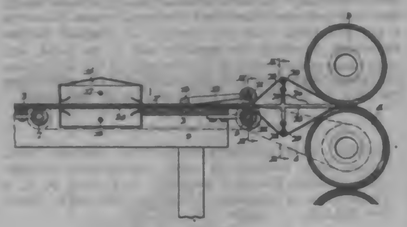
1. An electrical searching coil comprising a core of electrically conductive material, a primary winding electrically connected thereto and wound thereon, a secondary winding electrically connected to said core and wound thereon in an angular relation to said primary winding.

1,401,587. ELECTRIC SWITCH. FREDERICK R. CORNWALL, St. Louis, Mo., assignor to The Emerson Electric Manufacturing Company, St. Louis, Mo., a Corporation of Missouri. Filed July 17, 1918. Serial No. 245,279. 10 Claims. (Cl. 200—80.)



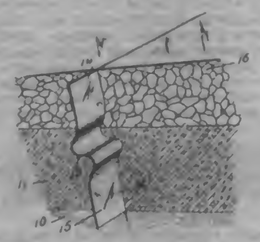
1. The combination of an electric switch having offset tappets, and centrifugally operated devices moving in different transverse planes for alternately cooperating with said tappets to open and close said switch.

1,401,588. NUT-CRACKING MACHINE. RICHARD S. CROWE, St. Louis, Mo., assignor of one-half to George Tower, Jr., St. Louis, Mo. Filed Mar. 21, 1921. Serial No. 453,979. 12 Claims. (Cl. 141—3.)



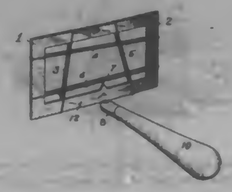
1. In a nut cracking machine, a yielding reciprocating jaw, a releasable jaw adapted to cooperate with said recip-

rocating jaw, said reciprocating jaw having a yielding longitudinal movement independently of said releasable jaw,



and means for releasing said releasable jaw, said means being adapted to become operative by the yielding movement of said reciprocating jaw.

1,401,589. METHOD AND APPARATUS FOR STRETCHING AND PRESSING KNIT TUBULAR FABRICS. THOMAS CUNNINGHAM, Philadelphia, Pa. Filed Mar. 2, 1920. Serial No. 362,842. 9 Claims. (Cl. 26—16.)

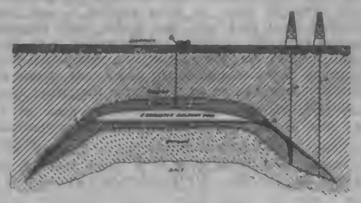


8. An apparatus of the character described, comprising means for progressively expanding a tubular fabric flat; means for spreading apart and stretching the sides of the tube; and means for pressing the sides of the tube flat together.

1,401,590. DIVIDER FOR CEMENTITIOUS FLOORS. LOUIS DEL TURCO, Newark, N. J. Filed May 17, 1921. Serial No. 470,235. 4 Claims. (Cl. 94—3.)

1. A divider for use in terrazzo and similar flooring consisting of a strip of metal having a straight portion at its top edge and being corrugated intermediate of its top and bottom edges.

1,401,591. DRAWING INSTRUMENT. ALLEN B. DOGGETT, Brooklyn, N. Y. Filed Dec. 8, 1919. Serial No. 343,167. 3 Claims. (Cl. 33—64.)



1. As an article of manufacture, a drawing device comprising a rectangular frame of sheet material, having adjacent the center of the bottom thereof a clasp adapted to receive a pencil and a sighting apex immediately above said clasp.

1,401,592. DEVICE FOR ELECTRICALLY HEATING HAND-IRONS. DAVID DONALDSON, Leith, Scotland. Filed Sept. 16, 1920. Serial No. 410,758. 2 Claims. (Cl. 219—23.)

1. A device for heating electric irons, comprising a switchboard, an inclined stand to support the iron, and contacts on said board and on the iron.

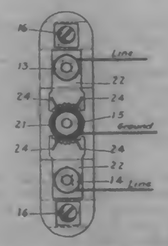
1,401,593. PROCESS OF MINING SULFUR. AUGUST TOBY DRACHENBERG, Gulf, Tex. Filed May 25, 1921. Serial No. 472,413. 8 Claims. (Cl. 262—3.)

1. The improvement in the method of mining sulfur by underground fusion, which comprises conducting an appropriate fusing medium into the formation containing the sulfur deposit and thereby melting the sulfur, and appropriately regulating the flow of said fusing medium upwardly through the formation by compressed gas forced into the formation above the discharge into the formation of said fusing medium.

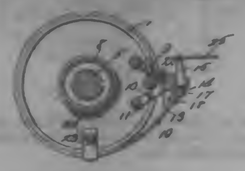
1,401,594. REVERSIBLE TAP AND DIE HOLDER. EDMOND E. DROWNS, Cleveland, Ohio, assignor to The National Acme Company, Cleveland, Ohio, a Corporation of Ohio. Filed May 25, 1920. Serial No. 384,075. 18 Claims. (Cl. 10—136.)

1. A holder for a threading tool comprising a pair of body members having coöperating driving pins, said body

members having one a shank and the other a bore fitting thereon, and having between the same roller grip pins, the driving pins being effective to rotate the members together in one direction and the grip pins being effective to lock the members on the reversal of one member relatively to the other.

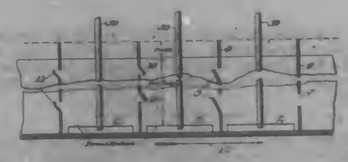


1,401,595. CHILD'S SWING. JOHN A. EMMER, St. Louis, Mo. Filed Sept. 27, 1920. Serial No. 413,978. 7 Claims. (Cl. 155—67.)



1. A child's swing comprising a rigid seat frame provided with side members each having a rear portion inclined upwardly from its front portion, a seat pocket suspended from said rigid seat frame, rigid suspension members extending upwardly and forwardly from the upwardly inclined rear portions of said side members, and suspension means secured to the upper ends of said rigid suspension members, so as to balance the swing seat in an upright position.

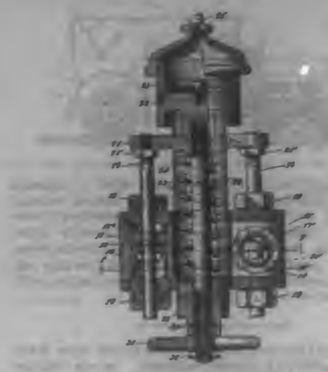
1,401,596. LIGHTNING-ARRESTER. EDWARD ALLEN EVERETT, Long Island City, N. Y. Filed Sept. 15, 1920. Serial No. 410,523. 4 Claims. (Cl. 175—30.)



1. In a device of the class described, in combination, an incoming line terminal strip with saw teeth, an outgoing line terminal strip with saw teeth, a plurality of cutter-members with a ground connection between the saw teeth of said strips, a mica spacer supported by said strips, said spacer regulating the air gap between said strips and said cutter-members above.

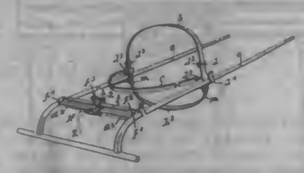
1,401,597. AUXILIARY BRAKE FOR MOTOR-VEHICLES. HARVEY S. FRY, Reading, Pa. Filed Jan. 20, 1920. Serial No. 352,601. 1 Claim. (Cl. 188—77.)

In combination with the brake drum of a vehicle, a substantially Y shaped bracket secured to the brake drum housing, the stem of said bracket extending radially therefrom and projecting beyond the peripheral edge thereof, levers of different lengths journaled in the outermost end of said stem, said levers being movable in unison, a brake band encircling the outer circumference of said drum, with one end bent upon itself forming a sleeve to receive a pin projecting from the bracket, an angular bracket adjustably joined to the opposite end of the band, said plate being associated with the shortest of the said levers, and means connected with the other lever for contracting the band to bring it into engagement with the drums.



1,401,598. FLOTATION APPARATUS. RUDOLF GAHL, Miami, Ariz., assignor, by mesne assignments, to Pneumatic Process Flotation Company, New York, N. Y., a Corporation of Delaware. Filed Jan. 29, 1918. Serial No. 214,318. 3 Claims. (Cl. 83—85.)

1. An apparatus for ore pulp concentration comprising a tank having a porous bottom impermeable to the downward passage therethrough of ore pulp, means for forcing gas therethrough, partitions subdividing the tank into compartments, said partitions extending to and being imperforate in immediate proximity to the bottom of the tank and provided with openings above said bottom, said openings being in such number and arrangement as to cause the pulp to flow in an even stream.

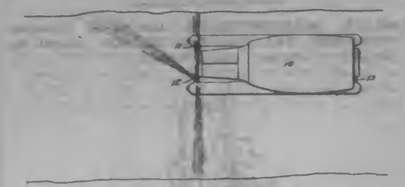


1,401,599. AUTOMATIC REGULATOR FOR FUEL-OIL BURNERS. ERNEST GROSSENBACHER, Fajardo, Porto Rico. Filed June 21, 1921. Serial No. 479,458. 4 Claims. (Cl. 236—8.)

3. An automatic regulator for fuel oil burners comprising a body having a plurality of valve chambers therein and provided with a plurality of passages communicating with said chambers through openings of rectangular form, valves slidable in said chambers and movable transversely across said openings, said valves being independently adjustable about their axes, shields carried by said valves and adjustable therewith across said openings to selectively cut off portions thereof whereby the effective areas

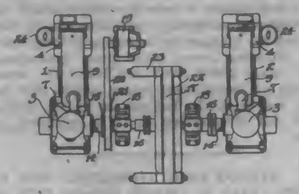
of said openings are varied and means for coincidentally actuating said valves without disturbing the adjustment of said shields.

1,401,600. HARNESS. JOHN C. HANKINS, Detroit, Mich. Filed Jan. 17, 1919. Serial No. 271,566. 5 Claims. (Cl. 278—26.)



1. In an apparatus of the kind described, a whiffletree consisting of a flat bar lying horizontal and adapted to turn about a pivot parallel to the length thereof, said bar being twisted to form vertical edges at its ends and being extended in a neck and an enlargement extending vertically in the normal position of the whiffletree.

1,401,601. MOLDING APPARATUS. HARRY B. HARLOW, Alton, Ill., assignor to Commonwealth Steel Company, St. Louis, Mo., a Corporation of New Jersey. Filed June 14, 1920. Serial No. 388,967. 7 Claims. (Cl. 22—125.)



1. In a mold, the combination with a molding form and a plurality of cover cores, of individual means each adapted to independently secure a cover core to the form and to adjust itself to the plane of the top surface of its individual cover core.

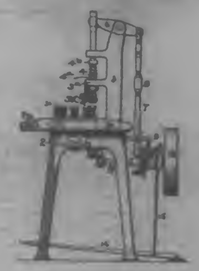
1,401,602. LIGHTING ARRANGEMENT FOR AUTOMOBILES. FRANK W. HINES, Washington, D. C. Filed Oct. 27, 1921. Serial No. 510,756. 4 Claims. (Cl. 240—7.)

4. The combination with an automobile and auxiliary lights associated therewith the latter being disposed at such angles as to direct light rays toward the right hand edge of the roadway at a point in advance of the vehicle to which they are applied, and to direct light rays substantially transversely across the roadway to the left of the vehicle and lighting means carried by the said vehicle for illuminating the front of said vehicle to thereby disclose its proportions to the driver of an approaching vehicle.

1,401,603. COMPRESSOR. FRED D. HOLDSWORTH, Claremont, N. H., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed May 29, 1916. Serial No. 100,638. Renewed Oct. 5, 1921. Serial No. 505,611. 34 Claims. (Cl. 230—32.)

1. In combination, a pair of compound compressors each comprising angularly disposed high and low pressure cylinders, double acting pistons in said cylinders, and actuating means for said pistons including a single crank operatively connected to both of said pistons, and means for driving said compressors including means for connecting the cranks in angular relation to each other.

4. In combination, a plurality of double acting angle compressors, and means for driving them in split phase relation.

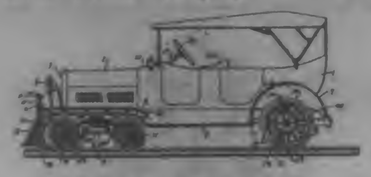


1,401,604. AUTOMOBILE-RADIATOR. JULIUS A. HUSAR, Cleveland, Ohio. Filed Mar. 15, 1920. Serial No. 365,752. 16 Claims. (Cl. 257—130.)

1. In a radiator, a set of cellular units each comprising a strip of sheet metal, with alternate transverse projections and depressions extending longitudinally forming

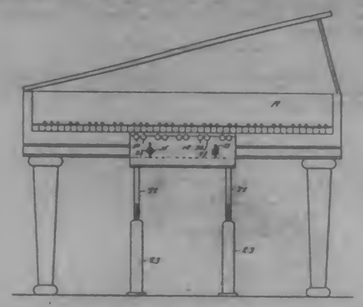
corrugations, the faces of which are of unequal length, whereby said units may be united to form the connected water passageways and means for securing adjacent units together at the face of the radiator.

1,401,605. STAMPING-PRESS. GEORGE H. JAQUISH, Philadelphia, Pa. Filed Sept. 19, 1919. Serial No. 324,797. 5 Claims. (Cl. 113—115.)



1. In a stamping press, the combination of a reciprocating die plunger, a turret journaled upon an axis parallel to the direction of reciprocation of the plunger but out of line therewith, dies carried by the turret arranged in position about its axis and adapted to be successively brought into line with the reciprocating die plunger, a rotary horizontal power shaft arranged below the turret and having a cam for reciprocating the die plunger, upwardly extending connecting means between the cam and die plunger for operating it from the cam, upwardly extending power transmitting connections between the rotary power shaft and turret for imparting to the latter an intermittent rotary motion, and locking means for automatically locking the turret during its periods of rest intermediate of its intermittent rotary movements.

1,401,606. WINDOW-SASH TIGHTENER FOR VEHICLE-TOPS. DAVID R. JENKINS, Oakland, Calif. Filed Aug. 4, 1920. Serial No. 401,091. 2 Claims. (Cl. 296—47.)

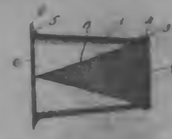


1. A window-sash tightener comprising a fixed guide; means for slidably connecting the window-sash with and spacing it from said guide; a pair of independent clamping members associated with the sash, one near each end thereof and lying in the space between the sash and guide; means pivotally connecting said clamping members with the sash adapting them to swing in relatively opposite directions to and from contact with said guide; a pair of fixed stops one near each end of the guide, with which the clamping members are respectively adapted to contact near the limits of travel of the sash, whereby said members are elevated into clamping engagement with the guide, a pair of fixed releasing lugs on the guide, one near each stop and with which the clamping members are respectively adapted to contact on the return movement of the sash from its limits, whereby said members are positively thrown down again and the sash freed, and a block carried by the sash and yieldingly pressed into frictional contact with the guide, said block being adapted to prevent the clamping members from swinging over center.

1,401,607. RAILWAY MOTOR-CAR. JAMES F. KREIMER, Ponca Town, Mo. Filed May 10, 1919. Serial No. 296,156. 6 Claims. (Cl. 105—62.)

1. A railway motor-car constructed with a separate non-driving swiveling front-truck having flanged wheels; rear flanged driving-wheels; and a power-plant composed of a combustion motor mounted directly above said truck on the car-frame, and the positively-driven toothed-gear power transmitting and speed-changing devices of a conventional automobile; in combination with the usual control-devices of the latter.

1,401,608. ILLUMINATING ATTACHMENT FOR KEYBOARD MUSICAL INSTRUMENTS. BRUCE GORDON KINSLEY, Los Angeles, Calif. Filed Sept. 29, 1919. Serial No. 327,092. 21 Claims. (Cl. 84—464.)



2. The combination with a musical instrument having a keyboard, of a means for producing illumination of various colors adapted to interpret the emotions produced by the music and a set of controlling devices operable independently of the notes produced corresponding to the respective colors and located in a position to be engaged by the player while his hands are on the keys.

13. The combination with a musical instrument having a keyboard, of a frame, a pair of extension legs engaging the floor and clamping said frame against the under side of the keyboard frame, said clamping frame having an adjustable front plate, and a manually operable switch carried by said front plate.

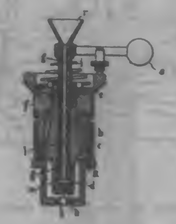
21. The combination with a musical instrument having a keyboard, of a standard having arms, groups of electric lamps on the arms, the lamps being grouped in sets of different wattage, each set having lamps of various colors, a set of switches located adjacent to the keyboard of the musical instrument, each switch corresponding to one of the colors and each switch having various positions, and circuits for connecting switches with the various lamps.

1,401,609. MIXER. DEO KLEIN, Gillespie, Ill. Filed Oct. 13, 1920. Serial No. 416,675. 2 Claims. (Cl. 48—180.

2. A mixer of the character described comprising an elongated tapered sleeve having both ends open, a screen panel mounted in the small end of the sleeve, a second screen panel mounted in the large end of the sleeve, a conical screen member of a length equal to the length of the said sleeve, and having its pointed end in contact

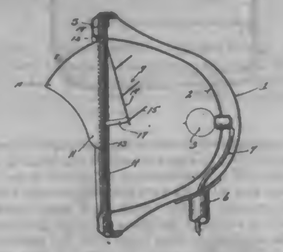
with the center of the screen panel at the large end of the said sleeve, its large open end being secured to the opposite end of the sleeve at the marginal edge of the screen panel in the small end of the sleeve.

1,401,610. AUTOMOBILE-TIRE. ARTHUR G. KUHN, Covington, Ky. Filed Aug. 1, 1919. Serial No. 314,691. 8 Claims. (Cl. 152—10.)



1. An automobile tire comprising an outer casing and an inner casing integral therewith, the inner casing having on its outer surface a series of rows of diamond shaped projections, the projections in adjacent rows being staggered, and the rows being a distance apart less than the length of the projections.

1,401,611. TOOL FOR APPLYING STAYBOLT-SLEEVES TO BOILERS. FREDERICK K. LANDGRAF, Pittsburgh, Pa., assignor to Flannery Bolt Company, Pittsburgh, Pa. Filed May 3, 1920. Serial No. 378,531. 14 Claims. (Cl. 113—99.)

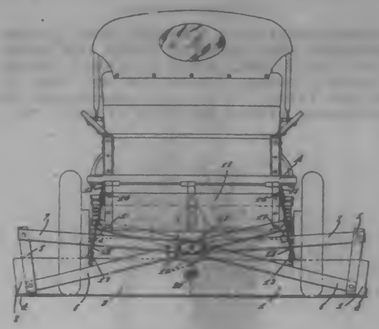


1. In a tool for applying stay bolt sleeves to boiler sheets and holding the sleeves while they are welded or otherwise secured to the outer sheet, the combination of a bar adapted to pass through two sheets of a boiler, a centraliser mounted to slide on said bar and adapted to engage the stay bolt sleeve, and means within the centraliser for locking the latter at any point on the bar.

1,401,612. SPARK-PLUG SERVING ALSO AS COMPRESSION AND INJECTION VALVE FOR INTERNAL-COMBUSTION ENGINES. CARL OTTO LANDGREBE, Dresden-A., Germany. Filed May 28, 1917. Serial No. 171,552. 1 Claim. (Cl. 123—169.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

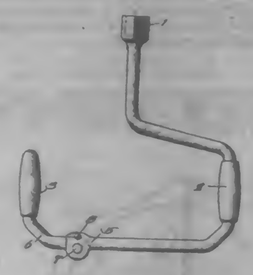
A spark plug including an outer casing provided with an internally threaded opening forming a valve seat at its lower end, and a central hollow electrode provided with a valve at its lower end adapted to be positioned within said opening, the valve being adapted to seat upon the rotation of the electrode within the opening by reason of the latter's engagement with the screw threads.

1,401,613. AUTOMOBILE-HEADLIGHT. HART F. LANDON, Milwaukee, Wis. Filed Aug. 9, 1920. Serial No. 402,157. 3 Claims. (Cl. 240—48.4.)



1. The combination of a headlight attachment comprising a one-piece hood, and light retarder bent to be disposed on opposite sides of a headlight lens, the light retarder including a frame and a plurality of light reflecting plates extending transversely across the frame in forwardly and downwardly disposed planes.

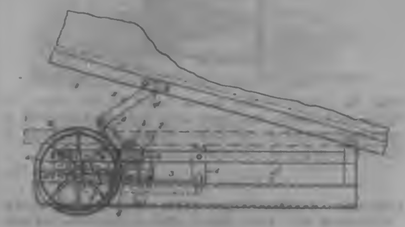
1,401,614. ROAD-DRAG. HARRY A. LARSON, Milford, Utah. Filed Aug. 25, 1920. Serial No. 405,870. 4 Claims. (Cl. 37—7.)



1. A drag attachment for trucks including connected forwardly converging scrapers, crossed means extending upwardly and inwardly from the rear ends of the scrapers for attachment to the tail board of a truck, braces connected to the rear portions of the scrapers and extending toward

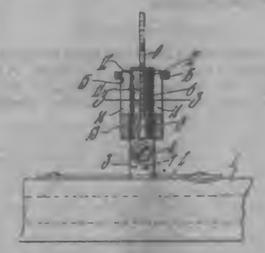
each other, means for connecting said means and the braces together, draw chains extending from the scrapers

and pull back chains attached to the front end portions of the scrapers.



1,401,615. WRENCH. FREDERICK K. LAWRENCE, Chicago, Ill. Filed May 1, 1920. Serial No. 378,070. 8 Claims. (Cl. 81—73.)

1. A wrenching tool having a head adapted to engage the object to be turned, a shank by which the head is carried, a handle mounted on the shank at a distance from the axis of the shank and with its axis parallel thereto, and a second handle secured to the shank by a fixed pivot which constrains it to rotate in the plane in which the axis of the tool and the axis of the first handle lie, the second handle being adapted to rotate about its pivot to two positions, one coincident with the produced axis of the tool, and the other opposite to the first handle and at an equal distance from the axis of the tool.



1,401,616. TILTING BODY FOR TRUCKS AND THE LIKE. DARRELL E. LE FORCE, Cleveland, Ohio, assignor to The Truck Engineering Company, Cleveland, Ohio, a Corporation of Ohio. Filed Feb. 17, 1919. Serial No. 277,297. 1 Claim. (Cl. 298—19.)

In a truck, the combination of the main frame of the vehicle comprising side and end frame members, a tilting body pivotally mounted on the end member at the rear of said main frame, a drop-frame support having cross-bars resting on the upper sides of the side frame members, shafts carrying bevel gears journaled in said drop frame bed, operating means and a worm on the other ends of the respective shafts, a worm gear meshing with said worm, a spindle for said worm gear, outwardly inclined crank arms fixed to the ends of said spindle, a vertical housing for said worm gear mounted centrally above said drop frame

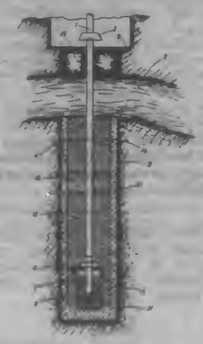
and carrying journals for said spindle, said drop frame being of narrow width centrally to permit of the free rotation of said spindle and crank arms, and links connecting the outer ends of the crank arms with the vehicle body at an intermediate point thereof.

1,401,617. ADJUSTABLE REAR SIGHT FOR RIFLES. GEORGE S. LEWIS, Chicopee Falls, Mass., assignor to Page-Lewis Arms Company, Chicopee Falls, Mass., a Corporation of Massachusetts. Filed May 28, 1921. Serial No. 473,293. 4 Claims. (Cl. 33—57.)

1. A rear sight for rifles comprising a base mounted on the rifle, a sight post secured to said base, a compressible sleeve rotatably mounted on said post, a sight member having a shank vertically movable in said post and arranged to be actuated by said sleeve to different adjusted positions, and means to compress said sleeve to lock the parts in adjusted position.

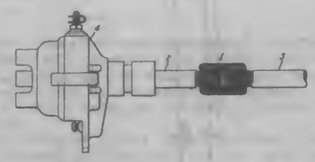
1,401,618. DOUBLING-MACHINE. EMORY J. LIPPS, Fountain Hill Borough, Pa. Filed Jan. 7, 1921. Serial No. 435,628. 6 Claims. (Cl. 19—25.)

1. In combination, with a pair of supply yarn-packages and the rotated receiving yarn-package of a doubling machine, one supply package being arranged with its axis of winding extending substantially in the direction of draft of the receiving package and so that its yarn will travel around the yarn from the other supply package when said yarns are subjected to said draft, means, controlled by



one yarn, to at times check the advance of the other yarn under said draft.

1,401,619. VALVE. ZENO LITTMAN, New York, N. Y., assignor to Littman Loxair Valve Corporation, a Corporation of Delaware. Filed May 24, 1919. Serial No. 299,626. 3 Claims. (Cl. 152—12.)

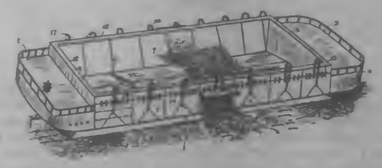


1. A device of the kind described comprising a tubular shell provided internally with a shoulder defining an enlargement of the bore of the shell, a sealing washer seated in the shell against the shoulder and having a central opening therethrough, a valve stem passing through the washer aperture and non-rotative with respect thereto, the stem being out of contact with the edges of the aperture, at certain points, a valve member carried by the stem at one side of the washer and adapted upon movement of the stem to make sealing contact with the washer and to extend beyond the edges of the washer aperture, means for holding the washer in fixed position against the shoulder within the shell, and means engaging the valve stem to move the same and draw the valve member into sealing engagement with the washer.

1,401,620. APPARATUS FOR UNDERGROUND PUMPING. PIERRE LOUBET, Paris, France, assignor to Société: Hue Frères et Loubet, Paris, France, a French Corporation. Filed July 20, 1920. Serial No. 397,744. 3 Claims. (Cl. 166—5.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

1. In a sunken well shaft or bore, the combination with a pump, of a filtering means comprising an outside shell of charcoal, a portion of sand filling substantially the lower part of said shell, an intermediate layer of charcoal, and a top filling of sand, a strainer embedded in said lower portion of sand comprising inner and outer perforated shells, an outlet or suction pipe extending downwardly through said shaft or bore and into said strainer and perforations in the lower end of said pipe.

1,401,621. MICROMETER MECHANISM. WARREN P. LOUDON, Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 20, 1920. Serial No. 360,080. 9 Claims. (Cl. 64—90.)

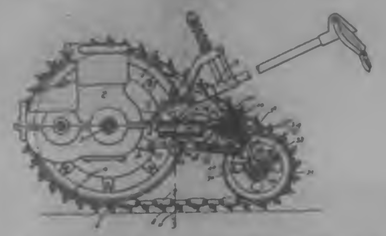


7. In a micrometer mechanism for an ignition device, the combination with a timing shaft having screw threads on an end portion thereof, and a driving shaft alined with said timing shaft and having screw threads on an end portion in the same direction as the threads on the timing shaft, the threads on the timing shaft having a higher pitch than the threads on the driving shaft, of a sleeve member fitted to said threaded end portions and serving to rotatively adjust the position of the timing shaft relative to the driving shaft.

1,401,622. GEAR. JESSE E. MCCLAIN, Edgewood, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed July 10, 1918. Serial No. 244,147. 2 Claims. (Cl. 74—41.)

1. A self-sustaining gear comprising superimposed layers of duck impregnated with a hardened phenolic condensation product having a mixture of graphite and wax uniformly distributed therein.

1,401,623. CARGO VESSEL. HAROLD ROBINSON MCCLELLAND and JOHN MCLEAN, Montreal, Quebec, Canada, assignors to N. E. McClelland & Company, Limited, Montreal, Canada. Filed July 21, 1920. Serial No. 397,985. 4 Claims. (Cl. 114—35.)

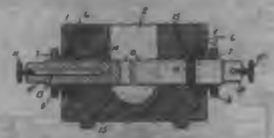


1. A cargo vessel comprising a hull containing a hold and having liftable doors forming the side walls of said hold and supported by intervening buttresses inclosing the lifting tackle and serving as jambs for the doors.

1,401,624. CONCRETE BUILDING-BLOCK. JAMES R. MCEWEN, Goose Creek, Tex. Filed Mar. 30, 1920. Serial No. 369,924. 7 Claims. (Cl. 72—39.)

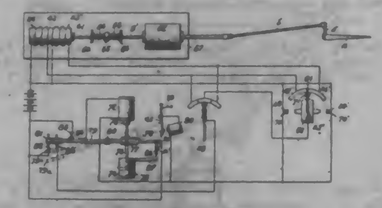
1. A concrete building block comprising a longitudinal member having a thick central core on the inner side, a flat outer face, inwardly extending flanges at the sides thereof, said flanges having marginal recesses on the outer edges thereof, and marginal grooves along the said edges, said block having a transverse channel at one end and means at both ends to secure said block to an adjacent block above and below the same.

1,401,625. TRACTION-MACHINE. JOSEPH MADER, Minneapolis, Minn., assignor to Bowman Tractor Company, Minneapolis, Minn., a Corporation of Minnesota. Filed Jan. 5, 1920. Serial No. 349,378. 12 Claims. (Cl. 180—9.1.)



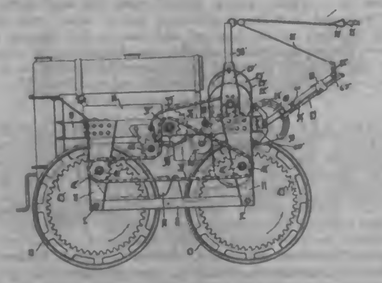
1. A machine of the class described comprising an internal combustion engine, wheels mounted thereon, traction belts for said wheels, a pair of smaller wheels in the rear of said first named wheels and having peripheries to receive said traction belts, means interposed between the frame of the engine and said rear wheels for exerting the desired degree of tension on said belts, means for holding said rear wheels toward the ground and a guiding means for said machine.

1,401,626. FLAG AND FLAG-SUPPORT. JOSEPH MADER, Albany, N. Y. Filed Aug. 13, 1921. Serial No. 492,200. 3 Claims. (Cl. 116—173.)



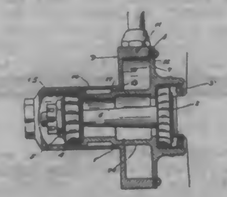
3. The combination with a flag pole having a sheave at its upper end, of a lever, a halyard passing through said sheave and having one end operatively connected to one end of the lever, a stem carried at one end of the lever, a flag attached to said stem, and a halyard connected to the opposite end of the lever from said flag whereby when said lever has been hoisted to the upper end of the flag pole the second named halyard may be retracted to draw the lever into a position parallel to the flag pole with the stem extending upward above the flag pole.

1,401,627. TESTING DEVICE. JESSE E. MATHER and CHESTER T. ALLCUTT, Wilkinsburg, Pa., assignors to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 1, 1917. Serial No. 189,849. 6 Claims. (Cl. 175—183.)



4. A fluid-testing device comprising electrodes and a single means cooperating with one of the electrodes to constitute a terminal therefor and having a gap-adjusting portion for insertion between the electrodes.

1,401,628. HUNTING AUTOMOBILE TORPEDO. ELMER MEITNER, Brooklyn, and ADELBERT C. MARY, Richmond Hill, N. Y., assignors to The Sperry Gyroscope Company, Brooklyn, N. Y., a Corporation. Filed Feb. 18, 1918. Serial No. 217,795. 16 Claims. (Cl. 114—23.)



1. In combination, a torpedo, means for steering said torpedo in a substantially straight course, means brought into action after said torpedo has traveled a predetermined distance for changing the course thereof, and means for causing said torpedo to periodically describe a circle along its new course.

1,401,629. FARM-TRACTOR. JOHN M. MEYERS, Janesville, Wis. Filed Nov. 14, 1919. Serial No. 337,947. 16 Claims. (Cl. 74—21.)

1. In a tractor of the class described, a suitable frame; an engine supported by said frame; a shaft driven by said engine; two driving pulleys secured to said shaft and driven thereby; two driven pulleys; a driving shaft upon which one of said driven pulleys is fixedly secured; means whereby and through which said driven pulleys are operated one from and by the other and in opposite directions; a pair of normally loose belts extending about said pairs of driving and driven pulleys; two belt tightening devices one associated with each of said belts and whereby either belt may be tightened independently of the other; two operating members one operatively associated with each of said belt tightening devices; a single pivotally supported manually operable lever adapted to swing in one direction to operate one of said operating members, and to swing in the other direction to operate the other of said operating members; means whereby said lever may be operatively connected with either one of said operating members to thereby operate each independently of the other; a driving wheel; and means whereby said driving wheel is driven from said driving shaft.

1,401,630. WHEEL. FREDERICK L. MINNICK, Spokane, Wash., assignor to Tubular Steel Automobile Wheel Mfg. Co., Spokane, Wash., a Corporation of Washington. Filed Dec. 2, 1920. Serial No. 427,785. 2 Claims. (Cl. 301—9.)

2. In a wheel, the combination of a main hub, an annular face plate rigid with the inner end portion of the main hub and having spaced openings therethrough adjacent its edge, a secondary hub comprising a web fitting closely upon the main hub and a peripheral member extending laterally from said web and abutting the outer side of the face plate, spaced transverse reinforcing ribs on the inner surface of the peripheral member of the secondary hub, lugs projecting from the peripheral member in alinement with said ribs and extending through the openings in the face plate, and a cap nut fitted on the outer end of the main hub and extending inwardly thereover to abut the web of the secondary hub.

1,401,631. PROCESS OF PREPARING DINITRODIPHENYLAMIN. ROBERT CECIL MORAN, Ridley Park, Pa., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del., a Corporation of Delaware. Filed Dec. 5, 1918. Serial No. 265,389. 2 Claims. (Cl. 23—24.)

2. The process of forming dinitrodiphenylamin consisting in combining dinitrohalogenbenzol with anilin and an alkali metal salt of carbonic acid at about 90 to 100° C. in the absence of solvents and added water.

1,401,632. DISPLAY DEVICE. ROBERT M. MOUAT, Leonia, N. J., assignor to Mouat-Swan Corporation. Filed Apr. 27, 1920. Serial No. 376,991. 5 Claims. (Cl. 211—13.)

1. A display device comprising a single flat sheet having its edges cut to form a toe portion and oppositely disposed heel portions and having an intermediate instep portion decorated to simulate the corresponding portion of a stocking, the said sheet being sufficiently stiff to

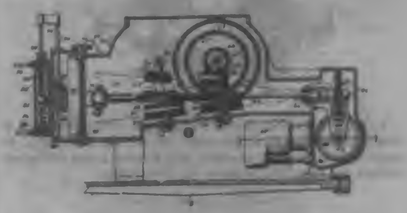
form the semblance of a stockinged instep when the toe and heel portions of the shoe are brought within the

corresponding portions of a shoe but without being stiff enough to scratch said shoe.

1,401,633. PRINTING-PLATE AND MATRIX. EMIL E. NOVOTNY, Philadelphia, Pa., assignor to John Stogdell Stokes, Philadelphia, Pa. Filed Mar. 15, 1920. Serial No. 366,098. 10 Claims. (Cl. 101—395.)

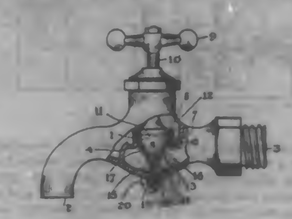
1. As a new article of manufacture, a printing plate having a printing face of a hard acetic aldehyde condensation product.

1,401,634. MOUTHPIECE FOR MUSICAL INSTRUMENTS. HARRY E. O'BRIEN, Indianapolis, Ind., assignor of one-half to H. Benne Henton, Philadelphia, Pa. Filed Nov. 29, 1920. Serial No. 427,070. 5 Claims. (Cl. 84—383.)



1. A mouthpiece for musical instruments comprising a vulcanized rubber body, a metallic facing plate formed with projections on its edges, said body being molded about said plate, the body overlying said projections for securing the plate thereon.

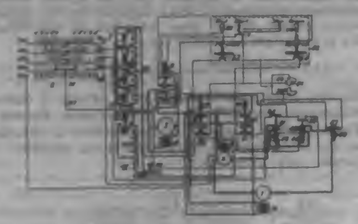
1,401,635. CORN-CREAMER. WALTER OLCOTT, South Manchester, Conn. Filed Sept. 14, 1921. Serial No. 500,614. 2 Claims. (Cl. 146—7.)



1. An implement of the class described comprising a handle, and a blade member connected with the handle, having transverse slits and a longitudinal slit connecting the transverse slits, the stock formed by the slitting of the blade member being bent therefrom to present a cutting blade, the blade member back of the cutting blade having a scraping portion.

1,401,636. CHANGE-SPEED AND REVERSING GEARING. WILLIAM BYRON ORIN, Grand Rapids, Mich. Filed June 25, 1920. Serial No. 391,736. 13 Claims. (Cl. 74—59.)

1. In an organization of the character described; rotatable driven elements arranged side by side on axes laterally offset intermediately; a single laterally-movably-mounted rotatable driving element arranged at the same side of the axes of all said driven elements and adapted to be moved laterally into and out of driving engagement with said driven elements severally.



1,401,637. VALVE. GEORGE PARKINSON and JOHN DAVIDSON, Calgary, Alberta, Canada. Filed Aug. 28, 1920. Serial No. 406,656. 1 Claim. (Cl. 251—167.)

A faucet comprising a valve casing having a partition therewithin between inlet and outlet and an orifice in said partition surrounded by a flange having a bottom seat, a double faced removable intermediate seat in the form of a washer and a double faced top seat having a V-shaped bar lower extension and a screw hole at the juncture of the legs of said bar, a bolt having a cross slotted and under beveled head fitting to the slope of said legs and a washer and closed nut secured on the end of said bolt projecting below the valve casing.

1,401,638. MOTOR-CONTROL SYSTEM. FRED M. PARKS, Murrysville, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 13, 1920. Serial No. 358,357. 8 Claims. (Cl. 172—179.)

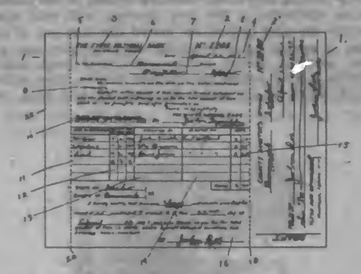
1. A control system comprising a dynamo-electric machine adapted to operate as a generator; a field-magnet winding for said dynamo-electric machine, a resistor connected in circuit with said winding, a second dynamo-electric machine connected in circuit with said first machine and normally adapted to operate as a motor, a relay responsive to a predetermined value of current traversing the circuit for said second dynamo-electric machine for reducing the field excitation of said first dynamo-electric machine, and a second relay adapted to increase the field excitation of said first dynamo-electric

machine when said second dynamo-electric machine operates as a generator.

1,401,639. INVALID-TABLE. JOHN PERLON, Salem, Mass. Filed Jan. 31, 1921. Serial No. 441,376. 9 Claims. (Cl. 45—11.)

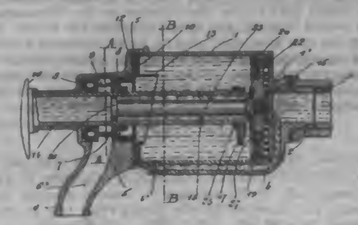
1. In a table structure, a body, and foldable legs, said legs being adapted to fold into engagement with each other to form complementary handle members whereby to provide handle means for carrying said table.

4. A table comprising a body, legs at opposite ends of the body, a leaf at one side thereof, and an adjustable leaf support carried by one leg and in engagement with another of said legs for maintaining the suport in adjusted position.



1,401,640. COASTER WAGON AND SLED. WILLIAM K. PORTER, Pittsburgh, Pa. Filed June 30, 1920. Serial No. 392,984. 4 Claims. (Cl. 280—87.5.)

1. In a vehicle, the combination with a lower frame, of a superposed body member, springs between the frame and body member, and arched brace members connected to one of the members and having a sliding connection with the other member to hold the body member against lateral displacement.

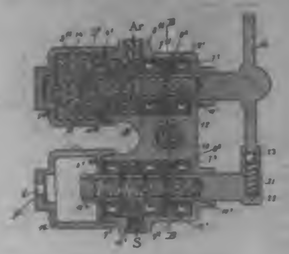


1,401,641. COMMERCIAL FORM. JOSEPH PRIMBS, Pocatello, Idaho, assignor to Geo. Primbs & Sons, Inc., Pocatello, Idaho. Filed June 7, 1921. Serial No. 475,644. 5 Claims. (Cl. 283—1.)

1. A blank form to be used in transmitting instruments to be recorded, comprising a letter of transmission, with blank spaces to be filled in with the date and location of the official to whom sent, delineated and appropriately designated spaces for entering the kind of instruments transmitted, their date, by whom executed, in favor of

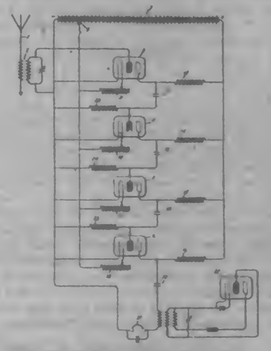
whom executed and fees charged, a certificate to be filled in with data certifying as to the number of instruments filed, the time when filed for record and the date of filing and a draft to be filled out by the receiving official upon the sender.

1,401,642. SUPPLY-COCK FOR THE DELIVERY OF MEASURED QUANTITIES OF LIQUID. ETIENNE RAVAZ and AIME PILLON, Oullins, France. Filed June 7, 1918. Serial No. 238,715. 2 Claims. (Cl. 137—93.)



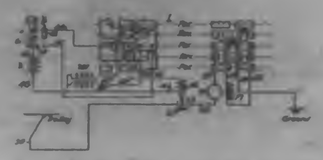
1. A device for delivering measured quantities of liquid comprising a body, a heading fixed at one end of said body, a stopper comprising a chamber at the other end of said body, an extension on said stopper in communication with said chamber, and forming an outlet for the liquid, a tubular extension from said chamber coaxial with said body and forming a guide, a slidable and rotatable hollow rod extending through said guide into said body, said rod having a series of circumferentially arranged orifices adapted to communicate with said chamber when the rod is in a certain position, a piston provided with a transverse channel within said body, a piston rod extending from said piston into said hollow rod, means for guiding said piston rod in said hollow rod, a valve seat on said piston coacting with the inner end of said hollow rod, a spiral spring between the rear face of said piston and said heading, a conduit for supplying liquid to said body in front of said piston, a cylindrical member having an inclined surface on said stopper and projecting into said body, and a laterally projecting member at one extremity of said hollow rod adapted to slide over said inclined surface when said rod is pulled out and rotated.

1,401,643. VALVE. ETIENNE RAVAZ and AIME PILLON, Oullins, France. Filed Aug. 27, 1919. Serial No. 320,157.) 2 Claims. (Cl. 277—12.)



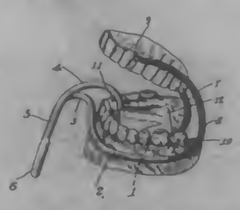
1. In a valve the combination of a housing having an inlet port and an outlet port, a hollow cylindrical plug slidable and rotatable in said housing and having orifices spaced apart in the axial direction of the plug, two per-

forated rings surrounding said plug, each having two flanges seated against the plug and the housing and each ring straddling one of said ports with its flanges, washers surrounding said plug adjacent said rings, means for axially moving said plug, including a ramp in the housing and an abutment on the plug reacting with said ramp, whereby the plug orifices are moved into and out of said rings, a second housing having an inlet port and two other ports, a second hollow cylindrical plug, axially movable in said second housing and having three orifices spaced apart in the axial direction of said plug, two



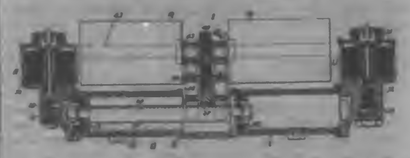
perforated rings surrounding said second plug each having a pair of flanges seated against the plug and the housing, said pairs of flanges straddling the inlet port and one of said other ports respectively, washers surrounding the second plug adjacent said rings, a chamber connecting the outlet port of the first housing to the inlet port of the second housing, and means coupling the second plug with the first-mentioned plug for axial movement whereby said second plug alternatively opens communication between the inlet port of the second housing and one of the other ports of said housing, or between the last-mentioned port and the third port of said housing.

1,401,644. METHOD OF AND APPARATUS FOR AMPLIFICATION OF SMALL CURRENTS. CHESTER W. RICE, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed July 31, 1917. Serial No. 183,785. 12 Claims. (Cl. 250—20.)



5. The method of eliminating the effect of strays upon a radio receiving system which consists in applying the received impulses to the grid circuit of an electron discharge amplifier having its operating characteristic so adjusted that the current changes therethrough produced by stray impulses in one direction cannot exceed those produced by the signals which it is desired to receive, and applying the amplified impulses to the grid circuit of a second electron discharge amplifier having its operating characteristic so adjusted that the current changes therethrough produced by stray impulses in the opposite direction cannot exceed those produced by the signals which it is desired to receive.

1,401,645. CONTROL APPARATUS. LYNN G. RILEY, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed June 19, 1917. Serial No. 174,916. 11 Claims. (Cl. 172—179.)



1. The combination with a rotatable motor-reversing drum, of a fluid-pressure-operated device for actuating said drum in a step-by-step manner in the same direction to reverse the motor connections with each step, controlling means for said device, and means dependent upon the position of said drum for governing said controlling means.

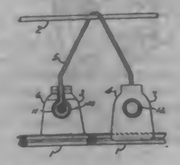
1,401,646. SALIVA-EJECTOR FOR USE IN DENTAL TREATMENT AND THE LIKE. JENS AARBEG RONN, Kolding, Jutland, Denmark, assignor, by direct and mesne assignments, to Enita R. Pinches, London, England. Filed Apr. 24, 1920. Serial No. 376,426. 3 Claims. (Cl. 32—33.)

1. A saliva ejector comprising a perforated lingual tube, a perforated combined malar and labial tube, siphons connecting said tubes to a common discharge tube, and resilient means for retaining the rear portions of said tubes in position in the mouth.

1,401,647. CONTROL APPARATUS. EDWARD E. ROSE, Swissvale, and CHARLES A. SMITH, Edgewood Park, Pa., assignors to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Oct. 6, 1919. Serial No. 328,823. 16 Claims. (Cl. 200—18.)

1. In a controller, the combination with a movable control member, of a power-operated actuating apparatus

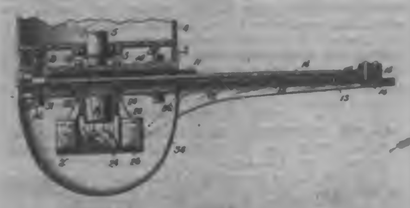
therefor having a direction of movement transverse to the plane of rotation of said member, and power-transmitting means interposed between said apparatus and said member and comprising a plurality of elements arranged in side-by-side relation.



1,401,648. PROCESS OF PRODUCING POTASH CONTAINING FERTILIZERS. CARLO ROSSI, Legnano, Italy. Filed Apr. 24, 1919. Serial No. 292,486. 5 Claims. (Cl. 71—9.)

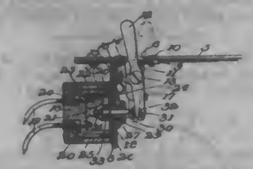
5. The process of preparing valuable products from potassiferous minerals which comprises subjecting a mixture of such a mineral and an alkaline earth carbid, in the presence of nitrogen, to a temperature sufficiently high to effect fixation of nitrogen and production of compounds containing potash values in form available as plant food.

1,401,649. PROCESS OF PRODUCTION OF POTASH-CONTAINING FERTILIZERS. CARLO ROSSI, Legnano, Italy. Original application filed Apr. 24, 1919, Serial No. 292,486. Divided and this application filed July 15, 1921. Serial No. 485,034. 1 Claim. (Cl. 71—9.)



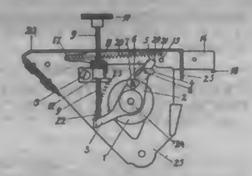
The process of preparing valuable products from potassiferous minerals (leucite, volcanic ash, feldspar, orthoclase, granite, etc.) which comprises subjecting a mixture of such a mineral with calcium carbid to a reacting temperature in the presence of nitrogen, said temperature being below the volatilizing temperature of the potash values, and thereby obtaining a complex fertilizer which is both potassiferous and nitrogenous.

1,401,650. TROLLEY-HANGER. WILLIAM SCHAAKE, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed May 7, 1917. Serial No. 167,099. 9 Claims. (Cl. 191—40.)



1. The combination with a plurality of parallel conductors, of a single hanger structure therefor comprising means coöperating with the conductors at positions offset along the conductors.

1,401,651. FLUID-CURRENT MOTOR. HERMAN J. SCHARNAGEL, Tompkinsville, N. Y., assignor to The Sperry Gyroscope Company, Brooklyn, N. Y., a Corporation of New York. Filed June 26, 1918. Serial No. 242,087. 21 Claims. (Cl. 170—68.)

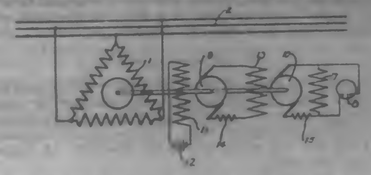


21. A fluid current motor comprising a hub member, a pair of blades rotatably secured to said hub, a centrifugally operated arm secured to each blade for turning the same oppositely, gearing connecting said blades for equal and opposite turning, and a combined torsion and tension wire secured near one end to a point on the blade and near its other end to said hub member.

1,401,652. ELECTRIC SWITCH FOR PHONOGRAPHS. JOHN J. SCULLY, Bridgeport, Conn., assignor, by mesne assignments, to Columbia Graphophone Manufacturing Company, Bridgeport, Conn., a Corporation of Delaware. Filed Nov. 27, 1917. Serial No. 204,238. 12 Claims. (Cl. 200—163.)

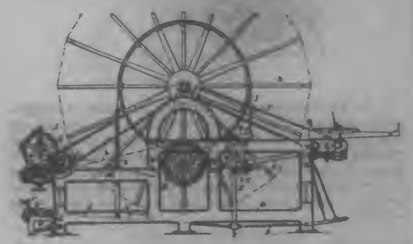
1. In an electric switch, electric terminals, a reciprocating member for opening and closing the circuit through said terminals, a pivoted member connected to said reciprocating member for moving said last-named member to open and close said circuit, a projection on said pivoted member and a curved spring coöperating with said projection to retain said switch members in open and closed positions.

1,401,653. DEVICE TO GRADUATE THE DISTANCE OF THE LINES OF TYPEWRITING-MACHINES, SPECIALLY FOR WRITING ON RULED PAPER. BARNETT SHATZ, Buenos Aires, Argentina. Filed Apr. 10, 1920. Serial No. 372,940. 4 Claims. (Cl. 97—114.)



1. In a type-writer, the combination with a platen roller and its spindle, of a toothed wheel fixed to said spindle, a bell-crank lever loosely mounted on said spindle and provided with a pawl designed to engage the teeth of said wheel, means for normally maintaining said pawl out of engagement with the teeth of said wheel, a push-rod having a pin engageable with said pawl to cause the pawl to grip the teeth of the wheel and to turn the wheel and platen roller when the push-rod is operated, and an adjustable screw engageable with the bell-crank lever for limiting the oscillating movement of said bell-crank lever in one direction.

1,401,654. MEASURING SYSTEM. FRANCIS H. SHEPARD, New Rochelle, N. Y., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed July 10, 1918. Serial No. 244,208. 11 Claims. (Cl. 175—368.)



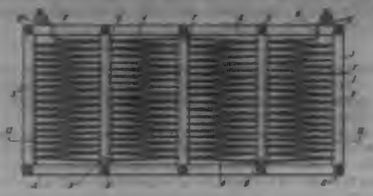
1. In an alternating-current electric circuit, the combination with a motor operatively connected to the circuit, of a plurality of direct-current generators mechanically connected to the motor and having the field winding of

each generator connected across the armature of the preceding generator, means for energizing the said winding

of the first generator and means for indicating the variation in current generated by the last generator.

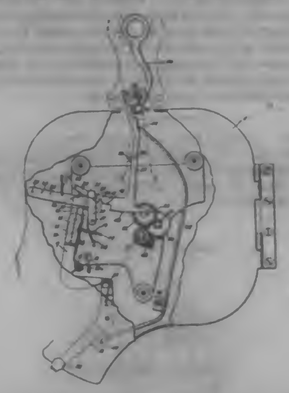
1,401,655. WARPING AND BEAMING MACHINE. GRANT SIPP, Paterson, N. J. Filed Apr. 9, 1917. Serial No. 160,627. 5 Claims. (Cl. 139—83.)

1. In a machine of the class described having a rotary member whose rotation is to be resisted, the combination of a supporting structure and mechanism therein to resist rotation of said member including a brake device to frictionally contact with said member and means to resist movement of said device with said member due to friction between them including a flexible elastic lever structure; said supporting structure having means to support said member with its axis parallel with the fulcrum of said lever structure.



1,401,656. RAIL-SUPPORT. LEWIS STUNKEL, Peck, Kans. Filed Mar. 31, 1921. Serial No. 457,225. 2 Claims. (Cl. 238—169.)

1. A device of the class described comprising spaced truss bars each comprising a base and an upstanding wing, and a rail saddle extending between the said bars and secured to the bases of the same at opposite sides of the said wings, the said saddle being provided upon its upper side with upstanding ribs abutting the relatively adjacent edges of the bases of the truss bars which are secured thereto.



1,401,657. ELECTRIC HEATING UNIT. FRANK THORNTON, Jr., Mansfield, Ohio, assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Dec. 2, 1918. Serial No. 264,936. 4 Claims. (Cl. 219—70.)

1. An electric heating unit comprising a helically wound coil having flat substantially parallel sides and rounded edge portions and a relatively narrow insulating support therefor engaging said rounded portions externally, the

coils being otherwise open to permit of a free circulation of air.

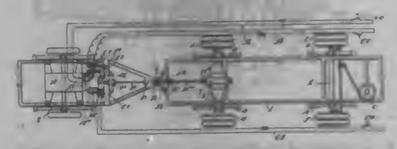
1,401,658. AUTOMATIC STOP FOR PHONOGRAPHS. JOHN Z. TOW, Springfield, Tenn., assignor of one-third to Mordaunt Patterson and one-third to Samuel R. Murphey, Springfield, Tenn. Filed Oct. 21, 1920. Serial No. 418,345. 9 Claims. (Cl. 192—116.)

1. In automatic stop mechanism for sound reproduction apparatus, in combination with a tone arm and an element for rotating a record turn table, a trip member, means actuated through swinging movement of the tone arm for urging the said trip member in one direction, means actuated through the rotation of the turn table element for moving the trip member in another direction, a brake member, means urging the same to active position, a restraining member for coaction with the brake member to hold the said brake member in inactive position, means tending to render the restraining member inactive, means operable to move the brake member to inactive position, means associated with the trip member for moving the restraining member to active position when the trip member is moved in the first mentioned direction, a detent for holding the restraining member in active position, and means actuated through movement of the trip member in the other direction for rendering the detent inactive.

1,401,659. GEARING. JESSE LORNE WARD, Hutchinson, Kans. Filed Apr. 23, 1920. Serial No. 376,049. 17 Claims. (Cl. 74—34.)

1. In a device of the character described, a driven shaft having an axial bore in one end, said driven shaft having its extreme end portion surrounding said axial bore formed to constitute a clutch member, a drive shaft having one end slidably and rotatably mounted in the axial bore of said driven shaft, a clutch member carried by said drive

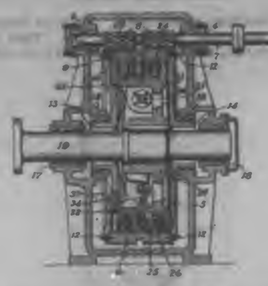
shaft and engageable with the clutch member of the driven shaft to directly connect the drive shaft and the driven shaft and communicate the motion of the drive shaft unchanged to the driven shaft, a carrier loosely mounted upon said drive shaft, a plurality of sets of gears arranged upon said carrier and driven from said drive



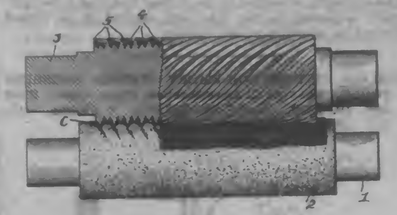
shaft, a stationary internal gear with which the sets of gears are adapted to be selectively engaged to constrain the carrier to rotation, a key carried by the driven shaft and a sleeve secured to the carrier and having a keyway slidably receiving said key to communicate the motion of the carrier to the driven shaft, all as and for the purposes set forth.

1,401,660. POCKET ATTACHMENT FOR VEHICLES. JAMES M. WHITE, Danville, Va. Filed Apr. 12, 1921. Serial No. 460,785. 7 Claims. (Cl. 224—20.)

1. A pocket attachment for vehicles of the type described, comprising a wire frame structure composed of a relatively stationary frame and a relatively movable frame connected thereto, the sides of the latter frame being bent intermediate their lengths in such manner as to position the movable frame in offstanding relation to the stationary frame, and covering material inclosing said frames.



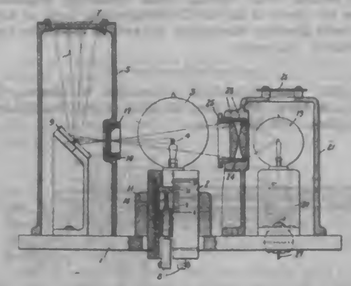
1,401,661. MOTOR-VEHICLE, TRAILED POWER. HOWARD WILCOX, Woodstock, N. Y. Filed Jan. 28, 1920. Serial No. 354,684. 5 Claims. (Cl. 180—11.)



1. A motor driven vehicle comprising a main load carrying vehicle and a trailed vehicle, a unit power plant carried on the trailed vehicle and means whereby the entire power from said unit power plant on the trailing vehicle may be utilized for driving the wheels of the main vehicle through shafting connected to the differential of the main vehicle.

1,401,662. GEARING. JAMES WILKINSON, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Oct. 9, 1919. Serial No. 329,493. 5 Claims. (Cl. 74—7.)

1. In combination, a casing, a gear wheel located in the casing, said gear wheel comprising a rim and side plates, hollow shaft means for supporting said gear wheel carried by said side plates, separate bearings in the casing for said shaft means, a shaft which extends through said hollow shaft means, bearings in the casing for said shaft, and yieldable coupling means located between said side plates and connecting said shaft to said gear wheel.

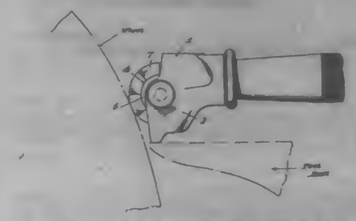


1,401,663. CLOTH-FINISHING. GUSTAV WOLF, East Providence, R. I. Filed Aug. 2, 1921. Serial No. 489,229. 6 Claims. (Cl. 26—2.)

1. In a cloth finishing device, a lower roll having a felt covering, and an upper roll having metallic teeth of spiral form and arranged to be of alternating depths, whereby to provide a three point contact with the cloth.

1,401,664. OPTICAL CHECKING APPARATUS. RALPH BEMAN, Cleveland, Ohio, assignor to General Electric Company, a Corporation of New York. Filed Jan. 23, 1917. Serial No. 144,042. 4 Claims. (Cl. 88—24.)

2. An apparatus comprising a receptacle for a lamp, a lens system, an auxiliary source of light in alinement with the filament of the lamp and in the optical axis of the

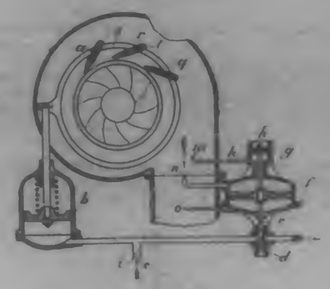


system and a screen in a position to receive an image of the filament of the lamp, said receptacle being provided with an adjustable socket for receiving said lamp.

1,401,665. SHOEMAKER'S TOOL. WILLIAM REEDER and CHARLES BLASCHKE, Schoolcraft, Tex. Filed July 9, 1921. Serial No. 483,344. 2 Claims. (Cl. 12—42.)

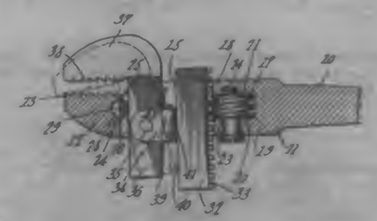
2. In a shoemakers' tool, the combination of a base, a heel-retaining member formed integral therewith, a lever fulcrumed to the member and having one forked end, a yoke pivotally connected to the forked end, and a tool pivotally connected to the yoke and adapted to be guided through an aperture in the member.

1,401,666. CUTTER FOR EMERY WHEEL-DRESSING TOOLS. FRANCIS C. BRAUNEWELL, Piqua, Ohio. Filed Apr. 10, 1919. Serial No. 288,885. 5 Claims. (Cl. 125—37.)



1. A cutter for a dressing tool comprising an assemblage of cutter units, each having a peripheral series of teeth having their cutting edges extending diagonally across the plane of the unit, corresponding teeth of adjacent units abutting throughout the area of their side faces throughout the series.

1,401,667. MACHINE-GUN. CHARLES W. BROWN, Indianola, Iowa. Filed Aug. 22, 1918. Serial No. 251,000. 7 Claims. (Cl. 89—2.)



1. In a device of the class described, a gun embodying a movable breech block; a remote source of ammunition supply including a rotary feeding means; a conduit leading from said source to the gun; a shaft journaled in the conduit; means for operatively connecting the shaft with the feeding means; and mechanism for operatively connecting the shaft with the block.

1,401,668. METHOD AND APPARATUS FOR REGULATING CENTRIFUGAL COMPRESSORS. ERIC BROWN, Baden, and ALFRED CASSANI, Ennetbaden, Switzerland, assignors to Aktiengesellschaft Brown, Boveri and Cie., Baden, Switzerland. Filed Jan. 20, 1920. Serial No. 354,256. 2 Claims. (Cl. 230—11.)

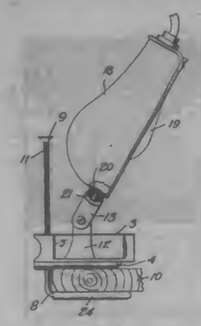
1. A regulator for a centrifugal compressor of the type regulated by adjustable guide blades, including a cylinder and piston mechanism for adjusting said guide blades, and automatic means for operating said piston in said cylinder, said means being energized simultaneously by both the pressure and the volume of the fluid delivered by said compressor.

1,401,669. COMBINATION PIPE-WRENCH. FREDRICK F. CALHOUN, Tumwater, Wash. Filed Apr. 8, 1920. Serial No. 372,209. 4 Claims. (Cl. 81—165.)

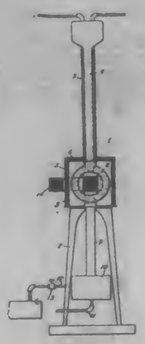
1. A wrench of the class described comprising a handle having a shank portion and a jaw in alinement with the handle, said shank having a slot therethrough at right angles to the face of said jaw, a movable jaw having a shank at right angles with respect thereto and extending through said slot, a block pivotally supporting said shank of the movable jaw whereby the latter may move in angular relation to the first-mentioned jaw, said block being engaged in the slot, spring means carried by said block and urging the movable jaw in angular relation to the stationary jaw, means carried by the stationary jaw for holding the movable jaw in spaced parallel relation to the stationary jaw, and rotatable means carried by the shank of the stationary jaw and operatively engaged with said block at one side of the latter for adjusting the latter in the slot.

1,401,670. SPARK-PLUG. PUEVA V. CARPENTER, Worth, N. C. Continuation in part of application Serial No. 254,410, filed Sept. 17, 1918. This application filed June 17, 1919. Serial No. 304,769. 2 Claims. (Cl. 123—169.)

1. A plug of the character described comprising a casing body having a terminal end threaded for engagement in a cylinder head or the like, a diagonal valved passage and a concentric passage therein, a porcelain slidably engageable in and secured in the last named passage, electrodes at the inner part of the plug, one being mounted in the porcelain on the axis of the plug, and located with their opposed surfaces equally spaced from and closely adjacent the medial line of said passage, said porcelain stopping short of the end of the diagonal passage, one of said electrodes being resilient and laterally movable, whereby a file device inserted through said passage may be reciprocated between the points to clean them as described.



1,401,671. EMERGENCY SOURCE OF VOLTAGE. LEWIS WARRINGTON CHUBB, Edgewood Park, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Dec. 14, 1918. Serial No. 266,745. 15 Claims. (Cl. 204—29.)



1. A voltage-generating means, containing deliquescent material, that is active only upon exposure to a moisture-containing fluid.

1,401,672. PORTABLE ELECTRIC-LAMP BRACKET. MARTIN CLAUSSEN, San Francisco, and GUSTAVE H. BRADT, Oakland, Calif., assignors, by mesne assignments, to Wizard Electric Lamp Company, a Corporation of Massachusetts. Filed Dec. 9, 1919. Serial No. 343,686. 4 Claims. (Cl. 240—52.)

1. A portable bracket for an electric lamp, comprising a base having resilient means whereby it may be clamped to a support, a reflector connected to the base so as to tilt on a horizontal axis and to rotate on an axis perpendicular thereto, and means on the reflector for detachably clamping an applied light bulb.

1,401,673. INDUCTION-HEATER. ORA A. COLBY, Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 25, 1919. Serial No. 279,157. 3 Claims. (Cl. 219—47.)

1. In an induction liquid heater, the combination with a metallic container for storing the liquid, of a laminated core, a primary coil on said core, a metallic tube wound around said core and forming a passage for the liquid to be heated and means for electrically connecting said tube to said container.

1,401,674. ELECTRIC GLASS-ANNEALING FURNACE. ORA A. COLBY, Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 7, 1920. Serial No. 372,019. 4 Claims. (Cl. 204—64.)

1. In an electric furnace, the combination with a chamber, of a pair of resistor blocks of solid refractory electrical-conducting material constituting the top and bottom walls of said chamber, the adjacent faces of said blocks being slightly divergent outwardly, means for

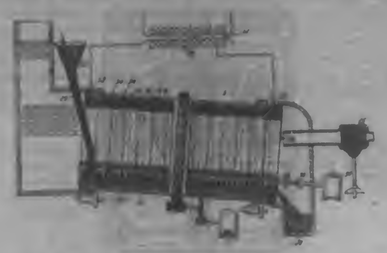
holding said blocks in their operative positions, means for conducting current to and from said resistor blocks, and a cover member for said chamber having a central opening for the insertion of material to be heated.

1,401,675. DOUCHE. DANIEL RICHARD COOPER, Gore, New Zealand, assignor of one-half to Charles William Anderson and Florence Louisa Howorth, Wellington, New Zealand. Filed May 4, 1920. Serial No. 379,926. 4 Claims. (Cl. 128—240.)

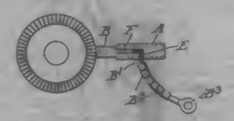
1. In apparatus of the kind and for the purpose described, a head or nozzle, downward sloping ridges arranged in parallel planes upon the upper part of the said head or nozzle, upward sloping ridges arranged in parallel planes upon the lower part of said nozzle and liquid emission holes leading preferably to the sloping sides of said ridges, substantially as described.

1,401,676. STORAGE BATTERY. HENRY CRAWFORD, New York, N. Y. Filed May 12, 1919. Serial No. 296,576. 6 Claims. (Cl. 204—29.)

1. In a battery, an electrode comprising a core-like member and an inclosure surrounding and attached to said electrode, the ends of the electrode extending beyond said inclosure; the electrode and the inclosure defining therebetween an annular space in which is contained a depolarizing medium.



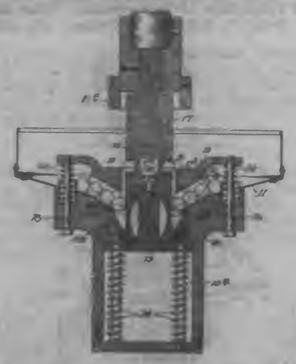
1,401,677. PROTECTIVE SUIT. JESSE E. DADE, Littlefork, Minn., assignor to Universal Safety Suit Co., Inc., Minneapolis, Minn., a Corporation of Minnesota. Filed Dec. 10, 1917. Serial No. 206,481. Renewed May 17, 1921. Serial No. 470,325. 15 Claims. (Cl. 9—20.)



1. In a life saving suit of the character described, having an opening adapted to be closed above the head of a wearer, a draw-string near the edge of said opening and operable to close the same, and stiffening means for the suit fabric adjacent said draw string.

1,401,678. APPARATUS FOR NITROGEN FIXATION. FRANKLIN DARLINGTON, New York, N. Y., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Nov. 22, 1917. Serial No. 203,339. 18 Claims. (Cl. 204—31.)

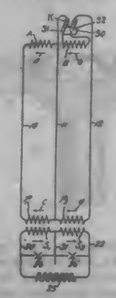
1. In a furnace for the carrying out of a chemical reaction involving the action of a catalytic agent upon a mass of material, a mixing device for said material formed in part at least, from said catalytic agent, whereby substantially all portions of said mass are periodically subjected to the action of said catalytic agent.



1,401,679. BRUSH-HOLDER. DUDLEY F. DILLIN, North Canton, Ohio, assignor to The Hoover Suction Sweeper Company, New Berlin, Ohio, a Corporation of Ohio. Filed Feb. 11, 1920. Serial No. 357,845. 12 Claims. (Cl. 171—324.)

3. A brush holder comprising a hollow shell two slots through the wall of said shell spaced apart from each other and extending, one toward one end of said shell and the other toward the other and a third slot connecting them in combination with a brush adapted to enter the open end and a pigtail attached to said brush and adapted to project through any of said slots.

1,401,680. MACHINE FOR FILLING BALL-RETAINERS. JOHN DEREK, Berwyn, Ill., assignor to U. S. Ball Bearing Mfg. Co., Chicago, Ill., a Corporation of Illinois. Filed May 10, 1920. Serial No. 380,296. 9 Claims. (Cl. 29—84.)

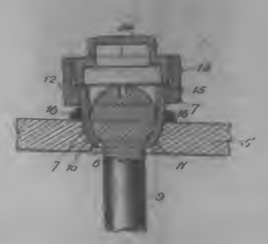


9. In a machine for filling ball retainers, means for holding a ball retainer having radial openings for the balls, means for feeding balls to said openings and means operable by movement of said retainer for forcing a ball into each of said openings simultaneously.

1,401,681. DEEP-WELL PUMP. ROBERT M. DOWNIE, Beaver Falls, Pa., assignor to Keystone Driller Company, Beaver Falls, Pa., a Corporation of Pennsylvania. Filed Nov. 22, 1919. Serial No. 339,864. 10 Claims. (Cl. 103—54.)

1. A deep well piston lift pump having a pump barrel, an air cushion chamber, and an air inlet pipe entering the pump below the pump barrel, whereby to furnish the pump with air in order to cushion hammering and to maintain a continuous air supply in the air chamber.

1,401,682. ELECTRICAL DISTRIBUTING SYSTEM. GIUSEPPE FACCIOLI, Pittsfield, Mass., assignor to General Electric Company, a Corporation of New York. Filed Nov. 26, 1920. Serial No. 426,360. 6 Claims. (Cl. 171—97.)



3. In an electrical distributing system, the combination with two main transformers, of two supply transformers fed therefrom and having one feeder in common, loads connected across the supply transformers individually, another load having a characteristic different from the first, said load connected across said supply transformers in series, and a switching device for reversing the polarity of a main transformer with respect to its feeders whereby the E. M. F.'s of the supply transformers across the second named load may be in series or bucking relation.

4. In an electrical distributing system, the combination with two main transformers, of two supply transformers fed therefrom and having one feeder in common,

loads connected across the supply transformers individually, another load having a characteristic different from the first said load connected across said supply transformers in series, and a double throw switch for reversing the polarity of a main transformer with respect to its feeders.

1,401,683. STAYBOLT STRUCTURE. JOHN ROGERS FLANNERY, Pittsburgh, Pa., and ETHAN I. DODDS, Central Valley, N. Y., assignors to Flannery Bolt Company, Pittsburgh, Pa. Filed Jan. 27, 1921. Serial No. 440,422. 6 Claims. (Cl. 85—1.5.)

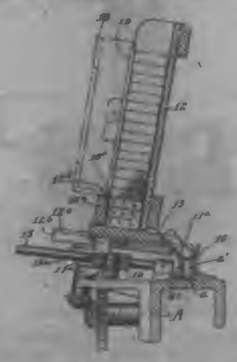
1. In a stay bolt structure, the combination of a bearing member for the head of a stay bolt, the said member having an internal seat for the head of a bolt and outwardly tapering at its upper end, a ring having an internally tapered lower end to conform to the taper on the bearing member, the said ring being threaded at its upper end, and a cap secured to the ring and forming a cover for the bearing member.

1,401,684. STAYBOLT STRUCTURE. JOHN ROGERS FLANNERY, Pittsburgh, Pa., and ETHAN I. DODDS, Central Valley, N. Y., assignors to Flannery Bolt Company, Pittsburgh, Pa. Filed Feb. 10, 1921. Serial No. 445,454. 4 Claims. (Cl. 85—1.5.)

4. In stay bolt construction, the combination of an outer sheet having a stay bolt opening widest at its outer side, a bolt bearing member seated in said opening, a built up welded wall over the outer end of said bearing member the said built up wall and outer end of the bearing member being threaded and a screw cap engaging the threads in said parts and having a flange overlapping the built up wall to form a steam tight joint.

1,401,685. PROTECTIVE DEVICE. PAUL R. FORTEN, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Oct. 21, 1919. Serial No. 332,167. 13 Claims. (Cl. 175—294.)

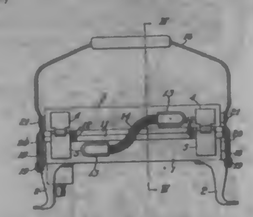
1. In a relay, the combination with a movable circuit controlling member of means normally exerting balanced restraining forces on the ends of said member to hold the same against movement, and means cooperating with said member intermediate the ends thereof operative in response to a predetermined unbalancing of the forces ex-



erted on the ends of said member to move the same into circuit controlling position.

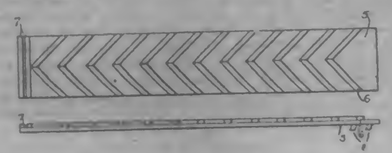
1,401,686. ELECTRIC HEATING DEVICE FOR PLUNGING. FRITZ FIRT, Berne, Switzerland. Filed Oct. 16, 1920. Serial No. 417,484. 7 Claims. (Cl. 219—41.)

1. In an electric heating device, a double walled body member, and an electrical resistance element coiled between the walls of the body member and having the convolutions thereof arranged substantially concentric with the axis of the body member.



1,401,687. CHARGE FORMING AND POSITIONING APPARATUS. MATHIAS FOGOS and LAWRENCE P. SOUTHWICK, Richmond, Va., assignors, by mesne assignments, to Stokes & Smith Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed May 23, 1919. Serial No. 299,298. 16 Claims. (Cl. 198—24.)

1. As a means for forming and positioning a charge consisting of a plurality of similar units relative to a

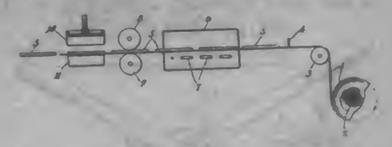


charge presenting mechanism, a reservoir for the charge units and having a bottom on which the face of the charge is seated, a trough for receiving the charge, said trough having an element of the presenting mechanism as its bottom, and means for delivering the charge from the reservoir to a position within the trough, and with a charge face seated on the presenting element, said means being operative to temporarily render the charge subject to gravitation to place a different face of the charge as the seated face.

1,401,688. ELECTRIC WAFFLE-IRON. FRANK F. FORSYTHE, Flint, Mich., assignor to Westinghouse Electric Products Company, a Corporation of Michigan. Filed Jan. 30, 1920. Serial No. 355,073. 21 Claims. (Cl. 219—19.)

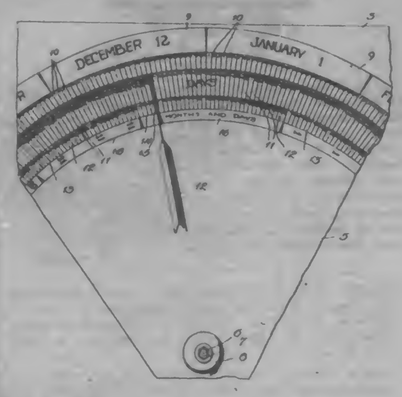
1. In an electrically heated apparatus, the combination with a lower casing and an upper casing pivotally mounted on the lower casing, of a handle member directly mounted on the lower casing for carrying both casings, and means responsive to movements of the handle member for moving the upper casing relatively to the lower casing.

1,401,689. TRACTION-SUPPORT. BURNEY C. GENTRY, Freeport, Tex. Filed July 25, 1921. Serial No. 487,438. 3 Claims. (Cl. 238—14.)



1. In a device of the character described, a board having inclined cleats on its upper surface, all of said inclined cleats being arranged in V-shape with the apices rearward, and rearwardly inclined cleats on the under side of said board adjacent the forward end thereof.

1,401,690. AUXILIARY AUTOCAR-DRIVE. EDWIN J. GOULD and WALTER PRESCHER, Fruitvale, Calif., assignors to Modern Mechanical Engineering Company, Alameda, Calif., a Corporation of California. Filed May 22, 1919. Serial No. 299,928. 4 Claims. (Cl. 180—44.)

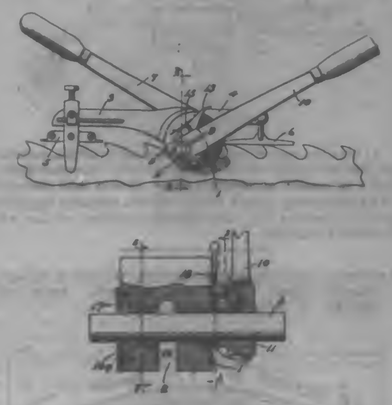


2. An auxiliary automobile drive, comprising a belt running around two concave pulleys on vehicle wheels, an arm attached to the steering knuckle carrying two guides for said belt, a fixed pulley attached to said arm, and a spring controlled pulley opposite the fixed pulley, the belt passing over both last named pulleys to receive tension.

1,401,691. PROCESS OF MAKING AUTOMOBILE-DOOR PANELS. HARRY J. HAGN, Newburgh, N. Y., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del., a Corporation of Delaware. Filed May 1, 1919. Serial No. 294,024. 10 Claims. (Cl. 154—2.)

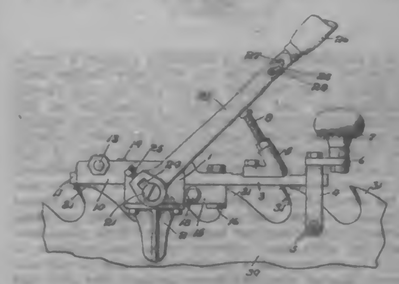
1. The process of making laminated products suitable for use as blanks for door panels which comprises applying a succession of separate plates of stiff light material to an advancing, coated web of flexible material, applying heat to partially dry, and thereafter cutting out the web between the plates.

1,401,692. CALCULATING DEVICE. WARREN E. HARRIS, Emmett, Idaho. Filed Aug. 4, 1919. Serial No. 315,197. 1 Claim. (Cl. 235—84.)



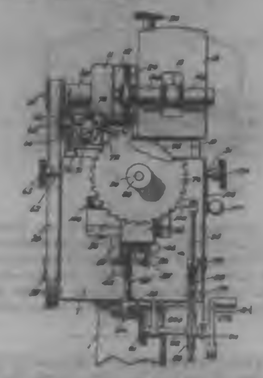
In a calculating device, a stationary member, a revoluble member, graduations on the stationary member bearing indicia of the calendar months and the days thereof chronologically and successively, graduations on the revoluble member one of which is blank and the remaining graduations bearing indicia of the days of a calendar year from one to three hundred and sixty four, of days of a month arranged in groups of thirty and corresponding in multiples of thirty to the days of the calendar year to the extent of twelve groups and these groups numbered from one to eleven, and an indicator occupying the blank graduation following that bearing the indicia three hundred and sixty four, whereby when the indicator is placed in register with a predetermined date on said stationary member the time elapse between that date and any other date following in chronological succession may be ascertained in terms of days or of periods of thirty days and fractions thereof.

1,401,693. PREPARATION OF DIMETHYL SULFATE. WALTER NORMAN HASWORTH and JAMES COLEBROOK LAYCOCK, St. Andrews, Scotland. Filed Nov. 19, 1918. Serial No. 263,250. 7 Claims. (Cl. 23—84.)



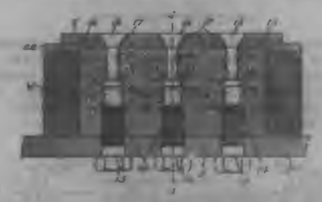
1. A process of preparing dimethyl sulfate which consists in directly combining dimethyl ether and sulfur trioxid in the presence of a solvent initially comprising dimethyl sulfate.

1,401,694. SAW-SWAGE. JOHN P. HENDERSON, Big Rapids, Mich., assignor to Machinery Company of America, Big Rapids, Mich., a Corporation of Michigan. Filed June 28, 1920. Serial No. 392,309. 4 Claims. (Cl. 76—54.)



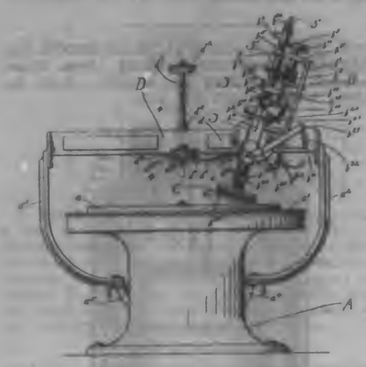
1. In a saw swage, the combination of a swage block an elongated swaging die passing through the block, a bushing mounted on the die and adapted to rest in a recess in the block in which it has bearing, said bushing being provided with an annular groove around the same, an operating handle operatively connected to the die, and a lever pivotally mounted on the block and normally entering the groove in the bushing to hold the bushing against detachment from the block, said lever being movable to free the bushing and associated die for removal from the block, substantially as described.

1,401,695. SAW-TOOTH SHAPER. JOHN P. HENDERSON, Big Rapids, Mich., assignor to Machinery Company of America, Big Rapids, Mich., a Corporation of Michigan. Filed June 28, 1920. Serial No. 392,310. 1 Claim. (Cl. 76—49.)



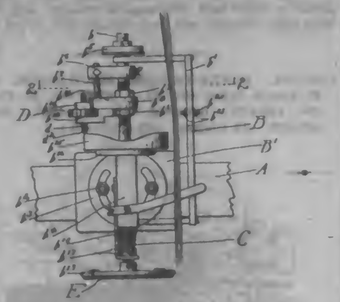
A saw tooth shaper comprising a support having an opening downwardly therethrough, two dies movably mounted on the support and positioned below said opening, screws threaded through opposite sides of the support to engage against the dies, said screws being oppositely threaded, a handle member attached to the screw end of each screw, said handle members being brought together at a distance from the screws and one of said members being provided with a slot, one-quarter inch, a lug on the other member entering said slot, a washer over the end of the lug and adjacent portions of the first handle member, and a screw threaded into the lug to hold the washer substantially as described.

1,401,696. SAW-GRINDING MACHINE. JOHN P. HENDERSON, Big Rapids, Mich., assignor to Machinery Company of America, Big Rapids, Mich., a Corporation of Michigan. Filed June 28, 1920. Serial No. 392,311. 20 Claims. (Cl. 76—41.)



1. In a saw grinding and sharpening machine, means for rotatably supporting a saw, means for periodically turning the saw on its support by step by step movement to bring a succeeding saw tooth into the position occupied by the next preceding saw tooth, a rotatably mounted grinding wheel, means for driving the same, means for periodically moving the grinding wheel toward and away from the saw, and means for automatically elevating the saw after all of the teeth thereon have been acted upon by the grinding wheel, substantially as described.

1,401,697. COMMUTATING-POLE CONSTRUCTION. PHILIP E. HENNINGER, Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed July 25, 1918. Serial No. 246,781. 4 Claims. (Cl. 171—252.)

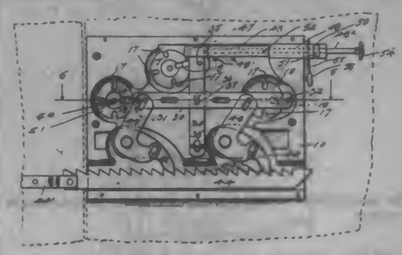


1. A field-magnet pole piece comprising a body provided with an opening extending therethrough, a tip portion having an opening therethrough that registers with the opening in said body, and a rivet one end of which is disposed flush with the surface of said pole tip and the remainder of which is totally inclosed within said openings.

1,401,698. MACHINE FOR GRINDING GLASS PLATES. WALTER J. HESCHEDE and WALTER EBERHARDT, Cincinnati, Ohio. Filed May 14, 1920. Serial No. 382,282. 11 Claims. (Cl. 51—132.)

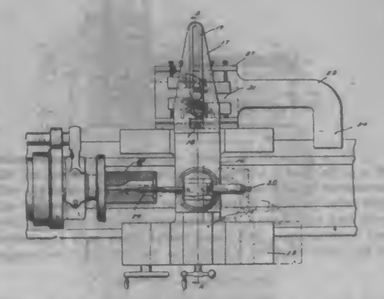
1. In a machine for grinding bevels upon glass plates the combination of a grindstone, a sleeve, means for mounting the sleeve adjacent to the grindstone, a shaft mounted reciprocally and rotatably in the sleeve, a pattern mounted upon the sleeve and a contact device secured upon the shaft and adapted to contact with the pattern device.

1,401,699. FEED MECHANISM FOR GRINDING MACHINES. WALTER J. HESCHEDE and WALTER EBERHARDT, Cincinnati, Ohio. Filed July 26, 1920. Serial No. 398,094. 4 Claims. (Cl. 51—216.)



1. In a feed mechanism for grinding machines the combination of a reciprocable work-carrying shaft, a stop mechanism for limiting the feed of the shaft and automatic means for varying the positions of the stop mechanism.

1,401,700. ART OF PREPARING LOW-ALCOHOLIC AND NON-ALCOHOLIC BEVERAGES. HERMAN HILDEBRAND, Evanston, Ill. Filed Jan. 12, 1920. Serial No. 350,945. 7 Claims. (Cl. 99—11.)



1. The process of improving the taste, flavor and bouquet of a dealcoholized fermented beverage which consists in adding thereto a small proportion of volatile saturated aliphatic acid.

1,401,701. COMBINATION-LOCK FOR CAR-DOORS. WILLIAM J. HULCOMB, Bellefontaine, Ohio. Filed Nov. 2, 1920. Serial No. 421,377. 8 Claims. (Cl. 70—53.)

1. In a device of the class described, a casing, a plurality of tumblers mounted therein in different planes, an element adapted to be locked in a predetermined position within said casing, locking members for engagement with said element, locking members for operating said members, bars adapted to control said pivoted operating members, said tumblers being adapted at times to prevent operation of said bars, and operating means for said bars.

1,401,702. LATHE ATTACHMENT. MONROE G. HUSTED, Bridgeton, N. J. Filed Sept. 24, 1920. Serial No. 412,562. 6 Claims. (Cl. 82—36.)

1. A device of the class described comprising a tool holder formed in two sections, one of said sections being relatively rotatable about a central axis, a cutting tool mounted on said rotatable section, said rotatable section being adapted to be rotated to cause said tool to engage the work piece and means in said tool holder and acting upon said rotatable section tending to rotate it in a direction to cause the cutting face of said tool to constantly engage the work piece.

1,401,703. EAVES-TROUGH AND SUPPORT. JACOB E. HYRE, Urbana, Ill. Filed June 22, 1920. Serial No. 390,714. 4 Claims. (Cl. 108—28.)

1. A non-metallic eaves trough comprising a blank bent along its length to form a channel, certain portions of the blank being shaped to constitute housings extending longitudinally of the channel, a lip portion on each housing extending to a point approximately midway of the trough and secured to a portion of the blank, a longi-

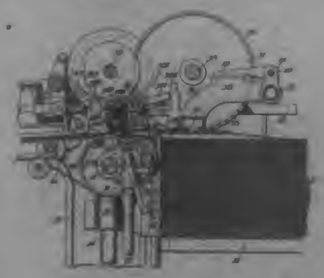
radial strengthening member fastened in each housing, and means for cross-bracing the structure and maintaining

the longitudinal strengthening members in predetermined relation.

1,401,704. SCALE. LEONARD T. JOHNSON, Boston, Mass. Filed Oct. 18, 1916. Serial No. 125,410. 5 Claims. (Cl. 265—69.)

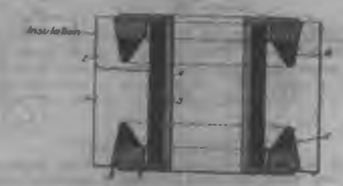
1. In a scale of the kind described, the combination of a price chart, a weighing lever, means to control the movement of said lever with an evening bar movable with said lever parallel therewith and interposed between said lever and said means, a thermostat parallel with said lever and evening bar, and connections from said thermostat to the price chart to compensate for temperature changes.

1,401,705. CAP-SPINNING FRAME. JOSEPH H. JOSLIN, Winthrop, Mass., assignor of one-half to Robert Burgess, Newton Center, Mass. Filed Dec. 27, 1920. Serial No. 433,154. 19 Claims. (Cl. 118—62.)



1. The combination with a rotating spinning element, a cap surrounding said element and rotating in unison therewith, a rail having an opening through which the said element extends, a whirl-support having a base adjacent to rest upon said rail and a boss encircling the said element and occupying the opening in the rail, such whirl-support also having a chamber containing a bearing, and a supporting waist for the said cap, having a passage opening to the said bearing.

1,401,706. IGNITION AND SCAVENGING MEANS FOR INTERNAL-COMBUSTION ENGINES. FRED KARR, Toupeka, Kans. Filed Apr. 4, 1921. Serial No. 459,441. 3 Claims. (Cl. 123—145.)

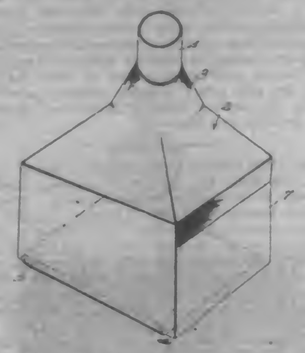


1. In an internal combustion engine, a cylinder having an auxiliary compression chamber, a spark plug having a casing forming a ground electrode and provided with a fuel inlet and a fuel outlet, said fuel inlet communicating with said compression chamber, and the second electrode entering said fuel outlet, and means upon the cylinder piston to enter said compression chamber and force fluid from said chamber into and through said spark plug.

1,401,707. PAPER-FEEDING MECHANISM. WILLIAM M. KELLY, Jersey City, N. J. Filed Oct. 13, 1916. Serial No. 125,429. Renewed Oct. 11, 1921. Serial No. 507,157. 43 Claims. (Cl. 271—28.)

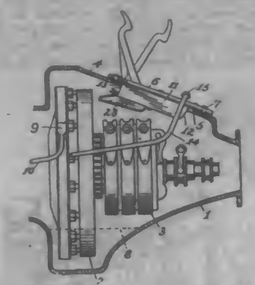
4. In sheet feeding mechanism the combination of a table, a shaft arranged above said table, a pair of wheels on said shaft having opposed peripheral flanges with radial perforations, a suction pipe arranged above said table, a nozzle on said pipe projecting between said wheels and connecting with said flanges, a rock shaft, and a valve carried by said rock shaft and co-operating with said nozzle to control the suction through

1,401,708. COMMUTATOR-CYLINDER. WILLARD H. KEMPTON, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed May 28, 1919. Serial No. 300,431. 2 Claims. (Cl. 171—321.)



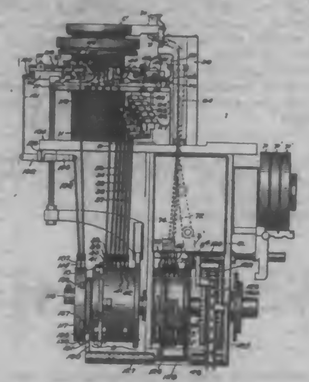
1. A commutator cylinder comprising a metallic sleeve, a tube of insulating material surrounding the sleeve, alternate conducting and insulating segments provided with notches arranged in annular relation about the tube, windings of cord impregnated with a hardened binder disposed in the notches and means detachably securing the segments with relation to the sleeve while maintaining the conducting segments insulated therefrom.

1,401,709. PURIFICATION OF CRUDE SYNTHETIC CAMPHOR. JOHANNES M. KESSLER, West Orange, N. J., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del., a Corporation of Delaware. Filed Feb. 25, 1920. Serial No. 361,353. 19 Claims. (Cl. 23—24.)



1. The process of purifying camphor containing an organic halid which comprises heating such camphor in the presence of a high boiling point organic acid salt soluble in molten camphor and at a temperature sufficient to bring about decomposition of the organic halid but below that at which camphor itself begins to decompose.

1,401,710. DUST-CONVEYING ATTACHMENT FOR THRESHING-MACHINES. JOHN KOTRBEK, Selden, Kans. Filed Mar. 1, 1917. Serial No. 151,750. Renewed May 14, 1921. Serial No. 469,404. 2 Claims. (Cl. 130—29.)

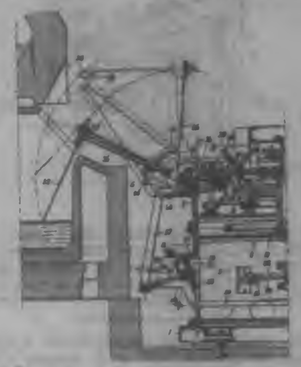


1. A dust conveying attachment for the feeding mechanism of a threshing machine including a frame structure having a tapered upper portion, a hood arranged upon the frame constructed of flexible material and having receiving and discharge openings in the opposite ends thereof and an outlet port in the upper portion thereof, and a flexible closure for the receiving opening of the hood adapted to be swung outwardly to permit insertion of bundles of grain in the hood.

1,401,711. OILING DEVICE. CHARLES KRALICEK, Cleveland, Ohio, assignor, by mesne assignments, to Safety Oiling System, Incorporated, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Feb. 10, 1919. Serial No. 275,971. 6 Claims. (Cl. 184—11.)

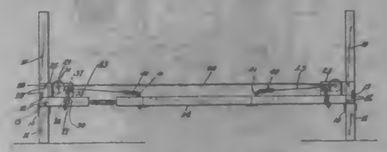
2. An oiling device comprising a plate, a pocket carried by the plate, the plate and pocket being arranged on an inclination, the pocket having an open end for receiving oil, and the pocket being provided with an open side for permitting oil to flow therefrom, substantially as described.

1,401,712. CIRCULAR GLOVE-KNITTING MACHINE. JOHN LAWSON, Central Falls, R. I., assignor to Hemphill Company, Central Falls, R. I., a Corporation of Massachusetts. Filed Dec. 12, 1918. Serial No. 266,481. 28 Claims. (Cl. 66—24.)



1. Knitting mechanism comprising in combination, a needle carrier and a cam carrier to knit the hand and fingers of a glove, and picker means to fashion the tips of the fingers during and by the knitting operation.

1,401,713. AUTOMATIC MACHINE FOR BLOWING GLASS. ERNEST LECOULTRE, Paris, France, assignor to Compagnie Generale d'Electricite, Paris, France, a French Corporation. Filed Dec. 27, 1919. Serial No. 347,836. 9 Claims. (Cl. 45—20.)



9. In an automatic machine for the manufacture of articles of blown glass, the combination with a main support, of a series of radial arms, means for mounting said radial arms for a bodily revolving movement around a common axis independently of each other, a forearm pivotally carried by each of said arms for vertical movement, a blow tube secured to each of said forearms

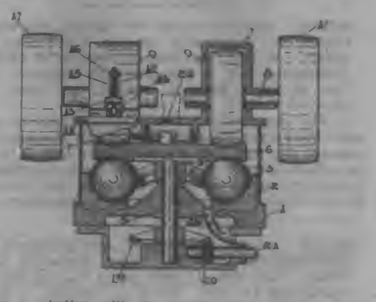
adapted to be dipped into a glass pot, a truck for supporting and guiding said furnaces, said truck being constructed with means for raising and lowering the furnaces to permit the blow tube to be lowered into the glass pot and raised therefrom, means for regulating the depth of the successive blow tubes in the pot, the extent of said dipping being progressively increased in proportion to the fall of level of the glass in said pot, means for rolling the glass around the blow tubes, means for individually rotating said blow tubes, means for distributing

air under pressure to the blow tubes, said distribution being effected at different pressures or the air being derived from several sources corresponding to the various positions of the radial arms carrying said blow tubes, a continuously operated member and an intermittently operated member for controlling the movements of said radial arms, automatic means for alternately connecting the individual arms to said continuously and intermittently operated members, and a motor and associated gearing connected with said operated members for driving said members.

1,401,714. FOLDING BED. HARRY LITVAK, Hudson, N. Y. Filed Mar. 10, 1921. Serial No. 451,086. 5 Claims. (Cl. 5—68.)

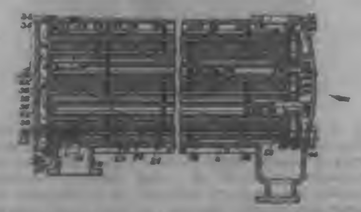
1. In combination with a bed having end posts and side rails, means for tensioning a bed spring in place on said bed, said means comprising a housing attached to said end-posts, a shaft journaled transversely of said side rails within said housing, means for operating said shaft, and a tension device in connection with said shaft adapted to be energized by the operation of said shaft as and for the purpose herein specified.

1,401,715. HAY-PRESS. WILMER ELMER MCCARDWORTH, Orange, Tex. Filed Oct. 11, 1920. Serial No. 416,151. 7 Claims. (Cl. 100—7.)



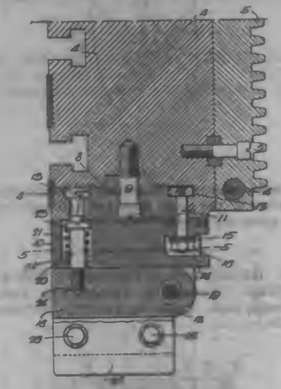
1. In a hay press, the combination with a plunger and a crank shaft connected to said plunger, of a spur gear to operate said crank shaft, said spur gear having a lug to intermittently contact with said crank shaft, said lug being formed with a recess, and a spring seated in said recess.

To a hay press, the combination with a plunger mechanism, of a crimping device comprising a pulley roller adapted to engage the charge being compressed, a pin supporting said roller, pivotally mounted links sup-



porting said pin at its ends, a yoke extending lengthwise over said roller and having laterally extending curved arms fitting over and bearing upon the roller, and also having downward projecting slotted ends receiving said pin, and springs tending to draw said ends downward.

1,401,716. PULVERIZER OR GRINDING-MACHINE. GEORGE MCCREA, Brantford, Ontario, Canada. Filed Feb. 12, 1921. Serial No. 444,462. 8 Claims. (Cl. 83—45.)



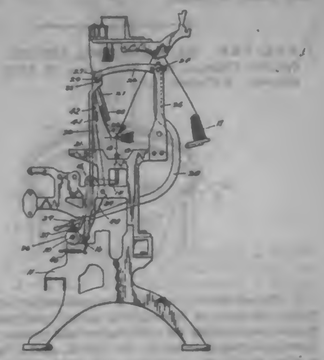
1. In a grinding mill, the combination of a casing; a non-rotatable grinding plate at the lower part of the casing; a floating grinding plate supported above the non-rotatable plate; freely rolling grinding members holding said plates in spaced relationship; rotary grinding members adapted to cooperate with the upper surface of the floating grinding plate and to drive the same; bearings for said rotary grinding members movable to and from the floating grinding plate; and means for directly rotating said members.

1,401,717. HEAT-EXCHANGE DEVICE. FRANK A. HALLECK, Oak Park, Ill., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Nov. 28, 1917. Serial No. 204,459. 12 Claims. (Cl. 257—289.)

7. An intercooler comprising a casing of substantially rectangular cross section and having a plurality of parallel communicating compartments formed therein, and a plurality of cooling units disposed in said compartments, each comprising a series of spaced cooling tubes cooperating to form a unit of substantially rectangular cross section substantially filling its compartment and each removable without removal of any other.

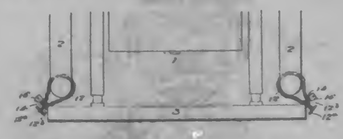
1,401,718. TOOL-HEAD FOR SLOTTING-MACHINES. GEORGE F. MUTH, Philadelphia, Pa., assignor to Newton Machine Tool Works, Incorporated, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Mar. 1, 1920. Serial No. 362,592. 3 Claims. (Cl. 90—54.)

1. The combination in a slotting machine, of a ram having an annular undercut slot in its under side; a head resting against the lower end of the ram; bolts having heads adapted to the annular slot and carried by the head so that the head can be clamped to the ram in any position desired; a tool holder pivoted to the head; and yielding means for holding the tool holder to the head.



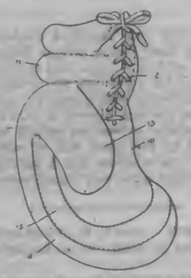
1,401,719. SHINE OR GLOSS REMOVER AND NAP-PRODUCER. LAURA M. MYERS, Chicago, Ill. Filed Dec. 16, 1918. Serial No. 267,011. 3 Claims. (Cl. 26—4.)

2. In a device of the character set forth comprising a new article of manufacture for removing shine from clothing, the combination of a body having flat sides and a rounded lower surface, a fabric provided with sharp crystalline grains applied to said body, and a handle secured to the body and holding the fabric in position, the arrangement being such that the device will have two flat sides and a rounded bottom for engagement with the goods to be acted upon.



1,401,720. EMBROIDERING ATTACHMENT FOR FLAT-KNITTING MACHINES. KARL FRIEDRICH NEBEL, Philadelphia, Pa., assignor to The Nolde & Horst Company, Reading, Pa., a Corporation of Pennsylvania. Filed Nov. 23, 1920. Serial No. 425,969. 9 Claims. (Cl. 66—28.)

9. In a machine of the character stated, mechanism including knitting needles for forming fabric of body yarn, means including guides for feeding other yarn to the knitting needles to form contrasting effects upon the ground fabric made from the body yarn, means for raising vertically and substantially in unison the needles and guides,



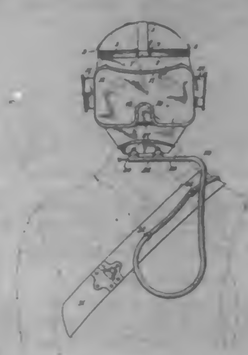
and means for moving the guides transversely of the machine in register with needle spaces while the lower parts of the guides are in substantially the same horizontal plane as the upper parts of the needles.

1,401,721. WHEEL-LOCKING DEVICE. HARRY NICODEMUS, Baltimore, Md. Filed Mar. 16, 1920. Serial No. 366,310. 8 Claims. (Cl. 188—31.)

2. In a locking device for vehicles, a bumper provided with a spring, a slidable plate, a chain connected to said slidable plate and its outer end adapted to be looped around a wheel and means for locking said chain.

1,401,722. BOXING-GLOVE COVER. ZACK GILL OLDHAM, Urbana, Ill. Filed Nov. 20, 1920. Serial No. 425,428. 1 Claim. (Cl. 2—196.)

A boxing glove having a palm portion and a padded back and thumb portion, said back portion being stretched and formed to extend over and around the edge of the glove so as to join the palm portion within the palm thereof,



wherein wrinkles will be eliminated from the back portion and the edge of the glove, and a protecting strip positioned within the palm of the glove and secured to said padded back portion and said palm portion for covering their point of joinder.

1,401,723. SACK-HOLDING DEVICE. Martin B. Palich, Chicago, Ill. Filed Aug. 29, 1921. Serial No. 494,084. 8 Claims. (Cl. 23—5.)

1. The combination with a container having supporting means therein, of interfitting annuli resiliently held together and resting on said supporting means, a sack frictionally engaged between the annuli, and a ball normally resting inside the container and connected to the annuli for removing the sack and the annuli from the container.

1,401,724. MASK. Michal Palij, Chicago, Ill. Filed Feb. 24, 1921. Serial No. 447,525. 4 Claims. (Cl. 128—141.)

1. A mask of the type described comprising a rigidly positioned frame, head straps carried thereby, a forward frame hinged to said rigid frame and carrying a transparent shield, means for admitting air to said shield, coöperating means carried by said frames for holding the same in closed position, ear caps carried by said shield, said ear caps including tubular extensions carried by the shield, a reticulated plate at the laner end of each extension, a hinged cover for the extension and a packing material between the reticulated plate and hinged cover.

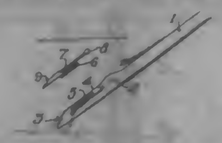
1,401,725. SHIRT. Julius B. Pearlstein, Brooklyn, N. Y. Filed Aug. 14, 1920. Serial No. 403,493. 1 Claim. (Cl. 2—41.)

As an improved article of manufacture, a shirt formed with a bifurcated tail the two ends thereof being convergently curvilinear and terminating in apices, the curvature of the inner edge being relatively slight as compared with that of the outer edge, groin flaps of convergent curvilinear shape, the apices thereof and of said tail ends being provided with detachable fastening means, permitting the

tail flaps being used either in crossed or uncrossed relation, the curvatures of the groin flaps and tail ends coinciding when the parts are in use.

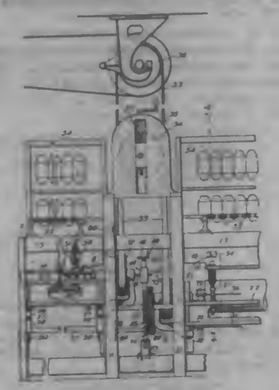
1,401,726. HEMSTITCH ATTACHMENT FOR SEWING-MACHINES. William L. Pierce, New York, N. Y. Filed Jan. 9, 1919. Serial No. 270,277. 10 Claims. (Cl. 112—139.)

1. In a cord border hemstitching attachment for sewing machines, the combination with a cutting plunger and stitching needles for stitching a cord border on opposite sides of the hole cut by said cutting plunger, of a cord guide positioned between said cutting plunger and said stitching needles.



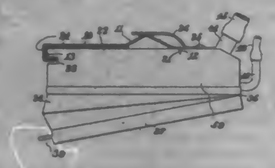
1,401,727. CURTAIN-POLE. Peter Pimlott, Brooklyn, N. Y. Filed Jan. 8, 1921. Serial No. 435,890. 8 Claims. (Cl. 156—19.)

6. In a fixture of the class described in combination with supporting brackets, a sectional rod, and means for turning one of said sections at an angle with respect to the other, said means comprising a rotatable element supported in the inner end of one of said sections.



1,401,728. DARNING HOOK. Edward J. Post, Philadelphia, Pa. Filed Apr. 3, 1920. Serial No. 371,127. 1 Claim. (Cl. 66—3.)

A crocheting needle having a body portion and a hook member, said body portion being provided with a longitudinal dovetail slot which extends to and terminates in the said hook portion and with a depression, a keeper slidably fitted within the dovetail slot and having integral therewith a rearwardly extending resilient member adapted to engage the depression in the body portion for retaining the

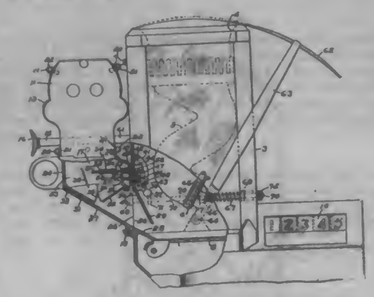


keeper in its normal position, and a forwardly extending pointed member adapted to open and close the hook member.

1,401,729. RING SPINNING OR TWISTING MACHINE. James C. Potter, Pawtucket, R. I. Filed Sept. 1, 1921. Serial No. 497,616. 18 Claims. (Cl. 118—41.)

2. In a ring-spinning or twisting machine, the combination of rings and travelers supported thereon, a stationary support for such rings, thread-feeding means situated a fixed distance from the rings, a carriage that supports spindles and spindle rotating means, and a builder motion for traversing said carriage and causing the movement of spindles and bobbins supported thereby to and fro through the rings, the travelers deriving their motion only from the pull of the threads as the latter are wound upon the bobbins.

1,401,730. UNIT SYSTEM FOR PLAYER-PIANOS. Louis H. Pray, Medford, Mass. Filed Aug. 10, 1920. Serial No. 402,648. 7 Claims. (Cl. 84—53.)



1. A supporting bar having a stiffening rib extending lengthwise of the top face thereof; and detachably secured thereto a plurality of hammer-actuating units adjustable endwise of said bar and each having a spring member extending over and coacting with said stiffening rib.

1,401,731. TAG HOLDER AND ILLUMINATOR. Fred W. Reimann, Manistique, Mich. Filed Aug. 25, 1919. Serial No. 319,613. 3 Claims. (Cl. 40—132.)

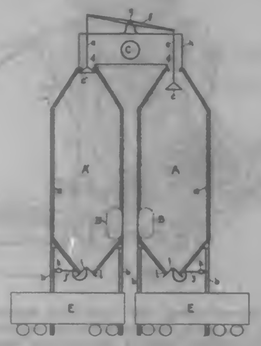
1. A tag holder and illuminator comprising a hollow body provided with an open top, a removable cover for the open top of the body, means for supporting a license tag within the body and rearwardly of the line of the open top, illuminating means at the top of the body above the opening therein, and a transparent reflecting means positioned in front of the casing to reflect the light rays from the illuminating means toward the rear and against said tag, the latter being visible through the transparent reflecting means.

1,401,732. FARE RECEIVING AND REGISTERING APPARATUS. Henry E. Reynolds, Braintree, Mass.; Carrie B. Reynolds executrix of said Henry E. Reynolds, deceased. Filed Dec. 5, 1916. Serial No. 135,258. 10 Claims. (Cl. 235—32.)

1. In a fare-collecting and registering apparatus, the combination of a main fare-receiving and registering machine and a portable primary fare-receiver each having an opening leading into the other for the discharge of previously collected fares from the primary fare-receiver to the main fare-receiving and registering machine, closures for said openings, locking means for said closures, means on said main fare-receiving and registering machine to operate the locking means of the closure of said primary fare-receiver, and means on said supplemental fare-receiver to operate the locking means of the closure of said fare-receiving and registering machine.

1,401,733. DESULFURIZATION OF ZINC SULFID ORES. Gilbert Rigg, Melbourne, Victoria, Australia, assignor to Mining and Metallurgical Processes Proprietary Limited, Melbourne, Victoria, Australia. Filed May 21, 1918. Serial No. 235,784. 10 Claims. (Cl. 75—60.)

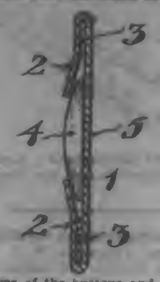
1. In the art of roasting zinc sulfid ores the process which consists in subjecting the ore to a preliminary roast



and their assignment to a fixed point, the preliminary travel eliminating slack to such a degree that the first point produces a proper stroke.

1,401,734. HINGE. CHARLES B. ROBERTS, Berkeley, Calif. Filed Oct. 30, 1920. Serial No. 420,634. 2 Claims. (Cl. 16—181.)

1. An adjustable hinge comprising hinge leaves, spaced knuckles having alining holes formed on one of said leaves, an enlarged knuckle on the other leaf adapted to fit between said spaced knuckles, a bushing adjustably held in said enlarged knuckle said bushing having a longitudinally extending eccentrically disposed hole, a shoulder on the lower end of said enlarged knuckle and a pivot pin extending through the holes in said knuckles and the hole in said bushing.

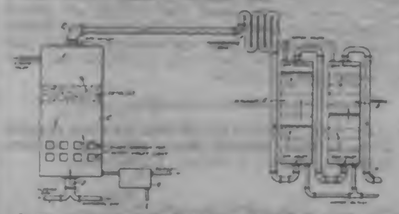


1,401,735. METHOD FOR REMOVING SOLIDS SUSPENDED IN OR CARRIED BY GASES. FRANK C. ROBERTS, Wynnewood, Pa. Filed Jan. 22, 1921. Serial No. 439,167. 1 Claim. (Cl. 183—114.)

The method of purifying gases by removing solids suspended in or carried by gases, which consists in directing the current of gases into one or more receptacles for an interval of time, thereafter directing the current of gases into other purifying means for a period of time sufficient to permit the desired portion of the solids to be removed from the gases in said one or more receptacles, and thereafter re-directing the current of gases into said one or more receptacles to displace the purified gases.

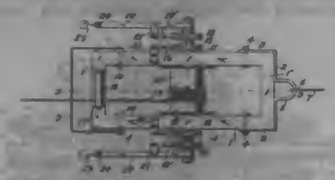
1,401,736. CARD FOR HOLDING BUTTONS. WALTER L. ROTHSCHILD, New Rochelle, N. Y. Filed Mar. 31, 1920. Serial No. 370,297. 2 Claims. (Cl. 211—84.)

1. An article of the class described comprising a button-holding card having a base having its edges infolded to form a pair of spaced-apart button-retaining flaps, said flaps being normal to the base for a portion of their width, with their outermost portions overlying the edges of the buttons and pressing the same against the back.



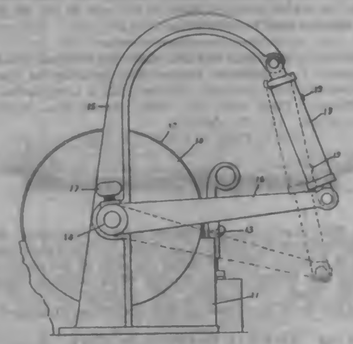
1,401,737. METHOD OF PRODUCING CARBON-BLACK. BRADLEY W. RUMBARGER, Fairbanks, La., assignor to Southern Carbon Company, Fairbanks, La., a Corporation of Delaware. Filed Oct. 5, 1920. Serial No. 414,891. 5 Claims. (Cl. 134—60.)

2. The herein described improvement in producing carbon black from a flame of hydrocarbon consisting in burning hydrocarbon behind a supplemental flame forming a protective gaseous screen adapted to exclude oxygen from the black producing flame.



1,401,738. METHOD OF PRODUCING CARBON-BLACK. BRADLEY W. RUMBARGER, Fairbanks, La., assignor to Southern Carbon Company, Fairbanks, La., a Corporation of Delaware. Filed Mar. 9, 1921. Serial No. 451,014. 8 Claims. (Cl. 134—60.)

2. The process of treating a natural hydrocarbon gas to increase the carbon content and to diminish the hydrogen content thereof and at the same time produce hydrochloric acid gas, consisting in bringing said natural gas, chlorin and a liquid hydrocarbon together in a chlorinating chamber, washing out the hydrochloric acid gas and passing the remaining gas on for use as hydrocarbon gas having an increased carbon content.



1,401,739. WIRE-STRETCHER. JESSE GYRAM EYALS, Inverness, Fla., assignor of one-half to George W. Scofield, Inverness, Fla. Filed June 5, 1920. Serial No. 386,709. 1 Claim. (Cl. 254—134.)

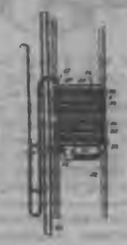
A stretcher comprising a substantially rectangular frame, a shaft journaled transversely of and having its ends extending laterally beyond the lines of the frame, a winding drum rigid upon the shaft and substantially spanning the space between the side bars of the frame, a pair of ratchets mounted upon the shaft upon the exterior of

the frame at each end, pawls carried by the frame engaging with the proximate ratchets, levers pivoted upon the shaft at its remote ends, and pawls carried by the levers engaging the remote ratchets.

1,401,740. TEST-STAND FOR TESTING STARTING-MOTORS. JOSEPH C. SCHAF, Jr., and WILLIAM J. HOLLIDAY, Indianapolis, Ind. Filed Nov. 20, 1920. Serial No. 425,531. 2 Claims. (Cl. 265—1.)

1. A device for indicating the torque of a motor, including means for securing the motor in fixed position, a crane-like standard having a bearing therein through which said motor shaft is adapted to extend, an arm attached to said shaft, an indicating scale connecting the end of said crane-like standard and the other end of said arm, whereby the operation of said motor will tend to cause said arm to actuate said scale for indicating the foot pounds of torque thereof.

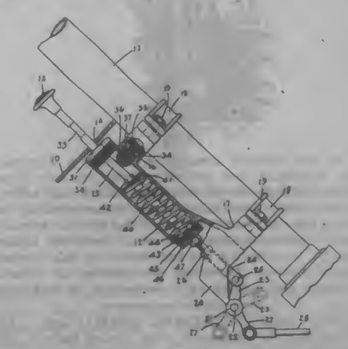
1,401,741. PROCESS OF TREATING ALUNITE. MARK SHOELD, Chicago, Ill., assignor to Armour Fertilizer Works, Chicago, Ill., a Corporation of New Jersey. Filed Feb. 26, 1920. Serial No. 361,466. 4 Claims. (Cl. 23—13.)



1. The process of treating alunite consisting in heating a mixture of alunite and carbonaceous material in a reducing atmosphere at a temperature and for a period of time sufficient to decompose its aluminum sulfate in part only but without decomposing or volatilizing its potassium sulfate, substantially as described.

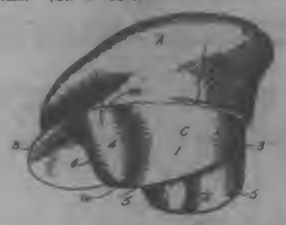
1,401,742. CANCELING DEVICE. JOHN W. SLACK, Silver Creek, N. Y., assignor to Columbia Postal Supply Company, Silver Creek, N. Y., a Corporation of New York. Filed May 15, 1920. Serial No. 381,673. 2 Claims. (Cl. 101—329.)

1. A canceling device comprising a body provided at its rear end with a longitudinal socket, a printing roller mounted on said body, a handle journaled at its front end in said socket and provided in its periphery with a segmental peripheral groove, and a screw secured to said socket and having a reduced inner end engaging with said groove.



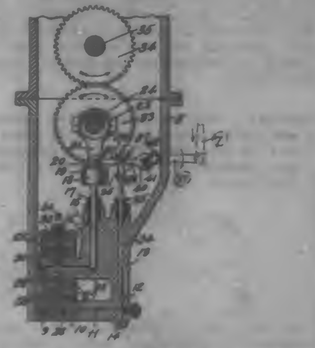
1,401,743. METHOD AND APPARATUS FOR SEPARATING FOREIGN SUBSTANCES FROM LEAD MATTES. ELMER A. SPERRY, Brooklyn, N. Y. Filed Feb. 7, 1919. Serial No. 275,634. 21 Claims. (Cl. 204—57.)

1. The method of separating lead from a matte containing lead in excess and other metals which comprises dissolving lead from said matte by passing an electric current from the matte through an electrolyte in an electrolytic cell, preventing the dissolved lead from reaching the cathode and removing the separated lead and other metals from the cell.



1,401,744. CONTROL MECHANISM. HARVEY LEE WATSON, Indianapolis, Ind., assignor, by mesne assignments, to C. M. Hall Lamp Company, a Corporation of Michigan. Filed Dec. 6, 1920. Serial No. 428,748. 5 Claims. (Cl. 74—39.)

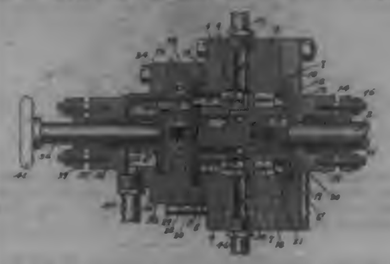
1. A control mechanism including an actuating rod, a housing surrounding said rod and having an opening



through which the rod extends, and a chamber surrounding transversely of the housing and communicating therewith, a latching plunger yieldingly supported in said transverse chamber, said rod having a portion thereof cooperating with the plunger in the housing to lock the rod in one position, and spring means within the housing exerting longitudinal force on said rod to move the same when released.

1,401,745. HEADWEAR. SAMUEL WEISSER, Rutherford, N. J. Filed Dec. 21, 1920. Serial No. 432,226. 2 Claims. (Cl. 2—107.)

1. The combination with a head covering, of a dependent ear and neck protector having ear pockets in the opposite sides of the same bulged outwardly to loosely receive and fit over the ears of the wearer and having its forward edges sloping downwardly and rearwardly and its lower rearward edge permanently shortened so as to fit closely against the back of the neck and to draw the forward edges of the ear pockets closely against the sides of the head in advance of the ears.



1,401,746. INTERNAL-COMBUSTION MOTOR AND FUEL-FEED THEREFOR. ALEXANDER WINTON, Lakewood, Ohio. Filed Oct. 16, 1916. Serial No. 125,978. 10 Claims. (Cl. 123—140.)

1. In an internal combustion motor, a cylinder, a piston therein, a fuel injecting device for said cylinder having a capacity for a maximum charge and having a constant stroke, means in open communication with said fuel injecting device for supplying fuel in unmeasured quantity thereto, means actuated by said fuel injecting device for interrupting the fuel supply to said device on the suction stroke thereof for determining the volume of the charge, and a check valve mechanism in said supply.

1,401,747. MOTOR-STARTING MECHANISM. ALEXANDER WINTON, Lakewood, Ohio. Filed Dec. 23, 1916. Serial No. 138,653. 2 Claims. (Cl. 60—16.)

1. Starting apparatus for internal combustion motors, comprising a casing having a series of circumferentially spaced cavities each open at both ends and communicating with a motor cylinder, a check valve in each cavity seating toward either end thereof, two valves rotating together in timed relation with the motor and each provided with a port passing in turn the open ends of said cavities, said casing having two chambers containing said rotating

valves and a pressure chamber communicating by ports within the casing with said two chambers, and a single valve in said pressure chamber having two positions in either of which pressure flows to one and is cut off from the other of said two chambers.

1,401,748. MANUFACTURE OF DRAWBAR-YOKES. HARRY T. ANDERSON, Butler, Pa., assignor to Harry Vissering and Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 25, 1920. Serial No. 361,078. 8 Claims. (Cl. 29—187.)

1. That improvement in making railway draft-gear yokes which consists in cutting a plurality of draft-gear openings in a bar of metal, forming the ends of the blank for keying to a coupler shank, forging offset marginal flanges on the blank, and bending and doubling the blank to bring the draft gear openings into transverse alinement.

1,401,749. RAILWAY DRAFT-GEAR YOKE. HARRY T. ANDERSON, Butler, Pa., assignor to Harry Vissering and Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 25, 1920. Serial No. 361,079. 7 Claims. (Cl. 213—42.)

1. A one-piece forged draft-gear yoke comprising in combination a front portion having sides spaced apart to receive and formed for keying to a coupler shank, a back, and longitudinal connecting members in abutting relation between the back and front portion, the yoke having openings adapted for the lateral insertion of the draft-gear.

1,401,750. ORNAMENT-SUPPORT. LOUIS V. ARONSON, Newark, N. J. Filed Aug. 24, 1921. Serial No. 496,884. 3 Claims. (Cl. 248—30.)

1. Means for supporting an ornament upon a disk-shaped instrument, comprising a ring adapted to contact

with the edge of said instrument, a clamp cooperating with said ring and adapted to be secured to the support-

ing means of said instrument, and a base for an ornament carried by the upper portion of the ring.

1,401,751. TRAVELING GRIZZLY. COLBY M. AVERY, Aurora, Ill., assignor to Stephens-Adamson Mfg. Co., a Corporation of Illinois. Filed Dec. 11, 1920. Serial No. 429,886. 4 Claims. (Cl. 83—56.)

1. In a traveling grizzly, in combination, two pairs of sprocket wheels, sprocket chains running upon the wheels, screening bars carried by the chains, and undulating tracks supporting the chains intermediate of the wheels, the pitch of the undulations of the track and of the sprocket chains being different and being so differentiated that neither is a multiple of the other.

1,401,752. REAMER. JOHN ANDREW BERTRAND, Los Angeles, Calif., assignor to Asbury Reed, Los Angeles, Calif., and Wehner A. Koch, San Francisco, Calif. Filed Nov. 19, 1919, Serial No. 339,077. Renewed Oct. 24, 1921. Serial No. 510,008. 12 Claims. (Cl. 77—76.)

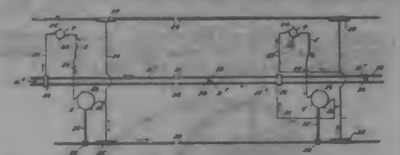
1. A reamer having a tapered body and cylindrical ends and having longitudinally extending guides for cutters,

the bottoms of the grooves being inclined outwardly toward one end, bits movable in the grooves and having reduced threaded ends, a nut journaled on one of the cylindrical portions and engaging the threaded ends of the bits, a sleeve encircling the bits and split longitudinally to provide resiliency, and means for moving the sleeve longitudinally of the mandrel.

1,401,753. TELEPHONE-RECEIVER. GASTON BOISSONNAULT, Hewlett, N. Y. Filed Jan. 29, 1921. Serial No. 440,829. 7 Claims. (Cl. 179—182.)

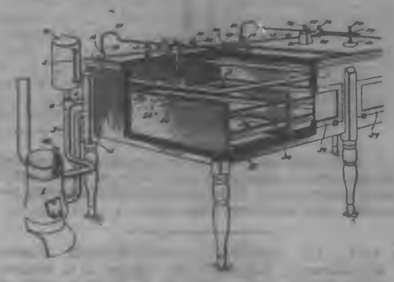
1. The combination in a receiver of the class described provided with a supporting neck, of an ear piece and a sound amplifier both detachably and interchangeably engageable with said supporting neck.

1,401,754. TELEPHONE-TRANSMITTER. GASTON BOISSONNAULT, Hewlett, N. Y., assignor to G. Boissonnault Company, New York, N. Y., a Corporation of Delaware. Filed July 22, 1921. Serial No. 486,738. 4 Claims. (Cl. 179—188.)



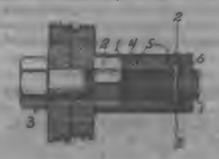
1. The combination with a telephone transmitter provided with a projecting neck, of a perforated plate having screw threaded connection with said neck and an overlying perforated cap pivotally connected with said plate.

1,401,755. AUTOMATIC TRAIN-STOPPING APPARATUS. OSARIO BONACCORSO, Philadelphia, Pa., assignor of one-half to George Lo Bue, Philadelphia, Pa. Filed June 30, 1919. Serial No. 307,500. 2 Claims. (Cl. 246—66.)



1. In train stopping apparatus, the combination with a track-way divided into blocks, of car carried stopping

mechanism controlling an electric motor, means operable from said motor for cutting off the propelling power of the car, a connection between said motor and the engineer's brake valve, means for operating the motors so even within the same block whereby the propelling power will be cut off and the brakes applied, and means oper-



able to break the circuit of each motor simultaneously with the cutting off of the propelling power of the car, said means last named including a switch opened simultaneously with the closing of a controlling lever of the vehicle and operated by said lever.

1,401,756. INCUBATOR. JAMES S. BROWNE, St. Louis, Mo. Filed Nov. 13, 1920. Serial No. 423,779. 8 Claims. (Cl. 236—4.)

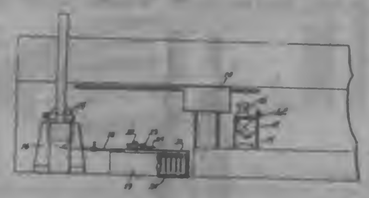
1. In an incubator having an incubating chamber, the combination with a hot water heating system including a ball valve for controlling said system, of a ventilator for the incubating chamber, a ventilator closure member, a lever adjustably connected at one end to said ball valve and at its other end to said closure member, a housing supported on said incubator, a pivotal plate fixed to said rod and journaled on said housing, a tubular member extending downwardly from said housing into the incubating chamber, a thermostat positioned in the incubating chamber and having its operating rod extending upwardly through said tubular member into said housing, and means carried by said plate and operatively engaging said thermostat rod, said means being adjustable relative to said thermostat whereby the operation of said lever by the thermostat can be advanced by the adjustment of said means.

1,401,757. NUT-LOCK. WILLIAM FORREST BROWN, Kansas City, Mo. Filed Feb. 28, 1921. Serial No. 448,379. 9 Claims. (Cl. 151—1.)

1. In a nut lock, a polygonal shell adapted to be fitted on a nut mounted on a bolt, the shell having one or more

towardly extending projections and being adapted on reverse end bolt greater universal in which a threaded portion of the bolt is embedded, substantially as set forth.

1,401,758. EYE-SHADE. WILLIAM ARTHUR CARLETON, Governors Island, N. Y. Filed Dec. 20, 1920. Serial No. 452,008. 1 Claim. (Cl. 2—149.)



An eye shade, including a body portion, and tabs swingingly connected to and forming a continuation of the side edges of said body portion, said body being formed with a cutout portion in one of its longitudinal edges, said cutout portion terminating short of the points of swinging connection of said tabs with said body portion.

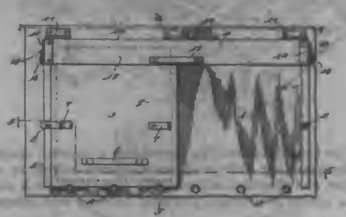
1,401,759. MINING-MACHINE TRUCK. FRANK CANTLIFFE, Clarksmet, N. H., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Oct. 10, 1917. Serial No. 195,734. 10 Claims. (Cl. 105—161.)

1. In a mining machine truck, a truck frame, and a machine guiding extension pivotally connected thereto and forming a collapsible joint therewith.

1,401,760. MANUFACTURE OF SCREW-CUTTING OIL. HARRY C. CLAFLIN, Cleveland, Ohio. Filed Mar. 22, 1920, Serial No. 367,606. Renewed Nov. 5, 1921. Serial No. 513,213. 17 Claims. (Cl. 87—9.)

7. A heat absorbing lubricant comprising a colloidal solution of sulfur in oil.

1,401,761. LIFTING-JACK. ELMER A. CLARK, Joliet, Ill., assignor to W. E. Pratt, Chicago, Ill. Filed Mar. 21, 1921. Serial No. 454,732. 8 Claims. (Cl. 254—110.)

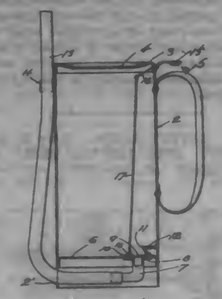


1. In a lifting jack, a standard, a lifting bar vertically guided in the standard and having a rack, a lever pivoted to the standard for movement in a vertical plane, a pair of pawls engaging the rack, one at least of which is pivoted

on the lever, a link connecting the pawls, a spring secured at one end to the standard and engaging the link at the other and normally exerting a pressure on the link to

withdraw the pawls from the rack and means mounted on the lever for engaging the spring to reverse its action on the pawls.

1,401,762. CAR-DOOR. FRANCESCO COPPOLA, Elmira, N. Y. Filed Mar. 21, 1921. Serial No. 453,875. 3 Claims. (Cl. 20—22.)

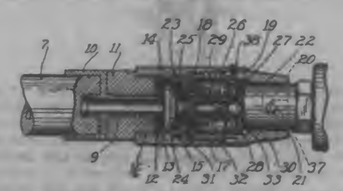


1. In combination, a car body provided in one side with a door-opening, a door for closing said opening, means coöperative with the bottom of the door for slidably supporting it, the upper end of the door being detached and freely movable away from the body, and a movably mounted combined weather-guard, guide and retainer coöperable with the upper edge of the door for normally retaining the latter in operative position and movable to a position to permit removal of the door from the car body and the door-supporting means.

1,401,763. DISPENSING VESSEL. WILLIAM H. DAMON, Los Angeles, Calif. Filed Dec. 11, 1919. Serial No. 344,180. 1 Claim. (Cl. 221—14.)

In a measuring and dispensing vessel, a container having a bottom that is elevated with respect to the lower edge of its wall, said elevated bottom being provided with a discharge opening, an L-shaped tubular connection secured to the underside of the bottom and communicating with the opening therein, a flexible tube having one end secured to said L-shaped connection, a substantially L-shaped valve hinged to the top of the bottom, the horizontal member of which L-shaped valve is adapted to normally close the discharge opening in the bottom, a compression spring interposed between the wall of the container and the upright member of the L-shaped valve,

which spring normally exerts pressure to maintain the valve in closed position, a thumb lever fulcrumed on the



upper portion of the container, and a connection from the inner end of said thumb lever to the horizontally disposed portion of said L-shaped valve.

1,401,764. HITCH. ARVID A. DANIELSON, Manning, Iowa, assignor to Duitmeier Manufacturing Company, Manning, Iowa. Filed Aug. 23, 1920. Serial No. 405,432. 2 Claims. (Cl. 278—40.)

1. In a device of the class described a fixed tongue member having a pair of arms fixed to its sides near its forward end, a pair of plates fixed above and below said arms near their rear ends, the lower of said plates being slightly inclined, a second pair of plates fixed above and below said arms near their forward ends, one of said last plates being bent U shaped so as to have its center spaced from the upper plate a greater distance than the thickness of said arms, the parts being so arranged that said arms and said pairs of plates form a socket for receiving the rear end of a tongue having its under surface tapered as and for the purposes stated.

1,401,765. LUBRICATING SYSTEM. ERNEST W. DAVIS, Oak Park, Ill., assignor to The Bassick Manufacturing Co., a Corporation of Delaware. Filed June 3, 1920. Serial No. 386,153. 25 Claims. (Cl. 284—18.)

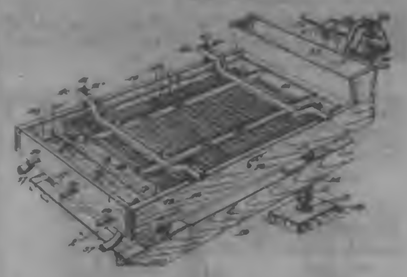
1. The combination with a lubricant receiving nipple, having a pin projecting from one side thereof, of means for supplying lubricant thereto, comprising a compressor having a coupling member for making a detachable connection with said nipple comprising a sleeve having a swivel connection with said compressor, and provided intermediate its ends with an annular flange forming a valve seat and the second sleeve having its inner end screw threaded into said first-mentioned sleeve, and its outer end provided with a bayonet slot for co-acting with

said gun, a valve seating endwardly upon said valve seat, and having a valve stem projecting loosely through the opening of said valve seat, the said valve stem being hollow and having an opening through the wall thereof, a gasket secured to the outer end of said valve stem for seating against the end of said nipple, a second gasket seating against said flange and sealing the joint between said sleeves, and a compression spring for holding said gaskets in spaced relation.

1,401,766. SAFETY RAZOR. JOHN H. D. EVERHART, Waukegan, Ill. Filed July 25, 1920. Serial No. 398,331. 4 Claims. (Cl. 30—72.)

1. A safety razor comprising a holder made from a single strip of metal, the central portion of said strip being serrated to form a guard, the ends of said strip being bent to form a blade holding frame and then brought together to form a handle, the arms of said frame being slotted to receive the edges of a razor blade; and means for forcing the arms of said frame together to clamp the blade in said slots, substantially as described.

1,401,767. MACHINE FOR FEEDING AND DRIVING NAILS. MAURICE S. FINCH, St. Joseph, Mo., assignor to Specialty Shoe Machinery Company, St. Joseph, Mo., a Corporation of Missouri. Filed July 11, 1919. Serial No. 310,270. 18 Claims. (Cl. 1—6.)



4. A nailing machine comprising, in combination, a nail driving mechanism, a nail hopper, and a nail raceway connecting said hopper and driving mechanism and including a movable raceway section maintained normally in position for receiving nails from the hopper and out of communicating relation with the remainder of the raceway, said movable raceway section being constructed and arranged to assemble a plurality of nails from the hopper and be moved by the weight of such plurality of nails into communicating relation to the remainder of the raceway for discharging said assembled nails therefrom.

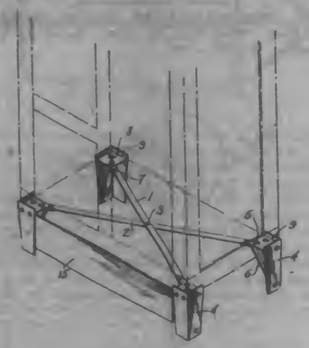
1,401,768. MACHINE-GUN. ALBERT R. FISCHER, New York, N. Y. Filed June 25, 1921. Serial No. 479,486. 3 Claims. (Cl. 89—34.)

1. A machine gun comprising a body frame, a plurality of gun barrels extending from one side thereof, a casing removably enclosing said frame, cartridge carrying cylinders rotatable in said casing, spring impelled hammers pivoted to said frame, means for cocking said hammers and means cooperative therewith for rotating said cylinders.

1,401,769. APPARATUS FOR EXTRACTING METAL FROM ORE AND THE LIKE. HAROLD H. GODFREY, Los Angeles, Calif. Filed Nov. 17, 1920. Serial No. 424,451. 22 Claims. (Cl. 204—15.)

1. In a metal extracting apparatus, a member mounted for reciprocatory movement, metal plates carried by said member and disposed substantially parallel to each other, and a porous diaphragm arranged between said plates.

1,401,770. CLASP FOR DOCUMENTS, &c. ROBERT GOLDEN, Brooklyn, N. Y. Filed Nov. 4, 1921. Serial No. 512,755. 4 Claims. (Cl. 24—81.)

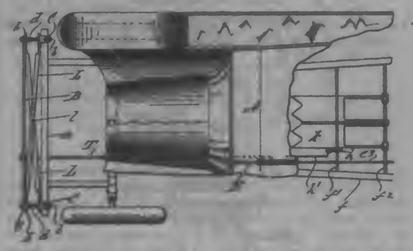


1. In a clasp for record containers, the combination comprising a base member having oppositely disposed arms rigidly connected thereto and projecting therefrom, an elastic strap member adapted to elastically connect the free ends of said arms and securely hold said clasp in any adjusted position on the outer surface of a container and a movable clip member, for retaining documents, movably secured to said base member intermediate said arms.

1,401,771. METHOD AND MACHINE FOR DRYING, CLEANING, AND POLISHING MOVING-PICTURE FILMS. JAMES W. GURNEY, Ridgefield Park, N. J. Filed June 12, 1920. Serial No. 388,673. 3 Claims. (Cl. 15—8.)

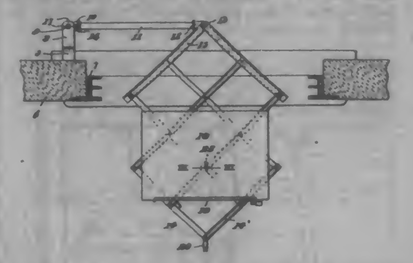
1. The method of drying, cleaning and polishing moving picture films consisting of winding said films upon a drum having an absorbent covering and then revolving said drum in such manner as to cause the absorbent covering to rub the surface of the film lying thereagainst.

1,401,772. LEG CONSTRUCTION. HERBERT J. GWYNN, Yonkers, N. Y. Filed July 26, 1920. Serial No. 398,976. 4 Claims. (Cl. 248—41.)



2. In a construction of the character described, a pair of bars pivoted to each other, a supporting leg mounted upon each end of each bar, each of said bars having a hinge joint therein whereby the bars may be folded together and the legs folded upon the bars.

1,401,773. STRIPPER FOR ROLLING-MILLS. PAUL C. HALDEMAN, Coatesville, Pa., assignor to Lukens Steel Company, Coatesville, Pa., a Corporation of Pennsylvania. Filed Sept. 4, 1919. Serial No. 321,514. 8 Claims. (Cl. 80—1.)



8. The combination, with a roll of a rolling mill, of a rest bar mounted adjacent the roll, and having a beveled upper surface with notched projections extending above the same, a stripper having a plurality of sections mounted upon said rest bar and engaging said projections and having an edge adapted to engage the roll; said stripper sections having their upper surfaces recessed, with ribs between the recesses for engagement with the plate passing over the roll; said recessed portions having inclined surfaces, and means for holding said stripper plates to the rest bar with their thin edges in engagement with the roll.

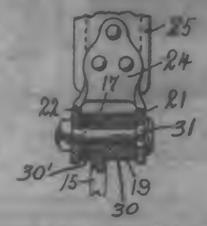
1,401,774. SAFETY APPLIANCE FOR VEHICLES. CARL HALPERN, Newark, N. J. Filed Oct. 20, 1920. Serial No. 418,322. 10 Claims. (Cl. 180—83.)

1. A safety appliance for vehicles of the character designated comprising in operative combination, an emergency brake lever normally manipulatable, a yieldably mounted frontal concussion bar, pivotally connected twin cross levers controlling said concussion bar, and an actuating thrust rod interposed between said concussion bar and said emergency brake lever, for the purpose described.

1,401,775. PROVISION-SAFE SUPPORT. ANDREW HALUSKA, Whiting, Ind. Filed Sept. 29, 1921. Serial No. 504,070. 3 Claims. (Cl. 40—104.)

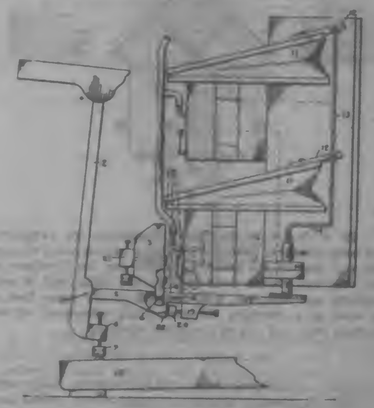
3. In a device of the class described, an extensible lazy tong platform having a provision safe secured thereon near one end of the same, a handle for the platform at said end, and means connected to the other end of said platform and adapted to be secured to the outer face of the wall of a dwelling for permitting movement of the platform into and out of a window opening.

1,401,776. STOPPER FOR WASHBOWLS AND THE LIKE. MANSON C. HATTON, Ontario, Calif. Filed July 17, 1919. Serial No. 311,641. 3 Claims. (Cl. 4—35.)



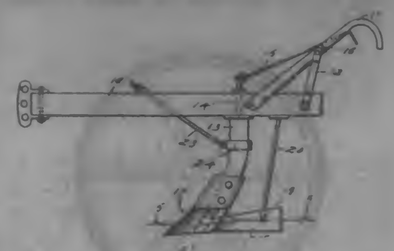
1. A stopper for the outlet of wash bowls and the like having a conical outlet seat, comprising a conical rubber plug adapted to fit said seat, said plug having a cup-shaped chamber for the insertion of the finger, whereby the plug may be inserted in the seat or removed there-

Crain, and having a thin external flange at the top thereof, said external flange being adapted to fit the surface of



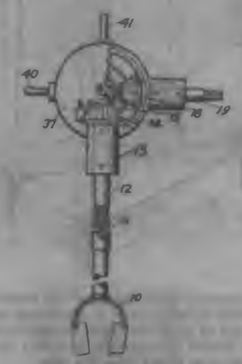
the bowl around the outlet, the top of the stopper when seated being substantially flush with the bottom of the bowl.

1,401,777. ICE-TONGS. JACOB G. HEIDT, Evansville, Ind. Filed Oct. 28, 1920. Serial No. 420,213. 2 Claims. (Cl. 287—109.)



In a device of the class described, a tilt device including spaced perforated ears, a bolt extending through the perforations of said ears and built from turning therein, a sleeve rotative on said bolt between said ears with a reduced and externally threaded portion, a member mounted on said reduced sleeve portion, and a clamping washer engaging said reduced sleeve portion between one of said tilt ears and the rotative member.

1,401,778. PLAYER-PIANO ACTION. HENRY R. HELLER, New York, N. Y., assignor to Winter & Co., a Corporation of New York. Filed Dec. 10, 1919. Serial No. 343,737. 4 Claims. (Cl. 84—63.)

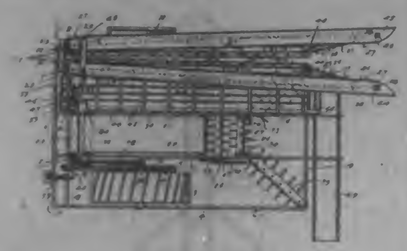


1. In combination with the piano action of a player piano, a link connecting the stickers to a fixed rail thereof, a lever pivotally connected to said link, a pneumatic and a pinpuncher operated by the said pneumatic adapted to operate said lever.

1,401,779. TURNING SHOVEL-PLOW. JACOB HAMMA, High Ridge, Mo. Filed June 19, 1920. Serial No. 389,510. 2 Claims. (Cl. 97—47.)

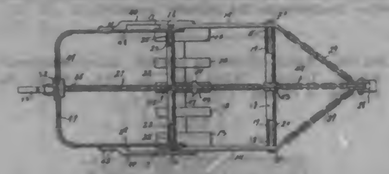
2. A plow having a beam, a plow member having a standard extending rearwardly therefrom, a bearing below the beam in which the standard is journaled, a diagonal rod extending from the beam connecting the bearing, a spindle on the standard journaled in the beam, handle bars in spaced relation rising from the beam, a toothed bar spanning said handle bars, an actuating member for the spindle to cooperate with the toothed bar, a hanger depending from the beam, a rod supported transversely of the hanger, wings for coöperation with the plow member having openings through which the rod extends, said rod having screw threads, and nuts on the rods cooperating with the interior walls of the wings to vary the position of the wings relatively to the mold board of the plow member.

1,401,780. POST-HOLE AUGER. OTTO W. HENSEL, Lakefield, Minn. Filed Sept. 30, 1920. Serial No. 413,747. 3 Claims. (Cl. 255—10.)



1. A device of the class described comprising a shaft for directly mounting an auger, a gear wheel keyed on said shaft, a double gear wheel having one series of teeth meshing with the gear wheel first named, a third gear wheel meshing with the other series of teeth on the second named gear wheel, a shaft carrier driven by the third gear wheel, a bearing inclosing said gear wheel, a driving shaft mounted on a stationary element and flexible device for imparting movement from the shaft last named to the shaft carrying the third gear wheel.

1,401,781. CORN-HARVESTER. HOWARD B. HOLMES, Montrose, Iowa. Filed Mar. 21, 1917. Serial No. 156,223. 8 Claims. (Cl. 56—106.)

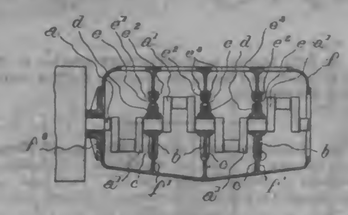


1. In a corn harvester, means for gathering prostrate stalks comprising raking elements disposed transversely

of the line of movement of the harvester, other raking elements located in advance of the first mentioned elements and disposed at angles thereto and lying at acute

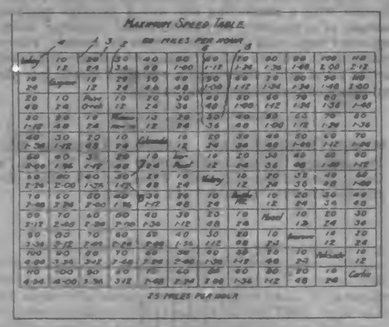
angles of the line of draft of the harvester, means for operating said raking elements, a conveyer adapted to receive the stalks from the raking elements and snapping rolls located adjacent the delivery end of the conveyer.

1,401,782. EXCAVATING-BUCKET. VILAS H. JACKSON, Cleveland, Ohio. Filed June 28, 1920. Serial No. 392,236. 7 Claims. (Cl. 37—19.)



1. In an excavating bucket, a shell, a ball embodying side arms pivotally connected with said shell at its forward end adjacent the bottom thereof, said ball being adapted to be adjustably positioned about the pivots thereof, a chain guide secured to the rear end of said shell approximately centrally thereof, a chain secured at one end to the exterior of the rear end of said shell, a cross arm connecting the side arms of said ball, said chain extending through said guide and being secured to said cross arm, and a tooth carried by each of said side arms, said teeth being out of engagement with the ground when the side arms are horizontally disposed and engaging the ground as the arms are shifted to the vertical position.

1,401,783. GRATE-BAR. AUGUST JOHNSON, Portland, Oreg. Filed Oct. 17, 1919. Serial No. 331,357. 1 Claim. (Cl. 126—107.)



A grate structure having bars spaced apart at adjacent ends and with said ends chamfered for the purpose specified, supporting means for said bars adjacent said ends having a passageway therethrough in communication with the space intermediate the ends and with the ashpit, said bars each having a recess with a substantially straight side wall and the opposite side wall deflected relatively thereto so that the recesses will be widest at the entrance, said support having a projection on each side of the passageway to enter the recesses and conforming substantially to the shape of the recesses, and said bars having lateral ribs terminating relatively close to said projections whereby ashes will not accumulate on the supporting member but will be directed through the passageway.

1,401,784. ENGINE OR MOTOR. HENRI VICTOR JULES JOUFFRET, Neuilly-sur-Seine, France, assignor to The Society "Anciens Etablissements Caffort Freres," Paris, France. Filed Dec. 15, 1919. Serial No. 345,086. 9 Claims. (Cl. 64—10.)

1. In combination a crank case, a web in said crank case having an aperture therethrough, a crank shaft, a bearing surrounding said crank shaft provided with extensions, said bearing and extensions being freely insertible within the aperture in said web, adjusting means coöperable directly with one of said extensions for forcing said extensions into clamping engagement with the periphery of the aperture in said web.

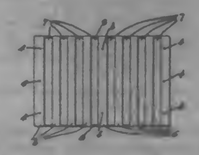
1,401,785. SPEED-TABLE. LEON L. KAISER, Lodi, Calif. Filed Feb. 15, 1921. Serial No. 445,171. 3 Claims. (Cl. 283—32.)

1. A speed table characterized by a diagonal line of spaced station names, side by side upright columns, in each of which is arranged one station name, horizontal columns intersecting the upright columns and in each of which is arranged one station name, and the indicating figures representing miles and time, respectively, arranged in the divisions accorded by the upright and horizontal columns, above and below all of the intermediate station names, and below the station name at one end of the table and above the station name at the opposite end of the table.

1,401,786. TRAILER. HENRY KAFFMANN, Boulogne-sur-Seine, France. Filed Jan. 2, 1920. Serial No. 348,099. 8 Claims. (Cl. 280—33.4.)

2. In a trailer, a frame, a shaft, means for holding the shaft approximately vertically in operative relation to the

frame to permit rotary motion of the shaft and movement axially, a traction wheel having a bearing connected to the

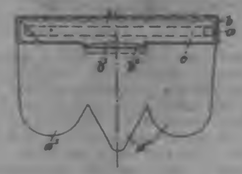


shaft, the said bearing being offset with relation to the axis of the shaft, and means for retarding the free rotary motion of the shaft.

1,401,787. JOINING-EQUALIZER FOR WOODWORKING. WILLIAM J. KARMEN, Shelbyville, Ind., assignor to Edward A. Swain, Shelbyville, Ind. Filed Apr. 16, 1920. Serial No. 374,287. 2 Claims. (Cl. 144—134.)

1. In a machine for working wood and the like, the combination with a supporting bed, and a carriage mounted thereon, of a plurality of parallelogram centering means supported upon said bed and movable in parallel planes transverse to said bed and carriage, and a single means for moving all of said parallelogram centering means into the centering position adjacent said carriage.

1,401,788. RUBBER MAT. JEREMIAH KELLEHER, Erie, Pa., assignor to Continental Rubber Works, Erie, Pa., a Corporation of Pennsylvania. Filed Jan. 29, 1921. Serial No. 439,984. 1 Claim. (Cl. 15—215.)

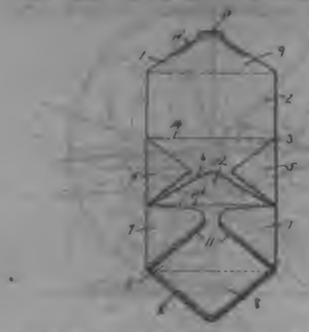


A rubber mat having ribs on its upper and lower surfaces, the ribs on the lower surface being arranged transversely to the ribs on the upper surface.

1,401,789. DUST-CLEANING SUCTION-PUMP. OTIS M. KENNEDY, Philadelphia, Pa. Filed Mar. 28, 1919. Serial No. 285,790. 5 Claims. (Cl. 230—27.)

1. A dust-cleaning suction pump of the class described, comprising in construction, a cylinder, piston and piston rod, a suction nozzle, including means to secure it to the cylinder head, said nozzle having a yieldable contact face and an axially-disposed passage leading therefrom directly to the interior of the cylinder; valvular means operable to keep said passage normally closed and to open it by the suction stroke of the piston, and dust-discharging valvular means mounted on the periphery of the cylinder, normally out of communication with the atmosphere and operable to be opened by the return stroke of the piston to discharge the cylinder contents.

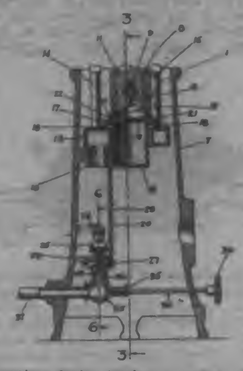
1,401,790. HEEL-GRIP FOR SHOES. DAVID KENNEDY, Belfast, Ireland. Filed Apr. 6, 1921. Serial No. 459,968. 4 Claims. (Cl. 90—24.1.)



1. A heel grip for use in shoes, comprising a backing of pliable material formed with a slit therein, a cover portion having a tongue secured in engagement with the slit and forming a casing at the top of the backing, and tensioning means in said casing.

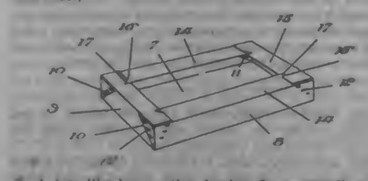
1,401,791. WATERPROOF COMPOSITION. LESTER KIRSCHBRAUN, Evanston, Ill. Filed May 9, 1921. Serial No. 468,034. 7 Claims. (Cl. 134—13.)

2. A stock capable of being felted on a paper-forming machine and consisting of a normally adhesive pitchy binder dispersed in an aqueous vehicle with an emulsifying agent and forming a non-adhesive emulsion, and fibrous pulp, mixed with the emulsion.



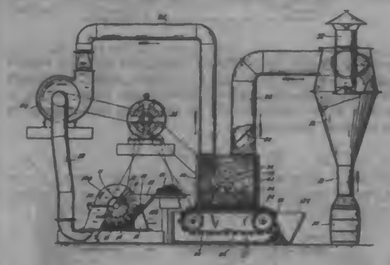
1,401,792. ENVELOP. OTTO G. KLEIS, Ste. Genevieve, Mo. Filed June 1, 1920. Serial No. 385,695. 4 Claims. (Cl. 229—73.)

3. A duplex envelop including a blank consisting of upper, intermediate and lower wall sections, said lower section being provided with flaps to constitute an inner envelop, the intermediate section being provided with side flaps foldable upon the inner envelop and inside of the outer envelop, said intermediate and lower wall sections being foldable upon the upper wall section, and a



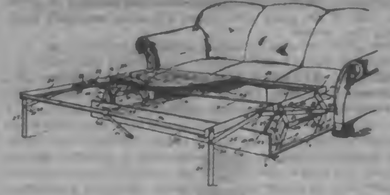
sealing flap carried by the upper wall section for sealing the outer envelop.

1,401,793. HEATING DEVICE. KARL W. KNAPP, Des Moines, Iowa, and WALTER G. HOLMES, Minneapolis, Minn., assignors to M. F. Patterson Dental Supply Company, St. Paul, Minn., a Corporation of Illinois. Filed Mar. 23, 1921. Serial No. 454,819. 11 Claims. (Cl. 263—9.)



1. A heating device having a casing, means in said casing to support an object to be heated, hollow means in said casing disposed about said object and adapted to discharge gas tangentially to said object, and means to supply a combustible gas to said hollow means.

1,401,794. BOX. SAMUEL KOFF, New York, N. Y. Filed Dec. 31, 1920. Serial No. 434,341. 3 Claims. (Cl. 229—16.)



3. A tray-like box section having flaps extending from its walls to overlap one another and overlie the contents, some of said flaps having slits extending from the edges thereof opposite to the corresponding walls and forming tabs to be snapped over the edges of the other flaps for holding the flaps in overlapping relation.

1,401,795. METHOD AND APPARATUS FOR SEPARATING RUBBER AND FIBER. CHARLES W. KOHLER and HARRY A. HOFFMAN, Akron, and WALTER B. FREEMAN, Cuyahoga Falls, Ohio, assignors to The B. F. Goodrich Company, New York, N. Y., a Corporation of New York. Filed June 23, 1920. Serial No. 391,178. 11 Claims. (Cl. 18—2.)

1. The method of separately recovering fiber and rubber from a disintegrated mixture of the two which comprises propelling the mixture on an air current, selectively separating the rubber from the mixture and then separating the fiber from the air current.

1,401,796. FOLDABLE BED. OTTO KONRAD, Oshkosh, Wis. Filed Apr. 3, 1920. Serial No. 370,954. 5 Claims. (Cl. 5—51.)

1. A device of the class described, comprising a supporting member, a sectional connected together bed frame, means connecting each end of one frame section with said supporting member and including pairs of pivotally connected together link members having their outer ends pivotally connected with the adjacent sides of said frame section and said supporting member, an operating rod mounted at each side of the frame and having one end connected with the connecting pivot of one pair of link members and its other end slidably connected with the adjacent side of the other frame section, a supporting leg for each side of said other section and having its upper end pivotally secured to the adjacent side thereof, and means connecting each supporting leg and with the adjacent operating rod, said means being connected with each rod at its slidably mounted end and with each supporting leg at a point spaced from its pivotal connection with the other frame section.

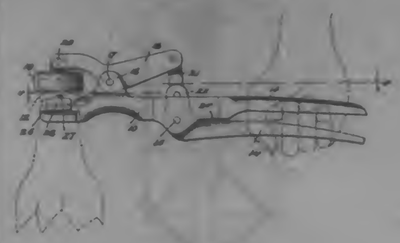
1,401,797. MOTOR-CAR. ACHILLE LANDINI, Cameri, Italy. Filed May 29, 1919. Serial No. 300,566. 5 Claims. (Cl. 180—1.)

5. In a motor car a frame consisting of two longitudinal beams underhung in respect of the axles and supported

assembly at substantially right angles to each other and of which one is pivoted to the upward free extremity of the former and the other to an upright erected on said former, of cross bars interconnecting said longitudinal bars and projecting laterally therefrom to support the side steps, and

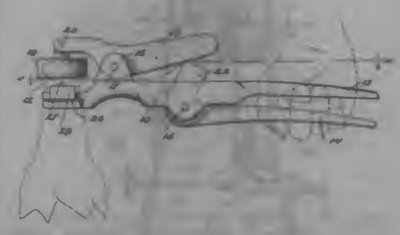
the motor on the former and a chain, and sprocket wheels to drive the rear axle and of a sheet metal mudguard surrounding all the sprockets between the inner edges of the side steps, substantially as described and shown, in the annexed drawings.

1,401,799. RAILWAY-SWITCH HEATER. WILLIAM T. LAWLOR, Jersey City, N. J. Filed Mar. 31, 1921. Serial No. 457,231. 5 Claims. (Cl. 246—428.)



1. In a heating device for railway switches, the combination with a system of pipes, a reservoir from which said pipes are adapted to convey fluid fuel, and a plurality of open topped pans located beneath the rails and communicating with the pipes, of covers adapted to cover the tops of the pans, and means for simultaneously operating the covers.

1,401,799. SPARK-PLUG. JAMES JOHN LESTER, Jr., Green Bay, Wis. Filed Aug. 20, 1920. Serial No. 404,876. 2 Claims. (Cl. 123—169.)

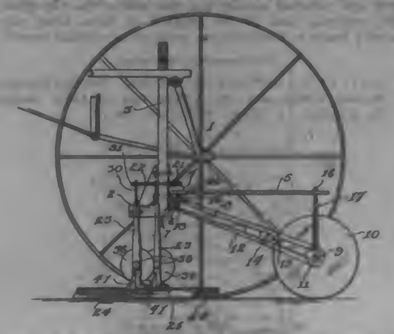


1. In a spark plug including a conductor rod having an electrode formed with a segmental face curved longitudinally of the axis of the rod, and a curved electrode spaced uniformly from the segmental electrode with its inner face curved reversely to the curvature of the longitudinally curved face of the segmental electrode, whereby the arc is diffused downwardly in the direction of the fuel charge.

1,401,800. BOTTLE-CAPPING DEVICE. ELLSWORTH M. LETTS, Waverly, N. Y., assignor of forty-nine one-hundredths to Charles C. Annabel, Waverly, N. Y. Filed Aug. 7, 1920. Serial No. 402,009. 18 Claims. (Cl. 226—84.)

1. A bottle capping device including in combination, a member adapted to straddle the neck of the bottle below the shoulder thereon, a lever pivoted intermediate its ends on one side of said member and having a cap applying cup at one end thereof, actuating means hinged to said member on the side opposite to the cup carrying lever.

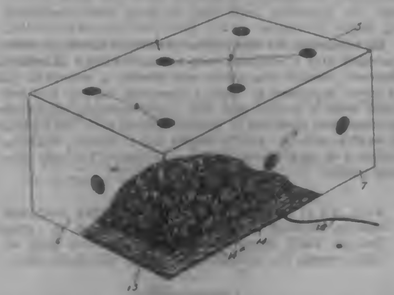
1,401,801. BOTTLE-CAPPING DEVICE. ELLSWORTH M. LETTS, Waverly, N. Y., assignor of forty-nine one-hundredths to Charles C. Annabel, Waverly, N. Y. Filed Aug. 18, 1920. Serial No. 404,335. 5 Claims. (Cl. 226—84.)



1. A bottle cap applying tool including in combination, a member adapted to receive a bottle and hold it against movement when the cap is applied, said member having a hand grip portion, a lever pivoted intermediate its ends on the upper side of said member and having a cap applying cup hinged at one end, a second lever pivoted to said member in a transverse plane through but near the end of said first mentioned lever with a part projecting from the pivot to and making sliding contact with said first mentioned lever to swing the same and a handle part extending from the pivot along and in the longitudinal plane of said hand grip whereby said hand grip and handle part may be grasped in the hand to operate the tool

---

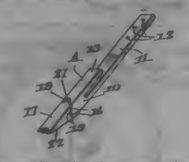
1,401,802. ATTACHMENT FOR CULTIVATORS. ELMER E. LILES, Ulen, Minn. Filed Aug. 3, 1920. Serial No. 402,111. 3 Claims. (Cl. 55—64.)



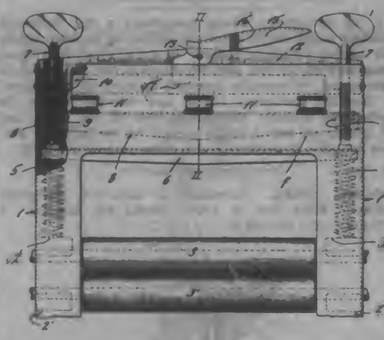
1. The combination with a cultivator frame, of a post secured thereon, a cultivator blade carried by the lower end of said post, a rotary cutter mounted on said post

adjacent and above the blade, deflecting plates secured to the post to divert vines from the blade to the cutter,

and means supported on the cultivator frame for positively actuating said cutter.



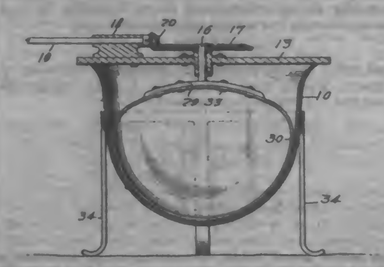
1,401,803. FIRE-KINDLING DEVICE. FRED LYNDS, Johnstown, N. Y. Filed Aug. 6, 1920. Serial No. 401,668. 1 Claim. (Cl. 44—40.)



A fire kindler comprising a receptacle formed of inflammable material, a packing for said receptacle, said packing consisting of materials of different character, one of which is of highly inflammable nature, a wrapper for inclosing said highly inflammable material, the other material comprising charcoal loosely packed within the first-mentioned receptacle, and a fuse for igniting the highly inflammable material, said highly inflammable material serving to subsequently light the charcoal, substantially as described.

1,401,804. DIPPER TOOTH DESIGNED FOR USE ON SHOVELS. SHOW FREEMAN MACDOUGALD AND EDWARD ERNEST BOHAN, Cap Tourmente, Quebec, Canada. Filed June 1, 1920. Serial No. 385,718. 1 Claim. (Cl. 37—56.)

A dipper tooth comprising a body portion formed with upper and lower walls tapering to a point and having a central recess therein, U-shaped dovetail recesses on the upper and lower faces of said body portion, a shank for the body portion having orifices therein, an arm partially extending, parallel with and spaced from said body portion to receive the edge of the dipper between said arm and said shank, a tooth having a removable point and provided with a pair of dovetailed lugs adapted to fit the dovetail recess in the faces of the body portion, V-shaped recesses in the side walls of the tooth-point to engage with the tapered edges of the upper and lower walls of the body portion, a center web intermediate of the said V-shaped recesses in the tooth point adapted to engage the central recesses in the body portion, securing means passing through the tooth point lugs and through the body portion.



1,401,805. CLOTHES-WRINGER. WILLIAM H. MEYER, St. Louis, Mo., assignor, by mesne assignments, to The Davis Sewing Machine Company, a Corporation of Delaware. Filed Feb. 7, 1920. Serial No. 357,052. 6 Claims. (Cl. 68—32.)

1. In a wringer, a frame, a pair of wringer rolls, yielding means for forcing one of said rolls toward the other, a movable thrust-receiving member mounted in said frame and subjected to the pressure of said yielding means, and a breakable bridge extending across said frame and cooperating with said movable thrust-receiving member to retain said yielding means under pressure, said breakable bridge including a pair of wings, a pressure releasing device spanning the inner margins of said wings and pivots connecting the outer margins of said wings to said frame, the axes of said pivots being approximately parallel with the axes of said wringer rolls.

1,401,806. STIRRING DEVICE FOR CALDRONS. FREDERICK MILHAMN, Dwight, Ill. Filed May 12, 1921. Serial No. 469,026. 2 Claims. (Cl. 259—107.)

1. A hoop-shaped scraper composed of yielding material adapted to conform and hold itself in direct contact with

a container having a curvilinear bottom, and means to vary the circumferential extent of the scraper to adapt it to bottoms of different radii.

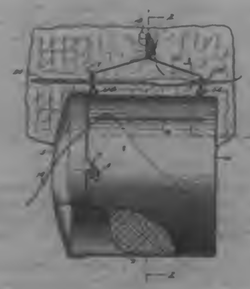
1,401,807. ADVERTISING-SIGN FIGURE. William B. Mitchell, Montgomery, Ala. Filed Sept. 28, 1921. Serial No. 503,857. 4 Claims. (Cl. 40—126.)

2. An advertising device comprising a flat vertically arranged sheet cut to form the outline of desired figures and having openings therein to form eyes, said sheet being painted on one side to simulate the figures to be represented, of movable members secured to said sheet, an inverted stationary bottle, and common means for moving the movable elements carried by the sheet, and for forcing air into a liquid carried by the bottle to produce bubbling therein, as and for the purpose set forth.

1,401,808. HEEL. Napoleon A. Mushels, Haverhill, Mass. Filed Nov. 8, 1920. Serial No. 422,606. 1 Claim. (Cl. 36—34.)

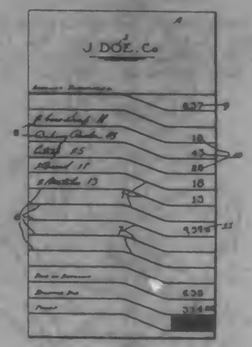
As an article of manufacture, a heel provided with a centrally disposed vertical bore extending therethrough, being uniform in diameter and provided at its opposite ends with counterbores, the bottoms of which are formed with beads, and a tubular reinforcing pin fitting snugly in said bore and having rolled anchoring and retaining flanges formed at its opposite ends and coöperative with the beads in said counterbores, said flanges having the additional function of compressing the fibers of the heel between them to decidedly reinforce the heel, said pin being provided with a longitudinal exteriorly disposed anchoring rib of considerable length embedded in said heel and serving the several functions described.

1,401,809. POCKET PENCIL-HOLDER. Edward J. Morin, Wynot, Nebr. Filed Mar. 1, 1921. Serial No. 448,804. 1 Claim. (Cl. 24—11.)



A pocket pencil holder comprising a clip including a plate having slits adjacent its opposite edge portions and having spring retainers forming a part thereof, and a resilient member comprising a flexed or crimped plate and having terminal extensions to pass through the said slits and clinched against the rear side of the clip plate, the resulting ends of the crimped or flexed being outwardly flared to facilitate the entrance of articles therein.

1,401,810. AUTOMATIC FILTER. George Ernest Morris, Hackensack, N. J. Filed July 14, 1919. Serial No. 310,544. 1 Claim. (Cl. 210—158.)



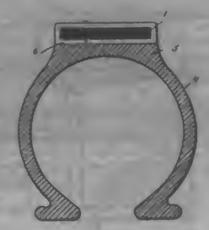
An apparatus for the purpose described having a retort provided with a regulable drip nozzle, a filtrate receptacle disposed beneath the retort and having a removable lid or cover depressed to form a concaved surface and provided with a central seat and communicating extensions forming inlet openings in communication with the interior of said receptacle, and a funnel for a filtering material mounted in said seat in position to receive the drip from said nozzle.

1,401,811. THREAD AND IMPLEMENT HOLDER. George Michael Myers, Jr. Charleston, S. C. Filed Dec. 16, 1919, Serial No. 345,591. Renewed July 15, 1921. Serial No. 485,807. 9 Claims. (Cl. 223—56.)

1. An appliance of the character specified, comprising a thread container provided in a side with a thread opening, a cover removably fitted to one end of the container, and a suspending fastener attached to the container and provided with a centrally disposed suspending clasp and terminal eyes and clamps, the eyes serving as the connecting means between the ball and container and the clamps as holding means for a crochet needle.

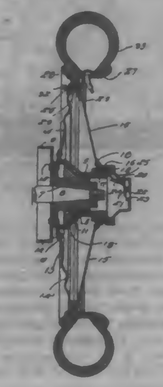
1,401,812. SALES-SLIP. Raymond P. Packard, Tacoma, Wash. Filed Mar. 3, 1921. Serial No. 449,283. 3 Claims. (Cl. 283—60.)

1. A sales slip ruled to provide a plurality of parallel staggered lines, each of said lines including an offset portion whereon the price of an article is listed and another portion whereon the price of said article is copied by a machine.



1,401,813. TOY SPINNING-TOP. Joseph Popper, Brooklyn, N. Y., assignor, by direct and mesne assignments, of one-half to Baird-Daniels Co., Inc., New York, N. Y., a Corporation of New York, and one-half to Ruby H. Popper, Brooklyn, N. Y. Filed Oct. 19, 1920. Serial No. 417,955. 5 Claims. (Cl. 46—52.)

1. A toy spinning top comprising a body, a hollow support connected with said body provided with a supporting point, a handle provided with an extension engaging said support, said handle having an aperture adjacent the top and adjacent the bottom, a shaft loosely positioned in said apertures and a plate rigidly secured to said shaft applied with a configuration thereon whereby when the top is spinning the plate and shaft will be rotated through the action of friction and the various parts of said plate will be spun around at a speed slower than the handle.

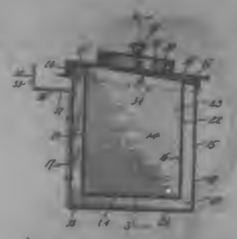


1,401,814. PNEUMATIC TIRE. Leonard R. Poschadel, Milwaukee, Wis. Filed Feb. 23, 1916. Serial No. 80,054. 5 Claims. (Cl. 152—16.)

1. A tread member for pneumatic tires comprising a core consisting of a plurality of flexible metal strands arranged in parallel abutting relation, and a casing for the core consisting of a wire having a high degree of

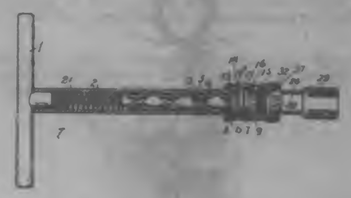
elasticity and coiled transversely about the core with its convolutions in contact with each other and with the core.

1,401,815. DEMOUNTABLE AUTOMOBILE-WHEEL. George E. Powell, Chicago, Ill. Filed Dec. 17, 1919. Serial No. 345,473. 6 Claims. (Cl. 301—63.)



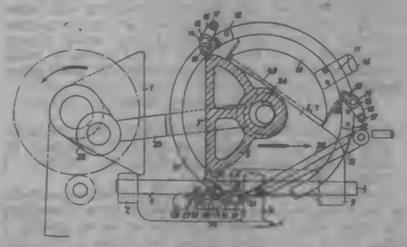
1. A device of the class described having a hub section provided with a bearing portion, a second bearing portion, a conical portion connecting said portions, a wheel, a hub for the wheel having a conical portion and bearing portions, interengaging means on the conical portions, one of the bearing portions having external screw threads, a collar associated with the wheel engaging said screw threads, one of the bearing portions of the hub section projecting beyond the hub and having screw threads thereat, and a nut to abut the collar having a flange provided with screw threads to engage the latter screw threads.

1,401,816. WINDOW PROVISION-BOX. Max Rachlin, New York, N. Y., assignor of one-half to Samuel M. Gold. Filed Apr. 26, 1920. Serial No. 376,814. 1 Claim. (Cl. 45—104.)



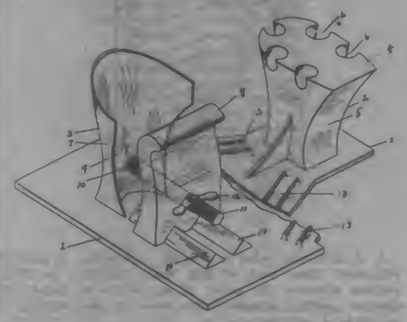
A window provision-safe, comprising an outer receptacle, an inner receptacle spaced therefrom, a frame connecting the upper edges of said receptacles so as to provide a single closed space therebetween, said frame serving also to space said receptacles, a lid hinged to one of the upper edges of said outer receptacle, and downwardly projecting flanges on the free edges of said lid overhanging the walls

of said outer receptacle, the upward edge of said lid projecting beyond said receptacle and being adapted to abut



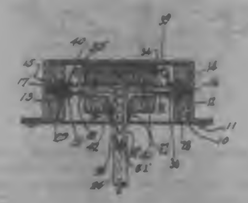
against the respective wall of said outer receptacle when said lid is in open position, the baffles and certain walls of said outer receptacle being provided with apertures.

1,401,817. WRENCH. OREN F. ROBERTS, Kansas City, Mo., assignor to Frederick B. Cassaire, Chanute, Kans. Filed May 26, 1920. Serial No. 384,283. 2 Claims. (Cl. 81—60.)



2. In a wrench, a shank handle, a screw reciprocative therein having two reversely disposed threads, two ratchet members respectively fitted to said threads and rotatable on said screw, the shank handle having a longitudinal slot, and a pawl slidably fitted in said slot to two positions in which it will alternately lockingly engage said ratchet members, and in an intermediate position simultaneously lockingly engage both of said ratchet members, substantially as set forth.

1,401,818. PLATEN-PRESS. MAX ROCKSTROH, Klein-Sedlitz, near Pirna, Germany. Filed Oct. 12, 1920. Serial No. 416,584. 8 Claims. (Cl. 101—287.)

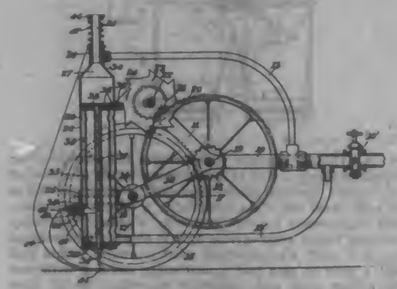


2. In a platen press, the combination with a platen, means for rectilinearly actuating said platen, a drum rotatable about said platen comprising spaced rings connected by transverse rods, grippers mounted upon said drum and cooperating means on said platen and drum for rotating said drum through the motion of said platen.

1,401,819. DEVICE FOR USE IN ATTACHING HEELS TO SHOES. SAMUEL G. SHARMAN, New York, N. Y. Filed Dec. 22, 1919, Serial No. 346,641. Renewed May 14, 1921. Serial No. 469,481. 2 Claims. (Cl. 12—125.)

1. In a device of the character described in combination, a supporting base, an upstanding metal block thereon having an end to fit in an inverted shoe and having upward recesses around its upper edge to receive nails penetrating said shoe, and an upstanding adjustable clamp on said base to receive a shoe heel.

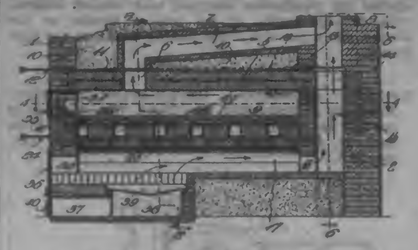
1,401,820. PORTABLE ELECTRIC LAMP. LAURA E. SILLS, St. Paul, Minn. Filed Nov 16, 1920. Serial No. 424,415. 3 Claims. (Cl. 240—70.)



1. A portable electric element, comprising in combination, a receptacle containing a pair of electrical conductors insulated therefrom and in substantially parallel arrangement therein, said receptacle having an upwardly extending slot in its side and having a doorway at one end connecting with said slot and a movable electrical device having a pair of brush contacts, said device being adapted to pass through said doorway into said slot and being slidably supported in said receptable through said slot, said brush contacts being adapted to slidably and separably connect with said conductors.

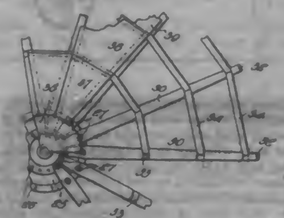
1,401,821. PERFORATING DEVICE. HARRY A. SILVERMAN, New York, N. Y. Filed May 21, 1920. Serial No. 383,108. 8 Claims. (Cl. 164—125.)

1. A perforating apparatus comprising a revoluble member having a serrated edge, and a frame including a yoke and bearings on which the revoluble member is journaled and through which yoke and the said bearings gas is supplied to heat the revoluble member.



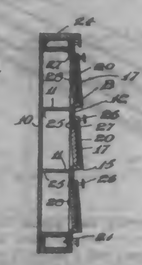
1,401,822. PERFORATING APPARATUS. HARRY A. SILVERMAN, New York, N. Y. Filed July 10, 1920. Serial 395,321. 5 Claims. (Cl. 164—89.5.)

1. A perforating apparatus comprising a frame, a traction wheel mounted therein, a heater element movably mounted in the frame, a perforating iron in the heater element, and means actuated from the traction wheel for moving the said heater element and perforating iron in said frame.



1,401,823. BAKER'S OVEN. GEORGE F. SMITH, Baltimore, Md. Filed Apr. 11, 1921. Serial No. 460,196. 3 Claims. (Cl. 107—55.)

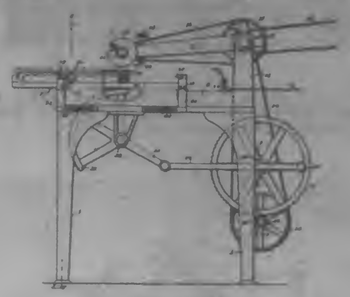
1. A bake oven having a combustion chamber and a baking chamber above the same, the rear wall of the oven being provided with a smoke flue leading from the combustion chamber and communicating with a chimney and upon opposite sides of the smoke flue provided with flues leading from the combustion chamber and communicating with the baking chamber, the portions of the rear wall between the second mentioned flues and baking chamber being provided with air pockets forming spaced apart wall sections, a conduit leading from an opening adjacent



the forward end of the roof of the baking chamber and communicating with the chimney, and separate damper elements for the flues and conduit.

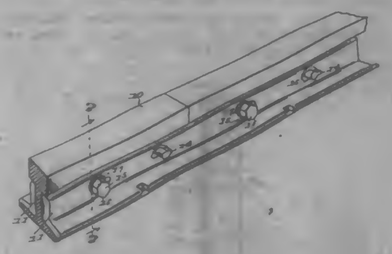
1,401,824. ROTARY OVEN. GEORGE F. SMITH, Baltimore, Md. Filed Apr. 11, 1921. Serial No. 460,197. 3 Claims. (Cl. 107—60.)

1. A turn-table for a baker's oven, said table comprising a rotatable shaft, a hub element carried thereby, radiating arms carried by the hub, said arms being provided in their upper faces with transversely extending V-shaped grooves forming countersunk seats, cross bars extending between the arms and having their ends fitting into the seats and meeting in end to end contact, and a top resting upon the arms and cross bars.



1,401,825. TOBACCO-DISPLAY CASE. FREDERICK JAMES SQUIRE, Havelock, Ontario, Canada. Filed Feb. 12, 1921. Serial No. 444,398. 1 Claim. (Cl. 211—7.)

A plug tobacco display device, comprising a casing having a plurality of shelves, the front wall on the casing being formed with longitudinal openings, frame doors hinged to the front wall adjacent the openings and designed to close the same, intermediate members in the doors, transparent members engaging the rear face of the

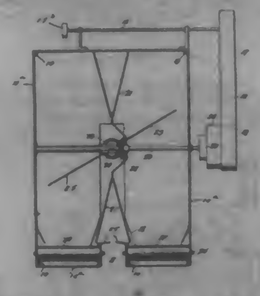


door frames and the intermediate members, a board removably disposed in the frame and designed to retain against the transparent members, cuts, colored illustrations or photographs of the tobacco located on the shelves, and a pin and socket locking means on the door frames.

1,401,826. AUTOMATIC DUPLICATING MACHINE. THOMAS A. STOCKWELL, Eau Claire, Wis., assignor of one-half to Arthur L. Ferst, Eau Claire, Wis. Filed Sept. 11, 1920. Serial No. 409,784. 7 Claims. (Cl. 90—13.5.)

1. An automatic duplicating machine, including a base, a table slidable within said base, a rack secured to said table, a sector gear engaging said rack, means for rocking said sector gear whereby to reciprocate said table, a deck secured to said table, a screw threaded rod rotatably mounted upon said table, means providing engagement between the deck of said table and said rod, a pair of stops secured to said base, a ratchet carried by said rod, a pawl carried by each of said stops and adapted to engage said ratchet when said table is reciprocated, whereby said rod will be rotated to move the deck of the table, and a cutter and tracing member adapted to overlie said deck.

1,401,827. RAIL-JOINT. SAMUEL F. STILLWELL, Grafton, W. Va. Filed Oct. 3, 1921. Serial No. 505,099. 2 Claims. (Cl. 238—251.)

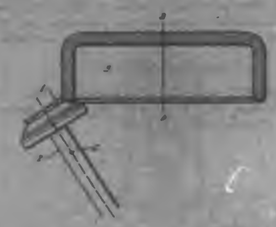


2. A rail joint having fish plates connected through the rail by a transverse bolt provided at its extremities respectively with a head and a laterally projecting web or wing, a spring washer interposed between the head of the bolt and the outer surface of the adjacent fish plate, the other fish plate being provided with a progressively deflected face for engagement by the inner edge of the web or wing, the said deflected face terminating in a seat of V-form and the engaging edge of the web being of corresponding form.

1,401,828. WRENCH FOR BATTERY TERMINALS. WALTER E. SWEARINGEN, Montgomery City, Mo. Filed Apr. 26, 1921. Serial No. 464,851. 4 Claims. (Cl. 81—61.)

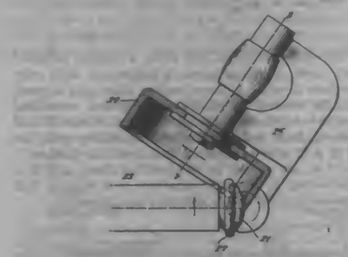
1. A tool for the purpose described having a holding ring provided with a perpendicularly disposed anchoring arm for engagement with a battery terminal block, a socket jaw and an operating ring revolubly mounted upon the holding ring and respectively carrying a ratchet and a dog for engagement therewith, an operating handle being connected with said operating ring.

1,401,829. BEAN-HARVESTER. HERMAN H. SWINDELL, Raleigh, N. C. Filed July 8, 1919. Serial No. 308,230. 2 Claims. (Cl. 56—10.)



1. In a bean harvester comprising a body adapted for propulsion along a field in straddling relation to a row of bean plants, beating mechanism for knocking the beans and pods from the vines comprising a driven shaft journaled transversely through said body, a pair of oppositely extending beater arms carried by said shaft, a gear secured upon said shaft, a longitudinal shaft journaled within said body, a gear on said last named shaft meshing with said first named gear, and oppositely extending beater arms carried by said second named shaft, said first named beater arms rotating in a vertical plane longitudinally of the bean rows and said second named beater arms rotating in a vertical plane transversely of the bean rows, and said pairs of beater arms being timed for non-interference.

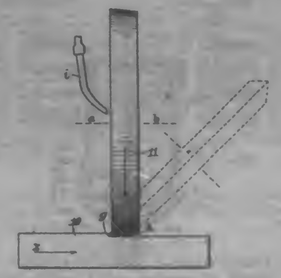
1,401,830. METHOD OF GRINDING GLASS. WILLIAM TAYLOR, Leicester, England. Original application filed Oct. 28, 1916, Serial No. 128,235. Divided and this application filed Oct. 28, 1920. Serial No. 426,078. 2 Claims. (Cl. 51—278.)



1. The method of grinding a convex spherically curved surface upon a flat disk of glass, which comprises rotating the disk upon an axis passing through the surface to be ground, forming in the surface to be ground a circular step having its center on the axis of rotation of the disk, grinding back said step to said axis by bringing successive portions of the side of the step into contact with a grinding

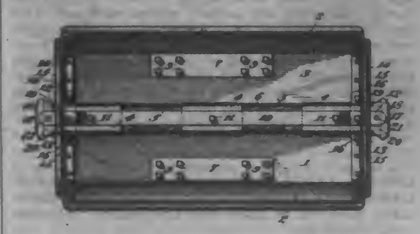
surface moving along the portion of the side of the step with which it is in contact, and decreasing the depth of the step as it is ground inwardly while varying the angle of the

side of said step to the original surface of the disk so that it is acute at the beginning of the operation and substantially a right angle at the end of the operation.



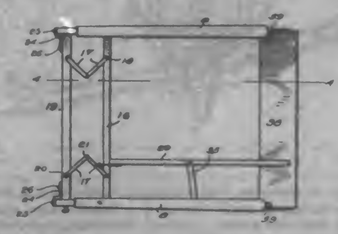
1,401,831. METHOD OF AND APPARATUS FOR GRINDING GLASS. WILLIAM TAYLOR, Leicester, England. Original application filed Oct. 28, 1916, Serial No. 128,235. Divided and this application filed Oct. 28, 1920. Serial No. 426,077. 4 Claims. (Cl. 51—278.)

1. The method of grinding curved surfaces of glass and the like hard non-plastic materials, which comprises rotating the glass to be ground upon an axis passing through the surface to be ground, applying the annular edge of a rapidly rotating grinding wheel to the surface to be ground, the grinding wheel being set with its axis of rotation to one side of a plane parallel thereto and containing the axis of rotation of the glass, the axis of rotation of the grinding wheel being at an acute angle with the axis of rotation of the glass, and the grinding edge of the wheel passing approximately through the axis of rotation of the glass as it sweeps over the surface thereof, the annular edge of the grinding wheel being shaped to form an abrupt step between the ground surface and the original surface of the glass on one side of the axis of rotation of the latter and to contact with the ground surface adjacent the step only at the base of the step, the rate of rotation of the glass being such that a substantial portion of the material removed is removed by splintering the side of the step.



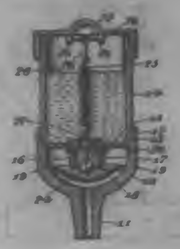
1,401,832. METHOD OF GRINDING GLASS. WILLIAM TAYLOR, Leicester, England. Filed Oct. 28, 1916, Serial No. 128,235. Renewed June 13, 1921. Serial No. 477,848. 4 Claims. (Cl. 51—278.)

1. The method of grinding glass and like hard, nonplastic materials, which comprises applying to the material the edge of a rapidly rotating abrasive wheel, and so setting and so traversing said wheel relative to the original surface of the material that a step in said surface with its side at an angle not exceeding 110° to such surface is formed and ground continuously backward, the depth of



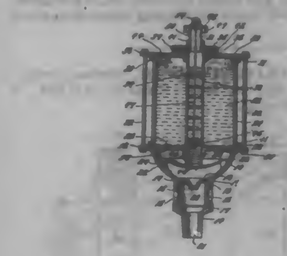
the step and the rate of traversing being such that a substantial proportion of the glass removed is removed by splintering the side of the step.

1,401,833. CAR. GEORGE E. THACKRAY, Westmont borough, Pa. Filed Aug. 15, 1921. Serial No. 492,337. 7 Claims. (Cl. 105—364.)



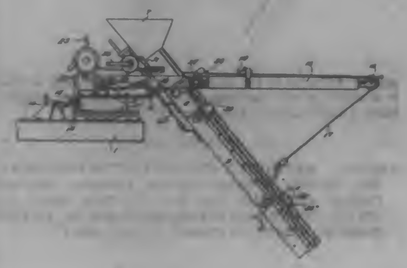
1. A metal car body, portions of the bottom of which are pressed downwardly and others upwardly to form shallow troughs and a wooden center sill inserted therebetween and secured thereto.

1,401,834. HIGH CHAIR. ANTHONY M. TRETTER, Covington, Ky. Filed July 26, 1921. Serial No. 487,696. 3 Claims. (Cl. 155—115.)



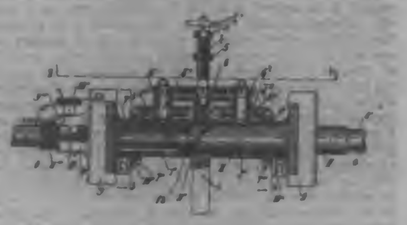
1. A highchair comprising rear legs, a crossbar connected to said rear legs, a back, pairs of links pivoted to said crossbar and said back, the links of each pair being pivotally connected, whereby the back may move with relation to said crossbar, and a side member having means engaging said back whereby to hold the back and the side member in position.

1,401,820. LUBRICATOR. ALLEN A. VAN OSDALE, Philadelphia, Pa., assignor to Celestin Sauer, Philadelphia, Pa. Filed Oct. 22, 1919. Serial No. 331,513. 8 Claims. (Cl. 184—103.)



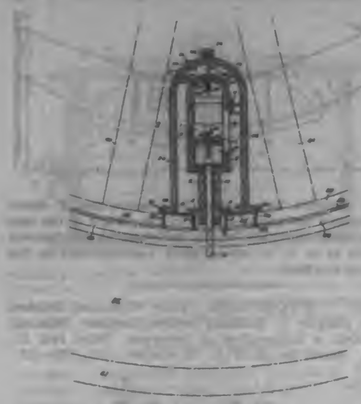
4. A vibratory-feed lubricator comprising a reservoir having a threaded outlet therefrom, a supplemental chamber frictionally fitted on the lower end of the lubricant reservoir and having a dished basal portion, a dished diaphragm seated in said basal portion by diametrically opposed tongues forming peripheral apertures for the passage of the lubricant, an adjustable extension threaded into the reservoir outlet and having a conical valve seat in its upper end, a cover for threaded engagement on the lubricant reservoir and having spaced legs depending therefrom, a cross bar supported by said legs, and a contractile spring depending from said cross bar and having an adjustable ball valve at the free end thereof, said contractile spring being adapted to hold the ball valve firmly closed on its seat when the threaded cover is removed.

1,401,836. LUBRICATOR. ALLEN A. VAN OSDALE, Philadelphia, Pa., assignor to Celestin Sauer, Philadelphia, Pa. Filed Dec. 13, 1920. Serial No. 431,631. 8 Claims. (Cl. 184—103.)



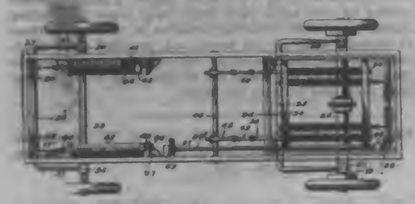
7. In a vibratory feed lubricator comprising a basal portion having an outlet therefrom, a funnel shaped nipple seated over said outlet, a dished diaphragm mounted in spaced relation within said basal portion, a lubricant reservoir mounted on and adapted for clamping engagement thereto, a perforate tube axially longitudinal of the reservoir and having threaded connection in its lower end and means for manipulating said perforate tube whereby its lower end may be moved toward or away from the dished diaphragm, the combination of a cap for seating on the reservoir said cap having an inner concentric apertured tubular part for telescopic engagement on the upper end of the aforesaid perforate tube, and a valve stem axially depending from said cap, provided with an upwardly seating valve at its free end, said valve and apertured tubular part being adapted when extended relative to the perforate tube to close communication between the reservoir and dished diaphragm and open said reservoir for filling purposes.

1,401,837. HOPPER AND DISCHARGE CHUTE. FRANK P. VOOT, Chicago, Ill. Filed Feb. 28, 1921. Serial No. 448,301. 8 Claims. (Cl. 198—40.)



1. In a conveying device, a sole plate, a hopper mounted on said sole plate to swing about a horizontal axis, telescoping sections forming a chute leading from said hopper, an arm rigidly secured to said sole plate and extending outwardly above said chute, a cable secured to one of said sections spaced from said hopper and extending over the outer end of said arm to a point adjacent said hopper, a cable secured to one of said sections spaced from said hopper and extending to a point adjacent said hopper, and winding drums for said cables adjacent said hopper.

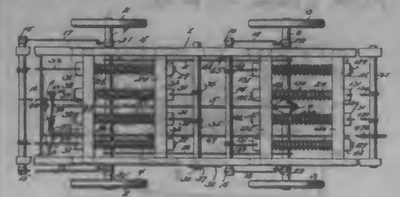
1,401,838. DYNAMIC BALANCING-MACHINE. RENÉ ALFRED LAURENT VERET, Paris, France. Filed Oct. 18, 1919. Serial No. 330,518. 7 Claims. (Cl. 73—61.)



1. An adjustable balancing means comprising in combination, a frame, a shaft rotatably mounted in said frame, a body adapted to rotate with said shaft, a mass movable radially on said body, means for actuating said mass including gearing rotatable as a unit with said body, and a pair of brake elements each movable into engagement with some of said gears whereby the actuation of one of said brake elements causes said mass to move radially in one direction and the actuation of the other brake element causes the reverse movements thereof.

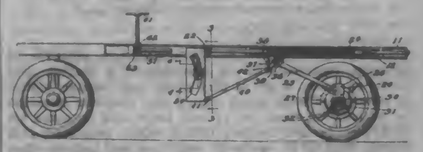
1,401,839. AUTOMOBILE-THEFT-PROTECTION DEVICE. JOHN A. WANN, Wilkes-Barre, Pa. Filed July 1, 1919. Serial No. 307,909. 9 Claims. (Cl. 116—33.)

1. The combination with a pneumatic tired wheel, of a theft protection device comprising a support structure attached to said wheel, and a member adapted to reciprocate in said support as the wheel revolves and to deliver a blow to the inner tube of said tire at each reciprocation.



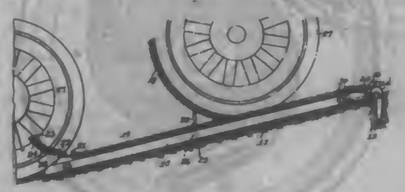
1,401,840. SPRING-SUSPENSION MECHANISM FOR VEHICLES. ELMUS E. WEAVER, Boise, Idaho, assignor to Weaver Spring Company, Boise, Idaho, a Corporation of Idaho. Filed Apr. 6, 1920. Serial No. 371,646. 17 Claims. (Cl. 267—12.)

4. A spring suspension for vehicles comprising rods adapted to be connected to one of the axles of a vehicle near the opposite ends thereof and mounted to swing in an arc in consequence of relative vertical movements between the vehicle body and the axle, a sleeve embracing portions of said rods, separate connections between said rods and sleeve, spring means, and means interposed between said spring means and sleeve including levers rigidly connected in spaced relation in such manner that the swinging movements induced by one of said rods are uniformly resisted by said spring means.



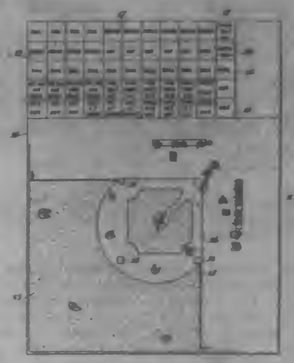
1,401,841. SPRING SUSPENSION FOR VEHICLES. ELMUS E. WEAVER, Boise, Idaho, assignor to Weaver Spring Company, Boise, Idaho, a Corporation of Idaho. Filed July 18, 1919, Serial No. 311,750. Renewed Sept. 13, 1921. Serial No. 500,437. 16 Claims. (Cl. 267—12.)

2. A vehicle spring suspension comprising a rotatable shaft adapted to be mounted in a vehicle frame, a pair of bars connected to said shaft to swing about the same in arcs, the free ends of said bars adapted to be connected to an axle, a pair of relatively movable draw bars, one of



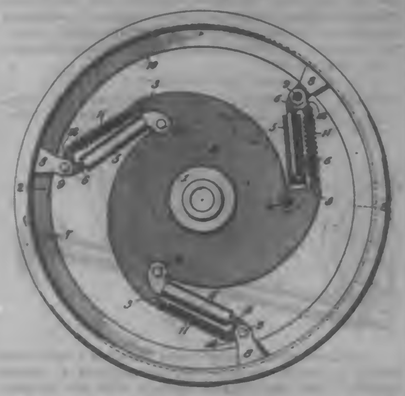
which is connected to said shaft, means for exerting a pull upon the other draw bar, and springs interposed between the draw bars.

1,401,842. SPRING-TENSIONING MECHANISM. ELMUS E. WEAVER, Boise, Idaho, assignor to Weaver Spring Company, Boise, Idaho, a Corporation of Idaho. Filed Apr. 6, 1920, Serial No. 371,647. Renewed Sept. 13, 1921. Serial No. 500,438. 10 Claims. (Cl. 267—12.)



3. A tensioning device for the spring supporting means of a vehicle, comprising the combination with the spring means, of a plate having an arcuate slot, gear teeth on one face of said slot, a gear meshing with said gear teeth, a rod connected with the spring means and plate, an oscillatory arm, means tending to rotate said oscillatory arm in one direction in opposition to the spring means, a link pivotally secured to said plate and said arm, and mechanism for rotating said gear whereby said plate pivots about said gear for adjusting the tension of the spring means and changing the angular relation of said plate relative to said rod and link.

1,401,843. ACCESSORY FOR MOTOR-TRUCKS. CONRAD S. WEIMAR, Elizabeth, N. J. Filed Feb. 21, 1921. Serial No. 446,078. 3 Claims. (Cl. 180—7.)

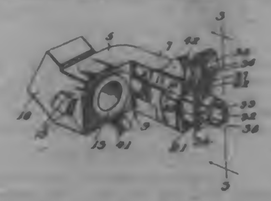


1. An accessory for motor trucks including a skid board having a central aperture therethrough and a pivoted member at one end adapted to coact with the tail-gate for associating said end therewith when used as a loading or unloading means, said member being shiftable to operate as an anchor for anchoring the skid board to the ground to constitute a ramp when employed as an extricating means and a chain having means at its opposite extremities adapted to couple the drive wheel of the truck with the anchored end of the board for pulling the wheel over the board when power is applied to the drive wheel, and a pin carried centrally thereof for engagement within the aperture to retain the chain against lateral displacement.

1,401,844. GAME DEVICE. FREDERICK C. WESTPHAL, New Brunswick, N. J. Filed Sept. 28, 1920. Serial No. 412,424. 2 Claims. (Cl. 46—63.)

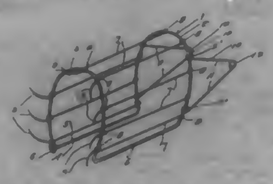
1. In a game device as characterized, a plurality of elements representative of base-runners, a playing field including bases, a set of fifty cards each bearing indicia in accordance with which one of said elements is placed on or removed from one of said bases, and an extra set of five cards each bearing indicia which construed with certain indicia of cards of said first set indicate that one of said elements should be placed on or should be removed from one of said bases.

1,401,845. VEHICLE-WHEEL. RALPH S. WILCOX, Youngstown, Ohio. Filed Oct. 21, 1920. Serial No. 418,488. 3 Claims. (Cl. 152—28.)



1. A vehicle wheel, comprising a floating or detached hub having a central radial flange member provided with a plurality of circumferentially disposed shoulders in substantially radial alinement to the hub, a tubular guide-bar swingingly mounted adjacent each of said shoulders, an outer rim having a plurality of stems swingingly secured to the inner surface thereof and telescopically engaging said tubular guide-bars, and a contracting coil spring disposed substantially parallel with said guide-bar, one end of said spring being attached to the head of said stem and the other end to the shoulder of said flange.

1,401,846. CAMPER'S BED. RUSSELL WILES, Riverside, Ill. Filed May 7, 1918. Serial No. 233,447. 5 Claims. (Cl. 5—19.)

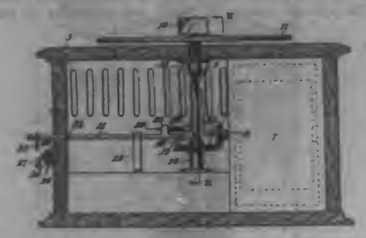


3. A camper's bed having, in combination, a fabric web arranged and adapted to carry the weight of the user and an insulating body loosely held against and beneath said web so as to be substantially uncompressed by the weight of the user.

1,401,847. PIPE-COUPLING. JOHN WILLIAMS, Clinton, Iowa, assignor to Williams Devices Company, Wilmington, Del., a Corporation of Delaware. Filed Jan. 21, 1920. Serial No. 352,977. 18 Claims. (Cl. 285—57.)

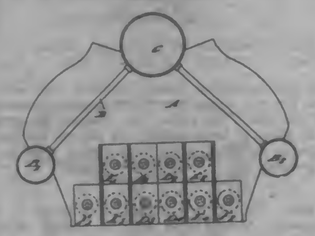
1. In a coupling of the class specified, the combination of a pair of tubular heads having coupling units in reverse positions on the outer sides thereof, a pair of gaskets carried by said heads with their outer edges in alcutting relation, and rigid coupling members in reverse positions at opposite sides of the heads and provided with longitudinally movable positively controlled coupling devices therein clear of the heads and having means to engage the head units and turn on the latter.

1,401,848. COLT'S MUZZLE. LEWIS W. WILLIAMS, Chandler, Okla. Filed Dec. 3, 1919. Serial No. 342,066. 2 Claims. (Cl. 119—130.)



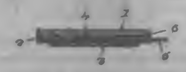
1. A wearer having a frame provided with spaced arch members and connecting portions joining the same, and a rod extending from one of said members to the other to brace the same, said rod being coiled around one of the arches and a portion integral with the rod extending beyond the coil as a prong.

1,401,849. PHONOGRAPH. KASIMIERZ WOJTASIEWICZ, Cleveland, Ohio. Filed Feb. 10, 1921. Serial No. 443,909. 19 Claims. (Cl. 196—56.)



1. In a phonograph wherein records are played upon a turn table mounted upon a vertical driven shaft, means

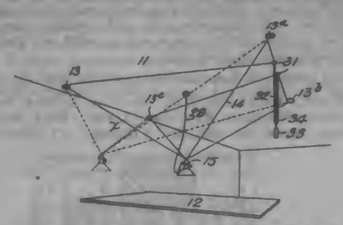
for arresting the rotation of such vertical shaft and for positively holding it against rotation including the combination with cylindrical and angular portions of said shaft of coöperatively related friction and positive shaft



engaging members adapted to respectively engage the cylindrical and angular shaft portions whereby the shaft is brought to a stop first by the friction member and then held against rotation by the positive means.

1,401,850. OIL-FIRED BOILER. HAROLD E. YARROW, Glasgow, Scotland. Filed July 8, 1919. Serial No. 309,507. 2 Claims. (Cl. 126—4.)

1. A boiler comprising a fire box and a plurality of oil burners located at one end of said fire box, said burners being arranged symmetrically on each side of the central longitudinal plane of the boiler in sets at different distances from the said end in order to obtain an equal distribution of heat throughout the furnace.

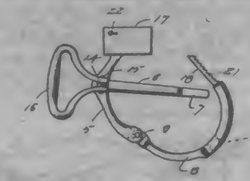


1,401,851. HEATER UNIT. HARVEY R. ZIEBELL, Ripon, Wis. Filed May 10, 1921. Serial No. 468,872. 5 Claims. (Cl. 18—18.)

1. In a heater unit for vulcanizing tire patches, the combination of a fuel element in a receptacle by which the patch is carried, ignition means carried by the fuel element, and igniting means complementary to said ignition means.

1,401,852. LIGHT. JAMES A. AIRD, Montreal, Quebec, Canada. Filed Dec. 6, 1919. Serial No. 342,934. 10 Claims. (Cl. 240—69.)

1. A lamp support comprising a plurality of ceiling fixtures having cord channels therein, a lamp holder having cord channels therein, and a single continuous cord passing through the channels of the fixtures and holder in sliding frictional contact therewith and suspending the holder in such manner that the lamp may be moved



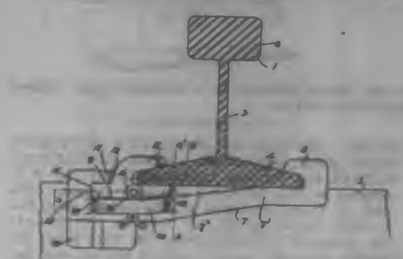
in any desired direction in a horizontal plane without appreciable elevation.

1,401,853. PROCESS OF SEPARATING BUTTER-OIL FROM MILK, SKIM-MILK, CREAM, BUTTERMILK, BUTTER, &c. WALLACE ALEXANDER, Jersey City, N. J., assignor to The De Laval Separator Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 15, 1919. Serial No. 345,128. 1 Claim. (Cl. 99—13.)

The process of recovering butter fat from butter fat-containing materials which comprises heating such material under pressure to a temperature corresponding to low steam pressure and sufficient to dissolve the casein contained in the material and afterward separating the butter fat from the water.

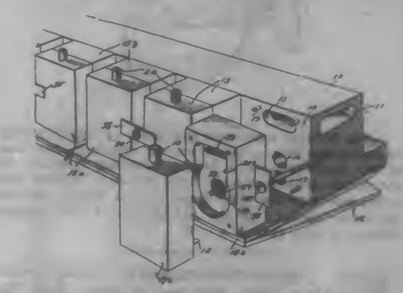
1,401,854. BAG-FASTENER. JOSE M. ALMEDIA, Shoshone, Idaho. Filed June 7, 1918. Serial No. 238,684. 1 Claim. (Cl. 150—23.)

A bag fastener comprising two frame sections pivotally connected together, a handle on and extending above one of the frame sections, a tongue extending from one of the frame sections intermediate the ends thereof and across and into the other frame section, and a lock for the frame sections at the end of one of the sections adapted to bear against a wall.



1,401,855. COMBINATION-PADLOCK. FRANK ANDERSON, Oakland, Calif. Filed Apr. 19, 1920. Serial No. 374,789. 2 Claims. (Cl. 70—113.)

1. A combination padlock comprising a barrel formed with a flange at one end and a stud at the other, a cap plate threaded on said stud to form a second flange on said barrel, tumbler rings on said barrel between said flanges and formed with recesses in the surfaces of the



ring apertures, spring-pressed pins entering apertures in the barrel to yieldingly engage in the recesses of said tumbler rings, a staple piercing said cap to lock it against movement and engageable with said tumbler rings, and indicia on said tumbler rings and on said cap plate for positioning said tumbler rings.

1,401,856. RAIL ANCHOR. William Andrew Robert Angus, Winnipeg, Manitoba, Canada. Filed Mar. 14, 1921. Serial No. 452,182. 9 Claims. (Cl. 238—317.)

6. A rail anchor comprising an abutment arranged to engage one side of a rail base, a fulcrumed rail gripping member at the opposite side of the rail base provided with upper and lower gripping jaws engaging corresponding surfaces of the said base, said jaws defining between them a wedge-shaped gripping space receiving the rail base therein and being normally inclined with respect to said base.

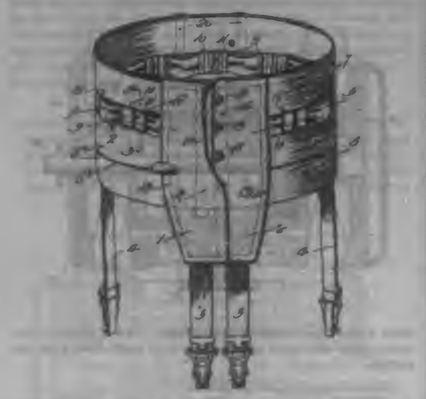
1,401,857. PNEUMATIC-ACTION UNIT. Stephen Battner, Brooklyn, N. Y. Filed Jan. 9, 1920. Serial No. 350,431. 5 Claims. (Cl. 84—58.)

1. In pneumatic actions, the combination of a tension chest having a smooth front face, a series of pneumatics supported by the chest and a series of valve units for the respective pneumatics, said valve units being secured independent of one another to said smooth face, each valve unit comprising two separable parts, a valve mechanism within each unit, and means serving to hold the different parts of each unit together and the unit as a whole against the tension chest.

1,401,858. PNEUMATIC COLUMN. Lewis C. Baylis, Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed June 22, 1921. Serial No. 479,667. 6 Claims. (Cl. 285—63.)

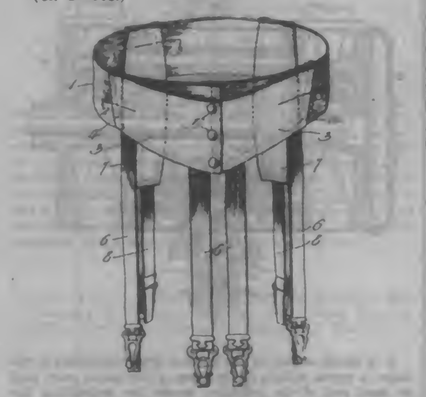
1. A column adapted to support a fluid actuated percussive tool in operative position, comprising a rock gripping member at one end adapted to engage at a plurality of points a cylinder resting non-rotatively thereon, the said rock engaging member, a sleeve adjustable longitudinally in the cylinder casing and extending beyond the end of the said casing, a fluid actuated piston in the cylinder casing, a piston rod connected to said

piston and extending loosely through the said sleeve beyond the end of the sleeve, and a rock engaging member at the end of the piston rod, whereby the said sleeve may be adjusted longitudinally to prevent the return of the piston rod into the cylinder casing upon failure of fluid pressure.



1,401,859. VIBRATING SHELL. Charles A. Bailey, Cromwell, Conn. Filed Sept. 4, 1920. Serial No. 408,240. 9 Claims. (Cl. 46—46.)

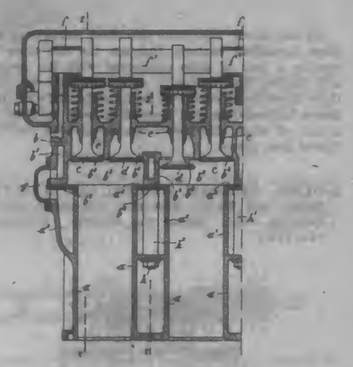
1. A sound producing device comprising a shell formed from a single piece of sheet metal of substantially U-shape in cross section, with upturned sides, inturned ends, and a flanged front edge forming an angularly shaped structure in all directions, and a striker loosely inclosed within the shell.



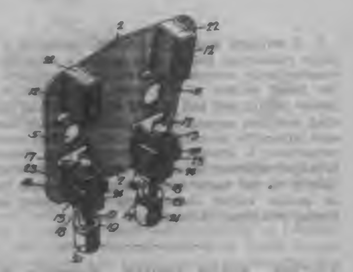
1,401,860. GIRDLE. August B. Beck, Jersey City, N. J. Filed Mar. 7, 1921. Serial No. 450,410. 4 Claims. (Cl. 2—188.)

1. A girdle comprising a relatively wide elastic belt having connecting means at its ends, and a relatively narrow inelastic strap connected with said belt intermediate the edges of the latter and extending from end to end thereof, said strap being adapted to have its ends

connected to each other to restrict the waistline independently of the elasticity of the belt.



1,401,861. GIRDLE. August B. Beck, Jersey City, N. J. Filed Mar. 7, 1921. Serial No. 450,411. 2 Claims. (Cl. 2—188.)

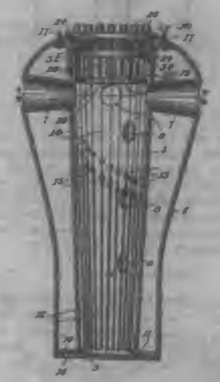


1. A girdle comprising an elastic belt whose ends meet at its front, a pair of opposed inelastic flaps at the front side of the belt carrying hose supporters, means securing the outer ends only of said flaps to said belt, means for detachably connecting the inner ends of said flaps with each other, and means for detachably connecting the ends of said elastic belt to each other behind and free of said flaps, whereby to effectively support the abdomen independently of said flaps.

1,401,862. EXPLOSION-ENGINE. Marc Birkigt, Bois-Colombes, France. Filed Jan. 6, 1916. Serial No. 71,695. 2 Claims. (Cl. 123—178.)

1. An explosion cylinder casting comprising an integral block having a plurality of inner cylindrical walls forming explosion cylinders and an outer spaced wall connected at its top and bottom to said cylindrical walls forming a water jacket about said cylinders, said cylinder casting having a flat upper surface, a head casting having an upper wall provided with valve apertures arranged longitudinally thereof, inner side walls coöperating with said upper wall to form combustion chambers each surrounding a pair of valve apertures and being elongated longitudinally of the head casting, each inner side wall being symmetrically arranged in overlapping relation to said cylinders, a lower wall having a flat under surface coöperating with the flat upper surface of said cylinder casting, said inner side walls being joined to said lower wall and an outer side wall joined to said lower wall and surrounding said inner side walls the distance between the elongated ends of adjacent combustion chambers being less than the distance between the unelongated sides of said combustion chambers and said outer wall.

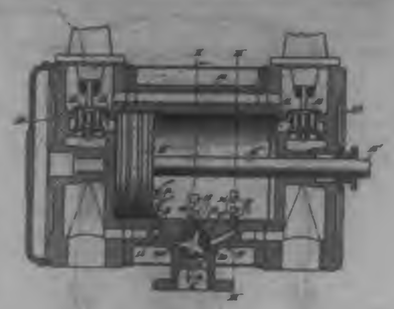
1,401,863. GARNETT MACHINE. William F. Bokum and Herbert V. Coulston, Philadelphia, Pa., assignors to Smith and Furbush Machine Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Nov. 12, 1919. Serial No. 337,383. 2 Claims. (Cl. 19—3.)



2. The combination in a Garnett machine, of an arch; a series of plates secured to the arch, each plate having two sets of projections; a hole between each set of projections; a fixed nut held by each of the lower projections; adjusting screws passing through the nuts; puppets having projections engaging the adjusting screws and having set screws bearing against the upper projections, the set screws adjusting the puppets laterally, the other screws adjusting the puppets longitudinally.

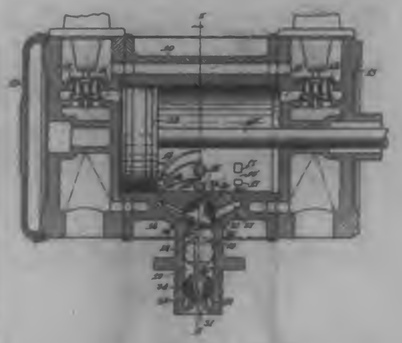
1,401,864. OAR. WALTER G. BOLTON, Springfield, Mass. Filed Nov. 16, 1920. Serial No. 424,446. 1 Claim. (Cl. 9—24.)

An oar of the character described comprising a central piece extending entirely through the oar from blade to handle, a pair of sides connected with the central piece and having longitudinally extending grooves formed on their inner faces each side being solid midway its ends, a sleeve surrounding and secured to said solid portion and a pair of blade side pieces connected with the first mentioned side pieces.



1,401,865. STRINGED MUSICAL INSTRUMENT. JOHN BOOSH and WENZL KOWALEK, Cleveland, Ohio. Filed July 28, 1921. Serial No. 488,099. 6 Claims. (Cl. 84—173.)

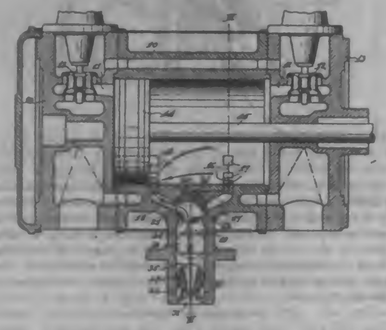
5. A stringed musical instrument including a substantially cylindrical hollow case having a circular series of longitudinally extending strings mounted therein adjacent the inner surface of the same and manually operable means within one end of said case including finger operated members arranged in a circular series inwardly of said strings for sounding the latter, said last named means comprising a plurality of revolvable pick elements each arranged adjacent one of said strings and operatively connected to the finger actuated members, said case being of double walled construction with sound conducting means extending through said walls.



1,401,866. STEAM-ENGINE. FREDERICK W. BÖSCH, Camden, N. J., assignor to Worthington Pump and Machinery Corporation, New York, N. Y., a Corporation of Virginia. Filed Apr. 22, 1916, Serial No. 92,891. Renewed May 23, 1919. Serial No. 300,478. 15 Claims. (Cl. 121—125.)

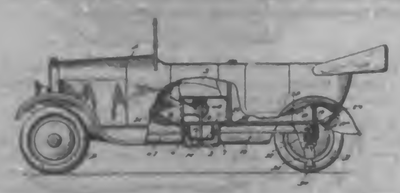
1. A steam engine of the uniflow type comprising a cylinder, a piston within the cylinder, a live steam inlet port at each end of the cylinder, means for controlling the admission of live steam through said live steam ports and to the opposite sides of the piston, one intermediate and two distinct and independent combined main and auxiliary exhaust ports at different and separated sec-

tions along the length of the cylinder, and a single valve controlling the three exhaust ports at each stroke of the piston.



1,401,867. STEAM-ENGINE. FREDERICK W. BÖSCH, Camden, N. J., assignor to Worthington Pump and Machinery Corporation, New York, N. Y., a Corporation of Virginia. Filed Aug. 23, 1916, Serial No. 116,440. Renewed Apr. 29, 1919. Serial No. 293,578. 18 Claims. (Cl. 121—125.)

1. A steam engine of the uniflow type comprising a cylinder, a piston within the cylinder, a live steam inlet port at each end of the cylinder, means for controlling the admission of live steam through said live steam ports and to the opposite sides of the piston, the combination of two distinct and independent combined main and final exhaust ports at different and separated sections along the length of the cylinder, an intermediate exhaust port located between the two combined main and final exhaust ports and substantially at the center of the cylinder, a single valve controlling said three exhaust ports, three distinct and independent cylinder-exhaust-diverting ports and a single-slot ported exhaust diverting-valve coöperating with the single valve controlling the three separated and independent cylinder exhaust ports and controlling the diversion of the exhaust steam of a uniflow cylinder into said three distinct and independent cylinder-exhaust-diverting ports at different pressures, whereby the main exhaust charge expelled from the cylinder at the end of the power stroke through the distinct and independent combined main and final exhaust port when acting as



main exhaust port is diverted into one of said independent cylinder-exhaust-diverting-ports and the remaining exhaust steam expelled from the cylinder at a lower pressure on the return or exhaust stroke successively through the intermediate exhaust port and through the independent main and final exhaust port when acting as final exhaust port into another of said independent cylinder-exhaust-diverting-ports.

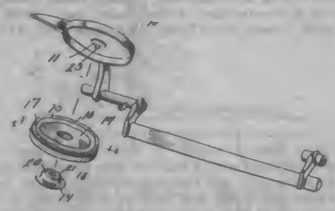
1,401,868. STEAM-ENGINE. FREDERICK W. BÖSCH, Camden, N. J., assignor to Worthington Pump and Machinery Corporation, New York, N. Y., a Corporation of Virginia. Filed Oct. 31, 1916, Serial No. 128,753. Renewed Nov. 22, 1921. Serial No. 517,153. 26 Claims. (Cl. 121—125.)

1. A steam engine of the uniflow type comprising a cylinder, a piston within the cylinder, a live steam inlet port at each end of the cylinder, means for controlling the admission of live steam through said live steam ports and to the opposite sides of the piston, two distinct and independent main or auxiliary exhaust ports at different and separated sections along the length of the cylinder, and a single valve controlling the two exhaust ports and first opening the exhaust port adjacent the piston to the expanded steam and later the other exhaust port.

1,401,869. AUTOMOBILE LIFTING MECHANISM. CLARENCE W. BOWERS, Heppner, Oreg. Filed Mar. 15, 1921. Serial No. 452,604. 7 Claims. (Cl. 254—86.)

1. In a device of the class described comprising lifting elements independently connected to the axles of a vehicle, means for lowering and raising either pair of said elements to their operative and inoperative positions with respect to the vehicle and means for simultaneously actuating either of said pairs of lifting elements from the seat of the vehicle.

1,401,870. REFLECTOR. MAURICE P. BROGAN, Omaha, Nebr. Filed Jan. 24, 1920. Serial No. 353,842. 6 Claims. (Cl. 240—41.)

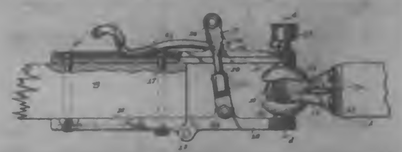


1. A reflector for projecting light rays whose curvature in one plane is defined by a curve which is generated by a curved directrix, every point in the curve being equidistant from the focus and the directrix.

1,401,871. SOLDERING-IRON. CHESTER A. BROWN, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 25, 1919. Serial No. 279,070. 5 Claims. (Cl. 219—26.)

1. An electric soldering iron comprising a supporting handle, a heating member tapered to a relatively thin edge at one end and connected to the supporting handle at the other, a carbon member adapted to engage the heating member and mounted thereon and means for reflecting light caused by contact engagement of the two members when they are connected to a source of electric current.

1,401,872. KEY-PAD FOR WIND MUSICAL INSTRUMENTS. FERDINAND A. BUESCHER, Elkhart, Ind. Filed Feb. 28, 1921. Serial No. 448,534. 9 Claims. (Cl. 84—385.)



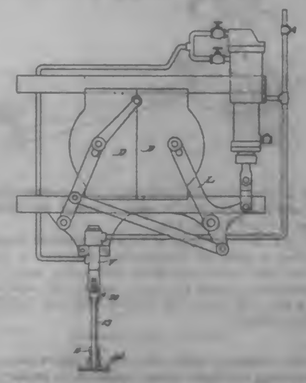
2. In a wind musical instrument, the combination of a key, a pad therefor and a snap fastener for detachably securing the pad to the key.

8. A pad for the keys of a wind musical instrument comprising a body of compressible material, a yieldable cover for said body, said body and cover being formed with alining apertures to receive means for securing said pad to a key, and means for holding said pad and cover in assembled relation.

1,401,873. TRUCK AND TRAILER COUPLING. JACOB W. BULLER, Hillsboro, Kans., assignor to Buller Coupler Co., Hillsboro, Kans., a Corporation of Wisconsin. Filed Sept. 17, 1920. Serial No. 410,924. 5 Claims. (Cl. 213—67.)

1. A coupling of the class described, including a head constituting one coupling element, a bracket adapted at an

end thereof to be secured to a vehicle, said fulcrum having integral members extending laterally outward therefrom in connection with said head at both sides of the latter, and a mating socket for said head composed of members one



of which is mounted for movement toward or from the plane of the other for coupling or uncoupling, the latter bracket members at the sides of the head being accommodated between said socket members.

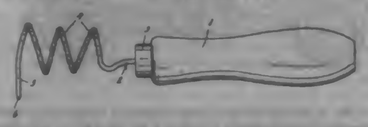
1,401,874. SAFETY DEVICE. WILLIAM JOHN BUSER, Youngstown, Ohio. Filed Dec. 14, 1920. Serial No. 430,710. 1 Claim. (Cl. 246—358.)

In a safety device for railway switches, the combination of switch points, foot pieces secured to the switch points, operating members lying adjacent to the rail and actuated by the rolling stock, a compression element carried on one end of each of the operating members, a slide bar connecting with said foot pieces and actuated by said compression member whereby the switch points are tightly forced home, and means interposed between said footpieces to adjust the same in proper spacial relation and to permit of the wear being compensated for.

1,401,875. FOOT-PEDAL FOR PNEUMATIC DOOR-OPERATING MECHANISM. HARRY HUGH CLARK and LOUIS SCHAUMBURGER, Terre Haute, Ind. Filed Nov. 9, 1920. Serial No. 422,854. 6 Claims. (Cl. 74—81.)

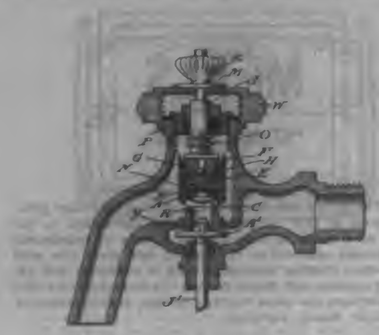
1. In a foot pedal for pneumatically operated door mechanism, a support, an arm carried by said support, a cam adjustably pivoted to said arm and a pedal for operating said arm and cam to actuate the control valve for said mechanism.

1,401,876. SMOKING PIPE. WILLIAM CRAIG, Newark, N. J. Filed Oct. 7, 1919. Serial No. 328,041. 3 Claims. (Cl. 131—12.)



1. A stem for smoking pipes including a shell, a tube ranging longitudinally in said shell and spaced therefrom to form a chamber, a separate mouthpiece, means detachably connecting said mouthpiece with said shell, a valve slidably sleeved on the said tube at the rear end, and stop means to limit the rearward movement of said valve, said stop means including stop members on the front end of the mouthpiece.

1,401,877. PLOW ATTACHMENT. LEWIS CLEATON, Prairieville, Tex. Filed Jan. 29, 1919. Serial No. 273,770. 1 Claim. (Cl. 97—17.)



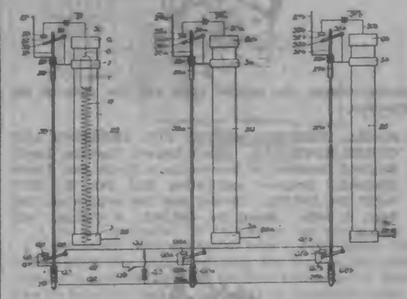
An attachment for a landside of a plow share to compensate for uneven wearing away comprising a plate disposed against one side face of the landside, a laterally extending flange on the lower edge of the plate to provide a broad ground-engaging surface and having its forward end in contact with the lower edge of the landside to support the same, the flange and plate being reduced toward the point of contact of the landside and flange, and fastening means passing through the plate and landside to adjustably secure the plate to the latter.

1,401,878. DISH-WASHING TOOL. CHRISTIAN M. COLBY, Minneapolis, Minn. Filed Oct. 18, 1920. Serial No. 417,582. 2 Claims. (Cl. 15—54.)

1. A dish washing tool having in combination, a handle, a wire or rod member projecting axially therefrom and formed at some distance from the handle into a plurality of helical coils, said member having a free end projecting in a straight line normal to the axis of the helix.

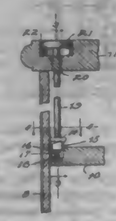
1,401,879. VALVE, FAUCET, AND THE LIKE. WILLIAM ROBERTS CORNISH, Barry, England. Filed Mar. 6, 1920. Serial No. 363,740. 6 Claims. (Cl. 251—36.)

3. A valve or faucet, comprising a valve stem, a resurfacing tool detachably fixed to the lower end of said stem, a magazine member detachably attached to said tool and adapted to contain both a washer for coöperating with the valve seat and spare washers, and a spring split ring engaging grooves in said magazine member and resurfacing tool and forming the detachable connection between the two.



6. A valve or faucet, comprising a valve seat, a valve stem movable toward and from said seat, a spring for normally pressing said stem toward said seat, a rotatable handle in screw-threaded engagement with the valve casing, coacting pin and slot connections between said stem and handle held in engagement by said spring while said stem is out of contact with said seat whereby the longitudinal and rotary movements of said handle will be imparted to said stem, the contact of said stem and seat automatically disengaging said pin and slot engagement and means for rotating said stem independently against said seat.

1,401,880. NOZZLE. DOUGLAS L. CONNELLY, Leonia, N. J., assignor to W. L. Fleisher & Co. Inc., New York, N. Y., a Corporation of New York. Filed Sept. 4, 1920, Serial No. 408,161. Renewed Nov. 16, 1921. Serial No. 515,729. 2 Claims. (Cl. 299—115.)



1. A nozzle comprising a shell, a core fitting snugly in the shell, a cap secured to the shell and having means for locking the core in the shell, said core having a bore therethrough, and means associated with the cap for supplying material to be atomized to the bore of the core, said core having grooves in the periphery thereof leading to the end of the core remote from the cap, a plate associated with the core and closing the ends of the grooves, said plate presenting spiral passage forming outlets for said groove, a nozzle secured to the core, and having means for locking the plate to the core, said nozzle having a passage registering with the bore of the core, and a cap secured to the shell and inclosing said plate and nozzle, said cap having an aperture aiming with the passage of the nozzle, said shell having means whereby compressible fluid may be supplied to the grooves of the core.

1,401,881. PROTECTING DEVICE FOR ELECTRIC CIRCUITS. NICHOLAS J. CONRAD, Chicago, Ill., assignor to Schweitzer & Conrad, Chicago, Ill., a Corporation of Illinois. Filed Mar. 31, 1917. Serial No. 158,815. 27 Claims. (Cl. 175—294.)

20. In combination a high tension current conductor, a high tension circuit breaker in said conductor, a fuse of small capacity controlling said circuit breaker, and an independent source of current for blowing said fuse.

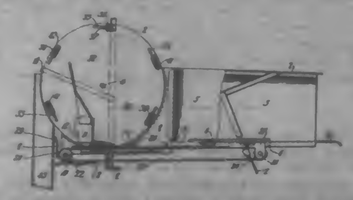
1,401,882. DOOR-OPENER. LORENZO COZZO, Chicago, Ill. Filed June 16, 1919. Serial No. 304,457. 1 Claim. (Cl. 292—174.)

The combination with a cabinet having doors and springs tending to open the doors, of a cross piece in the cabinet having a recess adjacent the free edges of the doors, an inside hook on each door above the cross piece, a beveled latch bar adapted to be seated in the recess in the cross piece, springs tending to raise the bar to engage the hooks, a rod secured to the bar extending through a hole in the cabinet where a recess is also provided, and a button secured to the rod and adapted to be seated in the recess at the top of the cabinet where it is ordinarily invisible but operable to depress the bar for releasing the bar and hooks, and allowing the doors to open.

1,401,883. DYNAMO-ELECTRIC GENERATOR. VICTOR CRABB, London, England. Filed Dec. 10, 1919. Serial No. 343,964. 4 Claims. (Cl. 171—209.)

1. A dynamo-electric generator comprising a pair of stationary field magnets arranged side by side with the pole pieces of one magnet adjacent, respectively, the pole pieces of opposite polarity of the other magnet, a stationary armature core extending centrally between the

pole pieces of said magnets, and a pair of disks carrying segments of magnetic material extended to occupy the

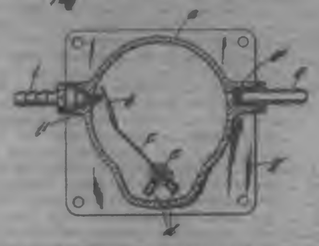


spaces between the magnet poles and the ends of the armature.

1,401,584. FEEDING MOTION FOR PRESSING AND OTHER MACHINES. HARRY BENSON CRANSHAW, Leeds, England, assignor of four-tenths to Louis Fox, Leeds, England. Original application filed Jan. 5, 1917, Serial No. 140,691. Divided and this application filed Sept. 8, 1920. Serial No. 408,901. 6 Claims. (Cl. 68—9.)

1. In a machine for the purpose described, the combination with a work support, a pressing member adapted to coöperate therewith, and means for positively moving the pressing member relative to the support, of a feed plate carried by the support, connections between the means for actuating the pressing member and said plate for reciprocating the latter, and means for automatically moving the feed plate relative to the work support and toward and from the pressing member as it reciprocates.

1,401,885. APPARATUS FOR PLANTING SEED-POTATOES. JOHN B. CAUMP, Ballarat, Victoria, Australia. Filed Sept. 2, 1919. Serial No. 321,223. 8 Claims. (Cl. 221—127.)

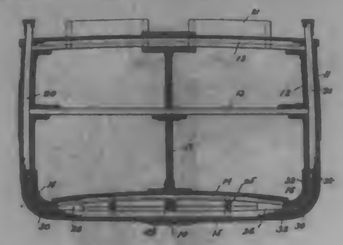


1. In apparatus for planting seed potatoes, a revolving element having a series of fixed needles or spikes angularly inclined to the side face of said element substantially as and for the purpose set forth.

1,401,895. ELECTRIC SIGN. EDWARD W. DARNSTADT, Austin, Tex. Filed Feb. 11, 1919. Serial No. 276,982. 5 Claims. (Cl. 40—132.)

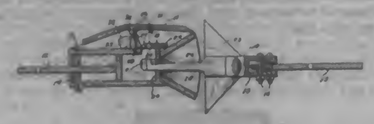
2. The herein described method of forming a sign plate consisting in first outlining the sign characters on the plate by a series of holes passing a strip of translucent and flexible material on the rear of said plate over said holes after treating said strip with a softening and adhesive solution and finally forcing the material while still wet through the holes to form hollow protuberances on the front face of the plate.

1,401,897. FLOW-METER FOR GASES. ROBERT H. DAVIS, London, England. Filed Aug. 11, 1920. Serial No. 402,894. 3 Claims. (Cl. 73—197.)



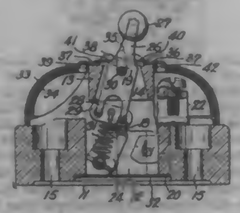
3. In an instrument for measuring the rate of flow of gases, an inlet pipe, an inlet nozzle arranged therein having an orifice therethrough with diameter small relatively to the diameter of the pipe, a plate against which impinges the jet of gas passing through the nozzle, an arm attached to said plate, a pivoted spindle attached to said spindle, balance weights attached to said spindle, resilient means attached to said spindle for resisting angular movement thereof, an outlet pipe and a member placed in the pipe provided with an orifice small relatively to the bore of the pipe.

1,401,898. UNDERFEED FURNACE. WILLIAM E. DU VOE, Detroit, Mich., assignor to The Underfeed Stoker Company of America, Detroit, Mich., a Corporation of New Jersey. Filed Nov. 5, 1920. Serial No. 422,044. 5 Claims. (Cl. 110—47.)



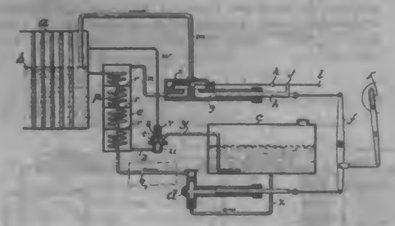
2. In a device of the character described, a retort, two tiltable floor-elements arranged laterally beyond the retort, each pivoted along one edge, a rocking lever, two fulcra therefor, means for rocking said lever on its fulcra alternately and links, connected with the free edges of the floor-elements and with points on said rocking lever adjacent said fulcra.

1,401,889. WOODEN SHIP. WILLIAM T. DONERLAY, Brooklyn, N. Y. Filed Dec. 6, 1917. Serial No. 205,709. 21 Claims. (Cl. 114—82.)



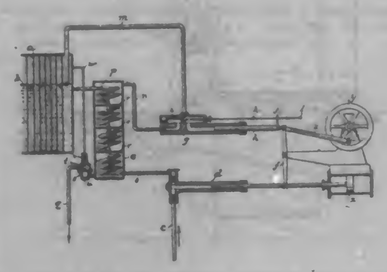
1. In a ship, a wooden hull, comprising: transverse frame members, and means to retain same under an initial stress; a stem and a stern post; and a vertical, longitudinal bulkhead extending the entire length of the hull and forming an integral part of said stem and stern posts, said bulkhead being continuous and insuring a rigid structure wherein lateral stresses, developed by a tendency of the ship to "hog," are resisted by the transverse frames acting in conjunction with the said longitudinal bulkhead.

1,401,890. COUPLING FOR MINE-CARS. JOSEPH E. DEKE, Birmingham, Ala. Filed Mar. 29, 1921. Serial No. 456,580. 3 Claims. (Cl. 213—37.)



1. A car coupling having complemental coupling members, one of said members having a knuckle, the other of said members having a tongue engageable with said knuckle, means pivotally mounting the knuckle to yield relatively to the tongue to lock the latter, means operable to shift the knuckle to release the tongue, a latch normally in engagement with said knuckle, and trip means to release the latch as said last mentioned means is operated.

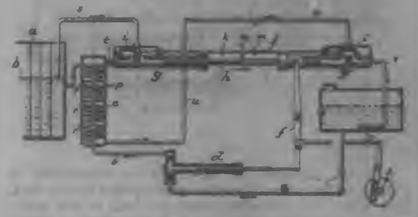
1,401,891. ELECTRIC SWITCH CONSTRUCTION. CHARLES DUNCAN, Montreal, Quebec, Canada. Filed Oct. 18, 1919. Serial No. 331,711. 17 Claims. (Cl. 200—67.)



1. In a switch, a base having a recess opening from its lower surface, terminals projecting into said recess, a circuit maker oscillatably mounted in the recess and circuit maker operating means projecting into the recess.

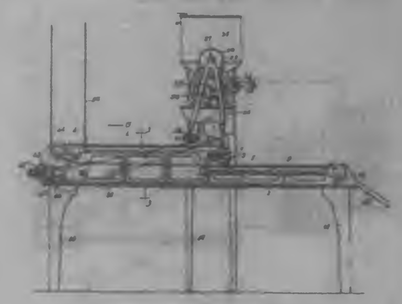
1,401,892. WATER-LEVEL REGULATOR FOR STEAM-BOILERS. FRANCIS I. DU PONT, Wilmington, Del., assignor to Delaware Chemical Engineering Company, Wilmington, Del., a Corporation of Delaware. Filed Mar. 29, 1918. Serial No. 225,464. 23 Claims. (Cl. 122—415.)

1. In an apparatus for regulating the water level in a steam boiler, the combination with a water supply tank, of a water line extending from the tank to the boiler, means in said line between the tank and boiler to deliver water from the tank to the boiler at a rate in excess of the rate at which the water is converted into steam in the boiler, a second line from the boiler to the tank to which passes the water from the boiler which rises above a predetermined level, means in the second line between the tank and boiler for withdrawing a predetermined volume of fluid from the boiler in a given time and transferring it to the tank, and a heat interchanger in said lines to transfer heat from the outgoing fluid from the boiler to the ingoing water without intermingling in the interchanger.



1,401,893. MEANS FOR PREVENTING THE FORMATION OF SCALE IN STEAM-BOILERS. FRANCIS I. DU PONT, Wilmington, Del., assignor to Delaware Chemical Engineering Company, Wilmington, Del., a Corporation of Delaware. Filed May 31, 1918. Serial No. 237,450. 3 Claims. (Cl. 122—415.)

1. In a feed water supply system for steam generators, a water feed line including a pump for continuously supplying a predetermined amount of fresh water to the generator, an overflow line including a measuring engine for continuously removing the excess water supplied to the generator, a double surface heat interchanger connected to said line, the ingoing water passing over one

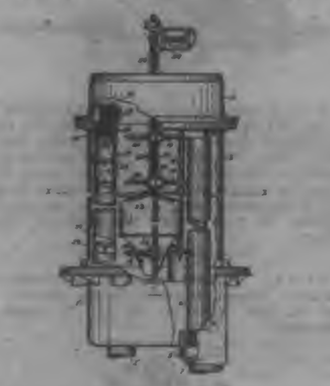


surface while the outgoing water passes over the water surface, to transfer the heat from the outgoing water to the ingoing water, and means for controlling the discharge of water from the heat interchanger.

1,401,894. WATER-LEVEL REGULATOR FOR STEAM-BOILERS. FRANCIS I. DU PONT, Wilmington, Del., assignor to Delaware Chemical Engineering Company, Wilmington, Del., a Corporation of Delaware. Filed May 17, 1919. Serial No. 297,912. 10 Claims. (Cl. 122—451.)

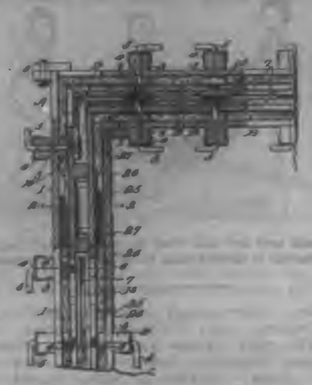
1. In an apparatus for regulating the water level in a steam boiler, means to deliver an excess supply of water to the boiler, a discharge from the boiler at the desired water level, a heat interchanger interposed in the delivery and discharge connections, and means for removing the discharged water from the interchanger at the rate delivered thereto.

1,401,895. COLOR-SORTING MACHINE. PAUL F. DUSHA, New York, N. Y., and ANTON FETK, Bohemia, N. Y., assignors to Fetzer-Dusha Co., New York, N. Y., a Corporation of New York. Filed Oct. 1, 1920. Serial No. 414,145. 2 Claims. (Cl. 198—33.)



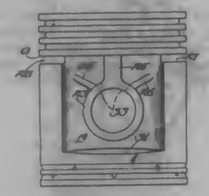
1. A machine for sorting buttons, comprising a pair of conveyer belts and means for feeding buttons to one of said belts, said belt moving in one direction, the other belt disposed in contact with the first-mentioned belt along that portion of its length which moves in the reverse direction, whereby buttons may be gripped therebetween, said second belt, toward the end of its travel, separating from said first-mentioned belt to expose the buttons reversed to view.

1,401,896. HAYDEN. GEORGE L. GERHART, Downingtown, Pa. Filed July 13, 1921. Serial No. 484,191. 2 Claims. (Cl. 145—61.)



1. A wooden handle having a portion of its length reduced to make it pliable and a closely wound spiral spring reinforcing such reduced portion and increasing its elasticity.

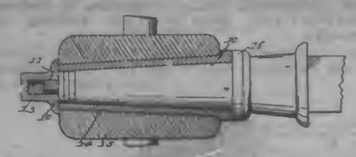
1,401,897. MEASURE FOR DISPENSING LIQUIDS. FRANK B. ELLIS, Fort Wayne, Ind., assignor to Tokheim Oil Tank and Pump Company, a Corporation of Indiana. Filed Feb. 4, 1920. Serial No. 356,811. 8 Claims. (Cl. 73—166.)



1. In a measure for dispensing liquids, a container having transparent walls adapted to receive and display a quantity of liquid to be dispensed and having a valve controlled discharge port in its lower portion and an overflow pipe therein, the receiving end of which is located in its upper portion, said overflow pipe being adapted to be adjustably positioned; gage members adjustably positioned within the container, each having a series of plates spaced apart and having indicating marks thereon respectively, and a pile of displacement members including means for their support in respective positions corresponding with the spaces between the indicating marks of the gage members, said displacement members being so proportioned respectively that the quantities of liquid held in the container in the several spaces between the indicating marks of the gage members are of definite predetermined quantities.

1,401,898. FORM FOR HOLLOW CONCRETE WALLS. BENJAMIN FARMER, La Forest, Wis. Filed Dec. 14, 1920. Serial No. 430,696. 5 Claims. (Cl. 25—131.)

1. In the construction of hollow concrete walls, a form including inner and outer spaced sets of spaced apart members, means for maintaining the outer members of each set in side to side alinement, spacing blocks between the outer and inner members of each set, and a locking element within the space which will form the hollow of the wall adapted to coöperate with the means for maintaining the outer members in alinement, complementary locking elements of the inner and outer sets being arranged face to face to form spacing means between the inner and outer sets.



1,401,899. PISTON FOR INTERNAL-COMBUSTION ENGINES. STEPHEN I. FERKETH, Detroit, Mich., assignor to Essex Motors, Detroit, Mich., a Corporation of Michigan. Filed May 20, 1921. Serial No. 471,101. 1 Claim. (Cl. 74—108.)

A piston for an internal combustion engine having near the top thereof an oil scraping edge and on two opposite sides, recesses, the walls of which support wrist pin bearings, there being oil holes through the walls of said recesses, and inclined web members which guide the oil removed by said scraping edge into said oil holes.

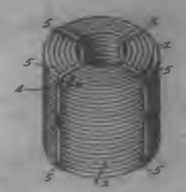
1,401,900. VEHICLE-WHEEL SPINDLE. MOSE FISHER, Plain, N. Mex. Filed Aug. 2, 1921. Serial No. 489,252. 2 Claims. (Cl. 301—131.)

1. A vehicle spindle having a bearing or body portion consisting at its outer end of a plurality of successively removable annular spacers or rings fitted upon the threaded nut receiving extension of the spindle and interiorly threaded for engagement therewith.

1,401,901. BLEACHING COMPOSITION. EDWARD FORBES, Webster, Mass. Filed Mar. 19, 1920. Serial No. 367,095. 3 Claims. (Cl. 8—2.)

1. The process of bleaching fabrics consisting in subjecting the fabrics to the action of a solution of chlorid of lime, soda ash, solution of sodium silicate, and water at a temperature approximately 50 degrees F.

1,401,902. PROCESS OR COPYING CAMERA. ARTHUR FRUWIRTH, Brooklyn, N. Y. Filed Sept. 20, 1920. Serial No. 411,417. 17 Claims. (Cl. 88—24.)



1. A process camera comprising a plurality of tracks, a camera body provided with a front frame and a rear frame, supporting wheels mounted on said camera body engaging said tracks, means controllable at the will of the operator for independently moving the front and rear frames of said camera body, means for locking said frames together so that they will move in unison, and a copy holder connected with said tracks and provided with means for holding a copy always in the same position relative to the track regardless of the thickness of the copy.

1,401,903. WATER OR MUCK BAILER. PEARLE ROSCOE GAWTHROP, Sr., Adrian, W. Va. Filed Jan. 26, 1920. Serial No. 353,975. 1 Claim. (Cl. 294—55.)

A bailer of the class described having an open front end and imperforate top, side bottom and rear end walls, said rear end wall being disposed at an obtuse angle to the bottom wall and merging therewith by a curved surface forming a rocking fulcrum for the bowl, said top wall being inclined at an acute angle to the rear end wall and joined thereto by the curved wall portion, said top and side walls terminating forwardly in a plane perpendicular to the forward edge of the bottom wall, said top and side walls being joined by curved wall portions whereby the interior of said scoop is free from angles.

1,401,904. COIL OF RUBBER HOSE AND THE PRODUCT OF COILING. Alvan M. Griffin, Wilmington, Del., assignor to The Electric Hose and Rubber Company, Wilmington, Del., a Corporation of Delaware. Filed Nov. 1, 1920. Serial No. 421,204. 4 Claims. (Cl. 206—59.)

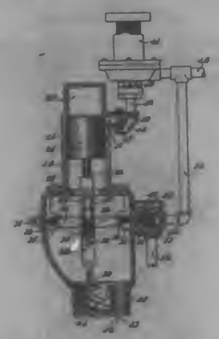
1. As a new article of manufacture, a coil of rubber hose consisting of a series of convolutions, the outer end of the hose being held to the body of the coil and the hose having a torsional stress, which tends to force the inner convolutions outward so as to cause them to retain their position in the coil.

1,401,905. RADIATOR-SHUTTER. Louis Samuel Hanson, Lewistown, Mont. Filed Dec. 24, 1919. Serial No. 347,052. 1 Claim. (Cl. 257—132.)

A radiator shutter including a series of vanes, means for hingedly supporting each of said vanes, said points of support being alined with respect to each other, brackets rigidly attached to each of said vanes, equal-length arms forming continuations of said brackets, a lever formed with a series of equally spaced openings the ends of said arms being adapted to extend through said openings, a rockingly supported bellcrank, means for rocking said bellcrank, said bell-crank having its point of rocking support in line with the points of hinge suspension of said vanes, one of the arms of said bell-crank being in line with the series of openings formed in said lever and extending through one of the same.

1,401,906. SEESAW AND THE LIKE. James G. Hagen, Bascom, Ohio. Filed Feb. 19, 1921. Serial No. 446,212. 8 Claims. (Cl. 46—22.)

1. A device of the kind described comprising a main support that has a rocker base and a seat above such base, oppositely extending arms slidably supported beneath said seat, and a handle on each arm situated to be reached

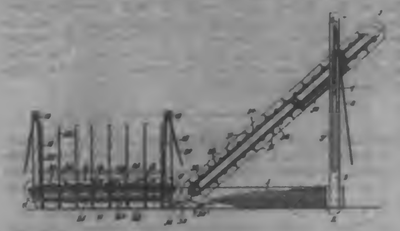


from said seat and also from the main support seat when the arm seat is shifted close to the main support seat.

1,401,907. COMPOSITION OF MATTER FOR FILLING, POLISHING, AND FINISHING FLOORS, WOODWORK, AND OTHER UNPOLISHED SURFACES. Freeman Herrington, Lawrence, Kans. Filed Jan. 28, 1921. Serial No. 440,753. 2 Claims. (Cl. 134—36.)

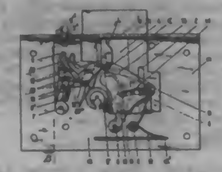
1. A composition of matter designed as an original finish for wooden surfaces, comprising a mixture of commercial shellac solution and linseed oil, with the quantity of shellac largely in excess of the oil, with the addition of turpentine and alcohol to insure the mechanical mixing of the oil and shellac.

1,401,908. COMPRESSOR-CONTROLLING MECHANISM. Fred D. Hollingworth, Claremont, N. H., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Apr. 17, 1919. Serial No. 290,645. 24 Claims. (Cl. 230—24.)



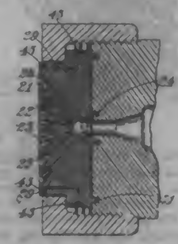
1. In combination, a compressor, a plurality of controlling means for said compressor having actuating elements movable in paths disposed at an angle to each other, and a single means for actuating both of said actuating elements.

1,401,909. GRAIN-ELEVATOR. James W. Hurt, York, Nebr. Filed June 21, 1919. Serial No. 305,727. 2 Claims. (Cl. 214—91.)



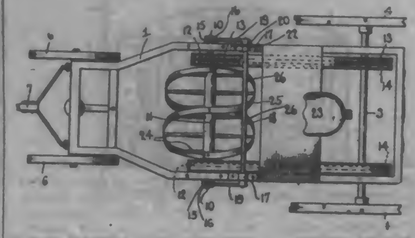
1. In means for the purpose set forth, the combination of a frame, an endless conveyer mounted at one end of the frame, upstanding posts secured on the frame adjacent the ends of the conveyer, grain rakes hinged to the frame alongside the conveyer, and means connected to

the rakes and posts for swinging the rakes, an endless elevator mounted on the frame at one end of the conveyer, said elevator being pivoted to swing in both vertical and horizontal planes, posts secured to the end of the frame



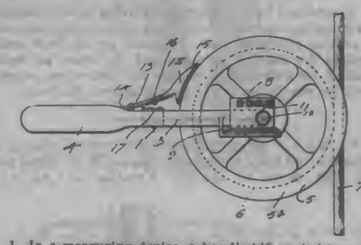
away from the conveyer, and a cross arm in slidable engagement with the posts upon which the free end of the elevator bears; means for raising and lowering the cross arm.

1,401,910. LOCK. Gerhardt Sigvert Rehling Kampmann, Taulov-Station, Denmark, assignor to Naamloose Vennootschap Handel-Maatschappij "Planeet," The Hague, Netherlands, a Corporation of The Netherlands. Filed Feb. 25, 1921. Serial No. 447,749. 3 Claims. (Cl. 70—70.)



1. A lock including a bolt, a key operated control therefor, means set by the movement of the key following actuation of the bolt whereby to prevent use of any other key, and means adapted to firmly hold the first said means against moving out of set position.

1,401,911. FUEL-SPRAYING NOZZLE FOR INTERNAL-COMBUSTION ENGINES. Karl Otto Keller, Sunderland, Durham, England, assignor of one-half to Robert Pile Doxford, Sunderland, England. Filed July 8, 1920. Serial No. 394,682. 2 Claims. (Cl. 299—141.)

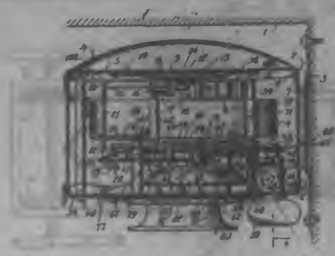


1. A fuel-spraying nozzle for internal-combustion engines comprising a plate-like member formed with a projection thereon and having a plurality of passages extending through said projection, fuel-spraying plugs, respectively mounted in the discharge ends of said passages and a guard-plate attached to the circumference of said member and to said projection and disposed with its outer face meeting smoothly the said end face of said projection and its inner face spaced away from the face of the said member to provide a circulation space for cooling water.

1,401,912. CROWNING-MACHINE. Thomas J. Kula, Merino, Colo. Filed Mar. 2, 1920. Serial No. 362,835. 1 Claim. (Cl. 97—65.)

In a crowning machine for cutting alfalfa and like growth of vegetation for arranging the same on the ground prior to the plowing which turns the growth under the soil for manuring purposes, a frame having drive wheels journaled at one end thereof and guide wheels journaled at the opposite end thereof, oppositely arranged depending slotted brackets on the frame between the wheels thereof, a shaft having its ends received through the slots of the brackets, journals on the outer ends of the shaft, means connected to said journals, means on the frame connected with said first mentioned means for adjusting the shaft vertically with respect to the frame, spokes radiating from the frame, spiral cutters secured on the outer ends of the spokes, and means actuated by the drive wheels of the machine for revolving the shaft.

1,401,913. MEASURING DEVICE. David G. Lorraine, Taft, Calif. Filed Oct. 23, 1918. Serial No. 259,376. 2 Claims. (Cl. 33—134.)

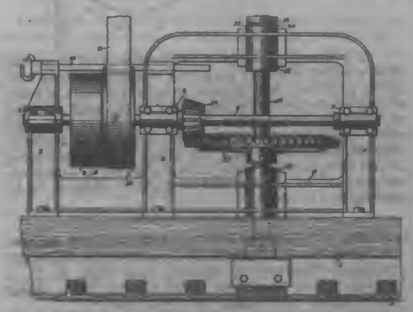


1. In a measuring device, a handle bifurcated to provide arms, a wheel rotatably supported between the arms having its peripheral edge grooved to receive a cable, a brake pivoted on the handle for depression by the hand grasping the handle, said brake extending into the groove to prevent undue lateral strain on the pivot, a spring to normally urge the brake away from the wheel, said brake resting on and being movable away from the spring to permit adjustment of its tension and a register adapted to be operated by the wheel.

1,401,914. AUTOMATIC FIRE-ALARM DEVICE. Ernest A. Lowe, North Plainfield, N. J., assignor to Automatic Sprinkler Company of America, New York, N. Y., a Corporation of New York. Filed Dec. 27, 1918. Serial No. 268,443. 17 Claims. (Cl. 116—145.)

8. In automatic fire alarm devices, a thermostat, an audible alarm signal, a motor to operate said alarm, detent

mechanism by normally restrain said motor and comprising detent members adapted to be actuated by said thermostat, a spring pressed resetting arm cooperating with said detent members to reset the same in interlocked restraining position and winding devices for said motor comprising a winding sleeve having a resetter lug to actuate said resetter arm as said winding sleeve is operated during the

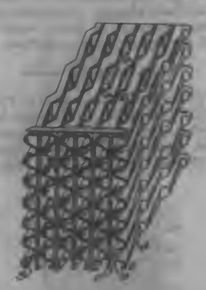


winding movement, a resetter dog loosely pivoted on said resetter arm and adapted to be engaged by said resetter lug and a spring normally holding said resetter dog in position with respect to said arm, a winding member cooperating with said winding sleeve and a lost motion connection between said winding member and sleeve.

1,401,915. SAFETY-RAZOR AND HAIR-CUTTING APPLIANCE. ALEXANDER JOHN MAINWARING, St. James, London, England. Filed Nov. 29, 1919. Serial No. 341,406. 8 Claims. (Cl. 30—12.)

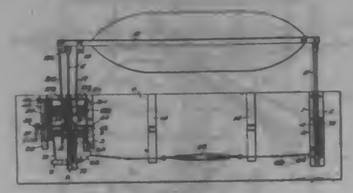
1. A combined hair cutting and shaving device comprising a comb having two different sets of teeth in alinement, and cutting means on said comb, one set of teeth being organised for shaving purposes and the other set being organised for hair cutting so that the device can be used at will for shaving or for hair cutting from the head.

1,401,916. GEARING DRIVING UNIT. FRANK J. MUENCH and JOHN L. MUENCH, Newark, N. J. Filed Dec. 30, 1920. Serial No. 434,039. 3 Claims. (Cl. 74—7.)



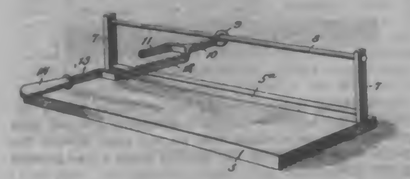
1. A power transmission unit comprising an integral metallic frame, a driving shaft supported on said frame, bearing portions provided on said frame at the opposite ends of said driving shaft, a driven shaft disposed at an angle to said driving shaft and lateral with respect to the axis thereof, and bearing portions on the frame at each end of the driven shaft, each of said above-mentioned bearing portions comprising a removable plate, each removable plate being disposed on the frame with relation to its shaft on the side of the frame opposite the other shaft, whereby one shaft may be removed from the frame without disturbing the other.

1,401,917. TAPE-TRANSMITTER. DONALD MURRAY, London, England, assignor to The Western Union Telegraph Company, a Corporation of New York. Filed Aug. 14, 1914. Serial No. 856,865. 20 Claims. (Cl. 178—17.)



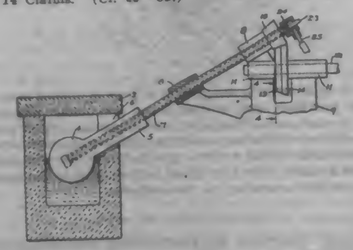
1. In an automatic tape transmitter of the step by step type, means operated by the tape for stopping the transmitter automatically, means for sending combinations of differential impulses such as positive and negative or make and break impulses together with means for sending a predetermined combination of impulses continuously to line when the transmitter is stopped automatically by the tape, substantially as described.

1,401,918. RADIATOR. FRANK A. NEVEU, Los Angeles, Calif. Filed Nov. 7, 1919. Serial No. 336,401. 6 Claims. (Cl. 257—130.)



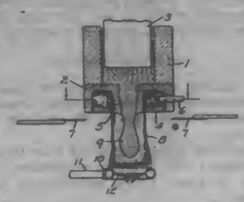
1. A water cooler or radiator for internal combustion engines, comprising corrugated, upright panels or sheets set face to face in pairs that are spaced vertically from each other, the corrugations extending vertically and forming, between the panels of each pair, continuous tubes for the flow of water; and flow forming spacers for supporting the adjacent panels of adjacent pairs, the spacers each being of a width substantially equal to the width of the panels and transversely corrugated, the ridges of the corrugations conforming to, and contacting with, the transverse sectional contour of an adjacent panel; the panels comprising each pair having their corrugations centrally offset as to the opposite panel.

1,401,919. SHIP'S DAVIT. CHARLES B. ORDON, Somerville, Mass. Filed May 26, 1920. Serial No. 384,409. 11 Claims. (Cl. 9—22.)



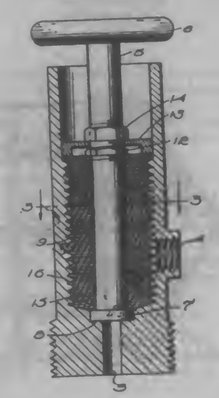
1. Boat launching apparatus comprising a base, a davit movable thereon, davit controlling means including a boom and a winch therefor, locking means on the base for locking the boom against backward travel, a movable stop on the base for determining the extent of outward travel of the boom, boat lowering means including a winch, and common operating means for the winches.

1,401,920. VALVE-SPRING-COMPRESSING TOOL. HENRY W. PAINE, Eagle Grove, Iowa. Filed Jan. 3, 1921. Serial No. 434,470. 6 Claims. (Cl. 29—86.3.)



1. The combination with a base and a rod mounted rigidly in parallelism with the base, of a lever slidable and swingable on said rod, said lever being forked whereby it may be used to compress valve springs and at the same time allow withdrawal or replacement of the valve keys.

1,401,921. GLASS-FEEDING APPARATUS. KARL E. PEILER, Hartford, Conn., assignor to Hartford-Fairmont Company, Canajoharie, N. Y., a Corporation of New York. Filed Dec. 30, 1916. Serial No. 139,767. 14 Claims. (Cl. 49—55.)



13. The combination with a container for molten glass having a discharge outlet, of a propeller within the container, means for intermittently actuating the propeller to cause a movement of glass toward the outlet, and means to permit adjustment of the duration of the active periods of the propeller.

1,401,922. GLASS-WORKING. KARL E. PEILER, West Hartford, Conn., assignor to Hartford-Fairmont Company, Canajoharie, N. Y., a Corporation of New York. Filed Oct. 22, 1917. Serial No. 197,751. 21 Claims. (Cl. 49—55.)

1. The method of conserving the heat of molten glass flowing from a container and successively severed into charges, which consists in inclosing the vertical sides of the flowing glass below the plane of severance of the charges with an unconfined flame curtain substantially out of contact with the glass.

1,401,923. VALVE. FLOYD TROUTMAN ROMBERGER, West Lafayette, Ind. Filed July 8, 1920. Serial No. 394,663. 4 Claims. (Cl. 251—35.)

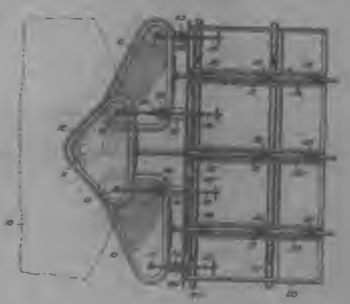
1. A valve comprising a valve casing, a valve stem arranged therein, a plurality of sheets of laminated material arranged on said valve stem and forming the valve body, the interior of the valve casing being provided with screw threads, and the valve body being provided with screw threads engaging the screw threads of the valve casing, and means for adjusting the pressure on said sheets of laminated material.

1,401,924. PROCESS OF RECOVERING MOLYBDENUM FROM MOLYBDENITE. GEORGE W. SARGENT, Pittsburgh, and JOSEPH W. WHITTENBURN, Washington, Pa. Filed June 14, 1920. Serial No. 388,785. 5 Claims. (Cl. 75—17.)

1. A step in the process of recovering molybdenum from molybdenite, which consists in causing an oxid of manganese to react with molybdenite.

1,401,925. ALLOY STEEL. GEORGE W. SAGAMY, Pittsburgh, and JOSEPH W. WERTENBAKER, Washington, Pa. Filed June 14, 1920. Serial No. 388,787. 2 Claims. (Cl. 75—1.)

1. An alloy steel consisting of from about .40% to .55% carbon, .50% to 80% manganese, 1.80% to 2.10% silicon, a fraction of 1% to not more than about 1.25% molybdenum, and remainder iron except for impurities.



1,401,926. ALLOY STEEL. GEORGE W. SAGAMY, Pittsburgh, and JOSEPH W. WERTENBAKER, Washington, Pa. Filed June 14, 1920. Serial No. 388,788. 3 Claims. (Cl. 75—1.)

1. An alloy steel consisting of not more than .80% carbon, from about 1.15% to 3.00% manganese, from a fraction of 1% to about 1.25% molybdenum, and the remainder iron.

1,401,927. PROCESS OF RECOVERING MOLYBDENUM FROM MOLYBDENITE. GEORGE W. SAGAMY, Pittsburgh, and JOSEPH W. WERTENBAKER, Washington, Pa. Filed July 9, 1920. Serial No. 394,858. 5 Claims. (Cl. 75—17.)

1. A step in the process of recovering molybdenum from molybdenite, which consists in causing iron oxid to react with molybdenite.

1,401,928. INGOT-POURING MECHANISM. SAMUEL B. SHELDON, Duluth, Minn. Filed Feb. 11, 1920. Serial No. 357,877. 7 Claims. (Cl. 22—79.)

1. Ingot pouring mechanism comprising a trough adapted to receive molten metal from a casting ladle or the like and having a plurality of discharge nozzles, means independent of the tilting of said trough, for controlling the discharge of metal through the nozzles thereof, and additional troughs located beneath each discharge nozzle of the first trough.

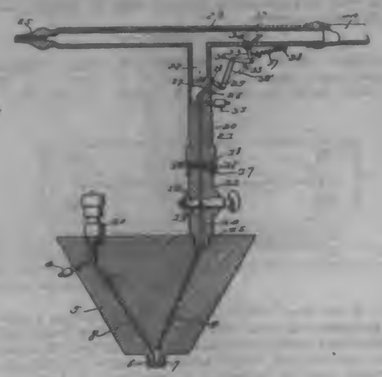
1,401,929. PHONOGRAPH-NEEDLE SHARPENER. AXEL W. WAHLIN, Chicago, Ill., assignor to Gustave Lideen, Chicago, Ill. Filed July 26, 1919. Serial No. 313,466. 8 Claims. (Cl. 144—148.)

1. The combination with a phonograph and the reproducer mechanism thereof, of a needle sharpener slidably mounted on the phonograph and adapted to be moved into position to sharpen a needle while it is held in position in the needle holder of the phonograph reproducer mechanism when said reproducer mechanism is moved into a predetermined position to dispose the needle in the path of said needle sharpener.

1,401,930. PISTON-RING. HENRY ARCHIBALD WAINWRIGHT, Connersville, Ind., assignor to Wainwright Engineering Corporation, Connersville, Ind., a Corporation of Indiana. Filed Aug. 18, 1919. Serial No. 317,216. 7 Claims. (Cl. 74—109.)

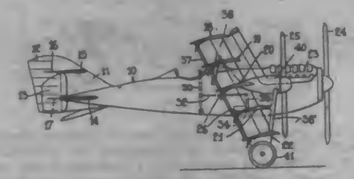
1. A piston ring having on its peripheral face a circumferential series of oblique overlapping grooves, said grooves being so arranged that an any point around the piston there are always two grooves along a line parallel to the axis.

1,401,931. ADJUSTABLE PIPE-WRENCH. WILLIAM WHELAN, Plymouth, England. Filed Aug. 5, 1918. Serial No. 248,931. 2 Claims. (Cl. 81—91.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)



1. A pipe wrench comprising a pair of levers respectively provided with curved inner and outer gripping jaws, a pivot connecting said levers together, a third gripping element extending across the inner end portions of the jaws and having a curved slot in which the said pivot operates, and a pivot connecting said element to the outer jaw and also operating in the said slot.

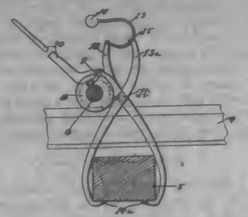
1,401,932. PROCESS OF PRODUCING MOLYBDENUM TRIOXID. JOSEPH W. WEITENKORN, Washington, Pa. Filed June 14, 1920. Serial No. 388,789. 5 Claims. (Cl. 23—13.)



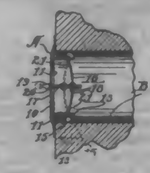
1. The process of producing molybdenum trioxid, which consists in causing an oxid of manganese to react with molybdenite at an elevated temperature, and in supplying oxygen to the resulting heated mass.

1,401,933. DENTAL VULCANIZER. HENRY LOUIS WYSSET, Albany, N. Y. Filed June 14, 1921. Serial No. 477,464. 3 Claims. (Cl. 18—7.)

1. In a safety device for vulcanizers, a valve coupling connected to a discharge opening of the vulcanizer, a safety disk beyond the valve of the coupling, means for holding the disk in place, a pipe in communication beyond the disk, said pipe having a valve seat therein, the said valve being operated by pressure of steam escaping through the coupling, a fuel supply pipe, a valve therein, and means for communicating motion of the valve in the first mentioned pipe to the valve in the fuel pipe for closing the last mentioned valve, and means for holding the valve closed.



1,401,934. HOVERING AIRPLANE. ALBERT F. ZAHM, Washington, D. C. Filed Jan. 22, 1919. Serial No. 272,558. 6 Claims. (Cl. 244—14.)

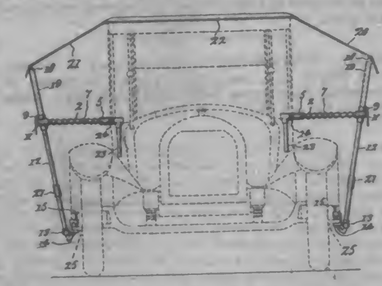


1. In an airplane, the combination, of a plural number of propellers, the axes of the propellers being horizontal, curved supporting surfaces including adjustable and fixed wing panels, the adjustable wing panels being movable into positions whereby the propeller air-blast is deflected downwardly with the result that sufficient vertical lift is obtained to bodily lift the machine into the air without altering its flying attitude and without altering the angular relation of the propeller axis to the horizontal, together with a control surface for maintaining the machine in longitudinal trim, the location of the control surface relatively to the fixed wing panel being such that the propeller air-blast successively impinges the fixed wing panel and the control surface under all flight conditions.

1,401,935. TIE AND RAIL HOLDER. JOHN AHLBY, Bergland, Mich. Filed Apr. 23, 1921. Serial No. 463,854. 2 Claims. (Cl. 254—121.)

1. A device of the class described consisting of a hand lever adapted to fulcrum on a rail, a pair of tongs pivotally mounted on the end of the lever and adapted to grip under a tie placed under the rail, and a curved bar pivotally connected to the upper end of the tongs, said bar being slidable in the upper end of the other tong.

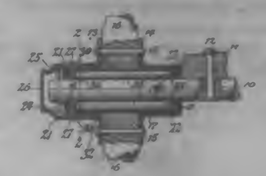
1,401,936. FLUE-STOPPER. LAFAYETTE J. ALLIE, St. Paul, Minn. Filed Feb. 24, 1920. Serial No. 360,807. 8 Claims. (Cl. 126—319.)



1. A flue stopper comprising a closure member, a pair of outwardly extending brackets adapted to be folded back into the plane of said closure member, and a normally planiform spring member adapted to coöperate with said brackets for securing the stopper within a flue opening.

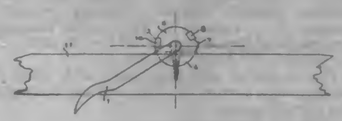
1,401,937. PURIFICATION OF MALEIC ACID BY REDUCING AGENTS. GEORGE C. BAILEY, Woodcliff-on-Hudson, N. J., assignor to The Barrett Company, a Corporation of New Jersey. Filed Nov. 9, 1920. Serial No. 422,794. 9 Claims. (Cl. 23—24.)

1. The process of purifying maleic acid, which comprises treating a mixture of maleic acid and benzoquinone with a reducing agent.



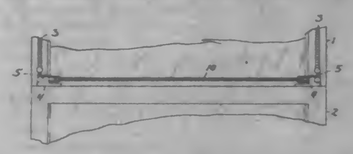
1,401,938. PORTABLE COT FOR USE WITH AUTOMOBILES. CLARENCE F. BALL, Rutland, Vt. Filed May 4, 1921. Serial No. 466,804. 2 Claims. (Cl. 5—72.)

1. A cot for use in connection with vehicles comprising pairs of telescoping side rails adjustably fitted together,



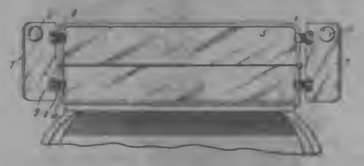
end bars connecting the ends a fabric stretched across said telescoping rails and end bars, four-way coupling pieces incorporated in the outer telescoping rails, legs extending downwardly from the lower branches of the four-way coupling pieces, means uniting said legs at their lower portions, a clamp associated with said means and adapted to engage the running board of the vehicle, standards rising from the upper branches of the four-way coupling pieces, a fabric secured to said standards to form a parallel side for the cot, and angled pieces attached to the inner telescoping rails and adapted to fit down within the sides of the vehicle, substantially as described.

1,401,939. WHEEL-MOUNTING. CHARLES A. BAUMLER, Buffalo, N. Y., assignor to The Buffalo Sled Company, Buffalo, N. Y., a Corporation of New York. Filed Mar. 17, 1920. Serial No. 366,661. 2 Claims. (Cl. 301—3.)



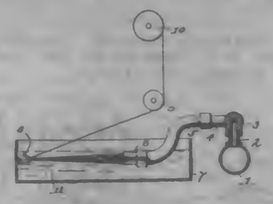
1. A wheel mounting comprising a plurality of rollers arranged parallel and adapted to surround an axle, a cylindrical casing engaging its inner side with the outer side of said rollers and provided at one end with an integral inwardly projecting head having the form of an annular flange, and a removable head detachably connected with the other end of said casing and having the form of a ring.

1,401,940. SKEE-STOPPER. ALBERT HENNING EFRAIM BECKMAN, Stockholm, Sweden. Filed July 1, 1921. Serial No. 481,998. 4 Claims. (Cl. 88—67.)



1. A stopper for skees consisting of a rearwardly directed up and down swingable arm with an integral pivot passed through a lug on the skee, said lug and said pivot having coöperating means for limiting the swinging movement of the arm and for preventing undesired withdrawal of the pivot.

1,401,941. WINDOW-FASTENER. EDWARD M. BROOKS, Fort Wayne, Ind., assignor of one-half to Samuel H Bradshaw, Fort Wayne, Ind. Filed Feb. 4, 1921. Serial No. 442,346. 1 Claim. (Cl. 292—54.)

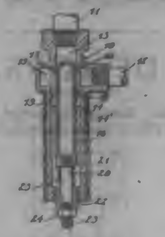


In a securing device for a pair of window sashes, a pair of ratchet members secured to one sash, one at each side thereof; a rod connecting the ratchet members; means in connection with the other sash adapted to be engaged by the ratchets and prevent opening movement of one sash relative to the other; and means in connection with each ratchet to hold the same in engaging and disengaging positions.

1,401,942. SIDE WIND-DEFLECTOR. HENRY BENERS and LOUIS BERGER, Brooklyn, N. Y. Filed July 29, 1920. Serial No. 399,779. 3 Claims. (Cl. 46—67.)

1. A side wind deflector for vehicles comprising a plate of non-reflecting transparent material, mirror means carried by said plate at a determined distance from the outer edge thereof, said mirror means having a relatively restricted area as compared to the area of said non-reflecting transparent plate, and means for securing said plate to the vehicle, said securing means being attached to said plate at a distance from the said outer edge greater than said determined distance.

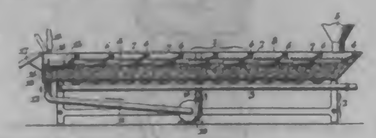
1,401,943. PROCESS FOR THE PRODUCTION OF THREADS. BENNO BOEZINOWSKI, Cleveland, Ohio. Filed Aug. 31, 1917. Serial No. 189,079. 2 Claims. (Cl. 18—54.)



1. The process of producing fine and uniform artificial threads, which consists in discharging the material of which the thread is formed from a plurality of fine openings, thereby producing capillary threads; coagulating such capillary threads and bringing them into a bundle, drawing the bundled threads by a positively driven drawing device; and thereafter, and as a continuing operation, winding the thread thus produced under tension in excess of that exerted by the drawing device.

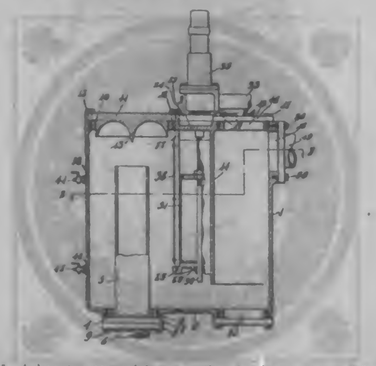
1,401,944. COMPRESSOR-UNLOADING MECHANISM. HALBERT B. HALVORSEN, Chicago, Ill., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Apr. 22, 1919. Serial No. 291,819. 17 Claims. (Cl. 230—24.)

1. In a compressor, in combination, a thermally operated unloading means comprising a casing, a valve therein, operating means for said valve in said casing and comprising a plurality of members having different coefficients of heat expansion, and means for discharging pressure fluid from said casing controlled by said valve.



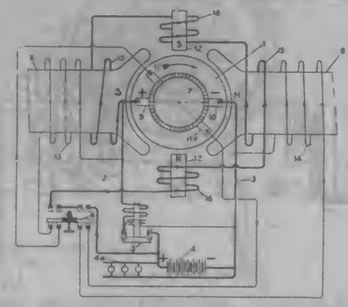
14. In a compressor, in combination, an unloading means including a member having one coefficient of heat expansion, a second member having a different coefficient

of heat expansion, a valve seat connected to said first named member, and a second valve element connected to said second named member by a lost motion connection



and adapted to coöperate with said seat, one of said valve elements being movable relative to the other element upon a change in temperature.

1,401,945. COOKING APPARATUS. FRANK ELLIS MORRIS, Philadelphia, Pa. Filed Jan. 19, 1921. Serial No. 438,322. 3 Claims. (Cl. 53—7.)



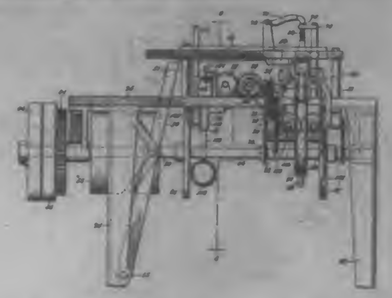
1. An apparatus of the character described comprising a trough or receptacle containing hot liquor into which the articles to be cooked are introduced; in combination with a spray system by which cooking liquor is directed in the form of jets to impinge at an inclination upon the articles for the purpose of progressing them while afloat in the receptacle.

1,401,946. BOOSTER. JOHN OLIPHANT, Chicago, Ill., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Aug. 11, 1919. Serial No. 316,667. 15 Claims. (Cl. 103—84.)

1. A booster comprising a casing having a top and bottom and a discharge opening, and a web coöperating with the side wall thereof to form a discharge passage communicating with said opening and extending from the top of said casing to a point above the bottom thereof.

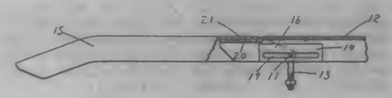
1,401,947. DYNAMO-ELECTRIC MACHINE. WILLIAM A. TURBAYNE, Niagara Falls, N. Y., assignor to U. S. Light & Heat Corporation, Niagara Falls, N. Y., a Corporation of New York. Filed Mar. 9, 1916, Serial No. 83,190. Renewed May 9, 1921. Serial No. 468,160. 18 Claims. (Cl. 290—31.)

2. In a starting and lighting system, a dynamo-electric machine adapted to operate either as a generator or as a motor, said machine including field poles and an armature, and means for permitting the distortion of the field flux by the armature reaction for regulating purposes while the machine is operating as a generator and preventing said distortion while the machine is operating as a motor.



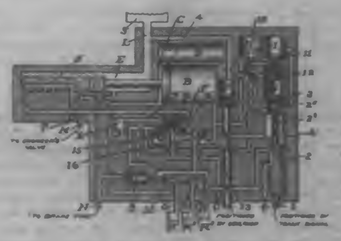
REISSUES.

15,253. MATTRESS-TUFTING MACHINE. GUY DILLON, Indianapolis, Ind., assignor, by mesne assignments, to Simmons Company, Kenosha, Wis., a Corporation of Delaware. Filed Oct. 10, 1921. Serial No. 506,901. Original No. 1,211,924, dated Jan. 9, 1917, Serial No. 90,223, filed May 8, 1916. 4 Claims. (Cl. 112—3.)



4. In a mattress tufting machine, the combination, with a reciprocating needle for carrying the twine through the mattress, and forming a U-shaped loop in said twine, means for temporarily holding the end of the twine in restraint, hitch-turning means adapted to catch and turn a hitch in the twine, a cross-hook adapted to catch the end of the twine when freed by the twine holding means and for pulling said twine end through the U-shaped loop for completing the knot, shifting means for moving said hook to free the twine when the knot is drawn tight and before the needle reaches the upper end of its stroke, and a cam for actuating said shifting means.

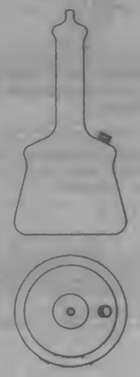
15,254. STAMPING-MACHINE. MATHIAS FORNO and LAWRENCE P. SOUTHWICK, Richmond, Va., assignors, by mesne assignments, to Bickes & Smith Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed May 23, 1919. Serial No. 299,336. Original No. 1,244,428, dated Oct. 23, 1917, Serial No. 62,323, filed Nov. 19, 1915. 48 Claims. (Cl. 216—55.)



17. In a stamp affixing machine, means for holding an unconnected strip of stamps, means for simultaneously severing the strip between each pair of adjacent stamps to form a plurality of unconnected stamps, and means for affixing said stamps.

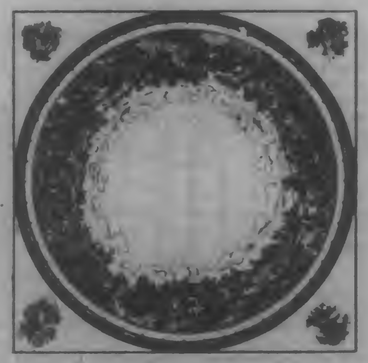
15,255. BUMPER FOR AUTOMOBILES. WALTER P. LIMACHER, Pasadena, Calif. Filed Oct. 1, 1921. Serial No. 504,789. Original No. 1,341,917, dated June 1, 1920, Serial No. 367,807, filed Mar. 22, 1920. 6 Claims. (Cl. 293—55.)

5. A bumper comprising a main body and end horns of channel bar overlapping the ends of said main body, and pivoting members extending through the upper and lower walls of said overlapping end horns and securing the same to said main body.



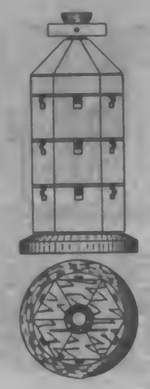
15,256. AIR-BRAKE-CONTROLLING APPARATUS. ANCEL ST. JOHN, Cleveland, Ohio, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Feb. 2, 1920. Serial No. 355,786. Original No. 1,256,607, dated Feb. 19, 1918, Serial No. 809,449, filed Dec. 30, 1913. 17 Claims. (Cl. 246—182.)

15. In a train speed control apparatus, the combination with fluid pressure operated mechanism capable of assuming a plurality of different positions for determining corresponding speed limits of the train, of a valve device having corresponding successive positions and operated from the trackway for controlling the fluid pressure on said mechanism.



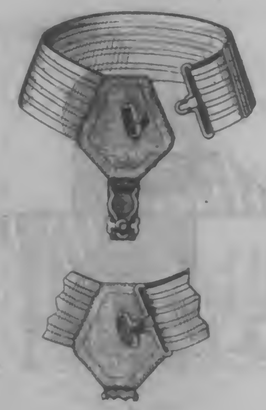
DESIGNS.

60,081. BOTTLE. EDWARD E. BAKER, Pittsfield, Mass. Filed Apr. 13, 1921. Serial No. 461,106. Term of patent 14 years.



The ornamental design for a bottle substantially as shown.

60,082. OILCLOTH TABLE-COVER. CARROOUS BASTOW, Allwood, N. J., assignor to American Wholesale Corporation, Baltimore, Md., a Corporation. Filed Aug. 25, 1921. Serial No. 495,410. Term of patent 7 years.



The ornamental design for an oilcloth table-cover, as shown.

60,083. COMBINED ADVERTISING DEVICE AND REVOLVING STAND. BENJAMIN F. BURNS, Omaha, Nebr. Filed Apr. 11, 1921. Serial No. 460,489. Term of patent 3½ years.

The ornamental design for a combined advertising device and revolving stand, as shown.

60,084. GARTER. TILLMAN CAHN, Elkins Park, Pa., assignor to Pioneer Suspender Company, a Corporation of Pennsylvania. Filed July 14, 1920. Serial No. 396,321. Term of patent 14 years.

The ornamental design for a garter, as shown.

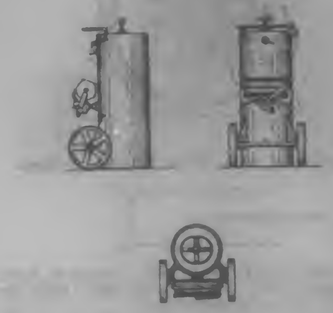
60,085. INDICATOR. ARTHUR B. CHRISTOPHER, St. Louis, Mo. Filed July 2, 1921. Serial No. 482,222. Term of patent 14 years.

The ornamental design for an indicator, as shown.

60,086. [WITHDRAWN.]

60,087. INDIVIDUAL HOG-HOUSE. LUVERNE K. ELLIS, Des Moines, Iowa. Filed July 6, 1920. Serial No. 394,867. Term of patent 3½ years.

The ornamental design for an individual hog house, as shown.



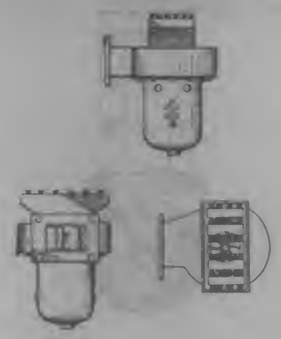
60,088. [WITHDRAWN.]

60,089. COMBINATION CIGAR-CUTTER AND BOX-OPENER. WILLIAM FECHTELER, Kansas City, Mo. Filed Dec. 18, 1920. Serial No. 431,776. Term of patent 14 years.

The ornamental design for a combination cigar cutter and box opener, as shown.

60,090. PORTABLE LIQUID-DISPENSING APPARATUS. TRUMAN H. PERKINS, Seattle, Wash. Filed July 27, 1921. Serial No. 488,019. Term of patent 14 years.

The ornamental design for a portable liquid dispensing apparatus, as shown.

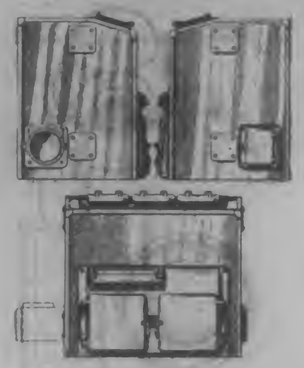


60,091. [WITHDRAWN.]

60,092. COFFIN. ALBERT HALADEY and JAN WROBEL, Minneapolis, Minn. Filed Jan. 4, 1921. Serial No. 435,033. Term of patent 7 years.

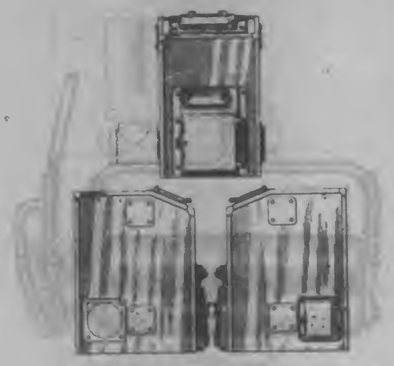
The ornamental design for a coffin as shown.

60,093. VACUUM-CLEANER FOR ERASERS. WILLIAM J. HAYNES, Jr., Kansas City, Mo., assignor to National Wood Renovating Company, Kansas City, Mo., a Corporation of Missouri. Filed July 30, 1920. Serial No. 400,245. Term of patent 14 years.



The ornamental design for a vacuum cleaner for erasers, as shown.

60,094. PINWHEEL. WILLIAM C. HEINDL, Rochester, N. Y. Filed Dec. 8, 1919. Serial No. 343,432. Term of patent 3½ years.

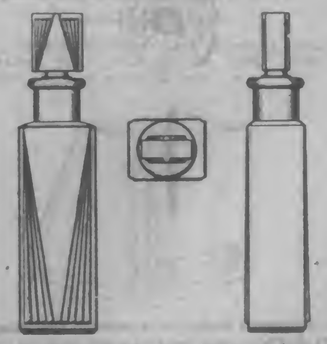


The ornamental design for a pinwheel as shown.

60,095. HEATING APPARATUS. FRANK B. HOWELL, Buffalo, N. Y. Filed Dec. 28, 1920. Serial No. 432,865. Term of patent 14 years.

The ornamental design for a heating apparatus, as shown.

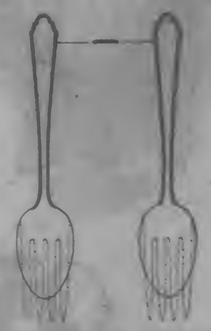
60,096. HEATING APPARATUS. FRANK B. HOWELL, Buffalo, N. Y. Filed Dec. 28, 1920. Serial No. 432,866. Term of patent 14 years.



The ornamental design for a heating apparatus, as shown.

60,097. RAG DOLL. MARGUERITE KABERLAU, Provincetown, Mass. Filed May 12, 1921. Serial No. 469,050. Term of patent 3½ years.

The ornamental design for a rag doll as shown.



60,098. BOTTLE. AUGUST F. KAMMER, South Orange, N. J. Filed Apr. 15, 1921. Serial No. 461,692. Term of patent 14 years.

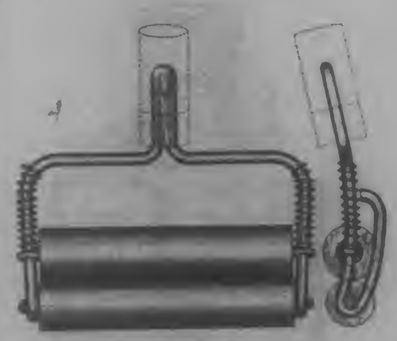
The ornamental design for a bottle, as shown.

60,099. [WITHDRAWN.]

60,100. HANDLE FOR A SPOON, FORK, OR SIMILAR ARTICLE. FREDERICK W. KOONS, Greenfield, Mass., assignor to Rogers, Lunt & Bowlen Company, Greenfield, Mass., a Corporation of Massachusetts. Filed Apr. 14, 1921. Serial No. 461,417. Term of patent 14 years.

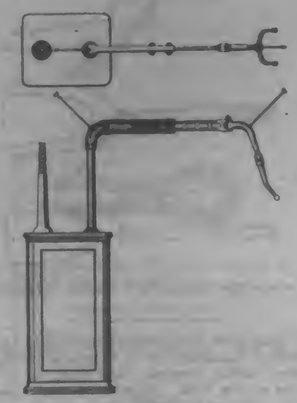
The ornamental design for a handle for a spoon, fork, or similar articles as shown.

60,101. WEATHER-FORECASTING DEVICE. RICHARD LANCASTER, Gilford, N. H. Filed Aug. 4, 1921. Serial No. 489,881. Term of patent 7 years.



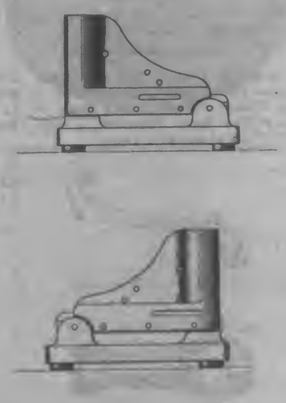
The ornamental design for a weather forecasting device, as shown.

60,102. OIL-BURNER. EDWARD W. MEHAN, Kansas City, Mo. Filed May 20, 1921. Serial No. 472,918. Term of patent 14 years.



The ornamental design for an oil burner as shown.

60,103. MOP-HEAD. MABEL P. MCNAUGHTON and JOHN MCNAUGHTON, New York, N. Y. Filed July 15, 1921. Serial No. 485,107. Term of patent 7 years.



The ornamental design for a mop head, as shown.

60,104. COMBINED CABINET AND STANDARD FOR X-RAY APPARATUS. OSCAR H. PIEPER and ALPHONSE F. PIEPER, Rochester, N. Y. Filed Nov. 18, 1920. Serial No. 425,005. Term of patent 14 years.

DECISIONS

OF THE

COMMISSIONER OF PATENTS

AND OF

UNITED STATES COURTS IN PATENT CASES.

COMMISSIONER'S DECISIONS.

EX PARTE CHANNEL CHEMICAL COMPANY.

Decided December 14, 1921.

1. TRADE-MARKS—MARK NOT USED NOT REGISTRABLE. The use of the mark "O-Cedar" and "Cedarine" *Held* not to constitute use of the word "Cedar."

2. SAME—"CEDAR"—DESCRIPTIVE. The word "Cedar" as a trade-mark for polished floors, furniture, etc., *Held* to be descriptive.

3. SAME—DESCRIPTIVE PART OF MARK NOT REGISTRABLE. *Held* that an applicant cannot mutilate his mark to convert it into a descriptive mark and register it.

APPEAL from Examiner of Trade-Marks.

TRADE-MARK FOR HARDWOOD FLOORS, WOODWORK, ETC.

Mr. Joseph B. Lawler and *Messrs. Milans & Milans* for the applicant.

FENNING, *Assistant Commissioner:*

This is an appeal from the decision of the Examiner of Trade-Marks refusing to register as applicant's trade-mark for polish for hardwood floors, woodwork, furniture, automobiles, and other goods the word "Cedar."

Applicant claims use since the year 1886. The labels filed as specimens show "O-Cedar." An affidavit of Mr. Channel in the file indicates that the use of "O-Cedar" began in 1907, and that applicant relies for its 1886 date upon a registered mark "Cedarine," which it purchased in 1917, and which applicant uses as a mark along with its "O-Cedar" mark, but on separate goods. It will be seen, therefore, that applicant alleges use of a mark which must be registered under the ten-year clause of the act of 1905, since it is clear that the word "cedar" is descriptive of a polish which may include oil of cedar, or which may even be adapted especially for polishing cedar wood.

The Examiner of Interferences has refused registration on the ground that trade-mark use of the word "Cedar" has not been shown. Applicant rests its case not on the "Cedarine" labels, but on the "O-Cedar" labels, which are filed herewith. It seems clear that applicant would not be allowed to register a part of the word "Cedarine." (*Ex parte Fitzpatrick Bros.*, 1919, T. M. Rep., 122, 257 O. G., 1081; 1918, C. D., 217; 48 App. D. C., 241; (*ex parte Stephen F. Whitman & Son*, 1910, C. D., 28; 151 O. G., 196.) Therefore no claim can be made to use prior to 1907 of the mark now demanded, even assuming that it is possible to lay claim to the present mark "Cedar" by the use of labels marked "O-Cedar."

I am unable to see, therefore, that applicant has shown such a trade-mark use of the word "Cedar" as will justify registration. Even if applicant's mark "O-Cedar" is registrable as a technical trade-mark it is merely because it is not the single descriptive word "Cedar." Applicant cannot mutilate that mark so as to convert it into a descriptive mark and register only the descriptive part. It seems unnecessary to cite cases in this respect, but it is interesting to note that in *Quaker City Flour Mills Co.* v. *The Quaker Oats Co.* (214 O. G., 684; 43 App. D. C., 260), the Court of Appeals of the District of Columbia declined to allow an applicant to register the arbitrary word "Quaker" based on a label use of the geographic "Quaker City." The Supreme Court in *Beckwith* v. *Commissioner of Patents*, (274 O. G., 613; 252 U. S., 538,) speaking by Mr. Justice Clark, says:

> The commercial impression of a trade-mark is derived from it as a whole not from its elements separated and considered in detail. For this reason it should be considered in its entirety.

At least so far as the Patent Office is concerned the entire mark should be registered.

Applicant refers to the case of *Allen* v. *Walker & Gibson*, (235 Fed. Rep., 230,) in which the court said of "Cedarine" and "O-Cedar" that "cedar" was the controlling word. Attention is also called to a decree entered in July, 1919, in the circuit court of Cook Co., Illinois, in a suit between the Channel Chemical Co. and Grossman Mfg. Co., from which it appears that "cedar" is frequently adopted by customers calling for applicant's goods, and in which defendant was restrained from using the word "cedar" upon or as a part of or in connection with the labels on furniture polish. It seems from this that applicant is obtaining all the protection it would obtain from registration of the word "Cedar" of which it has shown no trade-mark use.

It would seem that the registration in 1887 of the single word "Hunyadi" was really unnecessary for the protection of Saxlehner's rights. (*Saxlehner* v. *Bisner & Mendelson Company*, 179 U. S., 19.)

The Examiner of Trade-Marks is affirmed and registration of "Cedar" refused.

LOOSE-WILES BISCUIT COMPANY v. JOHNSON EDUCATOR FOOD COMPANY.

Decided December 14, 1921.

1. TRADE-MARK—OPPOSITION—FILING SPECIMENS OF LABELS.

The requirement that an opposer file specimens of the labels used by it *Held* to be a reasonable requirement.

2. SAME—SAME—PLEADINGS.

Where the ultimate fact is that opposer has applied a certain label to its goods, the appropriate way to plead that fact is to present the label.

ON PETITION.

TRADE-MARK FOR COOKIES, CRACKERS, CAKES AND BISCUITS.

Messrs. Emery, Booth, Janney & Varney for Loose-Wiles Biscuit Company.

Mr. Henry C. Thomson and *Mr. Nathan B. Day* for Johnson Educator Food Company.

FENNING, *Assistant Commissioner:*

This is a petition from the action of the Examiner of Interferences granting a motion by applicant for a further bill of particulars requiring the opposer to file specimens of its mark referred to in the notice of opposition. The notice of opposition shows that opposer has used the mark involved "descriptively and to indicate *origin* in the manner stated." The Examiner of Interferences took this statement to indicate a trademark use and he seems to have been justified. As late as 1920 the Supreme Court, in *Beckwith* v. *Commissioner of Patents*, (1920, C. D., 471; 274 O. G., 613; 252 U. S., 538,) defines a trade-mark as pointing "to the *origin* or ownership of the wares to which it is applied." It is elemental trade-mark law that a trade-mark "indicates origin" and it seems reasonable to expect both the applicant and the Examiner of Interferences to assume an opposition drawn by the able counsel who represent opposer employs technical words in a technical sense in a trade-mark suit such as this.

Opposer insists that the order of the Examiner of Interferences calls for filing a label which has been affixed to the goods, and it is insisted that the notice of opposition does not indicate any such use. The order of the Examiner of Interferences is for—

at least one of the specimens used by the opposer "to indicate origin" if in fact such specimens have been used.

It will be noted that the order merely calls for a specimen described in the words of the notice of opposition. The order further gives the opposer the option of explaining the ambiguity in the notice of opposition in lieu of filing such specimens.

Opposer seems dissatisfied in that it reads the order as instructions to file but one specimen, and it fears that the filing of one specimen may be an election to prove no other specimens. It seems clear, however, that the order can be complied with by filing a multiplicity of specimens, since the order calls for "at least" one.

The whole question here seems to arise from a misunderstanding by opposer of the words "ultimate facts" as employed in *Wolcott* v. *National Electric Signaling Co.*, (235 Fed. Rep., 224.) That case indicates the true rule that a pleading should incorporate the ultimate facts. In the present instance the ultimate fact is that opposer has applied a certain label to its goods. The appropriate way to plead that fact is to present the label, and not to endeavor to more or less loosely describe it. If the ultimate fact is that no such label has been used, the order of the Examiner of Interferences provides for a definite statement to that effect.

Rather than allow an opposer to urge in general terms that he or the general public has used something which he believes will prevent the registration of applicant's mark it seems reasonable to require the opposition to be made definite by submission of a specific label. Without this applicant may be unable to determine whether a motion to dismiss should be filed or not. It is believed that applicant should be definitely and fully informed of the facts opposer proposes to urge. It may be that this is a particularly aggravated case, since opposer suggests that it has used, in one or another of its plants, a large number of labels, and it may overlook some in filing specimens. Much more is applicant at a loss to determine which of the many labels of opposer are pertinent.

Opposer's chief argument seems to be directed to the procurement of an interpretation of the equity rules which would allow vague indefinite pleadings to be filed which would give no information as to the real facts of the case. This does not appeal to the conscience of the tribunal.

The practice of requiring opposers to file specimens is well established and seems to work for good, since it produces definite clear concise issues early in the case.

The petition is denied.

EX PARTE CONNER & CO.

Decided December 15, 1921.

TRADE-MARKS — OPPOSITION — DOUBT RESOLVED AGAINST LATER ENTRANT.

Held that in opposition proceedings the rule is well established that doubt as to likelihood of interference should be waived against the later entrant into the field.

ON APPEAL.

TRADE-MARK FOR TABLE SIRUP.

Mr. Arthur E. Wallace for the applicant.

FENNING, *Assistant Commissioner:*

This is an appeal from the action of the Trade-Mark Examiner refusing to register applicant's trade-mark "Melomar," for table sirups. The Examiner relies on the prior registered mark, 93,259, for a compound of raisin sirup and cane sugar, consisting of the word "Melo."

Applicant urges that its goods are not of the same descriptive properties as raisin sirup and cane sugar. I believe that they are of the same descriptive properties, and so hold. The marks are so nearly alike as to be likely to cause confusion. The Examiner, in his statement, has referred to a number of manuscript decisions supporting this conclusion, and these seem sufficient here.

In opposition proceedings the rule is well established that doubt as to likelihood of interference should be waived against the later entrant into the

field. Applicant urges that the same rule should not be applied with respect to an ex parte rejection. I am unable to reach this conclusion. The Office must represent the whole public, including the prior registrant whose mark is relied upon as grounds for refusing registration.

The Examiner of Trade-Marks is affirmed and registration is refused.

TITUS v. BURTON AND CIOMEI v. THE LADDIE BOY MFG. CO. v. DAVIS & VOETSCH v. YOST.

Decided December 16, 1921.

1. TRADE-MARKS—EFFECT OF FILING AN APPLICATION.

Section 16 of the Trade-Mark Act of February 20, 1905, provides that "the registration of a trade-mark under the provisions of this act shall be prima facie evidence of ownership." When an applicant has filed an application making therein such a showing and averment as will justly entitle him to registration, the evidence is, in the absence of anything to the contrary, the same as when he becomes a registrant. It would seem a fair deduction, and it is so held, that the presumption of ownership should be carried back to the date when he had filed the complete evidence entitling him to registration, (citing *Rosenberg Co.* v. *Phillips-Jones Company, Inc.*, 289 O. G., 411, and *Wm. Wrigley, Jr. & Co.* v. *Norris*, 152 O. G., 488; 34 App. D. C., 138.)

2. SAME—DECLARATION OF INTERFERENCE—MECHANICAL APPLICATIONS.

The change in the practice governing the declaration of interferences between applications for patents on inventions in mechanical devices, whereby no interference is declared unless the junior party alleges a date of invention prior to the filing date of the senior party, which change is fully set forth and approved by the United States Supreme Court in the case of *Ewing, Commissioner of Patents*, v. *United States, ex rel. The Fowler Car Company*, (238 O. G., 983; 244 U. S., 1.) was brought about by the tremendous and ever-increasing amount of work of this character devolving upon this Office and the absolute necessity for eliminating such portion as seemed unnecessary to the preservation of the interests of all applicants.

3. SAME—SAME—TRADE-MARK APPLICATIONS.

From analogy it is believed that, as is the practice in declaring interferences between application for patents for inventions relating to mechanical devices, ordinarily the application of the senior party for the registration of a trade-mark, which application is such as to establish a right to registration, should not be included in an interference with that of a junior party unless the latter alleges adoption and use of the mark prior to the date of the filing of the earlier application, but where in such a case a question is raised as to whether the senior party has filed such an application *Held* that the rights of the parties may be established by an interference proceeding.

ON PETITION to the Commissioner to exercise supervisory authority.

TOY DOGS.

Mr. Hazen J. Titus pro se.

Mr. B. G. Foster for Burton and Ciomei.

Mr. Max D. Ordmann for The Laddie Boy Mfg. Co.

Messrs. Spear, Middleton, Donaldson and Hall for Davis & Voetsch.

Mr. William N. Roach, Jr., for Yost.

KINNAN, *First Assistant Commissioner:*

The party Davis and Voetsch has presented a petition that the Commissioner exercise his supervisory authority to direct the Examiner of Interferences in charge of trade-marks to give petitioners a reasonable time to gather facts and submit affidavits covering the same for showing that the party Yost was not, at the time of the filing of his application for registration, the owner of the trade-mark therein set forth within the purview of the trade-mark laws; also, to direct the Examiner of Interferences in charge of trade-marks to permit petitioners to establish by proofs that they are the owners of the trade-mark for which they seek registration.

It appears an application for the registration of the trade-mark "Laddie Boy," as applied to toy animals, including toy dogs, was filed by the party Yost. The application was accompanied by the usual affidavit required by section 2 of the act of February 20, 1905, setting forth ownership and use of the mark, and by specimens of the mark as actually used. Subsequently several other applications for registration of the same mark applied to the same class of goods were filed by other applicants, including petitioners. An interference, as provided for under section 7 of this act, was declared to exist. None of the parties alleged a date of adoption and use of the mark as early as the date on which Yost filed his application. Thereupon the latter, in view of the change of practice set forth in a recent decision of the Assistant Commissioner in the case of *The Rosenberg Company* v. *Phillips-Jones Company, Inc.*, (289 O. G., 411,) filed before the Examiner of Interferences in charge of trade-marks a motion to dissolve. The motion was denied; but by reason of the fact that the alleged dates of adoption and use of the mark by the junior parties were all subsequent to the filing date of the senior party, Yost, these junior parties were all cited to show cause, within a certain period, why judgment on the record should not be rendered against them. The party Burton and Ciomei filed, within this period, an affidavit of Burton alleging that after an investigation affiant had failed to find any indication that the senior party used the mark as early as stated in the oath accompanying the application of such senior party. In view of this affidavit of Burton the Examiner of Interferences held sufficient cause had been shown and has indicated that he will, when the present petition has been disposed of, set times for the taking of testimony to determine the rights of priority as between Yost and Burton & Ciomei. As to the other parties, including petitioners, judgment was rendered against them.

There are two questions presented in this petition for decision here. First, whether the decision in the *Rosenberg Company* v. *Phillips-Jones Company, Inc.*, should be extended to include a holding that for purposes of interference proceedings a regular application for the registration of a trade-mark, supported by an affidavit fully meeting the requirements of section 2, and accompanied by specimens of the mark as actually used, the application being sufficient in the absence of opposing interests to justly entitle the applicant to registration, should

be taken as prima facie proof of ownership on the date the application was filed when there has not yet been a registration of the mark. The second question is whether the party Yost has filed such an application.

In view of the disposition of the case the answer to the first question need not be made at this time; but in view of the change of practice suggested by the decision in the *Bloomsbury Company* v. *Phillips-Jones Company* case it is deemed advisable to consider such first question here.

The change in the practice governing the declaration of interferences between applications for patents on inventions in mechanical devices, whereby no interference is declared unless the junior party allege a date of invention prior to the filing date of the senior party, which change is fully set forth and approved by the United States Supreme Court in the case of *Ewing, Commissioner of Patents*, v. *United States ex rel. The Fowler Car Company*, (238 O. G., 983; 244 U. S., 1,) was brought about by the tremendous and ever-increasing amount of work of this character devolving upon this Office and the absolute necessity for eliminating such portion as seemed unnecessary to the preservation of the interests of all applicants. From analogy it would appear that such practice should be extended to applications for the registration of trade-marks. The difference between the disclosure of an application for a patent for an invention in a mechanical device and one for the registration of a trade-mark is not overlooked. The former is conclusive, at least as to the possession of the applicant, of a knowledge of whatever invention is clearly disclosed, while the application for the registration of a trade-mark is not conclusive as to adoption and use of the mark set forth in the case.

Section 16 of the act herein reviewed states that—

> the registration of a trade-mark under the provisions of this act shall be prima facie evidence of ownership.

When such an applicant has filed an application making therein such a showing and averment as will justly entitle him to registration, the evidence is, in the absence of anything to the contrary, the same as when he becomes a registrant. It would seem a fair deduction, and it is so held, that the presumption of ownership should be carried back to the date when he had filed the complete evidence entitling him to registration. The registration, in my judgment, is an act based upon a presumption of ownership which attached when the complete evidence was first placed in the Office. In the case of *Wm. Wrigley, Jr., & Co.* v. *Norris* (152 O. G., 488; 34 App. D. C., 138) the court says:

> The application of appellant being regular in form entitled him prima facie to the right of registration.

This decision would seem to further support the view that the date of filing should be regarded as the date establishing prima facie proof of ownership of the mark.

If it be admitted this conclusion is correct, does evidence of adoption and use of the mark applied to the same class of goods by another, subsequent to this date of filing of the senior applicant, affect or rebut this prima facie proof of ownership? Upon what theory can this be answered in the affirmative? If all the acts set up in the pleadings are admitted to be true, yet if they all took place subsequent to the date of filing of the complete application of the senior party they would appear to have no bearing upon the question of priority unless in some manner they tend to disprove or rebut the allegations of such senior party.

In view of the foregoing it is believed that, as is the practice in declaring interferences between applications for patents for inventions relating to mechanical devices, ordinarily the application of a senior party which is such as to establish a right to registration should not be included in an interference with that of a junior party, unless the latter alleges adoption and use of the mark prior to the date of the filing of the earlier application.

Regarding the second question, whether Yost has filed such an application as entitles him to be regarded as having established prima facie proof of ownership, the averments set forth in the affidavit of Burton and the matters embodied in the brief of counsel for petitioners relating to the apparent inconsistencies in the affidavit of the party Yost, especially the last allegation as to the use of the mark in commerce with England and Germany, are sufficient to justify the holding that the petitioners should be permitted to take testimony in support of their contentions.

The petition is granted.

ADJUDICATED PATENTS.

(U. S. C. C. A. Mo.) The Kauffman patent, No. 1,170,544, for radiator shield, *Held* valid. *Sodemann Heat & Power Co.* v. *Kauffman*, 275 Fed. Rep., 593.

(U. S. C. C. A. Mo.) The Kauffman design patents, No. 48,939 and No. 49,140, for designs for radiator shield, *Held* void. *Sodemann Heat & Power Co.* v. *Kauffman*, 275 Fed. Rep., 593.

(U. S. D. C. Conn.) The Menzer patent, No. 1,230,750, for strip-metal blocker, claim 1 *Held* valid and infringed. *Menzer* v. *Kenworthy*, 275 Fed. Rep., 649.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 6TH DAY OF DECEMBER, 1921.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Adams, Walter L., assignor to The Enterprise Manufacturing Company, Akron, Ohio. Fishing-reel. No. 1,398,956; Dec. 6.

Adamson, George P., Huntington, assignor to General Chemical Company, New York, N. Y. Making alkyl sulfuric acid. No. 1,398,954; Dec. 6.

Ahearn, Thomas, Ottawa, Ontario, Canada. Driving mechanism for talking machines. No. 1,398,979; Dec. 6.

Aigrand, Marcel D., Indiana, Pa. Bit-box. No. 1,398,880; Dec. 6.

Alden Speare's Sons and Vise Company, The. (See Long, John E., assignor.)

Allen, Edward B., Newtown, Conn., assignor to The Singer Manufacturing Company. Power-table. No. 1,399,284; Dec. 6.

Allen, Edward V., Waukegan, Ill. Automobile-fender. No. 1,398,957; Dec. 6.

Allen, Robert E. B., Pensacola, Fla. Cuff-button. No. 1,398,924; Dec. 6.

Allworth, Arthur B., assignor to Edward Miller & Company, Meriden, Conn. Electric fixture. No. 1,398,936; Dec. 6.

American Chain Company. (See Bayburn, John R., assignor.)

American Coke & Chemical Company. (See Roberts, Arthur, assignor.)

American Optical Company. (See Pellow, Arthur, assignor.)

American Steel and Wire Company of New Jersey, The. (See Hellman, Frank, assignor.)

American Telephone and Telegraph Company. (See Demarest, Charles S., assignor.)

American Telephone and Telegraph Company. (See Rhodes, William A., assignor.)

American Transformer Company. (See Schermerhorn, John L., assignor.)

American Wells Works, The. (See Kerr, Charles V., assignor.)

American Wood Working Machinery Company. (See McMichael, James D., assignor.)

Anderson, Charles G., Jr., Buffalo, N. Y. Priming-cup. No. 1,399,596; Dec. 6.

Anderson, Edward L. and L. A., assignor to R. & G. Company, Attleboro, Mass. Pencil. No. 1,398,955; Dec. 6.

Anderson, John, Seattle, Wash. Truck attachment for automobiles. No. 1,399,597; Dec. 6.

Anderson, Louis A. (See Anderson, Edward L. and L. A.)

Anderson, William W., Michigamme, Mich. Flashlight-generator. No. 1,399,598; Dec. 6.

Angell, Otis R., Haverhill, Mass., assignor to Hamel Shoe Machinery Company. Edge setter and burnisher. No. No. 1,398,993; Dec. 6.

Angelo, Louis, Kansas City, Mo. Antiskid-tread. No. 1,399,179; Dec. 6.

Armitage, George H., Woonsocket, R. I., assignor to Kelley Ticket Machine Company, New York, N. Y. Delivery mechanism for vending machines. No. 1,398,994; Dec. 6.

Armstrong, Morgan K., Winnetka, assignor to Bestwall Manufacturing Company, Chicago, Ill. Weather-board. No. 1,399,485; Dec. 6.

Atkinson, George K., Brooklyn, N. Y., assignor to Aurora Tool Works, Aurora, Ind. Drilling-machine. No. 1,399,599; Dec. 6.

Aurora Tool Works. (See Atkinson, George K., assignor.)

Austin, Stephen F., San Antonio, Tex. Road-building machine. No. 1,399,681; Dec. 6.

Auto-Ordnance Corporation. (See Payne, Oscar V., assignor.)

Ayres, Reuben B., New York, N. Y. Gas-generator. No. 1,399,285; Dec. 6.

Babcock & Wilcox Company, The. (See Sellens, Francis C., assignor.)

Baer, Carl J., St. Louis, Mo. Dredging system. No. 1,399,286; Dec. 6.

Bagley, John N., and W. M. Dutton, Hastings, Nebr. Grease-pump. No. 1,399,240; Dec. 6.

Bailey, Fred L., and J. H. La Grant, Wichita, Kans. Core for tire-casings. No. 1,399,180; Dec. 6.

Baines Engineering Company, The. (See Baines, Henry C., assignor.)

Baines, Henry C., Cleveland, assignor to The Baines Engineering Company, Canal Dover, Ohio. Self-propelled agricultural implement. No. 1,399,040; Dec. 6.

Baits, Stuart G. (See Jukes, S. L., and Baits.)

Baker, Erle K., assignor to Baker Wheel & Rim Company, Chicago, Ill. Wheel for automobiles. No. 1,399,720; Dec. 6.

Baker, Erle K., assignor to Universal Rim Company, Chicago, Ill. Demountable-rim construction. No. 1,399,041; Dec. 6.

Baker Wheel & Rim Company. (See Baker, Erle K., assignor.)

Baker Wheel & Rim Company. (See Hawley, Charles G., assignor.)

Baldwin Locomotive Works, The. (See Holloway, Jesse F., assignor.)

Balthasar, Arthur, Montclair, N. J. Lacing-closure. No. 1,398,995; Dec. 6.

Bangle, James A. (See Touchstone, B. F., Gardner, Bangle, Sullivan, and Hardin.)

Barders, Jose M., New York, N. Y. Combination-tool. No. 1,398,996; Dec. 6.

Bardon, Ray O., Upper Sandusky, Ohio. Antislipping attachment for shoes. No. 1,399,682; Dec. 6.

Barnhart, George. (See Burke, C. E., and Barnhart.)

Barnum, Oliver S. (See Williams, F. E., and Barnum.)

Barrows, Harry W., Omaha, Nebr. Vacuum-brake. No. 1,399,099; Dec. 6.

Barry, James F., Chicago, Ill. Pipe or conduit hanger. No. 1,399,456; Dec. 6.

Barsch, Wilhelm, Lucerne, Switzerland. Device for sharpening the blades for safety-razors. No. 1,399,241; Dec. 6.

Bartels, Carl. (See Mosler, M., and Bartels.)

Basch, David, New York, N. Y. Ear-muff. No. 1,398,954; Dec. 6.

Bascom, Perry H., Boundbrook, N. J., assignor to The Dorr Company. Automatic control of reactions. No. 1,399,181; Dec. 6.

Bastian, Charles L., Chicago, Ill. Dispensing apparatus. No. 1,399,373; Dec. 6.

Batchelder, Frank R., assignor to Mills Belt Company, Worcester, Mass. Wide belt and fastener therefor. No. 1,399,457; Dec. 6.

Bayliss, Jerome Z., assignor of one-half to A. E. Merkel, Cleveland, Ohio. Toy. No. 1,399,537; Dec. 6.

Bear Manufacturing Company. (See Sandbo, Anton I., assignor.)

Beaver Company, The. (See Roberts, David E., assignor.)

Beavers, Lambert E., Philadelphia, Pa. Umbrella-support. No. 1,399,683; Dec. 6.

Beeman, Roscoe H., Albany, N. Y. Lamp globe or shade. No. 1,399,042; Dec. 6.

Beers, Earl E., Lakehurst, N. J. Railway safety appliance. No. 1,399,600; Dec. 6.

Belcher, Mark, Goose Creek, Tex. Check-valve. No. 1,399,684; Dec. 6.

Belknap, Joel B., Midland, Mich. Vehicle road-track. No. 1,399,043; Dec. 6.

Bell, George B., assignor to S. L. Bell, Cambridge, Mass. Vehicle-wheel. No. 1,399,331; Dec. 6.

Bell, H. G. (See Eaton, George M., assignor.)

Bell, Sarah L. (See Bell, George B., assignor.)

Bellis, Arthur B., Springfield, Mass., assignor to The Bellis Heat Treating Company, New Haven, Conn. Heat treatment of metals. No. 1,399,044; Dec. 6.

Bellis Heat Treating Company, The. (See Bellis, Arthur E., assignor.)

Benedict, James Z., Cedar Rapids, Iowa. Rope-grip. No. 1,399,182; Dec. 6.

Bennett, Charles W. (See Saunders, C. L., Stanley, and Bennett.)

Bennett, Oscar W., Colby, Kans. Stacker. No. 1,399,242; Dec. 6.

Benson, Robert S., Middleton St. George, England. Propulsion-screen. No. 1,398,997; Dec. 6.

Bentley, Anson J., Niles, Ohio. Freezing-can. No. 1,399,287; Dec. 6.

Bentley, John. (See Scott, W. H., and Bentley.)

Bergman, Axel G., assignor to Ordnance Engineering Corporation, New York, N. Y. Trench-mortar. No. 1,399,243; Dec. 6.

Bernstein, Rudolf, Halle-on-the-Saale, Germany. Agricultural machine. No. 1,399,045; Dec. 6.

Berthold, Emily. (See Zahn, Joseph A., assignor.)

Bestwall Manufacturing Company. (See Armstrong, Morgan K., assignor.)

Bicker, Edgar B., St. Louis, Mo. Tenon-anchor. No. 1,399,183; Dec. 6.

Billingham, Milton C. J., Kalamazoo, Mich. Paper-stock-treating machine. No. 1,399,184; Dec. 6.

Bird, David B., Chicago, Ill. Fuller ball. No. 1,399,459; Dec. 6.

Birkhead, Eric E., and G. O. Lillegren, Chicago, Ill.; said Birkhead assignor to said Lillegren. Alarm-device for automatic fire-extinguishing systems. No. 1,399,374; Dec. 6.

Bissell, Wayne W. Rochester, Minn. Stump-puller. No. 1,398,947; Dec. 6.

Bjerrum, Julius, assignor to Bjerrum Manufacturing Company, Watertown, S. D. Kiln contractor and stacker. No. 1,398,941; Dec. 6.

Bjerrum Manufacturing Company. (See Bjerrum, Julius, assignor.)

Blenke, Hans H., Hamburg, near Copenhagen, Denmark. Internal-combustion engine, which may be directly reversed. No. 1,399,723; Dec. 6.

Blaylock, Sidney O. (See Lee, F. S., McCallum, and Blaylock.)

Blencoe, Warren S., assignor to The Tennessee Products Company, Dresher, Ohio. Producing briquette coke. No. 1,399,245; Dec. 6.

Blencoe, Warren S., assignor to The Tennessee Products Company, Dresher, Ohio. Extraction of phosphorus, arsenic, and sulfurs from metals ores. No. 1,399,244; Dec. 6.

Blodgett, George E., M. F. Chaney, Brooklyn, and E. T. Hartley, New York, N. Y. Sparking-plug. No. 1,399,270; Dec. 6.

Blodgett, George E., M. F. Chaney, Brooklyn, and E. T. Hartley, New York, N. Y. Sparking-plug. No. 1,399,276; Dec. 6.

Blomstrand, Robert B., Sundsvall, Sw. Indestructible car train. No. 1,399,247; Dec. 6.

Blank, Heinrich. (See Imhoff, A. and Blank.)

Blye, Harold, assignor to National Brass Company, Grand Rapids, Mich. Lock set. No. 1,399,729; Dec. 6.

Blythe, Harry B., et ux. (See Cramm, George H., assignor.)

Boit, William J., Platteville, Wis. Lawn-mower attachment. No. 1,398,601; Dec. 6.

Christiansen, Arnold, Detroit, Mich. Mill for rolling tapered steel. No. 1,398,934; Dec. 6.

Christiansen, Arnold, Detroit, Mich. Forming wheel blanks. No. 1,398,936; Dec. 6.

Christie, Alberton R., St. Louis, Mo. Hoodboard. No. 1,399,271; Dec. 6.

Chubb, Lewis W., Pittsburg, Pa., assignor to Westinghouse Electric and Manufacturing Company. Electrical precipitating system. No. 1,399,477; Dec. 6.

Clark, Charles D., assignor to W. G. Sherrill Electrical Engineering, Canada. Fuel-economizer. No. 1,398,960; Dec. 6.

Clarke, Harold J. (See Rose, Harry E., assignor.)

Clatworthy, Cecil G. (See Harper, Eugene D., assignor.)

Clay, Samuel S. (See Patterson, F. D., and Clay.)

Cleyton, Fabius, Coventry, assignor to Countryside, Ltd., London, England. Arithmetical adding apparatus. No. 1,399,201; Dec. 6.

Cleveland Tractor Company, The. (See White, Rollin H., assignor.)

Cloetens, Georges, Brussels, Belgium. Beating-reed and beating-reed organ. No. 1,399,462; Dec. 6.

Clough, Alfred N., Sunnyvale, Calif. Water-heater. No. 1,399,192; Dec. 6.

Clover, Eliot K., Lobrville, Iowa. Checkrein-holder. No. 1,399,403; Dec. 6.

Cluley, John P., Chicago, Ill. Headlight. No. 1,399,378; Dec. 6.

Cochran, Clyde E., assignor to The Elwell-Parker Electric Company, Cleveland, Ohio. Industrial truck. No. 1,399,349; Dec. 6.

Coe, Clyde G., Lawrence, Kans. Fly-swatter. No. 1,399,195; Dec. 6.

Cole, Alston P., Brockton, Mass. Interior decorative finish. No. 1,399,330; Dec. 6.

Cole, Ira L., assignor to Gisholt Machine Company, Madison, Wis. Universally-adjustable work or tool holder. No. 1,399,194; Dec. 6.

Collier, David R., assignor to Collier Keyworth Company, Gardner, Mass. Chair-iron. No. 1,399,464; Dec. 6.

Collier, David R., assignor to Collier Keyworth Company, Gardner, Mass. Stool. No. 1,399,465; Dec. 6.

Collier, David R., assignor to Collier-Keyworth Company, Gardner, Mass. Chair-iron. No. 1,399,466; Dec. 6.

Collier-Keyworth Company. (See Collier, David R., assignor.)

Collier, Paul R., Philadelphia, Pa. Headlight for automobiles or other vehicles. No. 1,399,195; Dec. 6.

Collins, Albert P., Amherst, Nova Scotia, Canada. Submarine rescue craft. No. 1,399,196; Dec. 6.

Condit, Sears B., Jr. (See Burnham, George A., assignor.)

Connor, Herschel M. (See Craig, C. F., and Connor.)

Connors, Frederick P., Montreal, Quebec, Canada. Vehicle-jack. No. 1,399,091; Dec. 6.

Consolidated Mining & Smelting Company of Canada. (See Lee, F. E., McCallum, and Blaylock, assignors.)

Cope, Willard C., Woodbury, N. J., assignor to E. I. du Pont de Nemours and Company, Wilmington, Del. Detonating composition. No. 1,399,104; Dec. 6.

Corby, Edward A., Brooklyn, assignor to Tiffany & Co., New York, N. Y. Printing-press gage. No. 1,399,291; Dec. 6.

Cordes, Henry F., Cincinnati, Ohio. Door-holder. No. 1,399,467; Dec. 6.

Courtaulds, Ltd. (See Clayton, James, assignor.)

Cozens, George H., Hamilton, assignor of one-fourth to J. Hagey, Brantford, one-fourth to H. H. Blythe, and one-fourth to F. H. Secord, Hamilton, Ontario, Canada. Dash fastener. No. 1,399,105; Dec. 6.

Craig, Charles F., and H. M. Connor, San Francisco, Calif., assignor to Craig Golfmaster Co. Captive-ball practice device. No. 1,399,292; Dec. 6.

Craig, Charles F., and H. M. Connor, San Francisco, Calif., assignor to Craig Golfmaster Co. Playing-ball. No. 1,399,293; Dec. 6.

Craig Golfmaster Co. (See Craig, C. F., and Connor, assignors.)

Cranmer, Frank B. (See Hampshire, H. F., and Cranmer.)

Cryson, George B., assignor to The Sperry Gyroscope Company, Brooklyn, N. Y. Spark-gap. No. 1,399,095; Dec. 6.

Crowe, Robert L., Memphis, Tenn. Quinin silver phosphate composition and making same. No. 1,399,604; Dec. 6.

Cunelio, Henry, New Orleans, La. Water-toboggan. No. 1,399,468; Dec. 6.

Cunerty, Terence J., Toronto, Ontario, Canada. Atomizing oil-burner. No. 1,399,006; Dec. 6.

Cunningham, William B., Kansas City, Mo. Airplane-indicator. No. 1,399,423; Dec. 6.

Currier, Howard S., assignor to General Motors Corporation, Detroit, Mich. Motor-vehicle. No. 1,399,370; Dec. 6.

Curtis, Henry E., San Jose, Calif. Evaporator. No. 1,399,692; Dec. 6.

Cushman, Allerton S., Washington, D. C. Antiseptic solution. No. 1,399,007; Dec. 6.

Dain, Joseph D., Jr., administrator. (See Dain, Joseph.)

Dain, Joseph, deceased, by Joseph Dain, Jr., administrator, Moline, Ill., assignor to The Dain Manufacturing Company of Iowa, Ottumwa, Iowa. Side-delivery rake. No. 1,398,197; Dec. 6.

Dain Manufacturing Company of Iowa, The. (See Dain, Joseph, assignor.)

Daniel, Arnold, Charlottenburg, near Berlin, Germany, assignor, by mesne assignments, to The Chemical Foundation, Inc. Purifying juices containing inulina and laevulose. No. 1,398,544; Dec 6.

Danielson, Frank R., Fairfield, Iowa. Ice-tug. No. 1,399,196; Dec. 6.

Davenport, Hudson A., assignor of one-third to F. P. Wyngard, Wyandotte and one-third to H. G. Morrison, Trenton, Mich. Safety device for presses. No. 1,399,049; Dec. 6.

Davies, Albert J., Kenogami, Quebec, Canada. Four-degree machine. No. 1,399,608; Dec. 6.

Davis, Charles E., assignor to Goodman Manufacturing Company, Chicago, Ill. Mining-machine. No. 1,399,380; Dec. 6.

Davis, Edwin G., New York, and D. L. Lindquist, Hartsdale, N. Y., assignors to Otis Elevator Company. Dual system of electrical control embodying the use of main auxiliary source of current-supply. No. 1,399,005; Dec. 6.

Davis, Harold S., Pittsburgh, and W. A. Hamor, New Kensington, Pa., assignors to Texas Gulf Sulphur Company, Bay City, Tex. Distillation of sulfur. No. 1,398,980; Dec. 6.

Day, William L., Williamsport, Pa. Lifting-jack. No. 1,399,693; Dec. 6.

Deagan, J. C., Inc. (See Little, Frederick B., assignor.)

Deal, Ralph B., Flint, Mich. Film-pack kit. No. 1,399,694; Dec. 6.

Deere & Company. (See Huddle, Edwin F., assignor.)

Demarest, Charles S., New York, N. Y., assignor to American Telephone and Telegraph Company. Electrical testing-circuits. No. 1,399,695; Dec. 6.

Denver Rock Drill Manufacturing Company, The. (See Neil, Gustave M., assignor.)

De Roo, Cornelius P., Flint, Mich. Moisture-tester. No. 1,399,696; Dec. 6.

De Vilbiss Endless Film Machine Company. (See McCullough, Paul J., assignor.)

Devrin, Arthur, Jemeppe-Liège, Belgium. Crossbar for tramway-tracks. No. 1,399,050; Dec. 6.

Diamond Match Company, The. (See Elder, W. J., and Morehouse, assignors.)

Diamond Match Company, The. (See Linebaugh, Edward R., assignor.)

Diamond Match Company, The. (See Rudd, Henry A., assignor.)

Diamond Match Company, The. (See Wright, Jacob P., assignor.)

Dietrich, Jerome C., Galt, Ontario, Canada. Handsaw. No. 1,399,009; Dec. 6.

Doble, Abner, Detroit, Mich. Means for atomizing and igniting liquid fuel. No. 1,399,010; Dec. 6.

Dodds, Ethan I., assignor to Flannery Bolt Company, Pittsburgh, Pa. Rail-fastening means. No. 1,399,011; Dec. 6.

Dodds, Ethan I., Central Valley, N. Y., assignor to Flannery Bolt Company, Pittsburgh, Pa. Staybolt structure. No. 1,399,697; Dec. 6.

Dodds, Ethan I., Central Valley, N. Y., assignor to Flannery Bolt Company, Pittsburgh, Pa. Staybolt structure. No. 1,399,698; Dec. 6.

Dodds, Ethan I. (See Stafford, B. E. D., and Dodds.)

Donauer, Max, Elyria, Ohio. Liquid-agitating mechanism. No. 1,399,699; Dec. 6.

Dorr Company, The. (See Bascom, Percy H., assignor.)

Dorsey, Herbert G., Gloucester, Mass. Device for applying chains to wheels in motion. No. 1,399,700; Dec. 6.

Downie, Robert R., assignor to Keystone Driller Co., Beaver Falls, Pa. Tooth for steam-shovels. No. 1,399,337; Dec. 6.

Drew, Joseph A., Cascade, Iowa. Silo-truing device. No. 1,399,717; Dec. 6.

Dunlap, Harley M. (See Putnam, D. M., and Dunlap.)

Du Pont, E. I., de Nemours & Company. (See Burke, C. E., and Barnhart, assignors.)

Du Pont, E. I., de Nemours and Company. (See Cope, Willard C., assignor.)

Dutton, William M. (See Bagley, J. N., and Dutton.)

Dyson, Herbert K., Westminster, London, England. Twisted metal bar for reinforced concrete construction. No. 1,399,701; Dec. 6.

Eades, Herbert S., Philadelphia, Pa. Lathe. No. 1,399,322; Dec. 6.

Eastman Kodak Company. (See Malone, Lester J., assignor.)

Eaton, George M., assignor of one-third to H. G. Bell, Bainbridge, Ga. Battery-box. No. 1,399,702; Dec. 6.

Eaton, Richard M., Niagara Falls, N. Y. Flashlight. No. 1,399,545; Dec. 6.

Eckert, Adolph, assignor to Liquid Carbonic Company, Chicago, Ill. Drink cooling and dispensing fountain. No. 1,398,961; Dec. 6.

Edelman, Philip E., New York, N. Y. Control of reactions. No. 1,399,200; Dec. 6.

Edwards, Louis C., Ellington, Conn. Vest-pocket check-protector. No. 1,399,703; Dec. 6.

Eggenweiler, Charles W., assignor to General Aluminum & Brass Mfg. Company, Detroit, Mich. Lining bearing-backs. No. 1,399,252; Dec. 6.

Elda, Jacob, South Boston, Mass. Cooking-stove. No. 1,399,704; Dec. 6.

Ekeley, John B., and W. B. Stoddard, Boulder, Colo. Obtaining pure tungstates. No. 1,399,705; Dec. 6.

Elder, William J., and C. N. Morehouse, Oswego, N. Y., assignors to The Diamond Match Company, Chicago, Ill. Apparatus for applying adhesive to wrapping-paper. No. 1,399,051; Dec. 6.

Ellis, Lewis M., assignor to Winslow Safety High Pressure Boiler Company, Chicago, Ill. Heating system. No. 1,399,052; Dec. 6.

Ellis, Theodore F., Lena, Ill. Silo. No. 1,399,546; Dec. 6.

Ellison, Otis, deceased, Albuquerque, N. Mex.; B. J. Ellison, administrator. Furniture. No. 1,399,706; Dec. 6.

Ellison, B. J., administrator. (See Ellison, Otis.)

Elwell-Parker Electric Company, The. (See Cochran, Clyde E., assignor.)

Emerson, Paul S., Tottenville, N. Y. Garment-hanger. No. 1,399,707; Dec. 6.

Engel, Godfrey, &c., Brooklyn, assignor to Buffalo Foundry & Machine Co., Buffalo, N. Y. Condenser. No. 1,399,284; Dec. 6.

Enger, Martin A., assignor of one-half to E. Ogden Williams, Minot, Minn. Boiler check shut-off valve. No. 1,399,479; Dec. 6.

England, James W., Lebanon, Mo. Expanding device for wheel-rims. No. 1,399,012; Dec. 6.

Enterprise Manufacturing Company, The. (See Adams, Walter L., assignor.)

Essex Motors, Long Island City, N. Y., and Dalia, assignors.)

Eureka Metal Heel Company, The. (See Jamieson, Morgan, assignor.)

Evans, Isaac, Cleveland Heights, Ohio. Spreading device. No. 1,399,481; Dec. 6.

Ewing, Samuel G., Toledo, Ohio. Sheet-glass-drawing apparatus. No. 1,399,547; Dec. 6.

Fabrizio, Rosario, Springfield, Mass. Window-curtain for street-cars. No. 1,399,202; Dec. 6.

Fahr, Johann G., assignor to Maschinenfabrik Fahr A.-G. Gottmadingen, Germany, Messrs. No. 1,399,043; Dec. 6.

Faltelowitz, Arnold, Berlin, Germany, assignor, by mesne assignments, to The Chemical Foundation, Inc., Preserving vegetables, fruit, and the like. No. 1,399,471; Dec. 6.

Fast, Gustave, Mount Washington, Md., assignor of 20 per cent. to C. W. Harvey and 10 per cent. to F. B. Harvey. Resilient gear. No. 1,399,545; Dec. 6.

Feeney, John M., Bridgeport, Conn. Egg-beater. No. 1,399,296; Dec. 6.

Feeney, John M., Bridgeport, Conn. Food-chopper. No. 1,399,295; Dec. 6.

Fekete, Stephen I., and S. G. Baits, assignors to Essex Motors, Detroit, Mich. Automobile-frame member and frame. No. 1,399,201; Dec. 6.

Ferdon, Guy W., Creskill, N. J. Food-press. No. 1,399,708; Dec. 6.

Ferragamo, Salvatore, Santa Barbara, Calif. Surgical appliance. No. 1,399,095; Dec. 6.

Fisher, Merritt L., (See Loveland, J. A., and Fisher.)

Fitch, Benjamin F., Evanston, Ill. Retaining device for elevating-cables. No. 1,399,054; Dec. 6.

Flannery Bolt Company. (See Dodds, Ethan I., assignor.)

Flannery Bolt Company. (See Stafford, B. E. D., and Dodds, assignors.)

Fleemer, Austin E., Columbus, Ohio. Pressure-regulator. No. 1,399,013; Dec. 6.

Fleer, Eugene A. (See Wiedenhoeft, Arthur E., assignor.)

Fleming, John M., Edmonton, Alberta, Canada. Cultivator. No. 1,399,202; Dec. 6.

Flint, Opha H., Clarksburg, W. Va., assignor to The Owens Bottle Company, Toledo, Ohio. Mold-neutering device. No. 1,399,203; Dec. 6.

Ford, John, guardian. (See Livesey, Albert.)

Forsythe, Andrew J., Russiaville, Ind. Yoke. No. 1,399,204; Dec. 6.

Fowler, George E., Joplin, Mo. Piston for internal-combustion engines. No. 1,399,106; Dec. 6.

Frankowski, Henryk, Buffalo, and A. Hoffman, Lackawanna, N. Y. Windshield-cleaner. No. 1,399,107; Dec. 6.

Frantzsen, Arthur. (See Hartwig, William G., assignor.)

French, Frank H., Preston, Iowa. Tandem disk harrow. No. 1,399,607; Dec. 6.

Frey, Ernst, Chur, Switzerland. Block-press. No. 1,399,338; Dec. 6.

Frey, Hannah H., administratrix. (See Frey, Herbert H.)

Frey, Herbert H., deceased; H. H. Frey, administratrix, Chicago, Ill. Level-indicating apparatus. No. 1,399,500; Dec. 6.

Frieman, Jacob G., Chicago, Ill. Vehicle-signal. No. 1,399,339; Dec. 6.

Fulton, James M. (See Zimmerman, Clarence W., assignor.)

Gaffy, Patrick J., Philadelphia, Pa. Explosive. No. 1,399,472; Dec. 6.

Gallagher, John F., Chicago, Ill. Poultry-grit. No. 1,399,206; Dec. 6.

Gardner, Thomas E. (See Touchstone, B. F., Gardner, Bangle, Sullivan, and Hardin.)

Garrett, Carlton M. (See Garrett, Myers A., assignor.)

Garrett, Myers A., Chicago, Ill., assignor to C. M. Garrett, New York, N. Y. Valve mechanism for tank-cars. No. 1,399,609; Dec. 6.

Garrett, William S., Richmond, Va. Portable derrick. No. 1,399,424; Dec. 6.

Garrison, Lyle, St. Louis, Mo., assignor of one-half to L. G. Slocum, Washington, D. C. Self-balling well-tool. No. 1,399,108; Dec. 6.

Gégauff, Charles H., assignor to La Societe Anonyme "Dollfus-Mieg & Cie," Mulhouse, France. Skein-forming and boxing machine. No. 1,399,109; Dec. 6.

General Aluminum & Brass Mfg. Company. (See Zimmerwelter, Charles W., assignor.)

General Chemical Company. (See Adamson, George P., assignor.)

Gates, Major E., Terra Cotta, Ill. Producing ornamental surfaces. No. 1,399,425; Dec. 6.

General Electric Company. (See Tittle, John F., assignor.)

General Motors Corporation. (See Carver, Everett S., assignor.)

General Phonograph Corporation. (See Vassmill, Anthony, assignor.)

General Railway Signal Company. (See Howe, Winthrop K., assignor.)

General Railway Signal Company. (See Preston, Neil O., assignor.)

George, Enoch, Jr., assignor to The McConway & Torley Company, Pittsburgh, Pa. Car coupling and draft-yoke connection. No. 1,399,609; Dec. 6.

George, Enoch, Jr., Pittsburgh, and F. H. Miltimer, Aspinwall, assignors to The McConway & Torley Company, Pittsburgh, Pa. Coupling and yoke connection. No. 1,399,610; Dec. 6.

Gerrard, William C., Racine, Wis. Accelerator-pedal. No. 1,399,054; Dec. 6.

Gieseler, Carl, and Hamburg, Germany. Shaft-furnace. No. 1,399,297; Dec. 6.

Gilbert, Alfred, Birmingham, England. Manufacture of book-clips for cards and the like. No. 1,399,554; Dec. 6.

Gilbian Bros. Smelting & Refining Company. (See Howard, Earl H., assignor.)

Gilbert Machine Company. (See Cole, Ira L., assignor.)

Gilbert Machine Company. (See Miller, William L., assignor.)

Globe Pneumatic Engineering Company Limited, The. (See Cawley, J., and Hills, assignors.)

Goddard, George E., assignor to Packard Motor Car Company, Detroit, Mich. Lamp-supporting means for motor-vehicles. No. 1,399,583; Dec. 6.

Godfrey, Raleigh W., assignor of three-fourths to E. S. Hobbs, Oberlin, Ohio. Automatic talking-machine. No. 1,399,110; Dec. 6.

Goecke, Robert F., Elyria, Ohio. Condenser. No. 1,399,611; Dec. 6.

Goodman Manufacturing Company. (See Davis, Charles E., assignor.)

Goosey, Clarence A., Providence, R. I. Spring-ring. No. 1,399,207; Dec. 6.

Gorman, Daniel J., Philadelphia, Pa., assignor to Gorman Fountain and Beverage Manufacturing Corporation, Machine for extracting and dispensing fruit-juices. No. 1,399,474; Dec. 6.

Gorman Fountain and Beverage Manufacturing Corporation. (See Gorman, Daniel J., assignor.)

Gosney, Vance L., New Alexandria, Ohio. Antiskid device for motor-vehicles. No. 1,399,612; Dec. 6.

Gower, Adelbert L., Janesville, Wis. Heating system. No. 1,399,613; Dec. 6.

Grasshorn, Frank H., Milwaukee, Wis. Moving-picture apparatus. No. 1,399,208; Dec. 6.

Graf de la Roche, Friedrich, Garmisch-Partenkirchen, Germany, assignor, by mesne assignments, to The Chemical Foundation Inc., Manufacturing Caoutchouc-like substances. No. 1,399,479; Dec. 6.

Graham, Wilford H. (See MacMinn, A. H., and Graham.)

Grahl, Max C., assignor to Universelle Cigaretten-Maschinen-Industrie System Otto Hergsträsser Aktiengesellschaft, Dresden-Löbtau, Germany. Cigarette-machine. No. 1,399,209; Dec. 6.

Grahl, Max C., Dresden-Löbtau, Germany. Manufacturing cigarette-tubes with hollow mouthpieces. No. 1,399,251; Dec. 6.

Graus, Joseph, Duluth, Minn. Optical-projection lantern. No. 1,399,111; Dec. 6.

Grasselli Chemical Company, The. (See Bowman, Frederick J., assignor.)

Graves, Albert H., deceased, Evanston, Ill., E. L. Graves, executrix. Concealed suspenders. No. 1,398,962; Dec. 6.

Graves, Emma L., executrix. (See Graves, Albert H., assignor.)

Grar, Israel E., Little Silver, N. J. Facial-massage device. No. 1,399,340; Dec. 6.

Greeno, Leslie P., Chicago, Ill. Scraper. No. 1,399,582; Dec. 6.

Greenewald, Eugene L., Washington, D. C. Apparatus for applying cosmetics. No. 1,398,983; Dec. 6.

Greiter, Eb., & Cie. (See Schmiedel, T., and Klaucke, assignor.)

Groves, Joab C., Valley Point, W. Va. Hen's nest. No. 1,399,614; Dec. 6.

Gruss, D., Sons & Company, Tbs. (See Gruss, Frederick G., assignor.)

Gruss, Frederick G., assignor to The D. Gruss, Sons & Company, Cincinnati, Ohio. Swivel. No. 1,399,112; Dec. 6.

Grunwaldt, Max R., Milwaukee, Wis. Auto-signal. No. 1,399,615; Dec. 6.

Gurjian, Agnes B., Los Angeles, Calif. Mop-cleaning device. No. 1,399,341; Dec. 6.

Guserratt, John L., Sedalia, Mo. Track and hanger. No. 1,399,616; Dec. 6.

Guignard, August, and F. Rosiere, Hood River, Oreg. Tractor safety device. No. 1,399,551; Dec. 6.

Gunther, Joseph, and A. Schreiner, East Moline, Ill. Card-stripping mechanism. No. 1,399,510; Dec. 6.

Gunz, Charles H., Oakland, Calif. Combination bed, table, and settee. No. 1,399,443; Dec. 6.

Gwynn, Walter E., assignor to Morse-Andrews Company, Attleboro, Mass. Buckle. No. 1,399,343; Dec. 6.

Gwynn, Herbert J., Yonkers, N. Y. Refrigerator construction. No. 1,399,964; Dec. 6.

Haney, John, *et al.* (See Cozens, George H., assignor.)

Hahn, Arno, Boulder, Mont. Water-circulator. No. 1,399,617; Dec. 6.

Hahn, Clarence L., Baltimore, Md. Box-opener. No. 1,399,618; Dec. 6.

Haines, Joseph, Claypool, Ind. Seed-planter. No. 1,399,475; Dec. 6.

Hall, Alexander, Portsmouth, Ohio. Combination knife and saw. No. 1,399,476; Dec. 6.

Hall, Herbert S., Ellsworth, Me. Hand-operated implement. No. 1,399,113; Dec. 6.

Hamel Shoe Machinery Company. (See Angell, Otis R., assignor.)

Hamel Shoe Machinery Company. (See Pettengill, George M., assignor.)

Hamel Shoe Machinery Company. (See Valois, Felix E., assignor.)

Hamill, Truman W., Merced, Calif. Tire-protector. No. 1,399,553; Dec. 6.

Hamilton, Beauchamp, Woodworth, Incorporated. (See Hamilton, Edward M., assignor.)

Hamilton, Edward M., assignor to Hamilton, Beauchamp, Woodworth, Incorporated, San Francisco, Calif. Extraction of metals from their ores. No. 1,399,554; Dec. 6.

Hammond, John H., Jr., Gloucester, Mass. System of radio-dynamic control. No. 1,399,254; Dec. 6.

Hamor, William A. (See Davis, H. S., and Hamor.)

Hampshire, Harry F., and F. B. Cranmer, Philadelphia, Pa., assignor to Thompson Printing Company, Delivery attachment for printing-presses. No. 1,399,477; Dec. 6.

Harcourt, Stillwell R., assignor to W. W. Kimball Company, Chicago, Ill. Music-sheet guide. No. 1,399,114; Dec. 6.

Hardin, John H. (See Touchstone, B. F., Gardner, Bangle, Sullivan, and Hardin.)

Harding, George W., Oakland, Calif. Fencepost. No. 1,399,426; Dec. 6.

Hardt, Henry H., Gibsonia, Pa. Indicator for baling-presses. No. 1,399,478; Dec. 6.

Harper, Eugene D., assignor of one-half to C. G. Clatworthy, Toronto, Ontario, Canada. Folding garment-holder. No. 1,399,115; Dec. 6.

Hart, Hady, Ballarat East, Victoria, assignor of one-half to I. J. Stewart, Ballarat West, Victoria, Australia. Dyestuff and mode of producing it. No. 1,399,014; Dec. 6.

Hart, Lorren M., New York, N. Y. Amplifying system for a complex sound-vibration source. No. 1,398,965; Dec. 6.

Hartwig, William G., assignor to A. Frantzsen, Chicago, Ill. Electrically-controlled switch mechanism. No. 1,399,116; Dec. 6.

Harvey, Curran W., *et al.* (See Fast, Gustave, assignor.)

Harvey, F. Barton, *et al.* (See Fast, Gustave, assignor.)

Harvey, Richard C., Lethbridge, Alberta, Canada. Machine for docking lambs' tails. No. 1,399,479; Dec. 6.

Harwood, George S., & Son. (See Howe, Joseph B., assignor.)

Helmond, William F., Hartford, Conn., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting-machine. No. 1,399,481; Dec. 6.

Henry, Paul Neuilly-sur-Seine, France. Closure-plug for tanks. No. 1,399,345; Dec. 6.

Hermann Tire Building Machine Company, The. (See Hermann, Walter H., assignor.)

Hermann, Walter H., Lancaster, assignor to The Hermann Tire Building Machine Company, Columbus, Ohio. Tire-building machine, (stationary.) No. 1,399,118; Dec. 6.

Hill, Louis A., Washington, D. C. Pneumatic tire. No. 1,399,556; Dec. 6.

Hills, Frank. (See Cawley, J., and Hills.)

Hines, Edwin G., Drums, and C. S. Myers, Hazleton, Pa.; said Myers assignor to said Hines. Draft device. No. 1,399,300; Dec. 6.

Hirschy, Herman C., Minneapolis, Minn. Wringer. No. 1,399,482; Dec. 6.

Hirsh, Fred, New York, N. Y. Adjustable strap-fastening. No. 1,398,966; Dec. 6.

Hist, John, Cleveland, Ohio. Tractor-plow. No. 1,399,301; Dec. 6.

Hobbs, Stanton S. (See Godfrey, Raleigh W., assignor.)

Hodges, Lloyd E., Glendora, Calif. Machine-gun. No. 1,399,110; Dec. 6.

Hoffman, Adolf. (See Frankowski, H., and Hoffman.)

Hollingbery, George, Mayville, Wis. Grizzly-screen. No. 1,399,211; Dec. 6.

Holloway, Jesse F., assignor to The Baldwin Locomotive Works, Philadelphia, Pa. Car-truck. No. 1,399,709; Dec. 6.

Holmes, Charles H. (See Minton, C. J., and Holmes.)

Holste, August, Bielefeld, Germany. Shirt with removable bosom. No. 1,399,255; Dec. 6.

Holste, August, Bielefeld, Germany. Shirt. No. 1,399,256; Dec. 6.

Horubeck, Henry S., Union Hill, N. J. Pneumatic pick-up. No. 1,399,483; Dec. 6.

Houlihan, William J., Prahran, Melbourne, Victoria, Australia. Device for cleansing and polishing the surfaces of floors, walls, windows, and the like. No. 1,399,427; Dec. 6.

Howard, Earl H., assignor to Gilfillan Bros. Smelting & Refining Company, Los Angeles, Calif. Spotlight. No. 1,399,120; Dec. 6.

Howe, Joseph B., Worcester, Mass., assignor to George S. Harwood & Son, Boston, Mass. Card-feeder. No. 1,399,557; Dec. 6.

Howe, Olaf L., Seattle, Wash. Water-motor. No. 1,399,558; Dec. 6.

Howe, Winthrop K., assignor to General Railway Signal Company, Rochester, N. Y. Detector-locking for power interlocking systems. No. 1,399,257; Dec. 6.

Howe, Winthrop K., assignor to General Railway Signal Company, Rochester, N. Y. Electric lock for power-operated switch-machines. No. 1,399,258; Dec. 6.

Howe, Winthrop K., assignor to General Railway Signal Company, Rochester, N. Y. Interlocking system. No. 1,399,259; Dec. 6.

Howie, Kenneth, Philadelphia, assignor to Wildman Mfg. Co., Norristown, Pa. Take-up mechanism for knitting-machines. No. 1,399,121; Dec. 6.

Hoyt, Edgar S., Des Moines, Iowa. Machine for applying tape. No. 1,399,715; Dec. 6.

Huddle, Edwin F., assignor to Deere & Company, Moline, Ill. Elevator roll-support. No. 1,399,559; Dec. 6.

Huff, Gilbert L., St. Louis, Mo. Sheet-delivering mechanism for vending-machines. No. 1,399,385; Dec. 6.

Hughes, Frank C., Chicago, Ill., assignor of one-half to N. Carrico, Sidney, Mont. Electric heater. No. 1,399,428; Dec. 6.

Hughes, Frank C. (See Carrico, Noel, assignor.)

Hughes, Leo L., Washington, D. C. Sound-box. No. 1,399,302; Dec. 6.

Hulit, John A., Chicago, Ill. Recording telegraphic receiving instrument. No. 1,399,429; Dec. 6.

Hull, Edmund M., Buffalo, N. Y. Car unloading or dumping apparatus. No. 1,399,484; Dec. 6.

Hullett, Arthur D., Newport, Tenn. Wrench. No. 1,399,621; Dec. 6.

Hulsmann, Anton, San Francisco, Calif. Artificial-arm frame. No. 1,399,622; Dec. 6.

Humason, Granville A., and J. A. Burtschel, Houston, assignors to Dr. A. L. Miller, Harris county, Tex. Pump. No. 1,398,967; Dec. 6.

Hummel, Frederick E., and J. J. Noeth, Chicago, Ill. Egg-poaching apparatus. No. 1,399,015; Dec. 6.

Hunt, Floyd D., Burlington, Vt. Chair. No. 1,399,623; Dec. 6.

Hurley, Roy T. (See Blodgett, G. R., Cheney, and Hurley.)

Husar, Frank Z., Chicago, Ill. Abdominal support. No. 1,399,386; Dec. 6.

Hyde, John H., Louisville, Ky. Toy vehicle. No. 1,399,212; Dec. 6.

Hymans, Frederick, Glen Ridge, assignor to Otis Elevator Company, Jersey City, N. J. Cushion-brake. No. 1,399,560; Dec. 6.

Imhoff, Karl, Essen-on-the-Ruhr, Germany. Settling-tank for sewage clarification. No. 1,399,562; Dec. 6.

Imhoff, Karl, and H. Blunk, Essen-on-the-Ruhr, Germany. Treating sludge. No. 1,399,561; Dec. 6.

Ink, Rolla N., San Diego, Calif. Segmental casing for tires. No. 1,399,430; Dec. 6.

Inland Company, The. (See Butler, David H., assignor.)

International Precipitation Company. (See Petersen, Alfred, assignor.)

Ivers, John W. (See Mize, Allen J. and J. R., and Ivers.)

Jackson, Charles E., Minneapolis, Minn. Detector-frame. No. 1,399,172; Dec. 6.

Jackson, Cornell, Kalamazoo, Mich. Tamper and tie-inserter tool. No. 1,399,327; Dec. 6.

Jackson, George W., & Fitzpatrick Company. (See Jackson, George W., & Fitzpatrick Company.)

Jackson, George W., & Fitzpatrick Company, assignee, by mesne assignments, to George W. Jackson & Fitzpatrick Company, Chicago, Ill. Supporting-form for concrete and masonry structures. No. 1,399,363; Dec. 6.

Jaskel, Lionel H. A. F., Luton, England. Motor-sleigh. No. 1,399,474; Dec. 6.

Jianopoulos, Stergios, assignor to The Eureka Shield (Ind.) Company. Insoles. Mass. Used for footwear. No. 1,399,345; Dec. 6.

Jarnecke, Pete, Chicago, Ill. Railway-rail support. No. 1,399,123; Dec. 6.

Jenks, John, Alton, Ill. Bottle-conveying machine. No. 1,399,496; Dec. 6.

Jenke, August F., Pittsburgh, Pa. Forming device. No. 1,399,947; Dec. 6.

Jennings, Harry C., Chicago, Ill., assignor to Sullivan Machinery Company. Clamping mechanism. No. 1,399,261; Dec. 6.

Jensen, Otto, Hamburg, Germany. Platen printing-press. No. 1,399,471; Dec. 6.

Johnson, Christian A., and J. P. Carruthers, Denver, Colo. Cleaning device. No. 1,399,253; Dec. 6.

Johnson, Frank M., Millsham, assignor of one-half to Cafferata & Co., Newark-upon-Trent, Nottingham, England. Plaster-slab-molding machine. No. 1,399,440; Dec. 6.

Johnson, George T., New York, N. Y. Hemming-fixture. No. 1,399,425; Dec. 6.

Johnson, Oscar H., and H. F. Webb, assignors to The Mine & Smelter Supply Company, Denver, Colo. Feeder. No. 1,399,124; Dec. 6.

Johnson, William H., Brandon, Vt. Cylinder-grinding machine. No. 1,399,213; Dec. 6.

Jones, Emerald E., assignor to Sure Guard Company, Chicago, Ill. Belt-shifter. No. 1,399,288; Dec. 6.

Jones, John C., Brookline, Mass. Vehicle. No. 1,399,348; Dec. 6.

Jones, Oakey E., Los Angeles, Calif. Lasting-tool holder. No. 1,399,416; Dec. 6.

Jones, Phillip D., assignor of one-half to C. Van Hoose, Los Angeles, Calif. Restaurant-fixture. No. 1,399,133; Dec. 6.

Jukes, Karl, Wattenscheid, near Bochum, Germany. Weighing-machine. No. 1,399,433; Dec. 6.

Juras, Henry W., Pepsinock, N. Y. Relief-valve. No. 1,399,710; Dec. 6.

Kanning, William, assignor to Kellogg Switchboard and Supply Company, Chicago, Ill. Combination lighting and ignition switch. No. 1,399,017; Dec. 6.

Kaplan, Victor, Brünn, Austria. Turbine-machine. No. 1,399,059; Dec. 6.

Kapotkin, Herman, New York, N. Y. Soft-water clasp. No. 1,399,248; Dec. 6.

Kappke, Lee H., assignor to Rock Island Plow Company, Rock Island, Ill. Disk harrow. No. 1,399,018; Dec. 6.

Kelley Ticket Machine Company. (See Armitage, George G., assignor.)

Kellington, John, Vancouver, British Columbia, Canada. Depth-filled gaging-machine for cans. No. 1,399,214; Dec. 6.

Kellogg Switchboard and Supply Company. (See Kanning, William, assignor.)

Kelly, James W., Chicago, Ill. Piston-packing ring. No. 1,399,456; Dec. 6.

Kelsey Wheel Company. (See Campbell, Malcolm G., assignor.)

Kelso, William, assignor to The McCaskey & Tooley Company, Pittsburgh, Pa. Coupling and yoke connection. No. 1,399,563; Dec. 6.

Kerr, Charles V., assignor to The American Well Works, Aurora, Ill. Steam-turbine. No. 1,399,215; Dec. 6.

Kerwien, Otto, Minneapolis, Minn. Ventilator. No. 1,399,126; Dec. 6.

Keystone Driller Co. (See Downie, Robert R., assignor.)

Kiefer, Raymond A., Ramsey, N. J. Jar-opener. No. 1,399,349; Dec. 6.

Kilfoyle, Fred M., Storrs, Utah. Clothespin. No. 1,399,060; Dec. 6.

Kimball, W. W., Company. (See Harcourt, Stillwell R., assignor.)

Klein, Benjamin W., New York, N. Y. Service apparatus-equipment and customer's waiting room therefor. No. 1,399,209; Dec. 6.

Kleanza, Hans. (See Schmiedel, T., and Kleanza.)

Kling, Fred E., Youngstown, Ohio. Burr-stay-bar. No. 1,399,127; Dec. 6.

Klocker, Theodore W., Park Ridge, N. J. Internal-combustion engine. No. 1,399,542; Dec. 6.

Kohn, Leo M. (See MacFarland, Allison M., assignor.)

Kopfhamer, Joseph. (See Spoerl, W., and Kopfhamer.)

Kops, Daniel, New York, N. Y. Apparel-support. No. 1,399,446; Dec. 6.

Kops, Daniel, New York, N. Y. Apparel-support. No. 1,399,447; Dec. 6.

Kracht, Gustav, Solingen, Germany. Tin-opener. No. 1,399,061; Dec. 6.

Kranta, Hubert F., assignor to Kranta Manufacturing Company, Inc., Brooklyn, N. Y. Safety starting switch. No. 1,399,488; Dec. 6.

Kranta, Hubert F., assignor to Kranta Manufacturing Company, Inc., Brooklyn, N. Y. Safety cut-out. No. 1,399,489; Dec. 6.

Kranta, Hubert, assignor to Kranta Manufacturing Company, Inc., Brooklyn, N. Y. Electric cutting-out device. No. 1,399,490; Dec. 6.

Kranta, Hubert, assignor to Kranta Manufacturing Company, Inc., Brooklyn, N. Y. Switch-blade and process. No. 1,399,491; Dec. 6.

Kranta, Hubert, assignor to Kranta Manufacturing Company, Inc., Brooklyn, N. Y. Double-switch-blade. No. 1,399,492; Dec. 6.

Kranta, Hubert F., assignor to Kranta Manufacturing Company, Inc., Brooklyn, N. Y. Switch-mechanism. No. 1,399,493; Dec. 6.

Kranta, Hubert F., assignor to Kranta Manufacturing Company, Inc., Brooklyn, N. Y. Switch-mechanism. No. 1,399,494; Dec. 6.

Kranta, Hubert F., assignor to Kranta Manufacturing Company, Inc., Brooklyn, N. Y. Safety-switch-mechanism. No. 1,399,495; Dec. 6.

Kranta, Hubert F., assignor to Kranta Manufacturing Company, Inc., Brooklyn, N. Y. Switch-mechanism. No. 1,399,496; Dec. 6.

Kranta, Hubert F., assignor to Kranta Manufacturing Company, Inc., Brooklyn, N. Y. Switch-mechanism. No. 1,399,497; Dec. 6.

Kranta, Hubert F., assignor to Kranta Manufacturing Company, Inc., Brooklyn, N. Y. Switch-mechanism. No. 1,399,498; Dec. 6.

Kranta Manufacturing Company. (See Kranta, Hubert F., assignor.)

Kreps, Jesse F., Pittsburgh, Pa. Oil-burner. No. 1,399,476; Dec. 6.

Kriegsmann, Alfred, Provinzialhaus, Westphalia, Germany. Hand-pedaling coaster-brake. No. 1,399,721; Dec. 6.

Kruse, John, San Martin, Calif. Vehicle-drive mechanism. No. 1,399,340; Dec. 6.

Kugel, August. (See Schroeder, C., and Kugel.)

Kurtz, Henry A. F., Brooklyn, N. Y. Curtain-fixture for lamps or similar articles. No. 1,399,284; Dec. 6.

Kurtz, Charles J., San Diego, Calif. Irrigation-valve. No. 1,399,434; Dec. 6.

Kussel, Charles R., Clarksdale, Ariz. Manufacturing Milestone. No. 1,399,500; Dec. 6.

La Grant, John H. (See Bailey, F. L., and La Grant.)

La Société Anonyme Dollfus-Mieg & Cie. (See Gessauff, Charles H., assignor.)

Lamb, Harold E., Los Angeles, Calif. Oil-burner. No. 1,399,505; Dec. 6.

Lambert, Henry M., Portland, Oreg. Apparatus for use in making cushion-tires. No. 1,399,124; Dec. 6.

Landis Navigations-Instrument Aktiebolag. (See Lundmark, Johannes, assignor.)

Lantz, Ferdinand, Hamburg, Germany. Valved controlling apparatus for outboard ballast and fuel tanks. No. 1,399,262; Dec. 6.

Oppman, Joseph, Connellsville, Pa. Rope-clamp. No. 1,399,647; Dec. 6.
Oppman, Joseph, Pittsburgh, Pa. Interlocking link. No. 1,399,646; Dec. 6.
Ordnance Engineering Corporation. (See Bergman, Axel G., assignor.)
Ortgies, Heinrich, Erfurt, Germany. Self-loading pistol. No. 1,399,224; Dec. 6.
Osgood, Robert C., Claremont, N. H., assignor to Sullivan Machinery Company. Axle-box. No. 1,399,398; Dec. 6.
Otis Elevator Company. (See Davis, E. G., and Lindquist, assignors.)
Otis Elevator Company. (See Hymans, Frederick, assignor.)
Ott, Merle E., Clear Lake, Iowa. Funnel. No. 1,399,130; Dec. 6.
Owen, Brice, Los Angeles, Calif. Motor-vehicle lock. No. 1,399,514; Dec. 6.
Owens Bottle Company, The. (See Flint, Opie H., assignor.)
Owens Bottle Company, The. (See Whittemore, James, assignor.)
Packard Motor Car Company. (See Goddard, George E., assignor.)
Packard Motor Car Company. (See Lipps, Evrah C., assignor.)
Packard Motor Car Company. (See Lovejoy, Allen, assignor.)
Packard Motor Car Company. (See Vincent, James, assignor.)
Pahmeyer, Frederick O., and S. B. Clay, assignors to Hydraulic Safety Boiler Company, St. Louis, Mo. Beveling-machine. No. 1,399,073; Dec. 6.
Parks, Dennis. (See Mitchell, J. E., and Parks.)
Parson, Howard E., Calgary, Alberta, Canada. Connector. No. 1,399,400; Dec. 6.
Partello, Charles, Liverpool, N. Y. Hook. No. 1,399,648; Dec. 6.

Pascal, Charles, Montreal, Quebec, Canada. Rail-chair. No. 1,399,572; Dec. 6.
Paulick, Andreas. (See Majaroglou P., and A. Paulick.)
Payne, Oscar V., Cleveland, Ohio, assignor to Auto Ordnance Corporation, New York, N. Y. Gun. No. 1,399,440; Dec. 6.
Pearson, Florent J., Troy, Ohio. Fruit-sizing apparatus. No. 1,399,317; Dec. 6.
Pellet, Auguste V., assignor to Pellet Magneto Co., Chicago, Ill. Device for cleaning spark-plugs. No. 1,399,255; Dec. 6.
Pellet Magneto Co. (See Pellet, Auguste V., assignor.)
Pellew, Arthur, assignor to American Optical Company, Southbridge, Mass. Lens-grinder. No. 1,399,400; Dec. 6.
Penland, George T., Gastonia, N. C. Tension device. No. 1,399,649; Dec. 6.
Pennsylvania Paper Products Company, The. (See Malm, Axel C. V., assignor.)
Perdue, Giles A., Wilmington, Del. Coin-collecting and change-making device. No. 1,399,650; Dec. 6.
Perkins, Robert B., Oklahoma, Okla. Transmission mechanism. No. 1,399,573; Dec. 6.
Periantino, O. Ce. Pe G. m. b. H. (See Lazarus, Isaac, assignor.)
Perrew, Bryce B., Tacoma, Wash. Display-box. No. 1,399,273; Dec. 6.
Perry, Frank W., Los Angeles, Calif. Earth-auger. No. 1,399,074; Dec. 6.
Pesci, Adolfo, Trieste, Italy. Composition for preventing incrustation in steam-boilers. No. 1,399,651; Dec. 6.
Peterson, Alfred, Frankfort-on-the-Main, Germany, assignor to International Precipitation Company, Los Angeles, Calif. Means for cleaning the electrodes in electrical fume-precipitators. No. 1,399,441; Dec. 6.
Pettengill, George M., Haverhill, Mass., assignor to Hamel Shoe Machinery Company. Channeling shoe-soles. No. 1,399,024; Dec. 6.
Phelps, Sebring I., Wilmette, Ill. Electric water-heater. No. 1,399,515; Dec. 6.
Philipps, Frank, Hammond, Ind. Collapsible ironing-board stand. No. 1,399,574; Dec. 6.
Phinney, Edgar E., West Orange, assignor to Monroe Calculating Machine Company, Orange, N. J. Setting-up means for calculating machines. No. 1,399,652; Dec. 6.
Phoenix Hermetic Company. (See Taliaferro, Thomas L., assignor.)
Pierce, Clarence A., Lowell, Mass. Bobbin-stripper. No. 1,399,025; Dec. 6.
Pillings, John H., Hamilton, Ohio. Mechanism for automatically operating typewriter-levers and the like. No. 1,399,365; Dec. 6.
Pinell, Walter. (See Lubberger, F., and Pinell.)
Pittsburgh Gage & Supply Company. (See Wappat, Fred W., assignor.)
Pond, Samuel N. (See Nowak, Frank, assignor.)
Pope, Edward J., St. Joseph, Mich., assignor to Mullen & Pope Screen Company. Revolving screen. No. 1,399,653; Dec. 6.
Porter, Nellie, administratrix. (See Porter, Thomas.)
Porter, Thomas, deceased, by Nellie Porter, administratrix, Millin township, Allegheny county, Pa. False sill for open-hearth furnace doors. No. 1,399,516; Dec. 6.
Posson, Edward, Chicago, Ill. Compound hand-brake mechanism. No. 1,399,075; Dec. 6.
Posson, Edward, Chicago, Ill. Compound hand-brake mechanism. No. 1,399,076; Dec. 6.
Posson, Edward, Chicago, Ill. Draft-arm construction for railway-cars. No. 1,399,077; Dec. 6.
Posson, Edward, Chicago, Ill. Compound brake mechanism. No. 1,399,078; Dec. 6.
Posson, Edward, Chicago, Ill. Refrigerator-car. No. 1,399,079; Dec. 6.
Postal, Ernest J., Grand Rapids, Mich. Phonograph-motor. No. 1,399,517; Dec. 6.
Potter, Wilbur C. (See Stines, E. H., and Potter.)
Premier Motor Corporation of America, The. (See Brownback, Henry L., assignor.)
Preston, Nell D., Rochester, assignor to General Railway Signal Company, Gates, N. Y. Signaling system for single-track railways. No. 1,399,725; Dec. 6.
Price, William G., Yakima, Wash. Gravity-carrier. No. 1,399,518; Dec. 6.
Printing Utilities Company. (See Brügmann, William F., assignor.)
Privett, Charles R., *et al.* (See Privett, Henry C., assignor.)
Privett, Helen E., *et al.* (See Privett, Henry C., assignor.)
Privett, Henry C., Long Beach, assignor of one-half to C. R. Privett, Burbank, three-sixteenths to H. E. Privett, and one-sixteenth to H. F. Privett, Long Beach, Calif. Inner tube. No. 1,399,575; Dec. 6.
Privett, Hollis F., *et al.* (See Privett, Henry C., assignor.)
Prym, August, Büsbach, near Stolberg, Germany. Fastening of the spring-sockets of press-buttons. No. 1,399,319; Dec. 6.
Putnam, Delmer M., and H. M. Dunlap, Battle Creek, Mich. Air-compressor. No. 1,399,151; Dec. 6.
Quarittus, William, Vicksburg, Miss. Luminous lure for animal-traps. No. 1,399,518; Dec. 6.
R. & G. Company. (See Anderson, Edward L., and L. A., assignors.)
Radimak, Steven, New York, N. Y. Tree-sawing machine. No. 1,399,274; Dec. 6.
Randle, Joe B., Columbus, Miss. Belt. No. 1,399,654; Dec. 6.
Randabaugh, Israel E., Celina, Ohio. Wall construction. No. 1,399,320; Dec. 6.
Rector, Enoch, New York, N. Y., assignor, by mesne assignments, to The Yale & Towne Manufacturing Company, Stamford, Conn. Burner-cleaner. No. 1,399,655; Dec. 6.
Rector, Enoch, New York, N. Y., assignor, by mesne assignments, to The Yale & Towne Manufacturing Company, Stamford, Conn. Pilot-light-burner control. No. 1,399,656; Dec. 6.
Redfern, Thomas, Kearney, N. J. Carbureter-control means for gas-engines. No. 1,399,519; Dec. 6.

Scott, William H., and J. Bentley, Norwich, England. System of control for electric motors operating cranes and analogous apparatus. No. 1,399,054; Dec. 6.

Secord, Frank B., et al. (See Cassin, George B., assignor.)

Segal Metal Products Company. (See Segal, Samuel, assignor.)

Segal, Samuel, assignor to Segal Metal Products Company, Inc., New York, N. Y. Lock. No. 1,399,185; Dec. 6.

Segal, Samuel, assignor to Segal Metal Products Company, Inc., New York, N. Y. Cylinder-lock. No. 1,399,149; Dec. 6.

Seigle, William R., New York, N. Y. Forming tubes of felted fibrous material. No. 1,399,387; Dec. 6.

Selleck, Silas E., assignor of one-third to T. J. Selleck, Cold Spring, N. Y. Timer. No. 1,399,824; Dec. 6.

Selleck, Theodore J. (See Selleck, Silas E., assignor.)

Sellens, Francis C., London, England, assignor to The Babcock & Wilcox Company, Bayonne, N. J. Coke-grate stoker. No. 1,398,977; Dec. 6.

Seuter, Carl U., Los Angeles, Calif. Soda-fountain faucet. No. 1,399,347; Dec. 6.

Service Cloth Pleating Company, The. (See Whyte, John, assignor.)

Servoss, Willard S., Briercrest, Saskatchewan, Canada. Weed burner and eradicator. No. 1,399,228; Dec. 6.

Sévigné, Henri A., Winthrop, Mass. Paraffining-machine. No. 1,399,160; Dec. 6.

Seymour, William, Paterson, N. J. Reinforced building unit. No. 1,398,988; Dec. 6.

Shadbolt, William O., Brooklyn, N. Y. Truck. No. 1,398,683; Dec. 6.

Shapiro, Samuel, Philadelphia, Pa. Combination-tool. No. 1,399,665; Dec. 6.

Sharpless, P. K., Company. (See Nusbaum, Joseph, assignor.)

Shelton, Frederick A., Chicago, Ill. Brush. No. 1,399,056; Dec. 6.

Shelton, James T., Cooper, Tex. Pneumatic hand-pad. No. 1,399,584; Dec. 6.

Shipe, Draper W., Empire Hwy. Engineer. No. 1,398,998; Dec. 6.

Shives, Arvel D., Gothrie, Neb. Insecticide and the like. No. 1,398,546; Dec. 6.

Shivers, Seraphia, Omaha, Nebr. Wall-plug. No. 1,398,467; Dec. 6.

Shive, Albert. (See Rose, J. C., and Shive.)

Shuttleworth, Paul F., Buffalo, N. Y. Automatic train control. No. 1,399,027; Dec. 6.

Siemens, Karl A., Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company, System of control. No. 1,398,918; Dec. 6.

Silkstone Dairy, Spokane, Wash. Bottle. No. 1,399,440; Dec. 6.

Simmons, Paul R. Huntington, Ind. Milk-bottle-capping machine. No. 1,399,496; Dec. 6.

Singer Manufacturing Company, The. (See Oliva, Edward H., assignor.)

Smith, Charles J., Chicago, Ill. Toy automobile. No. 1,399,047; Dec. 6.

Smith, Emil A., Detroit, Mich. Advertising device. No. 1,399,498; Dec. 6.

Smith, Lena G. (See Garrison, Lyle, assignor.)

Smith, Franklin S., Philadelphia, Pa. Apparatus for treating artificial or disruptive conduction. No. 1,398,141; Dec. 6.

Smith, Franklin S., Philadelphia, Pa. Apparatus for treating products by disruptive conduction. No. 1,398,162; Dec. 6.

Smith, Henry C., St. Marys, Ohio. Tool-driving machine. No. 1,398,579; Dec. 6.

Smith, Hesket T., Oxnard, Calif. Tool-wrench. No. 1,398,988; Dec. 6.

Smith, James H., Jr., Cuttyhunk, and C. A. Wilson, Passaic, N. J. Composition of matter. No. 1,398,979; Dec. 6.

Smith, Watson R., Jackson, Mich. Spring structure. No. 1,399,028; Dec. 6.

Smith, Watson R., Jackson, Mich. Spring structure. No. 1,399,029; Dec. 6.

Smith, Watson R., Jackson, Mich. Spring structure. No. 1,399,030; Dec. 6.

Smith, Willard A., Melrose, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Button-sewing machine. No. 1,399,347; Dec. 6.

Smith, William N. (See Weir, Arthur B., assignor.)

Snow, George E., Plymouth, Mass. Antiskid device. No. 1,399,165; Dec. 6.

Society of Chemical Industry in Basle. (See Hupe, J. Hans, assignor.)

Somers, Frank, Indiana Harbor, Ind. Filling-machine. No. 1,399,538; Dec. 6.

Sorvnson, Harry N., Toledo, Ohio. Door-buffer. No. 1,399,104; Dec. 6.

Spanoch, William, Elmer, Minn., and J. Kaufhamer, Canonovia, Wis. Artificial arm. No. 1,398,941; Dec. 6.

Spencer, Ira H., West Hartford, assignor to The Spencer Turbine Company, Hartford, Conn. Cleaning apparatus. No. 1,398,165; Dec. 6.

Spencer, Neal W., Black Falls, S. D. Instrument for aeroplanes. No. 1,398,859; Dec. 6.

Spencer Turbine Company, The. (See Spencer, Ira H., assignor.)

Sperry, Elmer A., Brooklyn, N. Y., assignor to Sperry Gyroscope Company. Gyroscope roll and pitch record. No. 1,398,855; Dec. 6.

Sperry Gyroscope Company, The. (See Cassin, George B., assignor.)

Sperry Gyroscope Company. (See Sperry, Elmer A., assignor.)

Spiller, Russell. (See Singer, Martin A., assignor.)

Spinner, George F., Rochester, N. Y. Arch-support. No. 1,398,447; Dec. 6.

Stallorf Electrical Company. (See Tomlinson, Edward J., assignor.)

Stearns, Frederick P., et al. (See Davenport, Hudson A., assignor.)

Springer, Franklin W., Minneapolis, Minn. Sparking-plug for internal-combustion engines. No. 1,398,185; Dec. 6.

Squire-Dole Company. (See Baines, Arnold, assignor.)

Stafford, Benjamin C. D., and E. I. Inskip, assignors to Mahoney Ball Company, Pittsburgh, Pa. Staybolt structure. No. 1,398,613; Dec. 6.

Stafford, Frederick S., assignor to H. G. Seal, Chicago, Ill. Wheel. No. 1,398,411; Dec. 6.

Stanley, George C. (See Saunders, C. L., Stanley, and Beckett.)

Stechhart, Bruno, Chicago, Ill. Reversing-switch. No. 1,399,411; Dec. 6.

Steinmetz, Franz, Hanover, Germany. Precipitating vinasse. No. 1,399,547. Dec. 6.

Stone, Thorwald C., Jacksonville, Fla. Shears. No. 1,398,923; Dec. 6.

Sternad, Andrew, Chicago, Ill. Corn cleaning and sorting machine. No. 1,398,412; Dec. 6.

Stonerwall, Phillip, Milwaukee, Wis. Door-fastening. No. 1,399,167; Dec. 6.

Stewart, Isabella J. (See Hart, Eady, assignor.)

Stewart, James R., Minneapolis, Minn. Weed-killer. No. 1,399,529; Dec. 6.

Stewart, Reid T., Pittsburgh, Pa. Fuel-supply system for internal-combustion engines. No. 1,399,520; Dec. 6.

Stewart Warner Speedometer Corporation. (See McIver, William K., assignor.)

Stiles, Edward H., and W. C. Potter, New Brunswick, N. J. Arm for knitting machines. No. 1,399,279; Dec. 6.

Stivers, George M., Dixon, Calif. Armored pneumatic tire. No. 1,399,214; Dec. 6.

Stoddard, William H. (See Bixley, J. B., and Stoddard.)

Stoker, Robert H., Houston, Ohio. Pump. No. 1,399,503; Dec. 6.

Stone, Horace G., Chicago, Ill. Propelling-wheel for tractors and other vehicles. No. 1,399,415; Dec. 6.

Strassheim, James F., Pittsburg, assignor of one-half to J. F. Mora, Pittsburg, Calif. Resilient tire. No. 1,399,670; Dec. 6.

Straub, Francis J., New Kensington, Pa. Machine for making building-blocks. No. 1,399,320; Dec. 6.

Strunk, John W., Spokane, Wash. Pneumatic trainbrake. No. 1,399,240; Dec. 6.

Sullivan, David M. (See Tomlinson, B. F., Gardner, Bangle, Sullivan, and Harris.)

Sullivan Machinery Company. (See Johnson, Harry C., assignor.)

Sullivan Machinery Company. (See Osgood, Robert C., assignor.)

Sullivan, William B., assignor to Rich Tool Company, Chicago, Ill. Hardened steel tool. No. 1,399,414; Dec. 6.

Summit Electric Company. (See Larson, Louis, assignor.)

Surry Gourd Company. (See Jones, Emerald K., assignor.)

Taft, Geoffrey M. S., Washington, D. C. Container and cap therefor. No. 1,398,971; Dec. 6.

Taliaferro, Thomas L., assignor to Phoenix Hermetic Company, Chicago, Ill. Apparatus for drying lithographed metal sheets. No. 1,398,415; Dec. 6.

Tanner, Bertrand M. (See Miller, F. A., and Tanner.)

Tapella, Gaetano C., Brookline, Mass. Operating-table. No. 1,399,694; Dec. 6.

Taylor, Ernest I. (See Creek, Antonio, assignor.)

Taylor, Garfield, Duluth, Minn. Cable-expeller. No. 1,399,579; Dec. 6.

Taylor, James C., Jefferson, S. D. Stovepipe and chimney clamp. No. 1,399,672; Dec. 6.

Temple, William, Bedlington, England. Device for withdrawing wire-rope and for like purposes. No. 1,399,779; Dec. 6.

Texas Gulf Sulphur Company. (See Davis, H. S., and Hasner.)

Thayer, Harry G., and S. T. McLellan, assignors of one-third to L. D. Truslow, Charleston, W. Va. Sectional boiler. No. 1,399,675; Dec. 6.

Thiel, Peter H., Keswick, Iowa. Harrow lifting and clearing device. No. 1,400,715; Dec. 6.

Thomas, John A., Colmsbie, Ohio. Apparatus for preventing spontaneous combustion in coal piles. No. 1,399,496; Dec. 6.

Thompson, Charles F., assignor to The Mine & Smelter Supply Company, Denver, Colo. Table-tilting mechanism. No. 1,399,021; Dec. 6.

Thompson, Harold B. (See Thompson, William O., assignor.)

Thompson, William O., assignor of one-half to H. B. Thompson, Spokane, Wash. Cutter. No. 1,399,448; Dec. 6.

Thomson Printing Company. (See Hampshire, H. F., and Cranmer, assignors.)

Thorsen, Sverre, Gaarder, Gudbrandsdal, Norway. Stump-pulling apparatus. No. 1,399,097; Dec. 6.

Tiffany & Co. (See Carter, Edward S., assignor.)

Timken Roller Bearing Company, The. (See Lothrop, Marcus T., assignor.)

Tomlinson, Edward J., assignor to Splitdorf Electrical Company, Newark, N. J. Phonograph-stop. No. 1,399,227; Dec. 6.

Touchstone, Benjamin F., T. S. Gardner, J. A. Beagle, D. M. Sullivan, and J. C. Harman, Greensboro, N. C. Dyeing and apparatus therefor. No. 1,398,220; Dec. 6.

Towle, William J., St. Paul, Minn. Liquid-containing can. No. 1,399,188; Dec. 6.

Townsend, Charles L. (See Bonner, Henry C., assignor.)

Trane, Russell A., assignor to Buckeye Iron and Brass Works, Dayton, Ohio. Machine for forming oil cakes. No. 1,398,169; Dec. 6.

Traction Engine Company. (See Heinse, John O., assignor.)

Trobitsch, Harry S., New York, N. Y. Stencil-printing apparatus. No. 1,398,998; Dec. 6.

Treiberey, Lazra C., Stratford Ontario, Canada, Cake-cutter. No. 1,399,449; Dec. 6.

Trimble, Fred M., Hampshire, Nebr. Chain fastener and tightener. No. 1,399,669; Dec. 6.

Trinks, Franz, Brunswick, Germany. Paper-strip feed for adding-machines. No. 1,399,450; Dec. 6.

Tritle, John F., Schenectady, N. Y., assignor to General Electric Company. Circuit-interrupter. No. 1,399,982; Dec. 6.

Tritle, John F., Schenectady, N. Y., assignor to General Electric Company. Disruption of electric arcs. No. 1,398,981; Dec. 6.

Troxel, Harvey H., Ashland, Ohio. Resilient heel and tread insert. No. 1,399,238; Dec. 6.

Troxel, Harvey H., Ashland, Ohio. Washing-machine. No. 1,399,451; Dec. 6.

Tyndale, Grover C., Draper, N. C. Mixer. No. 1,399,500; Dec. 6.

Truslow, Lewis D. (See Thayer, H. G., and McLellan, assignors.)

Tungsten Products Company, The. (See Bleecker, Warren P., assignor.)

Turner, Harry, Sr., Glenelg, South Australia, Australia. Hose and other clamp. No. 1,399,416; Dec. 6.

Ufert, Walter B., Jamaica, N. Y. Brake attachment. No. 1,399,581; Dec. 6.

Uhde, Fritz, Braulau, Germany. Cooling-tower. No. 1,399,057; Dec. 6.

Ulrich, Edward R., Chicago, Ill. Sterilizing device. No. 1,399,984; Dec. 6.

Ultra Earphone Co. (See Mansbendel, Fritz P., assignor.)

Underwood Typewriter Company. (See Helmond, William P., assignor.)

Union Special Machine Company. (See Scott, Walter W., assignor.)

United Shoe Machinery Corporation. (See Smith, Willard A., assignor.)

Universal Rim Company. (See Baker, Eric K., assignor.)

Universelle Cigaretten-Maschinen-Industrie System Otto Bergstrasser Aktiengesellschaft. (See Gruhl, Max C., assignor.)

Valois, Félix E., Haverhill, Mass., assignor to Hamel Shoe Machinery Company. Drive mechanism. No. 1,399,035; Dec. 6.

Van Amber, John R., Watertown, N. Y. Glare-stop. No. 1,399,673; Dec. 6.

Van Hoose, Clyde. (See Jones, Phillip D., assignor.)

Vandercook, Robert O., Evanston, Ill. Non-slip driving means. No. 1,399,320; Dec. 6.

Vandevelde, Paul V., Corona, N. Y. Burglar-alarm. No. 1,399,170; Dec. 6.

Vassalli, Anthony, Newark, N. J., assignor, by mesne assignments, to General Phonograph Corporation, New York, N. Y. Turntable for talking-machines. No. 1,399,171; Dec. 6.

Vaughan, Alexander S., Oak Park, Ill. Tool-handle-holding means. No. 1,399,172; Dec. 6.

Veeder, Curtis H., assignor to The Veeder Manufacturing Company, Hartford, Conn. Register, &c. No. 1,399,417; Dec. 6.

Veeder Manufacturing Company, The. (See Veeder, Curtis H., assignor.)

Veenschoten, Vincent V., Erie, Pa. Fluid-pressure system. No. 1,399,280; Dec. 6.

Veenschoten, Vincent V., Erie, Pa. Feed-water regulator. No. 1,399,281; Dec. 6.

Vincent, Jesse, assignor to Packard Motor Car Company, Detroit, Mich. Motor-vehicle. No. 1,399,093; Dec. 6.

Vixson Company, The. (See Lindquist, Birger W., assignor.)

Völler, Karl, Dusseldorf, assignor to Rheinische Metallwaaren und Maschinenfabrik, Düsseldorf-Derendorf, Germany. Center-pivot-gun carriage. No. 1,399,674; Dec. 6.

Voth, Walter P., Willoughby, Ohio. Winding and unwinding apparatus. No. 1,398,984; Dec. 6.

Wadewitz, Alfred W., Schleisingerville, Wis. Leaf-holder. No. 1,399,675; Dec. 6.

Wadley, Calvin P., Buffalo, N. Y. Coupling device for water-heaters, &c. No. 1,398,985; Dec. 6.

Waggoner, Melancthon B., Cedar Rapids, Iowa. Therapeutic apparatus. No. 1,399,676; Dec. 6.

Walter, Richard, Villach, Austria, assignor, by mesne assignments, to The Chemical Foundation, Inc. Diaphragm for electrolytical cells. No. 1,399,531; Dec. 6.

Wappat, Fred W., Pittsburgh, Pa., assignor to Pittsburgh Gage & Supply Company. Shock-absorber for reversing mechanism. No. 1,399,173; Dec. 6.

Warner Manufacturing Company. (See Cadman, Addi B., assignor.)

Warnock, Wallace S., Chicago, Ill. Steam-producer. No. 1,398,986; Dec. 6.

Waterbury Clock Co. (See Wehinger, Frederick, assignor.)

Waterloo Chemical and Manufacturing Company, The. (See Brauser, O. H., and Oakes, assignors.)

Watson, Strother, Gallatin, Tenn. Marker for corn-planters. No. 1,399,677; Dec. 6.

Watts, George W., Hot Springs, Ark. Domestic cooking vessel. No. 1,398,994; Dec. 6.

Webb, Arthur B., assignor to W. N. Smith, Chicago, Ill. Endless track mechanism for vehicles. No. 1,399,369; Dec. 6.

Webb, Henry F. (See Johnson, O. H., and Webb.)

Webb, Jean P., Sr., New York, N. Y. Vacuo-thermic body-treatment appliance. No. 1,399,006; Dec. 6.

Weems, Chester N., Library, Pa. Reflector for head-lamps. No. 1,398,987; Dec. 6.

Wehinger, Frederick, assignor to Waterbury Clock Co., Waterbury, Conn. Chime and strike clock movement. No. 1,399,452; Dec. 6.

Wehner, Heinrich, Frankfort-on-the-Main, Germany. Device for separating gases from hot water. No. 1,399,592; Dec. 6.

Welch, Mary M., McGill, Nev. Curtain-rod. No. 1,400,678; Dec. 6.

Wenyon, John T., Harrisburg, Pa. Converting scrap metal into merchant-bars. No. 1,399,679; Dec. 6.

Wepner, Samuel, Rutherford, N. J. Headwear. No. 1,399,726; Dec. 6.

Wessels, Daniel D., Detroit, Mich. Molded receptacle. No. 1,399,174; Dec. 6.

Western Electric Company. (See Lubberger, F., and Pinell, assignors.)

Westinghouse Electric and Manufacturing Company. (See Caunt, Lewis W., assignor.)
Westinghouse Electric & Manufacturing Company. (See Simmon, Karl A., assignor.)
Wetmar, Harry, Toronto, Ontario, Canada. Oil burner. No. 1,[illegible],036; Dec. 6.
Wexler, Irving, New York, N. Y. Convertible garment. No. 1,399,594; Dec. 6.
White, Rollin H., Cleveland Heights, assignor to The Cleveland Tractor Company, Euclid, Ohio. Track-laying tractor. No. 1,399,370; Dec. 6.
White, Wilfrid O., West Newton, Mass. Prism. No. 1,399,390; Dec. 6.
White, William M., Milwaukee, Wis. Electrical boiler. No. 1,[illegible],175; Dec. 6.
Whitehead, Thomas Blackpool, England. Spinning-ring carrier. No. 1,399,415; Dec. 6.
Whiting, Bradford H., Chicago, Ill., assignor to Whiting Corporation, Harvey, Ill. Teapot-spout ladle. No. 1,399,532; Dec. 6.
Whiting Corporation, Harvey, Ill. (See Whiting, Bradford H., assignor.)
Whittemore, James, Detroit, Mich., assignor to The Owens Bottle Company, Toledo, Ohio. Means for conveying glass to molds. No. 1,399,176; Dec. 6.
Whyte, John, Chicago, assignor, by mesne assignments, to The Service Cloth Pleating Company, Evanston, Ill. Pleating-machine. No. 1,399,231; Dec. 6.
Wiedenhoeft, Arthur E., assignor to E. A. Fiser, Chicago, Ill. Light-fixture. No. 1,399,232; Dec. 6.
Wiernikowski, Ignacy, New York, N. Y., assignor of forty-five per cent. to H. Molenda, Ollie, Mont. Window-lock. No. 1,399,177; Dec. 6.
Wierusz-Kowalski, Mieczyslaw v., Leipzig, Germany, assignor, by mesne assignments, to The Chemical Foundation, Inc. Systematically sulfurating the juices obtained during the manufacture of sugar. No. 1,399,533; Dec. 6.
Wilcox, Russell I., assignor to The Marquette Piano Company, Chicago, Ill. Tune-selector for automatic pianos. No. 1,398,988; Dec. 6.
Wildman Mfg. Co. (See Howie, Kenneth, assignor.)
Wilkinson, Eltoft W., San Francisco, Calif., assignor to Minerals Separation North American Corporation, New York, N. Y. Ore concentration. No. 1,398,989; Dec. 6.
Wilkinson, Eltoft W., San Francisco, Calif., assignor to Minerals Separation North American Corporation, New York, N. Y. Ore concentration. No. 1,398,990; Dec. 6.
Will, Anton, Chicago, Ill. Combined phonograph-cabinet and table. No. 1,399,097; Dec. 6.
Williams, Frank E., and O. S. Barnum, Alhambra, Calif. Necktie clasp. No. 1,399,233; Dec. 6.
Williams, William G., Elgin, Ill. Chiropractic table. No. 1,399,419; Dec. 6.
Wilputte, Alice A. (See Wilputte, Louis, assignor.)
Wilputte, Louis, assignor of two-thirds to A. A. Wilputte, New Rochelle, N. Y. Coke-oven door and doorway. No. 1,399,534; Dec. 6.
Wilputte, Louis, assignor of two-thirds to A. A. Wilputte, New Rochelle, N. Y. Coke-oven wall construction. No. 1,399,[illegible]; Dec. 6.
Wilson, Clarence A. (See Smith, J. H., Jr. and Wilson.)
Winslett, William H., Nixon, Tex. Windmill. No. 1,[illegible],[illegible]; Dec. 6.
Winslow, Harvey L., Waterbury, Conn. Checker. No. 1,[illegible],[illegible]; Dec. 6.
Winslow Safety High Pressure Boiler Company. (See Ellis, Lewis M., assignor.)
Winslow Safety High Pressure Boiler Company. (See Winslow, William H., assignor.)
Winslow, William H., assignor to Winslow Safety High-Pressure Boiler Company, Chicago, Ill. Oil-burning system. No. 1,[illegible],234; Dec. 6.
Winter, Courtney P., New Brunswick, N. J. Folding-machine. No. 1,399,098; Dec. 6.
Winter, Oscar, Philadelphia, Pa. Table-top protector. No. 1,399,371; Dec. 6.
Witham, George S., Jr., Ausable Forks, N. Y., assignor to G. A. Schanze, Cleveland, Ohio. Safety-indicator for internal-combustion engines. No. 1,399,534; Dec. 6.
Wochner, Adolph, trustee. (See Rocks, John, assignor.)
Woerner, Robert, Mannheim, Germany. Machine for pressing cigars. No. 1,399,235; Dec. 6.
Wolfe, John A. (See Haubert, Leo, assignor.)
Wolf, Aaron H., New York, N. Y. Gas-burner. No. 1,[illegible],178; Dec. 6.
Wright, Jacob P., Barberton, Ohio, assignor to The Diamond Match Company, Chicago, Ill. Box-filling machine. No. 1,399,099; Dec. 6.
Yale & Towne Manufacturing Company. (See Rector, Enoch, assignor.)
Yamashita, Okiye, Tokyo, Japan. Device for increasing boiler efficiency. No. 1,399,236; Dec. 6.
Young, James H., assignor to H. H. Robertson Company, Pittsburgh, Pa. Fire-resisting asphalt or like hydrocarbonaceous material. No. 1,398,941; Dec. 6.
Zahn, Joseph A., Astoria, assignor to E. Berthold, Jamaica, N. Y. Igniter. No. 1,399,727; Dec. 6.
Zeiss, Firm of Carl. (See Lehmann, Johannes, assignor.)
Zimmerman, Clarence W., Venango, Nebr., assignor of one-half to James M. Fulton, Holyoke, Colo. Tire-deflation indicator. No. 1,398,902; Dec. 6.
Zinn, Jacob H., Indianapolis, Ind. Sewer-structure invert section. No. 1,399,454; Dec. 6.
Zipfel, Alphons, Lachen, Switzerland. Weaving-heald and manufacturing the same. No. 1,399,237; Dec. 6.
Zucker, Gottlieb F., Chicago, Ill. Gas-engine. No. 1,399,283; Dec. 6.
Zuelzer, Georg, Charlottenburg, near Berlin, Germany, assignor, by mesne assignments, to The Chemical Foundation, Inc. Making means for reducing blood-pressure. No. 1,[illegible],535; Dec. 6.

ALPHABETICAL LIST OF PATENTEES OF DESIGNS.

Alpha Phi Alpha Fraternity. (See McGhee, Normal L., assignor.)
American Fabrics Company, The. (See Page, Samuel H., assignor.)
American Fabrics Company, The. (See Philips, Hans A., assignor.)

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 6TH DAY OF DECEMBER, 1921.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Abdominal support. F. Z. Husar. No. 1,399,886; Dec. 6.
Acids and the precipitation of salts contained in waters, Preparations for the neutralisation of the. V. G. Lorenzo. No. 1,399,598; Dec. 6.
Addressing-machines, Paper-strip feed for. F. Trinks. No. 1,399,450; Dec. 6.
Advertising device. E. A. Sieder. No. 1,399,409; Dec. 6.
Advertising-machine, Automatic. H. W. Lundquist. No. 1,399,435; Dec. 6.
Aeroplanes, Inclinometer for. N. W. Spencer. No. 1,399,000; Dec. 6.
Agricultural implement, Self-propelled. H. C. Baines. No. 1,399,040; Dec. 6.
Agricultural implements, Tractor connection for. P. J. O'connor. No. 1,399,072; Dec. 6.
Agricultural machine. R. Bernstein. No. 1,399,045; Dec. 6.
Air-compressor. D. M. Putnam and H. M. Dunlap. No. 1,399,151; Dec. 6.
Aircraft, Propeller for. A. Brulle. No. 1,399,290; Dec. 6.
Airplane-indicator. W. B. Cunningham. No. 1,399,423; Dec. 6.
Alarm: *See*—
Burglar-alarm.
Alkyl sulfuric acid, Making. G. P. Adamson. No. 1,399,238; Dec. 6.
Amusement apparatus. H. F. Maynes. (Reissue.) No. 15,244; Dec. 6.
Amusement device. J. Sayih. No. 1,399,582; Dec. 6.
Anchor, Tension-. E. B. Hicker. No. 1,399,153; Dec. 6.
Antiseptic solution. A. S. Cushman. No. 1,399,007; Dec. 6.
Antiskid device. A. I. Sandbo. No. 1,399,658; Dec. 6.
Antiskid device. G. F. Snow. No. 1,399,163; Dec. 6.
Antiskid device for motor-vehicles. V. L. Gosney. No. 1,399,612; Dec. 6.
Antiskid-tread. L. Angelo. No. 1,399,179; Dec. 6.
Arch-support. G. F. Spiegel. No. 1,399,447; Dec. 6.
Arm, Artificial. W. Sourek and J. Kopfhamer. No. 1,399,031; Dec. 6.
Arm frame, Artificial-. A. Hulsemann. No. 1,399,622; Dec. 6.
Articles by disruptive conduction, Apparatus for treating. F. S. Smith. No. 1,399,161; Dec. 6.
Asphalt or like hydrocarbonaceous material, Fire-resisting. J. H. Young. No. 1,398,991; Dec. 6.
Auger, Earth-. F. W. Perry. No. 1,399,074; Dec. 6.
Auto-signal. M. R. Gruender. No. 1,399,615; Dec. 6.
Automobile-fender. E. V. Allen. No. 1,398,957; Dec. 6.
Automobile frame members and frame. S. I. Fekete and S. G. Baits. No. 1,399,201; Dec. 6.
Automobile-signal. E. J. Sauer. No. 1,399,524; Dec. 6.
Automobile-tilting frame. A. J. and J. R. Mise and J. W. Ivers. No. 1,399,641; Dec. 6.
Automobile-wheel. E. K. Baker. No. 1,399,720; Dec. 6.
Automobile-wheel. C. G. Hawley. No. 1,399,719; Dec. 6.
Automobiles, Rainproof hood-cover for. G. F. Mansfield. No. 1,399,528; Dec. 6.
Automobiles, Signaling device for. A. McLaren. No. 1,399,120; Dec. 6.
Automobiles, Truck attachment for. J. Anderson. No. 1,399,597; Dec. 6.
Automotive equipment, Silencer for. I. K. Rystedt. No. 1,399,157; Dec. 6.
Axle. G. F. Morgan. No. 1,399,069; Dec. 6.
Axle-brace. R. C. Osgood. No. 1,399,698; Dec. 6.
Baling-press, Indicator for. H. H. Hardt. No. 1,399,473; Dec. 6.
Ball-fuller. D. B. Bird. No. 1,399,459; Dec. 6.
Ball, Playing. C. F. Craig and H. M. Connor. No. 1,399,293; Dec. 6.
Ball-practice device, Captive-. C. F. Craig and H. M. Connor. No. 1,399,292; Dec. 6.
Ball-rolling apparatus. F. M. Canda. Nos. 1,399,686–7; Dec. 6.
Ballast and fuel-tanks, Valved controlling apparatus for ostboard. F. Lantz. No. 1,399,263; Dec. 6.
Barb-wire machines, Automatic stop for. F. Heilman. No. 1,399,144; Dec. 6.
Barrel-protector. W. F. Mack. No. 1,399,569; Dec. 6.
Bathtubs, Headrest for. S. S. Lotter and R. R. Hatton. No. 1,399,152; Dec. 6.
Battery-box. G. M. Eaton. No. 1,399,702; Dec. 6.
Bearing, Antifriction thrust-. M. G. Campbell. No. 1,399,190; Dec. 6.
Bearing-backs, Lining. C. W. Eggenweiler. No. 1,399,252; Dec. 6.
Bed-frame, Collapsible camp. F. A. Miller and B. M. Tanner. No. 1,399,363; Dec. 6.
Bed-spring. H. Litvak. No. 1,399,501; Dec. 6.
Bed, table, and settee, Combination. C. H. Gunn. No. 1,394,342; Dec. 6.
Belt. J. R. Randle. No. 1,399,654; Dec. 6.
Belt and fastener therefor, Wide. F. R. Batchelder. No. 1,399,457; Dec. 6.
Belt-guide. J. Rocke. No. 1,399,578; Dec. 6.
Belt-shifter. E. E. Jones. No. 1,399,388; Dec. 6.
Bicycle sleigh attachment. C. K. Nagy. No. 1,399,643; Dec. 6.
Binder, Loose-leaf. O. E. Jones. No. 1,399,010; Dec. 6.
Binder, Loose-leaf. H. B. Lewis. No. 1,399,629; Dec. 6.
Bit-box. M. D. Airgood. No. 1,399,680; Dec. 6.
Blanks, Trimming. B. W. Lindquist. No. 1,399,132; Dec. 6.
Block-press. E. Frey. No. 1,399,338; Dec. 6.
Blood-pressure, Making means for reducing. A. Zuelzer. No. 1,399,535; Dec. 6.
Blower, Ball-cavity. M. Miller. No. 1,399,068; Dec. 6.
Board: *See*—
Water-board.
Bobbin-stripper. C. A. Pierce. No. 1,399,025; Dec. 6.
Boiler: *See*—
Electrical boiler.
Boiler efficiency, Device for increasing. O. Yamashita. No. 1,399,236; Dec. 6.
Boilers, Clothes-drier for hot-water. B. Leahy. No. 1,399,721; Dec. 6.
Boilers, Composition for preventing incrustation in steam-. A. Pesse. No. 1,399,657; Dec. 6.
Book-stitching machines, Automatic feeder for. W. A. Heitshu. No. 1,399,555; Dec. 6.
Bottle. L. B. Newell. No. 1,399,313; Dec. 6.
Bottle-cap-tubing machine, Milk-. P. R. Simmons. No. 1,399,586; Dec. 6.
Bottle-conveying machine. J. Jimas. No. 1,399,260; Dec. 6.
Box: *See*—
Battery-box. Display-box.
Bit-box. Sound-box.
Box-filling machine. J. P. Wright. No. 1,399,039; Dec. 6.
Box-opener. C. L. Hahn. No. 1,399,618; Dec. 6.
Brake: *See*—
Cushion-brake. Vacuum-brake.
Back-pedaling coaster-brake.
Brake attachment. W. B. Uffert. No. 1,399,591; Dec. 6.
Brake mechanism, Compound. E. Posson. No. 1,399,078; Dec. 6.
Brush. F. A. Shelton. No. 1,399,368; Dec. 6.
Brush, Street-sweeping. C. W. Lund. No. 1,399,634; Dec. 6.
Buckle. W. E. Guyot. No. 1,399,343; Dec. 6.
Building block or slab. R. Murray. No. 1,399,023; Dec. 6.
Building-blocks, Machine for making. F. J. Straub. No. 1,399,325; Dec. 6.
Building unit, Reinforced. W. Seymour. No. 1,399,088; Dec. 6.
Burglar-alarm. P. V. Vandevelde. No. 1,399,170; Dec. 6.
Burner: *See*—
Atomizing oil-burner. Oil-burner.
Gas-burner.
Burner-cleaner. E. Rector. No. 1,399,055; Dec. 6.
Button, Cuff-. R. F. B. Allen. No. 1,398,954; Dec. 6.
Buttons, Fastening of the spring-sockets of press-. A. Pryns. No. 1,399,319; Dec. 6.
Cable-equalizer. G. A. Taylor. No. 1,399,326; Dec. 6.
Cables, Retaining device for elevating-. B. F. Fitch. No. 1,399,053; Dec. 6.
Cables, Tool for splicing. N. E. Bowman. No. 1,399,101; Dec. 6.
Cadmium pigment, Manufacture of. J. R. Marston. No. 1,399,508; Dec. 6.
Cake-cutter. L. C. Trethewey. No. 1,399,449; Dec. 6.
Calcium cyanamid, Granulating. P. Savés. No. 1,399,660; Dec. 6.
Calculating-machines, Arresting means for the shifting-crank of. V. J. Odhner. No. 1,399,645; Dec. 6.
Calculating-machines, Setting-up means for. E. E. Phinney. No. 1,399,652; Dec. 6.
Camphor series and making same, Quaternary base of the. H. Hupe. No. 1,399,082; Dec. 6.
Can: *See*—
Freezing-can. Liquid-containing can.

Cans, Depth-filled-gaging machine for. J. Kelsington. No. 1,399,214; Dec. 6.
Caoutchouc-like substances, Manufacturing. F. Graf de la Rosée. No. 1,399,475; Dec. 6.
Cap, Dust-. S. V. Myers. [illegible]; Dec. 6.
Car coupling and draft-yoke connection. E. George, Jr. No. 1,399,698; Dec. 6.
Car-door operator. S. Larson. No. 1,399,627; Dec. 6.
Car, Refrigerator-. S. Passon. No. 1,399,670; Dec. 6.
Car-truck. J. F. Hathaway. No. 1,399,708; Dec. 6.
Car unloading or dumping apparatus. E. M. Hall. No. 1,399,491; Dec. 6.
Cars, Draft-arm construction for. E. Passon. No. 1,399,677; Dec. 6.
Cars, Valve mechanism for tank-. M. A. Garrett. No. 1,399,976; Dec. 6.
Cars, Window-curtain for street-. R. Fabrian. No. 1,399,252; Dec. 6.
Carburetor. C. C. Little. No. 1,399,353; Dec. 6.
Carbureter. A. Loomis. No. 1,399,695; Dec. 6.
Card-feeding mechanism. J. Gunther and A. Schneider. No. 1,399,219; Dec. 6.
Card-feeder. J. R. Howe. No. 1,399,597; Dec. 6.
Cards, Device for displaying. F. C. Ironside. No. 1,399,444; Dec. 6.
Carrier: *See*—
Gravity-carrier. Running-rag carrier.
Luggage-carrier.
Case: *See*—
Watch-case.
Centering device, Mold-. O. H. First. No. 1,399,209; Dec. 6.
Chair; *See*—
Rail-chair. Rocking-chair.
Chain' fastener and tightener. F. M. Trimmer. No. 1,399,540; Dec. 6.
Chains to wheels in motion, Device for applying. H. C. Dorsey. No. 1,399,700; Dec. 6.
Chair. F. D. Hunt. No. 1,399,421; Dec. 6.
Chair-iron. D. R. Collier. No. 1,399,464; Dec. 6.
Chair-iron. D. R. Collier. No. 1,399,466; Dec. 6.
Check-protector, Vest-pocket. I. C. Edwards. No. 1,399,703; Dec. 6.
Checker. H. L. Winslow. No. 1,399,453; Dec. 6.
Checkrein-holder. E. K. Clover. No. 1,399,464; Dec. 6.

Cigars. I. Lewis Cigar Manufacturing Company. Nos. 147,560–1; Dec. 6.
Cigars. E. B. Quinby. No. 147,989; Dec. 6.
Cigars. U. G. Sharp. No. 149,106; Dec. 6.
Cigars. J. Sonnenfeld. No. 152,760; Dec. 6.
Cigars. Welwel Cigar Manufacturing Co. No. 149,254; Dec. 6.
Cigars. Joseph Whitcomb & Co. No. 150,383; Dec. 6.
Cleaner-polish for metals, glass, and porcelain. Noxon Chemical Products Co. No. 138,261; Dec. 6.
Cleaning fluid. Presto Chemical Co. No. 138,517; Dec. 6.
Clippers, Hair-. Boker Cutlery & Hardware Company. No. 151,445; Dec. 6.
Colors and rennet extract, Butter and cheese. Chr. Hansen's Laboratory. No. 141,567; Dec. 6.
Cordage. Hooven & Allison Company. No. 154,514; Dec. 6.
Corsets. I. Newman & Sons. No. 149,109; Dec. 6.
Cotton piece goods. Société Rodier. No. 148,298; Dec. 6.
Crates, Poultry-. United Steel and Wire Co. No. 140,857; Dec. 6.
Cream, Toilet or complexion. R. H. Cochran. No. 153,072; Dec. 6.
Cuticle-remover. Northam Warren Corporation. No. 151,640; Dec. 6.
Dental supplies. Goldsmith Brothers Smelting and Refining Company. No. 152,798; Dec. 6.
Deodorant and disinfectant. Kane Chemical Company. No. 153,218; Dec. 6.
Drawing instruments and appliances. M. Winter. No. 148,252; Dec. 6.
Dresses and aprons, Women's and children's. J. A. Rodifer. No. 149,098; Dec. 6.
Dresses, Ladies' and misses'. Duke, Abrahams & Payson, Inc. No. 148,983; Dec. 6.
Extracting-elevators, dental surgical curettes, &c. H. Friedman. No. 145,166; Dec. 6.
Feed. Pease & Dwyer Co. No. 142,523; Dec. 6.
Feed, Dairy. R. M. Stegall. No. 150,206; Dec. 6.
Feed, Horse and cattle. Omaha Alfalfa Milling Co. No. 149,095; Dec. 6.
Files, Manicure-. Schnefel Bros. Nos. 148,307–10; Dec. 6.
Floor-surfacing machine. American Floor Surfacing Machine Co. No. 150,172; Dec. 6.
Flour, canned goods, butter, &c. O. A. Beam & Son. No. 142,952; Dec. 6.
Flour, Wheat-. Northwestern Consolidated Milling Company. No. 121,353; Dec. 6.
Foil wrappers. United States Foil Company. No. 146,939; Dec. 6.
Food and food products cooked and ready to be eaten. Capitol Lunch System. No. 132,957; Dec. 6.
Foot-powder. B. Marsalise. No. 151,634; Dec. 6.
Fruits, berries, vegetables, &c. Oregon Growers Coöperative Assn. No. 147,452; Dec. 6.
Furniture-polish. J. Hoeft. No. 143,168; Dec. 6.
Gasolene. Automobile Gasoline Company. No. 151,975; Dec. 6.
Gasolene and kerosene. Mason City Oil & Grease Company. No. 151,840; Dec. 6.
Gloves and mittens. Boss Manufacturing Company. No. 141,451; Dec. 6.
Grain-bins, watering tanks and troughs, &c., Metal. California Corrugated Culvert Co. No. 138,901; Dec. 6.
Grain-separators and cleaning-machines, shaking-screens, &c. Gebruder Bühler. No. 136,781; Dec. 6.
Gravers, chisels, gouges, &c. Hammel Riglander & Co. No. 151,007; Dec. 6.
Hair curlers and wavers. I. Hoffman. No. 153,248; Dec. 6.
Hats, Ladies'. J. Tenebaum & Sons. No. 149,250; Dec. 6.
Heels, Rubber. Emery Rubber Heel Company. No. 150,354; Dec. 6.
Hops. Decatur Brewing Company. No. 153,872; Dec. 6.
Hosiery. A. R. Hodder. No. 148,838; Dec. 6.
Hosiery. Shawnee Textile Company. No. 146,935; Dec. 6.
Insecticide. Bass-Parker Co. No. 151,609; Dec. 6.
Knives, Pocket-. E. N. Kennedy. No. 151,515; Dec. 6.
Lathes, planers, shapers, &c. W. K. Stamets. No. 149,783; Dec. 6.
Leather preservatives, finishing and tanning agents. Badische Anilin- & Soda-Fabrik. No. 153,173; Dec. 6.
Leathers, Finishes for. W. B. Carroll. No. 137,761; Dec. 6.
Lenses, glasses, and mirrors. California Optical Company. No. 149,848; Dec. 6.
Liniments. M. L. Cassity. No. 151,576; Dec. 6.
Liquid, piston, disk, &c., meters, disk counters. Worthington Pump and Machinery Corporation. No. 149,609; Dec. 6.
Lotion for skin irritation. R. B. Riccius. No. 152,966; Dec. 6.
Lotion, Skin. Ohio Valley Drug Company. No. 151,591; Dec. 6.
Lubricator or dressing, Belt. L. F. Edwards. No. 153,652; Dec. 6.
Machinery-guards. Orr Machine Guarding Co. No. 151,843; Dec. 6.
Magazine, Monthly. Paluszek Brothers, Inc. No. 152,931; Dec. 6.
Matches. Zündwaren-Aktiengesellschaft "Helios." No. 145,301; Dec. 6.
Mattresses. Barcalo Manufacturing Company. No. 152,605; Dec. 6.
Mattresses and cushions. J. M. Hansen. No. 153,000; Dec. 6.
Medicinal preparation. Werne Manufacturing Company. No. 153,166; Dec. 6.
Mosquito-repellent. Audubon Chemical Company. No. 149,311; Dec. 6.
Mufflers and knitted ties, ladies' angora-wool sets, &c., Men's. Louvre Knitting Mills. No. 149,087; Dec. 6.
Newspaper-column title. New York Tribune, Inc. No. 152,211; Dec. 6.
Oils and greases, Lubricating. Motor Oil Specialty Co. No. 152,086; Dec. 6.
Overalls, work shirts, and pants. Philipsborn's, Inc. No. 147,682; Dec. 6.
Paints. Armor Oil & Chemical Company. No. 152,826; Dec. 6.
Percolators, coffee and tea urns, &c., Coffee-. J. L. Lemoine. No. 149,809; Dec. 6.
Perfumes. Colgate & Company. No. 152,983; Dec. 6.
Pillows. Levy Mattress Company. No. 153,608; Dec. 6.
Pillows, Feather. Star Bedding Co. No. 153,524; Dec. 6.

PUBLISHED FOR OPPOSITION.

[Act of Feb. 20, 1905, Sec. 6, as amended Mar. 2, 1907.]

Plasters, Corn-. J. T. Hendershot. No. 151,714; Dec. 6.
Plugs for internal-combustion engines, Breather. Craig Manufacturing Co. No. 150,[illegible]; Dec. 6.
Polishing wheels and disks. Yorkville Manufacturing Company. No. 152,974; Dec. 6.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 13TH DAY OF DECEMBER, 1921.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

A.-G. Sceriet, Bleicherei, Filiale Arbon. (See Boeshard, Gustav A., assignor.)

A/S De Norske Saltverker. (See Bull, Henrik J., assignor.)

Abbey, Benjamin, Warrnambool, Victoria, assignor to Western District Co-Operative Produce and Insurance Company Limited, Melbourne, Victoria, Australia. Method of and apparatus for rendering timber not otherwise suitable usable for containers for comestible substances such as butter. No. 1,399,838; Dec. 13.

Abe, Seikichi, Detroit, Mich. Sleeve-holder. No. 1,399,730; Dec. 13.

Accessories Manufacturing Company. (See Bramming, Carl, assignor.)

Adams, Arthur H., Galion, Ohio, assignor to Western Electric Company, Incorporated, New York, N. Y. Automatic switch for telephone-exchange systems. No. 1,399,728; Dec. 13.

Adams, Charles S., assignor of forty-nine one-hundredths to H. A. Jones, Stockton, Calif. Sprocket-guard attachment for bicycles. No. 1,400,131; Dec. 13.

Adams, George R., Hillsboro, Tex. Lifting-jack. No. 1,399,729; Dec. 13.

Adkins, William H., Kansas City, Kans. Automatic train-stopping, telephonic, and block-signal system. No. 1,400,201; Dec. 13.

Adolphus Auto Rent Company. (See Bower, James R., assignor.)

Agasatis, James B., Hana Maui, Hawaii. Drill. No. 1,400,132; Dec. 13.

Aikman, Burton S., assignor to National Brake & Electric Company, Milwaukee, Wis. Control system for compressors and the like. No. 1,400,133; Dec. 13.

Aitchison, William, *et al.* (See Welch, James G., assignor.)

Alborn, Frans G., Milford, assignor, by mesne assignments, to The Locomobile Company, Bridgeport, Conn. Brake. No. 1,400,340; Dec. 13.

Alborn, Frans G., Milford, assignor, by mesne assignments, to The Locomobile Company, Bridgeport, Conn. Tappet-valve mechanism. No. 1,399,839; Dec. 13.

Allan, Frank, Barrow-in-Furness, England. Bolt, rivet, and the like. No. 1,400,401; Dec. 13.

Allen, Edward B., Newtown, Conn., assignor to The Singer Manufacturing Company, Elizabeth, N. J. Buttonhole-cutting mechanism for sewing-machines. No. 1,399,731; Dec. 13.

Allis-Chalmers Manufacturing Company. (See Newhouse, Ray C., assignor.)

Allis-Chalmers Manufacturing Company. (See Nicht, Alexander J., Jr., assignor.)

Allis-Chalmers Manufacturing Company. (See Sprado, Carl G., assignor.)

Allis-Chalmers Manufacturing Company. (See Williamson, Robert B., assignor.)

Alonso, John, Deborgia, Mont. Railway-switch. No. 1,399,914; Dec. 13.

American Bosch Magneto Corporation. (See Lang, Gustave J., assignor.)

American Marine Equipment Corporation. (See Davis, Howard C., assignor.)

American Optical Company. (See Hill, Harry W., assignor.)

American Snap Fastener Company. (See Roger, Eugene L., assignor.)

American Telephone and Telegraph Company. (See Toomey, John F., assignor.)

Anchor Cap & Closure Corporation. (See Scofield, Edgar, assignor.)

Anderson, Albert J., La Crosse, Wis. Tractor-coupling. No. 1,400,402; Dec. 13.

Anderson, Arthur E., Oak Park, Ill. Tab-attaching device for laces. No. 1,399,915; Dec. 13.

Anderson, Harry G. (See Erb, Lanious P., assignor.)

Anderson, Harry O., assignor to Norton Company, Worcester, Mass. Treatment of granular aluminous materials. No. 1,400,495; Dec. 13.

Anderson, Henry D., Filer, Idaho. Rotary internal-combustion motor. No. 1,400,255; Dec. 13.

Anderson, Victor A., Elmwood Park, Ill. Wrench. No. 1,400,184; Dec. 13.

Andrew, Thomas, Rochdale, England. Yarn package and the like and method and mechanism for winding it. No. 1,400,403; Dec. 13.

Angier, Edward H. (See Whelldon, William M., assignor.)

Arents, Fred B. (See Backhaus, A. A., and Arents.)

Armstrong, Harry Y., Syracuse, N. Y., assignor of one-half to W. L. Hall, Chicago, Ill. Wrapping-machine. No. 1,400,202; Dec. 13.

Aronson, Louis V., Newark, N. J. Liquid-dropper. No. 1,399,916; Dec. 13.

Ashby, William T., Bloomfield, N. J. Manufacturing oleomargarin. No. 1,400,341; Dec. 13.

Atkinson, Evelyn J. R., Melbourne, Victoria, Australia. Phonograph. No. 1,399,917; Dec. 13.

Atkinson, George W., Louisa, Ky. Steam-cooker. No. 1,400,475; Dec. 13.

Atmospheric Nitrogen Corporation. (See Scott, Wilfred W., assignor.)

Automotive Corporation, The. (See Woodhull, Llewellyn S., assignor.)

Autopoint Pencil Company. (See Keeran, C. R., and Kaufmann, assignors.)

Ayers, Fred L., Everett, and F. L. Mackenzie, Beverly, Mass., assignors to United Shoe Machinery Corporation, Paterson, N. J. Mechanism for use in attaching shank-pieces to shoes. No. 1,399,732; Dec. 13.

Babcock & Wilcox Company, The. (See Jacobus, David S., assignor.)

Backhaus, Arthur A., Baltimore, Md., assignor to U. S. Industrial Alcohol Co. Catalyzer. No. 1,400,203; Dec. 13.

Backhaus, Arthur A., Baltimore, Md., assignor to U. S. Industrial Alcohol Co. Catalyzer and catalyzer apparatus. No. 1,400,204; Dec. 13.

Backhaus, Arthur A., Baltimore, and F. B. Arentz, Curtis Bay, Md., assignors to U. S. Industrial Alcohol Co. Making aldehydes and separating the same from the other products formed. No. 1,400,205; Dec. 13.

Bacon, Charles A., South Bend, Ind. Mechanism for raising and lowering working devices of agricultural implements. No. 1,400,342; Dec. 13.

Bacon Heater Manufacturing Company, The. (See Bacon, Joseph H., assignor.)

Bacon, Joseph H., Lakewood, assignor to The Bacon Heater Manufacturing Company, Cleveland, Ohio. Water-heating device. No. 1,399,918; Dec. 13.

Bacon, Joseph H., Lakewood, assignor to The Bacon Heater Manufacturing Company, Cleveland, Ohio. Water-heating device. No. 1,399,919; Dec. 13.

Bailey, Israel S. (See Simmons, Charles B., assignor.)

Bailey, Stephen L. (See Douglas, W. W., and Bailey.)

Baird, Fred J. (See Grob, A., Keck, and Baird.)

Baker, Linnaeus E., assignor to Wayne Oil Tank & Pump Company, Fort Wayne, Ind. Check-valve. No. 1,400,011; Dec. 13.

Balaza, John, Brantford, Ontario, Canada. Automatic door-opening device. No. 1,399,733; Dec. 13.

Baldwin Eraser Company, The. (See Baldwin, John H., assignor.)

Baldwin, John H., assignor to the Baldwin Eraser Company, Chicago, Ill. Erasing device. No. 1,399,734; Dec. 13.

Ball, Albert P., Royal Oak, assignor to Square D. Company, Detroit, Mich. Quick-break double-throw switch. No. 1,400,343; Dec. 13.

Bamford, Cyril J. (See Bamford, Joseph and C. J.)

Bamford, Joseph and C. J., Uttoxeter, England. Motor-driven agricultural implement, traction-engine, motor-lorry, and the like. No. 1,400,012; Dec. 13.

Bancroft, Frank H., assignor to P. Derby & Company, Gardner, Mass. Automatic turning-machine. No. 1,400,013; Dec. 13.

Barber, Charles C., Brooklyn, assignor to Western Electric Company, Incorporated, New York, N. Y. Key for fastening gear-wheels, raceways for ball-bearings, and the like to rotatable shafts. No. 1,400,014; Dec. 13.

Barber-Colman Company. (See Field, Chester E., assignor.)

Barbard, Frank, Louisville, Ky. Rag doll. No. 1,399,840; Dec. 13.

Barnes, Thornton B., New York, N. Y. Embalming deodorization. No. 1,400,344; Dec. 13.

Barratt, Arthur G. (See Rowe, John B., and Barratt.)

Barrett Company, The. (See Perry, Ray P., assignor.)

Bartels, Carl P. (See Benham, E. M., and Bartels.)

Baumann, Leon F., Fitzdale, Vt. Attachment for bag-making machines. No. 1,400,404; Dec. 13.

Baumgartner, Moses M., Freeport, Ill. Whole-rice meal. No. 1,399,920; Dec. 13.
Beagle, Fredrick. (See Mayer, W. I., and Beagle.)
Beatty, Wilbur L., South Butte, Mont. Ratchet-wrench. No. 1,400,256; Dec. 13.
Bechgaard, Poul, Bailey, Sweden. Stone-crusher. No. 1,400,257; Dec. 13.
Beckert, Richard E., Revere, Mass. Seal-press, &c. No. 1,399,735; Dec. 13.
Beeman, Lyle, assignor to Manufacturers' Hardware Corporation, Milwaukee, Wis. Lathe-center. No. 1,399,931; Dec. 13.
Belpedio, Jobby, Bridgeport, Conn. Reproducer. No. 1,399,922; Dec. 13.
Benham, Edgar M., Norwood, and C. P. Bartels, Hamilton, Ohio, assignors to The Mosler Lock Company, Covington, Ky. Time-lock mechanism for safes. No. 1,400,190; Dec. 13.
Benjamin Electric Manufacturing Company. (See Manau, Frederick A., assignor.)
Benjamins, Israel, Brooklyn, N. Y. Hoisting mechanism. No. 1,399,736; Dec. 13.
Bereis, Joseph A., and R. T. Crist, Detroit, Mich. Pistoning. No. 1,399,841; Dec. 13.
Berg, Edwin H., Eveleth, Minn. Weather-stripping. No. 1,400,206; Dec. 13.
Bergen, William V., assignor of one-half to A. C. Smith, Hillsboro, Oreg. Signaling device. No. 1,399,973; Dec. 13.
Berggren, Oscar W., Waltham, Mass. Can-opener. No. 1,400,406; Dec. 13.
Berthelsen, Anders L., Chicago, Ill. Fabric-cutting device. No. 1,399,924; Dec. 13.
Bethlehem Steel Company. (See Lachman, Maurice, assignor.)
Biggar, LeRoy A. and R. H., Oneida, N. Y. Automobile-signal. No. 1,400,136; Dec. 13.
Biggar, Rutherford H. (See Biggar, LeRoy A. and R. H.) Bill, Fred R. (See Brigden, Burt A., assignor.)
Binns, William H., assignor to The Firestone Tire and Rubber Company, Akron, Ohio. Treating rubber. No. 1,400,137; Dec. 13.
Binns, John B., Akron, assignor of one-fifth to S. J. Taylor, one-fifth to E. Wissinger, Cuyahoga Falls, one-fifth to F. Nolte, Akron, and one-fifth to Superior Rubber Mold & Equipment Company, Cuyahoga Falls, Ohio. Core for tire-casings. No. 1,400,258; Dec. 13.
Black, Frank B., Lincoln, Iowa. Automobile-headlight. No. 1,400,259; Dec. 13.
Blake, Charles C., Brookline, Mass. Speed-changing mechanism. No. 1,399,787; Dec. 13.
Blank, Herman C., Chicago, Ill. Building-tile. No. 1,400,407; Dec. 13.
Bliss, Graydon C. (See Bliss, Robert H. and G. C.)
Bliss, Robert H. and G. C., Syracuse, N. Y. Bush. No. 1,400,260; Dec. 13.
Bliven, Bertrand C., San Francisco, Calif. Grease-gun. No. 1,400,207; Dec. 13.
Block, Benjamin B., assignor of one-half to M. A. Scherflee, Los Angeles, Calif. Air-heater for internal-combustion engines. No. 1,400,015; Dec. 13.
Blose, Richard R., assignor to The Parkersburg Rig & Reel Company, Parkersburg, W. Va. Derrick-fitting. No. 1,400,408; Dec. 13.
Board, Edward, Philadelphia, Pa. Clenching nail or rivet. No. 1,400,409; Dec. 13.
Bobbrof, James D., Portland, Oreg. Power-saw. No. 1,400,496; Dec. 13.
Boddie, Clarence A. (See Bradshaw, W. M., and Boddie.)
Bohland, Carl P., St. Paul, Minn. Washing-bowl. No. 1,399,925; Dec. 13.
Bohr, Mathias F., Stickney, S. D. End-gate lock. No. 1,399,842; Dec. 13.
Boiell, George A., Kingman, Ariz. Power-transmission attachment for automobiles. No. 1,399,738; Dec. 13.
Bonk, Martin A., Manitowoc, Wis. Concrete tie and rail fastening. No. 1,399,926; Dec. 13.
Booth, Howard P., Montreal, Quebec, Canada. Fluid-valve. No. 1,400,411; Dec. 13.
Bosch, Robert, Aktiengesellschaft. (See Schäfer, Max, assignor.)
Bossert, Aloisius J. (See Heil, F. R., and Bossert.
Boshard, Gustav A., assignor to the Firm A.-G. Seeriet, Bleicherei, Filiale Arbon, Arbon, Switzerland. Producing wool-like effects on cotton fabrics. No. 1,400,016; Dec. 13.
Bosson, Pierre, assignor to Société Anonyme des Etablissements L. Blériot, Paris, France. Electric resistance. No. 1,400,410; Dec. 13.
Bott, George E., Mount Vernon, N. Y. Mixing and aerating device. No. 1,399,740; Dec. 13.
Boutell Manufacturing Company. (See Fish, Charles S., assignor.
Bowden, William C., Middle Village, N. Y. Press. No. 1,399,843; Dec. 13.
Bower, James R., assignor to Adolphus Auto Rest Company, Dallas, Tex. Automobile ornament. No. 1,400,017; Dec. 13.
Bowker, William R., Coronado, Calif. Aeronautical appliance for transporting and firing explosives. No. 1,400,261; Dec. 13.
Bradshaw, William M., Wilkinsburg, and C. A. Boddie, Pittsburgh, Pa., assignors to Westinghouse Electric and Manufacturing Company. Electrical measuring instrument. No. 1,400,018; Dec. 13.
Bramming, Carl, Chicago, Ill., assignor to Accessories Manufacturing Company. Instrument-board lamp. No. 1,400,208; Dec. 13.
Bramson, Mogens L., Stafford, England. Spring, particularly for use in percussion-tools. No. 1,400,019; Dec. 13.
Brammer, Henry, Rosneath, Glasgow, Scotland. Caulking-machine. No. 1,400,138; Dec. 13.
Brettschneider, Christ. (See Kraklau, W. B., and Brettschneider.)
Bridges, Joseph E., Independence, Mo. Meat-tenderer. No. 1,400,413; Dec. 13.
Brigden, Burt A., East Cleveland, assignor of one-half to F. R. Bill, Cleveland, Ohio. Copying and enlarging camera. No. 1,400,412; Dec. 13.
Briggs & Stratton Company. (See Briggs, Stephen F., assignor.)
Briggs, Stephen F., assignor to Briggs & Stratton Company, Milwaukee, Wis. Regulator. No. 1,399,741; Dec. 13.
Brile, Alfred, Casper, Wyo. Tank. No. 1,400,845; Dec. 13.
Brock, Edward L., administrator. (See Brock, Matthias.)
Brock, Matthias, deceased. Boston, by E. L. Brock, administrator, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for pressing the soles of shoes. No. 1,399,742; Dec. 13.
Brody, Elias J., Roxbury, Mass. Supporting fixture for mirrors and the like. No. 1,399,743; Dec. 13.
Brophy, John F., Cleveland, Ohio. Folding armrest. No. 1,399,744; Dec. 13.
Brosnan, Margaret H., Washington, D. C. Vanity case for personal wear. No. 1,400,139; Dec. 13.
Brown & Bailey Company. (See Helm, Jacob C., assignor.)
Brown, Charles S., Syracuse, N. Y. Motor agricultural machine. No. 1,399,739; Dec. 13.
Brown, George E., Seattle, Wash. Mechanical baseball game. No. 1,400,020; Dec. 13.
Brubaker, Gordon M., Millersburg, Pa. Cylinder-boring reamer. No. 1,400,021; Dec. 13.
Brubaker, Marvel E., Des Moines, Iowa. Server for dining-tables. No. 1,400,209; Dec. 13.
Brush, Frederick F. (See Groat, L. E., and Brush.)
Bryant Electric Company, The. (See Reenoldt, Charles A., assignor.)
Buchsbaum, Samuel, Chicago, Ill. Belt-buckle. No. 1,399,745; Dec. 13.
Buck, David S., Pueblo, Colo. Toilet. No. 1,399,927; Dec. 13.
Buckley, Edwin W., Manchester, England. Siphonic controlling means for valves. No. 1,400,022; Dec. 13.
Buhoup, Harry C., Chicago, Ill., assignor to The McConnaway & Torley Company, Pittsburgh, Pa. Draft appliance for railway-cars. No. 1,400,210; Dec. 13.
Bull, Henrik J., assignor to A/S Norske Saltverker, Bergen, Norway. Treatment of liquids containing sulfate of lime. No. 1,399,845; Dec. 13.
Burney, Charles D., Alresford, England. Apparatus for offense or defense against submerged or partially submerged obstructions. No. 1,400,211; Dec. 13.
Burns, Patrick F., Baltimore, Md. Casing and piling construction. No. 1,399,846; Dec. 13.
Butler, Charles, Independence, Kans. Onion weeder. No. 1,400,414; Dec. 13.
California Almond Growers Exchange. (See Tucker, Theddeus C., assignor.)
Callahan, Charles F., Memphis, Tenn. Automobile-lock. No. 1,400,415; Dec. 13.
Callery, Thomas J., Jersey City, N. J. Car construction. No. 1,400,140; Dec. 13.
Cameron, Lloyd B., Somerville, assignor to A. F. Murphy, Boston, Mass. Stamping-dies. No. 1,400,416; Dec. 13.
Camp, William W., Stratford, Ontario, Canada. Treating peat-bogs to extract the water from the peat in the bogs. No. 1,399,847; Dec. 13.
Campbell, Argyle, assignor to Enterprise Railway Equipment Company, Chicago, Ill. Ore-car. No. 1,399,746; Dec. 13.
Campbell Wire Specialty Works, The. (See Swanson, Anton, assignor.)
Caproni, Gianni, Via Durini, Italy. Flying-machine. No. 1,400,262; Dec. 13.
Caracristi, Virginius Z., Bronxville, N. Y., assignor to The Gas Combustion Company, Pittsburgh, Pa. Gas-burner. No. 1,400,024; Dec. 13.
Cardullo, Forrest E. (See Hunt, H. W., and Cardullo.)
Carey, James A., Pittsburgh, Pa. Support for containers. No. 1,400,025; Dec. 13.
Carlisle, Fred R., Daylsville, R. I., assignor to J. M. Gilbert, New York, N. Y. Tread for vehicle-tires. No. 1,400,263; Dec. 13.
Carlisle Tire Corporation. (See McClurg, John S., assignor.)
Carlson, Adolph G., Chicago, Ill. Slag-disintegrator. No. 1,399,848; Dec. 13.
Carmean, James H., and H. F. and J. M. Roberts, Kansas City, Mo. Manifold stove. No. 1,400,023; Dec. 13.
Carr, John A., assignor to Marth Iron Works, Los Angeles, Calif. Irrigation-valve. No. 1,399,928; Dec. 13.
Carter, Fredrick, Ste. Agathe des Monts, Quebec, Canada. Dyeing-machine. No. 1,400,417; Dec. 13.
Casey, Herman A., Duluth, Minn. Electrode-holder. No. 1,400,418; Dec. 13.
Chadwick, Fletcher, Rochdale, England. Frame for doubling yarns. No. 1,400,026; Dec. 13.

Chadwick, Lee S., East Cleveland, assignor to The Cleveland Metal Products Company, Cleveland, Ohio. Drip-pan for stoves. No. 1,399,747; Dec. 13.
Chamberlin, Frederick G., Norfolk, England. Legging. No. 1,399,929; Dec. 13.
Chamberlain, Horace P., Buffalo, assignor to Standard Oil Company of New York, New York, N. Y. Obtaining motor-spirit and burning-oil from higher-boiling petroleum. No. 1,400,419; Dec. 13.
Champion Amusement Company, The. (See Strout, Noyes H., assignor.)
Chapin, David S., Chicago, Ill. Apparatus for applying granular material. No. 1,399,849; Dec. 13.
Charles, Louis A., Levallois-Perret, France. Injector for internal-combustion engines. No. 1,400,264; Dec. 13.
Cheney, Ansel J., Beverly, Mass. Dustproof connection for hot-air-furnace pipes. No. 1,399,748; Dec. 13.
Cincinnati Car Company, The. (See Elliott, Thomas, assignor.)
Clark, George F., Des Moines, Iowa. Combined intake and exhaust manifold. No. 1,399,930; Dec. 13.
Cleveland Metal Products Company, The. (See Chadwick, Lee S., assignor.)
Clouse, William L., assignor to The National Machinery Co., Tiffin, Ohio. Header for belt-machines. No. 1,399,850; Dec. 13.
Clowes, Peabody & Co. (See Wright, Sheldon T., assignor.)
Clutts, Joseph C., Fort Thomas, Ky. Electric-fan heater. No. 1,399,931; Dec. 13.
Coatalen, Louis, and H. C. M. Stevens, assignors of one-half to Sunbeam Motor Car Company, Limited, Wolverhampton, England. Clutch for power transmission. No. 1,400,265; Dec. 13.
Coddington, Harry W., Natick, Mass. Valve-spring compressor. No. 1,400,027; Dec. 13.
Cohen, Milton, New York, N. Y. Dental instrument. No. 1,400,028; Dec. 13.
Colley, Walter, Calgary, Alberta, Canada. Button. No. 1,400,430; Dec. 13.
Collins, John F., Philadelphia, Pa. Starter for automobile-engines. No. 1,400,266; Dec. 13.
Colomb, Henri Tavannes, Switzerland. Dial-fastener. No. 1,400,421; Dec. 13.
Columbia Machine Works & Malleable Iron Co. (See Wensinlls, Joseph T., assignor.)
Commonwealth Company. (See Sheehan, William M., assignor.)
Conant, Frederick W., Conway, Mass. Die. No. 1,399,932; Dec. 13.
Conklin, Oliver E., Boston, Mass. Headlight-lens. No. 1,399,749; Dec. 13.
Conklin, Oliver F., Detroit, Mich., assignor to Remy Electric Company, Anderson, Ind. Regulating system for dynamo-electric machines. No. 1,400,501; Dec. 13.
Conway, Thomas A. (See Hamilton, Louis D., assignor.)
Cooper, James C., Sr., assignor of one-half to H. M. Wharton, Altoona, Pa. Trolley-harp attachment. No. 1,400,476; Dec. 13.
Corrau, Marie J., Paris, France. Mercury-vapor lamp. No. 1,400,346; Dec. 13.
Corrall, Herbert, Helensburgh, Scotland, assignor to The Singer Manufacturing Company. Lock-stitch sewing-machine. No. 1,400,141; Dec. 13.
Cory, Charles & Son. (See Wood, Frank W., assignor.)
Cosgrove, [illegible]. (See Kraft, Edward L., assignor.)
Cox, Robert H., Savannah, Ga. Locomotive attachment. No. 1,400,267; Dec. 13.
Cravea, Henry L., Delton, Mich. Drive for trucks and the like. No. 1,399,933; Dec. 13.
Creasey, Edward F., Chicago, Ill. Automatic-feed memorandum device. No. 1,400,029; Dec. 13.
Crist, Raymond T. (See Borcis, J. A., and Crist.)
Crosland, Percy F. (See Hawley, A. E., Crosland and Dixon.)
Cross, Harry J., et al. (See Welch, James G., assignor.)
Crowlufte, Estel L., Kansas City, Mo. Wire-reel. No. 1,399,934; Dec. 13.
Crotto, Frank E., Dallas, Tex. Well-cleaning device. No. 1,400,030; Dec. 13.
Cudlipp, George R., assignor to Sunshine Amusement and Properties Co., Los Angeles, Calif. Amusement device. No. 1,400,497; Dec. 13.
Cully, William L., New York, N. Y., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Battery-charging system. No. 1,400,268; Dec. 13.
Curtis, Benjamin F., Poteau, Okla., assignor to Curtis Porcelain Pump Company. Twin-cylinder single-acting vertical-plunger pump. No. 1,400,422; Dec. 13.
Curtis, Benjamin F., Poteau, Okla. Double-acting duplex pump. No. 1,400,477; Dec. 13.
Curtis Porcelain Pump Company. (See Curtis, Benjamin F., assignor.)
Curtis, Milo L., Bloomington, Ind. Adjustable blackboard T-square. No. 1,399,935; Dec. 13.
Cutler-Hammer Mfg. Co., The. (See Cully, William L., assignor.)
Cyr, Alexandre, Iberville, Quebec, Canada. Pulley. No. 1,400,142; Dec. 13.
Dalton, James, Los Angeles, and B. C. De Meulle, Long Beach, Calif., assignors to Dalton Oven Co., Long Beach, Calif. Reel-oven. No. 1,399,750; Dec. 13.
Dalton Oven Co. (See Dalton, J., and De Meulle, B. C., assignors.)
Darrow, Burgess, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Breaker strip for tires. No. 1,400,269; Dec. 13.
Dart, John N., Richmond, Va. Pipe-shield. No. 1,399,851; Dec. 13.
Davidas, William J., Amsterdam, Netherlands. Apparatus for making dops to hold precious stones during grinding or polishing. No. 1,400,423; Dec. 13.
Davis, Charles H., Valley City, N. D. Fuel-press. No. 1,400,212; Dec. 13.
Davis, Howard C., Elizabeth, N. J., assignor to American Marine Equipment Corporation. Feed water heater, condenser, and the like. No. 1,400,347; Dec. 13.
Davis, Theron. (See Eggers, W. A., and Davis.)
Dean, Peter P., New York, N. Y. Recording device for signal systems. No. 1,400,270; Dec. 13.
De Glopper, John L. (See Olinger, T., and De Glopper.)
De Grazia, Ferdinando, Washington, D. C. Safety-razor. No. 1,400,031; Dec. 13.
Detchmann, Otto A., Willows, Calif. Building construction. No. 1,400,144; Dec. 13.
De Meulle, Bernard C. (See Dalton, J., and De Meulle.)
Denmire, Harold A., assignor to The General Tire & Rubber Company, Akron, Ohio. Collapsible tire-core. No. 1,399,936; Dec. 13.
Depning, Ansel C., Johnson City, N. Y. Cutting-block. No. 1,399,937; Dec. 13.
Denniston, Albert H., Fergus Falls, Minn. Concrete-wall form. No. 1,399,751; Dec. 13.
Denzel, William, et al. (See Raymond, Le Roy, assignor.)
Derby, F., & Company. (See Bancroft, Frank H., assignor.)
Derby, Samuel E., assignor to Schutte & Koerting Company, Philadelphia, Pa. Valve structure. No. 1,400,424; Dec. 13.
Deschamps, Joseph, Chesterfield, Va. Skid for motor-vehicles. No. 1,400,478; Dec. 13.
Deuel, Harry A. (See Van Fossen, Isaiah C., assignor.)
Dial, Frank, Washington, D. C. Shoe construction. No. 1,400,143; Dec. 13.
Diamond, Louis, New York, N. Y. Wardrobe-trunk. No. 1,399,752; Dec. 13.
Diamond Match Company, The. (See Wright, Jacob P. and C. F., assignors.)
Dickey, Daniel A., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Self-tightening propeller-hub. No. 1,400,032; Dec. 13.
Dickey, Daniel A., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Propeller. No. 1,400,033; Dec. 13.
Dickinson, William, Detroit, Mich. Detachable inclosure for motor-vehicles. No. 1,400,271; Dec. 13.
Dilley, Arseno J. Muir, Mich. Grease-gun. No. 1,400,034; Dec. 13.
Dixon, Amos F., Newark, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Telegraph system. No. 1,400,035; Dec. 13.
Dixon, Francis G. (See Hawley, A. E., Crosland, and Dixon.)
Doble, John A., assignor to Doble Laboratories, San Francisco, Calif. Fuel-control system for burners. No. 1,399,938; Dec. 13.
Doble, John A., assignor to Doble Laboratories, San Francisco, Calif. Liquid-fuel burner. No. 1,399,939; Dec. 13.
Doble Laboratories. (See Doble, John A., assignor.)
Dobrick, Frank, Cleveland, Ohio. Container-opener. No. 1,400,425; Dec. 13.
Dobson, Frederick, Bell Center, Wis. Coin-controlled liquid-dispensing apparatus. No. 1,400,848; Dec. 13.
Dorer, Primus O., assignor to S. Smith & Sons (Motor Accessories), Limited, London, England. Electric lamp for vehicles. No. 1,399,940; Dec. 13.
Douglas, William W., and S. L. Bailey, Bristol, England. Valve-operating mechanism for internal-combustion engines. No. 1,399,941; Dec. 13.
Dow, Leander A., assignor to Pacific Car & Foundry Co., Seattle, Wash. Trailer. No. 1,400,349; Dec. 13.
Dowd, John A., Fall River, Mass. Boiler staybolt construction. No. 1,399,942; Dec. 13.
Doyle, Joseph H., Auburn, N. Y., assignor to United Shoe Machinery Corporation, Paterson, N. J. Sole-channelling-machine. No. 1,399,753; Dec. 13.
Drake, Warren C., Inwood, N. Y. Furnace. No. 1,400,036; Dec. 13.
Drexel, William R. (See Henderson, Daniel D., assignor.)
Drybrough, Thomas B., Kensington, London, England. Coin-freed apparatus. No. 1,400,037; Dec. 13.
Duncan, Arthur L. (See Forry, Charles E., assignor.)
Duncan, Thomas S. (See Pierson, R. K., and Duncan.)
Duncan, Wayne A., Chicago, Ill. Kitchen-cabinet. No. 1,400,145; Dec. 13.
Dunham, George W., assignor to The Militor Corporation, New York, N. Y. Lubricating system. No. 1,399,943; Dec. 13.
Duplessis, René E., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Lasting-machine. No. 1,399,754; Dec. 13.
Dyrssen, Waldemar, New York, N. Y. Regulator for furnace-electrodes. No. 1,399,852; Dec. 13.
Earl, Harley J., Los Angeles, Calif. Windshield. No. 1,400,479; Dec. 13.

Eastman Kodak Company. (See Folmer, William K., assignor.)
Eastman Kodak Company. (See Buttan, J. A., and Hutchings, assignors.)
Eaton, Orrin O., Watsonville, Calif. Berry-tray. No. 1,400,426; Dec. 13.
Egerton, Henry C., Passaic, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Cut-off terminal. No. 1,400,458; Dec. 13.
Egerton, Henry C., Ridgewood, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Signaling system. No. 1,400,050; Dec. 13.
Eggers, Walter A., Brooklyn, and T. Davis, New York, N. Y.; said Eggers assignor to said Davis. Making hollow rubber articles. No. 1,400,146; Dec. 13.
Ehrhart, Anthony, Blue Island, Ill. Grease-cup. No. 1,399,944; Dec. 13.
Elevator Safety Appliance Company. (See Groat, L. E., and Brush, assignors.)
Elliott, Stephen A., Elmira, N. Y. Starter for engines. No. 1,400,040; Dec. 13.
Elliott, Harold F., Palo Alto, assignor to A. Taylor, San Francisco, Calif. Radiotelegraphy. No. 1,399,945; Dec. 13.
Elliott, Lyman M., Indianapolis, Ind. Saw-filing machine attachment. No. 1,400,427; Dec. 13.
Elliott, Thomas, assignor to The Cincinnati Car Company, Cincinnati, Ohio. Railway-car. No. 1,399,755; Dec. 13.
Ellis, Carleton, Montclair, N. J., assignor to Ellis-Foster Company. Concrete coating and the like. No. 1,400,041; Dec. 13.
Ellis-Foster Company. (See Ellis, Carleton, assignor.)
Ellis, Russell E., assignor to Hamilton Manufacturing Company, Chicago, Ill. Chuck for machine-tools. No. 1,400,272; Dec. 13.
Ellison, Earl J., Maywood, assignor to Ellison Engineering & Furnace Co., Chicago, Ill. Air-heater. No. 1,399,750; Dec. 13.
Ellison Engineering & Furnace Co. (See Ellison, Earl J., assignor.)
Elwell, Cyril F. (See Lane, Charles J., assignor.)
Emerson, Victor H., New York, N. Y. Phonographic tablet. No. 1,399,757; Dec. 13.
Emmons, Eugene E. (See Emmons, Howard C. and E. E.)
Emmons, Howard C. and E. E., Syracuse, N. Y. Mower. No. 1,400,320; Dec. 13.
Enright, Barney P., Perry, Okla. Print drier. No. 1,400,273; Dec. 13.
Enterprise Railway Equipment Company. (See Campbell, Argyle, assignor.)
Erb, Arthur A., Denver, Colo. Artificial limb. No. 1,400,042; Dec. 13.
Erb, Lasbous P., assignor of one-half to H. G. Anderson, Seattle, Wash. Resilient wheel. No. 1,400,274; Dec. 13.
Erickson, Frederic W., New York, N. Y. Connecting link or shackle. No. 1,399,946; Dec. 13.
Eustice, Alfred L., Chicago, Ill. Safety-fuse. No. 1,400,480; Dec. 13.
Evans, Edward F., Phoenix, Ariz. Ladder. No. 1,400,171; Dec. 13.
Ewing, Harry E., Smithfield, Pa. Antirattling device. No. 1,400,482; Dec. 13.
Fairchild, Horatio J. (See Warner, William D., assignor.)
Falco, Frank T., assignor to Pacific Car & Foundry Co., Seattle, Wash. Two-wheeled trailer. No. 1,400,351; Dec. 13.
Farnsworth, William F., Washington, D. C. Nut-lock. No. 1,400,213; Dec. 13.
Federal Stamping Company. (See Olinger, T., and De Glopper, assignors.)
Federal Stamping Company. (See Olinger, Thomas, assignor.)
Fehr, Carl F., Arlington, Kans. Lever-lock for end-gates. No. 1,400,483; Dec. 13.
Ferguson, Charles H., Valhalla, N. Y., assignor to Home Electric Lighting Company, East Orange, N. J. Portable electric light and power plant. No. 1,399,889; Dec. 13.
Ferrall, John J., Ridgewood, N. J., P. J. Sundheim, Cincinnati, Ohio, and C. H. Trelawny, Queens, N. Y., assignors to National Biscuit Company, New York, N. Y. Container. No. 1,399,947; Dec. 13.
Ferrall, John J., Ridgewood, N. J., assignor to National Biscuit Company, New York, N. Y. Container. No. 1,399,948; Dec. 13.
Field, Chester E., Boston, Mass., assignor, by mesne assignments, to Barber Colman Company, Rockford, Ill. Apparatus for separating heddles or the like. No. 1,399,854; Dec. 13.
Field, Crosby, Yonkers, N. Y., and W. E. Newell, Bayonne, N. J., assignor to National Aniline & Chemical Co., Inc. Seal for containers. No. 1,399,949; Dec. 13.
Fierlein, Albert L., Batavia, Ill. Swimming doll. No. 1,399,855; Dec. 13.
Firestone Tire and Rubber Company, The. (See Bines, William H., assignor.)
Fish, Charles S., assignor to Boutell Manufacturing Co., Rochester, N. Y. Fruit-slicer. No. 1,399,950; Dec. 13.
Fisk, Charles, Flushing, N. Y. Barrel-filler. No. 1,400,375; Dec. 13.
Fiske & Company. (See Fiske, Jonathan P. B., assignor.)
Fiske, Jonathan P. B., Newton, Mass., assignor to Fiske & Company, Inc. Channel-brick. No. 1,400,404; Dec. 13.
Flo Empire Double Pivot Last Company. (See Schuster, John L., assignor.)
Fitzpatrick, John B., New York, N. Y. Hatpin. No. 1,400,147; Dec. 13.
Flanders, Warren B., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Co. Apparatus for governing motive fluid. No. 1,399,758; Dec. 13.
Fletcher, Harold W., assignor to Hughes Tool Company, Houston, Tex. Making bearings. No. 1,399,856; Dec. 13.
Flood, Henry L., Ponca City, Okla. Spark-plug. No. 1,400,276; Dec. 13.
Folmer, William K., assignor to Eastman Kodak Company, Rochester, N. Y. Aviator's camera. No. 1,400,277; Dec. 13.
Forry, Charles E., assignor of one-half to A. L. Duncan, Oakland, Calif. Cherry-steemer. No. 1,400,352; Dec. 13.
Forsyth, George H., Chicago, Ill. Forming disk wheels. No. 1,399,951; Dec. 13.
Foster, Q. T., et al. (See Pritchett, Joseph F., assignor.)
Fougner, Hermann, New York, N. Y. Reinforcing-bar. No. 1,400,278; Dec. 13.
Fraidon, Jos., Newark, N. J., assignor to B. Schniger, New York, N. Y. Automobile radiator. No. 1,400,403; Dec. 13.
Frank, Maurice H., Anthon, Iowa. Mud-hook. No. 1,399,952; Dec. 13.
Fraser, John W., Cleveland, Ohio. Electric heating-plug. No. 1,400,354; Dec. 13.
Frederick, Louis T., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Heat-regulating attachment for tube machines. No. 1,400,043; Dec. 13.
Freeman, Harry A., Detroit, and F. Zesker, Highland Park, assignors to Square D Company, Detroit, Mich. Electric switch. No. 1,400,278; Dec. 13.
Freeman, Harry A., Detroit, and F. Zesker, Highland Park, assignors to Square D Company, Detroit, Mich. Electric switch. No. 1,400,284; Dec. 13.
Freeman, Harry A., Detroit, and F. Zesker, Highland Park, assignors to Square D Company, Detroit, Mich. Electric switch. No. 1,400,2811; Dec. 13.
Fresen, Carl J., Elyria, Ohio. Bee. No. 1,400,355; Dec. 13.
French, Joseph H., Petersboro, Ontario, Canada. Dental casting machine. No. 1,400,044; Dec. 13.
Frerst, Arthur L., Ensley, Ala. Trolley-clamp. No. 1,399,857; Dec. 13.
Fresen, Alonzo A., Columbus, Ohio. Soldering-iron. No. 1,400,148; Dec. 13.
Fuchs, Ernest, Paris, assignor to L. Renault, Billancourt, France. Chassis for automobile vehicles. No. 1,400,045; Dec. 13.
Fuchs, Karl, Atco, N. J. Test-glasses for hemoglobinometers. No. 1,400,280; Dec. 13.
Fulenwider, Harry W., St. Louis Mo. Irremovable cap for containers. No. 1,399,749; Dec. 13.
Fulton, Robert R., Indian Head, Md. Pyrotechnic composition. No. 1,399,953; Dec. 13.
Fulton, Robert R., Indian Head, Md. Pyrotechnic composition. No. 1,399,954; Dec. 13.
Gaccio, Claude E., Madison, Wis. Vegetable-paring machine. No. 1,399,855; Dec. 13.
Gage, Daniel W., Pritchett, Tex. Plow. No. 1,400,429; Dec. 13.
Gall, Charles H., assignor to The Shutt Manufacturing Company, Cincinnati, Ohio. Bed-spring. No. 1,400,305; Dec. 13.
Galt, Hubert, Lake Forest, Ill. Device for making coffee, tea, or similar beverages. No. 1,400,214; Dec. 13.
Gans, Leonard S., New York, N. Y. Device for tightening and securing round-wire box-strapping. No. 1,400,046; Dec. 13.
Gargett, George I., Mount Pleasant, Mich. Tractor transmission mechanism. No. 1,400,048; Dec. 13.
Garceau, G. H., Swissvale, and C. A. M. Weber, Edgewood Park, Pa., assignors to Westinghouse Electric & Manufacturing Company. Single-phase alternating-current commutator-motor. No. 1,400,047; Dec. 13.
Garl, Manious, Akron, Ohio. Fire-alarm system. No. 1,399,760; Dec. 13.
Garland, Harrison W., Bay City, Mich. Mechanical golf-teeching device. No. 1,399,761; Dec. 13.
Garth, George A., Nuwara Eliya, Ceylon. Signal for use on vehicles. No. 1,399,935; Dec. 13.
Garver, Joseph P., Charleston, Ill. Radiator-protector. No. 1,399,859; Dec. 13.
Garwood, Annie M., deceased, by order of court and mesne assignments, to F. B. Waller, Kansas City, Mo. Baby toilet-cabinet. No. 1,399,956; Dec. 13.
Gas Combustion Company, The. (See Caracristi, Virginius Z., assignor.)
Gates, Philetus W., assignor to Hanna Engineering Works, Chicago, Ill. Molding-machine. No. 1,400,282; Dec. 13.
General Electric Company. (See Payne, John H., Jr., assignor.)
General Petroleum Corporation. (See Prutzman, P., and Goodwin, assignors.)
General Tire & Rubber Company, The. (See Demmler, Harold A., assignor.)
Gerace, Gaetano, Windsor, Ontario, Canada. Willow-bark-stripping machine. No. 1,399,937; Dec. 13.
Gilbert, Jacob J., Shaw, Oreg. Hoof-trimming tool. No. 1,399,958; Dec. 13.

Gilbert, Joseph M. (See Carlisle, Fred B., assignor.)
Gillespie-Eden Corporation. (See Welhart, Charles, assignor.)
Gilson, Henry R., New Rochelle, N. Y., assignor to The Mechanical Rubber Company. Submarine telephonic transmitter. No. 1,400,283; Dec. 13.
Gindre, Eugène, assignor to Société Anonyme Le Carbone, Levallois-Perret, France. Cable-securing device particularly applicable to the fixation of electric cables on car-bon-brushes. No. 1,400,357; Dec. 13.
Glass, Perley R., Brookline, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Button-attaching machine. No. 1,399,762; Dec. 13.
Glass, Perley R., Brookline, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Skiving-machine. No. 1,399,763; Dec. 13.
Gleeson, Thomas W., Boston, Mass. Electrotherapeutic apparatus. No. 1,400,149; Dec. 13.
Glynn, Desmond F., Randwick, New South Wales, Australia. Automatic forging machine for the manufacture of horseshoes and other articles. No. 1,399,764; Dec. 13.
Goble, Paul J., Newark, N. J. Picture-hanger. No. 1,400,150; Dec. 13.
Goddard, Frank, London, England. Hammock. No. 1,400,349; Dec. 13.
Goldu, George, Winchester, and F. L. Mackenzie, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for inserting fastenings. No. 1,399,765; Dec. 13.
Golvin, Mark, Brooklyn, N. Y. Resilient material. No. 1,400,151; Dec. 13.
Goodfellow, John H., Buffalo, N. Y. Boiler-flue cleaner. 1,400,152; Dec. 13.
Goodrich, B. F., Company, The. (See MacDonald, Frank J., assignor.)
Goodrich, B. F., Company, The. (See Pierson, Robert M., assignor.)
Goodwin, Guy L. (See Prutzman, P., and Goodwin.)
Goodyear Tire & Rubber Company, The. (See Darrow, Horace, assignor.)
Goodyear Tire & Rubber Company, The. (See Greenough, Gordon B., assignor.)
Goodyear Tire and Rubber Company, The. (See Humphrey, Dwight E., assignor.)
Goodyear Tire & Rubber Company, The. (See North, Clayton O., assignor.)
Gorman, James, Chicago, Ill. Violin and producing the same. No. 1,400,153; Dec. 13.
Gould, Benjamin A., Toronto, Ontario, Canada, assignor to Merrell-Soule Company, Syracuse, N. Y. Treating substance. No. 1,400,454; Dec. 13.
Grace, Bertram B., Upminster, England, assignor to Western Electric Company, Incorporated, New York, N. Y. Signaling system. No. 1,400,050; Dec. 13.
Gray, G. A., Company, The. (See Hunt, Howard W., assignor.)
Green, Edward A., Chicago, Ill. Nut-lock. No. 1,400,154; Dec. 13.
Green, Herbert, San Antonio, Tex. Air-brake and starter for automobiles. No. 1,399,860; Dec. 13.
Greenburg, George G., New York, N. Y. Name-plate attachment. No. 1,400,155; Dec. 13.
Greenough, Gordon B., deceased, by N. B. Greenough, administratrix, Malden, Mass., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Fabric backing for composition soles. No. 1,400,428; Dec. 13.
Greenough, Nellie B., administratrix. (See Greenough, Gordon B.)
Gregg Company, The. (See Gregg, Louis D., assignor.)
Gregg, Louis D., assignor to The Gregg Company, Limited, Hackensack, N. J. Car-coupling. No. 1,400,051; Dec. 13.
Griffin, James T., Oak Park, and W. A. Timm, Berwyn, Ill., assignors to Western Electric Company, Incorporated, New York, N. Y. Electrically-heated soldering-iron. No. 1,400,156; Dec. 13.
Griffin, James W. H., Altona, Mich. Car-fender. No. 1,400,052; Dec. 13.
Grimme, Natalis & Co., Commanditgesellschaft Auf Actien. (See Schaller, Carl, assignor.)
Groat, Luther E., and F. F. Brush, Los Angeles, Calif., assignors to Elevator Safety Appliance Company. Elevator-door-operating device. No. 1,400,215; Dec. 13.
Grob, Arnold, Cleveland, C. B. Keck, Wickliffe, and F. J. Baird, East Cleveland, assignors to The Homer Commutator Company, Cleveland, Ohio. Means for assembling commutators. No. 1,400,157; Dec. 13.
Groff, Horace, Wilmington, Del. Coin-counting device. No. 1,400,053; Dec. 13.
Grosjean, James E., Lima, Ohio. Sole for boots and shoes. No. 1,399,766; Dec. 13.
Groves, Samuel E., Felling-on-Tyne, and T. W. H. Ward, London, England. Dope or varnish used in aeroplane construction. No. 1,400,430; Dec. 13.
Gruler, Morris M., assignor to Pathe Freres Phonograph Company, New York, N. Y. Chuck for phonograph-styli. No. 1,400,158; Dec. 13.
Guillochin, Alphonse, assignor of one-half to J. Guimet, Fleurieu-sur-Saône, France. Manufacture of ultramarine. No. 1,400,431; Dec. 13.
Guimet, Jean. (See Guillochin, Alphonse, assignor.)
Gunderman, William J., New York, N. Y. Antiskid device. No. 1,400,358; Dec. 13.
Gustafson, Isaac. (See Torr, John, assignor.)
Gustiana, Anthony, Sudbury, Ontario, Canada. Lifting-jack. No. 1,400,054; Dec. 13.
Gysel, Max E., Wilkinsburg, Pa., assignor to Westinghouse Electric and Manufacturing Company. Shaft-bearing. No. 1,400,055; Dec. 13.
Hadley, Kaletas, Kansas City, Mo. Bust-supporter. No. 1,400,056; Dec. 13.
Hagerman, Charles W., Champaign, Ill. Clothes-drier. No. 1,400,359; Dec. 13.
Hahn, George F., Cleveland, Ohio. Table. No. 1,400,432; Dec. 13.
Hake, John N., Kirklin, Ind. Building construction. No. 1,400,284; Dec. 13.
Hall, William L. (See Armstrong, Harry Y., assignor.)
Halstead, Joseph L. (See Primmer, B. J., and Halstead.)
Hamilton, Louis D., assignor of one-half to T. A. Conway, Titusville, Fla. Car-fender. No. 1,400,057; Dec. 13.
Hanna Engineering Works. (See Gates, Philetus W., assignor.)
Hamilton Manufacturing Company. (See Ellis, Russell E., assignor.)
Hamilton Manufacturing Company. (See Miller, Edwin P., assignor.)
Hansen, Hans, Kansas City, Mo. Wringer. No. 1,400,433; Dec. 13.
Hansen, Hans C. (See Reimer, Jorgen A., assignor.)
Hanson, Bengt M. W., Hartford, Conn. Ball-bearing. No. 1,399,959; Dec. 13.
Harding, William, Cleveland, Ohio. Pipe-hanger. No. 1,399,960; Dec. 13.
Hart, Mildred L., administratrix. (See Lowry, Frederick S.)
Hart, William E., Bowden, Okla. Wrench. No. 1,400,285; Dec. 13.
Hartbauer, August W. L., Detroit, Mich. Cellular radiator. No. 1,399,767; Dec. 13.
Hartung, Edmund, Jersey City, N. J. Automatic butter-dispenser. No. 1,399,768; Dec. 13.
Harvey Frost & Company. (See Welch, Walter H., assignor.)
Harvey, Louis B., assignor to Harvey Rim & Wheel Company, Inc., Buffalo, N. Y. Fixed rim and locking-ring structure for demountable rims. No. 1,399,961; Dec. 13.
Harvey, Louis B., Buffalo, N. Y. Projectile-thrower. No. 1,400,058; Dec. 13.
Harvey Rim & Wheel Company. (See Harvey, Louis B., assignor.)
Harvey, Thomas C., Carrollton, Miss. Wheel. No. 1,400,434; Dec. 13.
Hawkins, Alda F., assignor to Standard Battery Manufacturing Company, Fort Worth, Tex. Battery terminal. No. 1,400,059; Dec. 13.
Hawley, Alfred E., Hinckley, P. F. Crosland, Halifax, and F. G. Dixon, Cheadle Hulme, England. Machine for mercerizing hose and other knitted fabrics. No. 1,400,159; Dec. 13.
Haughton Elevator & Machine Co., The. (See Thurston, Ernest B., assignor.)
Hechler, Valentine, assignor to Wilson & Co. Inc., Chicago, Ill. Apparatus for manufacturing shortening material. No. 1,400,216; Dec. 13.
Heil, August, Hancock, Minn. Two-way pulley. No. 1,400,435; Dec. 13.
Heil, Frederick R., and A. J. Roesert, Rochester, N. Y. Indicator. No. 1,400,436; Dec. 13.
Helm, Jacob C., assignor to Brown & Bailey Company, Philadelphia, Pa. Knockdown box. No. 1,400,060; Dec. 13.
Heinemann, Albert, Berlin-Wilmersdorf, Germany. Producing a substitute for raw coffee-beans. No. 1,400,161; Dec. 13.
Heinemann, Albert, Berlin-Wilmersdorf, Germany. Producing malted pearl-barley. No. 1,400,160; Dec. 13.
Heller, Samuel D., and L. Herron, Pontiac, Mich. Automobile brake mechanism. No. 1,400,286; Dec. 13.
Hemphill Company. (See Houck, William A., assignor.)
Henderson, Daniel D., assignor of one-half to W. R. Drexel, Houston, Tex. Valve-cleaner. No. 1,399,962; Dec. 13.
Henderson, Edwin L., assignor to The Kemper Thomas Company, Norwood, Ohio. Bag. No. 1,400,490; Dec. 13.
Henry Wilhelm Company. (See Maussner, Frederick, assignor.)
Herron, Linton. (See Heller, S. D., and Herron.)
Hill, Harry W., assignor to American Optical Company, Southbridge, Mass. Bifocal. No. 1,400,061; Dec. 13.
Hill, Henry C., Cincinnati, Ohio. Automobile-speed controller. No. 1,400,062; Dec. 13.
Hinton, Thomas, assignor to H. Merton, Reading, England. Tool-holder. No. 1,400,063; Dec. 13.
Hodgkinson, Francis, Edgewood, Pa., assignor to Westinghouse Electric & Manufacturing Co. Soldering-strip. No. 1,399,769; Dec. 13.
Hoff, Matthew C., Hutchinson, Kans. Harvester-pitman. No. 1,399,861; Dec. 13.
Hogg, William L., Denver, Colo. Telegoniometer. No. 1,399,963; Dec. 13.
Holden Company, The. (See Ord, Lewis C., assignor.)
Holley, George M., Detroit, Mich. Exhaust-heated oil-vaporizer. No. 1,400,287; Dec. 13.
Holmberg, Axel, South Ecklin, via Terang, Victoria, Australia. Portable power-driven crosscut-saw. No. 1,400,064; Dec. 13.

Baines, Thomas C., San Francisco, Calif. Powder-blower. No. 1,400,142; Dec. 13.

Bauer Electric Lighting Company. (See Ferguson, Charles H., assignor.)

Bisner Commutator Company, Ltd. (See Grob, A., Kark, and Baird, assignors.)

Borgen, Thomas D., Jr., Orangeburg, S. C. Mosquito-bar hand-rest. No. 1,400,237; Dec. 13.

Horton, Bryson D., Detroit, Mich. Electrical switch. No. 1,400,234; Dec. 13.

Horton, Bryson D., Detroit, Mich. Quick-break double-throw switch. No. 1,400,235; Dec. 13.

Hosack, William A., Reading, Pa., assignor to Hemphill Company, Pawtucket, R. I. Knitting mechanism, instrument therefor, and knitting. No. 1,400,140; Dec. 13.

House, Henry A., Jr., Buffalo, N. Y., assignor to Wire Wheel Corporation of America. Stamping and truing wire wheels. No. 1,399,770; Dec. 13.

Howe, William G., Des Moines, Iowa. Tractor structure. No. 1,400,218; Dec. 13.

Hoyt, Charles H., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Work-supporting means for shoe-machines. No. 1,399,773; Dec. 13.

Hubricht, Paul O., Cleveland, Ohio. Holding-tool for sharpening scrapers, &c. No. 1,400,065; Dec. 13.

Huck, Adolf, Nuremberg, Bavaria, Germany. Construction-toy set. No. 1,400,066; Dec. 13.

Hudson, John W., Brooklyn, N. Y. Internal-combustion engine. No. 1,400,485; Dec. 13.

Huegerich, George W., Breda, Iowa. Operating-trough. No. 1,400,486; Dec. 13.

Huntar, Andrew, Dayton, Ohio. Expansible core. No. 1,400,219; Dec. 13.

Huff, Russell C., Eldorado, Kans. Feeding device for liquid fuel. No. 1,399,964; Dec. 13.

Huffer, John C., Sterling, Colo. Locking device for nuts. No. 1,399,862; Dec. 13.

Hughes, Howard R., Houston, Tex. Reamer. No. 1,399,863; Dec. 13.

Hughes, James C., Fort Morgan, Colo. Pipe-buck. No. 1,400,067; Dec. 13.

Hughes Tool Company. (See Fletcher, Harold W., assignor.)

Hughes Tool Company. (See Wadsworth, Frank L. O., assignor.)

Hull, Salmon, Mfg. Co. (See Salmon, Edward W., Jr., assignor.)

Humphrey, Dwight E., assignor to The Goodyear Tire and Rubber Company, Akron, Ohio. Method and apparatus for dusting articles. No. 1,400,[illegible]; Dec. 13.

Hunt, Chester, Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Last and device for attaching heels. No. 1,[illegible]; Dec. 13.

Hunt, Howard W., and F. E. Carlisle, Cincinnati, Ohio. Ratchet mechanism. No. 1,[illegible]; Dec. 13.

Hunt, Howard W., assignor to The G. A. Gray Company, Cincinnati, Ohio. Transmission mechanism for machine-tools. No. 1,400,361; Dec. 13.

Hunter, Herbert L., Cleveland, Ohio. Plumb-level and protractor. No. 1,400,060; Dec. 13.

Hurst, Henry H., New York, N. Y. Waterproofing material and making the same. No. 1,400,164; Dec. 13.

Hutchings, Charles E. (See Ruttan, A. A., and Hutchings.)

Hysell, Elmer, College Hill., assignor of one-half to C. E. Buble, Rochester, Pa. Sadiron. No. 1,400,437; Dec. 13.

Inman Manufacturing Company. (See Joslin, Frank M., assignor.)

International Motor Company. (See Pellizzoni, Joseph A., assignor.)

Irwin, William J., Tacoma, Wash. Typographical machine. No. 1,400,076; Dec. 13.

Jablon, Oscar E., Plainfield, N. J. Locking device. No. 1,400,487; Dec. 13.

Jacobsen, Olaf B., Birmingham, England. Extrusion-press. No. 1,400,071; Dec. 13.

Jacobus, David S., Jersey City, assignor to The Babcock & Wilcox Company, Bayonne, N. J. Steam-superheater. No. 1,399,773; Dec. 13.

Janicke, Max, Halle-on-the-Saale, Germany. Feed device for the mandrels of machine-tools of all kinds. No. 1,400,072; Dec. 13.

Jaquette, Harry Phillips, Pa. Changeable sign. No. 1,400,488; Dec. 13.

Jewell, Herbert S., deceased, by L. Jewell, executrix, Brooklyn, N. Y. Purifying middlings and other materials. No. 1,400,165; Dec. 13.

Jewell, Lida, executrix. (See Jewell, Herbert S., assignor.)

Johannes, Nicholas A., Port Washington, Wis. Bean-snipper. No. 1,400,290; Dec. 13.

Johnsen, Arthur, Saskatoon, Saskatchewan, assignor of forty-five per cent. to J. A. MacDonald, Drumheller, Alberta, Canada. Base-supported railway-rail joint. No. 1,400,291; Dec. 13.

Johnson, John A., *et al.* (See Pritchett, Joseph F., assignor.)

Johnson, Joseph, Menlo Park, Calif. Game. No. 1,[illegible]; Dec. 13.

Johnson Josiah F., Edgewood, Pa., assignor to Westinghouse Electric & Manufacturing Company. Control mechanism. No. 1,399,774; Dec. 13.

Johnson, Kenneth S., Jersey City, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Common-battery substation. No. 1,399,775; Dec. 13.

Johnson, Robert L., Nashville, Tenn. Electric railway-switch. No. 1,400,492; Dec. 13.

Jones, Arthur L., administrator. (See Smith, Christian F.)

Jones, Howard A. (See Adams, Charles S., assignor.)

Jones, Thomas M., Cassaway, N. Y., Agricultural implement. No. 1,400,073; Dec. 13.

Jusling, Frank M., assignor to Jusling Manufacturing Company, Inc., Amsterdam, N. Y. Folding mechanism. No. 1,400,[illegible]; Dec. 13.

Justice, John D., Harrisville, Ind. Incubator-heating system. No. 1,[illegible]; Dec. 13.

Juttner, Pietsch, Akt.-Ges. (See Schaller, Otto, assignor.)

Kay, Raymond. (See Montgomerie, J. F., and Kay.)

Kerr, Andrew J., and D. F. Weis, Buckhannon, W. Va. Crane-hook. No. 1,400,[illegible]; Dec. 13.

Karlsen, Peter, Beaumont, Tex. Power-hammer. No. 1,400,154; Dec. 13.

Karp, Joseph H., New York, N. Y. Shoe polishing machine. No. 1,400,440; Dec. 13.

Karrakis, Clara, administratrix. (See Karrakis, Joseph, assignor.)

Karrakis, Joseph, deceased, Newark, N. J.; Clara Karrakis, administratrix, Dedpan. No. 1,400,074; Dec. 13.

Kaufer Manufacturing Company. (See Kaufer, Theodore, assignor.)

Kaufer, Theodore, assignor to Kaufer Manufacturing Company, Inc., New York, N. Y. Cooking-stove. No. 1,400,221; Dec. 13.

Kaufer, Theodore, New York, N. Y. Garment-hanger. No. 1,400,220; Dec. 13.

Kaufmann, Michael M. (See Keeran, C. B., and Kaufmann.)

Keck, Charles B. (See Grob, A., Kark, and Baird.)

Keeler, Charles W., Newark, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone exchange system. No. 1,400,075; Dec. 13.

Keeler, Charles W., Newark, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone signaling system. No. 1,400,076; Dec. 13.

Keene, Harry E. (See Sawyer, Walter H., assignor.)

Keeran, Charles R., and M. M. Kaufmann, assignors by mesne assignments, to Autopoint Pencil Company, Chicago, Ill. Pencil. No. 1,400,362; Dec. 13.

Keith, Harold L., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Motor-control system. No. 1,400,077; Dec. 13.

Kelly, Edward C., Boston, Mass. Oil-separator trap. No. 1,400,441; Dec. 13.

Kemper Thomas Company, The. (See Henderson, Edwin L., assignor.)

Kemston, Willard H., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Molded tube. No. 1,400,078; Dec. 13.

Kennedy, Millard B. and V. C., Canton, S. D. Computing-machine. No. 1,400,363; Dec. 13.

Kennedy, Verne C. (See Kennedy, Millard B. and V. C.)

Kent, Robert E., Fannettsburg, Pa. Rat-trap. No. 1,399,965; Dec. 13.

Kerenyi, George, and E. Wolf, Ujpest, Hungary. Production of solid beds magnesium hypochlorite. No. 1,400,167; Dec. 13.

Kilcullen, Patrick J., Philadelphia, Pa. Wheel-hub. No. 1,400,442; Dec. 13.

King, Charles A., Leeds, and W. S. Rawson, London, England. Calculagraph. No. 1,400,443; Dec. 13.

King, Charles W., Memphis, Tenn. Wrench. No. 1,[illegible]; Dec. 13.

Kline, Edgar S., Osgood, Ind. Automatic fuel cut-off. No. 1,[illegible]; Dec. 13.

Klingsbury, Albert, Pittsburgh, Pa. Bearing. No. 1,400,158; Dec. 13.

Kirk-Latty Manufacturing Company, The. (See Eichel, William J., assignor.)

Kirk, Robert B., and J. B. Young, Olden, Tex. Cooking utensil. No. 1,[illegible]; Dec. 13.

Kirtley, Simeon B., Columbia, Mo. Account-ledger. No. 1,[illegible]; Dec. 13.

Klaxon Company. (See McConnell, Duncan A., assignor.)

Kling, Fred E., Youngstown, and L. B. Weddell, Cleveland, Ohio. Vibrating mechanism. No. 1,400,160; Dec. 13.

Knapik, Frank C., Baltimore, Md. Toe-bolt. No. 1,400,364; Dec. 13.

Knapp, Otto A., Oakland, Calif. Electrical measuring device. No. 1,[illegible]; Dec. 13.

Koetter, Walter H. (See Mueller, A. O., and Koetter.)

Koller, William, White Plains, N. Y. Embroidery-frame. No. 1,400,293; Dec. 13.

Kolling, Charles H., assignor of one-fourth to O. A. Weissenborn and one-fourth to Reinhold Prietz, Jersey City, N. J. Safety device for phonographs. No. 1,400,079; Dec. 13.

Kopchak, John K., Melville, Saskatchewan, Canada. Grain-door. No. 1,400,080; Dec. 13.

Kops, Daniel, New York, N. Y. Apparel-corset. No. 1,400,294; Dec. 13.

Kops, Wallerstein, New York, N. Y. Brassiere. No. 1,400,[illegible]; Dec. 13.

Kraft, Edward L., assignor of one-half to A. R. Cancelliere, York, Pa. Demountable drive mechanism for automobiles. No. 1,400,170; Dec. 13.

Kraft, James L., Chicago, Ill. Preparing cheese. No. 1,400,171; Dec. 13.

Krakian, William B., and C. Brettschneider, St. Paul, Minn. Air-moistening device. No. 1,400,444; Dec. 13.

Kriebel, Frederick L. (See Kriebel, Hosea K., assignor.)

Kriebel, Hosea K., Philadelphia, Pa., assignor of one-fourth to F. L. Kriebel, Chicago, Ill. Valve. No. 1,400,172; Dec. 13.

Kurkjian, Armen S., assignor to Oliver Machinery Company, Grand Rapids, Mich. Combination handwheel and faceplate for lathes. No. 1,399,069; Dec. 13.

Kusel, Isidor J., assignor to Stronghart Company, Chicago, Ill. Illuminated sign. No. 1,400,296; Dec. 13.

Kynoch Limited. (See Stephens, Richard H., assignor.)

La Brant, Paul R., and A. C. Nordhaugen, Stanley, N. D. Automobile-wheel-rim-straightening device. No. 1,400,297; Dec. 13.

Lachman, Maurice, New York, N. Y., assignor, by mesne assignments, to Bethlehem Steel Company, Bethlehem, Pa. Metal wheel. No. 1,400,178; Dec. 13.

Lambert, Walter, Montreal, Quebec, Canada. Cargo vessel. No. 1,400,298; Dec. 13.

Landgrebe, Carl O., Dresden, Germany. Valve for motors and the like. No. 1,400,488; Dec. 13.

Lane, Charles J., assignor to C. F. Elwell, London, England. Furnace. No. 1,399,970; Dec. 13.

Lang, Gustave J., Weehawken, N. J., assignor to American Bosch Magneto Corporation, Springfield, Mass. Automatic timing mechanism for oscillating magnetos. No. 1,399,777; Dec. 13.

La Roche, Edwin O., Clifton, Ill. Advertising sign. No. 1,400,081; Dec. 13.

Lavoie, Alphonse J., Montreal, Quebec, Canada. Cutter-boring arm. No. 1,399,971; Dec. 13.

Leadizing Company. (See Shoemaker, Robert J., assignor.)

Lee, Robert E., Dallas, Tex. Mail-pouch-suspending hook. No. 1,400,[illegible]; Dec. 13.

Lehmann, Oscar, Salt Lake City, Utah. Road-vehicle signal. No. 1,399,778; Dec. 13.

Lehr, Louis, Bayonne, N. J. Three-piece watch-casing. No. 1,400,083; Dec. 13.

Leiman, Henry, Tampa, Fla. Cigar-box. No. 1,400,084; Dec. 13.

Levine, Edward, New Haven, Conn. Flush for water-closets. No. 1,400,222; Dec. 13.

Levy, Henri G., San Francisco, Calif. Edging. No. 1,400,174; Dec. 13.

Liddicoat Calex Albia, Iowa. Car brake or stop. No. 1,399,972; Dec. 13.

Limpert, Alexander S., Pittsburgh, Pa. Headlight. No. 1,399,973; Dec. 13.

Linz, Francis E. (See Reif, Joseph, assignor.)

Little, Arthur D., Incorporated. (See Scott, Douglas E., assignor.)

Locomobile Company, The. (See Alborn, Frans G., assignor.)

Locomobile Company, The. (See Wimblad, Nicklas, assignor.)

Loewenberg, William B., Marion, Ind. Basket. No. 1,399,974; Dec. 13.

Lofquist, John V., St. Paul, Minn. Tent-rope tightener. No. 1,400,445; Dec. 13.

Lott, Clarence C., New York, N. Y. Valve-grinding device. No. 1,400,365; Dec. 13.

Lotz, Harold R., Toledo, Ohio. Headlight. No. 1,400,366; Dec. 13.

Lotz, William A., Newark, N. J., assignor to The R. Neumann Hardware Co. Bag-frame catch or hasp. No. 1,[illegible]; Dec. 13.

Lowry, Frederick S., deceased, by M. L. Hart, administratrix, Roseville, Ohio. Ceramic vessel. No. 1,400,480; Dec. 13.

Lynn, James. (See Schaefer, Frank M., assignor.)

MacDonald, Frank J., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Method and apparatus for lining receptacles. No. 1,399,780; Dec. 13.

MacDonald, John A. (See Johnsen, Arthur, assignor.)

Mackenzie, Fred L. (See Ayers, F. L., and Mackenzie.)

Mackenzie, Fred L. (See Gaddo, G., and Mackenzie.)

Mann, Frederick A., Chicago, Ill., assignor to Benjamin Electric Manufacturing Company. Switch. No. 1,399,781; Dec. 13.

Manchester, Ansel B., Los Angeles, Calif. Shock-absorber for drive-shafts. No. 1,400,[illegible]; Dec. 13.

Mangendorff, Max F., Culver Hill, N. Y. Prevention of adherence of moist particles. No. 1,400,176; Dec. 13.

Mann, Benjamin H., Milwaukee, Wis. Combination automobile-lock and thief-trap. No. 1,399,782; Dec. 13.

Manson, George J., Toronto, Ontario, Canada. Manufacturing fiber products. No. 1,399,976; Dec. 13.

Manufacturers Hardware Corporation. (See Beeman, Lyle, assignor.)

Martin Iron Works. (See Carr, John A., assignor.)

Martin, James V., Elyria, Ohio, Aerofoil. No. 1,400,177; Dec. 13.

Mausner, Frederick, Collingswood, N. J., assignor to Henry Wilhelm Company, Pittsburgh, Pa. Filling for mattresses. No. 1,400,[illegible]; Dec. 13.

Meyer, Walter L. and F. Bensley, assignors to The Victory Advertising Manufacturing Company, Kansas City, Mo. Display device. No. 1,399,785; Dec. 13.

Mayo, Benjamin F., Salem, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for operating open shank. No. 1,399,784; Dec. 13.

Mayo, Benjamin F., Salem, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Nail-distributing apparatus. No. 1,399,785; Dec. 13.

McAdam, Alfred B., Moose Jaw, Saskatchewan, Canada. Hot-air furnace. No. 1,400,299; Dec. 13.

McCabe, Harry E., Mount Pleasant, Iowa. Trailer for vehicles. No. 1,400,300; Dec. 13.

McCann, Harry P., Lakewood, Ohio. Furnace and conveying materials therethrough. No. 1,400,367; Dec. 13.

McClurg, John S., New York, N. Y., assignor, by mesne assignments, to Carlisle Tire Corporation. Automobile-tire. No. 1,400,301; Dec. 13.

McConnell, Duncan A., Arlington, N. J., assignor to Klaxon Company. Vibratory-diaphragm signaling device. No. 1,400,085; Dec. 13.

McConnell, George, Grand Rapids, Mich. Gluing-machine. No. 1,399,975; Dec. 13.

McCowan & Torley Company, The. (See Buboup, Harry C., assignor.)

McCreary, Edward J. (See McCreary, John and E. J.)

McCreary, John and E. J., Cohoes, N. Y. Machine for treating blankets. No. 1,400,446; Dec. 13.

McCurrie, Hugh C., San Francisco, Calif. Animal-trap. No. 1,400,175; Dec. 13.

McDill, Rex D. O., Riverview, Fla. Fruit preservative and using same. No. 1,400,086; Dec. 13.

McDonough, Joseph G., Eau Claire, Wis. Lumber and timber trade-marking device. No. 1,400,223; Dec. 13.

McGann, William H., Minneapolis, Minn. Grain-door-forcing device. No. 1,400,447; Dec. 13.

McGee, Dan, Fort Worth, Tex. Aeroplane. No. 1,400,490; Dec. 13.

McInnis, Mathew R., Minneapolis, Minn. Toy aeroplane or glider. No. 1,400,224; Dec. 13.

McKay, Walter D., *et al.* (See Thomas, Thomas D., assignor.)

Mechanical Rubber Company, The. (See Gibson, Henry R., assignor.)

Mechling Fidelis M., Wichita, Kans. Clamp. No. 1,400,491; Dec. 13.

Mecking, Herman, New York, N. Y. Gate for dumping trucks. No. 1,400,369; Dec. 13.

Megill, Edward L., New York, N. Y. Gripper-finger. No. 1,400,808; Dec. 13.

Mellenthin, Edwin E., Waukesha, Wis. Vacuum-cleaner. No. 1,400,448; Dec. 13.

Melser, Richard H., assignor to Triplex Garment Presser, Inc., Syracuse, N. Y. Garment-pressing machine. No. 1,400,088; Dec. 13.

Menard, Alfred N., Salix, Iowa. Water-trough. No. 1,400,449; Dec. 13.

Mercer, Robert S., Blackburn, England. Machine for filling pill-boxes with a regular quantity of pills. No. 1,400,804; Dec. 13.

Merle, Alfred J., Alameda, Calif. Mold. No. 1,399,977; Dec. 13.

Merrell-Soule Company. (See Gould, Benjamin A., assignor.)

Merton, Herbert. (See Hinton, Thomas, assignor.)

Messenger, Jack E., Des Moines, Iowa. Bench-vise. No. 1,399,786; Dec. 13.

Metzger, Charles A. (See Metzger, William E., assignor.)

Metzger, William E., assignor to C. A. Metzger, Rutland, Vt. Awning. No. 1,400,089; Dec. 13.

Meyer, Henry H., Red Wing, Minn. Grain-separator. No. 1,400,225; Dec. 13.

Meyer, Sam, St. Louis, Mo. Window-ventilator. No. 1,399,787; Dec. 13.

Milan, Horace R., Columbia, Tenn. Wrench. No. 1,400,226; Dec. 13.

Militor Corporation, The. (See Dunham, George W., assignor.)

Miller, Edwin P., assignor to Hannifin Manufacturing Company, Chicago, Ill. Chuck for machine-tools. No. 1,400,306; Dec. 13.

Miller, Marie, Ottawa, Ontario, Canada. Electric hair-curler. No. 1,400,305; Dec. 13.

Miller, William E., Renton, Wash. Composition for rubber finish and process. No. 1,400,090; Dec. 13.

Minick, Judd L., Altoona, Pa. Lamp-focusing device. No. 1,400,227; Dec. 13.

Mittman, Ernest B., Muscatine, Iowa. Feed holder and trough. No. 1,400,307; Dec. 13.

Moeller, Joseph F., Chicago, Ill. Leaf stemming and booking machine. No. 1,400,228; Dec. 13.

Moffat, David D., Hayden, Ariz. Ore concentration. No. 1,400,308; Dec. 13.

Molle, William, Oshkosh, Wis. Tabulator-stop for typewriters. No. 1,400,492; Dec. 13.

Monaghan, Thomas H., Chicago, Ill. Dishwasher. No. 1,399,978; Dec. 13.

Morelli, Caro B. (See Morelli, Juan B. and C. B.)

Morelli, Juan B. and C. B., Barcelona, Spain. Armored pneumatic tire. No. 1,400,450; Dec. 13.

Morgan, Walter L., St. Louis, Mo. Wrench. No. 1,400,451; Dec. 13.

Morton, Frederic C., New Haven, Conn. Tire-building machine. No. 1,399,979; Dec. 13.

Mosler Lock Company. (See Benham, E. M., and Bartels, assignors.)

Nelson, Charles A. (See O'Connor, D. J., Nelson, and Nahabed.)
Nesbitt, Samuel T., et al. (See Tooker, Harry S., assignor.)
Nessler, Charles, assignor to Nestle Patent Holding Co. Inc., New York, N. Y. Hair-waving apparatus. No. 1,400,370; Dec. 13.
Nestle Patent Holding Co. (See Nessler, Charles, assignor.)
Neumann, R., Hardware Co., The. (See Lotz, William A., assignor.)
Neumeyer, Horace F., Macungie, Pa. Automatic die. No. 1,399,967; Dec. 13.
Newcarry, Spencer B., Cleveland, Ohio. Basic refractory brick. No. 1,400,087; Dec. 13.
Newbury, Frank D., Pittsburgh, Pa., assignor to Westinghouse Electric and Manufacturing Company. Controlling device. No. 1,400,002; Dec. 13.
Newell, Walter E. (See Field, C. and Newell.)
Newhouse, Ray C., assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Tube-mill. No. 1,399,982; Dec. 13.
Newton, Jeptha M., Dotham, Ala. Tensioning and pulling device. No. 1,400,371; Dec. 13.
Newton, Richard T., Nutley, N. J. Vehicle. No. 1,400,372; Dec. 13.
Nicholls, Henry M., Lockport, N. Y. Coating-machine. No. 1,400,310; Dec. 13.
Nicht, Alexander J., Jr., assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Motor-control apparatus. No. 1,399,983; Dec. 13.
Nilson, Harold and L., Wayzata, Minn. Tractor. No. 1,400,230; Dec. 13.
Nilson, Leonard. (See Nilson, Harold and L.)
Nolte, Frank, et al. (See Binns, John B., assignor.)
Nordberg, Bruno V., Milwaukee, Wis. Valve for air-compressors and the like. No. 1,400,373; Dec. 13.
Nordhaugen, Adolph C. (See La Brant, P. R., and Nordhaugen.)
North, Clayton O., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Compounding of rubber products. No. 1,399,789; Dec. 13.
Norton Company. (See Anderson, Harry O., assignor.)
Nuss, Adolph J., and F. A. Parker, Williamsport, Pa. Filling and testing device. No. 1,399,868; Dec. 13.
O'Brien, William G., Akron, Ohio. Compounding rubber. No. 1,400,231; Dec. 13.
O'Connor, Daniel J., C. A. Nelson, and C. Nahabed, New York, N. Y., assignors to Twisted Wire & Steel Co. Wire-stretcher. No. 1,400,093; Dec. 13.
Of'n'On Chain Corporation. (See Ryan, Michael B., assignor.)
Ogden, John E., Mountainville, N. Y. Lag-screw expansion-shield. No. 1,400,405; Dec. 13.
Olinger, Thomas, and J. De Glopper, assignors to Federal Stamping Company, Holland, Mich. Furnace-damper regulator. No. 1,399,984; Dec. 13.
Olinger, Thomas, assignor to Federal Stamping Company, Holland, Mich. Furnace-register. No. 1,399,985; Dec. 13.
Oliver Machinery Company. (See Kurkjian, Armen S., assignor.)
Oniki, Manjiro, Fukuoka-Ken, Japan. Rice for manufacturing soy. No. 1,400,374; Dec. 13.
Ord, Lewis C., assignor to The Holden Company, Limited, Montreal, Quebec, Canada. Box car. No. 1,400,054; Dec. 13.
Owen, George W., assignor of one-half to P. K. Thiry, Indianapolis, Ind. Detachable heel. No. 1,400,095; Dec. 13.
Owen, George W., assignor of one-half to P. K. Thiry, Indianapolis, Ind. Detachable heel for shoes and boots. No. 1,400,096; Dec. 13.
Owens, Richard L., Minneapolis, Minn. Feed-hopper for grain-cleaning machinery. No. 1,400,235; Dec. 13.
Owens, Richard L., Minneapolis, Minn. Feed-hopper for grain-cleaning machines. No. 1,400,284; Dec. 13.
Owens, Richard L., Minneapolis, Minn. Wild-oat separator. No. 1,400,233; Dec. 13.
Pace, Marion, Homer City, Pa. Railway-tie. No. 1,400,375; Dec. 13.
Pacific Car & Foundry Co. (See Dow, Lancaster A., assignor.)
Pacific Car & Foundry Co. (See Palen, Frank T., assignor.)
Panoff, Nicholas B., Brooklyn, N. Y. Fountain-pen. No. 1,400,111; Dec. 13.
Parker, Fredrick A. (See Nuss, A. J., and Parker.)
Parker-Russell Big & Rail Company, The. (See Bliss, Richard R., assignor.)
Pathe Freres Phonograph Company. (See Gruner, Morris M., assignor.)
Patrick, F. A., et al. (See Pritchett, Joseph F., assignor.)
Patty, Nick, San Antonio, Tex. Harness-tug. No. 1,399,809; Dec. 13.
Payne, John H., Jr., Schenectady, N. Y., assignor to General Electric Company. Method of and means for producing alternating currents. No. 1,400,245; Dec. 13.
Pearce, Amy, Maiden City, British Columbia, Canada. Grub-cutter. No. 1,399,870; Dec. 13.
Pearson, Edward I., Toledo, Ohio. Engine-cooling means. No. 1,399,971; Dec. 13.
Pearson, Edward I., Toledo, Ohio. Short-circuiting means for automotive windings. No. 1,399,991; Dec. 13.
Peek, Horace H., Chattanooga, Tenn. Furnace. No. 1,400,454; Dec. 13.
Pelizzoni, Joseph A., Allentown, Pa., assignor to International Motor Company, New York, N. Y. Indexing-fixture for machine-tools. No. 1,399,992; Dec. 13.
Pemberton, Cyrus L., Fairmont, Ind. Oil-burner. No. 1,399,940; Dec. 13.
Perkins, Laula J., Lewiston, Idaho. Toy aeroplane. No. 1,400,047; Dec. 13.
Perrin, Arthur, Brookline, Mass. Optical instrument. No. 1,400,008; Dec. 13.
Perrin, George H., Hastings upon Hudson, N. Y., assignor to Scovill Manufacturing Company, Waterbury, Conn. Slide-buckle. No. 1,400,178; Dec. 13.
Perry, Ray P., Upper Montclair, N. J., assignor to The Barrett Company. Construction material. No. 1,400,312; Dec. 13.
Peterson, Edwin T., Gowrie, Iowa. Fence-post. No. 1,400,455; Dec. 13.
Petrak, George W., Marcellus, Wash. Grease-cup wrench. No. 1,400,456; Dec. 13.
Pfannenstiehl, Harry, East Orange, N. J., and E. F. Watson, assignors to Western Electric Company, Incorporated, New York, N. Y. Printing-telegraphy. No. 1,399,993; Dec. 13.
Pfeffer, John E., Chicago, Ill. Pressure-fluid motor. No. 1,400,236; Dec. 13.
Pfeiffer, Louis A., San Francisco, Calif. Oil-fuel heater. No. 1,400,172; Dec. 13.
Phillips, Harry G. (See Winter, George J., assignor.)
Phillips, James J., Rochester, N. Y. Winding means for spring-motors. No. 1,399,790; Dec. 13.
Phoenix, Charles E., Bellingham, Wash. Surveyor's compass. No. 1,399,994; Dec. 13.
Pickup, William, Pendleton, England. Rotary photogravure-printing machine. No. 1,399,987; Dec. 13.
Pico, Albert. (See White, Fred G., assignor.)
Pierce, Frank M., Chicago, Ill. Automatically-adjustable tensioning device. No. 1,399,988; Dec. 13.
Pierce, Frank M., Chicago, Ill. Horizontal-shuttle wrapping-machine. No. 1,399,989; Dec. 13.
Pierson, Reginald K., and T. S. Duncan, London, assignors to Vickers Limited, Westminster, England. Alighting or landing gear for aircraft. No. 1,399,990; Dec. 13.
Pierson, Robert M., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. No. 1,399,791; Dec. 13.
Pigeon, Albert M., assignor to Wildman Mfg. Co., Norristown, Pa. Yarn severing and clamping device for knitting-machines. No. 1,400,180; Dec. 13.
Pignalosa, Camillo. (See Sollima, Carmelo, assignor.)
Poignant, Carl E., assignor of one-half to C. G. Poignant, Matsqui, British Columbia, Canada. Poultry-nest. No. 1,400,472; Dec. 13.
Poignant, Carl G. (See Poignant, Carl E., assignor.)
Polinkowsky, Lipa, London, England, assignor to Western Electric Company, Incorporated, New York, N. Y. Semi-automatic telephone-exchange system. No. 1,400,181; Dec. 13.
Pouchain, Adolfo, Turin, Italy. Negative plate for electric accumulators. No. 1,399,995; Dec. 13.
Pouchain, Adolfo, Turin, Italy. Negative plate for electric batteries. No. 1,399,996; Dec. 13.
Powell, Howard L., assignor to National Biscuit Company, New York, N. Y. Apparatus for forming cakes, &c. No. 1,400,373; Dec. 13.
Pratt, Huldah E., Detroit, Mich. Hair-waver. No. 1,400,374; Dec. 13.
Priets, Rosehold, et al. (See Kolling, Charles H., assignor.)
Prisamer, Burrows J., and J. L. Halstead, Los Angeles, Calif. Machine for making reinforced concrete pipe. No. 1,400,457; Dec. 13.

Pritchett, Joseph F., assignor of one-fourth to J. A. Johnson, Columbus, Ga., one-fourth to Q. T. Foster and one-fourth to F. A. Patrick, Columbus, Ga. Stringer. No. 1,399,875; Dec. 13.
Prött, Carl H., Rheydt, Germany. Apparatus for determining the amount of heat in the air. No. 1,400,313; Dec. 13.
Proudfoot, James O. B., Grafton, W. Va. Locomotive-journal lubricator. No. 1,400,237; Dec. 13.
Pruitsman, Paul, and G. L. Goodwin, Santa Maria, Calif., assignors, by mesne assignments, to General Petroleum Corporation. Treating asphaltic oils. No. 1,399,792; Dec. 13.
Pueppke, Gottlieb A., Oshkosh, Wis. Nut-cracking device. No. 1,400,099; Dec. 13.
Pulliam, William S., Los Angeles, Calif. Harvester and loader for beets, potatoes, &c. No. 1,399,876; Dec. 13.
Pupin, Michael I., Norfolk, Conn. Sound-generator. No. 1,399,877; Dec. 13.
Quinn, Allen F., Corona, N. Y. Reversible heel. No. 1,400,182; Dec. 13.
Rainey, Paul M., Glen Ridge, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Telegraph system. No. 1,399,997; Dec. 13.
Rainey, Paul M., Glen Ridge, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Telegraph system. No. 1,400,493; Dec. 13.
Rawson, William S. (See King, C. A., and Rawson.)
Ray, William H., Monroe, Mich. Window-screen construction. No. 1,399,878; Dec. 13.
Raymond, Le Roy, Ocean Park, Calif., assignor to A. Nestle and W. Denzel, New York, N. Y. Amusement device. No. 1,400,314; Dec. 13.
Raynsford, Arthur, assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone system. No. 1,399,998; Dec. 13.
Reddaway, Frank, Pendleton, Manchester, England. Vehicle of the self-laying-track type. No. 1,400,100; Dec. 13.
Reddin, Thomas P., Bridgeport, Conn. Power transmission. No. 1,399,879; Dec. 13.
Reed, Edgar H., Worcester, Mass. Making winged nuts and the like. No. 1,399,793; Dec. 13.
Reed, Hugh T., Chicago, Ill. Calendar. No. 1,399,880; Dec. 13.
Reed, James M., Brooklyn, N. Y. Safety door-fastener. No. 1,400,315; Dec. 13.
Reeve, Henry E., Brooklyn, N. Y. Thermostatic device. No. 1,400,238; Dec. 13.
Relf, Joseph, assignor of 45 per cent. to F. E. Ling, Hebron, Ind. Piston. No. 1,399,794; Dec. 13.
Relf, Joseph, assignor of 45 per cent. to F. E. Ling, Hebron, Ind. Shock-absorber for automobiles and other vehicles. No. 1,399,795; Dec. 13.
Reimer, Jorgen A., assignor of one-half to H. C. Hansen, Elk Horn, Iowa. Draft-evener for harrows. No. 1,399,999; Dec. 13.
Remy Electric Company. (See Conklin, Oliver F., assignor.)
Renault, Louis. (See Fuchs, Ernest, assignor.)
Renholdt, Charles A., assignor to The Bryant Electric Company, Bridgeport, Conn. Pull-switch. No. 1,400,376; Dec. 13.
Reno, Jesse W., New York, N. Y. Raising submerged vessels. No. 1,400,316; Dec. 13.
Richard, Fidele F., Moncton, New Brunswick, Canada. Valve-grinder. No. 1,400,000; Dec. 13.
Rider, Thomas B., Los Angeles, Calif. X-ray tube. No. 1,400,001; Dec. 13.
Ridout, Horace J., Floresville, Tex. Railway-crossing signal. No. 1,400,458; Dec. 13.
Roberts, Harold F. (See Carmean, J. H., and Roberts.)
Roberts, John M. (See Carmean, J. H., and Roberts.)
Robertson, James G., New York, N. Y. Heel. No. 1,400,183; Dec. 13.
Rodway, John L., Retford, England. Apparatus or means for automatically stopping gramophones and like machines. No. 1,399,881; Dec. 13.
Roe, Charles C., Wolfe City, Tex. Weevil-exterminator. No. 1,400,459; Dec. 13.
Roger, Eugene L., assignor to American Snap Fastener Company Inc., New York, N. Y. Machine for carding snap-fasteners. No. 1,400,002; Dec. 13.
Rosenkrans, Max, assignor to National Tube Company, Pittsburgh, Pa. Trough-dumping mechanism. No. 1,399,882; Dec. 13.
Rosenkrans, Max, assignor to National Tube Company, Pittsburgh, Pa. Trough-cover-lifting mechanism. No. 1,399,883; Dec. 13.
Rosenthal, Rubin, Brooklyn, N. Y. Ring-setting. No. 1,400,460; Dec. 13.
Ross, Oscar A., Brooklyn, N. Y. Automatic train-control system or the like. No. 1,399,796; Dec. 13.
Rotsted, William, Chicago, Ill. Apparatus for treating grain, &c. No. 1,399,797; Dec. 13.
Rowe, Andrew R., Portsmouth, Ohio. Apparatus and method for casting metal products. No. 1,399,798; Dec. 13.
Rowe, Edgar E., Chicago, Ill., assignor to United Shoe Machinery Corporation, Paterson, N. J. Tacking mechanism. No. 1,399,799; Dec. 13.
Rowe, John B., and A. G. Barratt, Johannesburg, Transvaal, South Africa. Change-speed gearing. No. 1,400,317; Dec. 13.
Rowlands, Percy O., Liverpool, England. Vaporizer. No. 1,400,377; Dec. 13.
Roy, Edward D., Greenville, S. C. Loom. No. 1,400,318; Dec. 13.
Royer, Edwin C., Philadelphia, Pa. Shears. No. 1,400,378; Dec. 13.
Ruble, Cyrus E. (See Hysell, Elmer, assignor.)
Rudoll, Edward C., Rice Lake, Wis. Head-block for presses. No. 1,400,319; Dec. 13.
Russell, Charles C., Chicago, Ill. Swell for automatic organs. No. 1,400,239; Dec. 13.
Russell, Charles C., Chicago, Ill. Automatic cut-out valve for self-playing organs. No. 1,400,240; Dec. 13.
Russell, Foster, Spokane, Wash. Washing-machine drawoff. No. 1,399,800; Dec. 13.
Ruttan, Alfred A., and C. E. Hutchings, assignors to Eastman Kodak Company, Rochester, N. Y. Plate-magazine for cameras. No. 1,399,884; Dec. 13.
Ryan, John H., Brighton, Mass. Chain-clamp. No. 1,399,885; Dec. 13.
Ryan, Michael B., Milford, Conn., assignor to Of 'N' On Chain Corporation, New York, N. Y. Non-skid chain. No. 1,400,320; Dec. 13.
Sacane, Tony, Gallatin, Pa. Game. No. 1,400,461; Dec. 13.
Saiges, Charles P., Philadelphia, Pa. Brake for aeroplanes. No. 1,400,462; Dec. 13.
Salmon, Edward W., Jr., assignor to Hull, Salmon Mfg. Co., Inc., Baltimore, Md. Film-cabinet. No. 1,400,503; Dec. 13.
Samuel, Lester E., Brownsville, Oreg. Circuit-breaker for reversible motors. No. 1,399,801; Dec. 13.
Sandefur, Telford, Roanoke, Va. Valve-lifter. No. 1,400,643; Dec. 13.
Sarra, Angelo D., New York, N. Y. Door-locking mechanism. No. 1,399,886; Dec. 13.
Saurage, Herbert J., Chicago, Ill. Radiator-shield for motor-vehicles. No. 1,400,184; Dec. 13.
Sawyer, Harvey C., St. Paul, Minn. Railway-track. No. 1,399,802; Dec. 13.
Sawyer, Walter H., assignor to H. R. Keene, Philadelphia, Pa. Sales-check holder and notcher therefor. No. 1,399,887; Dec. 13.
Schaake, William, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Pantograph-trolley. No. 1,400,101; Dec. 13.
Schaefer, Frank M., Chicago, Ill., assignor to J. Lynn, Wabash, Ind. Eraser-cleaner. No. 1,399,888; Dec. 13.
Schäffer, Max, assignor to Robert Bosch Aktiengesellschaft, Stuttgart, Germany. Magneto-electric sparking apparatus. No. 1,399,803; Dec. 13.
Schaller, Carl, assignor to Grimme, Natalis & Co., Commanditgesellschaft Auf Actien, Brunswick, Germany. Calculating-machine. No. 1,400,003; Dec. 13
Schaller, Carl, assignor to Grimme, Natalis & Co., Commanditgesellschaft Auf Actien, Brunswick, Germany. Calculating-machine. No. 1,400,004; Dec. 13.
Schaller, Otto, Südende, near Berlin, assignor to Firm: Julius Pintsch Akt.-Ges., Berlin, Germany. Holder for the glowers of tungsten lamps. No. 1,400,005; Dec. 13.
Schelter, John C., Rochester, N. Y., assignor to Fits-Empire Double Pivot Last Company, Auburn, Me. Shoe form. No. 1,399,804; Dec. 13.
Scherfree, Mary A. (See Block, Benjamin B., assignor.)
Schermack Corporation, The. (See Schermack, Joseph J., assignor.)
Schermack, Joseph J., assignor to The Schermack Corporation, Detroit, Mich. Stamp-vending machine. No. 1,399,889; Dec. 13.
Schnipper, Samuel. (See Fraidus, Joe, assignor.)
Schoenberger, William J. (See Schultis, Charles F., assignor.)
Scholimeyer, Herbert H., Milwaukee, Wis. Motor-driven animal-skinning knife. No. 1,400,379; Dec. 13.
Schopp, Laurence O., St. Louis, Mo. Vacuum can-sealing machine. No. 1,399,805; Dec. 13.
Schultis, Charles F., assignor of one-half to W. J. Schoenberger, Cleveland, Ohio. Press for squeezing sand in flasks. No. 1,400,321; Dec. 13.
Schutte & Koerting Company. (See Derby, Samuel E., assignor.)
Schwartz, Charles, Villeurbanne, assignor to Société Gillet & Fils, Lyon, Rhone, France. Treatment of vegetable fibers. No. 1,400,380; Dec. 13.
Schwartz, Charles, Villeurbanne, France, assignor to Société Gillet & Fils, Lyon, Rhone, France. Treatment of vegetable fibers. No. 1,400,381; Dec. 13.
Schwarz, Emil P., St. Paul, Minn. Wrench. No. 1,399,890; Dec. 13.
Schweers, John D., Elizabeth, N. J. Valve for internal-combustion engines. No. 1,400,006; Dec. 13.
Scofield, Edgar, New York., assignor to Anchor Cap & Closure Corporation, Brooklyn, N. Y. Crank-shaft. No. 1,399,806; Dec. 13.
Scott, Douglas E., Boston, assignor to Arthur D. Little, Incorporated, Cambridge, Mass. Isolating fiber from bagasse. No. 1,399,891; Dec. 13.
Scott, Wilfred W., Grantwood, N. J., assignor, by mesne assignments, to Atmospheric Nitrogen Corporation, New York, N. Y. Catalyzer for and producing oxids of nitrogen. No. 1,399,807; Dec. 13.
Scovill Manufacturing Company. (See Perrine, George H., assignor.)
Seattle-Astoria Iron Works. (See Troyer, Nelson, assignor.)

Secretary of War, trustee. (See Wood, Lowrie A., assignor.)
Seery, Thomas H., Malden, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Lasting-machine. No. 1,399,852; Dec. 13.
Sanders, Hiester, Reading, Pa. Power-transmission device. No. 1,400,185; Dec. 13.
Seymour, Roy R., and L. T. White, Pasadena, Calif. Sparking packing. No. 1,400,464; Dec. 13.
Severance, Howard D., Monterey, Calif. Fish cutting and cleaning machine. No. 1,400,186; Dec. 13.
Severs, Christopher H., Chicago, Ill. Safety-lock for switch-stands. No. 1,399,806; Dec. 13.
Shafer, John L., *et al.* (See Tucker, Harry S., assignor.)
Shambow, John C., assignor to Shambow Shuttle Company, Woonsocket, R. I. Shuttle-eye. No. 1,399,803; Dec. 13.
Shambow Shuttle Company. (See Shambow, John C., assignor.)
Sharp, John W. Mustogee, Okla. Bed-spring. No. 1,399,804; Dec. 13.
Sheehan, William M., assignor to Commonwealth Steel Company, St. Louis, Mo. Adjustable driving-box. No. 1,399,809; Dec. 13.
Sherbondy, Earl H., Cleveland, Ohio. Turbo-blower assembly. No. 1,400,222; Dec. 13.
Sherbondy, Earl H., Cleveland, Ohio. Turbo-compressor casing. No. 1,400,823; Dec. 13.
Sheriff, Samuel, Salt Lake City, Utah. Expansion-joint for pipes. No. 1,400,465; Dec. 13.
Shober, Frank L., Cincinnati, Ohio. Automobile-curtain. No. 1,399,895; Dec. 13.
Shoemaker, Robert J., assignor to Leadsing Company, Chicago, Ill. Iron or steel bearing element and making same. No. 1,399,810; Dec. 13.
Sholdsbrand, Henry O., St. Louis, Mo. Stovepipe-cleaner. No. 1,400,241; Dec. 13.
Shott Manufacturing Company, The. (See Gail, Charles H., assignor.)
Shute, Arthur C. (See Bergen, William V., assignor.)
Simmons, Charles B., Bristol, assignor to L. S. Bailey, Southington, Conn. Folding drawing-knife. No. 1,400,332; Dec. 13.
Sinclair, John, *et al.* (See Welch, James G., assignor.)
Singer, Benjamin, St. Louis, Mo. Lock for doors, windows, and the like. No. 1,399,807; Dec. 13.
Singer, Louis D., Harrodsburg, Ky. Wax flowers and making them. No. 1,400,326; Dec. 13.
Singer Manufacturing Company, The. (See Allen, Edward B., assignor.)
Singer Manufacturing Company, The. (See Corrall, Herbert, assignor.)
Siwecki, Felix G., Chicago, Ill. Locking device for automobiles. No. 1,400,243; Dec. 13.

Société Anonyme des Etablissements L. Blériot. (See Bossu, Pierre, assignor.)
Société Anonyme Le Carbone. (See Gindre, Eugène, assignor.)
Société Gillet & Fils. (See Schwartz, Charles, assignor.)
Soete, Leonard P., Louisville, Ky. Car-wheel. No. 1,400,246; Dec. 13.
Solfiva, Carmelo, Paris, France, assignor to C. Pizzaloss, Rome, Italy. Child's vehicle. No. 1,400,326; Dec. 13.
Somtgerathe, Joseph F., and R. Kale, Cherryvale, Kans. Convertible plate or cover for electrical receptacles. No. 1,399,890; Dec. 13.
Sorensen, Hans, Hardy, Iowa. Shade-roller. No. 1,399,812; Dec. 13.
Spahr, Otto, assignor to Strauss Gas Iron Co., Philadelphia, Pa. Self-heating sadiron. No. 1,399,813; Dec. 13.
Spangler, Charles M., Emporium, Pa. Boiler-fine tool. No. 1,400,102; Dec. 13.
Sparks, Charles F., St. Louis, Mo. Bag closing and tying machine. No. 1,400,327; Dec. 13.
Sparks, William, Jackson, Mich., assignor to The Sparks-Withington Company, Cleveland, Ohio. Bracket. No. 1,400,007; Dec. 13.
Sparks-Withington Company, The. (See Sparks, William, assignor.)
Sparta, Peter, Saukville, Wis. Bag-holder. No. 1,399,814; Dec. 13.
Spears, Harry E., Baltimore, Md. Automatic draft control for heating apparatus. No. 1,399,815; Dec. 13.
Spiess, Paul, Zurich, Switzerland. Rotor for multistage high-speed engines. No. 1,398,816; Dec. 13.
Sporer, Paul, Chicago, Ill. Fruit and vegetable parer. No. 1,399,901; Dec. 13.
Sporer, Paul, Chicago, Ill. Fruit and vegetable parer. No. 1,399,902; Dec. 13.
Sprado, Carl G., assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Method of and apparatus for manufacturing internal-combustion engines. No. 1,399,903; Dec. 13.
Sprado, Carl G., assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Internal-combustion engine. No. 1,400,248; Dec. 13.
Springman, Carl W., Wellington, Kans. Liquid-fuel burner. No. 1,400,249; Dec. 13.
Square D Company. (See Ball, Albert P., assignor.)
Square D Company. (See Freeman, H. S., and Bodner, assignors.)
Square D Company. (See Woodrich, Arthur R., Jr., assignor.)
Square D Company. (See Zenker, Frederick, assignor.)
Stanley, Frank, Birmingham, England. Grinding-machine. No. 1,400,464; Dec. 13.
Stargis, Robert H. P., Madisonville, Ohio. Pie-crimper and cutter. No. 1,400,383; Dec. 13.
Staudig, Edwin O., Bakersfield, Calif. Self-feeder for hay-presses and threshers. No. 1,400,466; Dec. 13.
Standard Hatters Manufacturing Company. (See Hawkins, Arthur L., assignor.)
Standard Oil Company of New York. (See Chamberlain, Horace P., assignor.)
Steffens, John A., Baltimore, Md., assignor to U. S. Industrial Alcohol Co. Producing catalysers. No. 1,400,247; Dec. 13.
Steiger, John H. (See Wilms, O. D., and Steiger.)
Stephens, Richard H., assignor of one-half to Kynoch Limited, Birmingham, England. Vapor-stove. No. 1,400,384; Dec. 13.
Stevens, Herbert C. M. (See Coutalen, L., and Stevens.)
Stevenson, George, Camden, N. J. Drying device. No. 1,399,903; Dec. 13.
Steventon, Thomas, Framingham, Mass. Die for molding phonograph records and the like. No. 1,399,904; Dec. 13.
Stewart, Charles T., Scotch Plains, N. J. Game device. No. 1,399,815; Dec. 13.
Stewart, Keith, Calcutta, British India. Cop-winding attachment for spinning-frames. No. 1,400,005; Dec. 13.
Stewart, Paul, Manville, Wyo. Adjustable wagon-gearing. No. 1,400,328; Dec. 13.
Stewart-Warner Speedometer Corporation. (See Wood, Andrew C., assignor.)
Stine, Ruby P., Greensburg, Ind. Waterbed fence. No. 1,399,816; Dec. 13.
Stirk, John H., Gravelly Hill, near Birmingham, England. Splash-guard for wheels of motor-vehicles. No. 1,400,010; Dec. 13.
Stites, James H., Detroit, Mich. Fireplace. No. 1,400,329; Dec. 13.
Stoddard, Charles F., New York, N. Y. Note-sheet perforating machine. No. 1,400,242; Dec. 13.
Stoots, John H., Knoxville, Tenn. Seat. No. 1,399,820; Dec. 13.
Storey, Benton W., Hailey, Idaho. Fencing-grip. No. 1,399,821; Dec. 13.
Strauss Gas Iron Co. (See Spahr, Otto, assignor.)
Streb, Charles, Rochester, N. Y. Footwear. No. 1,399,822; Dec. 13.
Strobl, Engelbert, Baltimore, Md. Musical toy. No. 1,400,386; Dec. 13.
Strob, Arthur K., Cadillac, Mich. Nutlock. No. 1,400,387; Dec. 13.
Stronghart Company. (See Kusel, Isidor J., assignor.)
Strout, Noyes R., Norwood, assignor to The Champion Amusement Company, Cincinnati, Ohio. Card game. No. 1,399,823; Dec. 13.
Stukey, Lawson J., Pittsburg, Kans. Washing-machine. No. 1,400,388; Dec. 13.
Sturtevant Mill Company. (See Sturtevant, Thomas J., assignor.)
Sturtevant, Thomas J., Wellesley, assignor to Sturtevant Mill Company, Boston, Mass. Separator. No. 1,400,467; Dec. 13.
Sunbeam Motor Car Company. (See Coatalen, L., and Stevens, assignors.)
Sundheim, Peter J. (See Ferrall, J. J., Sundheim, and Trelawny.)
Sunshine Amusement and Properties Co. (See Cadlipp, George R., assignor.)
Superior Rubber Mold & Equipment Company, *et al.* (See Binns, John B., assignor.)
Swanson, Anton, assignor to The Campbell Wire Specialty Works, South Bend, Ind. Valve-actuating device. No. 1,399,824; Dec. 13.
Sweeney, Eugene J., Rockford, Ill. Plane. No. 1,400,330; Dec. 13.
Taggart, Dawson M., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Artificial busy-circuits. No. 1,400,103; Dec. 13.
Taylor, Augustus. (See Elliott, Harold F., assignor.)
Taylor, Stephen J., *et al.* (See Binns, John B., assignor.)
Taylor's. (See Wadsworth, Perry C., assignor.)
Terrell, Thomas, London, England. Weaving-machine. No. 1,399,904; Dec. 13.
Thiry, Paul E. (See Owen, George W., assignor.)
Thomas, Joseph E., Sawtelle, Calif. Swingable telephone. No. 1,400,187; Dec. 13.

Thomas, Thomas D., Youngstown, Ohio, assignor of one-third to W. D. McKay and one-third to T. L. Thomas. Bolt. No. 1,400,245; Dec. 13.
Thomas, Thomas L., *et al.* (See Thomas, Thomas D., assignor.)
Thompson, Geoladys G., St. Louis, Mo. Garment. No. 1,399,825; Dec. 13.
Thorig, Werner, Zurich, Switzerland. Safe. No. 1,400,104; Dec. 13.
Thurston, Ernest B., assignor to The Haughton Elevator & Machine Co., Toledo, Ohio. Gate device. No. 1,400,905; Dec. 13.
Timm, William A. (See Griffin, J. T., and Timm.)
Todd, John H., Cleveland, Ohio. Laundry-checking device. No. 1,399,906; Dec. 13.
Tokheim, Albert, Thor, Iowa. Threshold and elsewhere-from-thereto. No. 1,400,250; Dec. 13.
Tooker, Harry S., assignor of one-half to S. T. Nesbitt and J. L. Shafer, Joplin, Mo. Pump. No. 1,400,188; Dec. 13.
Toomey, John F., New York, N. Y., assignor to American Express and Telegraph Company, Means for controlling repeater-circuits. No. 1,400,189; Dec. 13.
Tora, John, assignor of one-half to I. Gustafson, Vancouver, British Columbia, Canada. Saw-handle. No. 1,400,249; Dec. 13.
Townsend, James H., Gloversville, N. Y. Spark-plug. No. 1,399,827; Dec. 13.
Traynor, Arthur, Kosbkonong, Wis. Artificial feeding device. No. 1,399,828; Dec. 13.
Treloar, Charles H. (See Ferrall, J. J., Sundheim, and Trelawny.)
Trinks, Franz, Brunswick, Germany. Adding-machine. No. 1,400,106; Dec. 13.
Trinks, Franz, Brunswick, Germany. Calculating-machine. No. 1,400,105; Dec. 13.
Trophen Garment Presser. (See Meiser, Richard H., assignor.)
Trottier, René E., Puteaux, France. Classifying and separation of solid bodies by combined action of orientation, deviation, and derivation. No. 1,400,389; Dec. 13.
Trottier, René E., Puteaux, France. Apparatus for the classifying and separation of solid bodies by combined action of orientation, deviation, and derivation. No. 1,400,390; Dec. 13.
Troyer, Nelson, assignor to Seattle-Astoria Iron Works, Seattle, Wash. Can heading and sealing machine. No. 1,400,391; Dec. 13.
Tucker, Thaddeus C., assignor to California Almond Growers Exchange, San Francisco, Calif. Advertising-display. No. 1,400,190; Dec. 13.
Turbayne, William A., assignor to U. S. Light & Heat Corporation, Niagara Falls, N. Y. System of electrical distribution. No. 1,400,602; Dec. 13.
Turrettini, Fernand, Geneva, Switzerland. Instrument adapted to disclose the difference actually existing between pieces which should be of the same actual size. No. 1,400,331; Dec. 13.
Twisted Wire & Steel Co. (See O'Connor, D. J., Nelson, and Nehabed, assignors.)
U. S. Industrial Alcohol Co. (See Backhaus, Arthur A., assignor.)
U. S. Industrial Alcohol Co. (See Backhaus, A. A., and Arents, assignors.)
U. S. Industrial Alcohol Co. (See Steffens, John A., assignor.)
U. S. Industrial Alcohol Co. (See Whitaker, Milton C., assignor.)

Agricultural implement. T. M. Jones. No. 1,400,078; Dec. 13.
Agricultural implement, traction-engine, motor-lorry, &c., Motor-driven. J. and C. J. Bamford. No. 1,400,012; Dec. 13.
Agricultural implements, Mechanism for raising and lowering working devices of. C. A. Bacon. No. 1,400,342; Dec. 13.
Agricultural machine, Motor. C. S. Brown. No. 1,399,739; Dec. 13.
Air, Apparatus for determining the amount of heat in the. C. H. Prott. No. 1,400,313; Dec. 13.
Air-heater. E. J. Ellison. No. 1,399,756; Dec. 13.
Air-moistening device. W. B. Krakiau and C. Brettschneider. No. 1,400,444; Dec. 13.
Aircraft, Alighting or landing gear for. R. K. Pierson and T. S. Duncan. No. 1,399,990; Dec. 13.
Alarm or indication apparatus, Audible. G. E. and H. Washington. No. 1,400,113; Dec. 13.
Aldehydes and separating same from other products formed. A. A. Backhaus and F. B. Arents. No. 1,400,205; Dec. 13.
Aluminous materials, Treatment of granular. H. O Anderson. No. 1,400,495; Dec. 13.
Amusement device. G. R. Cudlipp. No. 1,400,497; Dec. 13.
Amusement device. L. Raymond. No. 1,400,314; Dec. 13.
Animal-skinning knife, Motor-driven. H. H. Schellmeyer. No. 1,400,378; Dec. 13.
Animal-trap. H. C. McCurrie. No. 1,400,175; Dec. 13.
Antirattling device. H. E. Ewing. No. 1,400,482; Dec. 13.
Antiskid device. W. J. Gundermen. No. 1,400,358; Dec. 13.
Arm, Cutter-boring. A. J. Lavoie. No. 1,399,971; Dec. 13.
Armature-windings, Short-circuiting means for. E. I. Pearson. No. 1,399,991; Dec. 13.
Armrest, Folding. J. P. Brophy. No. 1,399,744; Dec. 13.
Automobile-brake mechanism. S. D. Heller and L. Herron. No. 1,400,286; Dec. 13.
Automobile-curtain. F. L. Shober. No. 1,399,895; Dec. 13.
Automobile-lock. C. F. Callahan. No. 1,400,415; Dec. 13.
Automobile lock and thief-trap, Combination. B. H. Mann. No. 1,399,782; Dec. 13.
Automobile ornament. J. R. Bower. No. 1,400,017; Dec. 13.
Automobile-radiator. J. Fraidus. No. 1,400,353; Dec. 13.
Automobile-signal. L. A. and R. H. Biggar. No. 1,400,136; Dec. 13.
Automobile-speed controller. H. C. Hill. No. 1,400,062; Dec. 13.
Automobile steering-wheel, Detachable. C. J. Wills. No. 1,400,121; Dec. 13.
Automobile vehicles, Chassis for. E. Fuchs. No. 1,400,045; Dec. 13.
Automobile-wheel-rim-straightening device. P. R. Le Brant and A. C. Nordhaugen. No. 1,400,297; Dec. 13.
Automobiles, Airbrake and starter for. H. Green. No. 1,399,880; Dec. 13.
Automobiles and other vehicles, Shock-absorber for. J. Reif. No. 1,399,795; Dec. 13.
Automobiles, Demountable drive mechanism for. E. L. Kraft. No. 1,400,170; Dec. 13.
Automobiles, Locking device for. F. G. Siwecki. No. 1,400,243; Dec. 13.
Automobiles, Power-transmission attachment for. G. A. Bonelli. No. 1,399,738; Dec. 13.
Awning. W. E. Metzger. No. 1,400,080; Dec. 13.
Bag. C. J. Freese. No. 1,400,355; Dec. 13.
Bag. E. L. Henderson. No. 1,400,499; Dec. 13.
Bag closing and tying machine. C. F. Sparks. No. 1,400,527; Dec. 13.
Bag-frame catch or hasp. W. A. Lotz. No. 1,399,779; Dec. 13.
Bag-holder. P. Spartz. No. 1,399,814; Dec. 13.
Bag-making machines, Attachment for. L. F. Baumann. No. 1,400,404; Dec. 13.
Bagasse, Isolating fiber from. D. E. Scott. No. 1,399,891; Dec. 13.
Barley, Producing malted pearl-. A. Heinemann. No. 1,400,160; Dec. 13.
Barrel-filler. C. Fisk. No. 1,400,275; Dec. 13.
Bar: *See*—
Reinforcing-bar.
Basket. W. B. Loewenberg. No. 1,399,974; Dec. 13.
Battery-charging system. W. L. Cully. No. 1,400,265; Dec. 13.
Battery-machine. R. F. Wherland. No. 1,400,471; Dec. 13.
Battery terminal. A. F. Hawkins. No. 1,400,059; Dec. 13.
Beet-snipper. N. A. Johannes. No. 1,400,290; Dec. 13.
Bearing. A. Kingsbury. No. 1,400,168; Dec. 13.
Bearing, Ball-. B. M. W. Hanson. No. 1,399,959; Dec. 13.
Bearing, Shaft-. M. E. Gysel. No. 1,400,055; Dec. 13.
Bearings, Making. H. W. Fletcher. No. 1,399,856; Dec. 13.
Bed-spring. C. H. Gall. No. 1,400,505; Dec. 13.
Bed-spring. J. W. Sharp. No. 1,399,894; Dec. 13.
Bedpan. J. Karrakis. No. 1,400,074; Dec. 13.
Beets, potatoes, &c., Harvester and loader for. W. Z. Pullam. No. 1,399,576; Dec. 13.
Berry-tray. O. O. Eaton. No. 1,400,426; Dec. 13.
Bicycles, Sprocket-guard attachment for. C. S. Adams. No. 1,400,131; Dec. 13.
Bifocal. H. W. Hill. No. 1,400,061; Dec. 13.
Blankets, Machines for treating. J. and E. J. McCreary. No. 1,400,446; Dec. 13.
Block: *See*—
Cutting-block.
Boiler-flue cleaner. J. H. Goodfellow. No. 1,400,152; Dec. 13.
Bolt. T. D. Thomas. No. 1,400,248; Dec. 13.
Bolt-lock. S. Munson. (Reissue.) No. 15,246; Dec. 13.
Bolt-machines, Header for. W. L. Clouse. No. 1,399,850; Dec. 13.
Bolt, rivet, and the like. F. Allan. No. 1,400,401; Dec. 13.
Boots and shoes, Sole for. J. E. Grosjean. No. 1,399,766; Dec. 13.
Box-lids, Support for. J. M. Waddell. No. 1,399,830; Dec. 13.
Bowl, Washing-. C. P. Bohland. No. 1,399,925; Dec. 13.
Box: *See*—
Adjustable driving-box. Knockdown box.

Engines, Injector for internal-combustion. L. A. Charles. No. 1,400,264; Dec. 13.
Engines, Method of and apparatus for manipulating internal-combustion. C. G. Sprado. No. 1,399,900; Dec. 13.
Engines, Rotor for multistage high-speed. P. Spleas. No. 1,399,810; Dec. 13.
Engines, Starter for. S. A. Ellett. No. 1,400,040; Dec. 13.
Engines, Starter for automobile-. J. F. Collins. No. 1,400,266; Dec. 13.
Engines, Valve for internal-combustion. J. D. Schweers. No. 1,400,006; Dec. 13.
Engines, Valve-operating mechanism for internal-combustion. W. W. Douglas and S. L. Bailey. No. 1,399,941; Dec. 13.
Eraser-cleaner. F. M. Schaefer. No. 1,399,888; Dec. 13.
Erasing device. J. H. Baldwin. No. 1,399,734; Dec. 13.
Explosives, Aeronautical appliance for transporting and firing. W. R. Bowker. No. 1,400,261; Dec. 13.
Extrusion-press. O. B. Jacobsen. No. 1,400,071; Dec. 13.
Fabric-cutting device. A. L. Berthelsen. No. 1,399,924; Dec. 13.
Fabrics, Producing wool-like effects on cotton. G. A. Bosshard. No. 1,400,016; Dec. 13.
Fastenings, Machine for inserting. G. Goddu, F. L. Mackenzie. No. 1,399,765; Dec. 13.
Feed holder and trough. E. H. Mittman. No. 1,400,307; Dec. 13.
Feed memorandum device, Automatic-. E. F. Creevy. No. 1,400,029; Dec. 13.
Feed-water heater, condenser, &c. H. C. Davis. No. 1,400,347; Dec. 13.
Feeding device, Artificial-. A. Traynor. No. 1,399,828; Dec. 18.
Fencepost. E. T. Peterson. No. 1,400,455; Dec. 18.
Fencing-grip. B. W. Storey. No. 1,399,821; Dec. 13.
Fiber products, Manufacturing. G. J. Manson. No. 1,399,976; Dec. 13.
Fibers, Treatment of vegetable. C. Schwartz. Nos. 1,400,380–81; Dec. 13.
Filling and testing device. A. J. Nuss and F. A. Parker. No. 1,399,868; Dec. 13.
Fire-alarm system. M. Gari. No. 1,399,760; Dec. 13.
Fireplace. J. H. Stites. No. 1,400,329; Dec. 13.
Fish cutting and cleaning machine. H. D. Severance. No. 1,400,156; Dec. 13.
Flue tool, Boiler-. C. M. Spangler. No. 1,400,102; Dec. 13.
Flying-machine. G. Caproni. No. 1,400,262; Dec. 18.
Folding chair. H. J. Willems. No. 1,399,835; Dec. 13.
Folding drawing knife. C. B. Simmons. No. 1,400,382; Dec. 13.
Folding mechanism. F. M. Joslin. No. 1,400,292; Dec. 13.
Food product and making same. P. C. Wadsworth. No. 1,400,191; Dec. 18.
Footrest. E. L. Wood. No. 1,399,837; Dec. 18.
Footwear. C. Streb. No. 1,399,822; Dec. 13.
Forging-machine for the manufacture of horseshoes, &c., Automatic. D. F. Glynn. No. 1,399,764; Dec. 13.
Frame: *See*—
Embroidery-frame.
Fruit-huller. A. Pearce. No. 1,399,870; Dec. 13.
Fruit preservative and using same. R. D. McDill. No. 1,400,096; Dec. 13.
Fuel cut-off, Automatic. E. S. King. No. 1,399,967; Dec. 13.
Fuel-press. C. H. Davis. No. 1,400,212; Dec. 13.
Furnace: *See*—
Hot-air furnace.
Furnace. W. C. Drake. No. 1,400,036; Dec. 18.
Furnace. C. J. Lane. No. 1,399,970; Dec. 13.
Furnace. H. H. Peek. No. 1,400,454; Dec. 18.
Furnace. J. T. Wensiulis. No. 1,400,335; Dec. 18.
Furnace and conveying materials therethrough. H. P. McCann. No. 1,400,367; Dec. 13.
Furnace-damper regulator. T. Olinger and J. L. De Glopper. No. 1,399,984; Dec. 13.
Furnace pipes, Dustproof connection for hot-air-. A. J. Cheney. No. 1,399,748; Dec. 13.
Furnace-register. T. Olinger. No. 1,399,985; Dec. 13.
Fuse, Safety-. A. L. Eustice. No. 1,400,480; Dec. 13.
Game. J. Johnson. No. 1,399,864; Dec. 13.
Game. T. Sacane. No. 1,400,461; Dec. 13.
Game, Card. N. R. Strout. No. 1,399,823; Dec. 13.
Game device. C. T. Stewart. No. 1,399,818; Dec. 13.
Game, Mechanical baseball. G. E. Brown. No. 1,400,020; Dec. 13.
Game, Word card. F. C. Smith. No. 1,399,811; Dec. 13.
Gap-closing machine. N. A. Neilsen. No. 1,399,981; Dec. 13.
Garment. G. G. Thompson. No. 1,399,825; Dec. 13.
Garment-hanger. T. Kaufer. No. 1,400,220; Dec. 13.
Garment-pressing machine. R. H. Meizer. No. 1,400,068; Dec. 13.
Gas-burner. V. Z. Caracristi. No. 1,400,024; Dec. 13.
Gas-mixer. J. Needham. No. 1,399,788; Dec. 13.
Gases, Producing poisonous. J. W. Van Meter. No. 1,399,829; Dec. 13.
Gate device. E. B. Thurston. No. 1,399,905; Dec. 13.
Gearing, Change-speed. J. B. Rowe and A. G. Barratt. No. 1,400,317; Dec. 13.
Gears, Housing for truck driving-. R. A. Whittingham. No. 1,400,119; Dec. 13.
Generator: *See*—
Sound-generator.
Gluing-machine. G. McConnell. No. 1,399,975; Dec. 13.
Golf-teaching device, Mechanical. H. W. Garland. No. 1,399,761; Dec. 13.
Grain, &c., Apparatus for treating. W. Rotsted. No. 1,399,797; Dec. 13.
Grain-cleaning machinery, Feed-hopper for. R. L. Owens. No. 1,400,232; Dec. 13.
Grain-cleaning machines, Feed-hopper for. R. L. Owens. No. 1,400,234; Dec. 13.
Grain-door. J. K. Kopchuk. No. 1,400,080; Dec. 13.
Grain-door-forcing device. W. H. McGann. No. 1,400,447; Dec. 13.
Grain-separator. H. H. Meyer. No. 1,400,225; Dec. 13.
Gramophones and like machines, Apparatus or means for automatically stopping. J. I. Rodway. No. 1,399,881; Dec. 13.
Grate shaking and dumping mechanism. R. C. White. No. 1,399,811; Dec. 13.
Grease-cup. A. Ehrhart. No. 1,399,944; Dec. 13.
Grease-cup wrench. G. W. Petrak. No. 1,400,456; Dec. 13.
Grinding-machine. F. Stacey. No. 1,400,466; Dec. 13.
Gripper-finger. E. L. Megill. No. 1,400,303; Dec. 13.
Gun, Grease-. B. C. Bliven. No. 1,400,207; Dec. 13.
Gun, Grease-. A. J. Dilley. No. 1,400,034; Dec. 13.
Hair-curler, Electric. M. Miller. No. 1,400,305; Dec. 13.
Hair-waver. H. E. Pratt. No. 1,399,874; Dec. 13.
Hair-waving apparatus. C. Nessler. No. 1,400,370; Dec. 13.
Hammer, Power-. E. F. Karlson. No. 1,400,166; Dec. 13.
Hammock. F. Goddard. No. 1,400,049; Dec. 13.
Handle: *See*—
Saw-handle.
Hanger: *See*—
Garment-hanger. Pipe-hanger.
Picture-hanger.
Harrow-point. W. D. Whitney. No. 1,400,118; Dec. 13.
Harrows, Draft-evener for. J. A. Reimer. No. 1,399,909; Dec. 13.
Harvester-pitman. M. C. Hoff. No. 1,399,861; Dec. 13.
Hatpin. J. B. Fitzpatrick. No. 1,400,147; Dec. 13.
Hay-press and threshers, Self-feeder for. E. O. Stancliff. No. 1,400,008; Dec. 13.
Headlight. A. S. Limpert. No. 1,399,973; Dec. 13.
Headlight. H. R. Lotz. No. 1,400,306; Dec. 13.
Headlight, Automobile-. F. B. Black. No. 1,400,259; Dec. 13.
Headlight control, Vehicle-. J. W. White. No. 1,400,117; Dec. 13.
Headlight-lens. O. E. Conklin. No. 1,399,749; Dec. 13.
Heater: *See*—
Air-heater. Manifold-heater.
Electric-fan heater. Oil-fuel heater.
Heating apparatus, Automatic draft control for. H. B. Spears. No. 1,399,815; Dec. 13.
Heddles or the like, Apparatus for separating. C. E. Field. No. 1,399,854; Dec. 13.
Heel. J. G. Robertson. No. 1,400,183; Dec. 13.
Heel, Detachable. G. W. Owen. No. 1,400,095; Dec. 13.
Heel for shoes and boots, Detachable. G. W. Owen. No. 1,400,096; Dec. 13.
Heel, Pneumatic. G. J. Winter. No. 1,399,836; Dec. 18.
Heel, Reversible. E. F. Quinn. No. 1,400,182; Dec. 13.
Heels, Last and device for attaching. C. Hunt. No. 1,399,772; Dec. 13.
Hemoglobinometers, Test-glass for. K. Fuchs. No. 1,400,356; Dec. 13.
Hoisting mechanism. I. Benjamins. No. 1,399,736; Dec. 13.
Homogeneous products, including films, Producing. H. F. Willkie. No. 1,400,196; Dec. 13.
Hoof-trimming tool. J. J. Gilbert. No. 1,399,958; Dec. 13.

Hook: *See*—
Mail-pouch-suspending hook.
Mud-hook.
Hose, &c., Machine for mercerizing. A. E. Hawley, F. F. Crosland, and F. G. Dixon. No. 1,399,159; Dec. 13.
Hot-air furnace. A. B. McAdam. No. 1,400,200; Dec. 13.
Huller: *See*—
Fruit-huller.
Hypochlorite, Production of solid basic magnesium. G. Baresesty and E. Wolf. No. 1,400,167; Dec. 13.
Incubator-heating system. J. D. Julius. No. 1,399,865; Dec. 13.
Indicating mechanism. F. W. Wood. No. 1,400,130; Dec. 13.
Indicator. F. R. Heil and A. J. Bossert. No. 1,400,496; Dec. 13.
Internal-combustion engine. J. W. Hudson. No. 1,400,495; Dec. 13.
Internal-combustion engine. C. G. Sprado. No. 1,400,329; Dec. 13.
Internal-combustion engine. N. Winblad. No. 1,400,122; Dec. 13.
Internal-combustion motor. Rotary. H. D. Anderson. No. 1,400,255; Dec. 13.
Iron: *See*—

Folding drawing-knife.
Motor-driven animal-skinning knife.
Knitting-machines, Yarn severing and clamping device. A. M. Pigeon. No. 1,400,180; Dec. 13.
Knitting mechanism, Instrument therefor, and method of knitting. W. A. Houck. No. 1,400,163; Dec. 13.
Knockdown box. J. C. Helm. No. 1,400,060; Dec. 13.
Lace, Tab-attaching device for. A. E. Anderson. No. 1,399,915; Dec. 13.
Lacing-fastening. M. H. Smith. No. 1,399,896; Dec. 13.
Ladder. E. F. Evans. No. 1,400,481; Dec. 13.
Lamp-focusing device. J. L. Minick. No. 1,400,227; Dec. 13.
Lamp, Instrument-board. C. Bramming. No. 1,400,208; Dec. 13.
Lamp, Mercury-vapor. M. J. Cornu. No. 1,400,346; Dec. 13.
Lamps, Holder for the glowers of tungsten. O. Schaller. No. 1,400,005; Dec. 13.
Lasting-machine. R. E. Duplessis. No. 1,399,784; Dec. 13.
Lasting-machine. T. H. Seely. No. 1,399,891; Dec. 13.
Lathe-center. L. Beeman. No. 1,399,921; Dec. 13.
Lathes, Combination handwheel and face-plate for. A. S. Kurkjian. No. 1,399,969; Dec. 13.
Leaf stemming and booking machine. J. F. Moeller. No. 1,400,228; Dec. 13.
Legging. F. G. Chamberlin. No. 1,399,929; Dec. 13.
Lifter: *See*—
Valve-lifter.
Lifting-jack. G. R. Adams. No. 1,399,729; Dec. 13.
Lifting-jack. A. Gustinna. No. 1,400,054; Dec. 13.
Limb, Artificial. A. A. Erb. No. 1,400,042; Dec. 13.
Link or shackle, Connecting. F. W. Erickson. No. 1,399,946; Dec. 13.
Liquid-dropper. L. V. Aronson. No. 1,399,916; Dec. 13.
Liquid-fuel burner. J. A. Doble. No. 1,399,939; Dec. 13.
Liquid-fuel burner. C. W. Springston. No. 1,400,504; Dec. 13.
Liquid fuel, Feeding device for. R. C. Hnff. No. 1,399,964; Dec. 13.
Liquids, Container for volatile. M. C. Whitaker. No. 1,400,193; Dec. 13.
Lock: *See*—
Automobile-lock. End-gate lock.
Bolt-lock. Nut-lock.
Locking device. O. B. Jablon. No. 1,400,487; Dec. 13.
Locomotive attachment. R. G. Cox. No. 1,400,287; Dec. 13.
Locomotive-journal lubricator. J. G. B. Proudfoot. No. 1,400,237; Dec. 13.
Loom. E. D. Roy. No. 1,400,318; Dec. 13.
Lubricating system. G. W. Dunham. No. 1,399,943; Dec. 13.
Lubricator: *See*—
Locomotive-journal lubricator.
Lumber and timber trade-making device. J. G. McDonough. No. 1,400,223; Dec. 13.
Machine-tools, Indexing-fixture for. J. H. Pellasoni. No. 1,399,992; Dec. 13.
Machine-tools, Transmission mechanism for. H. W. Hunt. No. 1,400,381; Dec. 13.
Magneto-electric sparking apparatus. M. Schiller. No. 1,399,803; Dec. 13.
Magneto, Automatic timing mechanism for oscillating. G. J. Lang. No. 1,399,777; Dec. 13.
Mail-bag catching and delivering apparatus. J. G. Welch. No. 1,400,114; Dec. 13.
Mail-pouch-suspending hook. R. E. Lee. No. 1,400,062; Dec. 13.
Mandrels of machine tools of all kinds, Feed device for the. M. Jaeger. No. 1,400,072; Dec. 13.
Manufacture of cellulose esters and ethers. G. F. Clark. No. 1,399,900; Dec. 13.
Mashing-machine. A. Q. Mueller and W. H. Koeller. No. 1,399,890; Dec. 13.
Mattresses, Stitching for. P. Maugeter. No. 1,400,302; Dec. 13.
Meal, Whole-rice. M. M. Baumgartner. No. 1,399,920; Dec. 13.
Measuring device, Electrical. O. A. Knopp. No. 1,399,964; Dec. 13.
Measuring instrument, Electrical. W. M. Bradshaw and C. A. Priddle. No. 1,400,018; Dec. 13.
Meat-tenderer. J. E. Bridges. No. 1,400,418; Dec. 13.
Metal wheel. M. Lachman. No. 1,400,173; Dec. 13.
Methyl formate, Making. H. F. Willkie. No. 1,400,196; Dec. 13.
Middlings, &c., Purifying. H. S. Jewell. No. 1,400,168; Dec. 13.
Mill: *See*—
Tube-mill.
Mills, Grinding-plate for attrition-. G. Wolff. No. 1,400,179; Dec. 13.
Mirrors, Supporting-fixtures for. M. J. Brody. No. 1,399,743; Dec. 13.
Mixer: *See*—
Gas-mixer.
Mixing and aerating device. G. R. Bett. No. 1,399,740; Dec. 13.
Moist particles, Prevention of adherence of. M. F. Mangelsdorf. No. 1,400,176; Dec. 13.
Mold. H. J. Merle. No. 1,399,977; Dec. 13.
Molding-machine. P. W. Gates. No. 1,400,393; Dec. 13.
Motive fluid, Apparatus for conserving. W. B. Flanders. No. 1,399,753; Dec. 13.
Motor: *See*—
Pressure-fluid motor.
Rotary internal-combustion motor.
Motor-control apparatus. A. J. Nicht, Jr. No. 1,399,983; Dec. 13.
Motor-control system. H. L. Keith. No. 1,400,077; Dec. 13.
Motor-spirit and burning-oil from higher-boiling petroleum, Obtaining. H. P. Chamberlain. No. 1,400,419; Dec. 13.
Motors, Circuit-breaker for reversible. L. E. Samuel. No. 1,399,801; Dec. 13.
Mud-hook. M. H. Frank. No. 1,399,952; Dec. 13.
Muffler. H. C. and E. E. Emmons. No. 1,400,350; Dec. 13.
Multiple-stage rotary drill. F. L. O. Wadsworth. No. 1,399,851; Dec. 13.
Music-holder for band use. T. P. Harger, Jr. No. 1,400,217; Dec. 13.
Nail-distributing apparatus. H. F. Mayo. No. 1,399,785; Dec. 13.
Nail or rivet, Clenching. E. Board. No. 1,400,409; Dec. 13.
Name-plate attachment. G. G. Greenberg. No. 1,400,175; Dec. 13.
Note-sheet perforating machine. C. F. Stoddard. No. 1,400,242; Dec. 13.
Nut-cracking device. G. A. Pueppke. No. 1,400,099; Dec. 13.
Nut-lock. W. F. Farnsworth. No. 1,400,218; Dec. 13.
Nut-lock. E. A. Green. No. 1,400,154; Dec. 13.
Nut-lock. A. K. Stroh. No. 1,400,357; Dec. 13.
Nuts and the like, Making winged. E. H. Reed. No. 1,399,796; Dec. 13.
Nuts, Locking device for. J. C. Huffer. No. 1,399,862; Dec. 13.
Nuts, Machine for making. W. J. Sieffel. No. 1,400,244; Dec. 13.
Oil-burner. C. L. Pemberton. No. 1,399,906; Dec. 13.
Oil-burner. W. Walker. No. 1,400,108; Dec. 13.
Oil-fuel heater. L. A. Pfeiffer. No. 1,400,179; Dec. 13.
Oil-rig bull-rope tripper. E. Walters. No. 1,400,111; Dec. 13.
Oil-separator trap. E. C. Kelly. No. 1,400,441; Dec. 13.
Oil-vaporizer, Exhaust-heated. G. M. Holley. No. 1,400,247; Dec. 13.
Oils, Treating asphaltic. P. Prutzman and G. L. Goodwin. No. 1,399,792; Dec. 13.
Oiling mechanism, Elevator. G. P. Young. No. 1,400,354; Dec. 13.
Oleomargarin, Manufacturing. W. T. Ashby. No. 1,400,341; Dec. 13.
Operating-trough. G. W. Huegerich. No. 1,400,486; Dec. 13.
Optical instrument. A. Perrin. No. 1,400,068; Dec. 13.
Ore concentration. D. D. Moffat. No. 1,400,308; Dec. 13.
Organs, Swell for automatic. C. C. Russell. No. 1,400,239; Dec. 13.
Organs, Automatic cut-out valve for self-playing. C. C. Russell. No. 1,400,240; Dec. 13.
Oven, Reel. J. Dalton and B. C. De Meulle. No. 1,399,750; Dec. 13.
Oxids of nitrogen, Catalyzer for and producing. W. W. Scott. No. 1,399,907; Dec. 13.
Parer, Fruit and vegetable. P. Sporer. Nos. 1,399,901–2; Dec. 13.
Paring machine, Vegetable. C. E. Gabrio. No. 1,399,858; Dec. 13.
Peat-bogs to extract the water from the peat in the bogs, Treating. W. W. Camp. No. 1,399,847; Dec. 13.

Pen, Fountain. N. B. Panoff. No. 1,400,311; Dec. 13.
Pencil. C. R. Keeran and M. M. Kaufmann. No. 1,400,062; Dec. 13.
Percussion-tools, Spring particularly for use in. M. L. Brameen. No. 1,400,019; Dec. 13.
Phonograph. E. J. R. Atkinson. No. 1,399,917; Dec. 13.
Phonograph-records &c., Dies for molding. T. Steventon. No. 1,399,817; Dec. 13.
Phonograph-stil, Chuck for. M. M. Gruber. No. 1,400,154; Dec. 13.
Phonograph, Safety device for. C. H. Kolling. No. 1,400,079; Dec. 13.
Phonographic tablet. V. H. Emerson. No. 1,399,767; Dec. 13.
Pieces which should be of the same actual size, Instrument adapted to disclose the difference actually existing between. F. Turrettini. No. 1,400,331; Dec. 13.
Picture-hanger. P. J. Goble. No. 1,400,150; Dec. 13.
Pie-crimper and cutter. R. H. F. Stagge. No. 1,400,383; Dec. 13.
Pills, Machine for filling pill-boxes with a regular quantity of. R. S. Mercer. No. 1,400,304; Dec. 13.
Pipe-buck. J. C. Hughes. No. 1,400,067; Dec. 13.
Pipe-hanger. W. Harding. No. 1,399,960; Dec. 13.
Pipe, Machine for making reinforced-concrete. B. J. Plummer and J. L. Halstead. No. 1,400,457; Dec. 13.
Pipe-wrench. J. N. Dart. No. 1,399,851; Dec. 13.
Pipes, Cut-out for exhaust-. S. P. Smurr. No. 1,400,325; Dec. 13.
Pipes, Expansion-joint for. S. Sheriff. No. 1,400,465; Dec. 13.

Valve mechanism, Tappet-. F. G. Alborn. No. 1,399,859; Dec. 13.
Valve-spring compressor. H. W. Coddington. No. 1,400,027; Dec. 13.
Valve structure. S. E. Derby. No. 1,400,424; Dec. 13.
Valve structure. R. M. Pierson. No. 1,399,791; Dec. 13.
Valves, Biphonic controlling means for. E. W. Buckley. No. 1,400,022; Dec. 13.
Vanity-case for personal wear. M. H. Brosnan. No. 1,400,189; Dec. 13.
Vaporizer. P. O. Rowlands. No. 1,400,377; Dec. 13.
Vehicle. R. T. Newton. No. 1,400,372; Dec. 13.
Vehicle, Childs'. C. Sollima. No. 1,400,326; Dec. 13.
Vehicle of the self-laying-track type. F. Reddaway. No. 1,400,100; Dec. 13.
Vehicle-wheel hub. E. R. Wagner. No. 1,400,112; Dec. 13.
Vehicles, Detachable inclosure for motor-. W. Dickinson. No. 1,400,271; Dec. 13.
Vehicles, Electric lamp for. P. O. Dorer. No. 1,399,940; Dec. 13.
Vehicles, Signal for use on. G. A. Garth. No. 1,399,955; Dec. 13.
Vehicles, Skid for motor-. J. Deschamps. No. 1,400,478; Dec. 13.
Vehicles, Splash-guard for wheels of motor-. J. H. Stirk. No. 1,400,010; Dec. 13.
Vehicles, Trailer for. H. B. McCabe. No. 1,400,300; Dec. 13.
Vending machine, Stamp-. J. J. Schermack. No. 1,399,880; Dec. 13.
Ventilator: *See*—
Window-ventilator.
Vessel, Cargo. W. Lambert. No. 1,400,298; Dec. 13.
Vessels, Raising submerged. J. W. Reno. No. 1,400,316; Dec. 13.
Vibrating mechanism. F. E. Kling and L. B. Weidlein. No. 1,400,160; Dec. 13.
Violin and producing the same. J. Gorman. No. 1,400,153; Dec. 13.
Vise, Bench-. J. E. Messenger. No. 1,399,786; Dec. 13.
Washing-machine. L. J. Stukey. No. 1,400,388; Dec. 13.
Washing-machine draw-off. F. Russell. No. 1,399,800; Dec. 13.
Washing-machines, Drive and reversing mechanism for. C. Weihart. No. 1,399,910; Dec. 13.
Watch-casing, Three-piece. L. Lehr. No. 1,400,083; Dec. 13.
Water-bed fence. R. P. Stine. No. 1,399,810; Dec. 13.
Water-cleaning plant. H. Wehner. No. 1,400,129; Dec. 13.
Water-heating device. J. H. Bacon. Nos. 1,399,918–9; Dec. 13.
Water-softening washing compound. O. Volz. No. 1,400,332; Dec. 13.
Water-trough. A. N. Menard. No. 1,400,449; Dec. 13.
Water-closets, Flush for. E. Levine. No. 1,400,222; Dec. 13.
Waterproofing material and making same. H. H. Hurt. No. 1,400,164; Dec. 13.
Wax flowers and making them. L. D. Singer. No. 1,400,324; Dec. 13.
Weather-stripping. E. H. Berg. No. 1,400,206; Dec. 13.
Weaving-machine. T. Terrell. No. 1,399,904; Dec. 13.
Weeder, Onion-. C. Butler. No. 1,400,414; Dec. 13.
Weevil-exterminator. C. C. Roe. No. 1,400,459; Dec. 13.
Well-cleaning device. F. E. Crotto. No. 1,400,030; Dec. 13.
Wheel: *See*—
Car-wheel. Resilient wheel.
Metal wheel.
Wheel. T. C. Harvey. No. 1,400,437; Dec. 13.
Wheel-hub. P. J. Kilcullen. No. 1,400,442; Dec. 13.
Wheels, Forming disk. G. H. Forsyth. No. 1,399,951; Dec. 13.
Wild-oat separator. R. L. Owens. No. 1,400,239; Dec. 13.
Window-screen construction. W. H. Ray. No. 1,399,878; Dec. 13.
Window-ventilator. S. Meyer. No. 1,399,787; Dec. 13.
Windshield. H. J. Earl. No. 1,400,479; Dec. 13.
Wire box-strapping, Device for tightening and securing round-. L. S. Gans. No. 1,400,046; Dec. 13.
Wire-reel. E. L. Crosswhite. No. 1,399,934; Dec. 13.
Wire-stretcher. D. J. O'Conner, C. A. Nelson, and C. Nahabed. No. 1,400,093; Dec. 13.
Wire wheels, Shaping and truing. H. A. House, Jr. No. 1,399,770; Dec. 13.
Wrapping and means for practising same. W. H. Wheildon. No. 1,400,116; Dec. 13.
Wrapping-machine. H. Y. Armstrong. No. 1,400,202; Dec. 13.
Wrench: *See*—
Chain wrench. Ratchet-wrench.
Grease-cup wrench.
Wrench. V. A. Anderson. No. 1,400,134; Dec. 13.
Wrench. W. E. Hart. No. 1,400,285; Dec. 13.
Wrench. C. W. King. No. 1,399,966; Dec. 13.
Wrench. H. R. Milan. No. 1,400,226; Dec. 13.
Wrench. W. L. Morgan. No. 1,400,451; Dec. 13.
Wrapping-machine, Horizontal-shuttle. F. M. Pierce. No. 1,399,989; Dec. 13.
Wrench, E. P. Schwars. No. 1,399,890; Dec. 13.
Wringer. H. Hansen. No. 1,400,433; Dec. 13.
X-ray system, Fluoroscopic. H. F. Waite. No. 1,400,333; Dec. 13.
X-ray tube. T. B. Rider. No. 1,400,001; Dec. 13.
Yarn package, and method and mechanism for winding it. T. Andrew. No. 1,400,403; Dec. 13.
Yarns, Frame for doubling. F. Chadwick. No. 1,400,026; Dec. 13.

ALPHABETICAL LIST OF DESIGNS.

Auto-radiator cap. L. R. Steele. No. 59,987; Dec. 13.
Automobile-radiator cap. M. Simon. No. 59,985; Dec. 13.
Automobile-radiator core. A. Farrella. No. 59,976; Dec. 13.
Bed-cover retainer. D. B. Humbird. No. 59,961; Dec. 13.
Bottle. V. Vivaudou. No. 59,994; Dec. 13.
Bracelet, Watch-. S. Lederer. No. 59,972; Dec. 13.
Cabinet, Shaving-. M. Jurek. No. 59,967; Dec. 13.
Candy or cake confection, Edible. R. Vesely. No. 59,993; Dec. 13.
Card, Display-. C. F. Farnham. No. 59,955; Dec. 13.
Casket-handle. F. B. Aston. No. 59,946; Dec. 13.
Charm. E. L. Weed. No. 59,996; Dec. 13.

Boxes, baskets, dishes, knives, forks, &c. Societe Francaise D' Orfevrerie D' Art. No. 125,585; Dec. 13.
Brilliantine, face-powder, face-cream, toilet water, &c. Cheramy, Incorporated. No. 152,064; Dec. 13.
Bumpers, tire holders, &c., Automobile. Central Brass & Fixture Company. No. 151,657; Dec. 13.
Burlap. California Cotton Mills Company. No. 154,177; Dec. 13.
Car, Child's wheeled. United States Steel Toy Company. No. 154,775; Dec. 13.
Carbureting boxes and pots. Quigley Furnace Specialties Co. No. 133,022; Dec. 13.
Casting-lines. B. F. Gladding & Co. No. 154,555; Dec. 13.
Casting-lines, Braided-silk. B. F. Gladding & Co. No. 154,590; Dec. 13.
Casting-lines, Hard-braided. B. F. Gladding & Co. No. 154,734; Dec. 13.
Casting-lines, Minnow. B. F. Gladding & Co. No. 154,692; Dec. 13.
Casting-lines, Waterproof braided. B. F. Gladding & Co. No. 154,740; Dec. 13.
Charts, Prepared business-. G. M. Sachs. No. 151,069; Dec. 13.
Chill tonic and mange remedy. W. G. Griste. No. 149,961; Dec. 13.
Cigarette-papers. Max Spiegel & Sons Co. No. 151,891; Dec. 13.
Coal, Leckie Coal Company. Nos. 149,759–60; Dec. 13.
Composition for preventing and removing boiler-incrustations. L. F. Edwards. No. 153,651; Dec. 13.
Cotton goods in the piece, White and bleached. Hope Company. No. 152,708; Dec. 13.
Cotton piece goods. Boston Manufacturing Company, 1901. Nos. 153,915–17; Dec. 13.
Cotton piece goods. R. A. Suffern. No. 154,333; Dec. 13.
Cotton piece goods, Woven. Neuss, Hesslein & Co. No. 121,908; Dec. 13.
Cream, Face-. E. M. Bozardt. No. 152,531; Dec. 13.
Creams and powders, grease paints and make up, and substitutes therefor, Face. S. E. Brown. No. 150,304; Dec. 13.
Dentifrice in the form of a paste, wash, or powder. Sanosym Incorporated. No. 152,772; Dec. 13.
Deodorant, Powdered. Zeeta Company. No. 152,941; Dec. 13.
Dolls. A. M. Eshleman. No. 154,265; Dec. 13.
Dolls. H. R. Larsen. No. 154,802; Dec. 13.
Dyestuff intermediates. E. I. du Pont de Nemours & Company. No. 149,953; Dec. 13.
Electrical cables and coils, Insulating varnish and material for impregnating and filling. Sherwin-Williams Company. No. 137,051; Dec. 13.
Fabrics, Cotton. Seaboard Textile Co. No. 150,713; Dec. 13.
Fabrics used as foundation material for art-needlework. Bernhard Ulmann Co. No. 150,098; Dec. 13.
Feed for animals and poultry, Mineral. Shores-Mueller Company. No. 151,236; Dec. 13.
Feed, Stock and poultry. Scott County Milling Company. No. 150,294; Dec. 13.
Filters, water and beverage coolers. Allen Filter Company. No. 139,602; Dec. 13.
Fishing-lines, Waterproof braided silk. B. F. Gladding & Co. No. 154,445; Dec. 13.
Fishing-lines, Bait or fly-casting. B. F. Gladding & Co. No. 154,557; Dec. 13.
Fishing-lines, Silk, waterproofed and enameled silk. B. F. Gladding & Co. No. 154,667; Dec. 13.
Fishing-lines, Enameled silk fly-. B. F. Gladding & Co. No. 154,000; Dec. 13.
Flavoring extracts and essential oil for food purposes. Tisco Company. No. 150,491; Dec. 13.
Flooring, Magnesium oxychlorid. Special Service Flooring Corporation. No. 154,938; Dec. 13.
Flour, Wheat-. Barrett Denton & Lynn Co. No. 151,142; Dec. 13.
Flour, Wheat-. Bech Van Sicien & Co. No. 137,913; Dec. 13.
Fowls, Compound for treating cholera in. Y. H. Watts & Co. No. 152,821; Dec. 13.
Fruits, Fresh deciduous. Wenatchee District Co-Operative Association. Nos. 155,204–5; Dec. 13.
Fuse, Non-electrical safety-. Coast Manufacturing & Supply Company. No. 143,980; Dec. 13.
Fuses. Protex Fuse Works. No. 142,580; Dec. 13.
Game, Table. Typo Trading Corporation. No. 154,574; Dec. 13.
Ginghams, cotton piece goods. Ely & Walker Dry Goods Company. No. 153,970; Dec. 13.
Golf-balls. Corona Rubber Manufacturing Co. No. 154,124; Dec. 13.
Hair-growers, hair-pressing oils and perfumes. G. Chastang. No. 152,001; Dec. 13.
Hair-Nets. American Wholesale Corporation (Baltimore Bargain House.) No. 153,171; Dec. 13.
Hair-nets. A. V. Blatt. No. 154,116; Dec. 13.
Hair-nets. Guarantee Hair and Novelty Works. Nos. 153,975–6; Dec. 13.
Hair-nets. Lorraine Mfg. and Importing Company. No. 147,882; Dec. 13.
Hair-nets. National Trading Company. No. 154,062; Dec. 13.
Hair-nets. C. K. Thau. Nos. 154,243–4; Dec. 13.
Hair-nets. Waugh & Co. No. 154,012; Dec. 13.
Hair tonic and restorer. J. L. Hunt. No. 153,549; Dec. 13.
Hair-tonics. Atlanta Barbers' Supply Co. No. 142,195; Dec. 13.
Hair-tonics. O. Peterson. No. 154,284; Dec. 13.
Hair-waving appliances, Electrical. Permanent Wave Machine and Supply Corporation. No. 152,136; Dec. 13.
Hams, shoulders, bacon, lard, &c. John Morrell & Company. Nos. 147,360–1; Dec. 13.
Hog-cholera, Liquid compound for treating. Y. H. Watts & Co. No. 152,822; Dec. 13.
Hydrogen-peroxid solution. Merck and Co. No. 152,376; Dec. 13.
Insecticides. F. P. Symonds. No. 134,551; Dec. 13.
Journal, Farm. J. B. Stern. No. 157,714; Dec. 13.
Lamps and lamp fixtures, Electric. King Manufacturing Company. No. 133,581; Dec. 13.
Lamps (incandescent) and lamp-testers. Associated Lamp Company. No. 151,846; Dec. 13.
Leather, Calf-. Barnet Leather Co. No. 150,993; Dec. 13.
Liniment for neuralgia, rheumatism, &c. J. Laubsch. No. 147,299; Dec. 13.
Lotion. W. S. Charak. No. 152,202; Dec. 13.
Luggage-carriers and commercial luggage-standards. G. A. Roth Manufacturing Co. No. 147,898; Dec. 13.
Medicinal preparation for diabetes. A. C. Douropoulos. No. 152,364; Dec. 13.
Medicinal preparation for intestinal toxemia. International Consolidated Chemical Corporation. Nos. 152,892–3; Dec. 13.
Medicinal preparation for the relief of headache, &c. R. H. Hunstock & Co. No. 152,561; Dec. 13.
Metal preservatives. F. L. Gerke. No. 153,659; Dec. 13.
Mirrors, Rear-view. Wm. R. Johnston Mfg. Co. No. 151,544; Dec. 13.
Muslins, sheets, pillow-cases, Bleached. Cooper, Coate & Casey Dry Goods Co. No. 148,712; Dec. 13.
Oil, Lubricating-. Bengol Company. No. 143,532; Dec. 13.
Paint, Flat wall-. Dayton Color Works Company. No. 154,129; Dec. 13.
Paper-clips. G. B. Graff Company. No. 150,444; Dec. 13.
Paper towels, napkins, and tablecloths. J. Sofge. No. 150,976; Dec. 13.
Pearls. R. Harris & Co. No. 148,068; Dec. 13.
Pearls. Maybaum Bros., Inc. No. 153,096; Dec. 13.
Pearls, Artificial or imitation. Janovici & Co., Inc. No. 153,811; Dec. 13.

PUBLISHED FOR OPPOSITION.

[Act of Feb. 20, 1905, Sec. 6, as amended Mar. 2, 1907.]

Pencils and pocket-lighters, Combination pocket-. Art-Metal Works. No. 153,979; Dec. 13.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 20TH DAY OF DECEMBER, 1921.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Abbott, Harry T., Mays Landing, N. J., assignor to Draper Corporation, Hopedale Mass. Selvage-trimmer for looms. No. 1,400,711; Dec. 20.

Abbott, William H. (See Bliss, Talmadge, assignor.)

Abel, Morris. (See Polsoroff, Morris, assignor.)

Abernathy, Albert J., Seattle, Wash. Plate-puller. No. 1,400,758; Dec. 20.

Abram, Richard, Riverside, Ill. Air-regulating device for internal-combustion engines. No. 1,400,506; Dec. 20.

Adachi, Kaijiro. (See Nakayama, M. and Adachi.)

Adam, Matthew A. (See Legg, David A., assignor.)

Adams, Charles N., Downers Grove, assignor of one-half to J. Biworchinsky, Chicago, Ill. Lock for motor-driven vehicles. No. 1,400,507; Dec. 20.

Adler, Emanuel B. and J., Pittsburgh, Pa. Washing-machine. No. 1,401,026; Dec. 20.

Adler, Jerome. (See Adler, Emanuel B. and J.)

Adler, Louis M., New Orleans, La. Piano-bench. No. 1,401,027; Dec. 20.

Ahlers, Louis. (See Schmidt, J. H., and Ahlers.)

Ahlm, Charles E. F., and T. F. Ferry, Cleveland, Ohio. Heating apparatus for metalworking machines. No. 1,400,446; Dec. 20.

Aikman, Burton S., assignor to National Brake & Electric Company, Milwaukee, Wis. Protective device for fluid-pressure brakes. No. 1,400,651; Dec. 20.

Akemann, Walther, Essen, Germany, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Fire control apparatus particularly intended for naval guns. No. 1,401,025; Dec. 20.

Akin, Gaylord W. (See Sweby, K. A., and Akin.)

Alexanderson, Ernst F. W., Schenectady, N. Y., assignor to General Electric Company. System of radio communication. No. 1,400,547; Dec. 20.

American Arch Company. (See Willett, Alfred H., assignor.)

American Can Company. (See Thornburgh, Ivan D., assignor.)

American Electrical Heater Company. (See Kuhn, F., Hand, and Spiess, assignors.)

American Hard Rubber Co. (See Scheihammer, Herman, assignor.)

American Laundry Machinery Company, The. (See Warsaw, Charles E., assignor.)

American Piano Company. (See Edmands, Bradford C., assignor.)

American Steam Conveyor Corporation. (See Nolan, Clyde, assignor.)

American Telephone and Telegraph Company. (See Demarest, C. S., and Davidson, assignors.)

American Telephone and Telegraph Company. (See Smith, Temple C., assignor.)

American Telephone and Telegraph Company. (See Toomey, John P., assignor.)

Ammann-Haberstich, Ernst, Basel, Switzerland. Machine for drying strips. No. 1,400,508; Dec. 20.

Anderson, Anders O., Stoneham, Mass. Bunch-holding device for hose-supporters. No. 1,401,099; Dec. 20.

Anderson, James C., Rutherford, N. J., assignor to Variey Duplex Magnet Company. Circuit breaker and controller. No. 1,400,929; Dec. 20.

Anderson, Raymond T., assignor of one-half to W. W. Smith, Dodge City, Kans. Overtime chart. No. 1,400,865; Dec. 20.

Anderson, Thomas W., Camden Point, Mo., assignor to A. Schrader's Son, Incorporated, Brooklyn, N. Y. Pressure gage. No. 1,400,848; Dec. 20.

Anderson, William R. (See Goff, Douglas C., assignor.)

Anthony, Marcus O., New York, N. Y., and G. Lederman, Cleveland, Ohio, said Lederman assignor to said Anthony. Trunk-sully. No. 1,400,509; Dec. 20.

Archer, Charles B., assignor, by mesne assignments, to N. F. McGowin, Chapman, Ala. Soldering-iron. No. 1,400,784; Dec. 20.

Armantrout, Charles W., Grandview, Wash. Agricultural machine for direct attachment to tractors. No. 1,401,029; Dec. 20.

Arn, Fred, assignor to J. M. Card Lumber Co., Chattanooga, Tenn. Chock-block. No. 1,400,786; Dec. 20.

Arn, Fred, assignor to J. M. Card Lumber Co., Chattanooga, Tenn. Chock-block for automobiles. No. 1,400,785; Dec. 20.

Arrow Grip Manufacturing Co. (See Barker, Sydney P., assignor.)

Asekar, Antonio, Brooklyn, N. Y. Lock. No. 1,401,030; Dec. 20.

Asprooth, Axel H., assignor to Cotta Transmission Company, Rockford, Ill. Power-pulley mounting for transmission mechanism. No. 1,400,510; Dec. 20.

Associated Engineering and Supply Company. (See Down, Sidney G., assignor.)

Associated Engineering and Supply Company. (See Stewart, Carlton D., assignor.)

Astley, James F., Camden, N. J. Pipe-wrench. No. 1,400,930; Dec. 20.

Aumann, Frank, Manitowoc, Wis. Spare-tire carrier. No. 1,401,031; Dec. 20.

Austin, Frederick C. (See Bager, Frederic E., assignor.)

Automatic Sliding Trolley Company. (See Moore, Otto, assignor.) (Reissue.)

Autosales Corporation. (See Grover, Albert D., assignor.)

Backhaus, Arthur A., Baltimore, Md., assignor to U. S. Industrial Alcohol Co. Continuous process for the manufacture of esters. No. 1,400,849; Dec. 20.

Backhaus, Arthur A., Baltimore, Md., assignor to U. S. Industrial Alcohol Co. Apparatus for the manufacture of esters. No. 1,400,850; Dec. 20.

Backhaus, Arthur A., Baltimore, Md., assignor to U. S. Industrial Alcohol Co. Apparatus for the production of esters. No. 1,400,851; Dec. 20.

Backhaus, Arthur A., Baltimore, Md., assignor to U. S. Industrial Alcohol Co. Production of esters. No. 1,400,852; Dec. 20.

Baer, Carl J., St. Louis, Mo. Boat. No. 1,400,787; Dec. 20.

Bager, Frederic E., Kenosha, Wis., assignor to F. C. Austin, Chicago, Ill. Trenching-machine. No. 1,400,712; Dec. 20.

Baker, Frank E., and T. J. Biggs, Birmingham, England. Spring mounting for motorcycle front wheels. No. 1,401,032; Dec. 20.

Baker, Linnaeus E., assignor to Wayne Oil Tank and Pump Company, Fort Wayne, Ind. Deflector for fill-pipes. No. 1,400,511; Dec. 20.

Baker, Raymond D. (See Davis, E. H., and Baker.)

Baldwin Company, The. (See Tower, Herschel E., assignor.)

Barbour, Robert, Paterson, N. J. Forceps. No. 1,400,653; Dec. 20.

Barden, Merritt C., West Pawlet, Vt. Milking apparatus. No. 1,400,512; Dec. 20.

Barker, Sydney P., New York, assignor, by mesne assignments, to Arrow Grip Manufacturing Co., Inc., Glens Falls, N. Y. Roller-base lifting-jack. No. 1,400,931; Dec. 20.

Barley, William B., and J. C. Corbett, assignor to Fearless Dishwasher Company, Inc., Rochester, N. Y. Water-cooler. No. 1,400,713; Dec. 20.

Barnes, John A., West New Brighton, assignor to The Superheater Company, New York, N. Y. Superheater. No. 1,400,853; Dec. 20.

Barr, Arthur, San Rafael, Calif. Dental lip and tongue depressor. No. 1,400,854; Dec. 20.

Barrow, Frederick J. W., Chicago, Ill. Door-hinge. No. 1,400,788; Dec. 20.

Bartholomew, William, assignor to Troy Laundry Machinery Company, Ltd., Chicago, Ill. Extractor. No. 1,400,932; Dec. 20.

Bartlett, Henry B., assignor to B. F. Perkins & Son, Inc., Holyoke, Mass. Weighing-scale. No. 1,400,863; Dec. 20.

Baruday, George M. (See Bowles, Jerre M., assignor.)

Baush Machine Tool Company. (See Oakley, John, assignor.)

Bazzoni, Lewis J., Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Buttoning-machine. No. 1,400,714; Dec. 20.

Belcher, Mark, West Columbia, assignor to Hughes Tool Company, Houston, Tex. Breakout-Tongs. No. 1,400,715; Dec. 20.

Benjamin, John M., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Work-positioning device. No. 1,400,716; Dec. 20.

Benner, Raymond C., Fremont, Ohio, assignor to National Carbon Company, Inc. Electric Battery. No. 1,400,513; Dec. 20.

Benson, David, and G. K. Bruce, Des Moines, Iowa. Vehicated automobile-driver's seat. No. 1,400,717; Dec. 20.

Bentz, Hessie M., et al. (See Bents, John A., assignor.)

Bents, John A., assignor of one-half to W. S. Schell and one-half to B. M. Bents, Harrisburg, Pa. Traction ling. No. 1,400,514; Dec. 20.

Berger, Samuel M., Brooklyn, N. Y. Automobile-jack. No. 1,400,954; Dec. 20.

Bergquist, Gust, Portland, Oreg. Clothes-drier. No. 1,400,789; Dec. 20.

Berkeley Light Corporation. (See Wood, William G., assignor.)

Bertsch, Ernest, Brunswig, Belgium. Sign insurance by reflection. No. 1,400,672; Dec. 20.

Bigelow, Harry M., Milwaukee, Wis. Outc-board. No. 1,400,791; Dec. 20.

Bigelow, Harry M., Milwaukee, Wis. Sugar dissolving and washing container. No. 1,400,790; Dec. 20.

Bizzo, Theodore J. (See Bizzo, F. S., and Bizzo.)

Bizzo, Frank S., and Theodore J. Bizzo. Automobile-jack. No. 1,400,515; Dec. 20.

Bingay, Robert V., Pittsburgh, Pa., assignor to Pittsburgh Transformer Company. Transformer-cover construction. No. 1,400,515; Dec. 20.

Bishman, Alfred L., Syracuse, N. Y. Litter-collector. No. 1,400,526; Dec. 20.

Bitter, Henry, San Francisco, Calif. Convertible chair-bed. No. 1,400,719; Dec. 20.

Blanke, Hans H., near Copenhagen, Denmark. Regulating device for valves and cocks. No. 1,401,202; Dec. 27.

Blackmore, William A., Christchurch, New Zealand. Pulsator for milking-machines. No. 1,401,052; Dec. 20.

Blase, Talmage, Lackawanna, assignor of one-half to W. H. Abbott, Hamburg, N. Y. Mating pellet. No. 1,401,054; Dec. 20.

Blatchford Calf Meal Co. (See Ward, Jerome, assignor.)

Bliss, William L., assignor to U. S. Light & Heat Corporation, Niagara Falls, N. Y. System of electrical distribution. No. 1,400,840; Dec. 20.

Blondel, André E., Paris, France. Recording apparatus for radiotelegraphic signals. No. 1,400,917; Dec. 20.

Bloom, Charles F., Portland, Oreg. Centrifugal casting-machine. No. 1,400,527; Dec. 20.

Bloom, Leo, Brooklyn, N. Y. Combined gas nursey and heater. No. 1,400,719; Dec. 20.

Bloom, Oral A., Oneida, Kans. Power attachment for Ford cars. No. 1,400,720; Dec. 20.

Boedtcher, Franz A., Bergenfield, N. J. Door-opening device and lock for elevator-doors. No. 1,400,721; Dec. 20.

Bohnert, Otto H., Watertown, Wis. Mitten. No. 1,400,655; Dec. 20.

Bolam, Martin, Sandusky, Ohio. Incubator. No. 1,401,036; Dec. 20.

Bond, Charles, et al. (See Opt, Warren N., assignor.)

Boros, John, Milwaukee, Oreg., assignor to Perfection Tie Company, Portland, Oreg. Bucktle-holder. No. 1,400,858; Dec. 20.

Boston Piano Supply Company. (See Butler, James A., assignor.)

Bouché, William F., Lancaster, N. Y., assignor to Gould Coupler Company, Means for driving dynamos from car-axles. No. 1,400,783; Dec. 20.

Bourgois, Oliver J., Covington, Okla. Well-drilling bit. No. 1,400,794; Dec. 20.

Bovey, Thomas, Chicago, Ill. Automobile-hotter. No. 1,400,518; Dec. 20.

Bowen, David R., and C. F. Schauck, assignor to Farrell Foundry and Machine Company, Ansonia, Conn. Machine for treating rubber and similar material. No. 1,400,834; Dec. 20.

Bowles, Jerre McP., Atlanta, Ga., assignor of one-third to G. M. Baruday, Washington, D. C. Marine propulsion. No. 1,400,936; Dec. 20.

Boyden, George A., Roland Park, Md., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Load-brake device. No. 1,400,930; Dec. 20.

Bradley, Linn, East Orange, N. J. Apparatus for the electrical treatment of gases. No. 1,400,730; Dec. 20.

Bradley, Thomas, Trinidad, assignor of one-half to W. Childs, Starkville, Colo. Burial-case. No. 1,401,047; Dec. 20.

Brady, James H. (See Cosatt, Walter R., assignor.)

Breese, Alfred B., assignor to The Cincinnati Ball Crank Company, Cincinnati, Ohio. Ball-seat. No. 1,401,107; Dec. 20.

Brensinger, Julius, Fairfield, Conn., assignor to The Max Ams Machine Company, New York, N. Y. Can-beading machine. No. 1,400,796; Dec. 20.

Brint, Thomas, Langley Mill, England. Physical developer adapted for rowing exercise. No. 1,401,038; Dec. 20.

Brodie, Stuart B., Wilmerding, Pa. Combined oil and gas burner. No. 1,401,057; Dec. 20.

Bromley, John, & Sons. (See Grundy, James A., assignor.)

Brown, Edmund N., and Milton H. Shoenberg, assignors to Majestic Electric Development Company, San Francisco, Calif. Multiple repeater. No. 1,400,808; Dec. 20.

Brown, John B., Wynne, Ark. Conveyer-conduit. No. 1,400,698; Dec. 20.

Brown, Stanley, Garden City, assignor to The Griscom Russell Company, New York, N. Y. High-heat-level evaporator system. No. 1,400,925; Dec. 20.

Brown, Theophilus M., Seattle, Wash. Ventilator. No. 1,400,860; Dec. 20.

Bruce, George E. (See Benson, D., and Bruce.)

Bruce Electrical Engineering Company, Limited. (See Chilton, William, assignor.)

Buchenberg, Alvin E., assignor to Electric Auto-Lite Corporation, Toledo, Ohio. Dynamo-electric machine. No. 1,401,117; Dec. 20.

Buckels, Elmer L., Highwood, Ill. Ticket-holder. No. 1,400,518; Dec. 20.

Budd, Lester, Philadelphia, Pa. Grate. No. 1,401,727; Dec. 28.

Buffalo Dental Manufacturing Company. (See Lewis, Theodore G., assignor.)

Buhrmaster, George H., Minot, N. D. Game apparatus. No. 1,400,620; Dec. 20.

Burl, George R., Monessen, assignor to Pittsburgh Steel Company, Pittsburgh, Pa. Rod-holder. No. 1,400,686; Dec. 20.

Burl, George R., Monessen, assignor to Pittsburgh Steel Company, Pittsburgh, Pa. Bale-tie machine. No. 1,400,687; Dec. 20.

Burman, Elvah O., Grand Rapids, Mich. Paper-roll holder and cutter. No. 1,401,021; Dec. 20.

Burgess, Edward W., Chicago, Ill., assignor, by mesne assignments, to International Harvester Company. Drain connection. No. 1,400,887; Dec. 20.

Burgess, Leslie, New York, N. Y., assignor to Standard Oil Company. Treating residue resulting from the treatment of hydrocarbons with aluminum chloride. No. 1,401,113; Dec. 20.

Burgoyne, John L., San Francisco, Calif. Incubator. No. 1,400,567; Dec. 20.

Burnham, Frederick S., Wellesley, Mass. Apparatus for washing and sterilizing bottles. No. 1,400,757; Dec. 20.

Burnham, George A., Saugus, assignor to M. H. Condit, Jr., Brooklyn, Mass. Oil dress-pot. No. 1,400,885; Dec. 20.

Burritt, Chauncey D., Crediton, Mich. Reducing-machine. No. 1,401,004; Dec. 20.

Burton, Charles A., Oak Park, Ill. Vacuum fuel-feed device for internal-combustion engines. No. 1,400,727; Dec. 20.

Burton, Ward A., Pittsburgh, Pa. Card-holding clip for typewriters. No. 1,401,062; Dec. 29.

Burwell, Harold F. (See Holloway, J. E., and Burwell.)

Busch, Portland W., Berlin, N. D. Wild-oats separator. No. 1,401,039; Dec. 20.

Butler Bronze Maple Valley, Wis. Container-holder. No. 1,400,794; Dec. 20.

Butler, James A., Needham, assignor to Boston Piano Supply Company, Norwood, Mass. Wire twisting and bending machine. No. 1,400,724; Dec. 20.

Calthrop, Everard R., assignor to E. R. Calthrop's Aerial Patents Limited, London, England. Safety spring-sling particularly adapted for use with parachutes. No. 1,401,040; Dec. 29.

Calthrop's (E. R.) Aerial Patents Limited. (See Calthrop, Everard R., assignor.)

Campbell, Argyle, assignor to Enterprise Railway Equipment Company, Chicago, Ill. Ore-car. No. 1,400,876; Dec. 20.

Campbell, Argyle, assignor to Enterprise Railway Equipment Company, Chicago, Ill. Dumping-car. No. 1,400,877; Dec. 20.

Cannon, Bertram C., and W. N. Pierce, assignors to Pierce Arrow Corporation, Buffalo, N. Y. Fuse. No. 1,400,883; Dec. 20.

Cannon, Burrell, Longview, Tex. Cotton harvester. No. 1,400,622; Dec. 20.

Card, J. M., Lumber Co. (See Arn, Fred, assignor.)

Carlson, Axel. (See Swanson, P. and Carlson.)

Carty, Charles S. (See Carty, Sylvester L., assignor.)

Carty, Sylvester L., Youngsville, Me., assignor of one-half to C. R. Carty, Walnut Ridge, Ark. Seed-fastener. No. 1,400,809; Dec. 20.

Charters, Ernest D., assignor to Charters Manufacturing Co., Santa Cruz, Calif. Incubator. (Reissue.) No. 15,247; Dec. 28.

Charters Manufacturing Co. (See Charters, Ernest D., assignor; Hardman.)

Childs, William. (See Bradley, Thomas, assignor.)

Chilton, William, assignor of one-half to The Bruce Electrical Engineering Company, Limited, Loughborough, England. Turbine. No. 1,400,795; Dec. 20.

Chipperfield, Walter, Romford, England. Construction of metal cases for containing drawers, shelves, or the like. No. 1,401,041; Dec. 20.

Christens, Horace, Edgewood Park, assignor to Pittsburgh Meter Company, East Pittsburgh, Pa. Fluid-meter. No. 1,400,543; Dec. 20.

Christensen, Claus P., assignor of one-half to H. P. Vognsen, Petaluma, Calif. Electric driving pump-jack. No. 1,401,042; Dec. 20.

Christensen Machine Co. (See Christensen, Martin, assignor.)

Christensen, Martin, assignor to Christensen Machine Co., Racine, Wis. Signature-feeding mechanism for book-stitching machines. No. 1,400,725; Dec. 20.

Christern, Grevet, assignor to Eureka Spark Plug Corporation, New York, N. Y. Spark-plug. No. 1,400,524; Dec. 20.

Christern, Grover, New York, N. Y. Spark-plug. No. 1,400,525; Dec. 20.

Christian, Herbert W., Detroit, Mich. Electric water-heater. No. 1,400,526; Dec. 20.

Church, Harold G., assignor to Packard Motor Car Company, Detroit, Mich. Motor-vehicle. No. 1,401,043; Dec. 20.

Cincinnati Ball Crank Company, The. (See Breese, Alfred B., assignor.)

Cincinnati Ball Crank Company, The. (See Kaye, Richard A., assignor.)

Cinephone Instruments, Limited. (See Hillman, Albert G., assignor.)

Cinema Patents Company. (See Leitel, Albert, assignor.)

Clark, Francisco, Durango City, Mexico. Combination-lock. No. 1,401,044; Dec. 20.

Clarke, Clem S., Shreveport, La. Casing-head. No. 1,400,946; Dec. 20.

Clement, Alvah W., East Cleveland, assignor to The Cleveland Brass Manufacturing Company, Cleveland, Ohio. Alloy. No. 1,400,527; Dec. 20.

Clendaniel, William L., Philadelphia, Pa., assignor of one-half to B. Kelly-Walker, Wildwood, N. J. Tire. No. 1,401,045; Dec. 20.

Cleveland Brass Manufacturing Company, The. (See Clement, Alvah W., assignor.)

Clymer, Albert A., Gowrie, Iowa. Tool for handling tiles. No. 1,401,046; Dec. 20.

Coady, Matthew D., Auburn, assignor to J. N. Henry, Providence, R. I. Curtain-rod bracket. No. 1,400,726; Dec. 20.

Coast, John W., Jr., assignor to The Process Company, Tulsa, Okla. Cracking hydrocarbons. No. 1,400,800; Dec. 20.

Codd, Ambrose W., Spokane, Wash. Detachable reserve-supply tank. No. 1,400,727; Dec. 20.

Cohen, Benjamin P., Augusta, Ga. Pneumatic and hydraulic clamp. No. 1,400,801; Dec. 20.

Cole, Robert C., assignor to The Johns-Pratt Company, Hartford, Conn. Renewable fuse. No. 1,400,660; Dec. 20.

Cole, Robert C., assignor to The Johns-Pratt Company, Hartford, Conn. Inclosed fuse. No. 1,400,661; Dec. 20.

Colgate, William A., Garden City, N. Y. Truck-supported knockdown circle swing. No. 1,400,802; Dec. 20.

Collins, Charles H., West Albany, assignor to S. Sanford & Sons, Inc., Amsterdam, N. Y. Loom for weaving axminster carpets and rugs. No. 1,400,941; Dec. 20.

Collver, William A., Marshfield, Oreg. Steam-escape valve for range-boilers, &c. No. 1,401,048; Dec. 20.

Condit, Sears B., Jr. (See Burnham, George A., assignor.)

Cone Rag Company, The. (See Goodell, William, assignor.)

Conklin, Oliver F., Detroit, Mich., assignor to Remy Electric Company, Anderson, Ind. Regulating device for dynamo-electric machines. No. 1,401,049; Dec. 20.

Conlan, David, Jr., Brooklyn, N. Y. Electrical apparatus. No. 1,400,803; Dec. 20.

Cook, John P., London, Ontario, Canada. Cap. No. 1,400,528; Dec. 20.

Cooper, Harry E. (See Faudree, H., and Cooper.)

Copeland, Percival W., assignor to The Hind & Harrison Plush Co., Clark Mills, N. Y. Pile-fabric frames. No. 1,400,529; Dec. 20.

Corbett, James C. (See Barley, W. B., and Corbett.)

Cotta Transmission Company. (See Asproth, Axel Hj., assignor.)

Cox, Claude E., Detroit, Mich. Oil-cup. No. 1,400,804; Dec. 20.

Cosatt, Walter R., assignor of one-half to J. H. Brady, San Francisco, Calif. Space liner for matrices. No. 1,400,728; Dec. 20.

Craig, Louis E., Davenport, Iowa. Fastening device. No. 1,400,662; Dec. 20.

Crane, Thomas W., Imperial, Calif. Automatic fuel control. No. 1,400,868; Dec. 20.

Crawford, Charles F., Liberty, N. Y. Vehicle-brake. No. 1,400,869; Dec. 20.

Crawford, Ralph F., Salina, Kans. Cooling system for automobile-engines. No. 1,400,805; Dec. 20.

Crewsling, John L., White Plains, N. Y., assignor to Gould Coupler Company. Electric regulation. No. 1,400,729; Dec. 20.

Croney, Jan, Los Angeles, Calif. Tie-holder. No. 1,400,663; Dec. 20.

Crosinger, Lorenzo D., Dayton, Ohio. Automatic cut-out. No. 1,400,870; Dec. 20.

Crotty, Andrew J., Knocklong, Ireland. Oil-cap for vehicle-wheels. No. 1,400,871; Dec. 20.

Crouch, Marion L., assignor to The Procter & Gamble Company, Cincinnati, Ohio. Forming cakes of soap. No. 1,401,050; Dec. 20.

Curtis, Lula P., Los Angeles, Calif. Adjustable copy-holder. No. 1,400,730; Dec. 20.

Cyclemotor Corporation. (See Merkel, Joseph F., assignor.)

Dalton Adding Machine Company, The. (See Landsiedel, Harry, assignor.)

Dalton, Thomas, Chicago, Ill. Mop-holder. No. 1,401,051; Dec. 20.

Dana Cotton Harvester Company. (See Gabriel, G. A., and Skillins, assignors.)

Daniels, Dan, assignor to L. H. Harriman, trustee, Haverhill, Mass. Shoe-upper and finishing the edges thereof. No. 1,400,806; Dec. 20.

Danks, Alfred C., Pittsburgh, Pa. Dust-catcher valve and valve-operating mechanism. No. 1,401,052; Dec. 20.

Davidson, John, Jr. (See Demarest, C. S., and Davidson.)

Davis, Enell H., and R. D. Baker, Chicago, Ill. Lathe-center. No. 1,400,731; Dec. 20.

Dawson, Arthur T., Westminster, London, and J. Horne, Barrow-in-Furness, England, assignors to Vickers Limited, Westminster, London, England. Shell-bogies for use with ammunition-hoisting apparatus for ordnance. No. 1,401,114; Dec. 20.

Dawson, Charles, Tacoma, Wash. Grain-washing machines. No. 1,400,664; Dec. 20.

Dayton Engineering Laboratories Company, The. (See Haas, Nelson R., assignor.)

Dean, Marion E., Taunton, Mass. Tatting-shuttle. No. 1,401,053; Dec. 20.

De Haven, William I., Wichita, assignor to J. W. Moyle, Augusta, Kans. Toy. No. 1,400,942; Dec. 20.

Delacourt, Alberto F., assignor to Società Anonima Italiana Gio. Ansaldo & C., Genoa, Italy. Heating-furnace with removable hearth. No. 1,401,054; Dec. 20.

Demarest, Charles S., Brooklyn, N. Y., and John Davidson, Jr., Montclair, N. J., assignors to American Telephone and Telegraph Company, Signaling system. No. 1,400,732; Dec. 20.

Denver Rock Drill Manufacturing Company, The. (See Smith, William A., assignor.)

Dericco, Oscar A., San Francisco, Calif. Automobile windshield wiper. No. 1,400,665; Dec. 20.

De Voe, Albert H., Westfield, N. J., assignor to The Singer Manufacturing Company. Strip-folder for sewing-machines. No. 1,400,530; Dec. 20.

Dingle, William G., Los Angeles, Calif., assignor to Owl Fumigating Corporation, New York, N. Y. Fumigating and spraying apparatus. (Reissue.) No. 15,248; Dec. 20.

Dodds, Ethan I., Central Valley, N. Y., assignor to Flannery Bolt Company, Pittsburgh, Pa. Staybolt structure. No. 1,400,531; Dec. 20.

Dodds, Ethan I. (See Flannery, J. R., and Dodds.)

Dondo, Mathurin M., New York, N. Y. Marionette. No. 1,400,532; Dec. 20.

Dorsey, Isbum B., Eminence, Ky. Washtub-protector. No. 1,400,733; Dec. 20.

Dosenbach, Benjamin H., deceased, Butte, Mont., and W. A. Scott, Chicago, Ill., said Scott assignor to Minerals Separation North American Corporation; E. M. Dosenbach, distributee by order of court in the estate. Concentrating ore. No. 1,401,055; Dec. 20.

Dosenbach, Edna M., distributee by order of court. (See Dosenbach, B. H., and Scott.)

Douglas, Raymond I., Attleboro, Mass. Buckle. No. 1,400,666; Dec. 20.

Dow Chemical Company, The. (See Harlow, Ivan F., assignor.)

Down, Sidney G., Berkeley, assignor to Associated Engineering and Supply Company, San Francisco, Calif. Liquid-fuel control system. No. 1,400,667; Dec. 20.

Doyle, Louis S., Austin, Tex. Orthopedic appliance. No. 1,401,056; Dec. 20.

Draper Corporation. (See Abbott, Harry T., assignor.)

Draper Corporation. (See Rhoades, Alonzo E., assignor.)

Draver, Emil R., Richmond, Ind. Feeding device. No. 1,400,668; Dec. 20.

Drefs, Edward, Milwaukie, Oreg. Folding bed. No. 1,400,734; Dec. 20.

Drufva, John T., Longmeadow, Mass., assignor to Henry Hyman & Co. Inc., New York, N. Y. Portable electric light. (Reissue.) No. 15,249; Dec. 20.

Dudley, Samuel W., Edgewood, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Fluid-pressure brake device. No. 1,400,670; Dec. 20.

Dudley, Samuel W., Edgewood, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Safety car-control device. No. 1,400,669; Dec. 20.

Dundore, William H., Reading, Pa. Vehicle-wheel. No. 1,400,807; Dec. 20.

Dynon, Alfred H., Chicago, Ill., assignor, by mesne assignments, to Kellogg Switchboard & Supply Company. Selective telephone system. No. 1,400,500; Dec. 20.

Eddy, Lawrence R., Elizabeth, N. J. Aeroplane-kite. No. 1,400,735; Dec. 20.

Edmunds, Bradford C., Newton, Mass., assignor to American Piano Company, New York, N. Y. Grand-piano construction. No. 1,401,115; Dec. 20.

Egan, George F. (See Stern, C., and Egan.)

Eggers, John H., Company. (See Steele, Herbert H., assignor.)

Ehret, Cornelius D., Philadelphia, Pa. Electrical wave transmission. No. 1,400,591; Dec. 20.

Ehrhart, Raymond N., assignor to Elliott Company, Pittsburgh, Pa. System for removing air and gases from water. No. 1,401,100; Dec. 20.

Ehrhart, Raymond N., assignor to Elliott Company, Pittsburgh, Pa. System for removing air and gases from water. No. 1,401,101; Dec. 20.

Ehrhart, Raymond N., assignor to Elliott Company, Pittsburgh, Pa. System for removing air and gases from water. No. 1,401,116; Dec. 20.

Electric Auto-Lite Corporation. (See Buchenberg, Alvin E., assignor.)

Elliott Company. (See Ehrhart, Raymond N., assignor.)

Elliott, Horace W., assignor of one-half to W. A. Gray, Greenfield, Ohio. Display-rack. No. 1,401,057; Dec. 20.

Elmendorf, Armin, Madison, Wis., assignor to Hasselite Manufacturing Corporation. Gluing-machine. No. 1,400,943; Dec. 20.

Engel, Oscar F., Hartford, Conn. Sprinkler. No. 1,400,533; Dec. 20.

Enterprise Railway Equipment Company. (See Campbell Argyle, assignor.)

Erickson, Albert, Chicago, Ill., assignor to Splitdorf Electrical Company, Newark, N. J. Ignition apparatus. No. 1,401,058; Dec. 20.

Ernest, Albert, Paxton, Ill. Folding bed. No. 1,400,534; Dec. 20.

Eureka Spark Plug Corporation. (See Christern, Grover, assignor.)

Evans, Harrison E., Somerville, Mass., assignor to Manning, Maxwell & Moore, Inc., New York, N. Y. Fluid-controlling valve. No. 1,400,944; Dec. 20.

Fallon, Leslie F. (See Phillips, John G., assignor.)

Farmer, Clyde C., Edgewood, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Staybolt structure. No. 1,400,534; Dec. 20.

Farmer, Clyde C., Edgewood, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Safety car-control device. No. 1,400,535; Dec. 20.

Farmer, Clyde C., Edgewood, assignor to Westinghouse Air Brake Company, Wilmerding, Pa. Fluid-pressure brake. No. 1,400,594; Dec. 20.

Farmer, Clyde C., Edgewood, assignor to Wetninghouse Air Brake Company, Wilmerding, Pa. Load brake equipment. No. 1,400,595; Dec. 20.

Farmer, Clyde C., Edgewood, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Safety car-control device. No. 1,400,596; Dec. 20.

Farmer, Clyde C., Edgewood, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Fluid-pressure brake. No. 1,400,597; Dec. 20.

Farrell Foundry and Machine Company. (See Bowen, D. E., and Schnuck, assignors.)

Faudree, Henry, and Harry E. Cooper, Columbus, Ind. Shock-absorber. No. 1,401,009; Dec. 20.

Fay, Harold, J. W. (See Wood, E. C., and Fay.)

Fearless Dishwasher Company Inc. (See Barley, W. B., and Corbett, assignors.)

Fedders, John M., assignor to Fedders Manufacturing Company, Inc., Buffalo, N. Y. Radiator unit. No. 1,400,945; Dec. 20.

Fedders Manufacturing Company. (See Fedders, John M., assignor.)

Fedorko, Basyl, Ansonia, Conn. Envelop opener. No. 1,400,946; Dec. 20.

Fennell, Eleanor, New York, N. Y. Indicator for musical instruction. No. 1,400,947; Dec. 20.

Ferguson, Reuben L., Hondale, N. Mex. Liquid seal for pumps. No. 1,401,060; Dec. 20.

Ferry, Thomas F. (See Ahlm, C. E. F., and Ferry.)

Fischer, John G., Waterloo, Ill., assignor to A. B. Remick, St. Louis, Mo. Pulley. No. 1,400,671; Dec. 20.

Fisher, Alva J., assignor to Hartley Machine Company, Chicago, Ill. Ironing-machine. No. 1,400,806; Dec. 20.

Firestone Steel Products Company, The. (See Swain, Joseph G., assignor.)

Fitz Simmons, Edward S. (See Flannery, J. R., and Fitz Simmons.)

Flannery Bolt Company. (See Dodds, Ethan I., assignor.)

Flannery Bolt Company. (See Flannery, J. R., and Fitz Simmons, assignors.)

Flannery Bolt Company. (See Flannery, J. R., and Dodds, assignors.)

Flannery, John R., Pittsburgh, Pa., and E. I. Dodds, Central Valley, N. Y., assignor to Flannery Bolt Company, Pittsburgh, Pa. Staybolt structure. No. 1,400,535; Dec. 20.

Flannery, John R., Pittsburgh, Pa., and E. I. Dodds, Central Valley, N. Y., assignor to Flannery Bolt Company, Pittsburgh, Pa. Staybolt structure. No. 1,400,536; Dec. 20.

Flannery, John R., and E. S. Fitz Simmons, assignor to Flannery Bolt Company, Pittsburgh, Pa. Staybolt structure. No. 1,400,735; Dec. 20.

Fleming, Edward R., Baltimore, Md. Envelop-opener. No. 1,400,800; Dec. 20.

Florence, Frank J., Pensacola, Fla. Store. No. 1,400,948; Dec. 20.

Flynn, Samuel J., Portsmouth, Va. Armored tire. No. 1,401,061; Dec. 20.

Focke, Georg G., Dresden-Blasewitz, Germany. Machine for making artificial leaves. No. 1,401,062; Dec. 20.

Fockler, Blair S. (See Riley, J., and Fockler.)

Foppoby, Frank W., Lawa, Calif. Superheater. No. 1,401,063; Dec. 20.

Ford Motor Company. (See Galamb, J., and Oswald, assignors.)

Forthman, Benjamin, Maplewood, Mo. Radiator-cover. No. 1,401,064; Dec. 20.

Fowler, Charles, Boston, Mass. Stocking-stretcher. No. 1,401,065; Dec. 20.

Fowler, Gates W., Los Angeles, Calif. Apparatus for producing noxious gases and method of asphyxiating obnoxious animals. No. 1,400,593; Dec. 20.

Franch, Val F., assignor of one-half to E. H. Hinkebein, Louisville, Ky. Railway-tie. No. 1,400,737; Dec. 20.

Frank, Harry S., St. Louis, Mo. Piston-ring. No. 1,400,672; Dec. 20.

Frey, William P., Buffalo, N. Y. Driving-axle construction. No. 1,400,949; Dec. 20.

Fried. Krupp Aktiengesellschaft. (See Akemann, Walther, assignor.)

Fried. Krupp Aktiengesellschaft. (See Haarmann, Friedrich, assignor.)

Fried. Krupp Aktiengesellschaft. (See Schleth, Frederich; assignor.)

Fried. Krupp Aktiengesellschaft. (See Sandhausen, Hermann, assignor.)

Fried. Krupp Aktiengesellschaft. (See Vollmer, John, assignor.)

Fries, Howard J., Tacoma, Wash. Double-exposure and blank-film preventing device for cameras. No. 1,400,872; Dec. 20.

Fritzsche, Samuel. (See Haverly, D. H., and Fritzsche.)

G. & W. Electric Specialty Co. (See Williams, Paul F., assignor.)

Gabriel, George A., and J. T. Phillips, assignors to Twin Cotton Harvester Company, Westbrook, Me. Reflector-mounting. No. 1,400,699; Dec. 20.

Gaillard, Andre Marcelin, France. Device for controlling the speed of automobile-vehicles. No. 1,400,810; Dec. 20.

Galamb, Joseph, and E. P. Oswald, assignor to Ford Motor Company, Detroit, Mich. Damper. No. 1,400,811; Dec. 20.

Gallagher, George D., New Haven, Conn., assignor of twenty-five one-hundred-and-fourths to E. T. Hess, twenty-five one-hundred-and-fourths to E. P. Walton, four one-hundred-and-fourths to M. G. Schaesberger, and twenty-five one-hundred-and-fourths to M. E. Moar, Baltimore, Md., and twenty-five one-hundred-and-fourths to C. F. Moore, Washington, D. C. Blade-sharpening device. (Reissue.) No. 15,250; Dec. 20.

Galloway, George, Cleveland, Ohio. Arch-support. No. 1,401,066; Dec. 20.

Garvey, Charles J., Port Henry, N. Y. Chain-fastening device. No. 1,401,067; Dec. 20.

Gatewell, George S., Roselle Park, N. J., assignor to The Singer Manufacturing Company, Presser-foot for sewing-machines. No. 1,400,537; Dec. 20.

Gates, Charles C., Denver, Colo. Belt-making process. No. 1,400,538; Dec. 20.

Gates, Charles C., Denver, Colo. Endless belt. No. 1,400,539; Dec. 20.

Gates, James C. (See Wreaford, Leslie W., assignor.)

Gazo, John, Detroit, Mich. Railway construction. No. 1,401,068; Dec. 20.

Gehr, Ray S., Cleveland, Ohio. Planter. No. 1,400,738; Dec. 20.

Gehr, Ray S., Cleveland, Ohio. Planter. No. 1,400,739; Dec. 20.

Gehr, Ray S., Cleveland, Ohio. Planter. No. 1,400,740; Dec. 20.

General Electric Company. (See Alexanderson, E. F. W., assignor.)

General Electric Company. (See Halvorson, Cromwell A. B., assignor.)

General Electric Company. (See Knoderer, Homer G., assignor.)

Gerrard, Alec J. (See Wright, Parvin, assignor.)

Getgey, John J., Tulsa, Okla. Device for hanging and pressing trousers. No. 1,400,741; Dec. 20.

Gibson, Myron C., Los Angeles, Calif. Hacksaw. No. 1,400,878; Dec. 20.

Gilliland, Herbert L., Harrington, Wash. Weeding-implement. No. 1,400,673; Dec. 20.

Gloor, Albert, assignor to Sasgen Derrick Co., Chicago, Ill. Touring-derrick. No. 1,400,540; Dec. 20.

Glowacki, John B., Chicago, Ill. Adjustable hand-grip for crutches. No. 1,400,600; Dec. 20.

Gneiss, Gust H., and C. J. Peterson, Chicago, Ill. Panel. No. 1,400,950; Dec. 20.

Goetz, Oscar H., assignor to Stewart-Warner Speedometer Corporation, Chicago, Ill. Bumper. No. 1,400,674; Dec. 20.

Goff, Douglas C., assignor of one-half to W. R. Anderson, Lynchburg, Va. Seat. No. 1,400,875; Dec. 20.

Goldsmith, Joseph, jr., Chicago, Ill. Hair-curling device. No. 1,400,812; Dec. 20.

Goldsmith, Louis. (See Kops W., and Goldsmith.)

Goodchild, William, Millinocket, assignor, by mesne assignments, to The Cone Bag Company, Madison, Me. Partition forming and attaching machine. No. 1,400,876; Dec. 20.

Goodfellow, John H., Buffalo, N. Y. Boiler-flue scraper. No. 1,400,951; Dec. 20.

Goodwin, Thomas F., Yelm, Wash. Direction-indicator for vehicles. No. 1,400,801; Dec. 20.

Gould Coupler Company. (See Bouché, William F., assignor.)

Gould Coupler Company. (See Crevoling, John L., assignor.)

Graemiger, Benjamin, Zurich, Switzerland. Compressing vapor in multistage centrifugal compressors. No. 1,400,813; Dec. 20.

Graham, Edward A., Brockley, London, England. Gramophone and like machine. No. 1,401,069; Dec. 20.

Gray, Walter A. (See Elliott, Horace W., assignor.)

Gregory, Theodore G., Providence, R. I. Hair-bobbing device. No. 1,401,070; Dec. 20.

Griffiths, Harry A., Birmingham, and R. H. Sutton Coldfield, England. Power-press for operating on metal sheets or strips. No. 1,401,108; Dec. 20.

Griffiths, Richard H. (See Griffiths, Harry A. and R. H.)

Griscom, Russell Company, The. (See Brown, Stanley, assignor.)

Grunsfeld, John B., Wilkinsburg, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Electropneumatic brakes. No. 1,400,952; Dec. 20.

Grover, Albert D., New York, N. Y., assignor, by mesne assignments, to Autocycles Corporation. Vending-machine. No. 1,400,814; Dec. 20.

Groves, Mile. (See Rogers, R., and Groves.)

Gruenstrup, Bernard F., Clinton, Iowa. Vending-machine. No. 1,400,742; Dec. 20.

Grundy, James A., assignor to John Bromley & Sons, Incorporated, Philadelphia, Pa. Dyeing yarns and the like. No. 1,400,675; Dec. 20.

Gully, Perry G., Rosalia, Wash. Bushing-remover. No. 1,400,676; Dec. 20.

Haarmann, Friedrich, Essen, Germany, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Device for closing the tap-holes in smelting furnaces. No. 1,401,072; Dec. 20.

Haas, Nelson E., assignor to The Dayton Engineering Laboratories Company, Dayton, Ohio. Circuit-controller. No. 1,401,071; Dec. 20.

Hathaway, John B., Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Lasting-machine. No. 1,400,816; Dec. 20.

Hadley, Idale L., Hartford, Conn. Bed. No. 1,400,952; Dec. 20.

Hafer, Adam P. (See Schlichamer, Elmer E., assignor.)

Hagan Corporation, The. (See Hopwood, John M., assignor.)

Hagen, Bernhard E., assignor of one-half to W. E. Smith, Minneapolis, Minn. Hot-air heater for automobiles. No. 1,400,815; Dec. 20.

Hall, Benjamin W., Manchester, N. H. Swivel connection. No. 1,401,073; Dec. 20.

Halvorson, Cromwell A. B., jr., Lynn, Mass., assignor to General Electrical Company. Lighting unit. No. 1,400,817; Dec. 20.

Hand, Jay A. (See Kuhn, F., Hand, and Spiess.)

Hansen, Charles C., New York, N. Y., assignor to Thermal Appliance Company, Inc., Elizabethport, N. J. Water-heater. No. 1,400,541; Dec. 20.

Hansen, Hans, Kansas City, Mo. Driving mechanism for washing machines. No. 1,400,743; Dec. 20.

Hansen, Hans, Kansas City, Mo. Gear-transmission for washing-machines and wringers. No. 1,400,744; Dec. 20.

Harlow, Ivan F., assignor to The Dow Chemical Company, Midland, Mich. Making potassium carbonate. No. 1,400,542; Dec. 20.

Harriman, Louis H., trustee. (See Daniels, Dan, assignor.)

Harrington, Clinton O., Edgewood borough, assignor to The Union Switch & Signal Company, Swissvale, Pa. Electrical relay. No. 1,400,608; Dec. 20.

Harris, B., and W. Van Buren, Helena, Ark. Horseshoe. No. 1,401,074; Dec. 20.

Harris, Rex., San Diego, Calif. Aeroplane-engine-starting apparatus. No. 1,400,745; Dec. 20.

Harris, William W., New York, N. Y. Refuse-vehicle. No. 1,400,543; Dec. 20.

Hart, Harry S., Chicago, Ill. Dump-car-door-operating mechanism. No. 1,400,544; Dec. 20.

Hart, William J. (See Mason, C. T., and Hart.)

Hartwig, George, St. Louis, Mo. Piston-rod connection. No. 1,401,075; Dec. 20.

Haskelite Manufacturing Corporation. (See Elmendorf, Armin, assignor.)

Hayes, Edgar P., Dillon, S. C. Cotton-picking machine. No. 1,401,076; Dec. 20.

Heitzman, Fredrick J., Detroit, Mich., assignor to The Iaka Company, Chicago, Ill. Compressor. No. 1,400,102; Dec. 20.

Hellman, William F., Hartford, Conn., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting-machine. No. 1,401,108; Dec. 20.

Hemco Electric Manufacturing Company. (See Ile, William, assignor.) (Reissue.)

Hendrix, John J., Brunswick, Ga. Water-wheel. No. 1,401,077; Dec. 20.

Heinecke, Carl R., Buffalo, N. Y. Hood-fastener. No. 1,400,953; Dec. 20.

Henry Hyman & Co. (See Drufva, John T., assignor.) (Reissue.)

Henry, James N. (See Coady, Matthew D., assignor.)

Herbert, Elmer H., Oakland, Calif. Theatrical automobile-race. No. 1,400,818; Dec. 20.

Hibler, Phillip. (See Jurkovich, Conrad, assignor.)

Hickey, James, Portland, Oreg. Hemstitching attachment for sewing-machines. No. 1,401,100; Dec. 20.

Higgins, Joseph W., Bordentown, N. J. Portable electric lamp. No. 1,400,819; Dec. 20.

Higgs, Percy J., New York, N. Y. Headlight. No. 1,400,820; Dec. 20.

Hillman, Albert G., assignor to Cinechrome Instruments, Limited, London, England. Intermittent feed mechanism. No. 1,400,877; Dec. 20.

Hillyard, Newton S., St. Joseph, Mo. Toilet-paper and paper-towel dispenser. No. 1,400,677; Dec. 20.

Hind & Harrison Plush Co., The. (See Copeland, Percival W., assignor.)

Hinkebein, E. H. (See Franck, Val F., assignor.)

Hinz, Herman J., San Francisco, Calif. Sand-dispensing device for motor-vehicles. No. 1,401,078; Dec. 20.

Hleb, Peter, Elizabeth, N. J., assignor to Singer Manufacturing Company. Nut-lock. No. 1,400,545; Dec. 20.

Hoagg, Walter, Detroit, Mich. Beet-topper. No. 1,401,079; Dec. 20.

Hobelmann, Herman A., Baltimore, Md. Window attachment. No. 1,401,080; Dec. 20.

Hoe, R., and Co. (See Wood, William M., assignor.)

Holbrook, Holfe R., assignor to W. A. Lurie, New Orleans, La. Key-cutting machine. No. 1,400,678; Dec. 20.

Holloway, John E., and H. E. Burwell, Milford, Conn. Combined brush and supply-holder. No. 1,400,954; Dec. 20.

Holme, Edward D., St. Joseph, Mo. Osteopathic-treatment table. No. 1,400,546; Dec. 20.

Holmstrom, Carl G., Washington, D. C. Apparatus for massage and therapeutic gymnastic treatments. No. 1,400,547; Dec. 20.

Hoogendijk, Frederik V., Bedkeley, Calif. Internal-combustion-engine construction. No. 1,400,746; Dec. 20.

Hoos, Nannie T., et al. (See Gallagher, George D., assignor.) (Reissue.)

Hoover Suction Sweeper Company, The. (See Staples, Albert F., assignor.)

Hopwood, John M., Dormont, Pa. Stoking mechanism. No. 1,400,548; Dec. 20.

Hopwood, John M., Dormont, Pa. Combustion-regulating means. No. 1,400,549; Dec. 20.

Hopwood, John M., Pittsburgh, Pa. Method and means for controlling and regulating. No. 1,400,550; Dec. 20.

Hopwood, John M., Dormont, assignor to The Hagan Corporation, Pittsburgh, Pa. Storage-tank. No. 1,400,747; Dec. 20.

Hornbeck, Henry S., Union Hill, N. J. Oscillating valve for pneumatic motors. No. 1,400,551; Dec. 20.

Horne, James. (See Dawson, A. T., and Horne.)

Howard, Herbert H., and G. Furmidge, Chicago, Ill., assignors to Steel Wings Company. Spring mechanism for front axles for automobiles. No. 1,400,604; Dec. 20.

Howard, Sidney C., Columbus, Ohio. Oil control and oil-feeder. No. 1,401,081; Dec. 20.

Howe, Frank D., Akron, Ohio, assignor, by mesne assignments, to International Harvester Company. Cooling device. No. 1,400,878; Dec. 20.

Howland, Arthur, West Newton, Mass. Compounding colors and apparatus for same. No. 1,400,552; Dec. 20.

Howland-Shearman, Charles H., Indianapolis, Ind. Jack. No. 1,400,605; Dec. 20.

Howland-Shearman, Charles H., Indianapolis, Ind. Mechanical puller. No. 1,400,606; Dec. 20.

Hughes Tool Company. (See Belcher, Mark, assignor.)

Hurley Machine Company. (See Fisher, Alva J., assignor.)

Hurtt, Christopher S., Portland, Oreg. Trolling device. No. 1,400,821; Dec. 20.

Ile, William, Lynbrook, assignor to Hermes Electric Manufacturing Company, New York, N. Y. Electric plug-receptacle. (Reissue.) No. 15,251; Dec. 20.

International Harvester Company. (See Burgess, Edward W., assignor.)

International Harvester Company. (See Howe, Frank D., assignor.)

International Harvester Company. (See Rand, Charles A. A., assignor.)

International Motor Company. (See Leipert, August H., assignor.)

International Motor Company. (See Masury, Alfred F., assignor.)

International Nitrogen Company. (See Reid, James H., assignor.)

Iaka Company, The. (See Heideman, Fredrick J., assignor.)

Jacob, Julius, Columbia, S. C. Cradle. No. 1,400,748; Dec. 20.

Jenks, Charles R., and R. O. Young, Cleveland, Ohio. Mixing device. No. 1,400,553; Dec. 20.

Jensen, George C., Oakland, Calif. Rotatable lock and interlock. No. 1,400,679; Dec. 20.

Jessen, James, Minneapolis, Minn. Internal-combustion engine. No. 1,400,955; Dec. 20.

Jeski, Otto H., assignor to The Standard Parts Company, Cleveland, Ohio. Rim. No. 1,400,956; Dec. 20.

Johnson, Frederick G. L., assignor to Vickers Limited, Westminster, England. Vent-sealing percussion-primer. No. 1,400,554; Dec. 20.

Johnson, William F., Baltimore, Md. Self-locking retaining-nut. No. 1,400,879; Dec. 20.

Johns-Pratt Company, The. (See Cole, Robert C., assignor.)

Johnston, Francis M., Hoffman, Okla. Trolley apparatus. No. 1,401,082; Dec. 20.

Johnston, George C., Pittsburgh, Pa., and L. S. Uphoff, Schenectady, N. Y. Guard for X-ray tubes. No. 1,400,607; Dec. 20.

Johnston, William R., assignor to Wm. R. Johnston Mfg. Co., Chicago, Ill. Curtain-window for vehicles. No. 1,400,880; Dec. 20.

Johnston, Wm. R., Mfg. Co. (See Johnston, William R., assignor.)

Johnstone, Arthur, Ottumwa, Iowa. Coffee-steep. No. 1,400,749; Dec. 20.

Jordan, John E., Seattle, Wash. Speed-control device for motor-vehicles. No. 1,400,608; Dec. 20.

Judd, Orion W., Paducah, Ky. Liquid-extractor. No. 1,400,957; Dec. 20.

Junge, Charles O., assignor of one-half to E. E. Bleck, Pittsburgh, Pa. Refrigerator-body for vehicles. No. 1,400,880; Dec. 20.

Jurkovich, Conrad, assignor of forty per cent. to F. Hibler, Joliet, Ill. Convertible bench. No. 1,401,083; Dec. 20.

Kaps, Richard A., assignor to The Cincinnati Ball Crank Company, Cincinnati, Ohio. Steering reach-rod. No. 1,401,110; Dec. 20.

Kasai, Kaichi, O-muta, Fukuoka Ken, assignor to Mitsui Mining Co., Tokyo, Japan. Manufacture of paranitroanilin from paranitroacetanilid. No. 1,400,555; Dec. 20.

Kaul, Herman M., Cedarburg, Wis. Trolley-wheel. No. 1,400,681; Dec. 20.

Kayser, Charles E., Lorain, Ohio. Display stand. No. 1,401,084; Dec. 20.
Kellogg Switchboard & Supply Company. (See Dyson, Alfred H., assignor.)
Kelly-Springfield Tire Company, The. (See Mastbaum, William M., assignor.)
Kelly Walker, Brenda. (See Clendenning, William L., assignor.)
Kelly, William H., San Francisco, Calif. Surveyor's instrument. No. 1,400,958; Dec. 20.
Kenney, William J. (See Nordell, Carl H., assignor.)
Keegan, Richard C., South Bend, Ind. Concrete-wall mold. No. 1,400,982; Dec. 20.
Keegan, Richard C., South Bend, Ind. Window-sash. No. 1,400,983; Dec. 20.
Kilmer, Opal E., Valparaiso, Ind. Baby-carriage. No. 1,401,085; Dec. 20.
King, James M., Livingston, Tex. Fishhook. No. 1,401,086; Dec. 20.
King, John Y., Lansdowne, Pa. Shirt. No. 1,400,881; Dec. 20.
Kinney, Joshua R., Alleton, Mass. Pump. No. 1,400,877; Dec. 20.
Klauer, William H., Dubuque, Iowa. Metal railing. No. 1,400,882; Dec. 20.
Koenig, Charles J., New Baltimore, Mich. Collection-receptacle. No. 1,400,823; Dec. 20.
Koetschet, Joseph, Lyon, France, assignor to Societe Chimique des Usines du Rhone, Anciennement Gilliard, P. Monnet, et Cartier, Paris, France. Process and apparatus for carrying out chemical reactions by catalysis. No. 1,400,959; Dec. 20.
Kohl, George E. (See Lindstrom, Arthur O., assignor.)
Kolarik, Wenzel F., Omena, Mich. Animal-weaning device. No. 1,400,750; Dec. 20.
Kops Bros. (See Kops, Waldemar, assignor.)
Kops Bros. (See Kops, W., and Goldsmith, assignors.)
Kops, Waldemar, assignor to Kops Bros., New York, N. Y. Brasslère. No. 1,400,853; Dec. 20.
Kops, Waldemar, and L. Goldsmith, assignors to Kops Bros., New York, N. Y. Brasslère. No. 1,400,894; Dec. 20.
Koster, Philipp, Frankfort-on-the-Main, Germany. Automatically unslagging shaft construction for water-gas generators. No. 1,400,885; Dec. 20.
Knoderer, Homer G., Englewood, N. J., assignor to General Electric Company. Electrical fitting. No. 1,400,824; Dec. 20.
Knowlton & Newton Co. (See Knowlton, H. W., and Newton, assignors.)
Knowlton, Harry W., and W. A. Newton, assignor to Knowlton & Newton Co., Inc., Lowell, Mass. Pipe-switch. No. 1,400,609; Dec. 20.
Kroyer, John M., Stockton, Calif. Tractor. No. 1,400,684; Dec. 20.
Krueshield, Henry, and A. J. Walter, Mansfield, Ohio. Surgical instrument. No. 1,401,104; Dec. 20.
Krus, Andrew, Chicago, Ill. Hand-press and bottle-capping apparatus. No. 1,400,586; Dec. 20.
Kruse, August M., Defiance, Ohio. Container. No. 1,400,685; Dec. 20.
Kuehl, Carsten H. (See Salányi, William, assignor.)
Kuert, Ira J., Los Angeles, Calif. Concrete form. No. 1,400,751; Dec. 20.
Kuhn, Frank J. A. Hand, and J. G. Spicer, assignors to American Electrical Heater Company, Detroit, Mich. Terminal connection for electrical heating units. No. 1,400,636; Dec. 20.
Kurtz, Cyrus B., Lakewood, Ohio. Transmission mechanism. No. 1,400,687; Dec. 20.
Ladd, John W., Company. (See Mason, William G., assignor.)
Lambert, Arthur W., Croydon, England. Means for supporting shelves and analogous purposes. No. 1,400,960; Dec. 30.
Lancaster, George W., assignor to Teller Protector Company, Inc., Richmond, Va. Silent electric signal for banks. No. 1,401,087; Dec. 20.
Land, Charles H., Jr., assignor of one-half to W. H. Wilson, Detroit, Mich. Trailer. No. 1,400,752; Dec. 20.
Landsiedel, Harry, assignor to The Dalton Adding Machine Company, Cincinnati, Ohio. Adding and recording machine. No. 1,400,610; Dec. 20.
Lang, Charles W., Brooklyn, N. Y. Profiling attachment for milling-machines. No. 1,400,961; Dec. 20.
Lau, Oliver A., Hamburg, Pa. Lady's undergarment. No. 1,400,825; Dec. 20.
Laughery, Mrs. E. A. (See Schults, Edward, assignor.)
Lee, George T., Glyndon, Minn. Tire-shade. No. 1,401,083; Dec. 20.
Lederman, George. (See Anthony, M. O., and Lederman.)
Leger, Emile J., Moncton, New Brunswick, Canada. Mail-collecting apparatus. No. 1,400,611; Dec. 20.
Legg, David A., assignor to M. A. Adam, London, England. Copper catalyst. No. 1,401,117; Dec. 20.
Leggett, Albert A., Baltimore, Md. Cleansing and polishing composition. No. 1,400,825; Dec. 20.
Leonard Roller Gear Drive Thresher Company, The. (See Leonard, William C., assignor.)
Leonard, Roy E., Los Angeles, Calif. Process of and apparatus for drilling oil-wells. No. 1,400,962; Dec. 20.
Leonard, William C., assignor to The Leonard Roller Gear Drive Thresher Company, Lewiston, Idaho. Feeder for grain-separators. No. 1,400,688; Dec. 20.
Lessert, August H., assignor to International Motor Company, New York, Child. No. 1,400,545; Dec. 20.
Lessert, August H. (See Manley, A. F., and Lessert.)
Lessinger, Harry C., Roseville, Detroit. Internal-combustion engine. No. 1,401,089; Dec. 20.
Lewis, Fred G., assignor to Rhodes Harvester Company, Spokane, Wash. Steering mechanism. No. 1,400,689; Dec. 20.
Lewis, Fred G., Dishman, assignor to Spokane Manufacturing Company, Spokane, Wash. Traction-machine. No. 1,400,690; Dec. 20.
Lewis, James C., Portland, Me. Vehicle-wheel with permanent rim or metal felly. No. 1,400,558; Dec. 20.
Lewis, Theodore G., assignor to Buffalo Dental Manufacturing Company, Buffalo, N. Y. Circuit-controller. No. 1,400,692; Dec. 20.
Leumann, Richard, Chailly-sur-Lausanne, Switzerland. Apparatus for unwinding paper strips from rolls of paper in wrapping-machines. No. 1,400,827; Dec. 20.
Levy, Isidor, New York, N. Y. Garment-press. No. 1,401,090; Dec. 20.
Lieberg, Nels E., Seattle, Wash. Vehicle-spring. No. 1,401,612; Dec. 20.
Liebler, Henry B. (See Mehl, C. F., Liebler, Nall, and Nobbe.)
Lieblein, Harriet, Philadelphia, Pa. Educational device. No. 1,400,887; Dec. 20.
Lindstrom, Arthur O., assignor of one-half to G. E. Kohl, Cleveland, Ohio. Steam-bridle. No. 1,400,824; Dec. 20.
Lizoun-ff, Vasili, assignor to Martin A. Rossoff, Pittsburgh, Pa. Operation of blast furnaces. No. 1,400,893; Dec. 20.
Loeck, Arthur G., Campbellsport, Wis. Hanger apparatus for blower-pipes when filling silos. No. 1,400,753; Dec. 20.
Lots, William A. (See Tueckmantel, H., and Lots.)
Lourie, Nicholas R., Gloucester, Mass. False tooth and supporting means therefor. No. 1,400,613; Dec. 20.
Lovejoy, Fred P., Springfield, Vt. Turret attachment for metal-working machines. No. 1,400,614; Dec. 20.
Lucas, Arthur W., Fremont, Nebr. Ventilating apparatus for closet-bowls. No. 1,401,091; Dec. 20.
Lucey Manufacturing Corporation. (See Vreeland, Walter G., assignor.)
Lucke, Charles E., assignor to Worthington Pump and Machinery Corporation, New York, N. Y. Internal-combustion engine. No. 1,400,889; Dec. 20.
Lurie, William A. (See Holbrook, Rolfe R., assignor.)
Mackenzie, Fred L., Beverly, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Patterson, N. J. Nail. No. 1,400,756; Dec. 20.
Mackintosh, William M., Springfield township, Summit county, assignor to The Kelly-Springfield Tire Company, Akron, Ohio. Vulcanizing rubber. No. 1,400,618; Dec. 20.
Majestic Electric Development Company. (See Brown, E. N., and Schoenberg, assignors.)
Malstrom, Louise, Los Angeles, Calif. Producing artificial flower-petals. No. 1,400,691; Dec. 20.
Maluss, Windyslaw, Harrison, N. J. Sugar-dispenser. No. 1,400,757; Dec. 20.
Manning, Maxwell & Moore Inc. (See Evans, Harrison E., assignor.)
Mansfield, Frederick H., Washington, D. C. Luggage-carrier. No. 1,400,758; Dec. 20.
Marcuse, Moses M., assignor to West Disinfecting Company, New York, N. Y. Dispensing device for sheet material. No. 1,400,619; Dec. 20.
Marden, William L., assignor to Neptune Meter Company, New York, N. Y. Water-meter. No. 1,400,559; Dec. 20.
Marshall, Lewis C., Walpole, assignor to Pressure Proof Piston Ring Company, Boston, Mass. Piston-packing. No. 1,400,560; Dec. 20.
Martin, Bertrand G., London, England. Loose-leaf book. No. 1,400,891; Dec. 20.
Martinka, Eliel K. (See Martinka, John K. and E. K.)
Martinka, John K. and E. K., assignors of one-third to M. Tomecek, New York, N. Y. Egg-tester. No. 1,400,966; Dec. 20.
Martin, Oliver C., Richmond Hill, N. Y., assignor to Nichols Copper Company, New York, N. Y. Process and apparatus for refining copper. No. 1,400,892; Dec. 20.
Martin, Robert F., assignor to Robert F. Martin Corporation, New York, N. Y. Wall construction and brick therefor. No. 1,400,898; Dec. 20.
Martin, Robert F., Corporation. (See Martin, Robert F., assignor.)
Mason, Carl T., East Orange, N. J., and W. J. Hart, Mt. Vernon, N. Y., assignors to Splitdorf Electrical Company, Newark, N. J. Ignition system. No. 1,400,561; Dec. 20.
Mason, William G., assignor to John W. Ladd Company, Detroit, Mich. Bottle or can washing machine. No. 1,400,894; Dec. 20.
Masury, Alfred F., assignor to International Motor Company, New York, N. Y. Cooling system for motor-vehicles. No. 1,400,562; Dec. 20.
Masury, Alfred F., and A. H. Leipert, New York, N. Y. Cushioned connection for vehicle construction. No. 1,400,563; Dec. 20.
Mathy, Maurice, Liege, Belgium. Crucible-furnace. No. 1,400,759; Dec. 20.
Matthews, Edwin S., New York, N. Y. Indicating and recording liquid-fuel-supply-tank apparatus. No. 1,400,895; Dec. 20.

Max Ams Machine Company, The. (See Brensinger, Julius, assignor.)
Maxwell, James V., and J. P. Seiser, White Plains, N. Y.; said Seiser assignor to said Maxwell. Trussed hollow spar. No. 1,400,620; Dec. 20.
May, Lawrence E., Nashville, Tenn. Pump. No. 1,401,094; Dec. 20.
McCalmant, Frederick J., De Smet, S. D. Locking-valve. No. 1,400,615; Dec. 20.
McCann, Ronald A., assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. No. 1,400,964; Dec. 20.
McClure, Silas, Beaver Dam, Wis. Combination coal and gas range. No. 1,400,555; Dec. 20.
McClure, Silas. (See Palmer, Stanley W., assignor.)
McCrory, Harvey B., and W. Pearson, Saginaw, Mich. Abdominal retractor. No. 1,400,616; Dec. 20.
McCunn, Charles L., assignor to Resolute Manufacturing Company, Chicago, Ill. Sealed radius-bearing. No. 1,400,754; Dec. 20.
McCunn, Charles L., assignor to Resolute Manufacturing Company, Chicago, Ill. Compressor. No. 1,400,755; Dec. 20.
McCutcheon, John, Peabody, Kans. Extricating device. No. 1,401,092; Dec. 20.
McDaniels, Frank A., Portland, Oreg. Controlling device. No. 1,401,093; Dec. 20.
McFadden, John, South Chicago, Ill. Folding square. No. 1,400,617; Dec. 20.
McGavock, William J., Memphis, Tenn. Current-motor. No. 1,400,965; Dec. 20.
McGowin, Norman F. (See Archer, Charles B., assignor.)
McLean, Charles S. (See Powell, T. B., and McLean.)
McQuillin, James C., Oakland, Calif. Automobile-top. No. 1,400,890; Dec. 20.
Mehl, C. F., H. B. Liebler, J. Nall, and E. J. Nobbe, Cleveland, Ohio. Safety device for moving-picture machines. No. 1,400,760; Dec. 20.
Meinecke, Joseph, Paia Maui, Hawaii. Cane-sugar mill. No. 1,401,095; Dec. 20.
Meriwether, Coleman, Louisville, Ky., assignor to P. C. Reilly, Indianapolis, Ind. Metaled-end concrete pipe. No. 1,401,105; Dec. 20.
Merkel, Joseph F., assignor to Cyclemotor Corporation, Rochester, N. Y. Means for securing articles to motor-cycles and the like. No. 1,400,967; Dec. 20.
Mesters, Robert, Oakland, Calif. Antiskid-chain. No. 1,400,896; Dec. 20.
Metzger, Myer, Chicago, Ill. Sign-holder. No. 1,400,564; Dec. 20.
Miller, Peter, Springdale, Wash. Tie-puller. No. 1,400,692; Dec. 20.
Miller, Samuel M. D., Detroit, Mich. Clutch. No. 1,400,565; Dec. 20.
Miller, William J., Swissvale borough, Pa. Mechanism for forming glassware. No. 1,400,621; Dec. 20.
Milne, Robert, assignor to The Savage & Love Company, Rockford, Ill. Thread-milling machine. No. 1,400,761; Dec. 20.
Milne, Walter K., Brooklyn, N. Y. Eye-shade. No. 1,401,118; Dec. 20.
Minerals Separation North American Corporation. (See Dorenbach, B. H., and Scott, assignors.)
Mitchell, Louis J., Dinuba, Calif. Leveler and dirt-scraper. No. 1,400,968; Dec. 20.
Mitsui Mining Co. (See Kasai, Kaichi, assignor.)
Mohr, Mabel E., *et al.* (See Gallagher, George D., assignor.) (Reissue.)
Moore, Callie F., *et al.* (See Gallagher, George D., assignor.) (Reissue.)
Moore, Charles N. (See Zinsel, George, assignor.)
Moore, Otto, assignor, by mesne assignments, of one-half to Automatic Sliding Trolley Company, Frankfort, Ind. Sliding trolley. (Reissue.) No. 15,252; Dec. 20.
Moorhouse, Alfred, assignor to Packard Motor Car Company, Detroit, Mich. Motor-vehicle. No. 1,400,566; Dec. 20.
Moyle, John W. See De Haven, William L., assignor.)
Moyles, James W., Chicago, Ill. Combined sleeve-puller and lifting-jack. No. 1,400,897; Dec. 20.
Mulford, Louis K., Denver, Colo. Curtain attachment for windshields. No. 1,400,567; Dec. 20.
Murdock, Andrew G., Highland Park, Mich. Hinge-gage. No. 1,400,898; Dec. 20.
Murphy, Thomas B., Detroit, Mich. Tool-holding attachment for grinding-machines. No. 1,400,762; Dec. 20.
Nakayama, Mizuhiko, Toyotamagun Tokyo-fu, and Keijiro Adachi, Shitaya-Ku, Tokyo, Japan. Utilization of waste or scraps of leather. No. 1,400,899; Dec. 20.
Nall, Jabez. (See Mehl, C. F., Liebler, Nall, and Nobbe.)
National Brake & Electric Company. (See Aikman, Burton S., assignor.)
National Carbon Company. (See Benner, Raymond C., assignor.)
Neilson, Robert E., assignor to Tulsa Machine and Tool Company, Tulsa, Okla. Temper-screw for well-drilling tools. No. 1,400,900; Dec. 20.
Nelson, Frank F., San Francisco, Calif. View-finding device. No. 1,400,901; Dec. 20.
Nelson, John, Ottawa, Kans. Concrete-tie-making machine. No. 1,400,969; Dec. 20.
Neptune Meter Company. (See Marden, William L., assignor.)
Neudeck, Wesely R., Kansas City, Kans. Decoy-minnow. No. 1,401,096; Dec. 20.
Neumann, R., Hardware Co., The. (See Tueckmantel, H., and Lots, assignors.)
Newton, Wilmer A. (See Knowlton, H. W., and Newton.)
Nichols Copper Company. (See Martin, Oliver C., assignor.)
Nickolaus, John A., Richland, Wash. Irrigating-valve. No. 1,401,097; Dec. 20.
Nobbe, Edward J. (See Mehl, C. F., Liebler, Nall, and Nobbe.)
Nolan, Clyde, assignor to American Steam Conveyor Corporation, Chicago, Ill. Self-opening bucket. No. 1,400,902; Dec. 20.
Nolan, Clyde, assignor to American Steam Conveyor Corporation, Chicago, Ill. Self-opening-bucket. No. 1,400,903; Dec. 20.
Nomeland, Sam K., Porter, Minn. Novelty match-box. No. 1,400,904; Dec. 20.
Nordell, Carl H., Indianapolis, Ind., assignor of one-half to W. J. Kenney, Chicago, Ill. Sedimentation. No. 1,400,622; Dec. 20.
Nordstrom, Sven J., San Francisco, Calif. Wrench. No. 1,400,905; Dec. 20.
Norman, William F., Nevada, Mo. Grave-marker. No. 1,400,970; Dec. 20.
Nye, Frank H., Warsaw, Ind. Motor-vehicle attachment. No. 1,400,971; Dec. 20.
Oakley, John, Springfield, Mass., assignor to Bansh Machine Tool Company. Production of connecting-rods and similar machine parts. No. 1,400,829; Dec. 20.
O'Brien, Frank E., Troy, N. Y. Laundry-form. No. 1,400,763; Dec. 20.
Offenhauser, Christopher, Philadelphia, Pa. Method of and apparatus for feeding fluids. No. 1,400,972; Dec. 20.
Olshei, John R., Buffalo, N. Y. Protecting appliance for use on automobiles. No. 1,400,623; Dec. 20.
Olliard, James C., Tacoma, Wash. Machine for straightening bent pipes, rods, &c. No. 1,400,764; Dec. 20.
Opt, Warren N., assignor to C. I. Strauss and C. Pond, Tiffin, Ohio. Cream-separator. No. 1,400,973; Dec. 20.
Osborn, Thomas O. (See Powell, T. B., and McLean, assignors.)
Oswald, Earl P. (See Galamb, J., and Oswald.)
Owens, Oscar M., Homer, Ga. Animal-poke. No. 1,400,568; Dec. 20.
Owl Fumigating Corporation. (See Dingle, William G., assignor.) (Reissue.)
Packard Motor Car Company. (See Church, Harold D., assignor.)
Packard Motor Car Company. (See Moorhouse, Alfred, assignor.)
Page, Henry B., Greenville, Miss. Dirigible headlight for motor-vehicles. No. 1,400,975; Dec. 20.
Pallette, Mellville A., Independence, Mo. Oil-well cleaner. No. 1,400,765; Dec. 20.
Palmer, Stanley W., assignor to S. McClure, Beaver Dam, Wis. High-closet bracket for ranges. No. 1,400,569; Dec. 20.
Paque, Edward J., assignor to The Pollak Steel Company, Cincinnati, Ohio. Reinforce-bar. No. 1,400,570; Dec. 20.
Parke, Peter, assignor to The Pullman Company, Chicago, Ill. Equalizer for car-trucks. No. 1,400,693; Dec. 20.
Parke, Peter. (See Weaver, J. B., and Parke.)
Parker, Fred G., Paterson, N. J. Seating-appliance. No. 1,400,974; Dec. 20.
Parmele, William G., Seattle, Wash. Life-saving device. No. 1,400,976; Dec. 20.
Pearsons, George T., New York, N. Y. Fire-extinguisher. No. 1,400,906; Dec. 20.
Pearson, Wesley. (See McCrory, H., and Pearson.)
Peebles, Thomas A., Pittsburgh, Pa. Stoking mechanism. No. 1,400,766; Dec. 20.
Peebles, Thomas A., Pittsburgh, Pa. Boiler-furnace. No. 1,400,830; Dec. 20.
Perfection Tie Company. (See Boros, John, assignor.)
Perkins, B. F., & Son, Inc. (See Bartlett, Henry B., assignor.)
Perry, Emanuel J., New Bedford, Mass. Washing-machine. No. 1,400,977; Dec. 20.
Perry, Frederick H., Beverly, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Grinding cutting-edges. No. 1,400,767; Dec. 20.
Peterson, Charles J. (See Gneiss, G. H., and Peterson.)
Pierce Fuse Corporation. (See Candee, B. C., and Pierce, assignors.)
Pierce, William N. (See Candee, B. C., and Pierce.)
Pierson, Irving R., New York, N. Y. Means for metal-strapping and sealing containers. No. 1,400,624; Dec. 20.
Pirc, Frank, Marinette, Wis. Reversible plow. No. 1,400,768; Dec. 20.
Pittsburgh Meter Company. (See Chrisman, Horace, assignor.)
Pittsburgh Steel Company. (See Bull, George E., assignor.)
Pittsburgh Transformer Company. (See Bingay, Robert V., assignor.)
Phillips, Ross M. G., New Haven, Conn., assignor to Perlie P. Fallon, New York, N. Y. Phonograph lighting system. No. 1,400,694; Dec. 20.
Pollak Steel Company, The. (See Paque, Edward J., assignor.)

Patapoff, Morris, assignor of one-half to Morris Abel, Philadelphia, Pa. Radiator. No. 1,400,978; Dec. 20.
Pope, Joseph H., Hamilton, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Heel building machine. No. 1,400,805; Dec. 20.
Powell, Thomas A., Malvern, Ill. Grass catcher for lawn mowers. No. 1,400,977; Dec. 20.
Powell, Thomas B., and C. E. McLean, Long Beach, assignors, by mesne assignments, to T. O. Thalmer, Los Angeles, Calif. Auxiliary windshield for vehicles. No. 1,400,979; Dec. 20.
Pressure Proof Piston Ring Company. (See Marshall, Lewis C., assignor.)
Prince, Arthur C., Chicago, Ill. Lock. No. 1,400,980, Dec. 20.
Prussian Company, The. (See Cuist, John W., Jr., assignor.)
Pyrotor & Gamble Company, The. (See Crouch, Marion L., assignor.)
Pullman Company, The. (See Parks, Peter, assignor.)
Pullman Company, The. (See Weaver, J. B., and Parks, assignors.)
Puryear, Samuel R., Columbia, Tenn. Apparatus for separating solids from liquids. No. 1,400,981; Dec. 20.
Posard, Eric R., Boone, Iowa. Electric-pedal attachment for tractors. No. 1,400,981; Dec. 20.
Ramsey, James D., Talladega, Miss. Cotton-scraper. No. 1,400,982; Dec. 20.
Rand, Charles A. A., Chicago, Ill., assignor to International Harvester Company, Safety-link for levers. No. 1,400,909; Dec. 20.
Ransom, Eugene S., Jr., Newark, N. J. Hydraulic fig-separator. No. 1,400,810; Dec. 20.
Rapson, Frederick L., Liverpool, England. Device for retaining the shape of hats. No. 1,400,788; Dec. 20.
Rasch, Ludvik, Christiania, Norway. Pumping arrangement for turbine-driven separators. No. 1,400,811; Dec. 20.
Rastall, Arthur R., Ealing, England. Tone-arm for sound-reproducing machines. No. 1,400,983; Dec. 20.
Rawlinson, Edward, Vallejo, Calif. Leg-support. No. 1,400,625; Dec. 20.
Ray, Malcolm, Orange, Tex. Motor-vehicle for traversing marsh lands. No. 1,400,984; Dec. 20.
Rayder, Joseph A., Philadelphia, Pa. Phonograph-amplifier. No. 1,400,985; Dec. 20.
Reid, James H., Pittsburgh, Pa., assignor to International Nitrogen Company, Making nitric acid. No. 1,400,912; Dec. 20.
Reilly, Peter C. (See Meriwether, Coleman, assignor.)
Remick, Andrew B. (See Fischer, John G., assignor.)
Remington Accounting Machine Corporation. (See Wahl, John C., assignor.)
Remy Electric Company. (See Conklin, Oliver E., assignor.)
Resolute Manufacturing Company. (See McClure, Charles L., assignor.)
Reynolds Manufacturing Company. (See Wilbur, Frederick H., assignor.)
Rhoades, Alonso E., assignor to Draper Corporation, Hopedale, Mass. Hand-wheel mechanism for looms and other machines. No. 1,401,096; Dec. 20.
Rhodes Harvester Company. (See Lewis, Fred G., assignor.)
Rieck, Edward E. (See Junge, Charles O., assignor.)
Riley, Jesse F., and B. S. Fockler, Hagerstown, Md. Brake-hanger. No. 1,400,986; Dec. 20.
Rippenbein, Nicholas, New York, N. Y. Display stand. No. 1,400,987; Dec. 20.
Ritchie, Foster, Ealing, England. Printing-telegraph. No. 1,400,988; Dec. 20.
Roberts, Charles, Portsmouth, Ohio. Railway bumper-block. No. 1,400,989; Dec. 20.
Robin, Joseph T., Streatham, London, England. Projection or distribution of light. No. 1,400,990; Dec. 20.
Rodrigues, Alphonse C., Baton Rouge, La. Pipe-measuring square for plumbers and steam-fitters. No. 1,400,626; Dec. 20.
Rogers, Ray, and M. Groves, Midian, Kans. Stuffing-box. No. 1,400,991; Dec. 20.
Rosanoff, Martin A. (See Lissouneff, Vasili, assignor.)
Rosebloom, Alfred B., Chicago, Ill. Toy. No. 1,400,696; Dec. 20.
Rosel, Charles, Newark, Ohio. Lawn-edging machine. No. 1,400,627; Dec. 20.
Rosewater, Nathan, Cleveland, Ohio. Treating coffee-beans and other substances and product resulting therefrom. No. 1,400,992; Dec. 20.
Rudolph, Alfred W., St. Louis, Mo. Self-irrigating flower-pot. No. 1,400,628; Dec. 20.
Sanford, S., & Sons, Inc. (See Collins, Charles H., assignor.)
Sargent, Charles E., Indianapolis, Ind. Boiler feed-water purifier. No. 1,400,993; Dec. 20.
Saugen Derrick Co. (See Gloor, Albert, assignor.)
Savage & Love Company, The. (See Milne, Robert, assignor.)
Scales, John E., Indianapolis, and L. M. Wilson, Bloomington, Ind. Dispensing apparatus. No. 1,400,770; Dec. 20.
Scarsdale, Earl B., Dayton, Ohio. Babbitting device. No. 1,400,994; Dec. 20.
Schaefer, Henry H., Weldona, Colo. Wire tightener and splicer. No. 1,400,995; Dec. 20.
Schermerhorn, Marguerite G., et al. (See Gallagher, George D., assignor.)
Schiebler, Adolf, Berlin, Germany. Centrifugal governor. No. 1,400,172; Dec. 20.
Schiebammer, Herman, Whitestone Landing, assignor to American Hard Rubber Co., New York, N. Y. Manufacture of hard-rubber battery jars and similar articles. No. 1,400,810; Dec. 20.
Scovell, Walter S., et al. (See Henry, John A., assignor.)
Seidenbecher, Richard E., assignor of one-fourth to A. P. Baker, Reading, Pa. Heating system. No. 1,400,831; Dec. 20.
Sessmer, Alexander, Kansas City, Mo. Well-strainer. No. 1,400,681; Dec. 20.
Schmidt, Friedrich Simon, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Apparatus for testing the sighting device of ordnance. No. 1,400,772; Dec. 20.
Schmidt, John H. and L. Ahlers, Harriman, Pa. Universal rivet holder-on jam. No. 1,400,671; Dec. 20.
Schmuck, Carl E. (See Dawson, G. R., and Schmuck.)
Schoch, Howard H., assignor to Universal Optical Corporation, Providence, R. I. Ophthalmic mounting. No. 1,400,997; Dec. 20.
Schroeder's, A., Son, Inc. (See Anderson, Thomas W., assignor.)
Schultz, Edward, Norwood, assignor by mesne assignments to Mrs. E. A. Lassiter, Chicago, Ill. Coin-operated vending machine. No. 1,400,772; Dec. 20.
Scott, Walter A. (See Dennenstadt, H. H., and Scott.)
Scurlock, Charles C., Portland, Oreg. Portable power-operated tool-holder. No. 1,400,771; Dec. 20.
Seiler, Joseph F. (See Maxwell, J. V., and Seiler.)
Selvage, George A., Detroit, Mich. Screen for sand, gravel, &c. No. 1,400,607; Dec. 20.
Selleck, Edgar C., San Francisco, Calif. Trolley-spoon. No. 1,400,629; Dec. 20.
Seymour, Dudley H., Oak Park, assignor to Union Special Machine Company, Chicago, Ill. Trimming mechanism for sewing machines. No. 1,400,998; Dec. 20.
Shaw, Louis E., East Orange, N. J. Electric clock. No. 1,400,822; Dec. 20.
Shoenberg, Milton H. (See Brown, E. N., and Shoenberg.)
Shoenberg, Milton H., San Francisco, Calif. Socket-interrupter. No. 1,400,914; Dec. 20.
Shonk, William F., Detroit, Mich. Automobile signal. No. 1,400,999; Dec. 20.
Sigel, William B., Amelia, assignor, by mesne assignments, to The Stebling Truck Co., Cincinnati, Ohio. Fluid-check for lifting trucks. No. 1,401,111; Dec. 20.
Singer Manufacturing Company, The. (See Gatchell, George S., assignor.)
Singer Manufacturing Company. (See Hisz, Peter, assignor.)
Singer Manufacturing Company, The. (See De Voe, Albert H., assignor.)
Skillins, John T. (See Gabriel, G. A., and Skillins.)
Skousen, Julius H., Joplin, Mo. Emergency-tire for automobiles. No. 1,400,913; Dec. 20.
Skolfield, Constance M., New Orleans, La. Gage. No. 1,401,000; Dec. 20.
Skuse, Fred T., Kirkland, Wash. Poultry-feed apparatus. No. 1,400,833; Dec. 20.
Skworchinsky, John. (See Addis, Charles N., assignor.)
Smeby, Karl A., and G. W. Akin, Denver, Colo. License-number carrier. No. 1,400,630; Dec. 20.
Smiley, John W., Winchester, Ky. Game of cards. No. 1,401,001; Dec. 20.
Smith, Charles H., Boston, Mass. Safety relief-valve for hot-water systems. No. 1,401,002; Dec. 20.
Smith, Howard A., Montgomery, Iowa. Hayrack-fastener. No. 1,400,834; Dec. 20.
Smith, Jesse A. B., Stamford, Conn., assignor to Underwood Typewriter Company, New York, N. Y. Multiple-ply web for typewriters. No. 1,400,572; Dec. 20.
Smith, Jesse A. B., Stamford, Conn., assignor to Underwood Typewriter Company, New York, N. Y. Multiple-ply web for typewriters. No. 1,400,631; Dec. 20.
Smith, Jerome W., Walla Walla, Wash. Electric lantern. No. 1,400,775; Dec. 20.
Smith, Norman E., San Francisco, Calif. Airplane. No. 1,400,916; Dec. 20.
Smith, Temple C., East Orange, N. J., assignor to American Telephone and Telegraph Company. Deflection dynamometer. No. 1,400,776; Dec. 20.
Smith, W. W. (See Anderson, Raymond T., assignor.)
Smith, Willard E. (See Hagen, Bernhard E., assignor.)
Smith, William A., Phillipsburg, N. J., assignor to The Denver Rock Drill Manufacturing Company, Denver, Colo. Motor. No. 1,401,003; Dec. 20.
Snodgrass, Hascal, Bisbee, Ariz. Electrical fuse. No. 1,401,004; Dec. 20.
Snyder, Frank B., Altoona, Pa. Vehicle-brake. No. 1,401,005; Dec. 20.
Società Anonima Italiana Gio. Ansaldo & Co. (See Delacourt, Albert F., assignor.)
Société Chemique des Usines du Rhone, Anciens Ets. Gilliard, P. Monnet, et Cartier. (See Koetschet, Joseph, assignor.)
Soderberg, Henry A., Jersey City, N. J. Indicator. No. 1,401,006 Dec. 20.
Soule, Charles R., San Francisco, Calif. Knockdown cabinet for phonographs. No. 1,400,632; Dec. 20.
Spalding Ski-Kar Company, Inc. (See Spaulding, Thomas W., assignor.)

Spaulding, Thomas W., assignor to Spaulding Ski-Kar Company, Inc., Baltimore, Md. Toy vehicle. No. 1,400,017; Dec. 20.
Spiess, Georg, Leipzig-Reudnitz, Germany. Paper-cutting device. No. 1,400,777; Dec. 20.
Spiess, Georg, Leipzig, Germany. Sheet-feeding device. No. 1,400,778; Dec. 20.
Spiess, Julius G. (See Kuhn, F., Hand, and Spiess.)
Splitdorf Electrical Company. (See Erickson, Albert, assignor.)
Splitdorf Electrical Company. (See Mason, C. T., and Hart, assignors.)
Splitdorf Electrical Company. (See Tiedemann, Henry, assignor.)
Spokane Manufacturing Company. (See Lewis, Fred G., assignor.)
Stables, Linton G., Los Angeles, Calif. Automatic safety-guard. No. 1,400,835; Dec. 20.
Stader, William, Philadelphia, Pa. Suction lifting implement. No. 1,400,571; Dec. 20.
Stagl, Joseph E., Brooklyn, N. Y. Clothes-hanger. No. 1,400,634; Dec. 20.
Standard Oil Company. (See Burgess, Louis, assignor.)
Standard Parts Company, The. (See Jobski, Otto H., assignor.)
Standard Parts Company, The. (See Theberath, Joseph C., assignor.)
Steeples, Albert F., Boston, Mass., assignor to The Hoover Suction Sweeper Company, North Canton, Ohio. Suction-sweeper. No. 1,401,007; Dec. 20.
Steele, Herbert H., Pittsford, assignor to Todd Protectograph Company, Inc., Rochester, N. Y. Check-writer. No. 1,400,574; Dec. 20.
Steele, Herbert H., Pittsford, assignor to Todd Protectograph Company, Rochester, N. Y. Check-writer. No. 1,400,575; Dec. 20.
Steele, Herbert H., Brooklyn, assignor, by mesne assignments, to John H. Eggers Company, Inc., New York, N. Y. Machine for making coin-cards. No. 1,400,634; Dec. 20.
Steel Winga Company. (See Howard, H. H., and Furmidge, assignors.)
Steinman, Emil F., Arcadia, Wis. Nest. No. 1,400,576; Dec. 20.
Stephan, Frederick D. (See Stephan, William F., J. A., and F. D.)
Stephan, John A. (See Stephan, William F., J. A., and F. D.)
Stephen, William F., J. A., and F. D., Shelbyville, Ind. Boot and shoe. No. 1,400,826; Dec. 20.
Stern, Charles, and G. F. Egan, Jersey City, N. J. Automobile tail-lamp and signal. No. 1,400,685; Dec. 20.
Stewart, Carlton D., Berkeley, assignor to Associated Engineering and Supply Company, San Francisco, Calif. Regulating apparatus for liquid-fuel burners. No. 1,400,636; Dec. 20.
Stewart-Warner Speedometer Corporation. (See Goetz, Oscar H., assignor.)
Stiles, Edward M., Mount Pleasant, Iowa, assignor to U. S. Slicing Machine Company, Laporte, Ind. Holder for slicing-machines. No. 1,400,693; Dec. 20.
Stock, Robert, Sandusky, Ohio. Bottle-cap. No. 1,400,918; Dec. 20.
Stock, Robert, Sandusky, Ohio. Vehicle-wheel. No. 1,400,919; Dec. 20.
Stogner, John R., Lancaster, S. C. Ice-hook. No. 1,401,008; Dec. 20.
Strauss, Charles L., et al. (See Opt, Warren N., assignor.)
Strood, Myrtle V., Pine Hill, N. C. Picture-frame attachment. No. 1,400,920; Dec. 20.
Stuebing Truck Co., The. (See Sigel, William B., assignor.)
Submarine Signal Company. (See Wood, E. C., and Fay, assignors.)
Sullivan, John D., Salt Lake City, Utah. Lawn-sprinkler. No. 1,401,009; Dec. 20.
Summers, Leland L., Washington, D. C. Gun. No. 1,401,010; Dec. 20.
Sundhaussen, Hermann, Essen, Germany, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Brush arrangement for disk-shaped commutators. No. 1,400,779; Dec. 20.
Superheater Company, The. (See Barnes, John A., assignor.)
Swain, Joseph G., assignor, by mesne assignments, to The Firestone Steel Products Company, Akron, Ohio. Pressed-steel wheel. No. 1,400,837; Dec. 20.
Swanson, Peter, and A. Carlson, Ely, Minn. Auxiliary car-step. No. 1,400,577; Dec. 20.
Sweet, Frederick D., Cleveland, Ohio. Pump. No. 1,400,578; Dec. 20.
Szanyi, William, New York, N. Y., assignor of one-half to C. H. Kuehl, Hoboken, N. J. Hair-waving process and device. No. 1,400,637; Dec. 20.
Tate, Alfred O., New York, N. Y. Waterproofing substance for fibrous material. No. 1,400,579; Dec. 20.
Taylor, Charles H., Crosby, Minn. Automatic phonograph-stop. No. 1,400,638; Dec. 20.
Teitel, Albert, New York, N. Y., assignor to Cinema Patents Company, Chicago, Ill. Film-cleaner. No. 1,401,012; Dec. 12.
Teitel, Albert, New York, N. Y., assignor to Cinema Patents Company, Chicago, Ill. Film cleaner and rewinder. No. 1,401,013; Dec. 20.
Teitel, Albert, New York, N. Y., assignor to Cinema Patents Company, Chicago, Ill. Film-cleaning apparatus. No. 1,401,014; Dec. 20.
Telge, Walter A., Albion, N. Y. Animal-trap. No. 1,401,011; Dec. 20.
Teller Protector Company. (See Lancaster, George W., assignor.)
Tent, Ellis W., Michigan City, Ind. Roller door track. No. 1,400,690; Dec. 20.
Theberath, Joseph C., assignor to The Standard Parts Company, Cleveland, Ohio. Vehicle-wheel rim. No. 1,401,015; Dec. 20.
Thermal Appliance Company. (See Hansen, Charles C., assignor.)
Thomas, Thomas H., Edgewood, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Electro-pneumatic brake. No. 1,400,629; Dec. 20.
Thornburgh, Ivan D., Berkeley, assignor to American Can Company, San Francisco, Calif. Organized apparatus for grooving can ends and applying ring-liners thereto. No. 1,400,580; Dec. 20.
Tiedemann, Henry, assignor to Splitdorf Electrical Company, Newark, N. J. Automatic impulse starting apparatus. No. 1,400,581; Dec. 20.
Tietz, Walter M., Newark, N. J. Device for making designs. No. 1,400,838; Dec. 20.
Tilson, William, Herrin, Ill. Aeroplane. No. 1,400,582; Dec. 20.
Todd Protectograph Company. (See Steele, Herbert H., assignor.)
Tolman, George S., Jr., Walpole, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Heel-breasting machine. No. 1,400,700; Dec. 20.
Tomecek, Martin. (See Martinka, John K. and E. K., assignors.)
Toomey, John F., New York, N. Y., assignor to American Telephone and Telegraph Company. Telephone system. No. 1,400,583; Dec. 20.
Tower, Herschel E., assignor to The Baldwin Company, Cincinnati, Ohio. Mechanical musical instrument. No. 1,400,821; Dec. 20.
Troy Laundry Machinery Company. (See Bartholomew, William, assignor.)
Tuecksmantel, Hugo, and W. A. Lotz, Newark, N. J., assignors to The E. Neumann Hardware Co. Bag-lock. No. 1,400,640; Dec. 20.
Tulsa Machine and Tool Company. (See Neilson, Robert E., assignor.)
Turner, Walter V., Wilkinsburg, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Safety device for regenerative brakes. No. 1,400,839; Dec. 20.
Turner, Walter V., Wilkinsburg, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Regenerative brake device. No. 1,400,840; Dec. 20.
Turner, Walter V., Wilkinsburg, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Combined fluid-pressure and regenerative brake. No. 1,400,841; Dec. 20.
Underwood Computing Machine Company. (See Vickers, Harry H., assignor.)
Underwood Typewriter Company. (See Helmond, William F., assignor.)
Underwood Typewriter Company. (See Smith, Jesse A. B., assignor.)
Underwood Typewriter Company. (See Waidheim, John, assignor.)
Union Special Machine Company. (See Seymour, Dudley S., assignor.)
Union Switch & Signal Company, The. (See Harrington, Clinton O., assignor.)
Union Switch & Signal Company, The. (See McCann, Ronald A., assignor.)
United Shoe Machinery Corporation. (See Bazzoni, Lewis J., assignor.)
United Shoe Machinery Corporation. (See Benjamin, John M., assignor.)
United Shoe Machinery Corporation. (See Hadaway, John B., assignor.)
United Shoe Machinery Corporation. (See Mackenzie, Fred L., assignor.)
United Shoe Machinery Corporation. (See Perry, Frederick H., assignor.)
United Shoe Machinery Corporation. (See Pope, Joseph H., assignor.)
United Shoe Machinery Corporation. (See Tolman, George S., Jr., assignor.)
United Shoe Machinery Corporation. (See Ward, Frank W., assignor.)
United Shoe Machinery Corporation. (See Winter, Henry W., assignor.)
Universal Optical Corporation. (See Schott, Howard H., assignor.)
Uphoff, Leslie S. (See Johnston, G. C., and Uphoff.)
U. S. Industrial Alcohol Co. (See Backhaus, Arthur A., assignor.)
U. S. Light & Heat Corporation. (See Bliss, William L., assignor.)
U. S. Slicing Machine Company. (See Stiles, Edward M., assignor.)
Valerio, Pietro F., New York, N. Y. Film-shift lock for cameras. No. 1,400,641; Dec. 20.
Van Buren, Willie. (See Harris, B., and Van Buren.)
Van Dyke, Ellas, Columbus, Ohio. Refrigerator. No. 1,400,643; Dec. 20.

Van Der Vorn, Jacob, Chicago, Ill. Boring bar. No. 1,400,642; Dec. 20.
Varley Duplex Magnet Company. (See Anderson, James C., assignor.)
Veenschoten, Vincent V., Erie, Pa. Indicating mechanism for spring-motors. No. 1,400,644; Dec. 20.
Vickers, Harry H., Corona, N. Y., assignor to Underwood Computing Machine Company, New York, N. Y. Combined typewriting and computing machine. No. 1,400,642; Dec. 20.
Vickers Limited. (See Dawson, A. T., and Horne, assignors.)
Vickers Limited. (See Johnson, Frederick G. L., assignor.)
Villacorta, José S., San Ildefonso, Bulacan, Philippine Islands. Treating tobacco-leaf. No. 1,401,106; Dec. 20.
Vogensen, H. P. (See Christensen, Claus P., assignor.)
Volet, René A. L., Paris, France. Commutator and the like. No. 1,401,016; Dec. 20.
Vollmer, John, Essen, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Composite gun-barrel assembled by rotary motion of its component parts. No. 1,400,780; Dec. 20.
Vreeland, Walter G., assignor to Lucey Manufacturing Corporation, Chattanooga, Tenn. Automatic slip for well-boring apparatus. No. 1,400,701; Dec. 20.
Waguer, Charles B., Jr., Burlington, Wis. Shoe for furniture-legs. No. 1,400,781; Dec. 20.
Wahl, John C., Chicago, Ill., assignor, by mesne assignments, to Remington Accounting Machine Corporation, New York, N. Y. Calculating-machine. No. 1,400,954; Dec. 20.
Waldheim, John, Elizabeth, N. J., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting-machine. No. 1,400,702; Dec. 20.
Wallace, Frank W., Chattanooga, Tenn. Insect-killer. No. 1,400,782; Dec. 20.
Walten, Ruth B., et al. (See Gallagher, George D., assignor.) (Reissue.)
Walter, Allen J. (See Kruesheld, H., and Walter.)
Waream, Charles E., Cincinnati, assignor to The American Laundry Machinery Company, Norwood, Ohio. Feeding mechanism for hosiery-presses. No. 1,400,645; Dec. 20.
Ward, Frank W., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for use in lasting boots and shoes. No. 1,400,703; Dec. 20.
Ward, Jerome, assignor to Blatchford Calf Meal Co., Waukegan, Ill. Beater for grinders. No. 1,401,018; Dec. 20.
Ward, Thomas F., Cleveland, Ohio. Lock. No. 1,401,018; Dec. 20.
Washburn, Fred, deceased; M. A. Washburn, administratrix, New Haven, Conn. Sand-blast device. No. 1,400,585; Dec. 20.
Washburn, Margaret A., administratrix. (See Washburn, Fred.)
Wayne Oil Tank and Pump Company. (See Baker, Linnaeus E., assignor.)
Weaver, Joseph B., and P. Parke, assignors to The Pullman Company, Chicago, Ill. Truck-pedestal. No. 1,400,586; Dec. 20.
Weber, William H., Kokomo, Ind. Attachment for chairs and the like. No. 1,401,019; Dec. 20.
Webster, Ernest C., Chicago, Ill. Electric stopper for fluid-containers. No. 1,400,646; Dec. 20.
Weisford, Leslie W., assignor to J. C. Gates, Melbourne, Victoria, Australia. Machine for making paper bags. No. 1,400,587; Dec. 20.
Welsh, Clyde L., Pittsburgh, Pa. Attachment for printing-presses. No. 1,400,704; Dec. 20.
West Disinfecting Company. (See Marcuse, Moses M., assignor.)
Westbrook, Luther J., Flowery Branch, Ga. Plow. No. 1,401,020; Dec. 20.
Westinghouse Air Brake Company, The. (See Boyden, George A., assignor.)
Westinghouse Air Brake Company, The. (See Dudley, Samuel W., assignor.)
Westinghouse Air Brake Company, The. (See Farmer, Clyde C., assignor.)
Westinghouse Air Brake Company, The. (See Grosswege, John B., assignor.)
Westinghouse Air Brake Company, The. (See Westinghouse, Henry H., assignor.)
Westinghouse Air Brake Company, The. (See Thomas, Thomas H., assignor.)
Westinghouse Air Brake Company, The. (See Turner, Walter V., assignor.)
Westinghouse Air Brake Company, The. (See Woernley, Harry F., assignor.)
Westinghouse, Henry H., New York, N. Y., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Lubricating device. No. 1,400,647; Dec. 20.
Whitney, Robert H., Jacksonville, Fla. Dilator. No. 1,400,648; Dec. 20.
Wilbur, Frederick H., Binghamton, N. Y., assignor to Reynolds Manufacturing Company, West Toledo, Ohio. Stapling machine for leather loops. No. 1,400,843; Dec. 20.
Willett, Alfred H., West New York, N. J., assignor to American Arch Company, New York, N. Y. Arch-brick. No. 1,401,022; Dec. 20.
Williams, Frank H., Buffalo, N. Y. Crane-hook grab-bucket. No. 1,400,927; Dec. 20.
Williams, Paul F., assignor to G & W Electric Specialty Co., Chicago, Ill. Switching-box. No. 1,401,021; Dec. 20.
Wilson, Cora E., executrix. (See Wilson, John M., assignor.)
Wilson, John M., deceased, Montclair, N. J.; C. E. Wilson, executrix. Composition for cleaning and coating. No. 1,401,023; Dec. 20.
Wilson, Lorain M. (See Scaine, J. R., and Wilson.)
Wilson, William H. (See Land, Charles H., Jr., assignor.)
Winkelmann, Albert, Paris, France. Lock. No. 1,400,588; Dec. 20.
Winter, Henry W., Methuen, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Marking-machine. No. 1,400,708; Dec. 20.
Woernley, Harry F., Pittsburgh, assignor to The Westinghouse Air-Brake Company, Wilmerding, Pa. Weather-protector for couplings. No. 1,400,649; Dec. 20.
Wolf, Austin M., Plainfield, N. J. Cooling and indicating system for internal-combustion engines. No. 1,400,925; Dec. 20.
Wood, E. C. Somerville, and H. J. W. Fay, Westboro, Mass., assignors to Submarine Signal Company, Portland, Me. Diaphragm-mounting. No. 1,401,024; Dec. 20.

Vehicle-wheel. W. H. Dundore. No. 1,400,807; Dec. 20.
Vehicle-wheel. R. Stock. No. 1,400,910; Dec. 20.
Vehicle-wheel, Resilient. W. C. and C. M. Wright. No. 1,400,844; Dec. 20.
Vehicle-wheel with permanent rim or metal felly. J. C. Lewis. No. 1,400,828; Dec. 20.
Vehicle-wheels, Oil-cap for. A. J. Crotty. No. 1,400,871; Dec. 20.

Vehicles, Cooling system for motor-. A. F. Mastry. No. 1,400,582; Dec. 20.
Vehicles, Durable wagon for. W. R. Johnston. No. 1,400,592; Dec. 20.
Vehicles, Device for controlling the speed of automobile-. A. Gallizard. No. 1,400,611; Dec. 20.
Vehicles, Direction-indicator for. T. F. Goodwin. No. 1,400,621; Dec. 20.
Vehicles, Lock for motor-driven. C. N. Adkin. No. 1,400,677; Dec. 20.
Vehicles, Refrigerator-body for. C. O. Junge. No. 1,400,690; Dec. 20.
Vehicles, Sand-dispensing device for motor-. H. J. Hinz. No. 1,401,078; Dec. 20.
Vehicles, Speed-control device for motor-. J. E. Jurdan. No. 1,401,088; Dec. 20.
Vise-fixing device. F. P. Nelson. No. 1,400,601; Dec. 20.
Vending machine. A. D. Greyer. No. 1,400,814; Dec. 20.
Vending-machine. B. F. Grutzstrup. No. 1,400,742; Dec. 20.
Vending-machine, Coin-operated. E. Schultz. No. 1,400,774; Dec. 20.
Ventilated automobile-driver's seat. D. Benson and C. E. Bruce. No. 1,400,717; Dec. 20.
Ventilator. T. M. Brown, Jr. No. 1,400,800; Dec. 20.
Wall construction and brick therefor. E. P. Martin. No. 1,400,803; Dec. 20.
Washing-machine. S. B. and J. Adler. No. 1,401,018; Dec. 20.
Washing-machine. E. J. Peary. No. 1,400,977; Dec. 20.
Washing-machines and wringers, Gear transmission for. H. Hansen. No. 1,400,744; Dec. 20.
Washing-machine, Driving connection for. H. Hansen. No. 1,400,745; Dec. 20.
Washtub-protector. I. B. Downey. No. 1,400,721; Dec. 20.
Water-cooler. W. B. Barley and J. C. Corbett. No. 1,400,713; Dec. 20.
Water-heater. C. C. Hansen. No. 1,400,541; Dec. 20.
Water-heater. W. L. Marden. No. 1,400,559; Dec. 20.
Water-wheel. J. J. Hendley. No. 1,401,077; Dec. 20.
Waterproofing substance for fibrous material. A. O Tate. No. 1,400,579; Dec. 20.
Weeding implement. H. L. Gilliland. No. 1,400,673; Dec. 20.
Well-boring apparatus, Automatic slip for. W. G. Vreeland. No. 1,400,791; Dec. 20.
Well-cleaner. A. Schaurer. No. 1,400,996; Dec. 20.
Well-drilling bit. O. J. Bourgois. No. 1,400,794; Dec. 20.
Well-drilling tools, Temper-screw for. R. E. Nelbock. No. 1,400,000; Dec. 20.
Wells, Process of and apparatus for drilling oil-. R. E. Leonard. No. 1,400,982; Dec. 20.
Wheel:—
Pressed-steel wheel. Vehicle-wheel.
Resilient-vehicle wheel. Water-wheel.
Trolley-wheel.
Wheel rim, Vehicle-. J. C. Thoberath. No. 1,401,015; Dec. 20.
Wind-gate apparatus. F. W. Busch. No. 1,401,009; Dec. 20.
Window attachment. H. A. Hobelmann. No. 1,401,080; Dec. 20.
Windshield for vehicles, Auxiliary. T. B. Powell and C. A. Nielsen. No. 1,401,079; Dec. 20.
Windshields, Certain attachment for. L. K. Mulford. No. 1,400,997; Dec. 20.
Wire-tightener and splicer. H. H. Schaster. No. 1,400,965; Dec. 20.
Wire twisting and bending machine. J. A. Butler. No. 1,400,734; Dec. 20.
Wire-tying machine, Hand-operated. P. Wright. No. 1,401,020; Dec. 20.
Work-holding device. J. M. Benjamin. No. 1,400,716; Dec. 20.
Wrapping-machine, Apparatus for unwinding paper strips from rolls of paper in. R. Leumann. No. 1,400,827; Dec. 20.
Wrench:—
Pipe-wrench.
Wrench. F. J. Nordstrom. No. 1,400,995; Dec. 20.
X-Ray tube-guard for. G. C. Johnsen and L. A. Dyhrdt. No. 1,400,007; Dec. 20.

ALPHABETICAL LIST OF DESIGNS.

Air compressor casing. E. H. Steedman. No. 60,066; Dec. 20.
Advertising device. H. Morris. No. 60,064; Dec. 20.
Advertising novelty. C. H. Forbell. No. 60,019; Dec. 20.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 27TH DAY OF DECEMBER, 1921.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Abbe, George C., Lansdowne, assignor to The Baldwin Locomotive Works, Philadelphia, Pa. Quill-drive for electric locomotives. No. 1,401,120; Dec. 27.

Adelman, George R., Philadelphia, Pa. Pencil-clip. No. 1,401,124; Dec. 27.

Ahlby, Jacob, Bergland, Mich. Tie and rail holder. No. 1,401,093; Dec. 27.

Aird, James A., Montreal, Quebec, Canada. Light. No. 1,401,452; Dec. 27.

Akins, Hannah F. (See Gross, F. D., Akins, and Bucher.)

Aktiebolaget Ars. (See Reiche, Arthur, assignor.)

Aktiebolaget Brown, Boveri and Cie. (See Brown, W., and Carrard, assignors.)

Aktiebolaget Ljungströms Angturbin. (See Ljungström, Fredrik, assignor.)

Alberti, Emilio and J., New York, assignors to International Cork Company, Brooklyn, N. Y. Machine for manufacturing closures for bottles and other receptacles. No. 1,401,100; Dec. 27.

Alberti, J. (See Alberti, Emilio and J.)

Alexander, Erik H., New York, N. Y., assignor to C. E. Johansson, Eskilstuna, Sweden. Diameter-gage. No. 1,401,119; Dec. 27.

Aldridge, W. Herbert, Portland, Oreg. Tire-armor. No. 1,401,301; Dec. 27.

Alexander, Wallace, Jersey City, N. J., assignor to The De Laval Separator Company, New York, N. Y. Separating butter-oil from milk, skim-milk, cream, buttermilk, butter, &c. No. 1,401,853; Dec. 27.

Allan, Charles D. (See Carter, Byron B., assignor.)

Allard, Pierre, Maisonneuve, Quebec, Canada. Ticket-holder. No. 1,401,120; Dec. 27.

Allcutt, Chester T. (See Maizer, J. E., and Allcutt.)

Allen, Charles H., assignor to Troy Laundry Machinery Company, Ltd., Chicago, Ill. System of motor control. No. 1,401,387; Dec. 27.

Allen, Ray M., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Mounting for vacuum-tubes. No. 1,401,121; Dec. 27.

Allen, W. D., Manufacturing Company. (See Meng, Harry B., assignor.)

Allin, Charles J., St. Paul, Minn. Flue-stopper. No. 1,401,[illegible]; Dec. 27.

Almeda, Jose M., Shoshone, Idaho. Bag-fastener. No. 1,401,[illegible]; Dec. 27.

American Chain Company. (See Smith, William B., assignor.)

American Coke & Chemical Company. (See Roberts, Arthur, assignor.)

American Gas Company of New Jersey, The. (See Warner, Arthur W., assignor.)

American Multigraph Company, The. (See Trundle, George T., Jr., assignor.)

American Optical Company. (See Schumacher, Elmer L., assignor.)

American Steel Foundries. (See Carscadin, Charles A., assignor.)

Andersen, Alexander E., Bristol, Va. Pencil or pen attachment. No. 1,401,454; Dec. 27.

Anderson, Albin E., Oakmont, Pa. Adjustable swift. No. 1,401,123; Dec. 27.

Anderson, Albin E., Oakmont, assignor of two-thirds to E. M. Verner and J. W. Macfarlane, Pittsburgh, Pa. Wire-rope machine. No. 1,401,122; Dec. 27.

Anderson, August E., Montclair, N. J. Contact for spark-gaps. No. 1,401,231; Dec. 27.

Anderson, Charles W., *et al.* (See Cooper, Daniel B., assignor.)

Anderson, Frank, Oakland, Calif. Combination-padlock. No. 1,401,865; Dec. 27.

Anderson, Harry T., Butler, Pa., assignor to Harry Vissering and Company, Chicago, Ill. Manufacture of drawbar-yokes. No. 1,401,748; Dec. 27.

Anderson, Harry T., Butler, Pa., assignor to H. Vissering and Company, Chicago, Ill. Railway draft-gear yoke. No. 1,401,749; Dec. 27.

Angus, William A. R., Winnipeg, Manitoba, Canada. Rail-anchor. No. 1,401,856; Dec. 27.

Annabel, Charles C. (See Letts, Ellsworth M., assignor.)

Apsley Rubber Company. (See Parchert, Frederick L., assignor.)

Armour Fertilizer Works. (See Shoeld, Mark, assignor.)

Armstrong, George F., Sioux City, Iowa. Button-fastener. No. 1,401,232; Dec. 27.

Aronson, Louis V., Newark, N. J. Ornament-support. No. 1,401,750; Dec. 27.

Arrow Electric Company, The. (See Nero, Arvid H., assignor.)

Atack, Frederick W., Manchester, England, and G. Robertson, Couper Angus, Scotland. Halogenation of anthraquinone derivatives. No. 1,401,125; Dec. 27.

Atlantic Redning Company, The. (See Buerger, Charles B., assignor.)

Aust, Arthur A., Bedford, Ohio. Combustion-engine. No. 1,401,126; Dec. 27.

Automatic Sprinkler Company of America. (See Lowe, Ernest A., assignor.)

Avart, Isaac, *et al.* (See Hughes, James W., assignor.)

Avery, Colby M., Aurora, Ill., assignor to Stephens-Adamson Mfg. Co. Traveling grizzly. No. 1,401,751; Dec. 27.

Axelson, Jule C., Alhambra, Calif., assignor to Axelson Machine Company. Sucker-rod coupling. No. 1,401,302; Dec. 27.

Axelson Machine Company. (See Axelson, Jule C., assignor.)

Babcock & Wilcox Company, The. (See Heaton, Herman C., assignor.)

Babirad, Nicolaus, Charleroi, assignor of two-fifths to D. Stec, Cokeburg, Pa. Combination comb and brush. No. 1,401,576; Dec. 27.

Bahr, Jacob S., North Venice, and M. E. Logue, East St. Louis, Ill. Carbureter attachment. No. 1,401,127; Dec. 27.

Bailey, Charles A., Cromwell, Conn. Vibrating shell. No. 1,401,859; Dec. 27.

Bailey, George C., Woodcliff-on-Hudson, N. J., assignor to The Barrett Company. Purification of maleic acid by reducing agents. No. 1,401,937; Dec. 27.

Bailey, Percy T., Middletown, R. I. Fencepost attachment. No. 1,401,509; Dec. 27.

Baird-Daniels Co., *et al.* (See Popper, Joseph, assignor.)

Baker, Henry F. (See Smith, Harold J., assignor.)

Baker-Vawter Company. (See Manny, Fred L., assignor.)

Baicker, Martin, Chicago, Ill., assignor to Marquette Tool & Mfg. Co. Multiple-drill-press-controlling means. No. 1,401,388; Dec. 27.

Baldwin Locomotive Works, The. (See Abbe, George C., assignor.)

Baldwin, William C., Ottawa, Ontario, Canada. Electrical drier for paper and the like. No. 1,401,308; Dec. 27.

Ball, Clarence F., Rutland, Vt. Portable cot for use with automobiles. No. 1,401,938; Dec. 27.

Barrett Company, The. (See Bailey, George C., assignor.)

Barton, Warren D., Waco, Tex. Device for holding ice upon the running-boards of vehicles. No. 1,401,128; Dec. 27.

Baumaison, Pierre, San Francisco, Calif. Extension-bit. No. 1,401,455; Dec. 27.

Bausch Manufacturing Co., The. (See Davis, Ernest W., assignor.)

Battner, Stephen, Brooklyn, N. Y. Pneumatic-action unit. No. 1,401,857; Dec. 27.

Baumhauer, Heinrich, Charlottenburg, near Berlin, Germany, assignor, by mesne assignments, to Patent-Treuhand-Gesellschaft fuer Electrische Gluhlampen, M. B. H., Berlin, Germany. Electric glow-lamp. No. 1,401,510; Dec. 27.

Baumler, Charles A., assignor to The Buffalo Sled Company, Buffalo, N. Y. Wheel-mounting. No. 1,401,930; Dec. 27.

Bayles, Lewis C., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Pneumatic column. No. 1,401,858; Dec. 27.

Beall, Charles R., assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway signaling mechanism. No. 1,401,511; Dec. 27.

Beck, August B., Jersey City, N. J. Girdle. No. 1,401,860; Dec. 27.

Beck, August B., Jersey City, N. J. Girdle. No. 1,401,861; Dec. 27.

Becker, Mathias B., Chicago, Ill. Packaging device. No. 1,401,304; Dec. 27.

Becker, Sylvester, Rutherford, N. J., assignor to Sterling Bronze Company, New York, N. Y. Molding. No. 1,401,577; Dec. 27.

Beckman, Albert H. E., Stockholm, Sweden. Skee-stopper. No. 1,401,940; Dec. 27.

Beecroft, Edgar C., Pelham Manor, N. Y. Crutch. No. 1,401,305; Dec. 27.

Beeman Tractor Company. (See Mader, Joseph, assignor.)

Bellman, Edward, Evansville, Wis. Manually-propelled life-saving device and attachment for boats. No. 1,401,233; Dec. 27.
Bellmore, Frederick H., New Bedford, Mass. Valve-tappet. No. 1,401,214; Dec. 27.
Beman, Ralph, Cleveland, Ohio, assignor to General Electric Company. Optical checking apparatus. No. 1,401,664; Dec. 27.
Bendien, Jacques. (See Preston, Charles F., assignor.)
Benjamin, George H., New York, N. Y. Melting-furnace. No. 1,401,456; Dec. 27.
Benner, Henry and L., Brooklyn, N. Y. Side wind-deflector. No. 1,401,942; Dec. 27.
Benner, Louis. (See Benner, Henry and L.)
Berger, William, and C. Blaschke, Schulenburg, Tex. Shoemaker's tool. No. 1,401,[illegible]; Dec. 27.
Berryman, Harry H., Cicero, Ill. Heating system. No. 1,401,512; Dec. 27.
Bertrand, John A., assignor to A. Reed, Los Angeles, and W. A., Koch, San Francisco, Calif. Reamer. No. 1,401,752; Dec. 27.
Bethlehem Steel Bridge Corporation. (See Hilpert, Maier G., assignor.)
Beuckmann, Frank, East St. Louis, Ill. Dish-scraper. No. 1,401,457; Dec. 27.
Bibb, Otis A. (See Culwell, V. S., and Bibb.)
Billings, Irvin I., Marial, Oreg. Miner's carbid lamp. No. 1,401,129; Dec. 27.
Billington, Frank, Portland, Oreg. Water-reservoir for automobile-radiators. No. 1,401,513; Dec. 27.
Billon, Frederic, and J. Bobli, assignors to Firm "Heintilla," Solothurn, Switzerland. Horseshoe-magnet. No. 1,401,130; Dec. 27.
Bird, George R., Rockford, Ill. Tire-flap. No. 1,401,306; Dec. 27.
Birkigt, Marc, Bois-Colombes, France. Explosion-engine. No. 1,401,862; Dec. 27.
Blackburn, William A., Detroit, Mich. Work-rest. No. 1,401,131; Dec. 27.
Blake, James, Buffalo, N. Y. Soldering-furnace. No. 1,401,514; Dec. 27.
Blakely, William W., Detroit, Mich. Anchoring device for wheeled vehicles. No. 1,401,3[illegible]; Dec. 27.
Blando, Frank, and S. Duca, New York, N. Y. Disk-cutting machine. No. 1,401,507; Dec. 27.
Blaschke, Charles. (See Berger, W., and Blaschke.)
Bleicken, Berthold, Gross-Borstel, near Hamburg, Germany. Apparatus for producing distilled water. No. 1,401,578; Dec. 27.
Bodin, Anton, Chesterton, Ind. Tag-locking device. No. 1,401,235; Dec. 27.
Bohan, Edward E. (See MacDougald, S. F., and Bohan.)
Bohli, Jacques. (See Billon, F., and Bohli.)
Boissonnault, G., Company. (See Boissonnault, Gaston, assignor.)
Boissonnault, Gaston, Hewlett, N. Y. Telephone-receiver. No. 1,401,753; Dec. 27.
Boissonnault, Gaston, Hewlett, assignor to G. Boissonnault Company, New York, N. Y. Telephone-transmitter. No. 1,401,754; Dec. 27.
Bokum, William F., and H. V. Coulston, assignors to Smith and Furbush Machine Company, Philadelphia, Pa., Garnett machine. No. 1,401,[illegible]3; Dec. 27.
Bolton, Walter G., Springfield, Mass. Oar. No. 1,401,864; Dec. 27.
Boltshauser, Heinrich, Zurich, Switzerland. Steam-turbine-driven locomotive. No. 1,401,808; Dec. 27.
Bonaccorso, Orazio, assignor of one-half to G. Lo Bue, Philadelphia, Pa. Automatic train-stopping apparatus. No. 1,401,755; Dec. 27.
Bond, Joseph T., assignor to Sealright Co, Inc., Fulton, N. Y. Paper-container machinery. No. 1,401,132; Dec. 27.
Boon, Wilfred L., North Attleboro, Mass. Adjustable drawing-board. No. 1,401,458; Dec. 27.
Bosch, John, and W. Kowaluk, Cleveland, Ohio. Stringed musical instrument. No. 1,401,865; Dec. 27.
Bozsykowski, Benno, Cleveland, Ohio. Production of threads. No. 1,401,943; Dec. 27.
Bösch, Frederick W., Camden, N. J., assignor to Worthington Pump and Machinery Corporation, New York, N. Y. Steam-engine. No. 1,401,866; Dec. 27.
Bösch, Frederick W., Camden, N. J., assignor to Worthington Pump and Machinery Corporation, New York, N. Y. Steam-engine. No. 1,401,867; Dec. 27.
Bösch, Frederick W., Camden, N. J., assignor to Worthington Pump and Machinery Corporation, New York, N. Y. Steam-engine. No. 1,401,868; Dec. 27.
Bosch, Robert, Aktiengesellschaft. (See Schäfer, M., and Kraus, assignors.)
Bowers, Clarence W., Heppner, Oreg. Automobile lifting mechanism. No. 1,401,869; Dec. 27.
Bradshaw, Samuel H. (See Brooks, Edward M., assignor.)
Bradt, Gustave H. (See Claussen, M., and Bradt.)
Brandenburg, Francis C., Piqua, Ohio. Cutter for emery-wheel-dressing tools. No. 1,401,966; Dec. 27.
Brandt, Edward J., Watertown, Wis. Coin-delivery apparatus. No. 1,401,133; Dec. 27.
Brandt, William H., Hubbard, Iowa. Closure device for egg-crates and the like. No. 1,401,236; Dec. 27.
Bräuning, Wilhelm, assignor to Deutsche Werke Aktiengesellschaft, Berlin, Germany. Firearm. No. 1,401,579; Dec.2
Breining, Harold W. (See Dority, R., and Breining.)
Brogan, Maurice P., Omaha, Nebr. Reflector. No. 1,401,870; Dec. 27.
Brower, James [illegible], St. Louis, Mo. Incubator. No. 1,401,756; Dec. 27.
Brown, Charles W., Indianola, Iowa. Machine-gun. No. 1,401,[illegible]7; Dec. 27.
Brown, Chester A., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Soldering-iron. No. 1,401,871; Dec. 27.
Brown, Enoch S., assignor of one-half to P. Scharlau, Warba, Minn. Hen's nest. No. 1,401,459; Dec. 27.
Brown, Kris, Baden, and A. Carrard, Ennetbaden, Switzerland, assignors to Aktiengesellschaft Brown, Boveri and Cie., Baden, Switzerland. Method and apparatus for regulating centrifugal compressors. No. 1,401,668; Dec. 27.
Brown, William F., Kansas City, Mo. Nut-lock. No. 1,401,757; Dec. 27.
Brooks, Edward M., assignor of one-half to S. H. Bradshaw, Fort Wayne, Ind. Window-fastener. No. 1,401,941; Dec. 27.
Brush, Alanson P., Detroit, Mich. Vehicle drive-axle. No. 1,401,[illegible]; Dec. 27.
Brush, Alanson P., Detroit, Mich. Vehicle drive-axle. No. 1,401,[illegible]1; Dec. 27.
Brush, Alanson P., and O. M. Nacker, Detroit, Mich. Vehicle-wheel. No. 1,401,[illegible]2; Dec. 27.
Bucher, John W. (See Groce, F. D., Akins, and Bucher.)
Buerger, Charles B., assignor to The Atlantic Refining Company, Philadelphia, Pa. Apparatus for removing coke from retorts. No. 1,401,310; Dec. 27.
Buescher, Ferdinand A., Elkhart, Ind. Key-pad for wind musical instruments. No. 1,401,872; Dec. 27.
Buffalo Steel Company, The. (See Daimler, Charles A., assignor.)
Buller Coupler Co. (See Buller, Jacob W., assignor.)
Buller, Jacob W., assignor to Buller Coupler Co., Hillsboro, Kans., Truck and trailer coupling. No. 1,401,873; Dec. 27.
Buncher, John H. (See Wright, Roland T., assignor.)
Burch Plow Works Company, The. (See Foster, Harry C., assignor.)
Burgess, Robert. (See Jones, Joseph H., assignor.)
Burke, William J., Youngstown, Ohio. Safety device. No. 1,401,874; Dec. 27.
Butler, Frank L., Chicago, Ill. Electric fixture. No. 1,401,460; Dec. 27.
Butterfield, Justus, Warren, Ind. Combined currycomb and brush. No. 1,401,114; Dec. 27.
Caesar, August, Seattle, Wash. Geographical clock. No. 1,401,[illegible]; Dec. 27.
Calhoun, Fredrick F., Tumwater, Wash. Combination pipe-wrench. No. 1,401,[illegible]; Dec. 27.
Capen Belting and Rubber Company. (See King, Charles E., assignor.)
Carey, Philip, Manufacturing Company, The. (See Moore, Albert E. F., assignor.)
Carlston, William A., Governors Island, N. Y. Eyeshade. No. 1,401,[illegible]; Dec. 27.
Carlson, Anton E., Merchantville, N. J. Valve-grinder. No. 1,401,[illegible]; Dec. 27.
Carpenter, Purva V., Worth, N. C. Spark-plug. No. 1,401,670; Dec. 27.
Carrard, Alfred. (See Brown, E., and Carrard.)
Carscallin, Charles A., assignor to American Steel Foundries, Chicago, Ill. Yoke for draft-gears. No. 1,401,811; Dec. 27.
Carter, Byron B., Hinsdale, assignor to C. D. Allen, Chicago, Ill. Fire-extinguisher. No. 1,401,135; Dec. 27.
Cartlidge, Frank, Claremont, N. H., assignor to Sullivan Machinery Company. Mining-machine truck. No. 1,401,759; Dec. 27.
Casgrain, Louis A., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Cementing apparatus. No. 1,401,237; Dec. 27.
Casmire, Frederick B. (See Roberts, Oren F., assignor.)
Castanie, William, Port Arthur, Tex. Chuck. No. 1,401,812; Dec. 27.
Celeda, William, Newark, N. J. Smoking-pipe. No. 1,401,876; Dec. 27.
Chaddock, George A., Liverpool, England. Weight-controlled airship. No. 1,401,461; Dec. 27.
Chappell, Howard F., New York, N. Y. Calcining alunite. No. 1,401,136; Dec. 27.
Chappell, Howard F., New York, N. Y. Calcining alunite. No. 1,401,137; Dec. 27.
Chase, Clarence C., Buda, Ill. Engine-lifter. No. 1,401,138; Dec. 27.
Christoph, George W., Warehousepoint, Conn. Exhauster. No. 1,401,583; Dec. 27.
Chryst, William A., Dayton, Ohio, assignor to The Dayton Engineering Laboratories Company. Ignition system. No. 1,401,313; Dec. 27.
Chryst, William A. (See Kettering, C. F., and Chryst, assignors.)
Chubb, Lewis W., Edgewood Park, Pa., assignor to Westinghouse Electric and Manufacturing Company. Emergency source of voltage. No. 1,401,671; Dec. 27.
Circle, Everett, Coalton, Okla. Shower-bath nozzle. No. 1,401,462; Dec. 27.
Cizek, Albert F., Seattle, Wash. Conduit device for tapping cans. No. 1,401,584; Dec. 27.

Cladin, Harry C., Cleveland, Ohio. Manufacture of screw-cutting oil. No. 1,401,760; Dec. 27.
Clancy, John, Kenner, La. Rail. No. 1,401,139; Dec. 27.
Clark, Elmer A., Joliet, assignor to W. B. Pratt, Chicago, Ill. Lifting-jack. No. 1,401,761; Dec. 27.
Clark, Harry H. and L. Schaumburger, Terre Haute, Ind. Foot-pedal for pneumatic door-operating mechanism. No. 1,401,875; Dec. 27.
Clark, Roy E., Earlham, Iowa. Operating device for valve-grinders. No. 1,401,814; Dec. 27.
Clark Thread Company, The. (See Clauss, Max O., assignor.)
Clark, William T., Philadelphia, Pa., assignor of one-half to E. W. Marshall, Yonkers, N. Y. Meter. No. 1,401,515; Dec. 27.
Clausen, Martin, San Francisco, and G. H. Bradt, Oakland, Calif., assignors, by mesne assignments, to Wizard Electric Lamp Company. Portable electric-lamp bracket. No. 1,401,672; Dec. 27.
Clauss, Max O., New York, N. Y., assignor to The Clark Thread Company, Newark, N. J. Winding skeins. No. 1,401,515; Dec. 27.
Clauss, Max O., New York, N. Y., assignor to The Clark Thread Company, Newark, N. J. Skein-winding mechanism. No. 1,401,516; Dec. 27.
Clauss, Max O., New York, N. Y., assignor to The Clark Thread Company, Newark, N. J. Skeining-machine. No. 1,401,517; Dec. 27.
Clauss, Max O., New York, N. Y., assignor to The Clark Thread Company, Newark, N. J. Skein-holder. No. 1,401,518; Dec. 27.
Clauss, Max O., New York, N. Y., assignor to The Clark Thread Company, Newark, N. J. Skein-binding mechanism. No. 1,401,519; Dec. 27.
Clauss, Max O., New York, N. Y., assignor to The Clark Thread Company, Newark, N. J. Article collecting and bundling mechanism. No. 1,401,520; Dec. 27.
Clauss, Max O., New York, N. Y., assignor to The Clark Thread Company, Newark, N. J. Skein. No. 1,401,521; Dec. 27.
Clauss, Max O., New York, N. Y., assignor to The Clark Thread Company, Newark, N. J. Skein supporting and folding means. No. 1,401,522; Dec. 27.
Cleaton, Lewis, Prairieville, Tex. Plow attachment. No. 1,401,877; Dec. 27.
Clement, George A., Mount Vernon, N. Y., assignor to General Optical Company. Multifocal lens. No. 1,401,238; Dec. 27.
Cleveland Dental Manufacturing Company, The. (See Risley, Sheridan, assignor.)
Cleveland Tractor Company, The. (See White, Rollin H., assignor.)
Cloud, James E. and H. F. Stalter, Harpster, Ohio. Flue-stop. No. 1,401,310; Dec. 17.
Coates, William, Newark, N. J. Heat-exchange system. No. 1,401,523; Dec. 27.
Cockburn, David and D. MacNicoll Cardonald, near Glasgow, Scotland. Engine stop-gear. No. 1,401,239; Dec. 27.
Colby, Christian M., Minneapolis, Minn. Dish-washing tool. No. 1,401,878; Dec. 27.
Colby, Ora A., Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company. Induction-heater. No. 1,401,673; Dec. 27.
Colby, Ora A., Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electric glass-annealing furnace. No. 1,401,674; Dec. 27.
Collins, Archie F. and V. D., Congers, N. Y. Spark-plug. No. 1,401,585; Dec. 27.
Collins, Virgil D. (See Collins, Archie F. and V. D.)
Columbia Graphophone Manufacturing Company. (See Scully, John J., assignor.)
Columbia Postal Supply Company. (See Slack, John W., assignor.)
Comings, William R., Surrey, England. Valve, faucet, and the like. No. 1,401,879; Dec. 27.
Commonwealth Steel Company. (See Harlow, Harry B., assignor.)
Compagnie Generale D'Electricite. (See Lecoultre, Ernest, assignor.)
Comstock, Archie R., Mount Kisco, N. Y. Electrical searching-coil. No. 1,401,586; Dec. 27.
Comstock, Harry, Sunland, Calif. Pump-jack. No. 1,401,317; Dec. 27.
Conrad, Nicholas J., assignor to Schweitzer & Conrad, Chicago, Ill. Protecting device for electric circuits. No. 1,401,881; Dec. 27.
Connelly, Douglas L., Leonia, N. J., assignor to W. L. Fleisher & Co., Inc., New York, N. Y. Nozzle. No. 1,401,880; Dec. 27.
Continental Rubber Works. (See Kelleher, Jeremiah, assignor.)
Cook, Samuel E., Spokane, Wash. Baker's oven. No. 1,401,392; Dec. 27.
Cook, Stanley S. (See Parsons, C. A., and Cook.)
Cooper, Daniel R., Gore, New Zealand, assignor of one-half to C. W. Anderson and F. L. Howorth, Wellington, New Zealand. Douche. No. 1,401,675; Dec. 27.
Coppola, Francesco, Elmira, N. Y. Car-door. No. 1,401,762; Dec. 27.
Cordes, Tobias J., San Francisco, Calif. Auto-lift. No. 1,401,403; Dec. 27.
Cornwall, Frederick R., assignor to The Emerson Electric Manufacturing Company, St. Louis, Mo. Electric switch. No. 1,401,587; Dec. 27.
Corson, Benjamin I., Minneapolis, Minn. Fire-extinguishing liquid. No. 1,401,240; Dec. 27.
Coster, Thomas J. (See Petersen, Peter, assignor.)
Couillard, Henri, Los Angeles, Calif. Film-cement holder and spreader. No. 1,401,318; Dec. 27.
Coulston, Herbert V. (See Bokum, W. F., and Coulston.)
Cowan, Richard S., assignor of one-half to G. Tower, Jr., St. Louis, Mo. Nut-cracking machine. No. 1,401,588; Dec. 27.
Cozzo, Lorenzo, Chicago, Ill. Door-opener. No. 1,401,882; Dec. 27.
Crabb, Victor, London, England. Dynamo-electric generator. No. 1,401,883; Dec. 27.
Cranage, Harry B., assignor of four-tenths to L. Fox, Leeds, England. Feeding motion for pressing and other machines. No. 1,401,884; Dec. 27.
Crawford, Charlotte E. (See Crawford, William H., assignor.)
Crawford, William H., assignor to C. E. Crawford, Los Angeles, Calif. Boom-drag-line excavator. No. 1,401,319; Dec. 27.
Crescent Belt Fastener Company. (See Voss, Clara S. E., assignor.)
Crespo, Joaquin, Mexico, Mexico. Composition of matter for impregnating articles made of paper, pasteboard, pulp, and similar material. No. 1,401,524; Dec. 27.
Cross, Silas H., Sacramento, Calif. Sheep-holding device. No. 1,401,393; Dec. 27.
Crotto, Frank E., Dallas, Tex., assignor to Reclamation Oil Producing Association. Well-washing device. No. 1,401,464; Dec. 27.
Crump, John B., Ballarat, Victoria, Australia. Apparatus for planting seed-potatoes. No. 1,401,885; Dec. 27.
Csanyi, Henry, New York, N. Y. Storage battery. No. 1,401,076; Dec. 27.
Culwell, Vinson S., and O. A. Bibb, Warrior, Ala. Float-controlled oil-gage. No. 1,401,140; Dec. 27.
Cunningham, Thomas, Philadelphia, Pa. Method and apparatus for stretching and pressing knit tubular fabrics. No. 1,401,589; Dec. 27.
Curtis, Homer P., assignor of one-half to The Plains Iron Works Company, Denver, Colo. Pipe-bending machine. No. 1,401,394; Dec. 27.
Daab, John A., New York, N. Y. Automobile-top closure. No. 1,401,395; Dec. 27.
Dade, Jesse E., Littlefork, assignor to Universal Safety Suit Co., Inc., Minneapolis, Minn. Protective suit. No. 1,401,677; Dec. 27.
D'Alessandro, Pietro, trustee. (See D'Alessandro, Pietro, assignor.
D'Alessandro, Pietro, Syracuse, N. Y., assignor to P. D'Alessandro, trustee. Powder-distributing brush. No. 1,401,508; Dec. 27.
Damon, William H., Los Angeles, Calif. Dispensing vessel. No. 1,401,763; Dec. 27.
Danielson, Arvid A., assignor to Dultmeier Manufacturing Company, Manning, Iowa. Hitch. No. 1,401,764; Dec. 27.
Danielsson, Axel, Stockholm, assignor to Nordiska Kullager Aktiebolaget, Gottenborg, Sweden. Journal-box for railway-cars and similar vehicles. No. 1,401,141; Dec. 27.
Darlington, Frederick, New York, N. Y., assignor to Westinghouse Electric & Manufacturing Company. Apparatus for nitrogen fixation. No. 1,401,678; Dec. 27.
Darling, Lewis A., assignor to Electric Service Supplies Company, Philadelphia, Pa. Speed-governor for engines or motor devices. No. 1,401,320; Dec. 27.
Darling, Lewis A., assignor to Electric Service Supplies Company, Philadelphia, Pa. Turbine and turbine-wheel. No. 1,401,321; Dec. 27.
Daughdrill, Kenneth W., Austin, Tex. Electric sign. No. 1,401,886; Dec. 27.
Davidson, John. (See Parkinson, G., and Davidson.)
Davidson, Ira M., Santa Paula, assignor of one-third to R. I. Moses, Los Angeles, Calif. Composite cylinder and rotary sleeve-valve motor. No. 1,401,322; Dec. 27.
Davison, W. C. (See Kell, Frank A., assignor.)
Davis, Bethuel M., Chicago, Ill. Speedometer. No. 1,401,396; Dec. 27.
Davis, Ernest W., Oak Park, Ill., assignor to The Bassick Manufacturing Co. Lubricating system. No. 1,401,765; Dec. 27.
Davis, John T. (See Rhorer, Homer M., and Davis.)
Davis, Robert H., London, England. Flow-meter for gases. No. 1,401,887; Dec. 27.
Davis Sewing Machine Company, The. (See Meyer, William H., assignor.)
Dawson, Arthur T., Westminster, London, and J. Horne, Barrow-in-Furness, assignors to Vickers Limited, Westminster, London, England. Ordnance. No. 1,401,241; Dec. 27.
Day, Herbert W., Wollaston, assignor to Spray Engineering Company, Boston, Mass. Tool for applying coating. No. 1,401,397; Dec. 27.
Dayton Engineering Laboratories Company, The. (See Chryst, William A., assignor.)
Dayton Engineering Laboratories Company. (See Kettering, Charles F., assignor.)
Dayton Engineering Laboratories Company. (See Kettering, C. F., and Chryst, assignors.)
Dayton Engineering Laboratories Company, The. (See Mooney, William H., assignor.)
Dean, James H., Chicago, Ill. Flour-sifter. No. 1,401,142; Dec. 27.

De Cew, Judson A., Mount Vernon, assignor to Process Engineers Incorporated, New York, N. Y. Electric-heating for paper. No. 1,401,251; Dec. 27.
Delandre, Rene L. J., Bois-Colombes, France. Apparatus for cutting tooth-gear-wheels. No. 1,401,323; Dec. 27.
Delaval, Maurice E., South Orange, N. J. Steam-turbine plant. No. 1,401,143; Dec. 27.
De Laval Separator Company, The. (See Alexander, Wallace, assignor.)
Delaware Chemical Engineering Company. (See du Pont, Francis I., assignor.)
De Lavaud, Dmitry S., New York, N. Y. Topographical recorder. No. 1,401,242; Dec. 27.
Delderowe, A. K., et al. (See Martin, Charles H., assignor.)
Del Turco, Louis, Newark, N. J. Divider for sanitarium doors. No. 1,401,590; Dec. 27.
Demoville, James L. (See Liggett, John C., assignor.)
Demountable Spring Tire Company. (See Schmeyer, Charles, assignor.)
De Saussure, Frank M., Jr., Greenville, S. C. Ladder. No. 1,401,496; Dec. 27.
Detachable Plow Share Edge Manufacturing Company. (See Northquist, Peter A., assignor.)
Deutsche Werke Aktiengesellschaft. (See Brüning, Wilhelm, assignor.)
Devenon, William E. (See Mann, James, assignor.)
De Voe, Albert H., Westfield, N. J., assignor to The Singer Manufacturing Company. Thread-severing mechanism for sewing-machines. No. 1,401,495; Dec. 27.
De Voe, Albert H., Westfield, N. J., assignor to The Singer Manufacturing Company. Needle-clamp. No. 1,401,498; Dec. 27.
De Voe, William E., assignor to The Underfeed Stoker Company of America, Detroit, Mich. Underfeed furnace. No. 1,401,838; Dec. 27.
Dicks Stamping Co. (See Dicks, William, assignor.)
Dicks, William, assignor to Dicks Stamping Co., Inc., Buffalo, N. Y. Holder for Christmas-trees and the like. No. 1,401,144; Dec. 27.
Di Giacomo, Michael J., Wilmington, Del. Spark-plug. No. 1,401,151; Dec. 27.
Dillin, Dudley F., North Canton, assignor to The Hoover Suction Sweeper Company, New Berlin, Ohio. Brush-holder. No. 1,401,679; Dec. 27.
Dillon, Guy, Indianapolis, Ind., assignor, by mesne assignments, to Simmons Company, Kenosha, Wis. Mattress-tufting machine. (Reissue.) No. 15,253; Dec. 27.
Diesk, John, Berwyn, assignor to U. S. Ball Bearing Mfg. Co., Chicago, Ill. Machine for filling ball-retainers. No. 1,401,680; Dec. 27.
Dodds, Ethan I. (See Flannery, J. R., and Dodds.)
Dodge, William W., Washington, D. C. Jar-closure. No. 1,401,467; Dec. 27.
Doehler, Augustine. (See Matthews, George S., assignor.)
Doggett, Allen B., Brooklyn, N. Y. Drawing instrument. No. 1,401,591; Dec. 27.
Donaldson, David, Leith, Scotland. Device for electrically heating hand-irons. No. 1,401,592; Dec. 27.
Donnelly, William T., Brooklyn, N. Y. Wooden ship. No. 1,401,880; Dec. 27.
Dority, Ralph, Washington, D. C., and H. W. Breining, Brooklyn, N. Y., assignors of one-third to G. E. Ijams. Combined statement and return envelop. No. 1,401,324; Dec. 27.
Downie, Robert M., assignor to Keystone Driller Company, Beaver Falls, Pa. Deep-well pump. No. 1,401,681; Dec. 27.
Doxford, Robert P. (See Keller, Karl O., assignor.)
Doyle, William T., assignor to Sturtevant Mill Company, Boston, Mass. Manufacturing acid phosphate or superphosphate. No. 1,401,527; Dec. 27.
Drachenberg, August T., Gulf, Tex. Mining sulfur. No. 1,401,593; Dec. 27.
Drolshammer, Gustav, Hamar, assignor of one-half to I. Drolshammer, Drammen, Norway. Adjustable brake arrangement operated by compressed fluid adapted to be used in railway-trains or the like. No. 1,401,325; Dec. 27.
Drolshammer, Ivar. (See Drolshammer Gustav, assignor.)
Drowne, Edmond E., assignor to The National Acme Company, Cleveland, Ohio. Reversible tap and die holder. No. 1,401,594; Dec. 27.
Duca, Sante. (See Biando, F., and Duca.)
Duffy, James P. B. (See Murphy, Thomas J., assignor.)
Duke, Joseph E., Birmingham, Ala. Coupling for mine-cars. No. 1,401,590; Dec. 27.
Dultmeier Manufacturing Company. (See Danielson, Arvid A., assignor.)
Duncan, Charles, Montreal, Quebec, Canada. Electric switch construction. No. 1,401,891; Dec. 27.
Duncan, Joseph T., Long Beach, Calif. Steering device for automobiles. No. 1,401,898; Dec. 27.
Du Pont E. I. de Nemours & Company. (See Haon, Harry J., assignor.)
Du Pont, E. I., de Nemours & Company. (See Kessler, Johannes M., assignor.)
Du Pont, E. I., de Nemours & Company. (See Moran, Robert C., assignor.)
Du Pont, Francis I., assignor to Delaware Chemical Engineering Company, Wilmington, Del. Water-level regulator for steam-boilers. No. 1,401,892; Dec. 27.
Du Pont, Francis I., assignor to Delaware Chemical Engineering Company, Wilmington, Del. Means for preventing the formation of scale in steam-boilers. No. 1,401,893; Dec. 27.
Du Pont, Francis I., assignor to Delaware Chemical Engineering Company, Wilmington, Del. Water-level regulator for steam-boilers. No. 1,401,894; Dec. 27.
Dura Mechanical Hardware Company. (See Hutchinson, Stanley W., assignor.)
Dusha, Paul L., New York, and A. Feyk, Bayonne, assignors to Hoyt-Dusha Co., New York, N. Y. Cutter-sorting machine. No. 1,401,895; Dec. 27.
Edgar, Frank L., Waterbury, Conn. Artificial fingers. No. 1,401,243; Dec. 27.
Eastlund, Frank, Omaha, Nebr. Bucket-thee-support. No. 1,401,244; Dec. 27.
Eberhardt, Walter. (See Herschede, W. J., and Eberhardt.)
Eberle, John A., St. Louis, Mo. Child's swing. No. 1,401,905; Dec. 27.
Edison Machine Company. (See McGrath, William L., assignor.)
Edgar Steel Seal & Mfg. Co. (See Edgar, William K., assignor.)
Edgar, William K., assignor to Edgar Steel Seal & Mfg. Co., Lawrence, Kans. Seal. No. 1,401,529; Dec. 27.
Ehrhart, George L., Womelsdorf, Pa. Handle. No. 1,401,906; Dec. 27.
Elder, Frank B., Fort Wayne, Ind., assignor to Tokheim Oil Tank and Pump Company, Measure for dispensing liquids. No. 1,401,907; Dec. 27.
Electric Hose and Rubber Company, The. (See Grilli, Alvah M., assignor.)
Electric Service Supplies Company. (See Darling, Lewis A., assignor.)
Elite Frame Company. (See Weber, Harry M., assignor.)
Emerson Electric Manufacturing Company. (See Cornwall, Frederick G., assignor.)
Erat, Adolph, Easthampton, Mass. Non-skid device for automobiles. No. 1,401,245; Dec. 27.
Erhard, Robert P., Juniata, Pa. Eyeglasses or spectacles. No. 1,401,327; Dec. 27.
Erwin, Orlando R., New York, N. Y., and H. V. Gloe, Chicago, Ill., assignors to Foamite Firefoam Company, New York, N. Y. Fire-extinguishing device. No. 1,401,328; Dec. 27.
Essex Motors. (See Fekete, Stephen I., assignor.)
Everett, Edward A., Long Island City, N. Y. Lightning arrester. No. 1,401,596; Dec. 27.
Everett, John H. D., Waukegan, Ill. Safety-razor. No. 1,401,765; Dec. 27.
Everson, Oscar, Hibbing, Minn. Sight feed oil-pump. No. 1,401,143; Dec. 27.
Ewing, Howard M., Los Angeles, Calif., assignor to Famous Players-Lasky Corporation. Light-dissolver. No. 1,401,329; Dec. 27.
Faccioli, Giuseppe, Pittsfield, Mass., assignor to General Electric Company. Electrical distributing system. No. 1,401,642; Dec. 27.
Falconer, William W. P., London, England. Device for measuring the range of movement of human joints. No. 1,401,146; Dec. 27.
Famous Players-Lasky Corporation. (See Ewing, Howard M., assignor.)
Farness, Benjamin, De Forest, Wis. Form for hollow concrete walls. No. 1,401,898; Dec. 27.
Farnsworth, Earl H. (See Farnsworth, Willis S. and E. H.)
Farnsworth, Willis S. and E. H., San Francisco, Calif. Dirigible spotlight. No. 1,401,246; Dec. 27.
Farr, Herbert H., U. S. Army. Loading feed-belts for machine-guns. No. 1,401,147; Dec. 27.
Fekete, Stephen I., assignor to Essex Motors, Detroit, Mich. Piston for internal-combustion engines. No. 1,401,899; Dec. 27.
Feyk, Anton. (See Dusha, P. F., and Feyk.)
Finch, Maurice S., assignor to Specialty Shoe Machinery Company, St. Joseph, Mo. Machine for feeding and driving nails. No. 1,401,767; Dec. 27.
Fisher Body Corporation. (See Simpson, Emory G., assignor.)
Fisher, Mose, Plain, N. Mex. Vehicle-wheel spindle. No. 1,401,900; Dec. 27.
Flitta, James L., Merchantville, assignor to Warren Webster & Company, Camden, N. J. Volume-regulating valve. No. 1,401,468; Dec. 27.
Flannery Bolt Company. (See Flannery, J. R., and Dodds, assignors.)
Flannery Bolt Co. (See Landgraf, Frederick K., assignor.)
Flannery, John B., Pittsburgh, Pa., and E. I. Dodds, Central Valley, N. Y., assignors to Flannery Bolt Company, Pittsburgh, Pa. Staybolt structure. No. 1,401,683; Dec. 27.
Flannery, John B., Pittsburgh, Pa., and E. I. Dodds, Central Valley, N. Y., assignors to Flannery Bolt Company, Pittsburgh, Pa. Staybolt structure. No. 1,401,684; Dec. 27.
Fleisher, W. L., & Co. (See Connelly, Douglas L., assignor.)
Fletcher, Joseph H., assignor to Perfection Auto Window Company, Los Angeles, Calif. Window for fabric walls. No. 1,401,523; Dec. 27.
Förderer, Albert E., New York, N. Y. Machine-gun. No. 1,401,768; Dec. 27.

Foamite Firefoam Company. (See Erwin, O. R., and Gloe, assignors.)
Fodge, Gustav, Hoquiam, Wash. Saw. No. 1,401,529; Dec. 27.
Fogde, Mathias, and L. P. Southwick, Richmond, Va., assignors, by mesne assignments, to Stokes & Smith Company, Philadelphia, Pa. Charge-forming and positioning apparatus. No. 1,401,637; Dec. 27.
Fogde, Mathias, and L. P. Southwick, Richmond, Va., assignors, by mesne assignments, to Stokes & Smith Company, Philadelphia, Pa. Stamping-machine. (Reissue.) No. 15,254; Dec. 27.
Foote, Thomas W., Cleveland, assignor to The Marble & Shattuck Chair Company, Bratenahl, Ohio. Interlocking chair-base. No. 1,401,330; Dec. 27.
Foote, Thomas W., East Cleveland, Ohio. Machine for shing dowel-pins and the like. No. 1,401,331; Dec. 27.
Forbes, Edward, Webster, Mass. Bleaching composition. No. 1,401,901; Dec. 27.
Ferding, William G., Cleveland, Ohio. Tire. No. 1,401,146; Dec. 27.
Forshee, Frank F., Flint, Mich., assignor to Westinghouse Electric Products Company. Electric waffle-iron. No. 1,401,683; Dec. 27.
Fortin, Paul R., Schenectady, N. Y., assignor to General Electric Company. Protective device. No. 1,401,635; Dec. 27.
Foster, Harry C., Dayton, assignor to The Burch Plow Works Company, Crestline, Ohio. Combined spreader and roller. No. 1,401,149; Dec. 27.
Fox, Louis. (See Cranage, Harry B., assignor.)
Francombe, Victory P. (See Sodeau, W. H., and Francombe.)
Freeman, Walter B. (See Kohler, C. W., Hoffman, and Freeman.)
Frei, Fritz, Berne, Switzerland. Electric heating device for plunging. No. 1,401,686; Dec. 27.
Frey, Harvey S., Reading, Pa. Auxiliary brake for motor-vehicles. No. 1,401,507; Dec. 27.
Fruwirth, Arthur, Brooklyn, N. Y. Process or copying camera. No. 1,401,902; Dec. 27.
Gahl, Rudolf, Miami, Ariz., assignor, by mesne assignments, to Pneumatic Process Flotation Company, New York, N. Y. Flotation apparatus. No. 1,401,598; Dec. 27.
Galbreth, J. L. (See Pells, Samuel, assignor.)
Garner, Henry and J. P., Birmingham, England. Wheel of motor-tractors. No. 1,401,530; Dec. 27.
Garner, James P. (See Garner, Henry and J. P.)
Gassar, Arthur D., Waukesha, Wis. Envelop shipping-label. No. 1,401,899; Dec. 27.
Gassar, Frank Cupar, Saskatchewan, Canada. Cable and telephone-wire containing rails. No. 1,401,531; Dec. 27.
Gawthrop, Pearle R., Sr., Adrian, W. Va. Water or muck bailer. No. 1,401,903; Dec. 27.
Geer, Frederick M. (See Geer, Harris S., assignor.)
Geer, Harris S., assignor of one-half to F. M. Geer, Troy, N. Y. Folding clothes-rack. No. 1,401,532; Dec. 27.
General Electric Company. (See Beman, Ralph, assignor.)
General Electric Company. (See Faccioli, Giuseppe, assignor.)
General Electric Company. (See Fortin, Paul R., assignor.)
General Electric Company. (See Rice, Chester W., assignor.)
General Electric Company. (See Wilkinson, James, assignor.)
General Fuel Apparatus Corporation. (See Hoffman, William M., assignor.)
General Optical Company. (See Clement, George A., assignor.)
Gentry, Burner C., Freeport, Tex. Traction-support. No. 1,401,630; Dec. 27.
Geyer, John F., Philadelphia, Pa. Machine for filling bottles, &c. No. 1,401,150; Dec. 27.
Greenlee Bros. & Co. (See Hawkinson, Adolph H., assignor.)
Giles, Harvey, Brooklyn, assignor to A. Ward, New York, N. Y. Coin-controlled vending-machine. No. 1,401,533; Dec. 27.
Gillespie Eden Corporation. (See Townsend, George R., assignor.)
Glasner, Rudolph W. (See Strand, David, assignor.)
Gloe, Harold V. (See Erwin, O. R., and Gloe.)
Godfrey, Harold H., Los Angeles, Calif. Apparatus for extracting metal from ore and the like. No. 1,401,769; Dec. 27.
Goddu, George, Winchester, and F. L. Mackenzie, Beverly, Mass., assignors, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Machine for inserting fastenings. No. 1,401,247; Dec. 27.
Goddu, George, Winchester, and F. L. Mackenzie, Beverly, Mass., assignors to United Shoe Machinery Corporation, Paterson, N. J. Work-positioning mechanism. No. 1,401,248; Dec. 27.
Goddu, George, Winchester, and F. L. Mackenzie, Beverly, Mass., assignors to United Shoe Machinery Corporation, Paterson, N. J. Machine for inserting fastenings. No. 1,401,249; Dec. 27.
Golden, Robert, Brooklyn, N. Y. Clasp for documents, &c. No. 1,401,770; Dec. 27.
Gold, Samuel M. (See Rachillo, Max, assignor.)
Goldstein, Charles, Chicago, Ill., assignor to P. V. Spinner. Loose-leaf binder. No. 1,401,250; Dec. 27.
Goodrich, B. F., Company, The. (See Kohler, C. W., Hoffman, and Freeman, assignors.)
Gould, Edwin J., and W. Pressler, Fruitvale, assignor to Modern Mechanical Engineering Company, Alameda, Calif. Auxiliary autocar-drive. No. 1,401,680; Dec. 27.
Gouldbourn, Joseph, Leicester, England, assignor to United Shoe Machinery Corporation, Paterson, N. J. Fastener-setting machine. No. 1,401,251; Dec. 27.
Green, Andrew W., Toronto, Ontario, Canada. Floor-finishing apparatus. No. 1,401,400; Dec. 27.
Green, Pleas W., Egypt, Miss. Harrow. No. 1,401,332; Dec. 27.
Green, Samuel G., United States Army. Cartridge-holder. No. 1,401,152; Dec. 27.
Griffin, Alvah M., assignor to The Electric Hose and Rubber Company, Wilmington, Del. Coil of rubber hose and the process of coiling. No. 1,401,904; Dec. 27.
Groene, William F., assignor to The R. K. Le Blond Machine Tool Company, Cincinnati, Ohio. Taper attachment for lathes. No. 1,401,534; Dec. 27.
Groener, Gerald D. (See Sharples, D. T., and Groener.)
Grossenbacher, Ernest, Fajardo, Porto Rico. Automatic regulator for fuel oil burners. No. 1,401,509; Dec. 27.
Gross, Frederick D., R. P. Akins, and J. W. Bucher, Denver, Colo. Flotation apparatus and process. No. 1,401,535; Dec. 27.
Gross, Frederick D., R. P. Akins, and J. W. Bucher, Denver, Colo. Roller-bearing for tire and trunnion type mills. No. 1,401,536; Dec. 27.
Gunby, James W., Ridgefield Park, N. J. Method and machine for drying, cleaning, and polishing moving-picture films. No. 1,401,771; Dec. 27.
Gwyer, Herbert J., Yonkers, N. Y. Leg construction. No. 1,401,772; Dec. 27.
Haldeman, Paul C., assignor to Lockens Steel Company, Coatesville, Pa. Stripper for rolling-mills. No. 1,401,773; Dec. 27.
Hall, C. M., Lamp Company. (See Watson, Harvey L., assignor.)
Halleck, Frank A., Oak Park, Ill., assignor to Sullivan Machinery Company. Heat-exchange device. No. 1,401,717; Dec. 27.
Halliwell, Arthur, Cleveland, Ohio. Adjustable auto-lamp. No. 1,401,153; Dec. 27.
Halpern, Carl, Newark, N. J. Safety appliance for vehicles. No. 1,401,774; Dec. 27.
Hankins, John C., Detroit, Mich. Harness. No. 1,401,600; Dec. 27.
Hanson, Louis S., Lewistown, Mont. Radiator-shutter. No. 1,401,905; Dec. 27.
Haon, Harry J., Newburgh, N. Y., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Making automobile-door panels. No. 1,401,691; Dec. 27.
Haluska, Andrew, Whiting, Ind. Provision-safe support. No. 1,401,776; Dec. 27.
Halvorsen, Halbert B., Chicago, Ill., assignor to Sullivan Machinery Company. Compressor-unloading mechanism. No. 1,401,944; Dec. 27.
Harlow, Harry B., Alton, Ill., assignor to Commonwealth Steel Company, St. Louis, Mo. Molding apparatus. No. 1,401,601; Dec. 27.
Harris, Warren E., Emmett, Idaho. Calculating device. No. 1,401,692; Dec. 27.
Hartford, Edward V., Inc. (See Hartford, Edward V., assignor.)
Hartford, Edward V., Deal, N. J., assignor to E. V. Hartford, Inc., New York, N. Y. Spring-retarding device. No. 1,401,262; Dec. 27.
Hartford-Fairmont Company. (See Peller, Karl E., assignor.)
Hartman, Louis H., assignor to The Valve Bag Company, Toledo, Ohio. Automatic receptacle-filling machine. No. 1,401,401; Dec. 27.
Hatton, Manson C., Ontario, Calif. Stopper for washbowls and the like. No. 1,401,776; Dec. 27.
Haugh, James G., Bascom, Ohio. Seesaw and the like. No. 1,401,906; Dec. 27.
Hawkinson, Adolph H., assignor to Greenlee Bros. & Co., Rockford, Ill. Mortising-tool. No. 1,401,469; Dec. 27.
Haworth, Walter N., and J. C. Irvine, St. Andrews, Scotland. Preparation of dimethyl sulfate. No. 1,401,693; Dec. 27.
Hawthorne, Ellsworth A., Bridgeport, Conn. Bracket. No. 1,401,402; Dec. 27.
Hayes, Robert M. (See Reeves, Joseph T., assignor.)
Healey, George R., Los Angeles, Calif. Asbestos tablemat. No. 1,401,333; Dec. 27.
Heaton, Herman C., Berwyn, Ill., assignor to The Babcock & Wilcox Company, Bayonne, N. J. Steam-boiler furnace and operating the same. No. 1,401,253; Dec. 27.
Hedstrom, John P., assignor to Machinery Company of America, Big Rapids, Mich. Saw-swage. No. 1,401,694; Dec. 27.
Hedstrom, John P., assignor to Machinery Company of America, Big Rapids, Mich. Saw-tooth shaper. No. 1,401,695; Dec. 27.
Hedstrom, John P., assignor to Machinery Company of America, Big Rapids, Mich. Saw-grinding machine. No. 1,401,696; Dec. 27.
Helder, Henry J., Carroll, Iowa. Stepladder. No. 1,401,470; Dec. 27.

Heidt, Jacob G., Evansville, Ind. Ire-tongs. No. 1,401,777; Dec. 27.
Heinze, Edmund, St. Louis, Mo., assignor to Acme Mfg. Co., Chicago, Ill. Two-piece axle-support for correcting metatarsal foot troubles. No. 1,401,254; Dec. 27.
Heller, Henry R., New York, N. Y., assignor to Winter & Co. Player-piano actions. No. 1,401,778; Dec. 27.
Hemphill Company. (See Lawson, John, assignor.)
Hendel, Paul, High Ridge, Mo. Turning shovel-plow. No. 1,401,779; Dec. 27.
Hennenger, Philip E., Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company. Commutating-pole construction. No. 1,401,597; Dec. 27.
Hensel, Otto W., Lakefield, Minn. Posthole auger. No. 1,401,780; Dec. 27.
Henton, H. Benton. (See O'Brien, Harry B., assignor.)
Hering, Alfonso, Brooklyn, N. Y. Reversible typewriter-type. No. 1,401,471; Dec. 27.
Herrington, Freeman, Lawrence, Kans. Composition of matter for filling, polishing, and finishing floors, woodwork, and other unpolished surfaces. No. 1,401,947; Dec. 27.
Herschede, Walter J., and W. Eberhardt, Cincinnati, Ohio. Machine for grinding glass plates. No. 1,401,605; Dec. 27.
Herschede, Walter J., and W. Eberhardt, Cincinnati, Ohio. Feed mechanism for grinding-machines. No. 1,401,606; Dec. 27.
Hess-Bright Manufacturing Company, The. (See Runge, Robert F., assignor.)
Hess, Henry, Philadelphia, Pa. Soldering flux. No. 1,401,154; Dec. 27.
Hessler, John O. (See Richer, J. R., and Hessler.)
Heuser, Herman, Evanston, Ill. Preparing low alcoholic and non-alcoholic beverages. No. 1,401,700; Dec. 27.
Hibbs, Cassel D., Fort Worth, Tex. Mold for making fan-belts. No. 1,401,255; Dec. 27.
Hill, James D., Scottdale, Pa. Aircraft-propeller. No. 1,401,537; Dec. 27.
Hill, Nels, St. Paul, Minn. Snowplow. No. 1,401,256; Dec. 27.
Hilpert, Meier G., Harrisburg, assignor to Bethlehem Steel Bridge Corporation, Bethlehem, Pa. Transfer table driving mechanism. No. 1,401,334; Dec. 27.
Hines, Frank W., Washington, D. C. Lighting arrangement for automobiles. No. 1,401,602; Dec. 27.
Hoffman, Harry A. (See Kohler, C. W., Hoffman, and Freeman.)
Hoffman, William M., assignor to General Fuel Apparatus Corporation, Buffalo, N. Y. Hydrocarbon-burner. No. 1,401,403; Dec. 27.
Hoffman, William M., assignor to General Fuel Apparatus Corporation, Buffalo, N. Y. Hydrocarbon-burner. No. 1,401,404; Dec. 27.
Holcomb, William J., Bellefontaine, Ohio. Combination-lock for car-doors. No. 1,401,701; Dec. 27.
Holdsworth, Fred D., Claremont, N. H., assignor to Sullivan Machinery Company. Compressor. No. 1,401,603; Dec. 27.
Holdsworth, Fred D., Claremont, N. H., assignor to Sullivan Machinery Company. Compressor-controlling mechanism. No. 1,401,908; Dec. 27.
Hole, Morris C., Pasadena, Calif. Pipe-screwing machine. No. 1,401,405; Dec. 27.
Holliday, William J. (See Schaf, J. C., Jr., and Holliday.)
Hollis, Rey, Santa Barbara, Calif. Cushion for head rests. No. 1,401,406; Dec. 27.
Holmes, Howard R., Montrose, Iowa. Corn-harvester. No. 1,401,781; Dec. 27.
Holmes, John E. C., Ottawa, Ontario, Canada. Electric heater. No. 1,401,472; Dec. 27.
Holmes, John T. (See Jordan, V., and Holmes.)
Holmes, Walter G. (See Knapp, K. W., and Holmes.)
Holub-Dusha Co. (See Dusha, P. F., and Feyk, assignors.)
Hoofer, Charles F., Chicago, Ill. Pneumatic control for lubricators. No. 1,401,473; Dec. 27.
Hoover Suction Sweeper Company, The. (See Dillis, Dudley F., assignor.)
Horne, James. (See Dawson, A. T., and Horne.)
Houghtaling, William, Chappaqua, N. Y. Extension and combination stepladder. No. 1,401,257; Dec. 27.
Howorth, Florena L., *et al.* (See Cooper, Daniel R., assignor.)
Hubbard, William, Rochester, N. Y., assignor to United Shoe Machinery Corporation, Paterson, N. J. Making shoes. No. 1,401,258; Dec. 27.
Hughes, James W., Haddon Heights, N. J., assignor to S. Nelson and I. Avart, Philadelphia, Pa. Box-making machine. No. 1,401,407; Dec. 27.
Hughes Steel Equipment Co. (See Lindsey, John H., Sr., assignor.)
Hull, Emma, *et al.* (See Martin, Charles H., assignor.)
Hull, Henry M., Fairfield, Conn. Beater. No. 1,401,408; Dec. 27.
Hurt, James W., York, Nebr. Grain-elevator. No. 1,401,909; Dec. 27.
Husser, Julius A., Cleveland, Ohio. Automobile-radiator. No. 1,401,604; Dec. 27.
Husted, Monroe G., Bridgeton, N. J. Lathe attachment. No. 1,401,702; Dec. 27.
Hyre, Jacob E., Urbana, Ill. Eaves-trough and support. No. 1,401,703; Dec. 27.
Ihrig, Justus K. (See Ihrig, Peter J., assignor.)
Ihrig, Peter J., assignor of one-half to J. K. Ihrig, Springfield, Ohio. Portable tree-holder. No. 1,401,255; Dec. 27.
Illum, George E. (See Dority, B., and Breining, assignors.)
Ingersoll-Rand Company. (See Bayles, Lewis C., assignor.)
Ingersoll-Rand Company. (See Paterson, Frederick W., assignor.)
International Cork Company. (See Alberti, Emilio and J., assignors.)
Irvine, James C. (See Haworth, W. S., and Irvine.)
Irving, Thomas W., Aspatria, England. Antitheft-lock for automobiles. No. 1,401,435; Dec. 27.
Iako Company, The. (See McCann, Charles L., assignor.)
Iverson, Lorenz, Pittsburgh, Pa. Gear-drive for rolling-mills. No. 1,401,890; Dec. 27.
Jackson, Ingwald J., Duluth, Minn. Holder. No. 1,401,474; Dec. 27.
Jackson, Silas H., Cleveland, Ohio. Excavating-bucket. No. 1,401,782; Dec. 27.
Jacoby, Frank C., Newport, Ark. Rotary conveyer. No. 1,401,155; Dec. 27.
Jaquery, George H., Philadelphia, Pa. Stereotype press. No. 1,401,609; Dec. 27.
Jenkins, Charles F., Washington, D. C., assignor to Motor-Mower Company, Detroit, Mich. Lawn-mower. No. 1,401,155; Dec. 27.
Jenkins, David R., Oakland, Calif. Window-sash tightener for vehicle-tops. No. 1,401,606; Dec. 27.
Jensen Manufacturing Co. (See Jensen, Walter E., assignor.)
Jensen, Walter E., San Diego, assignor to Jensen Manufacturing Co., Los Angeles, Calif. Mixing device. No. 1,401,475; Dec. 27.
Jerone, Don Angelo, Florence, Italy. Moisture-proof paint composition. No. 1,401,261; Dec. 27.
Johansson, Carl E. (See Aldeborgh, Erik H., assignor.)
Johnson, August, Portland, Oreg. Grate-bar. No. 1,401,753; Dec. 27.
Johnson, Leonard T., Boston, Mass. Scale. No. 1,401,704; Dec. 27.
Johnson, Louis V., Fort Worth, Tex. Rotary engine. No. 1,401,856; Dec. 27.
Johnson, Wiley B. (See Mitchell, John R., assignor.)
Jones, Clyde M., Sacramento, Calif. Weather-strip. No. 1,401,409; Dec. 27.
Jones, Joseph H., Winthrop, assignor of one-half to H. Burgess, Newton Center, Mass. Cap-spinning frame. No. 1,401,705; Dec. 27.
Jordan, Virgil, and J. T. Holmes, Louisville, Ky. Gymnastic apparatus. No. 1,401,476; Dec. 27.
Jouffret, Henri V. J., Neuilly-sur-Seine, assignor to The Society "Anciens Etablissements Cail-cott Freres," Paris, France. Engine or motor. No. 1,401,784; Dec. 27.
Kahn, Fred, Tonganoxie, Kans. Ignition and scavenging means for internal-combustion engines. No. 1,401,706; Dec. 27.
Kaiser, Leon L., Lodi, Calif. Speed-table. No. 1,401,785; Dec. 27.
Kalman, Louis O., and A. S. Shapiro, Montreal, Quebec, Canada. Auto safety-lamp. No. 1,401,410; Dec. 27.
Kampmann, Gerhardt S. R., Taulov Station, Denmark, assignor to Naamlooze Vennootschap Handel Maatschappij "Planeet," The Hague, Netherlands. Lock. No. 1,401,910; Dec. 27.
Kapferer, Henry, Boulogne-sur-Seine, France. Trailer. No. 1,401,791; Dec. 27.
Karmire, William J., assignor to E. A. Swain, Shelbyville, Ind. Jointing-equaliser for woodworking. No. 1,401,787; Dec. 27.
Kebler, Leonard, Brunxville, N. Y., assignor to Ward Leonard Electric Company. Resistance unit. No. 1,401,477; Dec. 27.
Kehrman, John F., Bonne Terre, Mo. Railway motor-car. No. 1,401,607; Dec. 27.
Kell, Frank A., assignor of one-fourth to W. C. Davison, St. Louis, Mo. Car-mover. No. 1,401,411; Dec. 27.
Kelleter, Jeremiah, assignor to Continental Rubber Works, Erie, Pa. Rubber mat. No. 1,401,788; Dec. 27.
Keller, Fred, Jr., Pittsburgh, Pa. Rotary internal-combustion engine. No. 1,401,478; Dec. 27.
Keller, Karl O., assignor of one-half to R. P. Dorfort, Sunderland, Durham, England. Fuel-spraying nozzle for internal-combustion engines. No. 1,401,911; Dec. 27.
Kelly, William M., Jersey City, N. J. Paper-feeding mechanism. No. 1,401,707; Dec. 27.
Kellogg Switchboard and Supply Company. (See Wales, Alfred H., assignor.)
Kemerer, Willard H., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Commutator-cylinder. No. 1,401,708; Dec. 27.
Kendall Products Corporation. (See Pearson, Herbert P., assignor.)
Kennedy, Otis M., Philadelphia, Pa. Dust-cleaning suction-pump. No. 1,401,789; Dec. 27.
Kent, Franklin P., Lyons, Kans. Harp. No. 1,401,158; Dec. 27.
Kernahan, David, Belfast, Ireland. Heel-grip for shoes. No. 1,401,790; Dec. 27.
Kettering, Charles F., Dayton, Ohio, assignor to The Dayton Engineering Laboratories Company. Ignition system. No. 1,401,479; Dec. 27.
Kessler, Johannes M., West Orange, N. J., assignor to E. I. du Pont de Nemours & Company. Purification of crude synthetic camphor. No. 1,401,709; Dec. 27.

Kessler, William, Spokane, Wash. Change-speed mechanism. No. 1,401,536; Dec. 27.
Kettering, Charles F., and W. A. Chryst, Dayton, Ohio, assignors to The Dayton Engineering Laboratories Company. Electrical system for engines. No. 1,401,537; Dec. 27.
Keyes Fibre Company. (See Williamson, Bert R., assignor.)
Keystone Driller Company. (See Downie, Robert M., assignor.)
King, Charles E., assignor to Capen Belting and Rubber Company, St. Louis, Mo. Manufacturing endless V-shaped or angular belts. No. 1,401,450; Dec. 27.
Kingsley, Bruce G., Los Angeles, Calif. Illuminating attachment for keyboard musical instruments. No. 1,401,908; Dec. 27.
Kinnear Manufacturing Company, The. (See McCloud, Edward H., assignor.)
Kirschbraun, Lester, Evanston, Ill. Waterproof composition. No. 1,401,791; Dec. 27.
Klein, Dee, Gillespie, Ill. Mixer. No. 1,401,600; Dec. 27.
Klein, George C., Houston, Tex. Faucet. No. 1,401,412; Dec. 27.
Klein, Otto G., Ste. Genevieve, Mo. Envelop. No. 1,401,792; Dec. 27.
Knapp, Karl W., Des Moines, Iowa, and W. G. Holmes, Minneapolis, assignors to M. F. Patterson Dental Supply Company, St. Paul, Minn. Heating device. No. 1,401,793; Dec. 27.
Knapp, Walter C., and H. T. Lockman, Rochester, N. Y., assignors to Liberty Bread Slicer, Inc., Brighton Station, Rochester, N. Y. Slicing-machine. No. 1,401,539; Dec. 27.
Knowles, Frank W., Portland, Oreg. Beet-harvesting machine. No. 1,401,413; Dec. 27.
Koch, Wehner A., *et al.* (See Bertrand, John A., assignor.)
Kofl, Samuel, New York, N. Y. Box. No. 1,401,794; Dec. 27.
Kohler, Charles W., H. A. Hoffman, Akron, and W. R. Freeman, Cuyahoga Falls, Ohio, assignors to The B. F. Goodrich Company, New York, N. Y. Method and apparatus for separating rubber and fiber. No. 1,401,795; Dec. 27.
Konig, William F., assignor of one-half to J. C. McCann, San Francisco, Calif. Rat-guard. No. 1,401,540; Dec. 27.
Konrad, Otto, Oshkosh, Wis. Foldable bed. No. 1,401,796; Dec. 27.
Korner, Vane B., La Grange, Ill. Power take-off mechanism. No. 1,401,157; Dec. 27.
Koterske, John, Selden, Kans. Dust-conveying attachment for threshing-machines. No. 1,401,710; Dec. 27.
Kowaiuk, Wasyl. (See Boosh, J., and Kowaiuk.)
Kraft, Henry P., Ridgewood, N. J. Dust-cap for tire-valves and the like. No. 1,401,541; Dec. 27.
Kralicek, Charles, Cleveland, Ohio, assignor, by mesne assignments, to Safety Oiling System, Incorporated, Philadelphia, Pa. Oiling device. No. 1,401,711; Dec. 27.
Kranz, Max F., Bridgeport, Conn. Jig for drilling valve-cages. No. 1,401,201; Dec. 27.
Kraus, Adolf. (See Schiffer, M., and Kraus.)
Kaestlinger, Joseph G., Chicago, Ill. Sectional demountable rim. No. 1,401,542; Dec. 27.
Kuhn, Arthur G., Covington, Ky. Automobile-tire. No. 1,401,810; Dec. 27.
Kula, Thomas J., Merino, Colo. Crowning-machine. No. 1,401,912; Dec. 27.
K. W. Battery Company. (See Nordhaus, William H., assignor.)
Lallias, Charles J. (See Larson, O. A., and Lallias.)
Landgraf, Frederick K., assignor to Flannery Bolt Company, Pittsburgh, Pa. Tool for applying staybolt sleeves to boilers. No. 1,401,611; Dec. 27.
Landgrebe, Carl O., Dresden-A., Germany. Spark-plug serving also as compression and injection valve for internal combustion engines. No. 1,401,612; Dec. 27.
Landini, Achille, Camerl, Italy. Motor-car. No. 1,401,797; Dec. 27.
Landon, Hart F., Milwaukee, Wis. Automobile-headlight. No. 1,401,613; Dec. 27.
Larsen, John R., Dorchester, Mass. Baggage-check. No. 1,401,538; Dec. 27.
Larson, Christian H., Gulley, Tex. Vehicle-wheel. No. 1,401,414; Dec. 27.
Larson, Harry A., Milford, Utah. Road-drag. No. 1,401,614; Dec. 27.
Larson, Ole A., and C. J. Lallias, Salt Lake City, Utah. Radiator-cover. No. 1,401,799; Dec. 27.
Lawrence, Frederick K., Chicago, Ill. Wrench. No. 1,401,615; Dec. 27.
Lawlor, William T., Jersey City, N. J. Railway switch heater. No. 1,401,798; Dec. 27.
Lawson, John, assignor to Hemphill Company, Central Falls, R. I. Circular glove-knitting machine. No. 1,401,712; Dec. 27.
La Force, Darrell E., assignor to The Truck Engineering Company, Cleveland, Ohio. Tilting body for trucks and the like. No. 1,401,616; Dec. 27.
Lecoultre, Ernest, assignor to Compagnie Generale D'Electricite, Paris, France. Automatic machine for blowing glass. No. 1,401,713; Dec. 27.
Lehman, Frank H., Lebanon, Pa. Ash-sifting device. No. 1,401,543; Dec. 27.
Lemmon, James H., Milltown, Ind., assignor to Louisville Cement Company, Louisville, Ky. Kiln. No. 1,401,481; Dec. 27.
Lewerenz, William, St. Louis, Mo. Mouthpiece for reed instrument. No. 1,401,159; Dec. 27.
Lewis, George S., assignor to Page-Lewis Arms Company, Chicopee Falls, Mass. Adjustable rear sight for rifles. No. 1,401,517; Dec. 27.
Lester, Howard W., Hartford, Conn. Lamp. No. 1,401,415; Dec. 27.
Lester, James J., Jr., Green Bay, Wis. Spark-plug. No. 1,401,799; Dec. 27.
Letts, Ellsworth M., assignor of forty-nine one-hundredths to C. C. Annabel Waverly, N. Y. Bottle-capping device. No. 1,401,800; Dec. 27.
Letts, Ellsworth M., assignor of forty-nine one-hundredths to C. C. Annabel, Waverly, N. Y. Bottle-capping device. No. 1,401,801; Dec. 27.
Liberty Bread Slicer, Inc. (See Knapp, W. C., and Lockman, assignors.)
Lidseen, Gustave, Chicago, Ill. Lubricating-can. No. 1,401,160; Dec. 27.
Lidseen, Gustave, Chicago, Ill. Oil-can-spout closer. No. 1,401,161; Dec. 27.
Lidseen, Gustave. (See Wahlin, Axel W., assignor.)
Liggett, John C., Brookline, assignor to J. L. Demoville, Boston, Mass. Machine for extracting juice from fruit. No. 1,401,416; Dec. 27.
Liles, Elmer E., Utica, Ill. Attachment for cultivators. No. 1,401,802; Dec. 27.
Limacher, Walter P., Pasadena, Calif. Bumper for automobiles. (Reissue.) No. 15,255; Dec. 27.
Lindsay, Robert J., Philadelphia, Pa. Bedclothes-holder. No. 1,401,340; Dec. 27.
Lindsey, John H., Sr., Otsego, assignor to Hughes Steel Equipment Co., Allegan, Mich. Bench-pedestal. No. 1,401,162; Dec. 27.
Lipps, Emory J., Fountain Hill borough, Pa. Doubling-machine. No. 1,401,618; Dec. 27.
Littman Loxair Valve Corporation. (See Littman, Zeno, assignor.)
Littman, Zeno, New York, N. Y., assignor to Littman Loxair Valve Corporation. Valve. No. 1,401,619; Dec. 27.
Litvak, Harry, New York, N. Y. Combined bed-spring frame and bedstead. No. 1,401,163; Dec. 27.
Litvak, Harry, Hudson, N. Y. Folding bed. No. 1,401,714; Dec. 27.
Ljungström, Fredrik, Brevik, Lidingön, assignor to Aktiebolaget Ljungstroms Angturbin, Stockholm, Sweden. Cooling element. No. 1,401,482; Dec. 27.
Lo Bue, George. (See Bonaccorso, Orazio, assignor.)
Lockman, Herbert T. (See Knapp, W. C., and Lockman.)
Logue, Michael E. (See Bahr, J. S., and Logue.)
Lohn, Jacob, Appleton, Wis. Water-cooling radiator. No. 1,401,164; Dec. 27.
Lowe, Ernest A., North Plainfield, N. J., assignor to Automatic Sprinkler Company of America, New York, N. Y. Automatic fire-alarm device. No. 1,401,914; Dec. 27.
Lowrey, George A., Goose Creek, Tex. Pipe-tongs. No. 1,401,417; Dec. 27.
Lorraine, David G., Taft, Calif. Measuring device. No. 1,401,913; Dec. 27.
Loubet, Pierre, assignor to Société Hue Frères et Loubet, Paris, France. Apparatus for underground pumping. No. 1,401,620; Dec. 27.
London, Warren P., Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company. Micrometer mechanism. No. 1,401,621; Dec. 27.
Louisville Cement Company. (See Lemmon, James H., assignor.)
Ludescher, Edward, Cleveland, Ohio. Pulling attachment for motor-vehicles. No. 1,401,263; Dec. 27.
Lukens Steel Company. (See Haldeman, Paul C., assignor.)
Lundell, George A. E., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone-exchange system. No. 1,401,544; Dec. 27.
Lund, Thomas, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Preparation of heel-blanks. No. 1,401,165; Dec. 27.
Lurie, William A., New Orleans, La. Door-lock. No. 1,401,160; Dec. 27.
Lyle, Robert F. (See Simpson, G. W. S., and Lyle, assignors.)
Lynch, Lawrence, Los Angeles, Calif. Rim. No. 1,401,264; Dec. 27.
Lynes, Fred, Johnstown, N. Y. Fire-kindling device. No. 1,401,803; Dec. 27.
MacDougald, Snow F., and E. E. Bohan, Cap Tourmente, Quebec, Canada. Dipper-tooth designed for use on shovels. No. 1,401,804; Dec. 27.
Macfarlane, James W., *et al.* (See Anderson, Albin E., assignor.)
Machinery Company of America. (See Hedstrom, John P., assignor.)
Mackenzie, Fred L. (See Goddu, G., and Mackenzie.)
Macleod, Albert A., Swampscott, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Lasting-machine. No. 1,401,167; Dec. 27.
MacNicoll, Donald. (See Cockburn, D., and MacNicoll.)
Maby, Adelbert C. (See Meitner, E., and Maby.)
Mader, Joseph, Albany, N. Y. Flag and flag-support. No. 1,401,626; Dec. 27.

Maier, Joseph, assignor to Bemis Tractor Company, Minneapolis, Minn. Traction-machine. No. 1,401,525; Dec. 27.

Mas, Anton, New Haven, Conn. Pliers. No. 1,401,548; Dec. 27.

Mayenfisch, Ernest J. (See Friedlen, Charles F., assignor.)

Magni, Umberto, Los Angeles, Calif. Radiator. No. 1,401,543; Dec. 27.

Malowaring, Alexander J., St. James, London, England. Safety-razor and hair-cutting appliance. No. 1,401,545; Dec. 27.

Manhattan-Rome Company, branch of Rome Metallic Bedstead Co. (See Rinbower, G. F., and Pittal, assignees.)

Manischewitz, B., Company, The. (See Manischewitz, Jacob C., assignor.)

Manischewitz, Jacob U., Cincinnati, Ohio, assignor to The B. Manischewitz Company. Matzo-breaker. No. 1,401,268; Dec. 27.

Manning, William H., Sioux Valley township, Union county, Iowa. Vehicle-buffer. No. 1,401,399; Dec. 27.

Mann, William, Company. (See Prizer, Harry A., assignor.)

Manny, Fred L., assignor to Baker-Vawter Company, Benton Harbor, Mich. Binder-rack. No. 1,401,171; Dec. 27.

Mans, Jakob, assignor of one-half to E. Dewsnap, London, England. Petrol or spirit lighter for cigars and other objects. No. 1,401,344; Dec. 27.

Marble & Shattuck Chair Company, The. (See Foote, Thomas W., assignor.)

Markham, Charles M., Milwaukee, Wis. Jack-actuating lever. No. 1,401,172; Dec. 27.

Marlin Firearms Corporation, The. (See Rockwell, Hugh M., assignor.)

Marlin Firearms Corporation. (See Swebilius, Carl G., assignor.)

Marquette Tool & Mfg. Co. (See Balcker, Martin, assignor.)

Marsel, Joseph, Milwaukee, Wis. Lock for automobile steering mechanism. No. 1,401,173; Dec. 27.

Marshall, E. W. (See Clark, William T., assignor.)

Marshall Field & Company. (See Parmenter, Joseph J., assignor.)

Martin, Charles H., assignor of one-half to A. K. Delbarowe and one-half to E. Hull, Los Angeles, Calif. Envelop-holding attachment for printing-press platens. No. 1,401,174; Dec. 27.

Massillon-Cleveland-Akron Sign Company. (See Turner, Charles W., assignor.)

Mateer, Jesse E., and C. T. Allcutt, Wilkinsburg, Pa., assignors to Westinghouse Electric & Manufacturing Company. Testing device. No. 1,401,627; Dec. 27.

Matthews, George S., assignor of one-half to A. Doehler, Kansas City, Mo. Suspension air-cushion. No. 1,401,420; Dec. 27.

Mattson, Julius, Chicago, Ill. Spindle-tightener. No. 1,401,270; Dec. 27.

Maurer, O., Company, The. (See Schroedter, Edmund, assignor.)

Mayo, William P. (See Mooney, William A., assignor.)

McAllister, Frank E., Minneapolis, Minn. Check-protector. No. 1,401,168; Dec. 27.

McCann, John C. (See Konig, William F., assignor.)

McClain, John R., Edgewood, Pa., assignor to Westinghouse Electric and Manufacturing Company. Self-lubricating gear. No. 1,401,622; Dec. 27.

McClelland, Harold R., and J. McLean, assignors to N. E. McClelland & Company, Limited, Montreal, Quebec, Canada. Cargo vessel. No. 1,401,623; Dec. 27.

McClelland, N. E., & Company. (See McClelland, H. R., and McLean, assignors.)

McCloud, Edward H., assignor to The Kinnear Manufacturing Company, Columbus, Ohio. Elevator-door. No. 1,401,418; Dec. 27.

McCormick, Thomas J., Elko, Nev. Oil-well underreamer. No. 1,401,545; Dec. 27.

McCorquodale, William E., Orange, Tex. Hay-press. No. 1,401,715; Dec. 27.

McCrae, George, Brantford, Ontario, Canada. Pulverizer or grinding machine. No. 1,401,716; Dec. 27.

McCuen, Charles L., Detroit, Mich., assignor, by mesne assignments, to The Iseo Company, Chicago, Ill. Belt-tightening mechanism. No. 1,401,160; Dec. 27.

McDade, James E., Chicago, Ill. Chart. No. 1,401,341; Dec. 27.

McKwen, James R., Goose Creek, Tex. Concrete building-block. No. 1,401,624; Dec. 27.

McGarr, George A., Philadelphia, Pa. Broom-bridle. No. 1,401,242; Dec. 27.

McGrath, William L., assignor to Eclipse Machine Company, Elmira, N. Y. Engine-starter. No. 1,401,170; Dec. 27.

McKee, Ralph H., New York, N. Y. Alloying zirconium and iron. No. 1,401,266; Dec. 27.

McKee, Ralph H., New York, N. Y. Making ferro-zirconium. No. 1,401,265; Dec. 27.

McKee, Ralph H., New York, N. Y. Alloying zirconium and iron. No. 1,401,267; Dec. 27.

McLean, John. (See McClelland, H. R., and McLean.)

McNally, James T., Chicago, Ill. Removable bulkhead. No. 1,401,419; Dec. 27.

Mead, Francis, Chicago, Ill. Inner-cushioned wheel. No. 1,401,421; Dec. 27.

Meeuwis, Emil, Wesdar, Germany. Mutilating-machine for leather splittings. No. 1,401,348; Dec. 27.

Meeuwis, Emil, Wesdar, Germany. Grinding-machine particularly for leather splittings. No. 1,401,349; Dec. 27.

Meisel, Charles A., assignor to Meisel Press Manufacturing Company, Dorchester, Mass. Printing-press. No. 1,401,422; Dec. 27.

Meisel, Charles A., Dorchester, assignor to Meisel Press Manufacturing Company, Boston, Mass. Printing-press. No. 1,401,423; Dec. 27.

Meisel Press Manufacturing Company. (See Meisel, Charles A., assignor.)

Meltzer, Hyman, Brooklyn, and A. C. Maly, Richmond Hill, N. Y., assignors to The Sperry Gyroscope Company, Brooklyn, N. Y. Heating automobile torpedo. No. 1,401,624; Dec. 27.

Mendenhall, Albert E., Garden City, Kans. Trace-carrier. No. 1,401,347; Dec. 27.

Menge, Harry E., Oak Park, assignor to W. D. Allen Manufacturing Company, Chicago, Ill. Hose-nozzle. No. 1,401,425; Dec. 27.

Mellick, Edwin C., Formoso, Kans. Poultry-waterer. No. 1,401,424; Dec. 27.

Melson, Jonathan C., Providence, R. I. Automatic attachment for fire-extinguisher systems. No. 1,401,175; Dec. 27.

Merriam, Walter. (See Newland, R. T., and Merriam, assignors.)

Merrick, George H., Chicago, Ill. Handbag. No. 1,401,426; Dec. 27.

Meyers, John M., Janesville, Wis. Farm-tractor. No. 1,401,225; Dec. 27.

Meyer, William, et al. (See Newland, R. T., and Merriam, assignors.)

Meyer, William H., St. Louis, Mo., assignor, by mesne assignments, to The Davis Sewing Machine Company. Clothes-wringer. No. 1,401,196; Dec. 27.

Michaelson, George, and J. J. Roth, Sr., New York, N. Y. Pneumatic tire. No. 1,401,483; Dec. 27.

Miles, George W., Sandwich, Mass. Modifying resin and the product thereof. No. 1,401,345; Dec. 27.

Milhahn, Frederick, Dwight, Ill. Stirring device for cauldrons. No. 1,401,806; Dec. 27.

Miller, Arthur C., and E. H. Perry, assignors to Sears, Roebuck and Co., Chicago, Ill. Spray-head. No. 1,401,176; Dec. 27.

Miller, Jesse G., Superior, Wis. Adjusting-table. No. 1,401,427; Dec. 27.

Miller, Thomas S., South Orange, N. J. Cableway. No. 1,401,271; Dec. 27.

Minnick, Frederick L., assignor to Tubular Steel Automobile Wheel Mfg. Co., Spokane, Wash. Wheel. No. 1,401,630; Dec. 27.

Mining and Metallurgical Process Proprietary Limited. (See Rice, Gilbert, assignor.)

Miquet, Louis, Neuilly-sur-Seine, France. Adjustable ball-bearing. No. 1,401,196; Dec. 27.

Mitchell, Frank, Houston, Tex. Convertible automobile-body. No. 1,401,177; Dec. 27.

Mitchell, John R., Hilltop, W. Va., assignor of one-half to W. B. Jobeson, Clemont, Va. Wrench. No. 1,401,434; Dec. 27.

Mitchell, William, Milwaukee, Wis. Stanchion-control mechanism. No. 1,401,428; Dec. 27.

Mitchell, William B., Montgomery, Ala. Advertising-sign figure. No. 1,401,807; Dec. 27.

Mocha, Andrew, East Douglas, Mass. Collapsible chair. No. 1,401,272; Dec. 27.

Modern Mechanical Engineering Company. (See Gould, B. J., and Pressler, assignor.)

Mohn, Albert. (See Mohn, Thomas and A.)

Mohn, Thomas and A., Red Wing, Minn. Piston-ring. No. 1,401,178; Dec. 27.

Monahan, John C., Philadelphia, Pa. Wheel-chock device. No. 1,401,350; Dec. 27.

Monfils, Napoleon A., Haverhill, Mass. Heel. No. 1,401,808; Dec. 27.

Monti, Eudo, Turin, Italy. Manufacture of grape extract. No. 1,401,351; Dec. 27.

Moone, Albert E. F., Cincinnati, Ohio, assignor to The Philip Carey Manufacturing Company. Apparatus for handling rolls of roofing, barrels, boxes, and similar articles. No. 1,401,429; Dec. 27.

Mooney, William A., assignor of one-third to W. P. Mayo, Richmond, Va. Packaging-machine. No. 1,401,273; Dec. 27.

Mooney, William H., Dayton, Ohio, assignor to The Dayton Engineering Laboratories Company. Controlling device for electrical systems. No. 1,401,352; Dec. 27.

Moran, Robert C., Ridley Park, Pa., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Preparing dinitrodiphenylamin. No. 1,401,631; Dec. 27.

Morgan, John W. (See Rimple, E. J., and Morgan.)

Morris, Edward J., Wynot, Nebr. Pocket pencil-holder. No. 1,401,809; Dec. 27.

Morris, Frank E., Philadelphia, Pa. Cooking apparatus. No. 1,401,945; Dec. 27.

Morris, George E., Hackensack, N. J. Automatic filter. No. 1,401,810; Dec. 27.

Mosley, Beadie, Sumter, S. C. Bedpan. No. 1,401,547; Dec. 27.

Moses, Raymond I. (See Davidson, Ira M., assignor.)

Moto-Mower Company. (See Jenkins, Charles F., assignor.)

Mottier, Walter F., El Campo, Tex. Hay-rake. No. 1,401,274; Dec. 27.

Mouat, Robert M., Leonia, N. J., assignor to Mouat-Swan Corporation. Display device. No. 1,401,632; Dec. 27.

Mouat-Swan Corporation. (See Mouat, Robert M., assignor.)

Myers, Fredellia H., Johnstown, Pa. Demountable rim. No. 1,401,430; Dec. 27.

Muench, Frank J. and J. L., Newark, N. J. Gearing driving unit. No. 1,401,916; Dec. 27.

Muench, John L. (See Muench, Frank J. and J. L.)

Muloch, William R., Winnipeg, Manitoba, Canada. Sled-propeller. No. 1,401,275; Dec. 27.

Murphey, Samuel R., et al. (See Tow, John Z., assignor.)

Murphy, Thomas J., Rochester, N. Y., assignor of one-half to J. P. B. Duffy, Rochester, N. Y. Electric motor. No. 1,401,548; Dec. 27.

Murray, Donald, London, England, assignor to The Western Union Telegraph Company. Tape-transmitter. No. 1,401,917; Dec. 27.

Murray, Joseph F., Herrin, Ill. Drill. No. 1,401,353; Dec. 27.

Muth, George F., assignor to Newton Machine Tool Works, Incorporated, Philadelphia, Pa. Tool-head for slotting-machines. No. 1,401,718; Dec. 27.

Myers, George M., Jr., Charleston, S. C. Thread and implement holder. No. 1,401,811; Dec. 27.

Myers, Laura M., Chicago, Ill. Shine or gloss remover and nap-producer. No. 1,401,719; Dec. 27.

Naamlooze Vennootschap Handel-Maatschappij "Planeet." (See Kampmann, Gerhardt B. R., assignor.)

Nacker, Owen M. (See Brush, A. P., and Nacker.)

Naintean, John B., North Smithfield, R. I. Spindle. No. 1,401,485; Dec. 27.

Naismith, John W., Stockport, England. Combing-machine. No. 1,401,179; Dec. 27.

National Acme Company, The. (See Drowns, Edmond E., assignor.)

Nebel, Karl F., Philadelphia, Pa., assignor to The Nolde & Horst Company, Reading, Pa. Embroidering attachment for flat-knitting machines. No. 1,401,720; Dec. 27.

Neimeyer, Charles, Little Rock, Ark., assignor to Demountable Spring Tire Company, St. Louis, Mo. Resilient wheel. No. 1,401,431; Dec. 27.

Nelson, Albert R., Sheridan, Wyo. Oil-can. No. 1,401,180; Dec. 27.

Nelson, Samuel et al. (See Hughes, James W., assignor.)

Nero, Arvid H., New Britain, assignor to The Arrow Electric Company, Hartford, Conn. Pull-switch. No. 1,401,276; Dec. 27.

Nevett, Ralph D. (See Palmer, T. H., Seale, and Nevett.)

Neveu, Frank A., Los Angeles, Calif. Radiator. No. 1,401,918; Dec. 27.

Newland, Roy T., and M. Merriam, assignor of one-half to A. Pinson and W. Meyer, Butte, Mont. Talking-machine. No. 1,401,277; Dec. 27.

Newton Machine Tool Works. (See Muth, George F., assignor.)

Niecum, Ellsworth, Kent, Wash. Ladder. No. 1,401,354; Dec. 27.

Nicholson, Stanley W., assignor to Dura Mechanical Hardware Company, Toledo, Ohio. Counterbalance-arm and spring. No. 1,401,355; Dec. 27.

Nicodemus, Harry, Baltimore, Md. Wheel-locking device. No. 1,401,721; Dec. 27.

Nixon, Mordecai M., Edenton, N. C. Machine for digging peanuts out of the ground. No. 1,401,486; Dec. 27.

Noble, Guy E., Dallas, Tex. Combined curb and gutter finishing tool. No. 1,401,487; Dec. 27.

Nolen, William E., Tulsa, Okla. Drilling well. No. 1,401,488; Dec. 27.

Nolde & Horst Company, The. (See Nebel, Karl F., assignor.)

Nordkamp, William H., assignor to K. W. Battery Company, Chicago, Ill. Table for pasting storage-battery plates. No. 1,401,181; Dec. 27.

Nordiska Kullager Aktiebolaget. (See Danielsson, Axel, assignor.)

Nordquist, Peter A., assignor to Detachable Plow Share Edge Manufacturing Company, Ogden, Utah. Detachable plowshare edge. No. 1,401,432; Dec. 27.

Nordstrom, Edward O., Minneapolis, Minn. Berry-box. No. 1,401,549; Dec. 27.

Northern Equipment Company. (See Veenschoten, Vincent V., assignor.)

Novotny, Emil E., assignor to J. S. Stokes, Philadelphia, Pa. Printing-plate and matrix. No. 1,401,633; Dec. 27.

O'Brien, Harry E., Indianapolis, Ind., assignor of one-half to H. B. Benton, Philadelphia, Pa. Mouthpiece for musical instruments. No. 1,401,634; Dec. 27.

Olcott, Walter, South Manchester, Conn. Corn-creamer. No. 1,401,635; Dec. 27.

Oliphant, John, Chicago, Ill., assignor to Sullivan Machinery Company. Booster. No. 1,401,946; Dec. 27.

Olivarius, Holger de F., San Francisco, Calif. Recovering materials from molasses. No. 1,401,433; Dec. 27.

Oldham, Zack G., Urbana, Ill. Boxing-glove cover. No. 1,401,722; Dec. 27.

Organ, Phinias A., Vincennes, Ind. Farm implement. No. 1,401,434; Dec. 27.

Oriel, William B., Grand Rapids, Mich. Change-speed and reversing gearing. No. 1,401,636; Dec. 27.

Osbon, Charles B., Somerville, Mass. Ship's davit. No. 1,401,919; Dec. 27.

Overton, Edward F., Buffalo, N. Y. Apparatus for treating sewage. No. 1,401,182; Dec. 27.

Packard, Raymond P., Tacoma, Wash. Sales-slip. No. 1,401,812; Dec. 27.

Page-Lewis Arms Company. (See Lewis, George S., assignor.)

Paine, Henry W., Eagle Grove, Iowa. Valve-spring-compressing tool. No. 1,401,920; Dec. 27.

Palich, Martin B., Chicago, Ill. Sock-holding device. No. 1,401,723; Dec. 27.

Palij, Michal, Chicago, Ill. Mask. No. 1,401,724; Dec. 27.

Palmer, Thomas H., Melbourne, Victoria; H. V. Seale and R. D. Nevett, Broken Hill, New South Wales, Australia. Flotation separation of mineral substances. No. 1,401,435; Dec. 27.

Pannier, Arthur A., Salt Lake City, Utah. Combined hand and self inking stamp. No. 1,401,436; Dec. 27.

Parchert, Frederick L., Brookline, assignor to Apsley Rubber Company, Hudson, Mass. Shoe-rack. No. 1,401,356; Dec. 27.

Parkinson, George, and J. Davidson, Calgary, Alberta, Canada. Valve. No. 1,401,637; Dec. 27.

Parks-Cramer Company. (See Thompson, Albert W., assignor.)

Parks, Fred M., Murrayville, Pa., assignor to Westinghouse Electric and Manufacturing Company. Motor-control system. No. 1,401,638; Dec. 27.

Parmenter, Joseph J., assignor to Marshall Field & Company, Chicago, Ill. Automobile-trunk. No. 1,401,183; Dec. 27.

Parsons, Charles A., Newcastle-upon-Tyne, and S. S. Cook, Wallsend, England; said Cook assignor to said Parsons. Forming gear-teeth. No. 1,401,550; Dec. 27.

Parsons, Frederick W., Elmira, N. Y., assignor to Ingersoll-Rand Company, Jersey City, N. J. Fluid-actuated clinch-pulley. No. 1,401,551; Dec. 27.

Patent-Freuhand-Gesellschaft fuer Electrische Gluhlampen, M. B. H. (See Raumbauer, Heinrich, assignor.)

Patterson, M. F., Dental Supply Company. (See Knapp, K. W., and Holmes, assignors.)

Patterson, Mordaunt, et al. (See Tow, John Z., assignor.)

Payne, Arthur L. (See Steinmetz, Theodore A., assignor.)

Pearlstien, Julius B., Brooklyn, N. Y. Shirt. No. 1,401,725; Dec. 27.

Pearson, John W., San Francisco, Calif. Dipping apparatus. No. 1,401,437; Dec. 27.

Pearson, Herbert P., assignor to Kendall Products Corporation, New York, N. Y. Invisible waterproof printing fluid. No. 1,401,357; Dec. 27.

Pedersen, John D., Jackson, Wyo. Firearm. No. 1,401,552; Dec. 27.

Peller, Karl E., Hartford, Conn., assignor to Hartford-Fairmont Company, Canajoharie, N. Y. Glass-feeding apparatus. No. 1,401,921; Dec. 27.

Peller, Karl E., West Hartford, Conn., assignor to Hartford-Fairmont Company, Canajoharie, N. Y. Glass-working. No. 1,401,922; Dec. 27.

Pfager, Harry M., St. Louis, Mo. Booster-motor support. No. 1,401,553; Dec. 27.

Pelle, Samuel, Omaha, assignor of one-half to J. L. Galbreth, Superior, Nebr. Tobacco-leaf crusher. No. 1,401,438; Dec. 27.

Perfection Auto Window Company. (See Fletcher, Joseph H., assignor.)

Perron, John, Salem, Mass. Invalid-table. No. 1,401,639; Dec. 27.

Perry, Edwin H. (See Miller, A. C., and Perry.)

Peterkin, Guy S., Seattle, Wash. Tampon. No. 1,401,358; Dec. 27.

Petersen, Peter, Indianapolis, Ind., assignor of one-half to T. J. Coster, Chicago, Ill. Producing lactic ferment culture for milk. No. 1,401,278; Dec. 27.

Peter, Stephen, Omaha, Nebr. Combined key ring and holder. No. 1,401,154; Dec. 27.

Pettit, Hugh, Memphis, Tenn. Lint-cotton-treating machine. No. 1,401,439; Dec. 27.

Phillips, Josephine M., Elisabeth, N. J. Bed-jack. No. 1,401,554; Dec. 27.

Phillips, William W., Richmond, Va. Automatic coupling. No. 1,401,439; Dec. 27.

Pierce, William L., New York, N. Y. Hem-stitch attachment for sewing-machines. No. 1,401,726; Dec. 27.

Pilion, Aimé. (See Ravez, E., and Pilion.)

Pimlott, Peter, Brooklyn, N. Y. Curtain-pole. No. 1,401,727; Dec. 27.

Pinches, Conrad H. (See Rönn, Jens A., assignor.)

Pinches, Enita R. (See Rönn, Jens A., assignor.)

Pincus, Adolph, et al. (See Newland, R. T., and Merriam, assignors.)

Pittoni, Louis E. (See Stabower, G. F., and Pittoni.)

Plains Iron Works Company, The. (See Curtis, Homer P., assignor.)

Pneumatic Process Flotation Company. (See Gahl, Rudolf, assignor.)

Popper, Joseph, Brooklyn, assignor of one-half to Baird-Daniels Co., Inc., New York, and one-half to R. H. Popper, Brooklyn, N. Y. Toy spinning-top. No. 1,401,813; Dec. 27.

Popper, Ruby H., et al. (See Popper, Joseph, assignor.)

Porter, George G., Syracuse, N. Y. Safety mutual stop for Ford clutch-pedals. No. 1,401,359; Dec. 27.

Porter, John J., Hagerstown, Md. Chemical appliance. No. 1,401,186; Dec. 27.

Porter, William K., Pittsburgh, Pa. Coaster wagon and sled. No. 1,401,640; Dec. 27.

Poschadel, Leonard R., Milwaukee, Wis. Pneumatic tire. No. 1,401,814; Dec. 27.

Peer, Edward J., Philadelphia, Pa. Dumping-box. No. 1,401,139; Dec. 27.
Peiler, James C., Fawcett, S. C. Ring spinning or twisting machine. No. 1,401,129; Dec. 27.
Perry, Orrin E., Chicago, Ill. Demountable automobile-wheel. No. 1,401,412; Dec. 27.
Pratt, W. E. (See Clark, Elmer A., assignor.)
Pray, Louis H., Medford, Mass. Unit system for stage-plants. No. 1,401,786; Dec. 27.
Pressler, Walter. (See Gould, E. J., and Pressler.)
Prestige, Charles F., assignor to E. Mayerstadt, Chicago, Ill. Curtain-window. No. 1,401,360; Dec. 27.
Preston, Charles L., Massachusetts, assignor to J. Sanders, New York, N. Y. Making sandstone. No. 1,401,361; Dec. 27.
Pressley, Herman E., Jonesboro, Ark. Electric resistance unit. No. 1,401,136; Dec. 27.
Prinzler, Chr., & Sons. (See Prinzler, Joseph, assignor.)
Prisbe, Carnegie, assignor to Geo. Prisbe & Sons, Inc., Pocatello, Idaho. Commercial form. No. 1,401,641; Dec. 27.
Prizer, Harry A., assignor to William Mann Company, Philadelphia, Pa. Check-book. No. 1,401,270; Dec. 27.
Process Engineers Incorporated. (See De Coe, Jackson A., assignor.)
Provost, Oscar M., and R. C. Sutherland, Wyoming, Ohio. Pumping mechanism for oil-wells. No. 1,401,440; Dec. 27.
Quast, George H., Los Angeles, Calif. Seat-weight. No. 1,401,441; Dec. 27.
Raehlin, Max, New York, N. Y., assignor of one-half to S. M. Gold. Window protector-box. No. 1,401,810; Dec. 27.
Rachford, Francis H., West Alexander, Calif. Direction-indicator for automobiles. No. 1,401,197; Dec. 27.
Rand, James H., North Tonawanda, N. Y. Labeling device. No. 1,401,280; Dec. 27.
Rathjens, George W., Norfolk, Nebr. Carpet-fastening device. No. 1,401,400; Dec. 27.
Rauenberger, Larence E., assignor to The Steel Products Engineering Company, Springfield, Ohio. Internal-combustion engine. No. 1,401,443; Dec. 27.
Ravas, Etienne, and A. Pillon, Oullins, France. Supply-cock for the delivery of measured quantities of liquid. No. 1,401,642; Dec. 27.
Ravas, Etienne, and A. Pillon, Oullins, France. Valve. No. 1,401,643; Dec. 27.
Ray, Carl G., Racine, Wis. Flexible filing-cabinet. No. 1,401,188; Dec. 27.
Rayfield, Charles L., Chicago, Ill. Carburetor. No. 1,401,555; Dec. 27.
Reclamation Oil Producing Association. (See Crellin, Frank E., assignor.)
Reed, Asbury, et al. (See Bertrand, John A., assignor.)
Reeve, Charles D., Grand Rapids, Mich., assignor to Wilcox Pressed Steel Company, Chicago, Ill. Hasp. No. 1,401,491; Dec. 27.
Reeves, Joseph T., assignor (twenty-five one-hundredths to R. M. Hayes, Brooklyn, N. Y. Navigational instrument. No. 1,401,362; Dec. 27.
Reiche, Arthur, Berlin, Germany, assignor to Aktiengesellschaft Ars, Stockholm, Sweden. Projecting apparatus. No. 1,401,189; Dec. 27.
Reimann, Fred W., Manistique, Mich. Tag holder and illuminator. No. 1,401,731; Dec. 27.
Remington Accounting Machine Corporation. (See Woodward, Oscar, assignor.)
Remy Electric Company. (See Replogle, James B., assignor.)
Renault, Gustave A., Paris, France. Clasping device for articles of apparel. No. 1,401,556; Dec. 27.
Replogle, James B., Detroit, Mich., assignor to Remy Electric Company, Anderson, Ind. Regulating device for dynamo-electric machines. No. 1,401,492; Dec. 27.
Replogle, James B., Detroit, Mich., assignor to The Remy Electric Company. Induction-coil. No. 1,401,493; Dec. 27.
Reynolds, Carrie E., executrix. (See Reynolds, Henry E.)
Reynolds, Henry E., deceased, Braintree, Mass., C. E. Reynolds, executrix. Fare receiving and registering apparatus. No. 1,401,732; Dec. 27.
Rhorer, Homer M., and J. T. Davis, Tulsa, Okla. Cable-shackle. No. 1,401,494; Dec. 27.
Rice, Chester W., Schenectady, N. Y., assignor to General Electric Company. Method of and apparatus for amplification of small currents. No. 1,401,644; Dec. 27.
Richard, Stephen, Jr., Worcester, Mass. Gang-saw and multiple rod-cutting machine. No. 1,401,368; Dec. 27.
Richer, Joseph R., and J. O. Hessler, assignors to Star Tool and Manufacturing Company, Chicago, Ill. Pump. No. 1,401,443; Dec. 27.
Rigby, Samuel S., New Castle, Pa. Trolley-wheel. No. 1,401,495; Dec. 27.
Rigg, Gilbert, assignor to Mining and Metallurgical Process Proprietary Limited, Melbourne, Victoria, Australia. Desulfurization of zinc sulfid. No. 1,401,733; Dec. 27.
Riley, Lynn G., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Control apparatus. No. 1,401,645; Dec. 27.
Rimple, Edward J., and J. W. Morgan, San Jose, Calif. Gang-plow. No. 1,401,496; Dec. 27.
Risley, Sheridan, assignor to The Cleveland Dental Manufacturing Company, Cleveland, Ohio. Mouth-prop. No. 1,401,190; Dec. 27.
Ritchey, Andrew M., San Antonio, Tex. Railway-crossing. No. 1,401,191; Dec. 27.
Rivera, Francisco. (See Elviery, Francisco, and F.)
Rivera, Francisco, and F., Barcelona, Spain. Apparatus for the manufacture of wire netting. No. 1,401,507; Dec. 27.
R. E. Le Blond Machine Tool Company, The. (See Groene, William F., assignor.)
Roberts, Arthur, Evanston, assignor to American Coke & Chemical Company, Chicago, Ill. Heating walls. No. 1,401,497; Dec. 27.
Roberts, Charles D., Berkeley, Calif. Hinge. No. 1,401,734; Dec. 27.
Roberts, Charles C., Springdale, Conn. Extension-belt. No. 1,401,444; Dec. 27.
Roberts, Frank C., Wynnewood, Pa. Bouncing suits associated in or worked by games. No. 1,401,735; Dec. 27.
Roberts, Owen F., Kansas City, Mo., assignor to E. B. Cassidy, Chicago, Kans. Wrench. No. 1,401,817; Dec. 27.
Robertson, George. (See Atack, F. W., and Robertson.)
Robinson, Grosvenor P., Summit, N. J. Lighting fixture. No. 1,401,264; Dec. 27.
Roesch, Otto M., assignor, by mesne assignments, to The Martin Firearms Corporation, New Haven, Conn. Revolver. No. 1,401,854; Dec. 27.
Rohrbach, Max, Wiesbaden, near Pirna, Germany. Plate-gauge. No. 1,401,313; Dec. 27.
Rosigna, Joseph G., Pittsburgh, Pa. Forming post from sheet. No. 1,401,446; Dec. 27.
Rohn, Eric L., La Salle, Ill. Arbor. No. 1,401,251; Dec. 27.
Rosenbaum, Floyd E., West Lafayette, Ind., Valve. No. 1,401,623; Dec. 27.
Rhun, Jens Anders, Kolding, Jutland, Denmark, assignor to Emil E. Fischer, London, England. Saliva ejector for use in dental treatment and the like. No. 1,401,645; Dec. 27.
Rowan, Patrick J., New Rochelle, N. Y. Tide-power motor. No. 1,401,559; Dec. 27.
Rowe, Edward E., Swissvale, and C. A. Smith, Edgewood Park, Pa., assignors to Westinghouse Electric & Manufacturing Company. Control apparatus. No. 1,401,647; Dec. 27.
Rossi, Carlo, Legnano, Italy. Producing potash containing fertilizers. No. 1,401,648; Dec. 27.
Rossi, Carlo, Legnano, Italy. Production of potash containing fertilizers. No. 1,401,649; Dec. 27.
Roth, Julius J., Sr. (See Michaelson, G., and Roth.)
Rothschild, Walter L., New Rochelle, N. Y. Card for holding buttons. No. 1,401,786; Dec. 27.
Rotys, Vernon, Paterson, N. J. Saw-gage. No. 1,401,500; Dec. 27.
Rude, Gilbert T., Washington, D. C. Star finder and identifier. No. 1,401,448; Dec. 27.
Rumberger, Bradley W., assignor to Southern Carbon Company, Fairbanks, La. Producing carbon-black. No. 1,401,737; Dec. 27.
Rumberger, Bradley W., assignor to Southern Carbon Company, Fairbanks, La. Producing carbon-black. No. 1,401,738; Dec. 27.
Runge, Robert F., Philadelphia, Pa., assignor to The Hess-Bright Manufacturing Company. Chuck. No. 1,401,102; Dec. 27.
Ryals, Jesse H., assignor of one-half to G. W. Seibold, Inverness, Fla. Wire-stretcher. No. 1,401,739; Dec. 27.
Ryan, Albert J., Cincinnati, Ohio. Box-toe form. No. 1,401,445; Dec. 27.
Safety Car Heating and Lighting Company, The. (See Watson, Leonard A., assignor.)
Safety Oiling System, Incorporated. (See Kraflock, Charles, assignor.)
Sauer, Celestin. (See Van Orsdale, Allen A., assignor.)
Sargent, Allan C., Westford, Mass., assignor to C. G. Sargent's Sons Corporation. Support for dress-aprons. No. 1,401,366; Dec. 27.
Sargent, George W., Pittsburgh, and J. W. Weitzenkorn, Washington, Pa. Recovering molybdenum from molybdenite. No. 1,401,924; Dec. 27.
Sargent, George W., Pittsburgh, and J. W. Weitzenkorn, Washington, Pa. Alloy steel. No. 1,401,925; Dec. 27.
Sargent, George W., Pittsburgh, and J. W. Weitzenkorn, Washington, Pa. Alloy steel. No. 1,401,926; Dec. 27.
Sargent, George W., Pittsburgh, and J. W. Weitzenkorn, Washington, Pa. Recovering molybdenum from molybdenite. No. 1,401,927; Dec. 27.
Sargent's, C. G., Sons Corporation. (See Sargent, Allan C., assignor.)
Sassaman, John H., assignor to United Food Products Company, Houston, Tex. Food compound and making the same. No. 1,401,450; Dec. 27.
Sauerwein, Peter B., Tacoma, Wash. Carbon-removing device. No. 1,401,402; Dec. 27.
Schaake, William, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Trolley-hanger. No. 1,401,650; Dec. 27.
Schaf, Joseph C., Jr., and W. J. Holliday, Indianapolis, Ind. Test stand for testing starting motors. No. 1,401,740; Dec. 27.
Schäfer, Max, Stuttgart, and A. Kraus, Cannstatt, assignors to Firm of Robert Bosch Aktiengesellschaft, Stuttgart, Germany. Short-circuiting device for electrical ignition apparatus. No. 1,401,847; Dec. 27.
Scharlau, Paul. (See Brown, Enoch S., assignor.)

Scharnagel, Herman J., Tarpinsville, assignor to The Sperry Gyroscope Company, Brooklyn, N. Y. Fluid-current motor. No. 1,401,951; Dec. 27.
Schaumburger, Louis. (See Clark, H. H., and Schaumburger.)
Schenkel, Marx P., Oakland, Calif. Propeller-pump. No. 1,401,193; Dec. 27.
Scheuer, Elmer. (See Stratford, H. R., and Scheuer.)
Schiller, Morris, St. Louis, Mo. Sewing-machine. No. 1,401,561; Dec. 27.
Schoell Mfg. Co. (See Heintze, Edmund, assignor.)
Schonebell, Hugo, Courbevoie, France. Exhaust-box. No. 1,401,168; Dec. 27.
Schroodter, Edmund, assignor to The O. Maurer Company, Incorporated, Brooklyn, N. Y. Ash-receiver. No. 1,401,282; Dec. 27.
Schumacher, Elmer L., assignor to American Optical Company, Southbridge, Mass. Ophthalmic mounting and blocking same. No. 1,401,285; Dec. 27.
Schweitzer & Conrad. (See Conrad, Nicholas J., assignor.)
"Scintilla." (See Billon, F., and Bohli, assignors.)
Scofield, George W. (See Ryals, Jesse H., assignor.)
Scott, Oliver P., Tacoma, Wash. Electric side-wall heater. No. 1,401,447; Dec. 27.
Scott, Oliver P., Tacoma, Wash. Electric heater. No. 1,401,560; Dec. 27.
Scully, John J., assignor, by mesne assignments, to Columbia Graphophone Manufacturing Company, Bridgeport, Conn. Electric switch for phonographs. No. 1,401,802; Dec. 27.
Seale, Harry V. (See Palmer, T. H., Seale, and Nevett.)
Sealright Co., Inc. (See Bond, Joseph T., assignor.)
Searles, Herbert N., Oyster Bay, N. Y. Cooling radiators. No. 1,401,662; Dec. 27.
Sears, Roebuck and Co. (See Miller, A. C., and Perry, assignors.)
Seignol, Edouard, Neuilly-sur-Seine, France. Coupling-chain. No. 1,401,194; Dec. 27.
Seguin, Laurent, assignor to Societe des Moteurs Gnome et Rhone, Paris, France. Connecting-rod arrangement for star-shaped motors. No. 1,401,284; Dec. 27.
Seguin, Laurent, assignor to Societe des Moteurs Gnome et Rhone, Paris, France. Connecting-rod head for rotative motors. No. 1,401,285; Dec. 27.
Shapiro, Abraham S. (See Kalman, L. O., and Shapiro.)
Shapiro, Samuel G., New York, N. Y. Device for use in attaching heels to shoes. No. 1,401,819; Dec. 27.
Sharples, David T., and G. D. Grosner, assignors to The Sharples Specialty Company, West Chester, Pa. Bearing. No. 1,401,195; Dec. 27.
Sharples, Philip T., St. Davids, Pa. Centrifugal machine. No. 1,401,196; Dec. 27.
Sharples, Philip T., St. Davids, Pa. Spindle for centrifugal machines. No. 1,401,197; Dec. 27.
Sharples Specialty Company, The. (See Sharples, D. T., and Grosner, assignors.)
Shatz, Barnett, Buenos Aires, Argentina. Device to graduate the distance of the lines of typewriting-machines, specially for writing on ruled paper. No. 1,401,653; Dec. 27.
Shaw, Charles E., East Weymouth, Mass. Preparation of knitted fabrics for use. No. 1,401,501; Dec. 27.
Shaw, James H., Oakley, Calif. Packing material. No. 1,401,198; Dec. 27.
Shea, Thomas J., Portland, Oreg. Joining plates or the like. No. 1,401,448; Dec. 27.
Sheldon, Samuel B., Duluth, Minn. Ingot-pouring mechanism. No. 1,401,928; Dec. 27.
Shepard, Francis H., New Rochelle, N. Y., assignor to Westinghouse Electric & Manufacturing Company. Measuring system. No. 1,401,654; Dec. 27.
Shindel, Harry F. (See Willson, F., and Shindel.)
Shoold, Mark, assignor to Armour Fertilizer Works, Chicago, Ill. Treating alunite. No. 1,401,741; Dec. 27.
Sills, Lanra E., St. Paul, Minn. Portable electric lamp. No. 1,401,820; Dec. 27.
Silverman, Harry A., New York, N. Y. Perforating apparatus. No. 1,401,822; Dec. 27.
Silverman, Harry A., New York, N. Y. Perforating-iron. No. 1,401,821; Dec. 27.
Simmons Company. (See Dillon, Guy, assignor.) (Reissue.)
Simpson, Emory G., assignor to Fisher Body Corporation, Detroit, Mich. Door-lock. No. 1,401,368; Dec. 27.
Simpson, George W. S., London, England, and R. F. Lyle, Greenock, Scotland. Filtration of sugar liquors. No. 1,401,199; Dec. 27.
Singer Manufacturing Company, The. (See De Voe, Albert H., assignor.)
Singer Manufacturing Company, The. (See Webb, Irving F., assignor.)
Sipp, Grant, Paterson, N. J. Warping and beaming machine. No. 1,401,655; Dec. 27.
Siebower, George F., Flushing, and L. E. Pittoni, New York, assignors to Manhattan-Rome Company, branch of Rome Metallic Bedstead Co., Long Island City, New York, N. Y. Couch-hammock. No. 1,401,286; Dec. 27.
Sissel, John H., Masonville, Iowa. Tractor structure. No. 1,401,287; Dec. 27.
Slack, John W., assignor to Columbia Postal Supply Company, Silver Creek, N. Y. Canceling device. No. 1,401,742; Dec. 27.
Smith and Furbush Machine Company. (See Bokum, W. F., and Coulston, assignors.)
Smith, Arthur R., New Albany, Ind. Protractor for laying off flues, angles, and elevations in building and similar work. No. 1,401,200; Dec. 27.
Smith, Burns L., Syracuse, N. Y. One-piece cast-metal wheel and making the same. No. 1,401,502; Dec. 27.
Smith, Charles A. (See Rose, E. E., and Smith.)
Smith, George F., Baltimore, Md. Bakers' oven. No. 1,401,823; Dec. 27.
Smith, George F., Baltimore, Md. Rotary oven. No. 1,401,824; Dec. 27.
Smith, Joseph D., Marshalltown, Iowa. Door-operating means. No. 1,401,202; Dec. 27.
Smith, Harold J., assignor of one-half to H. F. Baker, Chicago, Ill. Music-roll-perforating machine. No. 1,401,201; Dec. 27.
Smith, William B., Norwood, Ohio. Metal-burnishing machine. No. 1,401,563; Dec. 27.
Smith, William B., Niagara Falls, Ontario, Canada, assignor to American Chain Company, Inc., Bridgeport, Conn. Unit non-skid device. No. 1,401,503; Dec. 27.
Snyder, William A., Los Angeles, Calif. Outing-table. No. 1,401,440; Dec. 27.
Society "Anciens Etablissements Caffort Freres," The. (See Jouffret, Henri V. J., assignor.)
Société des Moteurs Gnome et Rhone. (See Seguin, Laurent, assignor.)
Société Hue Frères et Loubet. (See Loubet, Pierre, assignor.)
Sodeau, William H., and V. P. Francombe, St. Tropez Var, France, assignors to The Whitehead Torpedo Works (Weymouth) Limited, (In Liquidation), Weymouth, England. Automobile torpedo. No. 1,401,288; Dec. 27.
Southern Carbon Company. (See Rumbarger, Bradley W., assignor.)
Southwick, Lawrence P. (See Togde, M., and Southwick.) (Reissue.)
Speed, James B., assignor to Western Electric Company, Incorporated, New York, N. Y. Tetrahedronal magnetic unit. No. 1,401,564; Dec. 27.
Specialty Shoe Machinery Company. (See Finch, Maurice S., assignor.)
Spencer, Corby W. (See Spencer, David B. and C. W.)
Spencer, David B. and C. W., Danville, Ill. Vehicle-wheel and tire. No. 1,401,450; Dec. 27.
Spery, Charles F., Chicago, Ill. Automobile-radiator. No. 1,401,565; Dec. 27.
Sperry, Elmer A., Brooklyn, N. Y. Method and apparatus for separating foreign substances from lead mattes. No. 1,401,743; Dec. 27.
Sperry Gyroscope Company. (See Meitner, E., and Maby, assignors.)
Sperry Gyroscopic Company, The. (See Scharnagel, Herman J., assignor.)
Spinner, Philip V. (See Goldstein, Charles, assignor.)
Spray Engineering Company. (See Day, Herbert W., assignor.)
Squire, Frederick J., Havelock, Ontario, Canada. Tobacco-display case. No. 1,401,825; Dec. 27.
Stalter, Hiram F. (See Cloud, J. E., and Stalter.)
Standish, Edward K., Stoughton, Mass. Tractor. No. 1,401,280; Dec. 27.
St. John, Ancel, Cleveland, Ohio, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Air-brake controlling apparatus. (Reissue.) No. 15,256; Dec. 27.
Star Tool and Manufacturing Company. (See Richer, J. R., and Hessler, assignors.)
Stec, Dominik. (See Babirad, Nicolaus, assignor.)
Steel Products Engineering Company, The. (See Rausenberger, Larence E., assignor.)
Steinmetz, Theodore A., assignor of one-half to A. L. Payne, Eau Claire, Wis. Automatic duplicating-machine. No. 1,401,826; Dec. 27.
Stephens-Adamson Mfg. Co. (See Avery, Colby M., assignor.)
Stephens, John R., St. Louis, Mo. Car-axle bearing. No. 1,401,203; Dec. 27.
Sterling Bronze Company. (See Becker, Sylvester, assignor.)
Sterling, Paul, Wilkes-Barre, Pa. Automatic feeding means for shakers. No. 1,401,370; Dec. 27.
Stillwell, Samuel F., Grafton, W. Va. Rail-joint. No. 1,401,827; Dec. 27.
Stoddard, Leon B., Baker, Oreg. Loose-leaf binder. No. 1,401,566; Dec. 27.
Stokes & Smith Company. (See Fogde, M., and Southwick, assignors.)
Stokes & Smith Company. (See Fogde, M., and Southwick, assignors.) (Reissue.)
Stokes, John S. (See Novotny, Emil E., assignor.)
Storey, Norman C., Aguirre, Porto Rico, West Indies. Power-transmitting mechanism. No. 1,401,204; Dec. 27.
Strand, David, assignor, by mesne assignments, to R. W. Glasner, Chicago, Ill. Die-cushion. No. 1,401,371; Dec. 27.
Stratford, Herbert R., and E. Scheuer, Cleveland, Ohio. Process and apparatus for manufacturing hollow rubber articles. No. 1,401,567; Dec. 27.
Stunkel, Lewis, Peck, Kans. Rail-support. No. 1,401,656; Dec. 27.
Sturtevant Mill Company. (See Doyle, William T., assignor.)
Sullivan Machinery Company. (See Cartlidge, Frank, assignor.)

Sullivan Machinery Company. (See Halloch, Frank A., assignor.)
Sullivan Machinery Company. (See Halvorsen, Halvert B., assignor.)
Sullivan Machinery Company. (See Holdsworth, Fred D., assignor.)
Sullivan Machinery Company. (See Oliphant, John, assignor.)
Suter, Ernest A., Ancoats, Manchester, England. Automatic fitting for mariners' compasses. No. 1,401,208; Dec. 27.
Sutherland, Robert F., Rochester, assignor to Vacuum Oil Company, New York, N. Y. Elevator mechanism for conveyers. No. 1,401,372; Dec. 27.
Sutherland, Russell C. (See Provorse, O. M., and Sutherland.)
Svoboda, Ferdinand, Chicago, Ill. Wheeled toy. No. 1,401,373; Dec. 27.
Swain, Edward A. (See Karmire, William J., assignor.)
Swartz, Edward G., New Orleans, La. Lumber-cradle. No. 1,401,206; Dec. 27.
Swearingen, Walter E., Montgomery City, Mo. Wrench for battery-terminals. No. 1,401,839; Dec. 27.
Swebilius, Carl G., assignor, by mesne assignments, to The Marlin Firearms Corporation, New Haven, Conn. Repeating firearm. No. 1,401,545; Dec. 27.
Swinson, Harman H., Raleigh, N. C. Grain-harrester. No. 1,401,329; Dec. 27.
Swissgabel, Charles F., Dayton, Ohio. Chuck. No. 1,401,207; Dec. 27.
Swonger, James M., Mansfield, Ohio. Bridge. No. 1,401,374; Dec. 27.
Sykora, Rudolf, Boston, Mass. Coloring machine. No. 1,401,504; Dec. 27.
Sykora, Rudolf, Boston Mass. Friction-drive mechanism. No. 1,401,505; Dec. 27.
Sylvan, Joseph, Chicago, Ill. Rides construction for skylights and the like. No. 1,401,208; Dec. 27.
Syndicat Electro-Staal. (See Vermaes, Stefanus J., assignor.)
Taylor, Charles W. A., Dunston-on-Tyne, England. Rudder-brake. No. 1,401,290; Dec. 27.
Taylor, William, Leicester, England. Grinding glass. No. 1,401,830; Dec. 27.
Taylor, William, Leicester, England. Method of and apparatus for grinding glass. No. 1,401,831; Dec. 27.
Taylor, William, Leicester, England. Method of grinding glass. No. 1,401,832; Dec. 27.
Teich, Tonka Semmig, née, Dresden, Germany. Reproducing hats. No. 1,401,569; Dec. 27.
Thackray, George E., Westmont borough, Pa. Car. No. 1,401,533; Dec. 27.
Theoflos, Nicholas P., Chicago, Ill. Automatic railway gate and signal apparatus. No. 1,401,375; Dec. 27.
Thompson, Albert W., Lowell, assignor, by mesne assignments, to Parks-Cramer Company Boston, Mass. Fiber-conditioning process and apparatus. No. 1,401,376. Dec. 27.
Thompson, James A., Rushville, Ill. Tray. No. 1,401,209; Dec. 27.
Thornton, Frank, Jr., Mansfield, Ohio, assignor to Westinghouse Electric & Manufacturing Company. Electric heating unit. No. 1,401,657; Dec. 27.
Tokheim Oil Tank and Pump Company. (See Ellers, Frank B., assignor.)
Tow, John Z., assignor of one-third to M. Patterson and one-third to S. R. Murphy, Springfield, Tenn. Automatic stop for phonographs. No. 1,401,658; Dec. 27.
Tower, George, Jr. (See Cowan, Richard S., assignor.)
Townsend, George R., Winchester, Mass., assignor, by mesne assignments, to Gillespie Eden Corporation. Clothes-wringer. No. 1,401,210; Dec. 27.
Touceda, Enrique A., Albany, N. Y. Centrifugal machine. No. 1,401,291; Dec. 27.
Travers, Webster F., Cleveland, Ohio. Rim for vehicle-wheels. No. 1,401,377; Dec. 27.
Tretter, Anthony M., Covington, Ky. High chair. No. 1,401,834; Dec. 27.
Troy Laundry Machinery Company. (See Allen, Charles H., assignor.)
Truck Engineering Company, The. (See Le Poros, Darrell E., assignor.)
Trundle, George T., Jr., Cleveland Heights, assignor to The American Multigraph Company, Cleveland, Ohio. Milling-machine. No. 1,401,378; Dec. 27.
Turbayne, William A., assignor to U. S. Light & Heat Corporation, Niagara Falls, N. Y. Dynamo-electric machine. No. 1,401,947; Dec. 27.
Tubular Steel Automobile Wheel Mfg. Co. (See Minnick, Frederick L., assignor.)
Turner, Charles W., assignor to Massillon-Cleveland-Akron Sign Company, Massillon, Ohio. Two-way sign-printing press. No. 1,401,570; Dec. 27.
Underfeed Stoker Company of America, The. (See De Voe, William E., assignor.)
Union Switch & Signal Company, The. (See Beall, Charles R., assignor.)
United Shoe Machinery Corporation. (See Casgrain, Louis A., assignor.)
United Shoe Machinery Corporation. (See Godtu, G., and Mackenzie, assignors.)
United Shoe Machinery Corporation. (See Gouldbourn, Joseph, assignor.)
United Shoe Machinery Corporation. (See Hubbard William, assignor.)
United Shoe Machinery Corporation. (See Lund, Thomas, assignor.)
United Shoe Machinery Corporation. (See Macleod, Albert A., assignor.)
United Wood Products Company. (See Sassaman, John H., assignor.)
Universal Safety Suit Co. (See Dada, James E., assignor.)
U. S. Ball Bearing Mfg. Co. (See Black, John, assignor.)
U. S. Light & Heat Corporation. (See Turbayne, William A., assignor.)
Vacuum Oil Company. (See Sutherland, Robert F., assignor.)
Valve Bag Company, The. (See Hartman, Louis H., assignor.)
Van Meter, James W., San Francisco, Calif. Diffusing and disseminating poisonous gases. No. 1,401,392; Dec. 27.
Van Meter, James W., San Francisco, Calif. Portable chlorin-dispenser. No. 1,401,393; Dec. 27.
Van Orsdale, Allen A., Philadelphia, Pa., assignor to C. Sauer, Lubricator. No. 1,401,835; Dec. 27.
Van Orsdale, Allen A., Philadelphia, Pa., assignor to C. Sauer, Lubricator. No. 1,401,836; Dec. 27.
Van Vechten, Edwin F., Milwaukee, Wis. Display mechanism. No. 1,401,837; Dec. 27.
Vaughan, Francis L., Salt Lake City, Utah. Surveying instrument. No. 1,401,580; Dec. 27.
Vaughan, Vincent V., assignor to Northern Equipment Company, Erie, Pa. Chain grate. No. 1,401,211; Dec. 27.
Vermaes, Stefanus J., Delft, assignor to Syndicaat Electro-Staal, The Hague, Netherlands. Rotary kiln. No. 1,401,212; Dec. 27.
Verner, Eyvind M., et al. (See Anderson, Arvin E., assignor.)
Vickers Limited. (See Dawson, A. T., and Horne, assignors.)

Whitmore, William H., Cleveland, Ohio. Preparation for cleaning, preserving, &c., varnished surfaces. No. 151,028; Dec. 27.

Wincroft Stove Works, Middletown, Pa. Gas and coal stoves. No. 146,942; Dec. 27.

Wing, Russell T., St. Cloud, Minn. Headlight-lenses. No. 153,423; Dec. 27.

Wood, John R., Irvington, assignor to New Process Multicastings Company, Newark, N. J. Refrigerators. No. 138,730; Dec. 27.

Wright, S. P., Washington, D. C. Ginger-ale. No. 150,717; Dec. 27.

Yard-O-Meter Corporation, St. Louis, Mo. Devices for computing and measuring fabrics. No. 128,720; Dec. 27.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 27TH DAY OF DECEMBER, 1921.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Acid for reducing agents, Purification of mahic. G. C. Bailey. No. 1,401,337; Dec. 27.
Acid phosphate or superphosphate, Manufacturing. W. T. Doyle. No. 1,401,524; Dec. 27.
Adjusting-table. J. G. Miller. No. 1,401,427; Dec. 27.
Air-brake-controlling apparatus. A. St. John. (Reissue.) No. 14,356; Dec. 27.
Air-cushion, Suspension. G. E. Matthews. No. 1,401,420; Dec. 27.
Aircraft propeller. J. D. Hill. No. 1,401,537; Dec. 27.
Airplane, Hovering. A. F. Zahm. No. 1,401,934; Dec. 27.
Airship, Weight-controlled. G. A. Chaddock. No. 1,401,461; Dec. 27.
Alunite, Treating. M. Shadid. No. 1,401,741; Dec. 27.
Apparel, Clasping device for articles of. G. A. Renault. No. 1,401,558; Dec. 27.
Armrest, Support for driver's. A. C. Sargent. No. 1,401,366; Dec. 27.
Arbor. See R. L. Rubs. No. 1,401,281; Dec. 27.
Asbestos table-mat. G. R. Healey. No. 1,401,833; Dec. 27.
Ash-receiver. E. Schroeder. No. 1,401,282; Dec. 27.
Ash-sifting device. F. H. Lehman. No. 1,401,443; Dec. 27.
Auger, Portable. O. W. Heisel. No. 1,401,780; Dec. 27.
Autocar-drive Auxiliary. E. J. Gould and W. Pressler. No. 1,401,900; Dec. 27.
Automatic coupling. W. W. Phillips. No. 1,401,480; Dec. 27.
Auto-lift. T. J. Cordes. No. 1,401,463; Dec. 27.
Auto safety-bumper. L. O. Kalman and A. S. Shapiro. No. 1,401,410; Dec. 27.
Auto-vehicle, Direction indicator for. F. H. Radeleff. No. 1,401,187; Dec. 27.
Automobile body, Convertible. F. Mitchell. No. 1,401,177; Dec. 27.
Auton bile-bumper. W. P. Limacher. (Reissue.) No. 14,355; Dec. 27.
Automobile door-panels, Making. H. J. Haon. No. 1,401,661; Dec. 27.
Automobile lifting mechanism. C. W. Bowers. No. 1,401,490; Dec. 27.
Automobile steering mechanism, Lock for. J. Marsel. No. 1,401,173; Dec. 27.
Automobile-theft-protection device. J. A. Ward. No. 1,401,839; Dec. 27.
Automobile top closure. J. A. Deab. No. 1,401,395; Dec. 27.
Automobile wheel, Demountable. G. E. Powell. No. 1,401,815; Dec. 27.
Automobiles, Antitheft-lock for. T. W. Irving. No. 1,401,395; Dec. 27.
Automobiles, Lighting arrangement for. F. W. Hines. No. 1,401,602; Dec. 27.
Automobiles, Nonskid device for. A. Erat. No. 1,401,245; Dec. 27.
Automobiles, Steering device for. J. T. Duncan. No. 1,401,398; Dec. 27.
Automobiles, Storm and sun guard for. J. H. Whitish. No. 1,401,382; Dec. 27.
Bag-fastener. J. M. Almedia. No. 1,401,854; Dec. 27.
Baggage-check. J. R. Loracy. No. 1,401,338; Dec. 27.
Ball-retainers, Machine for filling. J. Diesk. No. 1,401,630; Dec. 27.
Bar: *See*—
Grate-bar.
Pinch-bar.
Bath nozzle, Shower-. E. Circle. No. 1,401,462; Dec. 27.
Battery: *See*—
Storage battery.
Battery plates, Table for pasting storage-. W. H. Nordhaus. No. 1,401,181; Dec. 27.
Battery-post and making a seal. H. L. Wood. No. 1,401,573; Dec. 27.
Battery-terminals, Wrench for. W. E. Swearingen. No. 1,401,828; Dec. 27.
Bearing. D. T. Sharples and G. D. Grosner. No. 1,401,195; Dec. 27.
Bearing, Adjustable ball-. L. Miquet. No. 1,401,849; Dec. 27.
Bearing, Car-axle. J. R. Stephens. No. 1,401,208; Dec. 27.
Bearing for tire and trunnion type mills, Roller-. F. D. Gross, R. P. Akins, and J. W. Bucher. No. 1,401,536; Dec. 27.
Beater. H. M. Hull. No. 1,401,408; Dec. 27.
Bed, Camper's. R. Wiles. No. 1,401,846; Dec. 27.
Bedclothes-holder. R. J. Lindsay. No. 1,401,340; Dec. 27
Bedclothes support. F. Eastland. No. 1,401,244; Dec. 27
Bed, Foldable. O. Konrad. No. 1,401,796; Dec. 27.
Bed, Folding. H. Litvak. No. 1,401,714; Dec. 27.
Bed-jack. J. M. Phillips. No. 1,401,554; Dec. 27.
Bed-spring frame and bedstead, Combined. H. Litvak. No. 1,401,163; Dec. 27.
Bedpan. B. Moseley. No. 1,401,547; Dec. 27.
Belt-fastener. C. S. S. Voss. No. 1,401,606; Dec. 27.
Belt-tightening mechanism. C. L. McCuen. No. 1,401,169; Dec. 27.
Belts, Manufacturing endless V-shaped or angular. C. E. King. No. 1,401,480; Dec. 27.
Belts, Mold for making fan-. C. D. Hibbs. No. 1,401,255; Dec. 27.
Berry-box. E. O. Nordstrom. No. 1,401,549; Dec. 27.
Beverages, Preparing low alcoholic and non-alcoholic. H. Heuser. No. 1,401,700; Dec. 27.
Binder, Loose-leaf. C. Goldstein. No. 1,401,250; Dec. 27.
Binder, Loose-leaf. L. B. Stoddard. No. 1,401,566; Dec. 27.
Binder-rack. F. L. Manny. No. 1,401,171; Dec. 27.
Bit: *See*—
Extension-bit.
Bleaching-composition. E. Forbes. No. 1,401,901; Dec. 27.
Block: *See*—
Concrete building-block.
Board: *See*—
Adjustable drawing-board.
Boats, Manually-propelled life-saving device and attachment for. E. Bellman. No. 1,401,233; Dec. 27.
Boiler: *See*—
Oil-fired boiler.
Boilers, Means for preventing the formation of scale in steam-. F. I. du Pont. No. 1,401,893; Dec. 27.
Boilers, Tool for applying staybolt-sleeves to. F. K. Landgraf. No. 1,401,611; Dec. 27.
Boilers, Water-level regulator for steam-. F. I. du Pont. No. 1,401,802; Dec. 27.
Boilers, Water-level regulator for steam-. F. I. du Pont. No. 1,401,894; Dec. 27.
Book, Check-. H. A. Priser. No. 1,401,279; Dec. 27.
Booster. J. Oliphant. No. 1,401,946; Dec. 27.
Booster-motor support. H. M. Pflager. No. 1,401,553; Dec. 27.
Bottle-capping device. E. M. Letts. Nos. 1,401,800–1; Dec. 27.
Bottles, &c., Machine for filling. J. F. Geyer. No. 1,401,150; Dec. 27.
Bottles, &c., Machine for manufacturing closures for. E. and J. Alberti. No. 1,401,800; Dec. 27.
Box: *See*—
Berry-box.
Exhaust-box.
Window provision-box.
Box, S. Koff. No. 1,401,794; Dec. 27.
Box-making machine. J. W. Hughes. No. 1,401,407; Dec. 27.
Bracket: *See*—
Portable electric bracket.
Bracket. E. A. Hawthorne. No. 1,401,402; Dec. 27.
Brake: *See*—
Rudder-brake.
Breeze-arrester and the like. E. C. Woodin. No. 1,401,224; Dec. 27.
Bridge. J. M. Swonger. No. 1,401,374; Dec. 27.
Broom-bridle. G. A. McGarr. No. 1,401,342; Dec. 27.
Brush-holder. D. F. Dillin. No. 1,401,679; Dec. 27.
Brush, Powder-distributing. P. D'Alessandro. No. 1,401,598; Dec. 27.
Bucket, Excavating-. V. H. Jackson. No. 1,401,782; Dec. 27.
Building, &c., Protractor for laying off lines, angles, and elevations in. A. R. Smith. No. 1,401,200; Dec. 27.
Bulkhead, Removable. J. T. McNally. No. 1,401,419; Dec. 27.
Bundling-machine. B. R. Williamson. No. 1,401,298; Dec. 27.
Burner: *See*—
Hydrocarbon-burner.
Burnishing machine, Metal-. W. B. Smith. No. 1,401,563; Dec. 27.
Butter-oil from milk, skim-milk, cream, buttermilk, butter, &c. W. Alexander. No. 1,401,853; Dec. 27.
Button-fastener. G. F. Armstrong. No. 1,401,232; Dec. 27.
Buttons, Card for holding. W. L. Rothschild. No. 1,401,736; Dec. 27.
Cabinet, Flexible filing-. C. G. Ray. No. 1,401,188; Dec. 27.
Cable and telephone-wire containing rail. F. Gaspar. No. 1,401,531; Dec. 27.

Cable-shackle. H. M. Rhorer and J. T. Davis. No. 1,401,494; Dec. 27.
Cableway. T. S. Miller. No. 1,401,271; Dec. 27.
Calcining alunite. H. F. Chappell. Nos. 1,401,136–7; Dec. 27.
Calculating device. W. E. Harris. No. 1,401,402; Dec. 27.
Caldrons, Stirring device for. F. Milsome. No. 1,401,506; Dec. 27.
Calender, Perpetual. H. O. Windahl. No. 1,401,365; Dec. 27.
Camera, Process or copying. A. Fruwirth. No. 1,401,302; Dec. 27.
Camphor, Purification of crude synthetic. J. M. Kessler. No. 1,401,709; Dec. 27.
Can: *See*—
Lubricating-can. Oil-can.
Cans, Conduit device for tapping. A. F. Clark. No. 1,401,344; Dec. 27.
Canning device. J. W. Stark. No. 1,401,742; Dec. 27.
Cap-spooling frame. J. H. Jones. No. 1,401,710; Dec. 27.
Car. G. E. Tuckray. No. 1,401,355; Dec. 27.
Car coupling, Mine. J. E. Dains. No. 1,401,509; Dec. 27.
Car-door, F. Coppola. No. 1,401,782; Dec. 27.
Car-doors, Combination lock for. W. J. Mahoney. No. 1,401,701; Dec. 27.
Car-lighting system. L. A. Watson. No. 1,401,451; Dec. 27.
Car, Motor-. A. Landini. No. 1,401,767; Dec. 27.
Carmeaver. F. A. Kell. No. 1,401,411; Dec. 27.
Car, Railway motor-. J. F. Kostecka. No. 1,401,801; Dec. 27.
Cars and similar vehicles, Journal-box for railway-. A. Henderson. No. 1,401,141; Dec. 27.
Carbon-black, Producing. E. W. Sonnborger. Nos. 1,401,737–8; Dec. 27.
Carbon-removing device. P. B. Saugen. No. 1,401,480; Dec. 27.
Carburetor. C. L. Rayfield. No. 1,401,555; Dec. 27.
Carbureter accessory. C. West. No. 1,401,261; Dec. 27.
Carbureter attachment. J. S. Bahr and M. R. Logue. No. 1,401,127; Dec. 27.
Card and poster holder, Commercial. C. Weidner. No. 1,401,216; Dec. 27.
Carpet-fastening device. G. W. Rathjens. No. 1,401,400; Dec. 27.
Carrier: *See*—
Trace-carrier.
Cartridge-holder. S. G. Green. No. 1,401,152; Dec. 27.
Case: *See*—
Tobacco-display case.
Cement holder and spreader, Flue-. H. Gotthard. No. 1,401,318; Dec. 27.
Cementing apparatus. L. A. Casgrain. No. 1,401,257; Dec. 27.
Centrifugal machine. P. T. Sharples. No. 1,401,196; Dec. 27.
Centrifugal machine. S. A. Touceda. No. 1,401,251; Dec. 27.
Centrifugal machines, Spindle for. P. T. Sharples. No. 1,401,197; Dec. 27.
Chain, Coupling. S. Saigmol. No. 1,401,194; Dec. 27.
Chair: *See*—
Collapsible chair. Hitch chair.
Chair attachment, Rocking-. A. Zubryd. No. 1,401,220; Dec. 27.
Chair base, Interlocking. T. W. Foote. No. 1,401,230; Dec. 27.
Chair, Collapsible. A. Mocha. No. 1,401,272; Dec. 27.
Change-speed and reversing gearing. W. B. Oriel. No. 1,401,636; Dec. 27.
Change-speed mechanism. W. Kessler. No. 1,401,538; Dec. 27.
Charge forming and positioning apparatus. M. Fogde and L. P. Sventzwick. No. 1,401,882; Dec. 27.
Chart. J. E. McDade. No. 1,401,341; Dec. 27.
Check-protector. F. E. McAllister. No. 1,401,198; Dec. 27.
Chemical appliance. J. J. Porter. No. 1,401,193; Dec. 27.
Chlorin-dispenser, Portable. J. W. Van Meter. No. 1,401,373; Dec. 27.
Chuck. W. Castaule. No. 1,401,812; Dec. 27.
Chuck. R. F. Runge. No. 1,401,192; Dec. 27.
Chuck. C. F. Swinegabel. No. 1,401,207; Dec. 27.
Cigars, &c., Petrol or spirit lighters for. J. Mans. No. 1,401,344; Dec. 27.

Rubber articles, Process and apparatus for making hollow. H. R. Stratford and E. Schwarz. No. 1,401,367; Dec. 27.
Rubber hose and coiling, Coil of. A. M. Griffin. No. 1,401,904; Dec. 27.
Rubber mat. W. Kelleher. No. 1,401,768; Dec. 27.
Rudder-brake. C. W. A. Taylor. No. 1,401,290; Dec. 27.
Sash-holding device. M. B. Pallch. No. 1,401,723; Dec. 27.
Safe support, Provision for. A. Haluska. No. 1,401,775; Dec. 27.
Safety device. W. J. Burke. No. 1,401,874; Dec. 27.
Sales-slip. E. P. Packard. No. 1,401,812; Dec. 27.
Sash-weight. G. H. Gould. No. 1,401,441; Dec. 27.
Saw. H. Forde. No. 1,401,529; Dec. 27.
Saw-gage. V. Royle. No. 1,401,560; Dec. 27.
Saw-grinding machine. J. P. Hedstrom. No. 1,401,697; Dec. 27.
Saw multiple and rod-cutting machine, Gang-. S. Richard, Jr. No. 1,401,363; Dec. 27.
Saw-swage. J. P. Hedstrom. No. 1,401,694; Dec. 27.
Saw-tooth shaper. J. P. Hedstrom. No. 1,401,695; Dec. 27.
Scale. L. T. Johnson. No. 1,401,704; Dec. 27.
Seal. W. K. Edgar. No. 1,401,838; Dec. 27.
Seesaw. J. G. Haugh. No. 1,401,906; Dec. 27.
Seining apparatus for treating. E. F. Overton. No. 1,401,182; Dec. 27.
Shearing machines, M. Schiller. No. 1,401,851; Dec. 27.
Sewing machine, Filled-sack. I. F. Webb. No. 1,401,396; Dec. 27.
Sewing machines, Hemstitch attachment for. W. L. Pierce. No. 1,401,720; Dec. 27.
Sewing machines, Thread-covering mechanism for. A. H. De Vos. No. 1,401,402; Dec. 27.
Shakers, Automatic feeding means for. P. Sterling. No. 1,401,870; Dec. 27.
Sharpener, Phonograph-needle. A. W. Wahlin. No. 1,401,218; Dec. 27.
Sheep-holding device. E. H. Cross. No. 1,401,586; Dec. 27.
Shell, Vibrating. C. A. Bailey. No. 1,401,898; Dec. 27.
Shoe or floor receiver and sag-producer. L. M. Myers. No. 1,401,749; Dec. 27.
Skid, Wooden. W. T. Donnelly. No. 1,401,409; Dec. 27.
Skid's davit. C. H. Odell. No. 1,401,519; Dec. 27.
Skirt. J. S. Pendleton. No. 1,401,725; Dec. 27.
Slide-rack. F. L. Forquett. No. 1,401,566; Dec. 27.
Smoke Matting. W. Hubbard. No. 1,401,208; Dec. 27.
Sharpener's tool. W. Berger and C. Blaschke. No. 1,401,405; Dec. 27.
Sleeve, Hopper-feed. Sergeant for use on. S. S. MacDonald and E. E. Bevan. No. 1,401,504; Dec. 27.
Slitter Fixer. J. H. Dean. No. 1,401,142; Dec. 27.
Slot Electric. R. W. Brookhill. No. 1,401,588; Dec. 27.
Slot Keeps Advertising. W. S. Whitsell. No. 1,401,807; Dec. 27.
Slot-stopper. A. H. E. Beckman. No. 1,401,646; Dec. 27.
Smelt. M. O. Clancy. No. 1,401,621; Dec. 27.
Smelt-blocking mechanism. M. O. Clancy. No. 1,401,614; Dec. 27.
Smelting-furnace. M. O. Clancy. No. 1,401,615; Dec. 27.
Smelting-process. M. O. Clancy. No. 1,401,617; Dec. 27.
Smelt supporting and rolling means. M. O. Clancy. No. 1,401,622; Dec. 27.
Smelt-washing mechanism. M. O. Clancy. No. 1,401,616; Dec. 27.
Smelt, Washing. M. O. Clancy. No. 1,401,618; Dec. 27.
Snap-chain. A. Weiss. No. 1,401,452; Dec. 27.
Sprinkler, Air. Rider construction for. J. Grivas. No. 1,401,209; Dec. 27.
Soap-dispenser. C. W. Mojack. No. 1,401,575; Dec. 27.
Spring-coupling. W. C. Knapp and O. T. Lockmon. No. 1,401,880; Dec. 27.
Spring, Tool-head for. G. F. Maib. No. 1,401,716; Dec. 27.
Snowplow. J. Hill. No. 1,401,295; Dec. 27.
Soldering-iron. H. Wood. No. 1,401,754; Dec. 27.
Soldering-furnace. J. Blake. No. 1,401,514; Dec. 27.
Soldering-iron. C. A. Brown. No. 1,401,671; Dec. 27.
Sound-box diaphragm. P. B. Dulcey. No. 1,401,142; Dec. 27.
Spark-gap, Contact for. A. E. Anderson. No. 1,401,231; Dec. 27.
Spark-plug. P. V. Carpenter. No. 1,401,070; Dec. 27.
Spark-plug. A. F. and V. D. Cullen. No. 1,401,580; Dec. 27.
Spark-plug. M. J. Di Giacomo. No. 1,401,121; Dec. 27.
Spark-plug. J. J. Lesser, Jr. No. 1,401,799; Dec. 27.
Speed-table. L. L. Kelley. No. 1,401,793; Dec. 27.
Spindle-lubricator. D. M. Davis. No. 1,401,596; Dec. 27.
Spindle. J. H. Steinfeld. No. 1,401,448; Dec. 27.
Spirit-level-indicator. S. Mattson. No. 1,401,776; Dec. 27.
Spinning or twisting machine, Ring. J. C. Foster. No. 1,401,729; Dec. 27.
Spray-head. A. C. Miller and E. H. Perry. No. 1,401,176; Dec. 27.
Spreader and roller, Combined. H. C. Foster. No. 1,401,140; Dec. 27.
Spring-retarding device. E. V. Hartford. No. 1,401,252; Dec. 27.
Spring-treadoning mechanism. E. E. Weaver. No. 1,401,842; Dec. 27.
Stamp, Combined hand and self-inking. A. A. Pannier. No. 1,401,446; Dec. 27.
Stamping-machine. M. Forde and L. P. Southwick. (Reissue.) No. 15,264; Dec. 27.
Stamping-press. G. H. Jaquery. No. 1,401,466; Dec. 27.
Stanchion-control mechanism. W. Mitchell. No. 1,401,415; Dec. 27.
Star Setter and identifier. G. T. Rede. No. 1,401,446; Dec. 27.
Staybolt structure. J. R. Flannery and S. I. Dodds. Nos. 1,401,662-4; Dec. 27.
Steam-boiler furnace and operating the same. H. C. Heaton. No. 1,401,233; Dec. 27.
Steam-engine. J. W. Black. Nos. 1,401,866-9; Dec. 27.
Steel, Alloy. O. W. Bergeut and J. W. Weltenstorn. Nos. 1,401,672-6; Dec. 27.
Steelmaker. H. J. Holker. No. 1,401,870; Dec. 27.
Stenciller, Extension and combination. W. Houghtaling. No. 1,401,257; Dec. 27.
Stills, Apparatus for receiving coke from. C. B. Hoerger. No. 1,401,310; Dec. 27.
Stopper: *See*—
Washbowl-stopper.
Stone-cleaner. H. Cmanyl. No. 1,401,876; Dec. 27.
Stocker-rod coupling. J. C. Axtell. No. 1,401,302; Dec. 27.
Stop, Protective. J. E. Dade. No. 1,401,677; Dec. 27.
Stove, Mixing. A. T. Drachenberg. No. 1,401,501; Dec. 27.
Surveying instrument. F. E. Vaughan. No. 1,401,290; Dec. 27.
Swift, Adjustable. A. E. Anderson. No. 1,401,125; Dec. 27.
Swing, Child's. J. A. Eberle. No. 1,401,391; Dec. 27.
Switch: *See*—
Electric switch. Railway-switch.
Table: *See*—
Adjustable table. Cutting-table.
Traveling-table. Sewing-table.
Tag holder and illuminator. F. W. Reimann. No. 1,401,731; Dec. 27.

Tag-locking device. A. Bodie. No. 1,401,235; Dec. 27.
Tailoring machine. R. T. Newland and M. Merriam. No. 1,401,377; Dec. 27.
Tamper. G. S. Peterkin. No. 1,401,258; Dec. 27.
Tap and die holder, Reversible. E. E. Drowns. No. 1,401,384; Dec. 27.
Tape-measurer. D. Murray. No. 1,401,917; Dec. 27.
Telephone-exchange system. G. A. W. Landell. No. 1,401,544; Dec. 27.
Telephone-receiver. G. Balsamoault. No. 1,401,753; Dec. 27.
Telephone-transmitter. G. Bousanault. No. 1,401,754; Dec. 27.
Testing device. J. E. Mather and C. T. Allcutt. No. 1,401,627; Dec. 27.
Thread and implement holder. G. M. Meyers, Jr. No. 1,401,811; Dec. 27.
Threads, Production of. B. Borszykowski. No. 1,401,943; Dec. 27.
Threshing-machines, Dust-conveying attachment for. J. Kozenka. No. 1,401,710; Dec. 27.
Ticket-holder. P. Allard. No. 1,401,120; Dec. 27.
Tie and rail holder. J. Ashby. No. 1,401,935; Dec. 27.
Tire. W. G. Formick. No. 1,401,148; Dec. 27.
Tire-armor. W. H. Aldridge. No. 1,401,501; Dec. 27.
Tire, Automobile. A. G. Kuhn. No. 1,401,610; Dec. 27.
Tire, Non-puncturable and non-collapsible pneumatic inside. O. Yates. No. 1,401,507; Dec. 27.
Tire, Pneumatic. G. Michaelsen and J. J. Roth, Sr. No. 1,401,465; Dec. 27.
Tire, Pneumatic. L. R. Poschadel. No. 1,401,814; Dec. 27.
Tire-valves, Dust-cap for. H. P. Kraft. No. 1,401,541; Dec. 27.
Tobacco-display case. F. J. Squire. No. 1,401,825; Dec. 27.
Tobacco-leaf crusher. S. Pella. No. 1,401,438; Dec. 27.
Tobacco-pipe. R. T. Wright. No. 1,401,226; Dec. 27.
Toe form, Box-. A. J. Ryan. No. 1,401,365; Dec. 27.
Tongs, Ice. J. G. Heidt. No. 1,401,777; Dec. 27.
Topographical recorder. D. S. de Lavaud. No. 1,401,242; Dec. 27.
Torpedo, Automobile. W. H. Sodeau and V. P. Francombe. No. 1,401,288; Dec. 27.
Torpedo, Hunting automobile. E. Meitner and A. C. Raby. No. 1,401,628; Dec. 27.
Toy spinning-top. J. Popper. No. 1,401,813; Dec. 27.
Toy, Wheeled. F. Svoboda. No. 1,401,373; Dec. 27.
Trace-carrier. A. E. Mendenhall. No. 1,401,847; Dec. 27.
Traction machine. J. Mader. No. 1,401,625; Dec. 27.
Traction-support. B. C. Gentry. No. 1,401,689; Dec. 27.

Table cover, Oil-cloth. C. Bastow. No. 60,082; Dec. 27.
Toy, Rocking duck nursery. H. P. Sigwalt. No. 60,111; Dec. 27.
Vending-machine casing. F. Q. Rast. No. 60,120; Dec. 27.
Weather-forecasting device. R. Lancaster. No. 60,101; Dec. 27.

ALPHABETICAL LIST OF TRADE-MARKS REGISTERED.

Adhesives, Certain. R. M. Riddingshead Co. No. 149,948; Dec. 27.
Alcohol, Ethyl. U. S. Industrial Alcohol Co. No. 150,148; Dec. 27.
Alcohol, Non-beverage grain. Geo. Wiedemann Company. No. 149,178; Dec. 27.
Ammunition-vehicle. J. J. Stock. No. 150,133; Dec. 27.
Anesthetic for use in painless extraction of teeth and in general surgery, Local. Dr. O. W. Dress & Dr. L. O. Orem. No. 152,341; Dec. 27.
Antiseptic, germicide, and medicinal treatment for pyorrhea. J. D. Mason. No. 150,091; Dec. 27.
Antiseptic papers and cigarettes not containing tobacco. Lundy, Wilcox & Company. No. 149,944; Dec. 27.
Attrition mills and coffee shellers. Engelberg Huller Company. No. 149,914; Dec. 27.
Automobile top dressing. Lowe Brothers Company. No. 150,094; Dec. 27.
Automobile and furniture polish. J. W. Olts. No. 150,036; Dec. 27.
Automobile, furniture, &c., polish. L. B. Wade Co. No. 150,158; Dec. 27.
Axles for pleasure-automobiles and automobile-trucks. Vulcan Motor Axle Company. No. 150,155; Dec. 27.
Bacon. John Morrell & Company. No. 150,016; Dec. 27.
Baker's machinery. Read Machinery Co. No. 150,070; Dec. 27.
Ball, Game. L. J. Rober. Nos. 150,078–9; Dec. 27.
Baseballs. San Antonio Drug Co. No. 150,097; Dec. 27.
Baskets. Wabash Basket Company. No. 150,157; Dec. 27.
Bats, Baseball. Hilton Collins Co. No. 149,944; Dec. 27.
Batteries, Dry-cell. Fronts Battery & Carbon Co. No. 149,923; Dec. 27.
Bearings. W. L. Sandage. No. 150,098; Dec. 27.
Bed-springs. Henry Schomer Company. No. 150,102; Dec. 27.
Bed-springs, mattresses, and pillows. Charles P. Rogers & Co. No. 150,083; Dec. 27.
Belting, Dress. Russell Manufacturing Co. No. 150,090; Dec. 27.
Beverage and syrup for making same, Non-alcoholic, malt-less, artificial grape. P. E. Barnett. No. 149,835; Dec. 27.
Beverage, Malt-less, non-alcoholic. Queen City Bottling Company. No. 150,069; Dec. 27.
Beverage, Non-alcoholic. G. U. Lipshuich. No. 149,988; Dec. 27.
Beverage, Non-alcoholic. W. T. Wagner's Sons Co. No. 150,159; Dec. 27.
Beverage, Non-alcoholic, non-cereal, malt-less. M. Brock and A. B. Praetsch. No. 149,852; Dec. 27.
Beverage, Non-alcoholic, non-cereal, malt-less. G. N. Prokos. No. 150,096; Dec. 27.
Beverage, Non-intoxicating, malt-less, non-cereal. Pearl City Fruit Company. No. 150,048; Dec. 27.
Beverage, Non-intoxicating, cereal, malt. D. G. Yuengling & Son. No. 150,152; Dec. 27.
Beverages and syrups for making, Non-alcoholic, non-cereal, malt-less. H. H. Nelson. No. 150,026; Dec. 27.
Beverages and syrups for making same, Non-alcoholic, non-cereal, malt-less. Orange Surprise Syrup & Bottling Co. No. 150,037; Dec. 27.
Beverages and syrups for making, Non-alcoholic, non-cereal, malt-less. V. O. Robertson. No. 150,080; Dec. 27.
Beverages and syrups for making same, Acme Beverage-Extract Co. No. 149,810; Dec. 27.
Beverages and syrups for making same. Evers-Rehm Co. No. 149,916; Dec. 27.
Beverages and syrups for making same. A. F. Kloss Co. No. 149,972; Dec. 27.
Beverages, Malt-less, non-alcoholic, non-cereal. Oregon Growers Cooperative Assn. Nos. 150,038–9; Dec. 27.
Beverages, Malt-less, non-cereal. Los Angeles Ice & Cold Storage Company. No. 149,992; Dec. 27.
Beverages, Non-alcoholic, non-cereal, malt-less. B. F. Ruth. No. 150,091; Dec. 27.
Beverages, Non-alcoholic, non-cereal, malt-less. Service Corp. Nos. 150,104–5; Dec. 27.
Blue, Laundry. J. L. Prescott Company. No. 150,063; Dec. 27.
Bluing and ammonia. Thoro Products Mfg. Co. No. 150,141; Dec. 27.
Blouse-suits and blouses, Ladies' and children's. Straus, Royer & Straus. No. 150,135; Dec. 27.
Boots and shoes. Stacy-Adams Company. No. 150,119; Dec. 27.
Boots, shoes, and slippers of leather, felt, cloth, rubber, &c. Thomas G. Plant Company. No. 150,055; Dec. 27.
Bread. National Baking Company. No. 150,022; Dec. 27.
Bread. Ward Baking Company. No. 150,163; Dec. 27.
Bread, biscuits, and cakes. H. Stahl. No. 150,120; Dec. 27.
Bricks and drainage-tiles. Acme Brick Company. No. 149,811; Dec. 27.
Brooms. Richmond Broom Company. No. 150,077; Dec. 27.
Buttermilk, Condensed. Commercial Creamery Co. No. 149,889; Dec. 27.
Calculi, Urinalysis. Du Bois Laboratories. No. 149,903; Dec. 27.
Cake. Ward Baking Company. No. 150,164; Dec. 27.
Cake, Loaf-. Grocers Baking Company. No. 149,935; Dec. 27.
Cambrics in the piece. Berkeley Company. No. 149,839; Dec. 27.
Camphor, Spirits of. Wolfe-Farrer Co. No. 150,184; Dec. 27.
Candles. Loft Incorporated. No. 149,989; Dec. 27.
Candy. Candy Products Corporation. No. 149,866; Dec. 27.
Candy. Continental Candy Corporation. No. 149,890; Dec. 27.
Candy. Gerber Company, The. No. 149,927; Dec. 27.
Candy. Wandell Chocolate Company. No. 150,182; Dec. 27.
Canned fish. J. V. Giaconi & Co. No. 149,928; Dec. 27.
Canned fruits and vegetables. M. Schucki. No. 150,103; Dec. 27.
Canned pears and tomatoes, oranges, &c. California Vegetable Union, Inc. No. 149,865; Dec. 27.
Card game. P. E. Hurst. No. 149,953; Dec. 27.
Cartoons. R. J. Bleger. No. 149,842; Dec. 27.
Casting battery parts, Molds for. E. J. Kukac. No. 149,899; Dec. 27.
Cement, Adhesive. H. A. Cook. No. 149,892; Dec. 27.
Cement, Adhesive. J. Goldstein. No. 149,931; Dec. 27.
Cement, Mending-. Hemmerdinger, L., & Co. No. 149,941; Dec. 27.
Cement, Patching-. P. C. Plasterer. No. 150,057; Dec. 27.
Cheese. C. Zuercher. No. 150,190; Dec. 27.
Chemical compounds. J. H. Longshore. No. 149,990; Dec. 27.
Chemical, medicinal, and pharmaceutical preparations. Cooper & Cooper. No. 149,893; Dec. 27.
Chemical, medicinal, and toilet preparations, Certain. C. D. Smith Drug Co. No. 150,112; Dec. 27.
Chocolate in cake form. Bishop & Company. No. 149,845; Dec. 27.
Cigars. Estate of Joseph J. Schaefer. No. 150,206; Dec. 27.
Cigars, cigarettes, and manufactured tobacco. R. G. Sullivan Estate. No. 150,207; Dec. 27.
Cleaner-polish and restorative, Preservative. R. V. Lull. No. 149,993; Dec. 27.
Cleaning and polishing furniture, floors, &c., Polish for. Channell Chemical Company. Nos. 149,874–5; Dec. 27.
Cleaning preparation for silverware, glass, &c. Nuro Silver Co. No. 150,031; Dec. 27.
Cloths and fabrics in the piece, Certain. American Cellulose & Chemical Manufacturing Company. No. 149,817; Dec. 27.
Coal. D. E. McMillan & Bro. No. 149,996; Dec. 27.
Coaster-sleds. G. E. Pollock. No. 150,060; Dec. 27.
Coffee. J. Aron & Company. No. 149,823; Dec. 27.
Coffee, Roasted. Levin Store Co. No. 149,985; Dec. 27.
Coffees. Mohler Bros. Coffee Company. No. 150,011; Dec. 27.
Coffee. I. D. Richheimer. No. 150,076; Dec. 27.
Coffee. Vinson Coffee Company. No. 150,154; Dec. 27.
Coffee. Fred Wolferman Good Things to Eat Co. No. 150,185; Dec. 27.
Collets and certain thread-cutting tools. Union Twist Drill Company. No. 150,146; Dec. 27;
Colors, Coal-tar. Society of Chemical Industry in Basle. No. 150,116; Dec. 27.
Concrete-mixers. A. L. Frame. No. 149,924; Dec. 27.
Concrete mixers and distributing machines, &c. Koehring Machine Company. No. 150,203; Dec. 27.
Construction materials, Certain. A. E. H. Dussek. No. 149,908; Dec. 27.
Cotton-batting. Stearns & Foster Company. Nos. 150,126–32; Dec. 27.
Cotton fabrics in the piece. Howlett & Hockmeyer Co. No. 149,951; Dec. 27.
Cotton piece goods. Calico Printers' Association. No. 149,860; Dec. 27.
Cotton piece goods. Hinck & Muller. No. 149,945; Dec. 27.
Cotton piece goods. James F. White & Co. Nos. 150,160–71; Dec. 27.
Cotton, sewing-thread, and yarn, Spool-. The American Thread Company. No. 148,821–2; Dec. 27.
Cotton, silk, linen, and mixtures of cotton, silk, and linen. J. Miller Sons & Co. No. 150,008; Dec. 27.
Cough-drops. I. M. Krebs. No. 149,975; Dec. 27.
Crates, wood boxes, and cartons. Central Furniture Packing Company. No. 149,872; Dec. 27.
Cream, Vanishing. Harriet Hubbard Ayer. No. 149,829; Dec. 27.

Cutlery and table flat-ware and nutcrackers, Certain. Mappin & Webb. No. 149,999; Dec. 27.
Dates, Fresh. Van Dyk and Bowne. No. 150,121; Dec. 27.
Davenports, sofas, &c., Upholstered. S. Karpen & Bros. No. 149,907; Dec. 27.
Desks. Grand Furniture Company. No. 149,854; Dec. 27.
Desks. H. R. Langslow. No. 149,944; Dec. 27.
Disinfectants, Insecticides, and deodorants. Sanitas Company. Nos. 150,100–1; Dec. 27.
Dolls. Nottingham Hosiery Company. Nos. 150,088–9; Dec. 27.
Dolls, Bisque-headed. George Borgfeldt & Co. No. 149,849; Dec. 27.
Dolls, Mechanical. F. H. Meeker. No. 150,004; Dec. 27.
Drills, drill-sharpeners, drill-bits, and parts thereof. Reed-Denver Rock Drill Manufacturing Company. No. 149,898; Dec. 27.
Dyes. Newport Chemical Works. No. 150,037; Dec. 27.
Egg preservatives. K & G Laboratories Co. No. 149,949; Dec. 27.
Elastic braids. Narrow Fabric Co. No. 150,020; Dec. 27.
Elastic webbing. Hope Webbing Company. No. 149,900; Dec. 27.
Elastic webbing. Julius Wile Sons & Co. No. 150,170; Dec. 27.
Electric-lighting fixtures. R. C. Plant. No. 150,050; Dec. 27.
Engines and machinery, Certain. Westinghouse Electric & Manufacturing Company. No. 150,168; Dec. 27.
Envelops, Correspondence-. Central Ohio Paper Company. No. 150,193; Dec. 27.
Envelops, Correspondence-. National Checking Company. No. 150,023; Dec. 27.
Extract of hops and malt for preparing soft drinks. H. E. Leyendecker. No. 149,956; Dec. 27.
Feed, Crushed oyster-shell used as poultry. Carolina Crushed Shell Co. No. 149,943; Dec. 27.
Fertilizer-distributer. J. Bloe. No. 149,849; Dec. 27.
Fertilizers. American Agricultural Chemical Company. No. 149,918; Dec. 27.
Fertilizers. Coe-Mortimer Company. No. 149,981; Dec. 27.
Fertilizers. Fisheries Products Co. Inc. No. 149,921; Dec. 27.
Fertilizers. Michigan Humus & Chemical Company. No. 150,006; Dec. 27.
Fertilizers, &c. Lakeland Phosphate & Fertilizer Company. No. 149,983; Dec. 27.
Fire brick and tile. Laclede-Christy Clay Products Company. No. 149,982; Dec. 27.
Fire-extinguishers, Hand. Ideal Fire Extinguisher Co. No. 149,955; Dec. 27.
Fishing-lines, Trish reel. B. F. Gladding & Co. Nos. 150,200–1; Dec. 27.
Flour, Mixed wheat and corn. Ismert-Hincke Milling Company. No. 149,961; Dec. 27.
Flour, Wheat-. Wells Flour Milling Company. No. 150,166; Dec. 27.
Flour, Wheat-. Wichita Flour Mills Co. No. 150,174; Dec. 27.
Furfuramid chemical product as well as all its compounds. Rudolf Ricard Ahrendt & Cie. No. 150,113; Dec. 27.
Furniture, Household. Chamberlayne, Inc. No. 149,973; Dec. 27.
Game-board, game-indicator, game-counter, &c. E. Bruder. Nos. 149,855–6; Dec. 27.
Garment-hangers. Brager Bros. No. 149,851; Dec. 27.
Garments, Infants' sleeping-. Merit Baby Wear Company. No. 150,005; Dec. 27.
Gas-intake deflectors and gaskets, Combination-. M. B. Eaton. No. 149,909; Dec. 27.
Gas, Natural. J. C. Whitfield. No. 150,172; Dec. 27.
Ginger-ale, Bottled. C. H. Thom. No. 150,139; Dec. 27.
Glue and paste. Central Adhesive Company. No. 149,971; Dec. 27.
Golf-balls. Midland Rubber Co. Ltd. No. 150,007; Dec. 27.
Golf-clubs. S. Tousey. No. 150,143; Dec. 27.
Grape-juice. Rubyhill Vineyard Co. No. 150,085; Dec. 27.
Graphite, mica, and soapstone, Flake-. R. M. Hollingshead Co. No. 149,947; Dec. 27.
Greases, Lubricating-. Rusk Oil Co. of Philadelphia. No. 150,088; Dec. 27.
Gum, Chewing-. American Chicle Company. No. 149,918; Dec. 27.
Hacksaw-blades. Henry G. Thompson & Son Company. No. 150,140; Dec. 27.
Hair, Compound for promoting the growth of the. J. C. Rudd. No. 150,086; Dec. 27.
Hair-nets. S. Blechman & Sons. No. 149,846; Dec. 27.
Hair-nets. Empire Notion Co. No. 149,912; Dec. 27.
Hair-nets. National Trading Company. No. 150,024; Dec. 27.
Hair-nets. Samstag & Hilder Bros. No. 150,096; Dec. 27.
Hair-producer. M. C. Porter. No. 150,061; Dec. 27.
Hams, bacon, and lard. Patrick-Young Co. No. 150,047; Dec. 27.
Heels and tread-lifts therefor, Metal. Cinderella Heel Corporation. No. 149,880; Dec. 27.
Household tools, Certain. Wickwire Spencer Steel Corporation. No. 150,175; Dec. 27.
Index and bristol boards. Whiting Paper Company. No. 150,173; Dec. 27.
Insecticides, germicides, and related products. Charles H. Auerbach and Roy P. Auerbach. No. 149,826; Dec. 27.
Inner-tubes, Liquid. John Paterson & Co. No. 150,046; Dec. 27.
Knives and forks, Handles for. Mappin & Webb. No. 150,091; Dec. 27.
Lamp sockets and receptacles, Electric. Bryant Electric Company. No. 149,957; Dec. 27.
Linen, hemp, silk, wool, and worsted piece goods, carpets, &c. Morton Sundour Fabrics Ltd. No. 150,015; Dec. 27.
Liniment. J. W. Materski. No. 150,014; Dec. 27.
Liniment. A. Szabo. No. 150,137; Dec. 27.
Liquid compound for toilet use. John Paterson & Co. No. 150,045; Dec. 27.
Lye. Stonewall Corporation. No. 150,124; Dec. 27.
Macaroni. Atlantic Macaroni Co. No. 149,824; Dec. 27.
Macaroni. Lopez & Co. No. 149,901; Dec. 27.
Machines and tools Certain. Hibbard, Spencer, Bartlett & Co. No. 149,943; Dec. 27.
Magazine publications, Monthly. Buffalo Society of Natural Sciences. No. 149,924; Dec. 27.
Malt extract. Adam Scheidt Brewing Co. No. 149,812; Dec. 27.
Malt extracts. A. Wielick. No. 150,177; Dec. 27.
Malt-syrup. J. B. Yoor. No. 150,142; Dec. 27.
Marble cut to size, Polished marble, and cut stone. Georgia Marble Company. No. 150,209; Dec. 27.
Marshmallow Crème. Cosy Confectionery Company. No. 149,893; Dec. 27.
Mattresses. Capital Bedding Company. No. 149,887; Dec. 27.
Mattresses. Empire Mattress Company. Nos. 150,193–4; Dec. 27.
Mattresses. Sanitary Mattress Company. No. 150,009; Dec. 27.
Mattresses, Iron, and springs. Southern Spring Bed Co. No. 150,117; Dec. 27.
Medicinal and scalp preparation, Certain. P. B. Jones. No. 149,964; Dec. 27.
Medicinal preparation. J. Berlin. No. 149,840; Dec. 27.
Medicinal preparation. Chemische Fabrik vormals Madaus. No. 149,917; Dec. 27.
Medicinal preparations. V. Halper. No. 149,958; Dec. 27.
Medicinal preparation, Certain. Orium Company. No. 150,041; Dec. 27.
Medicinal preparation, Certain. B. L. Palleymah. No. 150,042; Dec. 27.
Medicinal preparation, Certain. York Drug Store. No. 150,149; Dec. 27.
Medicinal preparation for tonsilitis, sore throat, &c. L. L. Hoback. No. 149,946; Dec. 27.
Medicinal preparation for treatment of chills. C. Johnston. No. 149,985; Dec. 27.
Medicinal preparations, Certain. Charles Alfred Waldeck Company. No. 150,160; Dec. 27.
Medicinal preparations for affections of the eye. W. H. Rutland. No. 150,092; Dec. 27.

Oils, Lubricating-. Ohio Grease Co. No. 154,885; Dec. 27.
Padlocks. Eagle Lock Co. Nos. 139,882–3; Dec. 27.
Padlocks, keys, and parts thereof, &c. Fraim-Slaymaker Hardware Company. No. 151,664; Dec. 27.
Paints. Sherwin-Williams Company. No. 145,130; Dec. 27.
Paints, Silumite Products Corporation. No. 153,572; Dec. 27.
Paints, oils, varnishes, &c. Paine & Nixon Co. No. 153,518; Dec. 27.
Paper and mailing-envelops, Writing-. Whiting Paper Company. No. 114,983; Dec. 27.
Paper for wrapping purposes. Trinity Bag & Paper Co. No. 148,566; Dec. 27.
Paper luncheon sets. Sanitary Products Corporation of America. No. 143,412; Dec. 27.
Paper stationery, Exclusively for printed. Diamond Press. No. 147,841; Dec. 27.
Pens, Fountain-. Dunn Pen Company. No. 147,606; Dec. 27.
Perfumes. G. C. Spencer. No. 152,770; Dec. 27.
Playing-cards. United States Playing Card Company. Nos. 151,120–1; Dec. 27.
Poles, Cedar telephone, telegraph, and transmission-line. Western Lumber & Pole Company. No. 153,905; Dec. 27.
Powder-puffs. M. Crupain. No. 150,996; Dec. 27.
Preparation for cleaning, &c., varnished surfaces. W. H. Whitmore. No. 151,028; Dec. 27.
Preparation for cleaning toilet-bowls, Powdered. United Chemical Companies. No. 152,660; Dec. 27.
Preparation for relief of sunburn. A. W. Cook. No. 151,656; Dec. 27.
Publication, Periodic. Halliwell & Patton Publishing Co. No. 143,128; Dec. 27.
Pyrophoric igniters. Chastern, Inc. No. 142,748; Dec. 27.
Railways, Reinforced-concrete ties for. Ashley Railway Safety Tie and Construction Corporation. No. 135,124; Dec. 27.
Refrigerating systems. Resolute Manufacturing Company. No. 150,372; Dec. 27.
Refrigerators. McKee Refrigerator Company. No. 148,231; Dec. 27.
Refrigerators. J. R. Wood. No. 138,739; Dec. 27.
Rubber compound. A. Orris. No. 151,923; Dec. 27.
Rubber patches, Sheet-. United States Sales Corporation. No. 141,198; Dec. 27.

PUBLISHED FOR OPPOSITION.

[Act of Feb. 20, 1905, Sec. 6, as amended Mar. 3, 1911.]

Rubber soles. Cushman-Hollis Co. No. 149,815; Dec. 27.
Sadirons, Stove-heated. Dover Manufacturing Company. No. 145,500; Dec. 27.
Sashes, Metal window. Federal Bridge and Structural Co. No. 153,655; Dec. 27.
Screws, Wood-. Eagle Lock Co. No. 152,421; Dec. 27.
Seed, Farm-. Springfield Seed Co. No. 154,241; Dec. 27.
Seed, Sweet turnip and beet. Dr. Friedrich Bergmann, G. m. b. H. No. 140,426; Dec. 27.
Seeds. Peter Henderson & Co. No. 151,004; Dec. 27.
Shoe parts—rubber heels. Brooks & Co. No. 152,945; Dec. 27.
Shoes. Novelty Shoe Company. No. 149,026; Dec. 27.
Shoes, Leather. Gotham Shoe Mfg. Co. No. 149,544; Dec. 27.
Shoes, Women's leather and cloth. Duttenhofer-Stevens Co. No. 152,980; Dec. 27.
Shoes, Women's leather and combination. C. S. Gibbon Co. No. 149,545; Dec. 27.
Soap and benzene soap. Innis, Speiden & Co. No. 154,274; Dec. 27.
Soaps, metal-polish, leather-dressing, &c. Detroit White Lead Works. No. 148,218; Dec. 27.
Stoves, Gas and coal. Wincroft Stove Works. No. 146,942; Dec. 27.
Stoves, ranges, and furnaces. Haynes-Langenberg Manufacturing Co. No. 145,265; Dec. 27.
Stringers, Anchor-rails, metal sections for connecting metal stringers, &c. Midwest Steel & Supply Company. No. 154,600; Dec. 27.
Talking-machine needles. Brilliantone Steel Needle Co. of America. No. 150,214; Dec. 27.
Tape, Adhesive. Bauer & Black. No. 155,085; Dec. 27.
Threads and yarns of silk and artificial silk. A. H. Rice Company. No. 154,245; Dec. 27.
Tire-patches, Automobile. Leech Tire Patch Company. No. 126,639; Dec. 27.
Tire-retreads. General Tire and Rubber Company. No. 144,858; Dec. 27.
Tires and tubes, Automobile. Austin, Nichols & Co. No. 153,865; Dec. 27.
Tobacco, cigars, and cigarettes. A. Dunhill. No. 105,080; Dec. 27.
Toilet preparation—fumigation. Vulcan Manufacturing Company. No. 144,841; Dec. 27.
Tonic for use after bathing, &c., Arterial body-. Chas. E. Zanders Co. No. 151,693; Dec. 27.
Toy airplanes. Ball Me Co. No. 122,443; Dec. 27.
Toy car. J. W. Hess. No. 154,200; Dec. 27.
Toy molding set. C. C. Kindler. No. 154,340; Dec. 27.
Trousers, skirt, coat, gown, and suit hangers. Strader Manufacturing Company of Indiana. No. 141,493; Dec. 27.
Truck-scales. L. W. Robinson. No. 157,871; Dec. 27.
Trucks and trailers, Motor-. Trayler Engineering & Manufacturing Company. No. 141,138; Dec. 27.
Trunks, Oversize-n Trunk Company. No. 154,272; Dec. 27.
Tube-filters, Pressure and suction. Gutsfeder Bruder. No. 151,520; Dec. 27.
Wall-cases, shelf-work, and interchangeable shelving Store. Interchangeable Wall Case Co. No. 145,456; Dec. 27.
Washboards. National Washboard Company. Nos. 152,641-3; Dec. 27.
Washboards. National Washboard Company. Nos. 152,644-6; Dec. 27.
Washboards. National Washboard Company. Nos. 152,647-9; Dec. 27.
Washboards. National Washboard Company. Nos. 152,643-7; Dec. 27.
Washbollers. W. B. Bertels & Son Co. No. 135,428; Dec. 27.
Washtubs and washboilers. Atlantic Stamping Company. No. 155,058; Dec. 27.
Watch-movements. Illinois Watch Case Company. No. 140,852; Dec. 27.
Window-screens. Foster Screen Co. No. 154,706; Dec. 27.
Windshield-cleaners. Apex Electric Mfg. Company. No. 151,503; Dec. 27.
Wire-rope cables. Upson-Walton Company of New York. No. 144,947; Dec. 27.

CLASSIFICATION OF PATENTS

ISSUED DECEMBER 27, 1921.

NOTE.—First number—class, second number—subclass, third number—patent number.

1— 2: 1,401,762
26: 1,401,747
[illegible]: 1,401,760
[illegible]: 1,401,749
5— 41: 1,401,726
[illegible]: 1,401,745
[illegible]: 1,401,802
[illegible]: 1,401,752
14— 1: 1,401,771
[illegible]: 1,401,842
[illegible]: 1,401,873
[illegible]: 1,401,748
[illegible]: 1,401,750
[illegible]: 1,401,734
[illegible]: 1,401,823
[illegible]: 1,401,441
17— 34: 1,401,769
18— 1: 1,401,181
2: 1,401,746
7: 1,401,763
[illegible]: 1,401,179
11: 1,401,676
[illegible]: 1,401,818
20— [illegible]: 1,401,779
[illegible]: 1,401,409
22— 74: 1,401,926
[illegible]: 1,401,901
[illegible]: 1,401,914
[illegible]: 1,401,159
[illegible]: 1,401,877
23— 3: 1,401,148
5: 1,401,384
13: 1,401,136
[illegible]: 1,401,187
[illegible]: 1,401,741
[illegible]: 1,401,982
34: 1,401,125
[illegible]: 1,401,691
[illegible]: 1,401,693
[illegible]: 1,401,787
24— 3: 1,401,134
11: 1,401,124
[illegible]: 1,401,809
31: 1,401,906
[illegible]: 1,401,778
92: 1,401,232
110: 1,401,333
34— 104: 1,401,694
126: 1,401,361
[illegible]: 1,401,480
[illegible]: 1,401,724
[illegible]: 1,401,740
105: 1,401,698
[illegible]: 1,401,754
[illegible]: 1,401,718
[illegible]: 1,401,254
[illegible]: 1,401,214
[illegible]: 1,401,271
[illegible]: 1,401,740
54: 1,401,710
[illegible]: 1,401,306
[illegible]: 1,401,289
40— 10: 1,401,260
[illegible]: 1,401,253
[illegible]: 1,401,170
[illegible]: 1,401,348
125: 1,401,218
[illegible]: 1,401,227
[illegible]: 1,401,741
[illegible]: 1,401,580
[illegible]: 1,401,549
43— 8: 1,401,548
[illegible]: 1,401,258
[illegible]: 1,401,679
[illegible]: 1,401,182
[illegible]: 1,401,252
45— [illegible]: 1,401,703
44— [illegible]: 1,401,347
45— 2: 1,401,139
11: 1,401,628
12: 1,401,529
[illegible]: 1,401,718
[illegible]: 1,401,171
104: 1,401,775
[illegible]: 1,401,819
[illegible]: 1,401,469
[illegible]: 1,401,458
46— 22: 1,401,940
[illegible]: 1,401,813
[illegible]: 1,401,275
[illegible]: 1,401,558
[illegible]: 1,401,844
[illegible]: 1,401,940
[illegible]: 1,401,476
47— 4: 1,401,199
[illegible]: 1,401,688
[illegible]: 1,401,281
[illegible]: 1,401,922
[illegible]: 1,401,891
51— 20: 1,401,894
[illegible]: 1,401,696
[illegible]: 1,401,788
[illegible]: 1,401,686
[illegible]: 1,401,693
[illegible]: 1,401,870
52— 8: 1,401,446
[illegible]: 1,401,841
54— 54: 1,401,909
[illegible]: 1,401,740
[illegible]: 1,401,254
71: 1,401,254
57— 7: 1,401,814
18: 1,401,271
[illegible]: 1,401,740
54: 1,401,710
[illegible]: 1,401,306
[illegible]: 1,401,289
60— 10: 1,401,260
20: 1,401,253
[illegible]: 1,401,170
[illegible]: 1,401,348
125: 1,401,218
[illegible]: 1,401,227
[illegible]: 1,401,741
[illegible]: 1,401,580
[illegible]: 1,401,549
62— 25: 1,401,548
